Read carefully, this *ḥadith* does not ban selling fruit that is not fully grown.<sup>20</sup> The key words are italicized. The *ḥadith* recognizes implicitly what contemporary agri-businesses know from experience, that to wait until a fruit is fully ripe before selling it is to wait too long. The risk of spoilage is high, and the fruit has little or no shelf life, compelling the buyer to consume it almost immediately. Thus, it is permissible to sell fruit anytime after it has commenced the ripening process, a period that might broadly be characterized as "almost ripe." Indeed, one *ḥadith* uses this characterization:

The Prophet . . . forbade the sale of fruits till their benefit is evident; and the sale of date palms till the dates are almost ripe. He was asked what "are almost ripe" meant. He replied, "Got red and yellow."<sup>21</sup>

"Almost ripe," the "benefit is evident," and "red and yellow" (i.e., not green) all connote the same idea. Conversely, if fruit is so unripe that it is susceptible to blight, then it should not be sold. Another *ḥadith* explains the link between the un-ripened state and susceptibility to disease:

In the lifetime of Allah's Apostle . . . the people used to trade with fruits. When they cut their date fruits and the purchasers came to receive their rights, the sellers would say, "My dates have got rotten; they are blighted with disease, they are afflicted with Qithām [a disease which causes the fruit to fall before ripening]." They would go on complaining of defects in

<sup>19</sup> MUSLIM, *supra*, vol. III.A, Book 21 (Book of Buyu — Book Pertaining to Business Transactions), p. 14, *ḥadith* no. 1535 (emphasis added).

<sup>20</sup> Admittedly, there is one *ḥadith* that states:

Allah's Apostle . . . forbade the sale of date fruits till they were ripe. Abū 'Abdullāh [Al-Bukhārī] said, "That means till they were red [can be eaten]."

BUKHARI, *supra*, vol. III, book XXXIV (The Book of Sales (Bargaining)), p. 220, *ḥadith* no. 400 (bracketed insert in original) (emphasis added). However, this strict utterance is qualified by other *ḥadiths*, such as the ones quoted herein. In other words, it is not the widely accepted view that fruits must be entirely ripe to be sold.

<sup>21</sup> BUKHARI, *supra*, vol. III, book XXXIV (The Book of Sales (Bargaining)), *ḥadith* no. 402 at p. 220.

<sup>18</sup> IQBAL & MIRAKHOR, *supra*, at 82.

their purchases. Allāh's Apostle . . . said, "Do not sell the fruits before their benefit is evident (*i.e.*, free from all the dangers of being spoiled or blighted)," by way of advice for they quarreled too much.<sup>22</sup>

In brief, there is too much uncertainty — *gharar* — as to whether this very young fruit will mature. The seller would be unjustly enriched (and the buyer unjustly deprived) by obtaining money (from the buyer) for fruit that might spoil on account of the early stage at which it was sold. That money could take the form of cash, or dates, in a barter transaction as described in the *hadith*.

What, then, is the precise dividing line between "not almost ripe" and "almost ripe"? When does the unacceptable major *gharar* associated with selling fruit that is "not almost ripe" become permissible minor *gharar* correlated with "almost ripe" fruit? Conceptually, that line is "good condition" — the fruit must be in a condition suitable for sale, and by extension, near-term consumption without causing illness or death. The beauty of the above quoted *hadith* is it allows for the interpretation that agricultural science should answer the question. Different crops — dates and corn, for instance — cross that line at a point known best to specialists (including experienced farmers).

A final and amusing note is whether this *hadith* applies to vegetables, as well as fruit? After all, corn surely is a vegetable? In fact, corn fits in both categories, depending on its origin. Corn is a grain. When it originates from the reproductive part of a plant, it is a fruit. When it comes from the vegetative part of a plant, it is a vegetable. That said, by use of *qiyās* (analogical reasoning), the *hadith* may be applied to any fruit or vegetable, or any object that is edible after a ripening process, and even to decorative flowers.

<sup>22</sup> BUKHARI, *supra*, vol. III, book XXIV (The Book of Sales (Bargains)), pp. 218-219, *hadith* introducing Chapter 87 (bracketed insert in original).

## Chapter 27

### BANKING LAW: INTEREST (RIBĀ)

Neither a borrower nor a lender be;  
For loan oft loses both itself and friend,  
And borrowing dulls the edge of husbandry.  
This above all: to thine own self be true,  
And it must follow, as the night the day,  
Thou canst not then be false to any man.

William Shakespeare (1564-1616),  
*Hamlet* (1601), Act I, Scene 3 (Polonius)

#### SYNOPSIS

##### § 27.01 DEFINING "RIBĀ"

##### § 27.02 LONG HISTORY BEHIND RIBĀ

[A] Religious Perspectives before Islam

[B] Usury and American Law

##### § 27.03 SOURCES FOR RULE AGAINST RIBĀ

##### § 27.04 RIBĀ, QARD AL HASSAN, AND FORBIDDEN (HARĀM) TRANSACTIONS

[A] *Ribā al-Nasī'a* (Excess in Credit Transactions)

[B] *Ribā al-Faḍl* (Unequal Spot Commodity Trades)

[C] *Ribā Al-Jahiliyya* (Defer and Increase)

[D] *Da' Wa Tu'Ajjal* (Prepay and Reduce)

##### § 27.05 RATIONALES FOR PROHIBITION ON RIBĀ

[A] Unjust Enrichment (*Al-Ithra' Bila Sabab*)

[B] Complimentary Rationales

##### § 27.06 SHĪTE DISTINCTIONS

##### § 27.01 DEFINING "RIBĀ"

The prohibition of *ribā* is considered one of the most important and noble missions in Islamic Law. It also has momentous practical repercussions that distinguish Islamic from typical non-Muslim finance:

Islamic finance, an implementation of the *Shar'ā*, is premised quite differently than [*sic*] conventional, interest-based finance: the risk-reward conception is fundamentally different. . . . Core premises in Islam look

more to profit and loss sharing. Thus, trading and partnership or joint venture arrangements are more appropriate risk-reward paradigms. Rewards without commensurate risk and preferential rewards are not permitted. *Ribā* (commonly described as interest) is impermissible under the *Shari'a*; it is both a reward without commensurate risk and a preferential reward to one party (whether a debt provider or an equity provider). The interest-based, debtor-creditor paradigm is rejected, although debtor-creditor constructs are acceptable (if arising as a result of *Shari'a*-compliant arrangements). For the most part, predetermined fixed returns are not permissible. Guarantees or assurances of return of or on capital are not permissible. Further, the use of money as a commodity is not acceptable under the *Shari'a*. Money is not an asset that can itself earn money; it is a measured store of value and a medium of exchange. Every financial transaction must involve a tangible asset, leaving aside certain exceptions, such as intellectual property. Application of these principles precludes the sale and purchase of certain instruments altogether, the sale and purchase of other *Shari'a*-compliant debts at a premium or discount, and the sale of other financial instruments that do not represent interests in tangible assets. Examples include mortgage loans (which also include *ribā* elements), debts (including receivables, which frequently include *ribā* elements) that have been divorced from underlying assets, and derivatives.<sup>1</sup>

Teaching the Muslim community (*ummah*) about transactions involving *ribā* resonates widely in the Qur'an, and is a frequent topic in the *hadith*. Indeed, the topic is treated more frequently than a variety of other issues that are themselves quite important, such as drinking, gambling, and theft. Put succinctly, the *Shari'a* admonishes Muslims to avoid *ribā* by plainly and without any ambiguity stating a prohibition against transactions that involve the paying or receipt of *ribā*. But, this brief statement is deceptive.

The prohibition is a tricky one to understand. To whom does it apply, and when — all Muslims, regardless of whether they are in a Muslim country or not, and regardless of whether they are dealing with a non-Muslim? What kinds of financial transactions involve *ribā* — simple loans, or complex, engineered financial products such as derivatives? What is the purpose underlying the ban on *ribā* — is it to prevent exploitation of one individual (such as a borrower) by another (such as a lender), or is there also a concern to protect the integrity of financial markets and the community at large? Most importantly, what is "*ribā*" anyway — is it interest of any form, or is the concept more akin to the American idea of unjust enrichment, such as a usurious interest rate? (The Arabic term for "unjust enrichment" is "*al-ithra' bila sabab*.")

To begin, it is important to be clear what "interest," or an "interest rate," is. In conventional non-Muslim banking and finance, an:

interest rate is the price paid for borrowing money. We usually calculate interest as percent per year on the amount of borrowed funds. There are

many interest rates, depending upon the maturity, risk, tax status, and other attributes of the borrower.

Some examples will illustrate how interest works:

- When you graduate from college, you have only \$500. You decide to keep it in currency. If you spend none of your funds, at the end of a year you still have \$500, because currency has a zero interest rate.
- A little later, you put \$2,000 in a savings account in your local bank, where the interest rate on savings accounts is 4 percent per year. At the end of 1 year, the bank will have paid \$80 in interest into your account, so the account is now worth \$2080.
- You start your first job and decide to buy a small house that costs \$100,000. You go to your local bank and find that 30-year, fixed-interest-rate mortgages have an interest rate of 5 percent per year. Each month you make a mortgage payment of \$790.79. Note that this payment is a little bit more than the pro-rated monthly interest charge of 5/12 percent per month. Why? Because it includes not only interest, but also *amortization*. This is repayment of *principal*, the amount borrowed. By the time you have made your 360 monthly payments, you will have completely paid off the loan.

From these examples we see that interest rates are measured in percent per year. Interest is the price paid to borrow money, which allows the borrower to obtain real resources over the time of the loan.<sup>2</sup>

As for Islamic banking and finance, the *fukahā'* (legal scholars) of all Four *Sunni* Schools, as well as all of the denominations within those Schools, agree on the prohibition against *ribā*.

In sharp contrast to their non-Muslim counterparts, the *fukahā'* share a similar understanding of the danger that *ribā* might cause to the community. That also is true for *Shi'ite fukahā'*. As for the definition of the term "*ribā*," all Islamic jurists are agreed: the literal meaning of the Arabic noun "*ribā*" is "increase." The Qur'an uses the term, in its verb form "*rabat*," which may be translated as "increases," "grows," or "swells," even in non-economic contexts. For example, *surah 22 ayah 5* states:

... We created you from dust, then a drop of fluid, then a clinging form, then a lump of flesh, both shaped and unshaped: We mean to make Our power clear to you. Whatever We choose We cause to remain in the womb for an appointed time, then We bring you forth as infants and then you grow and reach maturity. Some die young and some are left to live on to such an age that they forget all they once knew. You [Muhammad] sometimes see the earth lifeless, yet when We send down water it stirs and swells [*rabat*] and produces every kind of joyous growth. . . .<sup>3</sup>

<sup>2</sup> PAUL A. SAMUELSON & WILLIAM D. NORDHAUS, *ECONOMICS* 505-506 (New York, New York: McGraw-Hill/Irwin, 18th ed., 2005) (emphasis original). [Hereinafter, SAMUELSON & NORDHAUS.]

<sup>3</sup> THE QUR'AN — A NEW TRANSLATION BY M.A.S. ABDEL HALEEM 22:5 at 209 (Oxford, England: Oxford University Press, 2004). [Hereinafter, QUR'AN.]

<sup>1</sup> Michael J.T. McMillen, *International Legal Developments in Review: 2007 — Islamic Law Forum*, 42 THE INTERNATIONAL LAWYER 1017, 1029-1022 (Summer 2008). [Hereinafter, McMillen.]

(Interestingly, the first and third sentences of this passage, which indicate God's creative power and foreknowledge of life, are used to justify the Islamic precept against abortion.) The metaphor of the swelling of earth after rainfall in the above passage connects the literal and legal meaning of "ribā" together. The link is the concept of addition, or synonymously, excess, as an Explanatory Note to the Chapter containing the *hadiths* on ribā compiled in Ṣaḥīḥ Muslim states:

The word *Ribā* is partially covered by the English word "usury" which, in modern parlance, signifies only an extortionate interest. The Arabic *Ribā*, on the other hand, means *any addition, however slight, over and above the principal sum lent*, and thus includes both "usury" and "interest." It also includes an excess according to the legal standard of measurement and weight, in one of the two homogeneous articles in which such excess is stipulated as an obligatory payment on one of the contracting parties.<sup>4</sup>

Put succinctly, the essence of *ribā* is addition, or excess, not merely "interest," "extortionate interest," or "usury." Accordingly, a standard legal definition of "ribā" in Islamic Law typically reads like the following:

[*ribā* refers to] the practice of charging financial interest or a premium in excess of the principal amount of a loan.<sup>5</sup>

Similarly:

*Ribā* concepts relate to any excess paid or received on principal, or an increase in price or return, particularly an increase that is in some manner a function of time.<sup>6</sup>

Ostensibly, these definitions confine *ribā* to the setting of lending transactions.

That inference is misleading. First, it is critical to understand the concept of a loan, or lending transaction, in the *Shari'a* and Islamic banking circles is more restricted than under American law and non-Muslim financial centers. Under Islamic Law, a loan is an act of charity. It is a manifestation of love and empathy by a wealthy person toward a poor or needy person. (The adjectives "poor" and "needy" are not redundant. A "needy" person is only one step above a "poor" person in terms of hardship.) The monied person is not supposed to extract any excess (*ribā*) from the disadvantaged person. Rather, the former is supposed to help the latter, and expect nothing — other than the exact amount initially transferred — in return. In contrast, in the non-Muslim world, lending to a poor or needy person (aside from the relatively new phenomenon of microfinance, which arose in the Muslim country of Bangladesh and for which Muhammad Yunus won the 2006 Nobel

<sup>4</sup> ṢAḤĪḤ MUSLIM — BEING TRADITIONS OF THE SAYINGS AND DOINGS OF THE PROPHET MUHAMMAD AS NARRATED BY HIS COMPANIONS AND COMPILED UNDER THE TITLE AL-JAM' US-SAḤĪḤ BY IMAM MUSLIM, RENDERED INTO ENGLISH BY ABDEL HAMID SIDDIQI, WITH EXPLANATORY NOTES AND BRIEF BIOGRAPHICAL SKETCHES OF MAJOR NARRATORS, CORRECTED AND REVISED BY DR. HASSAN, vol. IIIA, book 22 (Book of Share Tenancy), p. 47, fn. 1 to Chapter 14 (Lahore, Pakistan: Sh. Muhammad Ashraf Booksellers and Exporters, 1990) (emphasis added). [Hereinafter, MUSLIM.] In view of the above definition, unfortunately Chapter 14 is titled "*Ribā* (Usury)," whereas "*Ribā* (Excess)" or "*Ribā* (Addition)" would be more accurate.

<sup>5</sup> ZAMEER IQBAL & ABBAS MIRAKHOR, AN INTRODUCTION TO ISLAMIC FINANCE THEORY AND PRACTICE 54 (Singapore: John Wiley & Sons (Asia) Pte Ltd, 2007) (emphasis added). [Hereinafter, IQBAL & MIRAKHOR.]

<sup>6</sup> McMillen, *supra*, fn. 11 at 1021 (emphasis added).

Peace Prize) is imprudent. As the conventional wisdom goes, poor or needy people lack creditworthiness, and are unlikely to be in a position to make productive use of loaned funds. The point of lending is to allocate credit to its most efficient uses, with the creditor earning a return, namely interest, for bearing the credit risk of the borrower, and with the borrower paying interest as the cost of funds.

To summarize the first point, the terms "loan," "lending," and their equivalent are seen in entirely different paradigms: for Islam, charity; for non-Muslim banking, credit allocation and wealth creation. What, then, is the appropriate classification under the *Shari'a* for credit allocation and wealth creation? That is, to the world of non-charitable financial transactions that Wall Street calls "loans," what is the right Islamic legal label? The short answer is "profit sharing." That answer is apparent from the ways creditor-debtor relationships are structured under the *Shari'a*.

As explained below, they are designed as profit-sharing ventures between or among partners, who are said (in theory, at least) to have a common purpose, not as potentially adversarial, zero-sum games between lenders and borrowers. It is worth observing that the narrow range of transactions properly called "loans" under the *Shari'a* is the same as that under the Old Testament — charity towards the poor and needy — and thus both Jewish and Islamic Law forbid extraction of excess (*ribā*). (This fascinating inter-faith history is explained below.)

Second, in truth, *ribā* arises in many non-financial contexts. This point is clear from the above quoted Explanatory Note, which speaks not only of lending money, but also of exchanges of homogeneous merchandise. Thus, the Explanatory Note continues:

The following are the ingredients of usurious transactions:

- The two thing[s] of exchange between the two parties must be *homogeneous or of the same character, but differing in size, quality, or measurement*, for example, if gold is exchanged for gold of the same weight, and quality, in [a] hand to hand transaction, it is not interest. If unequal, the excess is interest.
- In case there is a stipulation of demand for the excess over and above the principal sum to be paid at a future date, the excess is considered as interest.<sup>7</sup>

Accordingly, the following definition explains that *ribā* is a concept relevant to monetary transactions other than loans, and even to non-monetary dealings:

["*ribā*" means] to increase, to augment, swellings, forbidden "*addition*," to make more than what is given, the practicing or taking of usury or the like, an excess or an addition, or an addition over and above the principal sum that is *lent* or *expended*.<sup>8</sup>

This definition — specifically, the word "expended" — provides more insight into the concept of *ribā*, what exactly is forbidden, and why.

<sup>7</sup> MUSLIM, *supra*, vol. IIIA, book 22 (Book of Share Tenancy), p. 47, fn. 1 to Chapter 14 (emphasis added).

<sup>8</sup> IQBAL & MIRAKHOR, *supra*, at 54.

What is unacceptable is not increase *per se*, not an addition obtained through earned profit. Rather, the moral lapse lies in obtaining an increase free of charge, without giving value in exchange, or exerting effort — in brief, without doing a shred of work. The definition embodies the principle that any unreasonable increase is considered *ribā*. Thus, Professor Mahmoud El-Gamal gives another definition of *ribā* as follows:

trading two goods of the same kind in different quantities, where the increase is not a proper compensation.<sup>9</sup>

This definition encompasses both non-monetary quantities (such as a barter trade of agricultural products), as well as monetary dealings. That is, it clearly covers situations of increase that arise from exchanging different goods, and by logical extension, services.

## § 27.02 LONG HISTORY BEHIND RIBĀ

### [A] Religious Perspectives before Islam

Another highly significant point is the nearly catholic (universal) concern about *ribā*. *Ribā* is not an invention of the *Sharī'a*, nor does Islamic Law claim as much. Rather, *ribā* is a concept known throughout history, albeit in different terms.<sup>10</sup> Prominent additional examples of restrictions on interest are sourced in at least four different faiths. They are as follows:<sup>11</sup>

#### (1) Hinduism —

The *Vedic* texts of Ancient India, which date from 2000-1400 B.C., are among the sacred scriptures of Hinduism. In the *Vedas*, the Sanskrit term "*kusidin*," which translates as "usurer," is used on several occasions. This term refers to any person

<sup>9</sup> MAHMOUD A. EL-GAMAL, *ISLAMIC FINANCE — LAW, ECONOMICS, AND PRACTICE* at 49 (New York, New York: Cambridge University Press, 2006) (emphasis added).

<sup>10</sup> See James Ackerman, *A History of Usury*, 27 ARIZONA STATE LAW REVIEW 61 (1981). [Hereinafter, Ackerman.] This article covers perspectives on usury of many religions and cultures, although not Islam. It explains that for centuries, many religions and cultures have recognized the intuition that lending to a commercial enterprise, for a business purpose, is not as troublesome as lending to an individual, for consumption, especially to a poor person. The article reviews the views on usury of philosophers and theologians, including Plato (circa 428/427-348/347 B.C.), Aristotle (384-322 B.C.), Saint Thomas Aquinas (1225-1274 A.D.), Martin Luther (1483-1546), and John Calvin (1509-1564).

In addition, the article provides and excellent summary of points made by the famous English philosopher and jurist, Jeremy Bentham (1748-1832), in his *Letter in Defense of Usury* (written in 1787 to Adam Smith (1723-1790) in response to Smith's analysis in *The Wealth of Nations* (1776) about the dangers of speculation) Bentham argued usury restrictions encouraged widespread evasion (even to the extent that the law was ineffective), created contempt for the law. Bentham also pointed out that sometimes a loan is needed to prevent a loss. Of course, as a utilitarian, Bentham urged that freedom of contract, including as to interest rates, was part of liberty, and in any event, trying to limit rates is problematic, because there is no one "right" rate. The article also discusses the use of nominal partnerships in Medieval Europe to avoid the Roman Catholic prohibition on usury (which at the time meant any interest).

<sup>11</sup> See Iqbal & Mirakhor, *supra*, at 69-72.

who lends an asset and charges interest to the borrower. In addition, there are references to "interest" in the later *Sutra* texts (700-100 B.C.), which appear to look askance at charging interest. During this later period, Vasishtha, a renowned Hindu law-maker, created a special rule. The rule forbade members of the two highest castes, *Brahmanas* (Hindu priests) and *Kshatriyas* (warriors), from being usurers, or indeed from lending at interest.

#### (2) Buddhism —

The *Jatakas* (600-400 B.C.) refer to usury in a disparaging way. This sacred Buddhist text states that "hypocritical ascetics are accused of practicing it."<sup>12</sup>

#### (3) Judaism —

The Old Testament prohibits charging usurious interest. This stricture pre-dates the first revealed verse of the Qur'an (in 610 A.D.) by at least 700 years, and more likely by close to a millennium. H.G. Wells observes in his classic *The Outline of History*:

All the books that constitute the Old Testament were certainly in existence, and in very much their present form, at latest by the year 100 B.C. Most of them were probably recognized as sacred writings in the time of Alexander the Great (330 B.C.). They were the sacred literature of a people, the Jews, who, except for a small remnant of common people, had recently been deported to Babylonia from their own country in 587 B.C. by Nebuchadnezzar II, the Chaldean. They had returned to their city, Jerusalem, and had rebuilt their temple under the auspices of Cyrus, that Persian conqueror who . . . in 539 B.C. overthrew Nabonidus, the last of the Chaldean rulers in Babylon. The Babylonian Captivity had lasted about fifty years.<sup>13</sup>

In Hebrew, the word "interest" is expressed by either "*neshekh*" or "*turbith*." The literal meaning of "*neshekh*" is "a bite." The connotation of "*turbith*" is similar to "*ribā*," namely, a gain from lending an asset, whether movable property or money. Several references in the Torah — the first five books of the Old Testament — condemn usury:

- From *Exodus*, Chapter 22, verse 23:

If you lend money to one of your poor neighbors among my people, you shall not act like an extortioner toward him by demanding interest from him.<sup>14</sup>

- From *Leviticus*, Chapter 25:

<sup>12</sup> Iqbal & Mirakhor, *supra*, at 70.

<sup>13</sup> H.G. WELLS, *THE OUTLINE OF HISTORY — THE WHOLE STORY OF MAN* 214 (1920) (Garden City, New York: Doubleday & Company, Inc. ed., 1971).

<sup>14</sup> *The Book of Exodus* 22:24, in *THE CATHOLIC STUDY BIBLE* 82 (Oxford: Oxford University Press, 1990). [Hereinafter, *BIBLE*.]

<sup>36</sup>Do not exact interest from your countryman either in money or in kind, but out of fear of God let him live with you. <sup>37</sup>You are to lend him neither money at interest nor food at a profit.<sup>15</sup>

- From *Deuteronomy*, Chapter 23:

<sup>20a</sup>You shall not demand interest from your countrymen on a loan of money or of food or of anything else on which interest is usually demanded.

<sup>21</sup>You may demand interest from a foreigner, but not from your countryman, so that the Lord, your God, may bless you in all your undertakings on the land you are to enter and occupy.<sup>16</sup>

Thus, as Biblical commentaries observe:

- [L]ending money in the Old Testament was often seen as assistance to the poor in their distress, not as an investment; making money off the poor by charging interest was thus forbidden.<sup>17</sup>
- Interest and overcharge were strictly forbidden in the old law among Israelites because it was presumed that the borrower was in distress. . . . Civil and divine law will take the offender's wealth from him.<sup>18</sup>

In addition, a number of other Old Testament passages condemn interest, or at least, usurious interest, and calling upon the beneficiaries of it to share their gains with the poor. For instance:

- From the *Psalms*:

LORD, who may abide in your tent?

Who may dwell on your holy mountain?

. . .

Who keeps an oath despite the cost,

lends no money at interest,

accepts no bribe against the innocent.<sup>19</sup>

- From *Proverbs*:

The rich rule over the poor,

and the borrower is the slave of the lender.

. . .

He who increases his wealth by interest and overcharge

<sup>15</sup> The Book of Leviticus 25:36-37, in BIBLE, *supra*, at 136.

<sup>16</sup> The Book of Deuteronomy 23:20-21, in BIBLE, *supra*, at 212.

<sup>17</sup> BIBLE, *supra*, fn. to Psalm 15:5 at 654.

<sup>18</sup> BIBLE, *supra*, fn. to Proverbs 28:8 at 777.

<sup>19</sup> The Book of Psalms 15:5, in BIBLE, *supra*, at 654.

gathers it for him who is kind to the poor.<sup>20</sup>

- From *Jeremiah*:

Woe to me, mother, that you gave me birth!

a man of strife and contention to all the land!

I neither borrow nor lend,

yet all curse me.<sup>21</sup>

- From *Ezekiel*:

<sup>5</sup>If a man is virtuous — if he does what is right and just, . . . <sup>7</sup>if he oppresses no one, gives back the pledge received for a debt, commits no robbery; if he gives food to the hungry and clothes the naked; <sup>8</sup>if he does not lend at interest nor exact usury . . . — he shall surely live, says the Lord God.<sup>22</sup>

<sup>1</sup>Thus the word of the Lord came to me: . . . <sup>12</sup>There are those in you who take bribes to shed blood. You exact interest and usury; you despoil your neighbors violently; and me you have forgotten, says the Lord God.

<sup>13</sup>See, I am brushing one hand against the other because of the unjust profits you have made and because of the bloodshed in your midst.<sup>23</sup>

Notably, the above-quoted Old Testament passages span the entire Biblical narrative in the Jewish tradition.

That is, these passages are not only from the Torah, which means "Law" or "Teaching" and includes *Exodus*, *Leviticus*, and *Deuteronomy*. (The Torah is also known as the "Pentateuch," a title dating from the second century B.C. given in the earliest Greek translation, which means "five-part writing.")<sup>24</sup> The passages also come from the Historical Books (such as *Nehemiah*), which recount the story of the rise, fall, and future of the Israelite kingdoms.<sup>25</sup> They are sourced in the *Wisdom Books* (e.g., as found in the *Psalms* and *Proverbs*), the unifying theme of which is to teach the proper path for a successful life.<sup>26</sup> Finally, they are from the *Prophetic Books* (which lay out a theology of salvation through the inspired words of Prophets such as *Jeremiah* and *Ezekiel*).<sup>27</sup> This coverage alone impresses the seriousness of the rule about interest, and the supporting rationale that the poor must not be exploited, in Judaism.

<sup>20</sup> The Book of Proverbs 22:7, 28:8, in BIBLE, *supra*, at 770, 777 respectively.

## (4) Christianity —

Significantly, the New Testament does not contain injunctions against interest or usury *per se*. That is not to say the topic ceased to be of importance. The medieval classic *The Divine Comedy*, written by Dante Alighieri between 1308 and 1321 A.D. (the year Dante died), is an allegory in which the author journeys through hell, purgatory, and heaven and describes them in vivid detail in three cantos — *Inferno*, *Purgatorio*, and *Paradiso*, respectively. *The Divine Comedy* builds on Catholic Christian teaching and Ancient tradition, particularly the work of Virgil. Dante's journey in the three realms of the dead, which highlight sin (hell), penitence (purgatory), and salvation (heaven), occurs in 1300, starting with the night before Good Friday until the Wednesday after Easter. In the *Inferno*, Dante defines nine circles of hell, and identifies who is in each circle. Damnation in the seventh circle is the fate of the violent. Usurers burn in the inner ring of the seventh circle of hell.<sup>29</sup> They commit violence against order. Also burning in that inner ring are blasphemers, who commit violence against God, and sodomites, who commit violence against nature. Obviously, then, Dante and many of his contemporaries thought quite poorly of usurers. (Indeed, Dante put people who committed suicide in the middle ring of the seventh circle, just beyond the inner ring, and persons who committed violence against other persons, or against property, in the outer ring.)

With the New Testament, the message relating to interest or usury shifts, and enlarges. The concern is one of oppression and social justice generally, manifest in a large number of passages, not the least of which are the Two Great Commandments and the Sermon on the Mount. Consequently, the New Testament emphasizes forgiveness of debts, extolling such behavior as a spiritually positive practice.

Interestingly, with the Protestant Reformation, the Christian understanding about usury *per se* began to shift. In terms of lexicography, the emphasis changed from any kind of interest to excessive interest. As a legal matter, the prohibition on usury increasingly shifted from a criminal offense to a matter of private conscience. In respect of emerging capitalist financial markets, through the 16th century teachings of John Calvin, Calvinist bankers in Geneva were free to charge non-excessive interest, as long as they were honest in doing so, and paid attention to the needs of the poor.

In summary, the illegality of transactions involving what the *Shari'a* calls "*ribā*" was recognized in the pre-Islamic period, "*al jahiliyyah*." Literally, "*jahil*" means "ignorance," hence the pre-Islamic period is considered one of ignorance, or darkness. However, this appellation is not applied to the entire world. Muslims know that Ancient China, India, Egypt, Greece, Rome, and Persia boasted flourishing civilizations, and the Qur'an itself expresses reverence for Jewish prophets and Jesus Christ. Accordingly, "*al jahiliyyah*" technically applies to the pre-Islamic period on the Arabian Peninsula. It is a geographically bounded rubric, as is the "Dark Ages," which refers to Europe.

In turn, one of the insights emerging from *al jahiliyyah* period is a ban on *ribā*. There is the tell-tale incident of repairing the *Ka'ba* (the holy house in Mecca

(Makkah)). The people of Mecca did not allow any contribution to the repair fund that included *ribā*. In other words, even the pagans believed transactions involving *ribā* were wrongful, and eschewed using funds to which interest had accrued to renovate their sacred site. Their stubborn refusal meant the pagans could not restore completely the *Ka'ba* to its circular form, and helps explain why to this day the shrine is rectangular in shape.

**[B] Usury and American Law**

Of course, long after the advent of Islam, usury became an important topic in the history of American banking law. The United States has a long history of usury laws, other kinds of interest rate regulations, and exceptions to these rules.<sup>29</sup> For example, in the 19th century, there were exceptions to usury laws for loans to corporations, and for salary lending. Two key legal developments led to the general eclipse of usury laws.

First, in 1978, the United States Supreme Court held in *Marquette National Bank of Minneapolis v. First of Omaha Service Corporation* that state usury laws cannot be enforced against nationally-chartered banks that are based in other states.<sup>30</sup> Second, in 1980, in an environment of high inflation, Congress enacted legislation — the *Depository Institutions Deregulation and Monetary Control Act* — that exempted from state usury restrictions federally chartered savings banks, as well as chartered loan companies and installment plan sellers, and thereby essentially over-rode state usury laws. Thus, today, banks are largely free of usury restrictions, and may charge market-based interest rates. However, the 1968 federal *Truth in Lending Act (TILA)*, subjects them to various disclosure requirements, particularly as to costs and fees.<sup>31</sup> The statute is enforced through Federal Reserve Regulation Z.<sup>32</sup> In brief, liberalization at the federal level has preempted the states from imposing usury restrictions. However, restrictions do exist to protect consumers in respect of credit card interest rates. Moreover, some states attempt to regulate interest rates in the "fringe" consumer sector, *i.e.*, auto title pawn, payday lending, and rent to own transactions.

Interestingly, pawn transactions typically are treated not as a loan, but rather as a sale with a right of redemption. Today, auto title pawn is treated as a sale and leaseback. This treatment has created controversy, namely, that in the fringe consumer sector usury limits are needed for moral reasons.<sup>33</sup> Essentially, the argument is that extending credit in this sector at high interest rates creates high risk, and is incongruous with the goal of encouraging upward socioeconomic mobility. In other words, poor people pay more through the use of these loan products than they would on conventional loans, and fall into a debt trap from

<sup>29</sup> See Ackerman, *supra*, at 61.

<sup>30</sup> See 439 U.S. 299 (1978).

<sup>31</sup> TILA is Title I of the *Consumer Credit Protection Act*, 15 U.S.C. § 1601 et seq.

<sup>32</sup> 12 C.F.R. Part 226.

<sup>33</sup> See Lynn Drysdale & Kathleen E. Keest, *The Two-Tiered Consumer Financial Services Marketplace: The Fringe Banking System and Its Challenge to Current Thinking About the Role of Usury Laws in Today's Society*, 51 SOUTH CAROLINA LAW REVIEW 589 (2000).

which it is difficult to escape without a bailout from their families.

Another interesting matter is whether it is "usury" for a seller of a good to quote a cash price and a time price? The answer under United States law is "no." The reason is the so-called "Time — Price Doctrine," which is distinct from the financial concept of the present value of money, and which holds that quotation by a seller of a cash price and a time price does not amount to charging interest. The most famous case on this Doctrine is the 1861 United States Supreme Court decision in *Hogg v. Ruffner*.<sup>34</sup>

### § 27.03 SOURCES FOR RULE AGAINST RIBĀ

Uniformly, all *Shari'a* sources prohibit *ribā*. The *fukahā'* never have seriously doubted or questioned this prohibition. Many different verses in the Qur'ān specifically and unambiguously proscribe *ribā*. For example:<sup>35</sup>

- From *surah* 2:

<sup>270</sup>But those who take usury will rise up on the Day of Resurrection like someone tormented by Satan's touch. That is because they say, "Trade and usury are the same." <sup>271</sup>but God has allowed trade and forbidden usury. Whoever, on receiving God's warning, stops taking usury may keep his past gains — God will be his judge — but whoever goes back to usury will be an inhabitant of the Fire, there to remain. God blights usury, but blesses charitable deeds [*sadaqāt*] with multiple increase: He does not love the ungrateful sinner. <sup>272</sup>Those who believe, do good deeds, keep up the prayer [*as-salāt*], and pay the prescribed alms [*zakah*] will have their reward with their Lord: no fear from them, nor will they grieve. <sup>273</sup>You who believe, beware of God: give up any outstanding dues from usury, if you are true believers. <sup>274</sup>If you do not, then be warned of war from God and his Messenger: You shall have your capital if you repent, and without suffering loss or causing others to suffer loss. <sup>275</sup>If the debtor is in difficulty, then delay things until matters become easier for him; still, if you were to write it off as an act of charity, that would be better for you, if only you knew. <sup>276</sup>Beware of a Day when you will be returned to God: every soul will be paid in full for what it has earned, and no one will be wronged.<sup>36</sup>

- From *surah* 3:

<sup>34</sup> See 66 U.S. 115 (1861). For a recent case on the Time — Price Doctrine, see *Cooperatives v. Ohman*, 402 N.W. 2d 235 (Minn. Ct. App. 1987 (holding against the lender after it revealed its calculations)).

<sup>35</sup> In addition to the above-quoted *surahs* and *ayat*, the following passages also are viewed as dealing with the topic of *ribā*: 2:188 (concerning the proper use of assets, and cautioning against the wrongful consumption of property and against bribery); 4:29 (instructing against the wrongful consumption of each other's wealth, and calling for trade by mutual consent); 9:34 (identifying many rabbis and monks as wrongfully consuming the possessions of others, and warning of a grievous punishment for those who hold gold and silver instead of giving to the cause of God (Allāh)).

<sup>36</sup> Qur'an, *supra*, 2: 275-281 at 31-32.

<sup>130</sup>You who believe, do not consume usurious interest, doubled and redoubled. Be mindful of God so that you may prosper — <sup>131</sup>beware of the Fire prepared for those who disbelieve — <sup>132</sup>and obey God and the Prophet so that you may be given mercy.<sup>37</sup>

- From *surah* 4:

<sup>160</sup>For the wrongdoings done by the Jews, We forbade them certain good things that had been permitted to them before: for having frequently debarred others from God's path; <sup>161</sup>for taking usury when they had been forbidden to do so; and for wrongfully devouring other people's property. For those of them that reject the truth we have prepared an agonizing torment.<sup>38</sup>

- From *surah* 30, *ayah* 39:

Whatever you lend out in usury to gain value through other people's wealth will not increase in God's eyes, but whatever you give in charity, in your desire for God's countenance, will earn multiple rewards.

These passages easily explain acceptance among the *fukahā'* of the prohibition of *ribā*.

Nevertheless, as in many walks of life, theory and practice often diverge. Throughout different times, and in different Muslim countries, financial institutions that pay and charge interest have been tolerated. In some Islamic countries, such as Pakistan, there is an effort to Islamicize the banking system by converting it from a western-style, interest-oriented one to one that strictly complies with the *Shari'a*. In a number of other Islamic countries, such as Indonesia, Saudi Arabia, Malaysia, and United Arab Emirates (UAE), a dual banking system exists, whereby banks may offer *Shari'a* compliant products, conventional western-style products, or both.

Of the four above-quoted passages, the first one is the most critical. Some points of Islamic Law are detailed, but not the rule against interest. The explanation from the Qur'ān is as straightforward as it is poignant, thus conveying the grave danger associated with *ribā*. *Surah* 2, *ayah* 275 connects a person who transacts with *ribā* to a person who is beaten by Satan. In Arabic, "Satan" is an expression of a uniquely and monstrously ugly thing. The *surah* 2 passage then highlights the difference between trade and *ribā*. At the time of the revelation of the Qur'ān, some people argued trade and *ribā* are ineluctably intertwined — two sides of the same coin, as it were. God (Allāh) makes plain this argument is false. Trade in Islam is permitted and encouraged, because through it people work and earn a living. In contrast, *ribā* is strictly forbidden (*harām*). Why?

The passage does not expressly give a reason. For present purposes, suffice it to say the generally accepted arguments are that earning money through interest involves no self-exertion by the lender, and causes oppression to the borrower. As regards *ayat* 278 and 279, the *fukahā'* explain *ribā* is the only sin of which God

<sup>37</sup> Qur'an, *supra*, 3:130-132 at 44.

<sup>38</sup> Qur'an, *supra*, 3:160-161 at 65.

orders people to cease, and threatens war from God and Muhammad if the order is not heeded. *Ayah* 280 encourages the community to support each other and unite against excessive transactions, specifically by forgiving debt. It is noteworthy that *ayah* 281, which follows the injunction against *ribā*, was the last verse revealed to Muhammad before his death in 632 A.D.

Of course, there is a widely understood argument that *ribā* carries benefits. Under non-Muslim banking principles, interest is an economically rational, market-based price of risk to which a lender is exposed, and the appropriate cost for the privilege of borrowing charged to a borrower commensurate with the credit-worthiness of the borrower and uncertainty of repayment. It also may be argued that there is a proper distinction between interest and usury. Only usury involves an injustice, in the sense of an unreasonable and unearned excess. Indeed, *surah* 2 speaks of "interest," while *surah* 3 uses the term "usurious interest," and *surah* 4, *ayah* 161 and *surah* 30, *ayah* 39 employs the word "usury." Surely these distinctions should be respected and probed, and not lumped and condemned under the banal word "interest?"

The *Shari'a* does not gainsay the plausibility of these arguments. Rather, it stresses that the danger of *ribā* is greater than its benefit. True, a few people might benefit from *ribā*, but there are two obvious dangers. First, those people jeopardize their entry into Heaven; by clinging to the gains they get from *ribā*, they put themselves in Hell. Second, a whole community could become progressively less egalitarian, and ultimately destroyed by *ribā*. A small, socioeconomic elite class could be enriched, while the vast majority could be beholden to the elites, and impoverished by their debt bondage. As a general *Shari'a* principle, if the cost or harm of an act exceeds its benefit, then that act is prohibited. Consider *surah* 2, *ayah* 219:

They ask you [Prophet] about intoxicants and gambling: say, "There is great sin in both, and some benefit for people: the sin is greater than the benefit."<sup>39</sup> . . .

Though this passage articulates a principle in the contexts of alcoholic beverage consumption and gambling, the principle — enjoining an act where costs exceed benefits — is not specific to them. Islamic jurists apply it to other contexts, including *ribā*.

The *Sunnah* reinforces the injunctions in the Qur'an against *ribā*. The Prophet Muhammad explains that any transaction involving *ribā* is forbidden. For example, the following *hadith* states:

Do not sell gold for gold, except one for one, and don't increase a thing upon something; and don't sell silver unless one for one, and don't increase something upon something, and do not sell for ready money something to be given later.<sup>40</sup>

Read closely, this *hadith* forbids three broad categories of transactions: (1) the

unequal exchange of a precious metal, specifically, gold or silver, (2) the unequal exchange of any other object of commerce (*ayn*), and (3) any prepayment arrangement (i.e., a contract not calling for delivery-versus-payment). The repetition of the phrase "one for one," or equivalently, "like for like" is significant. The inference from this repetition is that any excess over an equal exchange is considered *ribā*.

Another *hadith* emphasizes the sin associated with *ribā*:

Jābir said that Allah's Messenger . . . cursed that who accepts the interest and that who pays it, and the one who records it, and the two witnesses. He [Muhammad] said: They are all equal [in guilt].<sup>41</sup>

The verb "curse" is a strong one, indicating the strictness of the *Shari'a* in barring business deals involving *ribā*. Significantly, the sin of dealing with *ribā* is not limited to the lender. It extends to the borrower, and by implication a seller or buyer. In fact, it afflicts not only immediate transactors, but also persons who record or even witness *ribā*.

The curse does not apply to voluntary payment of excess. Consider the following *hadith*, also recorded by *Imām* Muslim:

Abū Rāfi' reported that Allah's Messenger . . . took from a man as a loan a young camel (below six years). Then the camels of charity were brought to him. He ordered Abū Rāfi' to return back [to] that person the young camel (as a return of the loan). Abū Rāfi' returned to him and said: I did not find among them but *better camels above the age of six*. He (the Holy Prophet) said: Give that [the better camels] to him for the best men are those who are best in paying off the debt.<sup>42</sup>

Note clearly that Muhammad himself — not the man who loaned the young camel — instructs repayment in the form of the better camels. Accordingly, suppose a lender requires a borrower to pay the lender more than the sum originally loaned to the borrower. The overage — the difference between the original debt and amount repaid — clearly is *ribā*. Because paying the overage is obligatory, as required by the lender, it is forbidden. However, suppose the lender sets no such requirement. When the tenor (term) of the loan expires, the borrower simply pays an extra sum, entirely on her own volition, perhaps motivated by gratitude to the lender. In this scenario, the excess is not characterized as "*ribā*," at least not in the sense of being forbidden.

As a second example, assume a merchant sells commodities to a buyer on credit. Both parties agree on (1) the period of time the buyer has to tender payment, and (2) a fixed additional amount if payment is not timely (i.e., late). Assume the buyer defaults, needing extra time to make payment. The additional amount is *ribā*, as it arose from a requirement of the seller. The entire transaction — the sale of the underlying goods and the credit terms — is forbidden. In contrast, if item (2) is not stipulated in the loan agreement, and to the pleasant surprise of the seller, the

<sup>39</sup> Qur'an, *supra*, 2:219 at 214.

<sup>40</sup> Muslim, *supra*, vol. IIIA, book 22 (Book of Share Tenancy), p. 47, *hadith* no. 1584.

<sup>41</sup> Muslim, *supra*, vol. IIIA, book 22 (Book of Share Tenancy), p. 56, *hadith* no. 1598.

<sup>42</sup> Muslim, *supra*, vol. IIIA, book 22 (Book of Share Tenancy), p. 60, *hadith* no. 1600 (emphasis added).

borrow provides extra cash along as an apology for late payment and a self-generated means of compensating the seller for the inconvenience of late payment, the transaction does not involve *ribā*.

These hypothetical illustrations suggest a problem: might an unscrupulous lender (seller) argue that payment of excess was a condition in a loan (sales) contract "voluntarily" agreed to by the borrower (buyer)? After all, the creditor might claim, the debtor had the option of walking away from the deal. Put differently, is it possible to blur the line between "voluntary" and "involuntary" assumption of an excess payment, and thereby manipulate whether a loan transaction is lawful or not?

In practice, this possibility does exist. However, the *Shari'a* is quite clear on the delineation. If a debtor initiates the excess payment, with absolutely no sense of obligation to do so, then the transaction does not involve *ribā*. As the Explanatory Note to the above-quoted *ḥadīth* states:

Imām Shawkānī in his book *Nail-ul-Autār* [*Collecting the Strings*] asserts that this *ḥadīth* proves the justification of excess of payment over and above the real amount. It should, however, be borne in mind that this is valid *only when this excess payment is made out of one's own sweet will and not as a condition*, for that makes it an interest which is forbidden.

Then there is also an objection that, since The Holy Prophet . . . is not entitled to receive charity, why did he make the payment out of that? The answer given by Imām Shāfi'ī is that The Holy Prophet . . . did not get it as a loan for his own use, but for the poor and as such he was fully justified in repaying it out of the charity of goods. . . .<sup>43</sup>

Conversely, if the creditor even remotely catalyzes the idea, then *ribā* is involved. Stated simply, as long as the payment of excess is a gift springing originally from the heart and mind of the borrower or seller, then it is permissible. This test suggests how unusual "permissible *ribā*" is, for how many debtors gift extra money to their creditors?

#### § 27.04 RIBĀ, QARD AL HASSAN, AND FORBIDDEN (ḤARĀM) TRANSACTIONS

In practice, it is important to appreciate when a proposed deal may be deemed forbidden (*ḥarām*). Thus, a key question is to what kinds of transactions is the rule against *ribā* applicable? Typically, non-Muslims think of examples from their everyday experience, such as mortgages, loans for automobiles, businesses, education, or home improvement, inter-bank lending, and they think of interest rates — depending on the loan — as fixed or adjustable. These experiences are helpful, in that *ribā* in all of these contexts is *ḥarām*. However, to explain the scope of the prohibition in this manner is to impose a non-Muslim framework on an Islamic legal

rule. It is more authentic to understand the scope in the way Islamic legal scholars (*fukahā'*) conceive it.

According to the *Shari'a*, there are two main types of *ribā*. The first category is "*ribā al-nasi'a*." The second category is "*ribā al-faḍl*." They are not the only kinds of transactions in which *ribā* is actually or potentially involved. However, one kind of transaction plainly is permissible (*ḥalāl*), as it in no way violates the rule against *ribā*. That transaction is known as "*qard al-hassan*."

"*Qard al-hassan*" refers to an interest free loan, and is easy to recognize. Whenever a borrower repays a lender exactly the amount loaned, or returns exactly the quantity and quality of object loaned, the transaction is free from interest. For example, suppose a lender loans a borrower U.S. \$1 million, which the borrower uses over the course of a year. The borrower repays exactly \$1 million. Plainly, no interest is involved in the transaction.

Why might a lender engage in a *qard al-hassan* deal? The short answer is charity, i.e., the lender is being kind to the borrower, behaving in a magnanimous manner by eschewing any fee. To be sure, there are devices under the *Shari'a* through which a lender can obtain a fee, such as a *murābaha* arrangement (i.e., cost-plus pricing, or a non-interest bearing loan). In sum, a *qard al-hassan* transaction is a charitable loan, with no interest charge and a low expectation of repayment of principal. Plainly, no *ribā* — no excess or increase — is involved.

#### [A] Ribā al-Nasi'a (Excess in Credit Transactions)

The literal meaning of the Arabic word "*nasi'a*" is "deferral" or "delay." The word arises in the context of Islamic Contract Law, where a "*nasi'a*" contract is one in which a seller delivers goods presently against future payment of the price for the goods. "*Nasi'a*" is derived from the word "*nasa'a*," which means "to defer or delay." Thus, "*ribā al-nasi'a*" is defined as

[r]iba in a money-to-money exchange provided exchange is delayed or deferred and additional charge is incurred with such deferment.<sup>44</sup>

From this definition, it is clear *ribā al-nasi'a* arises only in the context of a money-for-money exchange. The quintessential instance of such an exchange is a loan transaction, specifically, when a lender gives money to a borrower and requires the borrower to return more than what was originally borrowed. This requirement is dubbed the "prior condition." It can be an *a priori* requirement calling for either a fixed or variable percentage of the loan as compensation for the waiting time of the creditor for repayment.

Historically, *ribā al-nasi'a* was well known in the pre-Islamic period (*al-jahiliyyah*). In practice, there are three different ways *ribā al-nasi'a* can arise. All three instances are forbidden, i.e., *nasi'a* in these instances is *ḥarām*. The first way, mentioned above, occurs when a debtor cannot fulfill her debt. The creditor steps in again and increases the debt to extend the time period for the debtor. The second way is when it is time to pay off the debt. A creditor gives the debtor the option

<sup>43</sup> MUNIR, *supra*, vol. IIIA, book 22 (Book of Share Tenancy), p. 60, Explanatory Note (1) to *ḥadīth* no. 1600 (emphasis added).

<sup>44</sup> IQBAL & MIRAKHOR, *supra*, at xiii.

either to (1) pay back the debt on schedule, or (2) allow her more time to pay, but with an interest charge. The third way involves selling commodities of the same kind, but in excess, which arises because of a deliberate deferral of the date of delivery. For instance, one party sells 10 Burmese rubies on 1 January, in exchange for 12 rubies on 1 February. The second party defers payment for the month of January, but the first party charges an extra 2 rubies precisely because the second party is allowed to keep all 12 rubies for an extra month. The *ribā* exists in the payment the seller charges for the deferral, the extra 2 rubies.

Observe that the first two transactions involve an exchange of money for money, while the third transaction is an exchange of goods for goods. Consequently, *ribā al-nasi'a* sometimes is defined in terms of an excess paid or increase in return in the context of "credit transactions in specified commodities."<sup>45</sup> The obvious question is whether an exchange of money for goods, wherein delivery of the goods is deferred, is forbidden. As indicated above, this kind of transaction is called a "*nasi'a* contract," as it is a deferred delivery deal. But, it is not forbidden (*harām*). That is because its elements are not the exchange of like subjects.

The Prophet . . . bought some foodstuff from a Jew on credit and mortgaged his armour to him.<sup>46</sup>

*Nasi'a* contracts involving payment against later delivery are common in Muslim marketplaces. But, the message of this *ḥadīth*, which 'Āisha, wife of Muhammad narrates, transcends *ribā*. It is a lesson in ecumenical commerce. Muhammad did not have enough funds to purchase food. He was willing to buy food from a Jewish person, to whom he entrusted his protective battle covering as a pledge for credit extended to him.

Observe, too, that a forbidden (*harām*) *nasi'a* arrangement involving a money-for-money exchange can occur under the guise of purchasing goods. As Ṣāliḥ Al Fawzān, Professor of Islamic Jurisprudence at *Imām* Muhammad ibn Saud University in Riyadh, Saudi Arabia, explains:

Another type of prohibited trade is that called *'inah*, in which a seller sells a commodity on credit to a buyer and then buys it from him at the same time at a lower price. For example, a trader sells a car for twenty thousand pounds on credit [and] then buys it from the same man (who has just bought it) for fifteen thousand pounds cash. Thus, the original buyer owes the seller twenty thousand pounds to be paid at the due time. This kind of selling is prohibited as it is mere fraud and forms one of the forms of *ribā*. In this way, the seller sells a sum of money on credit for another one in cash, making the commodity just a means of fraud.<sup>47</sup>

<sup>45</sup> McMillen, *supra*, fn. 11 at 1021.

<sup>46</sup> THE TRANSLATION OF THE MEANINGS OF SAHIH AL-BUKHARI, ARABIC-ENGLISH by Dr. Muhammad Muḥsin Khan vol. III, book XXXIV (The Book of Sales (Bargains)), p. 221, *ḥadīth* no. 404 (Islamic University, Medina, Kingdom of Saudi Arabia; Dar Ahya Us-Sunnah, Al Nabawiya, undated). [Hereinafter, BUKHARI.]

<sup>47</sup> DR. ṢALIH AL-FAWZAN, A SUMMARY OF ISLAMIC JURISPRUDENCE, vol. 2, p. 18 (Riyadh, Kingdom of Saudi Arabia: Al-Ma'man Publishing House, 2005). [Hereinafter, AL FAWZAN.]

This transaction is known as "*bay' al-'inah*." Non-Muslims familiar with Wall Street finance recognize it readily as a repurchase agreement, commonly called a "repo." That is apparent from Diagram 27-1 of the deal hypothesized by Professor Al Fawzān.

From the Wall Street angle, the deal is unproblematic. Economically, the Trader has loaned a car to the Buyer for an agreed upon time period. The Trader receives £20,000 for lending the car. The Buyer returns the car, and gets back £15,000, when the period expires. The Trader thus gains £ 5,000, which is her profit for lending the car. In sum, the net effect of the repo is the Buyer has had use of the car for a specified period, and paid £5,000 for that use.

However, from the perspective of the *Shari'a*, the £5,000 is *ribā*. In the Islamic legal paradigm, the transaction is money-for-money. A car is used as a vehicle to facilitate the reciprocal exchange of the same thing, money, in different amounts.

Diagram 27-1:  
*'Inah* or Repo Transaction

Step 1: Sale of car for £20,000:

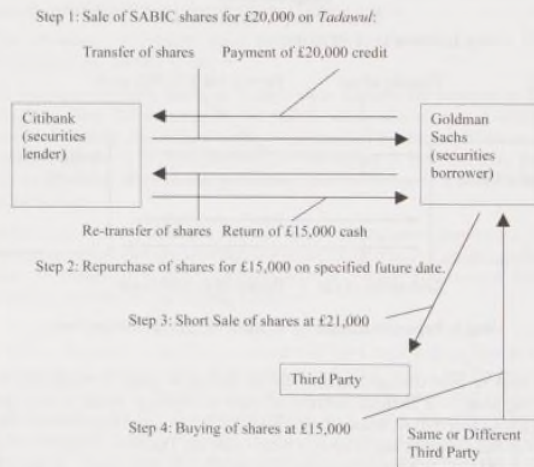

Step 2: Repurchase of car for £15,000 on specified future date.

The *'inah* or repo transaction need not be limited to a car. It could involve any underlying asset — a financial instrument, such as stocks or bonds, real property, such as a house, or indeed money itself. (After all, in the above hypothetical, the car could sit in the garage of the Trader, in which case the Trader essentially is lending the Buyer £20,000 for a fee — interest — of £5,000.) On Wall Street, in the City of London, and many other non-Muslim financial centers, the subject of repos is a financial instrument, and the resulting transaction is called "securities lending." Securities lending sometimes facilitates "covered short selling," i.e., the sale of an asset by a seller that does not own the asset, but borrows it from a lender. (If the seller does not borrow the securities to short sell, then it engages in what is called "naked short selling." Following the global financial market collapses in autumn 2008, several non-Muslim jurisdictions, including Australia, United Kingdom, and United States either banned or restricted short selling.)

To amplify the above example, suppose the two parties are banks, Citibank and Goldman Sachs, and the latter borrows stock from the former in Saudi Arabian Basic Industries Corporation (SABIC), which is traded on the Saudi Stock Exchange in Riyadh, the *Tadawul*. The purpose Goldman Sachs has in mind is to short sell the SABIC shares at a price, hoping to buy them back later on at a lower price, thereby making a profit. The short sale may occur to a third party, possibly on another stock exchange in a time zone different from that of Riyadh, such as the New York Stock Exchange (NYSE). Goldman Sachs might buy them back on that same, or yet a different, stock exchange. The profit from the short sale, anticipates Goldman Sachs, will more than cover the cost of its borrowing SABIC shares from Citibank. Diagram 27-2 depicts the transaction, with an assumed short sale profit of £6,000:

Diagram 27-2:  
**'Inah or Repo Transaction of SABIC Shares, Followed by Short Sale**

For Goldman Sachs, the £6,000 profit from short selling SABIC shares that it borrowed from Citibank covers the cost of borrowing those shares, £5,000. Thus, the net result for Goldman Sachs is a profit of £1,000. Citibank, too, makes a profit, namely, £5,000.

Put simply, from the Wall Street angle, "everybody wins." The key question is why does the *Shari'a* forbid a transaction — the repo — that is commonplace in, and worth hundreds of millions of dollars everyday to, non-Islamic financial centers, and which facilitates other potentially profitable deals, like short selling? Why, stated colloquially, "spoil the party"?

The answer is because a repo — the *'inah* — involves *ribā*. That was made plain by the Prophet Muhammad in a *ḥadīth* recounted by Abū Dāwūd:

If you sell to one another with *'inah*, hold the tails of cows [i.e., become occupied with world gains], become pleased with agriculture, and give up *jihād* [fighting in the Cause of Allah], Allah will make disgrace prevail over you, and will not withdraw it until you return [i.e., adhere] to your religion.<sup>48</sup>

Thus, the *ribā* to which Muhammad refers is the difference in the two monetary amounts exchanged. In sum, the rule against *ribā* manifest in an *'inah* transaction is, from the perspective of contemporary non-Islamic finance, a huge limitation.

Evidently, a *nasi'a* transaction can involve the exchange of precious metals, such as gold-for-gold, silver-for-silver, or gold-for-silver, if one part of the exchange is deferred. Historically, such metals are a kind of money, and occasionally still are used as means of payment. Further, a *nasi'a* transaction can arise with respect to foreign exchange trading. The largest financial market in the world (in terms of the value of daily turnover) is the foreign exchange market. It is an over-the-counter (OTC) market in which currencies issued by different countries are exchanged. In this market, forward foreign exchange deals, and currency swaps, are traded. (On organized exchanges, foreign exchange futures contracts are traded.) When an agreement between two foreign exchange traders calls for one of them to make (or receive) payment of a currency on a delayed basis, then the transaction is characterized as "*nasi'a*."

As suggested, *ribā al-nasi'a* is forbidden. The Sunnah of the Prophet is the source of the prohibition. One *ḥadīth*, collected by *Imām* Bukhari, records that Muhammad said:

There is no *ribā* (in money exchange) except when it is not done from hand to hand (i.e., when there is delay in payment) [*ribā al-nasi'a*].<sup>49</sup>

At first glance, this statement is puzzling. It appears to say *ribā* is permitted in all circumstances, except a *nasi'a* transaction. However, the correct understanding of the statement is different. Saying "[t]here is no *ribā*" means *ribā* does not exist. As long as *ribā* does not exist in a transaction, then the transaction is permissible. The

<sup>48</sup> Abū Dāwūd, *ḥadīth* no. 3462, quoted in AL FAWTAN, *supra*, vol. 2 at 18 (bracketed inserts in original).

<sup>49</sup> BUKHARI, *supra*, vol. III, book XXXIV (The Book of Sales (Bargains)), p. 213, *ḥadīth* no. 386.

"except" phrase means that *ribā* does exist in a *nasi'a* transaction. Therefore, because of the *ribā*, that transaction is forbidden. In turn, the mere characterization of a payment as "*ribā*" condemns the transaction. To be sure, this *hadith* does not itself state *ribā* is forbidden. However, that prohibition is clear from Qur'ānic passages quoted earlier.

Observe, also, from the last part of this *hadith* that a simultaneous exchange of money-for-money, such as U.S. dollars for U.S. dollars of equal amount (but, perhaps, different denominations of bills, such as a \$20 bill for two \$10 bills) is permissible. Likewise, an exchange of money-for-money of different currencies, but equal values — such as U.S. dollars for Emirati *dirhams* of the correct foreign exchange value — is permissible. In other words, there is no *ribā* in a spot currency or foreign exchange transaction. The problem arises when one payment is deferred, or delayed, as in a loan transaction, foreign exchange forward or futures contract, or currency swap. Consider a *hadith* recorded in Saḥīḥ Muslim:

I [Mālik b. 'Aus b. al-Hadathān, who reports this *hadith*] came saying: Who was prepared to exchange *dirhams* (for gold)? Talha b. 'Uбайдullah . . . (as he was sitting with 'Umar b. al-Khattāb) said: Show us your gold and then come to us (at a later time). When our servant would come we would give you your silver (*dirhams* due to you). Thereupon, 'Umar b. al-Khattāb . . . said: Not at all. By Allāh, either give him his silver (coins), or return his gold to him, for Allāh's Messenger . . . said: The exchange of silver for gold (has an element of) interest in it, except when (it is exchanged) *on the spot*; and wheat for wheat is an interest unless both are handed over *on the spot*; barley for barley is interest unless both are handed over *on the spot*; dates for dates is interest unless both are handed over *on the spot*.<sup>50</sup>

This *hadith* indicates that *ribā* is inherently and inextricably connected with the deferred delivery of a like subject (money). Therefore, the transaction is impermissible. Simply put, it is the deferral (*nasi'a*) element that renders a monetary exchange unlawful, because of its inseparability from the element of *ribā*.

This conclusion is dramatic. Not only does it mean interest-based lending is illegal under the *Shari'a*. It also means foreign exchange derivative transactions — forwards, futures, and swaps — are illegal, too. Not surprisingly, few (if any) Islamic countries sponsor foreign exchange derivative markets.

Why are the two — *ribā* and *nasi'a* — inseparable? The Explanatory Note to the above quoted *hadith* offers one reason:

There is no harm in converting gold into silver and silver into [gold]. The Holy Prophet . . . did not give sanction [approval] for the above-mentioned transaction [in the *hadith*] as this form of transaction makes two parties stand on two footings which can at times be unequal. Suppose one person hands over gold to another person and he, after inspection, accepts it and promises to pay silver in return at a future date. This weakens the position of the seller of gold as he cannot make an inspection of silver at the time of

giving gold. There is a possibility that the buyer of gold who has already taken into custody the precious metal may take undue advantage of his advantageous position.<sup>51</sup>

A second reason is the value of money changes frequently. The fluctuations may be unfair to one side of a transaction — the one receiving payment at a later date. To be sure, from a non-Muslim banking perspective, the whole point of a forward, future, or swap foreign exchange contract is to allocate risk, namely, foreign exchange risk, the risk of currency fluctuations. From that vantage point, the transaction is not unfair, but rather an efficient, consensual allocation and assumption of risks by informed parties.

### [B] *Ribā al-Faḍl* (Unequal Spot Commodity Trades)

The literal meaning of the Arabic word "*faḍl*" is "excess." In that respect, "*faḍl*" and "*ribā*" are synonymous. But, *ribā al-faḍl* refers to selling goods of lesser quality for the same kind of goods of better quality. The goods exchanged are (to use an international trade law terms) like, directly competitive, or substitutable products. But, they are not of the same quality. The quality differential — the difference between the lower and higher quality goods traded — is excess. As an example, an exchange of 10 fresh sugary (*sukkari*) dates from Saudi Arabia for 10 stale dates of the same kind would involve excess (and all the more so if the exchange were for 10 dates from California).

*Ribā al-faḍl* also refers to selling of goods of the same category or type, but differing quantities. The excess is the difference in the quantities. For instance, an exchange of 10 identical pairs of blue jeans for 15 of them involves excess.

Interestingly, there is a personal dimension to the meaning of "*riba al-faḍl*." The term is defined as:

Riba in a hand-to-hand or barter exchange.<sup>52</sup>

The transaction in *ribā al-faḍl* literally is hand-to-hand. This feature differentiates *ribā al-faḍl* from *ribā al-nasi'a*. *Ribā al-nasi'a* does not require a deal to take place at the same time and place, hence the use of the term "*nasi'a*," meaning "deferral." In contrast, *ribā al-faḍl* requires that a transaction occur contemporaneously in the same venue, i.e., it is a spot transaction. Accordingly, "*ribā al-faḍl*" also is defined as any excess or increase "relating to unequal spot trades in specified commodities."<sup>53</sup>

Two *hadiths* recorded by *Imām* Muslim clarify the circumstances under which *ribā al-faḍl* arise, as well as the scope of the prohibition against it:

- Gold is to be paid for by gold, silver [by] silver, wheat by wheat, barley by barley, dates by dates, salt by like, the payment is made hand to hand. He who added to it, or asked for an addition, in fact

<sup>51</sup> MUSLIM, *supra*, vol. IIA, book 22 (Book of Share Tenancy), p. 49, Explanatory Note (1) to *hadith* no. 1586.

<sup>52</sup> IQBAL & MIRAKHOR, *supra*, at xiii.

<sup>53</sup> McMillen, *supra*, fn. 11 at 1021.

<sup>50</sup> MUSLIM, *supra*, vol. IIA, book 22 (Book of Share Tenancy), pp. 48–49, *hadith* no. 1586 (emphasis added).

dealt in *usury*. The receiver and the giver are equally guilty.<sup>54</sup>

- Gold for gold, silver for silver, wheat for wheat, barley for barley, date for date, salt for salt, like for like, equal for equal, and hand for hand. If the kinds differed, sell whatever you like, even if it is hand for hand.<sup>55</sup>

Both *hadiths* contemplate the following kind of spot-market transaction: one party transfers low-quality dates (e.g., from California, or dates that are stale) to a second party, in exchange for high-quality dates (e.g., from Saudi Arabia, or dates that are ripe). However, there are slightly different lessons to draw from the statements.

Some *fukahā'* interpret the first *hadith*, which is narrated by Abū Sa'īd al-Khudrī, as limiting the rule against *ribā* to transactions in one of only six items: gold, silver, wheat, barley, dates, and salt. Their view, however, is an excessively literalist view not accepted by the majority of Islamic jurists. The majority of *fukahā'* use analogical reasoning (*qiyaas*) to generalize the rule to cover a transaction in a similar thing. They explain the Prophet Muhammad was using the six items as examples, familiar to his time. Indubitably, the first version makes clear any excess is illegal and both buyer and seller are at fault. As for the second *hadith*, it offers an insight not found in the first variation: an exchange of unlike commodities is not forbidden. That is evident from the last sentence, in which the Prophet says "sell whatever you like" if the goods are different.

Another *hadith* that lends considerable insight into the prohibition against *ribā al-faḍl*, the spot market exchange of goods of the same category but different quality and/or quantity, is narrated by Abū Sa'īd and Abū Hurayrah. This *hadith* states:

[The Prophet Muhammad . . . appointed a person as a Governor of Khaybar, also transliterated as "Khaibar."] That Governor brought to him [Muhammad] an excellent kind of dates from Khaibar [i.e., high-quality dates, such as *janīb*]. The Prophet . . . asked, "Are all the dates of Khaibar like this?" He replied, "By Allāh, no, O Allāh's Apostle! But we barter [i.e., obtain] one *ṣā'* of this [type of [high-quality]] dates for two *ṣā's* of dates of ours [the low-quality dates], and two *ṣā's* of it [the high-quality dates] for three of ours [the low-quality dates]." Allāh's Apostle . . . said, "Do not do so (as that is a kind of usury), but sell the mixed dates [of inferior quality] for money, and then buy good dates with that money."<sup>56</sup>

<sup>54</sup> MUSLIM, *supra*, vol. IIIA, book 22 (Book of Share Tenancy), p. 50, *hadith* no. 1584R4 (emphasis added).

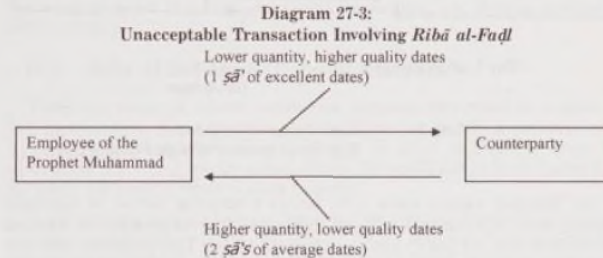

<sup>55</sup> MUSLIM, *supra*, vol. IIIA, book 22 (Book of Share Tenancy), p. 50, *hadith* no. 1587R2 (emphasis added).

<sup>56</sup> BUKHARI, *supra*, vol. III, book XXXIV (The Book of Sales (Bargains)), p. 222, *hadith* no. 405 (bracketed insertions added).

"Khaybar" is a name of a town 100 miles north of Medina, in the Kingdom of Saudi Arabia. It is renowned for its date farms. In the times of Muhammad, Khaybar was home to a large Jewish community. Several Islamic legal precepts are based historically in events that occurred in and around Khaybar, including the *kharij* tax.

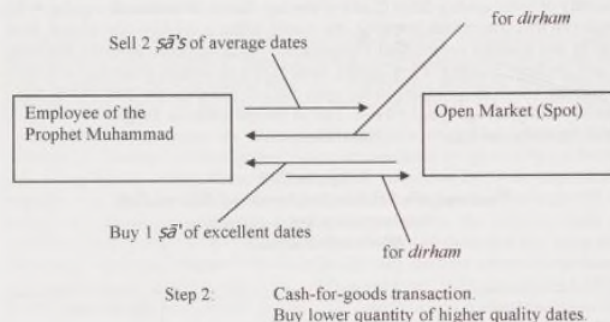

Diagram 27-3 sets out the transaction in which the employee of Muhammad engaged.

As Diagram 27-3 indicates, the essence of the transaction involved an exchange of a smaller quantity of higher quality dates (1 *ṣā'* of excellent dates) for a larger quantity of lower quality dates (2 *ṣā's* of average dates). Muhammad explains to his employee this transaction is wrong, the reason being it involves *ribā al-faḍl*. Both quality and quantity are unequal. Consequently, Muhammad counsels his employee to sell the large quantity of low-quality dates (2 *ṣā's* of average dates) for cash (units of currency, such as *dirhams*) on the open market, and then use that cash to buy a small quantity of high-quality dates (1 *ṣā'* of excellent dates). Diagram 27-4 depicts the religiously and legally acceptable transaction.

Analyzing the *hadith* and Diagrams reveals the rationale for the prohibition against *ribā al-faḍl*. That rationale is potential injustice. In an exchange of merchandise that differs in quality, quantity — or, as in this illustration, both quality and quantity — one side may not receive full, fair value for what that side gives up. To be sure, the American legal response would be that as long as the commercial parties are fully informed about the nature and amount of the subject of their transaction, then they bear the risk of loss. The *Shari'a* demands more of the parties than a law-and-economics style allocation of risk via private contract. Cumbersome as it may be, the parties should split a single, unequal exchange of goods-for-goods into two purchase-and-sale, cash-for-goods transactions. Here lies a basic difference in legal approach.

**Diagram 27-4:**  
**Acceptable Transaction with No Ribā al-Faḍl**  
 Step 1: Cash-for-goods transaction.  
 Sell higher quantity of lower quality dates.

The American regime leaves it to private contracting parties to negotiate, honestly or not, a deal suitable to them. That regime does not presume the potential for injustice does not justify further regulation. Islamic Law essentially does not trust the parties to negotiate a fair deal. The *Shari'a* leaves open to debate whether that is because one party is likely to succumb to the temptation to cheat the other party, or because the parties are simpletons. The nature of merchants and their environment may be Hobbesian or not. That is, Islamic Law does not pronounce judgment that either or both parties are fools or knaves. Rather, Islamic Law sees the potential for injustice, and is not satisfied to leave it to the parties to cure the problem. Better to structure the transaction in small, transparent steps, than to hide the potential in a single deal that mixes qualities and/or quantities.

Better, too, because cautious step-by-step transacting might help prevent monopoly, whereby one party (or a cabal of merchants) corners the market on high-quality dates. A holder of a large inventory of low-quality dates should not be able to trade them for high-quality dates, even of lesser amount, and thereby accumulate an excessive amount of high-quality dates. Rather, the market for both low- and high-quality dates should be liquid, *i.e.*, there should be many ready, willing, and able buyers and sellers of both kinds of dates. Liquidity is a feature more likely to exist if this holder must sell for cash low-quality dates in a transparent open-market transaction. By doing so, there certainly will be low-quality dates available to market participants who cannot afford high-quality dates. Moreover, possibly, the requisite selling of low-quality dates might push down prices for low-quality dates. One result of price depression would be reduced sales proceeds and, in turn, less funds with which to buy high-quality dates. That is, the holder of the large inventory of low-quality dates cannot dump them all on the market without affecting prices. Obviously, this scenario depends on the famous

neo-classical economic assumption of *ceteris paribus* — all other factors being equal — and on assumptions about elasticities of supply and demand. Nonetheless, the basic impulse of the *Shari'a* clearly favors a diverse array of quality in large quantities, with no single dominant market participant.

Note that the prohibition against *ribā al-faḍl* applies both to money and commodities transactions. However, exchanging different currencies like Saudi Riyals for American Dollars or different money types like gold coins for silver coins is permissible only under two conditions. First, the transaction must be a spot market deal. Second, both parties (or their agents) must be present at the same time. The first condition indicates forward and futures contracts are disallowed, or at least highly problematical, in part because of the likelihood that the relative values of the currency will change. The second condition may be satisfied through technological means (*e.g.*, through internet connections), *i.e.*, physical presence is not mandatory.

### [C] Ribā Al-Jahiliyya (Defer and Increase)

There are plenty of Islamic commercial contracts that result in a debts or liabilities (*dayn*) of one party to another. Examples include a contract under which an owner of an asset sells that asset to the buyer on credit, or leases the asset to the buyer for a specific period of time. The credit sale or lease illustrations fall under the generic rubric of asset financing.

Asset financing means a buyer or lessor is obligated to make purchase or rental payments to the seller or lessor, respectively, for the asset according to a schedule set out in the contract. Suppose, however, a buyer/lessee is late in making an installment payment under a credit sale contract, or late in making a rental payment under a lease contract. Could the seller/lessor, *i.e.*, the asset owner, increase the amount owed by the buyer/lessee? This kind of term in a sale or lease contract, namely, that failure to make timely payment of an amount owed triggers an additional financial charge, is common in the American commercial context. However, the answer is “no” under the *Shari'a*. Charging any increase in connection with the further deferment or delay of a debt, where such increase is linked to time, is forbidden (*harām*).

The increase is called “*ribā al-jahiliyya*,” and is said to be the form of *ribā* the Qur'an most strongly condemns.<sup>57</sup> Note that the essence of *ribā al-jahiliyya* is not the planned-for delay or deferral of payments as per the contract in question. Rather, it is the unexpected delay or deferral, deviating from the contract schedule. The Islamic legal logic for the prohibition is that the increase connected to the additional delay or deferral amounts to trading in debts. By charging an extra amount, the seller-lessor of the asset that is the subject of the contract is selling the debt to the buyer-lessee. The price is an even larger debt than under the original contract, with a delay or deferral period even longer than under that contract. The only lawful way under the *Shari'a* for the creditor-seller-lessor to sell

<sup>57</sup> See MAHMOUD AMIN EL-GAMAL, A BASIC GUIDE TO CONTEMPORARY ISLAMIC BANKING AND FINANCE 5 (“Debt re-sale” section) (June 2000), posted at [www.ruf.rice.edu/~elgamal/files/primer.pdf](http://www.ruf.rice.edu/~elgamal/files/primer.pdf). (Hereinafter, EL GAMAL.)

the debt to the debtor-buyer-lessee is to do so at face value, i.e., at the amount and tenor under the original contract. The only other alternative is for the creditor to forgive all or part of the debt.

### [D] *Da'Wa Ta'Ajjal* (Prepay and Reduce)

The Arabic term "*da wa ta'ajjal*" means "prepay and reduce."<sup>58</sup> It is the mirror image of *ribā al-jahiliyya*. Instead of being charged an additional sum of money because of a further delay or deferral in making a purchase price or lease payment to a creditor-seller-lessor, a debtor-buyer-lessee obtains a reduction in the amount owed by prepaying the purchase price or lease amount. Simply put, with "*da wa ta'ajjal*" financing costs of acquiring an asset are cut by paying the full obligatory amount earlier than called for in the underlying contract.

This type of transaction, like deferral and increase, is common in the American commercial context. For example, home mortgage contracts typically allow buyers to prepay their debt, and thus acquire full ownership of their homes, earlier than the customary 15- or 30-year tenor of the loan. Is a prepay-and-reduce transaction lawful under the *Shari'a*?

A clue to the answer is the term "*da wa ta'ajjal*" does not use the word "*ribā*." After all, there is no excess, or increase, charged by the creditor-seller-lessor. Rather, the creditor cuts the aggregate debt amount because of prepayment. Nevertheless, historically *da wa ta'ajjal* was prohibited. The prohibition generated considerable controversy.<sup>59</sup> Consequently, several legal scholars (*fukahā*) relaxed the prohibition. Their (specifically, *muftis*) opinions (*fatawā*) are used to authorize issuance of "Islamic credit cards," whereby purchases by a cardholder are financed automatically for a prescribed period, such as 12 months. If the cardholder prepays, then the charges on the card are reduced.

## § 27.05 RATIONALES FOR PROHIBITION ON RIBĀ

### [A] Unjust Enrichment (*Al-Ithra' Bila Sabab*)

A critically important point emerging from the meaning of "*ribā*," and rule against it, concerns morality. A (if not the) key purpose of the prohibition on *ribā* is to put commercial transactions on a sound ethical basis. Capturing an increase in value without expending or giving anything in exchange is immoral. Specifically, it is at once slothful, greedy, and exploitative — sins that are not uncommonly manifest in non-Muslim financial markets, such as Wall Street, and applied to some non-Muslim financiers, such as hedge fund managers and speculators.

To be sure, at an uncritical level, there is no need for an explanation of the rule. The prohibition is accepted as a matter of faith, as the Qur'an and various *hadiths* say so. But, in the modern world faith is not always accepted unquestioningly. The legal mind, in particular, searches for reason to support, or refute, an article of

faith. It may also be remarked that faith and reason — at least according to Catholic Christian teaching — are two wings of the same bird that allow the bird to soar. True faith is reinforced by correct reason, and *vice versa*, as Pope John Paul II explains in his September 1998 Encyclical, *Fides et Ratio* (*Faith and Reason*). Thus, the question is joined: what, other than a sacred scripture or the sayings of Muhammad supports a ban on *ribā*?

The answer concerns profit. Contrary to the popular stereotype in some non-Muslim financial circles, the *Shari'a* prohibition on *ribā* does not, and never did, ignore the time value of money. Rather, Islamic Law always distinguished between investing and lending money, i.e., between commerce and finance, on the one hand, and charity, on the other hand. This distinction simply is not made by conventional non-Muslim banking. In that system, investing and lending are two sides of the same coin, namely, a single commercial or financial transaction.

There is nothing charitable about lending, nor about charging interest. To both the borrower and lender, the deal is about trading (lending) money (principal) now in exchange for more money (principal plus interest) later. This single transaction is reflected on the balance sheet entries made by a bank in a non-*Shari'a* compliant loan transaction. The bank records the amount of the loan as an asset (a claim of the bank on the borrower) under the category "Note Receivable," and makes a corresponding entry on the liability side of the ledger (containing claims against the bank) for the borrower under the rubric "Demand Deposit" (or other such category). The borrower makes the mirror image entries — an asset account that is a "Demand Deposit," and a liability account that is a "Note Payable." The bottom-line point is the non-Muslim bank and borrower regard the transaction, albeit from opposite sides, in the same way — a business deal.

That is not the view in Islam. Law distinguishes between commerce (or trade) and charity. Under the *Shari'a*, the proper way to make money (other than by inheritance or bequest) is to earn it, for instance by investing or trading for gain. Investing money leads either to an increase or decrease in the principal value of the financial capital at stake. In the context of investing, increase is permissible. But, *ribā* has nothing to do with trade. Rather, it has everything to do with charity, and bespeaks a lack thereof. That is, lending money is a type of charity, a manifestation of assistance to a party in need. That is why the expectation of profit in the context of lending money not only is unreasonable, but also sinful. In sum, it is entirely erroneous to suggest that Muslims somehow "don't get" the concept of the time value of money. Not only do they "get it," their law holds that measuring the value of money over time in the context of charity is wrong.

Consider, therefore, the Explanatory Note to the Chapter containing the *hadiths* on *ribā* compiled in Sahih Muslim. It states:

The question is often asked why Islam has forbidden interest. The answer is: It is because interest is an exploitation of helpless persons. In case money is lent for consumption purposes to the poor, and then an excess payment is demanded from them, it is nothing but sheer callousness.

Some people concede that it is oppression in case money is lent to the poor for consumption purposes. If we look deeply into the working of

<sup>58</sup> See EL GAMAL, *supra*.

<sup>59</sup> See EL GAMAL, *supra*.

business transaction[s.] we will find that even here the interest hits the weakest link in the chain of production—helpless labour. The main fallacy in our reasoning is that we always think of the huge gains and ignore the heavy losses with their depressing effects on the lower strata of society.

Among the four links in the chain of production, land, labour, capital and organisation, the weakest link is the labourer as he cannot store his labour. In case of loss, the capitalist insists upon the pound of flesh and manages to get it on account of his dominant position in business. He thus not only saves himself from loss, but makes [a] fortune in such unfortunate circumstances. The organiser who, in practical life, is also a capitalist shifts the whole burden of loss upon land and labour. Land can offer some resistance as it is not destroyed, but one moment of the loss of labour is lost forever since it cannot be preserved.

Islam makes speculation and partnership lawful business transactions which bind the capitalists to bear a share of the loss, along with other factors of production.

Moreover, the charging of interest undermines the spirit of fellow-feeling and sacrifice, and inculcates selfishness and miserliness in man.

The latest researches [sic] in Economics have proved beyond any shadow of doubt that interest is responsible for the economic crisis in the world. With increase[s] in the rate of interest, the margin of profit declines and the investor prefers to lend his money on interest rather than . . . in business and take the risk.

The ever-increasing growth of the interest-ridden economy is a conspiracy of the selfish and heartless moneyed class against other factors of production.<sup>60</sup>

This passage — which could as easily have been written by Karl Marx (1818-1883) (or one of his less eloquent adherents) as a *Sharī'a* scholar — is both insightful and extravagant, if not extremist.

It is insightful in that the Explanatory Note links *ribā* and exploitation. Eschewing *ribā* is a legitimate urgent request of the *Sharī'a* because of the unlevel competitive playing field it creates and reinforces. The borrower is conceived of as poor and downtrodden, oppressed by a powerful, oppressive money-lender. If a *ribā*-based transaction proceeds, then this asymmetry is reinforced. When such transactions occur throughout a financial system, then socioeconomic inequality becomes widespread. *Ribā* causes damage to individuals, and the community at large. Never mind the obvious fact that some borrowers are major business associations, while some banks are local or regional in size. The *Sharī'a* concern is that *ribā* is unjust, as a matter of individual and social justice, which if allowed will enrich the few and impoverish the many.

<sup>60</sup> Muslim, *supra*, vol. IIIA, book 22 (Book of Share Tenancy), p. 47, fn. 1 to Chapter 14 (emphasis added).

Another way to express this rationale is that *ribā* results in the unjust enrichment of the lender as against the borrower. The Arabic term "*al-ithra' bila sabab*" means "unjust enrichment." Literally, it means "enrichment without cause," as "*al-ithra'*" means "enrichment," "*bila*," means "without," and "*sabab*" means "cause." The unjust enrichment takes the form of the lender making money from money, but putting in no valuable labor or services. When repeated over space and time, the community becomes socioeconomically stratified, with financiers at or near the apex. Pointing to inequities between Wall Street and Main Street, or the City of London and the rest of England, some Islamic scholars and commentators observe that this phenomenon characterizes many post-industrial non-Muslim economies. It also plagues some major emerging non-Muslim countries, such as the "BRICs" — Brazil, Russia, India, and China. Thus, such scholars and commentators call for a more just means of enrichment for financiers than interest-based transactions, and laud the *Sharī'a* as offering the needed alternative.

Significantly, the term "*al-ithra' bila sabab*" is not restricted to the context of transactions in which "*ribā*" may exist, anymore than the American legal concept of "unjust enrichment" is used narrowly. For example, both terms can be used in the context of Property Law. Suppose a person rents a house or apartment, but does not pay the rent. That person reaps "*al-ithra' bila sabab*. That is because the person is enjoying the use of the premises without paying for them.

But, the passage quoted above also is extravagant. As a technical matter, its underlying economic premises are erroneous. There are more factors of production than land, labor, capital, and organization. Technology and human capital are major contributors to economic growth. Moreover, interest rates do not march up relentlessly. They rise and fall, in accordance with the supply and demand for money. An interest rate is an equilibrium price for money. That equilibrium changes with credit conditions.

The passage blithely ignores the stark reality that there are many grossly unequal Islamic countries, and many comparatively egalitarian non-Muslim countries. Compare Pakistan, which under a Supreme Court ruling in December 1999 declared interest-based banking un-Islamic and ordered the government to establish an interest-free economy by 2001, with Sweden, which has an interest-based banking system.<sup>61</sup> Compare Saudi Arabia, which permits both Islamic and non-Islamic banking, to Singapore, which is a conventional banking center. Pakistan and Saudi Arabia suffer from gross income disparities. Sweden and Singapore do not. The rule against *ribā*, which admittedly is not applied perfectly or strictly in Pakistan or Saudi Arabia, does not save those societies from the kind of oppression complained of in the above-quoted Explanatory Note.

Indeed, there are Muslim scholars who criticize Islamic bankers for defrauding borrowers by charging more to borrowers in a lending transaction (through a *sharikah al-mudārabah* partnership) than the borrowers would pay in conventional, interest-based loans.<sup>62</sup> Put differently, it is simplistic, if not foolhardy, to blame *ribā*

<sup>61</sup> See *Pakistan Court Upholds Islamic Banking*, BBC News, 23 December 1999, posted at [http://news.bbc.co.uk/2/hi/south\\_asia/576435.stm](http://news.bbc.co.uk/2/hi/south_asia/576435.stm).

<sup>62</sup> See, e.g., DR. MUHAMMAD SALEEM, *ISLAMIC BANKING — A \$300 BILLION DECEPTION* (Philadelphia, PA:

per se for "the economic crisis" (whichever one that might be), or to call it a "conspiracy" wrought by a dominant socioeconomic class. If there is a single culprit, then it may be selfishness, but that is a sin of the heart, not a defect inherent in the global capitalist order. Capitalists and Communists, Muslims and non-Muslims — none of them has a monopoly on greed.

### [B] Complimentary Rationales

Are there other, complementary rationales in favor of the ban on *ribā*? The answer is yes, and three specific contentions are worth considering and critically assessing. First, one argument is *ribā* impedes the development of financial markets, and even trade. If a small number of people increase their incomes and net worth by receiving interest without any effort, then people in need of funds are harmed, again because of the increasing disparity of income and wealth. If borrowers know this outcome in advance, that they will have to return more than what they originally borrowed, then they will not borrow in the first place. They will fear being over-burdened with debt and unable to pay off in full their interest-based extensions of credit. Without a demand for borrowing, financial markets, and domestic and international commerce, will decelerate.

This argument is seriously flawed, and reflects a fundamental misunderstanding of the key contribution of credit markets and interest in the process of economic growth. Debtors generally use borrowed funds for productive purposes. Individuals use a loan to purchase assets that appreciate (like homes, through mortgage loans), or develop their human capital (through a student loan for education). Businesses use loans to expand production capacity (e.g., by purchasing capital assets). Quite obviously, the returns from the use of the funds more than cover the costs of borrowing. The homeowner develops equity in her house, the student graduates to become a professional with a high income-earning potential, and the business enhances its profitability. Neither this upward economic activity, nor any of its positive knock-on effects (e.g., jobs for workers in the construction, education, and machine tool industries), would be possible without incurring a loan. Interest is the price of the loan, a price that reflects the risk and reward of the project for which the loan is made, the borrower to whom or which the loan is extended, and the general supply and demand for credit at the time the loan is made. Interest is paid off by the borrower through its enhanced capacity. Should the benefits not materialize, then credit work-out arrangements, or even bankruptcy laws, exist to balance rights and obligations of debtors and creditors. Put simply, the argument is entirely backward. Countries (or regions within those countries) that lack well-developed, liquid, transparent credit markets, in which interest functions as a mechanism to allocate credit on the basis of the risks and rewards from proposed projects, tend to be poor.

A second argument put forth in favor of the ban on *ribā* concerns food shortages. The rationale is that *ribā* causes a deficit in food stuffs. The *Sharī'a* encourages buying and selling different items for different prices, but not buying and selling the same item for a different price. For example, buying and selling

gold for gold of the same quality is not a valid exchange if made on unequal terms, whereas an exchange of silver for gold is permissible on unequal terms because the commodities are inherently different. The argument is that when the same type of a commodity — whether gold or silver, or a foodstuff such as barley or wheat — of the same quality is exchanged for different value, the number of market participants with access to high-quality goods, and the ability to exchanging them, will become limited. Only a cabal will end up with high-quality merchandise, namely, the market participants who were able to demand *ribā* from others. The general public will not have access to necessary goods, including foodstuffs. The prohibition on *ribā* essentially orders a party seeking good quality food to sell his or her low quality food to the market, and use the sale proceeds to buy the good quality merchandise. Such transactions will open markets to different types and kinds of goods.

Like the first claim, this argument is seriously deficient. An initial problem is it is imprecise. Further, the argument does not justify what it claims to defend. If the problem at issue is hoarding of high-quality merchandise, then the solution is not to ban *ribā*. Rather, the remedy lies in rules against anti-competitive practices. Unequal exchanges of merchandise that is similar, but not identical, reflects differences in quality. Knowledgeable market participants are typically in the best position to examine goods and differentiate product features, and negotiate appropriate price terms in their sales contract, as well as remedies in the event of breaches by the seller.

A third argument is that *ribā* creates instability in the value of a currency vis-à-vis other currencies. That is, a country with an interest-based banking system will endure greater volatility in the foreign exchange values of its currency than a country that eschews *ribā*. This argument suffers from a confusion of correlation and causation, and has no basis in theory or practice.

Like the second argument, this contention is fuzzy, failing to spell out a clear, causal chain of events. Moreover, foreign exchange rates ultimately are determined by the supply of and demand for one currency against another. Interest rate differentials affect both sides of the market. For example, higher interest rates (e.g., in the United States relative to Japan) attract foreign purchases (by Japanese) of a local currency (dollars versus yen), so as to enable foreign investors (Japanese) to purchase interest-bearing assets denominated in local currency (e.g., bonds issued by the American government or corporations). Interest rates are an important indicator of credit conditions in one country versus another, and a critical discipline on a borrower. For instance, a country with poor fiscal and monetary policies, and high levels of corruption, rightly will have to pay a high interest rate on its sovereign debt to attract foreign investment. As for volatility of an exchange rate, rapid fluctuations typically are due to a variety of factors, of which only one of them is sudden, unexpected shifts in interest rate differentials. Here, again, the argument hardly supports a prohibition on *ribā*.

What may be said by way of summary about the *Sharī'a* proscription against *ribā*? The rule fits perfectly within the Islamic legal paradigm in which believers are called upon to behave in an upstanding manner in their worldly affairs. The fact that not all of them do — that, as in any religion, there are devout adherents and

lapsed followers who may one day return to the fold — is not the fault of the *Shari'a*. It is a testament to human frailty. As for rationales in favor of *ribā*, they range from noble concerns about individual impoverishment and social inequality to muddle-headed anti-capitalist rants.

### § 27.06 SHĪ'ITE DISTINCTIONS

In practice, there appears to be little difference between *Sunni* and *Shī'ite* Banking Law. Both branches of Islam adhere to the same basic prohibitions on *ribā* (interest or excess)<sup>63</sup> and *gharar* (uncertainty), known as a "*gharar*."<sup>64</sup> Sayyid Qutb (1906-1966), a leader of the Muslim Brotherhood, explains:

Anyone who extends to me one *dinar* in order to receive a return of two *dinars* from me is my enemy; I will not wish him well, nor can I regard him in amity. Mutual support (*ta'awun*) is one of the fundamental principles of Islamic society, but *ribā* destroys this sentiment and weakens its foundations. For this reason does Islam despise *ribā*.<sup>65</sup>

Following Qutb, many scholars considered how economic transactions impact the social relationships among Muslims.

In the 1960s and 1970s, prominent *Shī'a* scholars sought to chart a course between unbridled capitalism and atheistic Marxism. The work of the Iraqi Twelver *Shī'ite* cleric Grand *Āyatollāh* Muhammad Bāqir Al Ṣadr (1935-1980) was an intellectual impetus for efforts to find a Third Way.<sup>66</sup> *Āyatollāh* Al Ṣadr authored a renowned book, *Iqtisaduna* (*Our Economics*) (1960-61), which critiqued both capitalism and communism.<sup>67</sup> His work attracted the attention of (*inter alia*) Kuwait, whose government consulted him on ways to manage oil wealth consistent

<sup>63</sup> Haider Ala Hamoudi, *You Say You Want a Revolution: Interpretive Communities and the Origins of Islamic Finance*, 45 VIRGINIA JOURNAL OF INTERNATIONAL LAW 249, 263 (winter 2008). [Hereinafter, Hamoudi.]

<sup>64</sup> Hamoudi, *supra*, at 263-264 (winter 2008).

<sup>65</sup> SAYYID QUTB, *AL-'ADALA AL-LITIMATIYAT* FIL ISLAM at 103 (1st ed., 15th prtg., 2002), quoted in Hamoudi, *supra*, at 283.

<sup>66</sup> Hamoudi, *supra*, at 273-274.

<sup>67</sup> According to one source:

In *Iqtisaduna*, al-Ṣadr strives to show that Islam has answers to problems of the modern world by presenting an Islamic alternative to both capitalism and socialism. He rejects socialism on the basis that Islam distinguishes between the individual and the ruler in an Islamic state in a manner that requires a distinction between private and public property. However, he also rejects capitalism's notion that private property is justified in its own right, arguing instead that both private and public property originate from God, and that the rights and obligations of both private individuals and rulers are therefore dictated by Islam. He also rejects the conclusion that this makes Islamic economics a mixture between capitalism and socialism, arguing that capitalism and socialism each come about as the natural conclusion of certain ideologies, while Islamic economics comes about as the natural conclusion of Islamic ideology and therefore is justified entirely independently of other systems of economics.

*Iqtisaduna*, WIKIPEDIA, posted at <http://en.wikipedia.org/wiki/Iqtisaduna>. See also T.M. Aziz, *An Islamic Perspective of Political Economy: The Views of (Late) Muhammad Baqir al-Sadr*, 10 AL-TAWHID ISLAMIC JOURNAL ISSUE 1 (1993), posted at [www.al-islam.org/al-tawhid/political-economy/](http://www.al-islam.org/al-tawhid/political-economy/) (summarizing the *Iqtisaduna*).

with Islamic precepts. In turn, Al Ṣadr worked on Islamic banking matters, and criticized *ribā* and *gharar*.

*Āyatollāh* Ruhollah Khomeini (1900-1989) used the work of Al Ṣadr "as a template for Islamic government in Iran."<sup>68</sup> However, in many Muslim countries, criticisms by Al Ṣadr of predominant *Sunni* rules tended to be disregarded. Restrictions, if they existed, against *ribā* and *gharar* were analyzed, if at all, along with financial instruments and institutions through a framework of social justice. That framework could be more or less permissive, depending in part on the political and economic environment. Al Ṣadr was executed by Saddam Hussein in 1980.

## § 28.01 LEGAL DEVICES OR FICTIONS (ḤIYAL)

### [A] Need for Legal Devices in All Legal Systems

How is customary commercial law — the *law merchant*, or *lex mercatoria* — brought into agreement with Sacred Law? This question is a specific example of the general and perpetual challenge faced in the *Shari'a*: the interaction of theory and practice. The answer is a “legal device,” typically a “legal fiction,” called “*ḥiyal*.”<sup>1</sup>

There is nothing unique to Islamic Law about the use of a device with a teleological purpose in mind. Every legal system needs a conduit between theory and practice. Legal fictions exist in both Roman and Canon Law, as they do in American Law. Interestingly, though, the teleological purposes are not the same in each legal system. In Islamic Law, *ḥiyal* serves to circumvent a positive law — to avoid the framework of the Sacred Law. In contrast, in Roman Law, the idea is to fit a new practice within an existing legal framework, and thereby avoid new legislation.<sup>2</sup>

The Arabic word “*ḥiyal*” (plural; the singular is “*ḥila*”) refers to legal devices put to an extra-legal end that could not otherwise be achieved directly under the *Shari'a*. The idea in using a *ḥila* is to conform to the letter of the law, and not be forced to act against it. To be sure, the concept of *ḥiyal* suggests a dis-connect between high theory and street practice. The concept is an effort to bridge the two.

For example, one use of the concept is to permit formation of a contract that is not invalid under the Islamic Law of Obligations, but which would be invalid if done in a clear, overt manner. The goal is to deploy a device that renders a transaction lawful, which if allowed to stand, makes the transaction unlawful. Another illustration (discussed below), which is from Islamic Family Law, is known in Arabic as “*taḥlīl*,” which refers to a device that removes an impediment to marriage.

### [B] Development of Ḥiyal

*Ḥiyal* developed in the Islamic legal world of the Middle Ages. Commercial parties to a transaction were keen to minimize the risk an Islamic judge (*qāḍī*) might rule their deal was contrary to the *Shari'a*. So, they developed formalisms, not for their own sake (i.e., not for the mere purpose of having a formalism), but for an “ulterior purpose.”<sup>3</sup>

Given that *ḥiyal* were developed by private commercial parties, they were not — at the outset — part of the body of Islamic Law. To the contrary, they arose outside of, and alongside of, that *corpus*. At the time, that *corpus* itself was in the process of development. Yet, over time, *ḥiyal* earned the important benefit of legal support.

They became recognized, and essentially part of the body of the *Shari'a*.

Leading jurists of the Middle Ages did more than just work to reconcile strict Islamic theory with the *ḥiyal* of the merchants, and thereby increase the chances of support from a *qāḍī*, who was responsible for administering justice.<sup>4</sup> The more creative of the leading jurists even invented some complicated *ḥiyal* to help their commercial clients. In this limited respect, there may be a similarity between Roman and Islamic jurists. Like their Roman colleagues, Islamic jurists (*fukahā'*) responded to demands of merchant clients. To take the point a step further, it is reasonable to consider similarities between the development of *ḥiyal* and the *law merchant* in English Common Law.

### [C] Documenting Ḥiyal

In general, *ḥiyal* involve two or more discrete (separable) transactions. Each of the separate pieces is lawful. Each of those pieces is recorded or otherwise documented properly. The transactions are aggregated together, and the desired consequence follows. Thus, a *ḥila* can involve several particular disaggregated parts of a large transaction, and thus appear to be quite complex. (Devices such as *sharikah al-muḍārabah*, or sleeping partnerships, and *murābaḥa* contracts, or cost-plus pricing, illustrate this point.)

Obviously, the possibility for opportunistic behavior exists. What if a participant in one of the discrete transactions declines to play a part in the overall operation, but instead acts as if there were no *ḥila*? That person could avail himself of the documents supporting the discrete transaction, and of the lawfulness of the transaction. The *ḥila* would be undermined by this unscrupulous attempt at disaggregation.

To prevent such an occurrence, all of the documents evidencing *ḥiyal* — i.e., each one supporting each piece of a legal fiction — is deposited with a third party. The third party must be trustworthy. In effect, the documents are placed in escrow. That reliable party, if an individual, is called a “*thika*,” though the party can be an institution.

There also is a protocol, or covering document, that is kept by the *thika*. It is called a “*muwāḍa'a*,” or “understanding.” The *muwāḍa'a* is unofficial, but it explains the entire series of transactions, i.e., the *ḥiyal*. In effect, it is the critical over-arching document that helps make sense of the disaggregated pieces, by explaining how they fit together. The *thika* follows the *muwāḍa'a*. In doing so, the *thika* gives each participant in the various step-by-step transactions only the document(s) needed at the time to avoid any deviation from the *ḥiyal*. Similarly, if necessary, the *thika* provides a participant with a document needed attesting to a compensating or offsetting transaction, again to ensure each step in the legal fiction is followed.

<sup>2</sup> See SCHACHT, *supra*, at 80.

<sup>3</sup> SCHACHT, *supra*, at 210.

<sup>4</sup> See SCHACHT, *supra*, at 210.

### [D] Illustrations of *hiyal*

Several good examples of *hiyal* are cited by Professor Schacht.<sup>5</sup> As intimated earlier, one of them arises in Islamic Family Law, and is known as "*tahliil*." Under that Law, there is an impediment to re-marriage after a triple repudiation (*talāk*) of a marriage. Once a husband has thrice pronounced "*talāk*," and thereby divorced his wife, can he subsequently re-marry the same woman? The answer is "no," because divorce by triple repudiation creates an impediment to re-marriage. However, the impediment to re-marriage to the first husband is lifted if the wife marries a different man. Accordingly, a *hila* to accomplish this end is to arrange for marriage to a different man, but ensure the marriage will be dissolved right after it is consummated. This arrangement is called "*tahliil*," a term that refers to a device used to remove an impediment to marriage.

Two other examples, in the context of Islamic Banking Law are the use in customary law of *sufṭaja* (a bill of exchange) and *hawāla* (the transfer of debts). Historically, Islamic Law regulated the use of these items, but customary law allowed usages that exceeded religious limits, thus facilitating Muslim banking during the Middle Ages.<sup>6</sup> Probably among the most commercially relevant examples of *hiyal* devices concern Qur'ānic legislation against interest (*ribā*). Because the injunction is clear, Muslims would prefer not to violate it openly. Yet, candidly, they know that interest (as distinct from excess or usury) plays an indispensable role in commerce.

By way of brief discussion, aside from *muḍārabah* partnerships and *murābaha* contracts, what *hiyal* devices have been used to make payment of interest possible, without violating the Qur'ān? One *hila* is for a debtor to give real property to the lender as security for the debt. The creditor is allowed to use this real property. The amount of use, i.e., the value of the portion used, is the interest.

Another example is the so-called "double sale." The general term in Arabic for "double sale" is "*bay' alān fi bay'ā*." The specific transaction is called "*mukhāṭara*." It is an ancient customary practice, which existed in Medina among other places, from at least the days of Imām Mālik, founder of the *Māliki* School. In the transaction, a debtor sells its creditor an asset, and immediately buys back the asset for a greater amount, with re-delivery of the asset from the creditor to the debtor to occur on a specified future date. Economically, the creditor has "lent" funds to the debtor, secured by the debtor's asset. The creditor will receive those funds back, plus some extra money, when the creditor sells back the asset to the debtor. The difference between the two sale prices effectively is interest. This transaction clearly resembles a *murābaha* contract.

### [E] Why Accept *Hiyal*?

Why would Islamic religious scholars (*ulema*) or jurists (*fukahā'*) accept *hiyal*, given that the *raison d'être* of this concept is to evade application of the *Sharī'a*? Surely the *bien pensants* of the Muslim World — that is, the right-minded,

<sup>5</sup> See SCHACHT, *supra*, at 79.

<sup>6</sup> See SCHACHT, *supra*, at 78.

conventional thinkers — all would look askance at this attempt to exalt form over substance, this thinly veiled effort at results-oriented jurisprudence? Why has orthodoxy not snuffed out *hiyal*, and — as a fearsome follow-on question — is the robustness of the concept through the ages evidence that Islamic Law is Sacred more in theory than in practice?

A pattern in the *Sharī'a*, which Islamic judges (*qādis*) follow in certain cases, is concern with appearances.<sup>7</sup> That is, the Sacred Law is concerned with the outward aspect of a transaction. It does not concern itself with questions of conscience or motives, which are hidden and known only to God (Allāh). More generally, there is a stress in Islamic Law on following the letter, as distinct from the spirit, of that Law. Put in American legal jargon, form matters, and it can and does triumph over substance.

Without more, this explanation is not entirely satisfactory. That is because not all of the Four *Sunni* Schools are equally enthusiastic about *hiyal*. There are important differences that indicate some *ulema* and *fukahā'* are deeply troubled by *hiyal*.<sup>8</sup>

#### • *Hanafi* School:

Among the Four Schools, the *Hanafi* School is the most supportive of the *hiyal* concept. The *Hanafi* School tends not to focus on the morality of a *hiyal*. Indeed, the School finds many *hiyal* (including *tahliil*) are not reprehensible (*makrūh*). However, the *Hanafis* agree no *hiyal* should cause prejudice to another person.

Moreover, this School does not favor a *hiyal* involving an act that is forbidden (*ḥarām*) or even reprehensible (*makrūh*). That is, none of the disaggregated steps that sum to a *hila* should be *ḥarām* or *makrūh*. It is one thing to use a *hiyal* to justify a transaction that, without the legal device, would be *ḥarām* or *makrūh*. That may be irksome enough, yet the *Hanafis* accept the legal necessity of *hiyal*. However, it is quite another matter if one or more steps in the *hiyal* are *ḥarām* or *makrūh*. To use an analogy, that would be like trying to clean a dirty area with a dirty rag.

#### • *Māliki* School:

The *Māliki* School has not devoted a great deal of attention to the topic of *hiyal*. However, the School does not find *hiyal* devices like *tahliil* to be reprehensible (*makrūh*).

#### • *Shāfi'i* School:

Imām Shāfi'i, and for several decades after him, the *Shāfi'i* School, viewed *hiyal* as forbidden (*ḥarām*) or reprehensible (*makrūh*). For several decades after Imām Shāfi'i dies, that was the position of the *Shāfi'i* School. However, the approach to the topic has evolved. It no longer seems to be the case that the School rejects *hiyal*. For example, *tahliil* is practiced in *Shāfi'i* School jurisdictions.

#### • Traditionists:

<sup>7</sup> See SCHACHT, *supra*, at 80.

<sup>8</sup> See SCHACHT, *supra*, at 81-82.

"Traditionists" do not comprise a single School, but rather a movement that cuts across various Schools. It has been, and remains, influential in the *Hanbali* School. Not surprisingly, Traditionists reject *hiyal* entirely. Ibn Taymiyya, the great *Hanbali* scholar, rejected *hiyal* and specifically *tahlil*. He devoted one work to arguing against *hiyal*.

In sum, there has long been, and continues to be, a spirited debate in the Muslim World about the legal validity of *hiyal*, and the religious and moral integrity in using them to rationalize certain transactions. This debate, perhaps, mirrors the one in American Law about form and substance. Perhaps, too, the *Shari'a* even presages it.

## § 28.02 NATURE OF SHARIKAH AL-MUDARABAH (SLEEPING PARTNERSHIP)

### [A] Definition

The *sharikah al-mudarabah* is a topic of vast significance that arises in the everyday commercial life of Muslims in Muslim and even non-Muslim societies. Commonly called a "sleeping partnership," across the centuries the *fukahā'* actually have bestowed on it different rubrics. For example, *fukahā'* from the Ancient Schools of Mecca and Medina, along with the *Māliki* School (the second oldest of the Sunnite Schools, and an outgrowth of these Ancient Schools, founded by Imam Mālik, who came from Medina) eschew the term "*mudarabah*."

In lieu of "*mudarabah*," they use word "*muqaradah*." The *Hanafi* School scholar *Imām Al Kāsānī* explains:

Likewise the term *mudarabah*, in the terminology of jurists of Medina, is explicit in expressing this meaning. They used to call *mudarabah* by the name *muqaradah*, just as they used to call *ijarah* by the name *bay'* (sale).<sup>9</sup>

"*Muqaradah*" derives from the word *qarad*, or *qirād*, which means "cut" (noun) or "borrow" (noun). The connotation is that an owner of financial capital (i.e., money) cuts some of his money and gives it to a borrower for that borrower to invest (e.g., in an asset, consumer durable good, educational degree, or business venture). In turn, "*muqaradah*" refers to a lending transaction. It means "to loan" (verb), but in a full sense of the entire borrowing and lending arrangement and relationship.

Still another name for a *sharikah al-mudarabah* is "*mu'amalah*." To be sure, the term "*mu'amalah*" is not commonly used in Islamic Law books. The meaning of this term is explained by *Al Kāsānī*:

<sup>9</sup> IMRAN AHSEN KHAN NYAZEE, ISLAMIC LAW OF BUSINESS ORGANIZATIONS — PARTNERSHIPS 244 (Selangor, Malaysia: The Other Press, Malaysian ed., 2002) (quoting *Al Kāsānī, Badā'ī Al-Sanā'ī*, vol. 5 at 3589). [Hereinafter, NYAZEE.]

*Imām Kāsānī* was from Kāzrī, in southeast Uzbekistan, but lived most of his life in Halab, Syria. He died in on 9 August 1991 (10 Rajab 587 A.H.).

*Mu'amalah* is a term that includes both sale and purchase, and this is exactly the purpose of this contract.<sup>10</sup>

Interestingly, in the parlance of modern finance, there is a transaction common on Wall Street, London, and other major markets known as a "repo." A "repo" is a sale and repurchase of an asset (e.g., stocks, bonds, money, capital goods). The economic effect of the transaction is to lend a borrower the asset for a short period. The legal effect is to transfer ownership of the asset from the lender to borrower during that period. The transaction is managed through a document, or documents, that establish this legal effect. The Arabic term "*mu'amalah*," while less handy to non-Arabic speakers than "repo," appears to convey the idea of a loan transaction structured as a sale and repurchase.

Of course, the most common Arabic name for the sleeping partnership is "*mudarabah*." This term originates from "*darab*." Literally, it means "to hit" (verb) (though, as discussed in the Chapter on the rights of a wife, this translation is controversial). The words "*darab fi al-ard*," in a literal word-for-word sense, mean to hit (*darab*) on (*fi*) the earth, or ground (*al-ard*). However, when these words are taken together as a single term, "*darab fi al-ard*" refers to a person travelling through the land doing business. Just like the term "*muqaradah*," "*mudarabah*" is an umbrella term that encompasses an entire course of dealing. That is, "*mudarabah*" embraces the journey of a person, or persons, engaged in a business transaction. Evidently, the addition of "*mu*" to "*darab*" (or *qarad*) both enlarges the latter word and imparts to it a broad description.

As a formal legal matter, the general definition of "*sharikah al-mudarabah*" is:

[a] contract of partnership and sharing of profits in which the investor provides all the capital and is liable for the loss.<sup>11</sup>

The *Hanbali* School explains "*sharikah al-mudarabah*" as follows:

Our companions [i.e., the *Hanbali ulema*] have mentioned four cases of permissible partnership. We have mentioned one of these and this [is] the *sharikah al-abbān*. Three of these types are left that have been mentioned by al-Khiraqī [one of the famous *Hanbali ulema*, who was from Isfahan, which is in modern-day Iran, moved to Baghdad, where he taught, and died in 1187 A.D./583 A.H.] in five types, three of which are types of *mudarabah*, which is participation by two persons with the wealth of one, or two persons with their wealth, or the wealth of both and the body of one person. The participation of a body and wealth, and this is *mudarabah*.<sup>12</sup>

<sup>10</sup> NYAZEE, *supra*, at 244 (quoting *Al Kāsānī, Badā'ī Al-Sanā'ī*, vol. 5 at 3589).

<sup>11</sup> NYAZEE, *supra*, at 337.

<sup>12</sup> NYAZEE, *supra*, at 246 (quoting *Ibn Qudāmah, Al-Mughni* vol. 5 at 14).

*Ibn Qudāmah* was considered the *Imām* of the *Hanbali* School following the death of Imam Ahmed Ibn Hanbal (in 855 A.D./241 A.H.) especially in Damascus. *Ibn Qudāmah* was born in Palestine in 1147 A.D./541 A.H. and died in 1226 A.D./620 A.H. Living roughly three centuries after *Ibn Hanbal*, and thus obviously not his personal student, *Ibn Qudāmah* rose to become the most outstanding scholar of the *Hanbali* School. His full name is "Abdullah Ibn Ahmad Ibn Muhammad Ibn Qudāmah Ibn Miqdām Ibn Nasr Ibn Abdullah Al Maqdisi." Typically, he is referred to as "*Ibn Qudāmah Al Maqdisi*," or "*Ibn Qudāma Al Dimashqi*." The latter name reflects the fact he moved to Damascus, after

Similarly, the definition of "*muḍārabah*" found in The *Mejelle*, the Civil Code of the Ottoman Caliphate between 1877 and 1926, which codifies part of the *Ḥanafī fiqh*, is:

a kind of partnership on the condition, that the capital is to be found by one, and the labour and work by the other.<sup>13</sup>

All three definitions convey the economic essence of this partnership, namely, a joint venture relationship between, or participation involving, a creditor (the lender, such as a bank) and debtor (the borrower, such as an individual or business enterprise). Observe that the terms "creditor" and "debtor" (or "lender" and "borrower") are less commonly used in treatises on the *Shari'a* than are the terms *rabb al-māl* and *muḍārib*. "*Rabb al-māl*" means "investor." (Literally, "*al-māl*" means "the money," while "*rabb*" means lord, so the two words together are "lord of the money.") The word "*muḍārib*" connotes "worker." (Literally, it is an adjective describing a person with two possible meanings depending on the sentence context — a person who works, or a person who fights.) While the "*muḍārib*" is not a worker in the sense of being employed and paid wages by the "*rabb al-māl*," the use of these terms in Islamic legal texts is for good reason.

### [B] Three Basic Steps, and Interest or Not?

The underlying economic relationships indicate a certain inter-changeability of the terms. In the quintessential *muḍārabah* arrangement, there are three basic steps.

First, the *rabb al-māl* invests money with the borrower. This investment follows a course of dealing between the two parties. On the one hand, the *rabb al-māl* may approach the *muḍārib* and offer to invest funds with the latter. This may occur because the *rabb al-māl* is confident in the business acumen of the *muḍārib*, and finds the project the *muḍārib* seeks to do to be of commercial appeal. On the other hand, the *muḍārib* may approach the *rabb al-māl* with a business plan, and seek to convince the investor of the economic merits of the plan. In either event, upon the transfer of funds, the debtor acquires the status of "*muḍārib*." In this first step, the worker also acquires the status of *amīn*, or trustee, signifying that she has been entrusted with funds. That is, the *muḍārib* becomes a trustee (*amīn*) once the *rabb al-māl* (investor) delivers capital to her by way of the *muḍārabah*.

In step two, the *muḍārabah* begins to operate, i.e., engages in business. At this point, the *muḍārib* acquires yet another status, namely, *wakil*, or agent. That is, the *muḍārib* becomes an agent (*wakil*) for the *rabb al-māl* in operating the business. Not surprisingly, the definitions of "*sharikah al-muḍārabah*" of two *Sunnite* Schools expressly mention agency. The *Mālikī* School defines "*sharikah al-muḍārabah*" as:

having been educated under Ibn Hanbal in Baghdad. See [http://en.wikipedia.org/wiki/Ibn\\_Qudamah](http://en.wikipedia.org/wiki/Ibn_Qudamah).

<sup>13</sup> THE MEJELLE — BEING AN ENGLISH TRANSLATION OF MAJALLAH KI-ĀHKAM-I-ADLIYA AND A COMPLETE CODE OF ISLAMIC CIVIL LAW § 1404 at 166 (Petalizing Jaya, Malaysia: The Other Press, January 2001) (C.R. Tyser, B.A.L., D.G. Demetriades & Ismail Haqqi Effendi, trans.). See also IMRAN AHSAN KHAN NYAZEE, ISLAMIC LAW OF BUSINESS ORGANIZATIONS — PARTNERSHIPS 246 (Selangor, Malaysia: The Other Press, Malaysian ed., 2002) (quoting *Majallat al-Ahkām al-Adliyah*, § 1404).

"*qirād* is agency for trading in delivered cash for a part of the profits if their extent is known."<sup>14</sup>

Similarly, the *Shāfi'i* School explains "*sharikah al-muḍārabah*":

*Qirād* and *muḍārabah* have as their legal subject-matter a contract comprising agency by the owner to another by giving him wealth so that he may trade with it and share its profits.<sup>15</sup>

The similarity is not surprising. *Imām* Shāfi'i was a student of *Imām* Mālik. Notably, in a *muḍārabah* involving only two persons, creditor and debtor, the worker is herself the only agent of the partnership. That is to say, the *rabb al-māl* cannot act as an agent.

Finally, step three occurs when the partnership begins to make profits. In this step, the *muḍārib* becomes a partner, or *sharik*, along with the *rabb al-māl*, in the partnership. The *rabb al-māl* is a partner from inception, but the *muḍārib* is not a partner with the *rabb al-māl* unless and until the venture makes money. That is, the *muḍārib* becomes a partner if and when profit emerges. If and when it does, then the worker-partner is entitled to a share of the profit. Note, therefore, that as a trustee and agent, the *muḍārib* is not a partner, which accords with the general understanding of trusteeship and agency, as distinct from partnership. The investor, which all along is a partner, is not obliged from the inception of the *muḍārabah* to share profit. Rather, that obligation is a kind of contingent liability, conditional on step three happening, namely, that the business venture turn a profit. From the perspective of the *muḍārib*, her legal right to share profit essentially is a contingent asset, conditional on the same occurrence in step three.

As for the other part of any profit, it goes to the *rabb al-māl*. This allocation makes economic sense. It was the investment, or loan, in the first step, by the *rabb al-māl* that capitalized and thereby catalyzed the venture. Moreover, it was the *rabb al-māl*, in the second step, which (or who) bore the full risk the venture would not generate a stream of revenues in excess of costs. The allocation of profit to the *rabb al-māl* is, therefore, a return on an investment that was not risk-free. Is this return "interest"? In an economic sense, the answer is "yes." The return is compensation for a loan entailing risk.

However, in the conventional non-Muslim banking sense of the term, and from the perspective of the *Shari'a*, the answer is "no." It is not a return fixed contractually as a percentage of the principal value of the initial loan. Rather, the investor is sharing in the success, or not, of the venture to which it (or she) extended financing. If the venture is unsuccessful, then the *rabb al-māl* — not the *muḍārib* — is fully liable for the loss. To be clear, under the *Shari'a*, the *rabb al-māl* does not have the legal right to demand re-payment from the *muḍārib*. In contrast, many *Shari'a* scholars view a conventional interest-based loan transaction as putting the risk of loss on the borrower.

<sup>14</sup> NYAZEE, *supra*, at 246 (quoting *Al Kirashī, Mukhtasar Sidi Khalil*, vol. 6 at 203).

<sup>15</sup> NYAZEE, *supra*, at 246 (Selangor, Malaysia: The Other Press, Malaysian ed., 2002) (quoting *Al Ramli, Nihāyat Al-Muhtāj*, vol. 5 at 218).

After all, under the terms and conditions in standard loan documentation, the lender, such as a bank, is legally entitled to demand full repayment of principal and interest from the borrower, regardless of the success or failure of the project for which the loan was made. To be sure, in reality, banks "eat" losses from loan defaults. That is why they maintain loan loss reserves and capital on their balance sheets. In fact, they are required to do so under the banking laws of the United States, United Kingdom, Australia, Canada, New Zealand, and almost all non-Muslim countries. Still, Muslim scholars would insist that in a *Shari'a* compliant loan transaction, the bank, not the borrower, suffers from the lack of profitability of the borrower.

These scholars also would point out that in a *Shari'a* compliant transaction, the *rabb al-māl* does not ask for collateral from the *mudārib*. Whether the *rabb al-māl* has the legal right to do so appears to be a matter of debate. In practice, however, because in step one (above) the *mudārib* gains the status of an *amin* (or trustee) of the invested funds, it would be incongruous to ask the trustee for a security deposit. Trustees are not asked to put up assets of value to secure losses that might occur to the investments they oversee. In contrast, secured financing — that is, lending against collateral — is commonplace in conventional non-Islamic banking.

## § 28.03 RULES GOVERNING SHARIKAH AL-MUDĀRABAH

### [A] Limits on Participation by *Rabb al-Māl* and Vitiating of *Mudārabah*

In sum, once operational, through a *mudārabah*, the *rabb al-māl* participates in the work of the *mudārib* in three important respects: lending funds to facilitate that work, receiving a portion of the fruits of that work as repayment for the loan, and bearing the risk that the work could prove, as it were, fruitless. Indeed, these three methods of sharing are exclusive, i.e., they are the only ways the investor can participate with the worker in the framework of a *mudārabah*. If the *rabb al-māl* participates with the *mudārib* in a different way, then the *mudārabah* itself either must be converted to a different form of partnership, or becomes legally void.

There are four obvious examples of participation that would vitiate the *mudārabah*. First, a condition that the *mudārib* be entitled to the entirety of any profit renders the *mudārabah* void. The *mudārabah* agreement must allow for the *rabb al-māl* to participate in at least some of the profits. Second, the *mudārabah* becomes void if the *mudārib* breaches any of the terms of the partnership agreement. Upon such violation, the *mudārib* technically becomes a usurper — that is, a usurper of the funds initially provided by the *rabb al-māl*. At that juncture, the *mudārib* turned usurper is liable for returning the capital to the *rabb al-māl*.

Third, suppose the *rabb al-māl* actively engages in the work in which the *mudārib* himself or herself is performing, or indeed requires as a condition of the investment that such work be permitted. The *mudārabah* would be legally void. Specifically, all Four *Sunni* Schools agree the *mudārabah* is void if the *rabb al-māl* requires as a condition (in the "loan" agreement itself) of giving funds to the

*mudārib* that the *rabb al-māl* be permitted to work with, or for, the *mudārib* on the same project for which the funds are given. (By way of loose analogy, imagine the Bank of America lending U.S. \$1 million to Royal Dutch Shell for an oil refinery in Nigeria, but conditioning the loan on the Bank itself working with or for Shell on the construction project, e.g., buying materials, building the refinery, and so forth. That condition would render the arrangement, under the *Shari'a*, void.)

Interestingly, the Four Schools are not unified on the details of the new legal relationship when a *mudārabah* is rendered void. The *Shāfi'i* and *Hanbali* Schools agree a void *mudārabah* becomes a vitiated *ijārah* (wages) contract, as one source explains:

The term vitiated *ijārah* is being used here as the wages in this arrangement are ambiguous, and the *mudārib* is entitled to reasonable wages for his work, while the profit is entirely for the *rabb al-māl*.<sup>16</sup>

That is, the *mudārabah* is void, the new relationship is characterized as a vitiated *ijārah* (wages) contract in which the former *rabb al-māl* is the employer, and the former *mudārib* is the employee. Admittedly, the adjective "vitiated" before "*ijārah*" is confusing, because it connotes that the contractual employer-employee relationship is rendered legally ineffective. Why, exactly, the relationship is "ambiguous" is unclear.

As for the *Māliki* School, it splits into two views. One perspective agrees with the *Shāfi'i* and *Hanbali* Schools, i.e., the key requirement in the new *ijārah* relationship is that *rabb al-māl* give the *mudārib* a reasonable wage. Once wages are given, the *mudārib* is not a partner, but an employee. The second perspective emphasizes that the *mudārib* is entitled to a reasonable profit from the work of the *mudārib*. This perspective indicates the relationship is not really a contractual employer-employee relationship, but rather has vestiges of the *mudārabah*. Significantly, this split is evident in the characterization by the *Māliki* School of the business relationship between the Prophet and his wife, Khadyjah, before their marriage. Under the first view, their association was one of *ijārah*, whereby the Prophet was an employee of, and paid wages by, Khadyjah. Under the second view, their association was a *mudārabah* partnership, with Khadyjah providing the funds like a *rabb al-māl*, and the Prophet being entitled to profit as a *mudārib*, based on a contract the two concluded before their marriage.<sup>17</sup>

Fourth, suppose the *rabb al-māl* acts as an agent for the *mudārib* to get business for the latter. Here, the *rabb al-māl* would be transformed into an agent, or *wakil*. Such agency would be akin to participation in the work, and likely would make the partnership void. Third, what if the *mudārib* opens a store and employs the *rabb al-māl*? In this instance, the *rabb al-māl* becomes an employee of the worker. By analogy to the first case, it seems that the partnership would be rendered void.

A logical follow-up matter is how far the vitiating conditions extend. For example, is it permissible for a *rabb al-māl* to enter into normal commercial transactions, specifically, buying or selling goods or services, with the *mudārib*? In a *mudārabah*

<sup>16</sup> NYAZER, *supra*, at 254.

<sup>17</sup> See NYAZER, *supra*, at 247.

in which the investor and worker are well-known to each other, such transactions would seem natural. The *Hanafi* School finds no difficulty with the proposition, and permits the investor to engage in these transactions. That is because the *Hanafi* School characterizes the *rabb al-māl* as akin to a stranger to the *muḍārib*, once the *rabb al-māl* delivers the capital to the *muḍārib*.

But, the other Schools do see a problem with the *rabb al-māl* buying or selling from the *muḍārib*. For example, *Imām* Shāfi'i argues against such dealing, in effect calling for the *rabb al-māl* to stay quite divorced from the operation of the *muḍārabah*.<sup>18</sup> Thus, suppose there is no *a priori* explicit condition imposed on the *muḍārib* by the *rabb al-māl* that the latter work by or for the former, nor that the latter purchase goods or services from the former. However, after the funds are transferred from the latter to the former, then the *rabb al-māl* begins to buy goods or services from the *muḍārib*. The *Shāfi'i* School does not support this kind of dealing.

### [B] Legality of *Sharikah al-Muḍārabah*

The legality of *sharikah al-muḍārabah* is indisputable. All four Classical Sources of the *Sharī'a* state, in varying degrees of clarity, that this kind of partnership is lawful. First, *surah* 73 *ayah* 20:

... He [God] knows that some of you will be sick, some of you travelling through the land seeking God's bounty, some of you fighting in God's way: recite as much [of the Qur'ān] as is easy for you, keep up the prayer, pay the prescribed alms, and make God a good loan. Whatever good you store up for yourselves will be improved and increased for you.<sup>19</sup>

To be sure, this passage does not expressly reference a *muḍārabah* partnership, though it is as close as any passage in the Qur'ān comes to identifying a particular type of business association. Nonetheless, all four *Sunnite* Schools take the first italicized phrase to imply that this kind of partnership is valid. In essence, the Schools agree that as people journey through life in search of income and wealth, they may enter into investor-worker relationships.<sup>20</sup> In addition, though they are in a religious context, the subsequent reference to making a loan, and the last sentence concerning an increase in value of stored funds, may be applied in the everyday commercial world. Funds stored by an investor, and then placed by an investor with a worker (in effect, stored with the worker), which gain in value through the efforts of the worker, and thereby yield a profit to be shared with the investor, is exactly the scenario in an ideal *muḍārabah* partnership.

At the same time, the ambiguity of the phrase is the reason additional *Sharī'a* sources are helpful to firm up the legality of a *sharikah al-muḍārabah*. From the *Sunnah*, the Prophet approved this type of *sharikah*, at least as recorded by Ibn Mājah:

<sup>18</sup> See, e.g., the Arabic website [www.Islampedia.com](http://www.Islampedia.com) (posting a book entitled *Kitāb al-Fiqh*).

<sup>19</sup> THE QUR'AN — A NEW TRANSLATION BY M.A.S. ABDEL HALEEM *surah* 73, *ayah* 20 at 209 (Oxford, England: Oxford University Press, 2004) (emphasis added).

<sup>20</sup> NYAZEE, *supra*, at 246.

There is great blessing in three things: The credit sale, *muqāradah* [i.e., the name for *muḍārabah* used in Mecca and Medina], and mixing wheat and barley for domestic consumption not sale.<sup>21</sup>

As explained above, according to one characterization by some scholars, Muhammad transacted through this method with his wife Khadyjah prior to their marriage. Khadyjah provided wealth, in the form of commercially valuable assets, and the Prophet traveled to Syria to invest them. Additionally, during the life of the Prophet, several of his Companions entered into *sharikah al-muḍārabah* partnerships. At no point did the Prophet look askance at these arrangements.

Likewise, both *ijmā'* (consensus) and *qiyās* (analogy) buttress the case for the legality of a *sharikah al-muḍārabah* partnership. As for *ijmā'*, virtually all *fukahā'* recognize the existence of, and approve as legally and ethically legitimate, the *muḍārabah*. Interestingly, the point seems to have been so obvious that the consensus has been a quiet one, as Al Kāsāni explains:

Some of the *Hanafi* jurists have reported the *ijmā'* of the Companions about *muḍārabah*, although these are cases of *Ijmā' sukūti* [silent consensus].<sup>22</sup>

The *Shāfi'i* School applies *qiyās* in the sense of drawing an analogy between a *sharikah al-muḍārabah* and a *sharikah musāqāh*. The latter is valid, and the former is like the latter, so the former is valid, too. However, the other Schools are reticent in respect of using analogical reasoning to arrive at a legal justification in favor of a *sharikah al-muḍārabah*. That is because the precise nature of the work in which the *muḍārib* will engage, and the wages she will earn, are not known at the time the partnership agreement is set. Thus, Al Kāsāni concludes:

As far as analogy is concerned, it is not permissible, because it is hiring for unknown wages, in fact for non-existent wages. The work too is unknown. We have, however, given up this analogy in favor of the evidence in the Book [i.e., the Qur'ān], the *Sunnah* and *ijmā'*.<sup>23</sup>

Beyond the four Classical Sources of Islamic jurisprudence, there is a fifth basis for asserting the legality of a *sharikah al-muḍārabah*.

Without the possibility of a *sharikah al-muḍārabah*, many individuals with wealth might not have the time or experience to use it. Conversely, there are many people with experience, but lacking wealth. The *sharikah al-muḍārabah* is a means to allocate financial capital for efficacious purposes. It is, in effect, a meeting ground for savers (those with surplus funds to invest) and users (those needing capital to realize their commercial aims). In this (and other) respects, the *Sharī'a* encourages market growth by uniting money and the experience. Al Sarakhsi (died *circa* 1106

<sup>21</sup> NYAZEE, *supra*, at 247.

As Professor Nyazee explains in a footnote, in the *isnād* (chain of transmitters) of this *hadith*, there are two unknown persons, i.e., persons who do not appear in other documents, and/or the background of which is unknown. See *id.*, fn. 16 at 247. Accordingly, such *hadiths* are not included in the strict compilations of Al Bukhari and Sahih Muslim.

<sup>22</sup> NYAZEE, *supra*, at 247 (quoting Al Kāsāni, *Badā'ī 'Al-Sanā'ī*, vol. 8 at 3587).

<sup>23</sup> NYAZEE, *supra*, at 247 (Selangor, Malaysia: The Other Press, Malaysian ed., 2002) (quoting Al Kāsāni, *Badā'ī 'Al-Sanā'ī*, vol. 8 at 3589).

A.D.) explains the pragmatic reason for condoning a *sharikah al-mudārabah* arrangement:

[It is permitted] because the people have a need for this contract. The owner of wealth may not have the opportunity for a profitable investment, while the person who has such an opportunity may not have wealth, and profit is acquired through both, that is, wealth and the ability to transact. In permitting this contract, the goals of both are achieved.<sup>24</sup>

In brief, the fifth rationale for the *mudārabah* partnership is simple economic necessity.

### [C] Five Conditions for *Sharikah al-Mudārabah*

All Four *Sunni* Schools agree the only indispensable element for formation of a *sharikah al-mudārabah* is offer and acceptance. That is, to establish this kind of partnership, a *rabb al-māl* (investor) must offer her wealth to a *mudārib* (worker) so that the latter can trade with it, i.e., engage in business dealings with it, and thereby increase the value of that wealth. The *mudārib* is free to accept or decline the offer, but assuming she seeks to enter into the venture, must accept it. There is no specific word of acceptance required by any of the Schools. Rather, any sign of acceptance from the *mudārib* is enough, including indication through silence and performance. As part of this offer-acceptance process, the two parties agree to a division of profits, which may or may not be on 50-50 terms. At this juncture, the *mudārabah* is born.

As with most other forms of partnership in the *Sharī'a*, an agreement to set up a *sharikah al-mudārabah* ideally should be memorialized in a written contract. As a default rule, Imam Mālik teaches that if the profit division is not specified at the time the partnership is established via contract, then the rule for sharing should be equality among the partners. Further, like those other types, there are specific conditions that ought to be set out in the partnership agreement to ensure the particular *mudārabah* in question is legally valid. All Four *Sunni* Schools agree there are five general conditions for the legal validity of a *sharikah al-mudārabah*, as follows.

#### (1) Legal Capacity (Capability) —

The Four Schools agree on the *ahliyah* condition (which also applies in other contexts, such as *sharikah al-inān*). Simply stated, all partners in a *sharikah al-mudārabah* must have the legal capacity to transact business. Since a *sharikah al-mudārabah* is a contractual partnership, it obviously requires at least two partners to satisfy the formation elements of offer and acceptance. The *rabb al-māl* (investor), on one side, must have the legal capacity of an agent. The *mudārib* (worker), on the other side, must have the right to act as an agent.

<sup>24</sup> NYAZEE, *supra*, at 247 (quoting Al Sarakhsi, *Al-Mabsūt*, vol. 22 at 19).

The full name of Al Sarakhsi is "Muhammad ibn Ahmad ibn Abi Sahl Abū Bakr Al Sarakhsi." A Hanafi School scholar, his greatest work is *Kitāb Al-Mabsūt*, a 30-volume commentary on the work of Muhammad Al Shaykhāni.

#### (2) Capital Contribution —

Preferably, the capital contributed by a *rabb al-māl* to a *sharikah al-mudārabah* should be cash or currency, the most liquid form of financial capital. However, the investor may offer other forms of tangible property (*ʿurūd*). Associated with this capital requirement are four corollary provisos.

First, the value and amount of capital must be known to both partners. Consequently, tangible property that is not liquid (i.e., for which there is no ready market with a large number of buyers and sellers) is not preferred. Second, the capital must be available at the time the partnership contract is finalized. If a *rabb al-māl* pledges to deliver capital to the *mudārib* (worker) a year after the contract is agreed, then the partnership is invalid. Third, and following logically from the second proviso, the *rabb al-māl* must deliver the capital to the *mudārib*. That is not to say the investor himself or herself must personally deliver the capital to the worker. Use of an intermediary is permissible. The point is that the capital must not remain available — it must be transferred to the control of the worker. Fourth, the *mudārib* must perform the entire work and management of the business. The *sharikah al-mudārabah* is void if the *rabb al-māl* requires her involvement in the operation or oversight of the business. That said, suppose the *rabb al-māl* volunteers in helping and working with the *mudārib*, and the latter agrees. All Four Schools (with the possible exception of the *Shāfiʿi* School) agree this extent of involvement is permissible. Their rationale appears to be that participation by the investor, being voluntary, leaves full control over the nature, composition, and amount of work, and over management decisions, with the worker.

#### (3) Profit —

From the perspective of the economic self-interest of a *rabb al-māl*, the gist of a *sharikah al-mudārabah* is to receive a return on her capital contribution. The source of that return is a portion of the profits earned by the *mudārib*. Ethically, there is nothing wrong with the investor sharing in the profits. To the contrary, the investor has a legitimate claim on a portion of them. But for the capital contribution of the investor, there would be no profits, because the initial funding catalyzed the enterprise.

The questions, then, are what portion should be allocated to the *rabb al-māl*, and what formula should be used to make the allocation? On the first issue, the *Sharī'a* takes a freedom-of-contract approach. With one limiting parameter, it is up to the investor and worker to negotiate a profit-sharing arrangement suitable to them. The limit is that the *rabb al-māl* cannot have 100 percent of the profits. Otherwise, the *mudārabah* is vitiated and the contract between the investor and worker becomes an *ijārah* (hire or wages) contract. But, on the second issue, the *Sharī'a* advocates a prescription. Profit for the investor cannot be expressed as a percentage of the capital she invests with the worker. Likewise, it is not permissible for either party to express her share in the profit as a certain sum of money. In either instance — defining the profit owed as a percentage of the capital contribution, or as a lump sum — the *sharikah al-mudārabah* becomes invalid.

Instead, the proper way to express profit sharing in a *mudārabah* arrangement is in terms of total profit. Put directly, the profit to be shared with the *rabb al-māl*

must be expressed as a ratio, or percentage, of the total profit the *muḍārabah* enterprise earns. If the partnership agreement fails to specify a percentage, then the default rule (noted above) is equal sharing. Technically, in a two-person arrangement, the partnership agreement needs to express the percentage of the profit owed to only one of the partners. The balance goes to the other partner. With more than two partners, such as where there is a *rabb al-māl* plus five *muḍārib*, it is necessary to spell out the sharing among each partner. Again, the default rule is equal sharing of profits among the multiple partners.

In all instances, no profits are to be distributed to the worker (or workers) until the investor receives her entire share. This stipulation is one of priority, namely, that the *rabb al-māl* has a superior claim on any profit to that of the *muḍārib*. Conceptually, that superiority is akin to the priority of a creditor (such as a bank lender in a conventional loan transaction) vis-à-vis a debtor (such as a borrower).

To illustrate the profit condition, assume Nora and Nayef form a *muḍārabah* as *rabb al-māl* and *muḍārib*, respectively. Nora invests U.S. \$5 million in the venture. The partnership earns \$100,000 in its second year of operation, after losing money in the first year. In that first year, Nora earns nothing — there are no profits to be shared. Suppose the partnership contract states Nora is entitled to a 5 percent return on her capital, which would equate to \$250,000. This term renders the *muḍārabah* invalid, because it expresses profit as a percentage of invested capital. Likewise, a term calling for Nora to get a lump sum of \$250,000 would render the arrangement invalid. The legally appropriate way for Nora and Nayef to allocate profits is as a percentage thereof. Thus, a specification that Nora is to receive 5 percent of any profit earned — which in the second year would be \$5,000 — would be correct. Observe that the percentage of total profit must be fixed. An uncertain percentage would render the arrangement invalid.

Perhaps even more importantly, note the risk (in Wall Street parlance) that is borne by the *rabb al-māl*, Nora. Going into the arrangement, it is not at all clear whether, or when, she will realize a 5 percent return on her invested capital. Obtaining no return in the first year, she has incurred an opportunity cost. She could have invested the funds in another venture that would have earned a profit. (If Nora has access to, and is legally able to, invest in United States Treasury securities, then the interest she would have earned on an American government bill, note, or bond is a measure of her opportunity cost.) Nevertheless, allocation of risk to the *rabb al-māl* is precisely the point of a *sharikah al-muḍārabah*. The theory is to be fair to both sides through a just division of profits.

But, if a choice must be made between compensation to the investor and impoverishing the worker, then the *Shari'a* makes that choice. The investor had the money in the first place, and freely opted to offer it to the worker. Thus, without putting the presumption in these terms, the *Shari'a* presumes the investor is in the best position to bear the risk of loss. The worker is not to be put upon by the investor, and possibly put out on the street begging. To put the risk of unprofitability on the worker would be to impose a double loss on that worker. First, the worker has earned no profit himself or herself. Second, the worker is obliged to find (somehow) money to pay back the investor.

By way of critique, consider the systemic effects of this allocation of risk. What incentive does a *rabb al-māl* have to invest in entrepreneurial ventures, such as an angel investments or venture capital project, where the risk of failure is high? Might the Islamic allocation of risk be a disincentive to extending credit, which in turn might be a brake on growth, particularly of small and medium-sized enterprises (SMEs)? That is, if all the risk of unprofitability is on the investor, then are economies following *Shari'a* precepts prone to illiquidity?

One answer is the potential return also is high. For example, if there is a 50 percent failure rate in the first five years among restaurant entrepreneurs, then there also likely is a handsome payout for the successful eating establishments. Another answer is that investing in risky entrepreneurial ventures is not for the faint-hearted, risk-averse *rabb al-māl*. Rather, it is for the investor that (again in Wall Street parlance) is both risk-loving and has the net worth to absorb losses. A third answer is practical. The investor can require collateral, a deposit (*amīn*), to secure at least a portion of the investment. Thus, if the invested capital is used to purchase real property, such as a shopping center, then the investor can look to that property for some satisfaction — selling it, and keeping the proceeds. To be sure, the investor might chafe at the prospect of owning real or personal property, and arranging for its sale to get back any of its initial investment. Nevertheless, these security arrangements are common in Muslim countries that follow *Shari'a* banking principles, for instance, in instances of loans to buy a home or car.

Finally, is it permissible for a *rabb al-māl* and *muḍārib* to agree to convey a portion of the profit from their partnership to a third party? The answer is that it depends on the nature of the third party. *Imām Mālik* sees no harm in granting the entire profit for a charity. That view accords with a theme animating through Islam itself, namely, generosity. But, if the third party is not a charity, then allocating in a *muḍārabah* agreement any part of the profit renders the *sharikah al-muḍārabah* invalid. Thus, a permissible specification in the partnership contract is allocation of 10 percent of the total annual profit to a mosque or hospital. But, an allocation to Emirates Airlines, or to the re-election campaign of a Malaysian Prime Minister, would be invalid.

#### (4) Authorization and Power to Work —

Technically, there are two categories of *sharikah al-muḍārabah*: an absolute (or unrestricted) *sharikah al-muḍārabah*; and a restricted *sharikah al-muḍārabah*. The *rabb al-māl* (investor) and *muḍārib* (worker) must decide on which type they seek to establish by the time they sign a contract to create the partnership. The only way a *sharikah al-muḍārabah* is restricted is by mentioning the terms of restriction in the contract establishing the partnership at the time the partnership is created. Otherwise, the “default rule” is the *sharikah al-muḍārabah* automatically is an absolute *sharikah al-muḍārabah*. That said, the instance of restricted *muḍārabah* is common in lending transactions between a bank and an individual seeking funds to buy a home or car.

Suppose a *rabb al-māl* (the bank) lends money to the *muḍārib* (the individual), with the individual stating an intent to purchase real property or a vehicle. What protects the bank against the individual using the funds to open a store, pay for the college tuition of a family member, or take a holiday in Italy? The answer is the

bank inserts conditions in the *mudārabah* contract requiring the borrower to use the funds only for a specified purpose. The partnership thereby is a restricted *mudārabah*. If the individual breaches the restriction, then she is liable to the bank under the terms of the partnership agreement.

In contrast, in an absolute *sharikah al-mudārabah*, the *mudārib* receives permission from the *rabb al-māl* to engage in a full range of purchase and sale transactions concerning goods and services. This authorization is broad, and rightly so because the *mudārabah* is unrestricted. Implied in this broad authorization are eight specific powers. That is to say, in an unrestricted *mudārabah*, the general authority from the *rabb al-māl* carries with it eight powers for the *mudārib* to exercise in conducting the affairs of the partnership:

- Buying, Selling, and Leveraging:

The *mudārib* has the right to buy and sell goods or services up to the value of the initial capital contribution (investment) from the *rabb al-māl*. That is obvious enough, because the point of the partnership is to earn a profit, which is impossible unless one or more purchase or sale transactions are conducted. However, transactions conducted by the *mudārib* cannot exceed 100 percent of this capital base. The only exception is where the *rabb al-māl* grants the *mudārib* broad authority to act according to her opinion (or discretion), and explicitly permits the *mudārib* to commit the partnership in engagements that outstrip its capital.

Under the exception, the *rabb al-māl* specifically empowers the *mudārib* to purchase goods or services on credit beyond the limit of the capital of the partnership. In modern financial parlance, this exception is permission to "leverage," i.e., to borrow off a pool of capital or assets. In Arabic, the term is "*wilāyat al-istidānah*," which is comprised of two words, "*wilāyat*," meaning "guardianship," and "*istidānah*," meaning "purchases on credit terms," and includes increasing the amount of credit through such purchases, but excludes obtaining a cash loan. Thus, the *Sharī'a* rule is simple: the *mudārib* can engage in transactions up to the amount the *rabb al-māl* invested in the *mudārabah*, but cannot leverage off of this capital base without permission from the *rabb al-māl*.

If the *mudārib* exceeds the capital without permission from the *rabb al-māl*, what happens? The *Hanafi* and *Hanbali* Schools hold that the *mudārib* bears responsibility for any losses in excess of the capital base. For example, in a partnership between Nora and Nayef in which Nora invests U.S. \$5 million but gives Nayef authority to act according to his discretion, suppose Nayef purchases \$6 million in shares of United Airlines. Subsequently, the Airlines declares bankruptcy, and equity interests are wiped out. The shares are worthless, and under the *Hanafi* and *Hanbali* Schools, Nora loses \$5 million, and can hold Nayef personally liable for the additional \$1 million. Nayef acted outside the scope of his authority granted by Nora to use his discretion.

In contrast, the *Māliki* School allows sale transactions in excess of the capital base without an express permission from the *rabb al-māl*, but not purchases. In other words, the *Māliki* School is the most permissive of the Four Schools in condoning leveraging. Accordingly, the same result in the United Airlines hypothetical would occur under *Māliki* School jurisprudence, as it involves a sale

transaction. But, suppose that in the Nora-Nayef *mudārabah*, Nayef sells \$6 million worth of industrial goods manufactured by the partnership to an Argentine company. The goods are delivered, but before making payment, the Argentine buyer defaults on its obligations, and does not pay the *mudārabah*. The transaction is for purchase, not sale, thus under the *Māliki* School, \$5 million of loss is allocated to Nora, and \$1 million to Nayef.

As for the *Shāfi'i* School, it does not permit any transaction beyond the capital without an express permission to that effect from the *rabb al-māl*. Thus, this School is the most restrictive on leveraging. An ambiguous "act according to your discretion" directive from the *rabb al-māl* is insufficient to immunize the *mudārib* from loss in excess of the capital base. The *mudārib* needs explicit authorization for such protection, otherwise if the *mudārib* engages in any transaction exceeding the limit of the capital, not only is that transactional contract voided, but also the entire *sharikah al-mudārabah* becomes void.

- Appointing Agents:

A *mudārib* is permitted to appoint an agent, and delegate responsibility to that agent, in respect of the business of the *sharikah al-mudārabah*. Lest it be thought this appointment is by one agent to another agent, keep in mind that a *mudārib* is more than an agent. For the *Hanafi* School, Al Kāsānī justifies the appointment:

because *mudārabah* is more general than agency, and he [the *mudārib*] can utilize the authority that is lesser in status (inherent in it).<sup>25</sup>

In brief, by appointing an agent, a *mudārib* confers a portion of the status that she, as the working partner, possesses.

- Hiring Services and Assets:

A *mudārib* is empowered to hire a wide array of goods, services, and assets to advance the business interests of the business of the *sharikah al-mudārabah* partnership. Imam Kāsānī explains that a *mudārib*

... has the authority to hire workers who labor with the wealth as this is the commercial practice. A human being cannot carry out all tasks by himself and is in need of hired services. Further, the *mudārib* has the authority to rent houses for storing goods, because he cannot preserve these assets without them. He may also hire boats and beasts of burden, because the transportation of goods from one place to the other is a way of earning of profit, and he cannot do this all by himself.<sup>26</sup>

The explanation for this power is pragmatic. Only in unusual *sharikah al-mudārabah* arrangements could a *mudārib* accomplish all work by herself. Ex-

<sup>25</sup> NYAZEE, *supra*, at 261 (quoting Al Kāsānī, *Badā'ī Al-Sanā'ī*, vol. 8 at 3707). Al Kāsānī goes on to explain:

This means that *mudārabah* is a higher level contract as compared to agency. In fact, agency is part of it, therefore, he has the authority to employ this lower level contract that is included within it.

Quoted in *id.*, fn. 67 at 261.

<sup>26</sup> NYAZEE, *supra*, at 262 (quoting Al Kāsānī, *Badā'ī Al-Sanā'ī*, vol. 8, at 3707).

amples might be where the venture is to create art or write a book. The *rabb al-māl* invests funds with the *mudārib*, who is an artist or writer, to be used for supplies such as paint and canvasses or a computer and research materials. The *mudārib* then proceeds in a solitary fashion. When the painting or book is complete and sold, profits are shared with the investor.

By contrast, in the mainstream of cases, a *mudārib* needs help to conduct the intended affairs of the partnership. She may need to sub-contract certain tasks to experts, as in the case of a construction project in which the *mudārabah* is engaged. The *mudārib* will need the services of electricians, plumbers, and ventilation specialists, none of which she can perform herself. Likewise, the *mudārib* will need heavy machinery — bulldozers, cement mixers cranes, and the like — to complete the building project. Assuming the *mudārib* does not own such assets, it will be necessary to rent them.

- Traveling:

A *mudārib* has the power to travel to different places in pursuit of the business affairs of the *sharikah al-mudārabah*. Al Kāsānī explains this power in light of the origin of the word “*mudārabah*.”

As the contract has been concluded independent of a particular location it will be observed in an unrestricted manner, and also because the meaning of the word *mudārabah* is a supporting evidence. *Mudārabah* is derived from *darb* fi *al-arḍ* and that means traveling . . . This is the opinion of *Abū Hanīfah* and *Muhammad*, and is also one opinion of *Abū Yūsuf* as narrated by *Muhammad*. In a narration of the authors of *Imlāʾ* the *mudārib* does not have this right. It is also narrated from him that he made a distinction on the basis of whether the person does business in a settled manner and also whether he has the right to claim transportation costs.<sup>27</sup>

As the explanation also indicates, accompanying the power to travel is the power to deploy the funds of the partnership. A *mudārib* can use capital invested by the *rabb al-māl* during this travel to cover necessary transportation, lodging, and meal expenses.

- Doing Business:

A *mudārib* has the power to engage in any common business transaction to advance the interests of the *sharikah al-mudārabah*. This power includes depositing goods, such as via a bailment whereby the *mudārib* leaves goods owned by the partnership with a third party for a specific purpose (e.g., improving or doing maintenance on those goods). This power is consistent with the general principle that if a *rabb al-māl* grants the *mudārib* authority to act according to her considered opinion in all matters, then the *mudārib* can engage in any transaction, without any restriction.

However, this principle is subject to an exception. A *mudārib* does not have the right to enter into three kinds of transactions without the express permission from the *rabb al-māl*. First (as indicated earlier), a *mudārib* does not have the right to

exceed the limit of the capital of the *sharikah al-mudārabah*. Second, she is not authorized to give gifts or make donations out of the capital or assets of the partnership. Finally, a *mudārib* is not permitted to extend a loan from the partnership to another party.

- Engaging in Financial Transactions:

A *mudārib* is permitted to perform all monetary transactions on behalf of the *sharikah al-mudārabah*. Such transactions include depositing money, claiming debts, or making endorsements (*hawālah*) in order to transfer funds or payment instruments. As with the rights to hire, travel, and do business, this right is a pragmatic necessity. Indeed, it may be viewed as foundational. If a *mudārib* were not empowered to make payments, then her other powers would be commercially meaningless.

- Pledging Property:

A *mudārib* is authorized to pledge property of the *sharikah al-mudārabah* as collateral for the debts of the partnership. That power implies the *mudārib* can leverage (i.e., borrow against) the assets of the *mudārabah*, and thereby obtain credit to expand business operations beyond what would be possible through the capital base. Conversely, the *mudārib* also can accept pledges for the partnership, and thus become a creditor vis-à-vis a third party.

For example, suppose in a *sharikah al-mudārabah* in which the *rabb al-māl*, Dalal, invests U.S. \$1 million with the *mudārib*, Ibrahim. Ibrahim uses \$300,000 of the \$1 million capital to purchase unimproved land outside of Cairo, Egypt, to build a hotel with a view of the Pyramids of Giza that will rival that of the Mena House Hotel (a remarkable and renowned facility in its own right). Contemporaneously, Ibrahim seeks to construct a hotel near the famous Temple of Karnak, in Luxor, but the land for it costs \$700,000. He is understandably reluctant to deplete all of the capital of the partnership (i.e., the \$700,000 remaining, following the purchase of the Cairo property). Thus, Ibrahim pledges the Cairo property, valued at \$300,000, to a property owner-seller in exchange for that amount, plus expends \$400,000 of the partnership capital, to come up with the purchase price for the land in Karnak. In brief, Ibrahim has leveraged the Cairo property to obtain the Karnak property.

Observe that in the above example, Ibrahim is not permitted to leverage property to obtain a conventional cash loan entailing interest. Such a loan runs afoul of the *Shariʿa* rules against *ribā*. Rather, Ibrahim is mortgaging one property (in Cairo) to make a credit purchase of a second property (in Karnak). The owner of the property in Karnak is selling her property on credit terms, and accepting the Cairo property as collateral in the event Ibrahim defaults in the future in making payments to him or her for the property.

- Entrusting Goods:

Is it permissible for a *mudārib* to give goods of the *sharikah al-mudārabah* (without transferring ownership of them) to a third party? The general answer is “yes” (as the discussion above concerning deposits and bailment indicates). But, suppose the *mudārib* seeks to entrust a third party with assets, so that the third party can use those goods in trading? Critically, the third party will not share in any

<sup>27</sup> NAYEE, *supra*, at 262 (quoting Al Kāsānī, *Badāʾiʾ Al-Sanāʾiʾ*, vol. 8 at 3708).

profits from the trading. Rather, profits derived from transactions by the third party will go to the *mudārabah*. As an example, suppose a *mudārib* such as Ibrahim has 10,000 shares in high-tech Korean information technology (IT) companies, and gives those shares to Yahia for Yahia to trade on the Korea Stock Exchange (KSE) in Seoul. The shares are assets of the partnership. While Yahia might pay a fee to Ibrahim for use of the shares, Yahia will not get any profits from his trading of those shares, nor even a wage from Ibrahim to compensate him for his time and expertise. Is this entrustment of shares permissible?

The *Sunni* Schools are split on the question. According to the *Hanafi* School, and the minority view of the *Hanbali* School, it is permissible to give goods to another person without wages by way of *biḍāʿah* to trade. The Arabic term "*biḍāʿah*" means giving another person goods to trade, but not wages or profit sharing.<sup>26</sup> A simple example is when the owner of a store leaves the merchandise of the store to another shopkeeper (as distinct from an employee), while the owner is absent for prayer, business, or leisure. The logic seems to be that the entire transaction is voluntary and consensual, and specifically the third party (e.g., the other shopkeeper) agrees to trade the property for no wage or share in profits. The *Hanafi* and minority *Hanbali* School holding is that this kind of arrangement is acceptable.

In contrast, under the *Māliki* School, and majority view of the *Hanbali* School, a *mudārib* does not have the power to hand over the goods by way of *biḍāʿah* to another person. One explanation, from the *Māliki* School, is this kind of transaction is inconsistent with the expectation of the *rabb al-māl* as regards the *mudārib*. The *rabb al-māl* invests funds with the *mudārib* expecting work to be done by her (subject, of course, to normal hiring of sub-contractors). If the *mudārib* essentially parks funds or assets, even briefly, with a third party, then the third party is doing the work expected of the *mudārib*. Arguably, a second justification for the *Māliki* and majority *Hanbali* School position is it is unfair (notwithstanding consent) for the *mudārib* to gain from profits earned by a third party without also sharing them, or at least paying the third party a wage. As for the *Shāfiʿi* School, it is silent on the matter. Thus, the answer to the question about entrustment of Korean IT company shares to Yahia is "it depends on the School."

#### (5) Liability —

Rules for dividing liability of the debts of a *sharikah al-mudārabah* as between the investor (sleeping partner, or *rabb al-māl*) and workers (i.e., the *mudārib*) are complicated. As a generality, liability rests with the investor. That is, the sleeping partner bears the risk of the entirety of any loss. If the investor requires the worker to be responsible for any part of the loss, the whole contract for the *mudārabah* partnership becomes void. At this level of generality, all four *Sunni* Schools are in agreement.

However, there is an array of qualifications, elaborations, and exceptions to the generality. The following points summarize the intricacies:

- Liability for Loss of Capital Before Business Commences —

Suppose a *rabb al-māl* invests capital with a *mudārib*. Before the *mudārib* begins to engage in transactions using that capital, the capital is lost. The investor bears this loss. Moreover, the *mudārabah* becomes void, because its essential subject matter — the capital — is gone before the partnership even started doing business. As the *Hanafi* School jurist Al Sarakshi explains:

If the investor gives him a thousand *dirhams* by way of *mudārabah*, concluded on half profits, and this capital is lost before he could buy anything with it, the *mudārabah* becomes void, because of the loss of its subject-matter.<sup>29</sup>

Suppose, however, that the *rabb al-māl* delivered the capital to an agent, not directly to the *mudārib*. Assume the agent loses the money, but not before transferring some value to the *mudārib*. In this instance, the *mudārabah* is still valid. That appears to be justified on the ground that money is fungible, and not all of the capital is lost — the agent gave some funds to the *mudārib*.

- Liability for Loss of Capital After Business Commences —

Suppose a *rabb al-māl* invests capital with a *mudārib*, and the worker invests the original capital. In other words, the *sharikah al-mudārabah* commences operation. However, the *mudārib* fails to return the initially invested capital to the investor after completing the investment. The worker is liable for the capital lost. That is because the worker is a trustee (*amīn*), and the original capital is a trust (*amānah*) placed by the investor in her hands. This rule is consistent with the requirement that the *mudārib* cannot draw any profits earned by the *mudārabah* unless and until the *rabb al-māl* is re-paid its investment plus its agreed-upon share of profits.

- Liability for Purchases of Goods or Services Before Profit is Realized —

Liability for debt that arises out of purchases of goods or services, up to the extent of the capital, and before the realization of any profit, is on the worker. Suppose a *rabb al-māl*, Sheba, invests U.S. \$100,000 with a *mudārib*, Omar. Omar purchases \$25,000 of computers for the *sharikah al-mudārabah* on credit from Apple Computer. Assume no profit is yet made. Omar is liable for paying this bill, as he has the invested capital at his disposal to do so. However, what if — before Omar pays the bill — the capital is lost? Is Omar still liable? The answer is "no." The liability shifts to Sheba. Al Sarakshi writes of the case of liability after purchase, but before the profit:

If a person gives to another a thousand *dirhams* by way of *mudārabah* on half profits, and he (the worker) buys something with it, and the thousand are then destroyed before he could pay the seller, then, the *mudārib* will go back to the *rabb al-māl* for a similar amount. The reason is that the capital was a trust (*amānah*) in his hands after the purchase, as it was before it, and is therefore a loss of the capital. The purchase, however, was not void due to the loss of a thousand. The *mudārib* is a worker for the *rabb al-māl* in this purchase and he has recourse to him for what has become due by virtue of the agreement. For this reason he recovers another thousand from the *rabb al-māl* and delivers it to the seller.

<sup>26</sup> NYAZEE, *supra*, at 322.

<sup>29</sup> NYAZEE, *supra*, at 266 (quoting Al Sarakshi, *Al-Mabsūt*, vol. 22 at 169).

If he takes the (second) thousand from the *rabb al-māl* and does not pay it till such time that this too is lost, he has the right to recover yet another thousand. Likewise, all amounts that are lost out of those that he took into his possession until he makes the payment. Each of these amounts that he takes from the investor are [*sic*] held in trust in his possession . . . . The capital is a trust in his hands and he, therefore, has the right of recourse time and again until the payment reaches the seller, as against possession by the agent.<sup>30</sup>

Observe that the potential liability of the *rabb al-māl* is unlimited. Theoretically, there is no limit — other than the good judgment of the investor to put an end to matters — on the number of iterations in which the investor contributes capital, the worker enters into contracts, the capital is lost, and the counter-party seller on the contracts demands payment. In brief, obligations to third-party vendors of goods and services to the *mudārabah*, entered into by the *mudārib*, must be honored. If the capital exists to honor them, the *mudārib* uses it to make payment. If not, the *rabb al-māl* is liable.

• Liability for Purchases of Goods or Services After Profit is Realized —

Liability for debt that arises out of purchases of good or services, up to the extent of the capital, and after the realization of any profit, is on the worker. Again suppose a *rabb al-māl*, Sheba, invests U.S. \$100,000 with a *mudārib*, Omar. Omar purchases \$25,000 of computers for the *sharikah al-mudārabah* on credit from Apple Computer. Assume profit is made. Omar is liable for paying this bill. He has both the invested capital and profit at his disposal to pay the bill.

• Liability for Purchases of Goods or Services in Excess of Capital Without Permission —

If the worker purchases goods or services beyond the extent of the capital without the permission of the investor, then the worker is liable for the debt. Working without legal authority from the investor is simply a violation of the *sharikah al-mudārabah* contract. (Obviously, if the worker had permission from the investor to exceed the capital limits, then the transactions in excess of capital are lawful, and the investor bears full and unlimited liability.) To be sure, the investor bears some liability, namely, the loss of invested capital and her share of profits. But, the worker has unlimited liability, in the respect that the further she transacted beyond the capital limit without permission, the greater the liability on him or her.

• Liability for Purchases of Goods or Services in Excess of Capital with Permission —

Suppose a *mudārib* has permission from the *rabb al-māl* to enter into transactions for the purchase of goods or services in an amount or amounts that exceed the invested capital. The *mudārib* enters into such transactions, on the basis of this authorization. In essence, the *mudārib* is leveraging the capital base to buy goods or services on credit. The authorization from the investor to the worker to make purchases on credit in excess of the capital limits is called "*widā'iyat al-istidānah*." In practice, the authorization empowers the worker to use the good name and

credit-standing of the investor. Once the *rabb al-māl* confers this authority on the *mudārib*, the partnership automatically switches from a *sharikah al-mudārabah* to a *sharikah al-uwjāh*. No change in the partnership agreement is required — the shift occurs by operation of law.

The reason for this shift is the different essential attributes of the two kinds of partnership. A *sharikah al-mudārabah* requires a specified capital to create the partnership. But, by allowing transactions with borrowed capital, the partnership now looks like a credit cooperative — which is the form of association known as a *sharikah al-uwjāh*. With the shift, all of the requirements applying to a *sharikah al-uwjāh* are triggered. Further, as a result of the transformation, both the worker and investor bear unlimited liability. As for profit, it is divided equally between them.

In respect of the last rule, there is some ambiguity. In particular, do the terms of the *mudārabah* agreement still apply in any fashion?

It seems clear purchase and sale contracts entered into with third-party vendors before the *mudārabah* became a *uwjāh* agreement remain valid contracts. But, as between the investor and worker, it appears that their relationship is governed by the *mudārabah* agreement, up to transactions valued at or less than the original capital. For transactions in excess of the base capital, the *uwjāh* contract governs their affairs.<sup>31</sup>

#### [D] Termination of *Sharikah al-Mudārabah*

The termination of *sharikah al-mudārabah* may occur in any one of six different ways. First, it can terminate by rescission if a proscribed transaction is entered into by the partnership, such as the voiding of a *mudārabah* if the *mudārib* transacts beyond the capital limit without permission from the *rabb al-māl*. Second, if a *mudārabah* agreement specified the association lasts only for a certain period of time, then the partnership terminates at the end of the stated period. Third, total loss of the capital of a *mudārabah* ends the partnership. Fourth, the insanity of either partner terminates a *mudārabah*. Fifth, a *mudārabah* ceases to exist upon the death of either partner. Sixth, an order of a court can terminate *sharikah al-mudārabah*.

#### § 28.04 MURĀBAHA CONTRACTS, THEIR RELATIONSHIP TO SHARIKAH AL-MUDĀRABAH, AND COMMON COMMERCIAL FINANCE TRANSACTIONS

One of the confusing points about loans under Islamic Law is that unless they are a charitable transaction, they are not properly called a "loan." That is confusing to non-Muslims, because in non-Islamic financial centers, which dominate global financial markets, the term "loan" applies broadly to any extension of credit for which interest is charged by the lender to the borrower. Under the *Sharī'a*, such non-charitable transactions are appropriately classified as profit-sharing ventures.

<sup>30</sup> NYAZEE, *supra*, at 207 (quoting *Al-Sarakhsi, Al-Mabsut*, vol. 22 at 169).

<sup>31</sup> See NYAZEE, *supra*, at 272 (fourth bullet point).

A *sharikah al-mudārabah* is an example of one such venture. A *rabb al-māl* (sleeping partner) provides funds to a *mudārib* (working partner), and shares in the profits of the *mudārib*, in accordance with their partnership agreement. There are a large number of uses to which the *mudārib* might put the funds. Several examples come from the financial world:

- Investment funds, such as mutual funds or hedge funds, whereby the *mudārib* is the fund manager.
- Securities brokerage, whereby the *mudārib* buys and sells financial instruments (e.g., stocks or bonds) for the account of third parties.
- Securities dealing, whereby the *mudārib* buys and sells financial instruments for its own account.
- Securities underwriting, whereby the *mudārib* brings to market and invests in initial public offerings of financial instruments (e.g., stocks or bonds).

Further examples come from the non-financial world. A *mudārib* might use funds from a *rabb al-māl* for a construction project, such as building a new high rise, bridge, toll road, or utility. In these and the financial deals, the *mudārib* might hire (sub-contract) some or all of the work to a third party. The point is that a *mudārabah* partnership quintessentially is designed for a business purpose, be it commerce or finance.

But, what about common retail transactions in which households, Muslim and non-Muslim alike, engage? Examples include purchasing a major asset, like a home, or an expensive consumer durable good, like a car. How are these deals structured, to avoid the rule against *ribā*?

Some sources suggest routine consumer transactions are dealt with through the device of a *sharikah al-mudārabah*. This device is said to be the purist legal fiction (*hiyal*) to avoid *ribā*. However, several other sources indicate that a somewhat different device, called a "*murābaha*," is used — and they appear to provide the better view.

The term "*murābaha*" derived from the word "*rabah*" which means "profit." The legal definition of *murābaha* is:

A cost-plus-sale contract where a financier purchases a product, i.e., commodity, raw material or supplied, for an entrepreneur who does not have his/her own capital to do so. The financier and the entrepreneur agree on a profit margin, often referred to mark-up which is added to the cost of the product. The payment is delayed for a specified period of time.<sup>32</sup>

There is no doubt as to the status of *murābaha* — it is a contract, not a species of partnership like a *mudārabah*. However, it is a form of profit-sharing, and in economic terms is a contract for resale plus a stated profit. That is, a *murābaha* is an agreement for the purchase and resale of an asset (such as a home) or commodity (such as a car), with a surcharge to represent an amount for profit, in lieu of

interest. Simply put, *murābaha* refers to cost-plus pricing, or synonymously, a non-interest bearing loan.

For example, a bank (the creditor) purchases a home or car for a customer (the debtor), and resells the item to the customer. The customer must repay the bank not only the purchase price (the amount for which the bank bought the home or car), but also an extra sum, the difference between the cost to the bank and the resale price. That difference is the surcharge.

Consider the following example. Fatima would like to purchase an apartment in Abu Dhabi for U.S. \$1 million, but lacks the liquid cash to pay that price. She goes to the Dubai Islamic Bank, and asks for a "loan." The Bank agrees to purchase the apartment for her, paying the entire purchase price to the seller, Walid. Ownership of the apartment is transferred from Walid to Fatima upon payment by the Bank of \$1 million to Walid.<sup>33</sup> Fatima is legally obliged to repay the bank the full \$1 million principal. In addition, she must pay a surcharge, or profit, to the bank. That amount is negotiated between her and the bank, and hypothetically in this transaction is \$50,000. The entire transaction is a *murābaha* contract, which Diagram 28-1 summarizes.

<sup>32</sup> ZAMIR IQBAL & ABUL M. MIAKHOUB, AN INTRODUCTION TO ISLAMIC FINANCE THEORY AND PRACTICE GLOSSARY xi (Singapore: John Wiley & Sons (Asia) Pte Ltd, 2007).

<sup>33</sup> In some circumstances, under a *murābaha* contract the creditor (Dubai Islamic Bank) might hold title to the asset being purchased, albeit for a brief period, before transferring it to the borrower (Fatima).

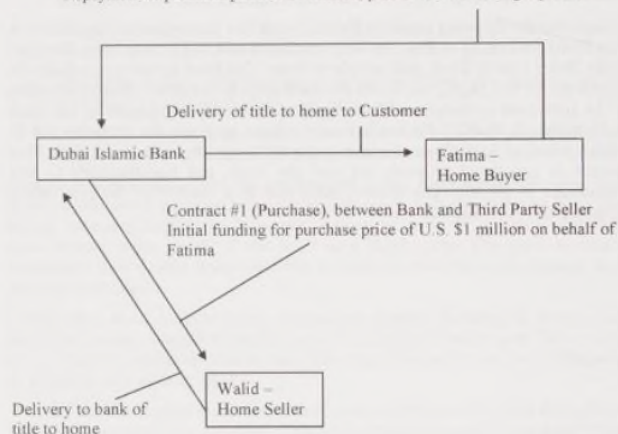

Diagram 28-1:  
Hypothetical *Murābaḥa* Contract

Contract #2 (Resale), between Bank and Customer

Repayment of purchase price of \$1 million, plus \$50,000 surcharge (profit)

Contract #2 (Resale), between Bank and Customer

Repayment of purchase price of \$1 million, plus \$50,000 surcharge (profit)

Another way to summarize a *murābaḥa* contract is that it is cost-plus pricing.<sup>34</sup> A bank, seller, and buyer are the three participants to reform a *murābaḥa*. The key to the contract is that the bank pays directly to the seller of the asset in question the purchase price, essentially buying the asset for the customer of the bank. The bank then resells the asset to the customer for its cost, plus an amount for a profit. Conceptually, the bank has traded a house, in the same way that an old-fashioned trader of dates would buy a package of them for \$10, and resell them at \$15 them for a profit of \$5 (not including any transaction or other costs).

For many, but not all, Islamic legal scholars, the surcharge is not considered to involve or interest (*ribā*) or result in unjust enrichment (*"al-ithra' bila sabab"*). However, some sources consider it essentially equivalent to a fixed interest loan.<sup>35</sup> The concern a *murābaḥa* contract is too close for comfort to a fixed interest loan, i.e., the surcharge is little else than *ribā*, is not unfounded. In practice, some

less-than-scrupulous Muslim financiers calculate the amount of profit by using non-Muslim interest rate benchmarks.

Examples include the interest rate on United States Treasury securities (especially long bonds, which have a maturity of 10 years or more, and thus best approximate the tenor of a mortgage loan, which typically is 15 or 30 years), the Fed Funds rate (the rate charged in the United States on short-term, inter-bank loans), or the London Inter-Bank Offer Rate (LIBOR, which is the rate banks charge to one another on unsecured, dollar-denominated loans in the London market). In the above hypothetical, the overage of \$50,000 is exactly 5 percent of the initial capital. In other words, some *fukahā'* point out the hypocrisy of what is really going on — making an interest-based calculation, but calling the result by a label other than *ribā*.

From the brief explanation of *murābaḥa* above, seven requirements emerge. That is, to create a valid *murābaḥa* contract, the following seven steps, with attendant conditions, must occur:

• *Step 1: Customer's Initial Purchase Request*

A customer initiates a request to a bank for the bank to buy a particular item on her behalf, and concomitantly promises to buy that item from the bank. The customer has the right to specify the precise merchandise and supplier, or can agree jointly with the bank on these points. The customer also has the right to withdraw, i.e., to cancel the arrangement, before the bank purchases the goods.

• *Step 2: Bank's Acceptance*

The bank accepts the proposition and agrees to purchase the item from the third party seller designated by the buyer, or as agreed between the bank and buyer. If the seller is not a third party, such as the customer or her agent, then the *murābaḥa* is prohibited. The reason is if the seller is the customer (or agent thereof), then the transaction would be characterized as an *'inah* arrangement (an exchange of one sum of money for a greater amount at a later date), which is a form of *ribā* and is strictly prohibited.

• *Step 3: Known Profit*

The price of the merchandise, as well as the profit in the transaction for the bank, must be known. That is, the resale price at which the customer buys the item from the bank, as well as the price the bank pays initially for it, must be established.

• *Step 4: First Sale Contract (between Bank and Third-Party Seller)*

The bank must form a contract with the third-party seller to buy the item desired by the customer of the bank. Typically, this contract is a sales contract (*bay'*).

• *Step 5: Second Sale Contract (between Bank and Customer)*

The bank forms a second separate contract with the customer to sell the item. This contract also is a sales (*bay'*) contract, and is for the re-sale of the

<sup>34</sup> See MAJIDUL ALAM CHOUDHURY & MOHAMMAD ZIAUL HOQUE, AN ADVANCED EXPOSITION OF ISLAMIC ECONOMICS AND FINANCE 26, 74 (Lewiston, New York: The Edwin Mellen Press, 2004).

<sup>35</sup> See, e.g., ANGELO M. VENARDOS, ISLAMIC BANKING & FINANCE IN SOUTH-EAST ASIA — ITS DEVELOPMENT & FUTURE 234 (Singapore: World Scientific Publishing Co. Pte. Ltd., 2005).

item in question at an agreed upon price. This resale contract also states that the customer may pay the price on a deferred basis. That way, the bank ultimately is able to deliver the item to the customer knowing the customer is legally obligated to pay the re-sale price on or by some future date after this delivery. The terms may call for installment payments.

• *Step 6: Bank Takes Possession*

At the moment the bank purchases the item, and, therefore, acquires ownership of the item, the customer is legally obligated to buy that item from the bank. The right of the buyer to cancel the arrangement terminates at this moment. The buyer must pay the resale price to the bank via a deferred payment arrangement. The bank must take actual physical or constructive possession of the item. For example, if the merchandise is a car, the bank must take possession of it via a certificate of title, which shows the bank is the owner of the car. Likewise, if the item is a financial instrument, such as a stock or bond, the bank would take possession by having the instrument registered in its name. In the case of a home, the bank would take possession by having a title deed recorded in its name.

• *Step 7: Delivery to Customer*

Finally, the bank delivers the item to the customer. Delivery may occur by transferring actual physical possession of the item to the customer, or conveying constructive possession. For instance, the bank may deliver a certificate of title to a car to the customer, arrange for stocks or bonds to be re-registered in the name of the customer, or re-title real property in the name of the customer.

These steps occur in a logical sequence connected to form an integrated deal. While the customer is the catalyst and end point — the steps start with a customer request and end with delivery to the customer — the bank plays the highest profile role. A *murābaha* contract is possible because of the active transactional and logistical activities of the bank. The bank is responsible for formation and performance of two contracts, one for purchase and the other for re-sale, which yield, respectively, a cost-plus pricing deal. Every business day throughout the Muslim world where Islamic banking practices are followed, this kind of deal is frequently observed.

As final considerations, first, it is important not to confuse “*murābaha*” with “*qard al hassan*.” The latter term refers to an interest-free loan, such as where a lender loans U.S. \$100,000 to a borrower, and the borrower repays exactly \$100,000 in the future. With *murābaha*, in contrast, the lender would purchase an asset (or consumer item) for the borrower at \$100,000, and sell that asset to the borrower. The borrower would pay for the asset in installments (e.g., over 5 years), with the total repayment being (for instance) \$125,000. The \$25,000 spread is the fee the lender charges for the entire transaction.

Second, this spread also highlights why a *murābaha* arrangement is accurately characterized as a “non-interest bearing loan,” or equivalently as “cost-plus pricing.” The \$25,000 spread is a fee, and (perhaps arguably) not interest — even if it is calculated by the lender *a priori* using interest rate benchmarks such as

LIBOR. The \$100,000 is loaned for a non-interest fee. Likewise, the \$100,000 purchase price is the “cost” of the asset, and the \$25,000 markup is the “plus pricing.”

## § 28.05 BANK FUNDING, TRANSACTIONS, AND LEGAL FEES

Consider the following example of a *murābaha* arrangement. A client of a bank would like to purchase a car for U.S. \$10,000. The bank agrees to purchase the car from the automobile dealer for that amount. The bank offers to sell the car to its client for \$13,000. The client agrees, and under the term of the *murābaha* deal, is obligated to pay back the bank \$3,000 in installments of \$1,000 per year across three years. The bank thus obtains a profit of \$1,000 per year for three years. The total revenue in the transaction for the bank is \$13,000, but the profit for the bank is \$3,000 as of the end of the third and final year of the transaction. Obviously, the arrangement is a quintessential cost plus pricing, or *murābaha*, deal.

Suppose that in advance of this auto financing deal, the bank requires the services of a lawyer. That is, the bank needs to hire outside counsel to take care of all aspects of the deal — negotiating with the auto dealer and client, drafting the relevant sale contracts between the bank and dealer and bank and client, and ensuring proper, timely payments are made. The lawyer requests that she be paid 3 percent of the total revenue earned by the bank on the transaction, which is \$390. The bank replies that payment to the lawyer based on total revenue does not conform with the *Shari'a*. That is because the lawyer is requesting a payment defined in terms of interest on the total transactional value. The bank makes a counter-offer: the bank will pay the lawyer 3 percent of the total profit earned by the bank on the deal, or \$90. The bank insists that it not only wants to provide *Shari'a*-compliant financing (*tamweel*) to its customers, but also wants to pay its lawyer in a manner that comports with Islamic Law.

The argument and rationale of the bank are correct. To be sure, the bank and lawyer can quibble about the reasonableness of the 3 percent figure — the lawyer may call for a higher number. But, if satisfying the profit-sharing impulse of the *Shari'a* is the goal, then the lawyer ought to be paid out of the profits the bank earns from its transactions, not out of the total transactional value of the deal or deals at issue. To pay the lawyer based on the total transactional value, or total revenue, is to create unjust enrichment (“*al-ithra' bila sabab*”) for the lawyer. The lawyer earns interest (*ribā*) based on money, rather than being involved in a communal profit-sharing endeavor.

Consequently, the lawyer enters into an arrangement with the bank that is separate and distinct from that between the bank and its client. This arrangement may take one of two forms. First, the bank may hire the services of a lawyer. The contract (‘*aqd*) for such services would be an *ijāra* agreement. The terms, including the fee the bank pays to the lawyer, would be negotiated between the parties. Second, the lawyer and bank could form a *sharikah al-mudārabah* partnership. The lawyer is the sleeping partner (*rabb al-māl*), and the bank is the working partner (*mudārib*). The latter agrees to share a portion of its profits with the former. (Note

that an important issue to check would be whether such a partnership, if entered into in the United States, would raise concerns under applicable bar rules about affiliations between lawyers and non-lawyers.)

This kind of arrangement — a *sharikah al-mudārabah* partnership — also applies to the funding operations of the bank. How does the bank get funds to purchase the car for its client? More generally, how does the bank obtain funds to engage in a wide variety, and large volume, of financing transactions, from automobile and home purchases to proprietary trading in financial instruments such as Islamic bond (*shukūk*)?

One source is investors in the bank, that is, high net worth individuals, and other institutions, that contribute capital to the bank. These entities become partners with the bank in a sleeping partnership arrangement: they are the sleeping partners, and the bank is the working partner. The bank provides them with a return calculated as a percentage of the profits of the activities and operations of the bank. This return is not calculated as interest on the total value of the transactions in which the bank engages, nor as a percentage of total revenues. For example, suppose the investors are lured by the promise of the bank to provide 30 percent of its profit to them. If the bank makes \$1 million in a particular year, then the investors would split \$300,000 among them. The 30 percent figure, as well as the method for dividing the profits, would be spelled out in the *sharikah al-mudārabah* partnership contract between the investors and bank. In effect, the investment contract is a partnership contract.

A second source is depositors in the bank. Normal, everyday retail customers of the bank deposit their money in the bank. The bank offers them a return for doing so. Under a conventional, non-Muslim bank deposit contract, that return is calculated as interest on the total value of the fund deposited. But, the bank seeking to comply with the *Shari'a* offers depositors a percentage of the total profits of the bank. For instance, suppose a bank earns \$1 million in a particular year as profit, and has 100 depositors, all of whom have the same arrangement with the bank — profit sharing of 25 percent, distributed equally among them. Then, the 100 depositors would split \$250,000 (25 percent of the \$1 million profit) equally, or \$2,500 each. To be sure, the deposit contracts need not all be identical in terms of the percentage profit sharing. As with the investors, for the depositors, the 25 percent (or other) figure, and the method of distribution, would be set out in the *sharikah al-mudārabah* partnership contract between the depositors and bank. In effect, the deposit contract is a partnership contract.

## Chapter 29

### FINANCE (TAMWEEL): ISLAMIC BONDS (SHUKUK) AND SECURITIZATION

... [T]he area of finance . . . is a key aspect of the phenomenon of globalization, owing to the development of technology and policies of liberalization in the flow of capital between countries. Objectively, *the most important function of finance is to sustain the possibility of long-term investment and hence of development.* Today this appears extremely fragile: it is experiencing the negative repercussions of a system of financial dealings — both national and global — based upon *very short-term thinking, which aims at increasing the value of financial operations and concentrates on the technical management of various forms of risk.* The recent crisis demonstrates how financial activity can at times be completely turned in on itself, lacking any long-term consideration of the *common good.* *This lowering of the objectives of global finance to the very short term reduces its capacity to function as a bridge between the present and the future, and as a stimulus to the creation of new opportunities for production and for work in the long term.* Finance limited in this way becomes *dangerous for everyone*, even for those who benefit when the markets perform well.

### § 29.01 IMPORTANCE OF ISLAMIC FINANCE (*TAMWEEL*)

"*Tamweel*" is the general Arabic term for "finance" or "financing." It is widely used throughout the Muslim world. "*Tamweel*" covers a vast array of financial instruments and transactions. The term also is taken as a name by many institutions that are players in Islamic financial markets. Note "*tamweel*" does not mean "loan." In the conventional non-Muslim sense of the term "loan," a "loan" is prohibited (*harām*) under the *Shari'a* because it bears interest (*ribā*). "*Tamweel*," however, connotes the provision of funds through means that are compliant with the *Shari'a*.

Obviously, Islamic finance — *tamweel* — is not a new phenomenon. Merchants and traders have had to finance their operations since the time of the Prophet Muhammad in a manner that is consistent with the religious and ethical norms of Islam. Those operations have included, through the ages, transactions with non-Muslim commercial parties. What is new is the interest in Islamic finance in the non-Muslim world. A number of events, particularly ones in non-Muslim countries, have attracted attention in recent decades.

For example, in 1978 the first Islamic bank was established in a western country, Luxembourg. It was called the "Islamic Banking System," and later renamed the "Islamic Finance House Universal Holdings, S.A." Its purpose was to serve high net worth individuals in a manner compliant with the *Shari'a*. In 1983, the Bahraini Solidarity Group established the first *Shari'a* compliant insurance company, Takaful SA, in Europe. In 2005, thirty-five *Shari'a* compliant investment funds and sub-funds existed and were marketed in the non-Muslim western world. By then, Luxembourg had obtained the status as the leading center in the non-Islamic world for the registration of *Shari'a* funds.

Among the many possible illustrations of the increasing global prominence of Islamic finance is *shukuk* (Islamic bonds). The *shukuk* market is a rapidly growing one, in both the Muslim and non-Muslim financial world. The demand for this product is increasing, as is the supply of the product. Further evidence of the robust state of affairs is the veritable cottage industry in books and articles on Islamic finance. The phenomenal growth in Islamic bonds:

is not surprising, as it is a reflection of how Malaysia has developed the *shukuk* market and how active these banks are in the market. Another notable performance is by the Hong Kong and Shanghai Banking Corpo-

ration's (HSBC) Islamic investment entity — *Amāna* [also transliterated as *Amanah*] — which has played an important role in the development of this market.<sup>1</sup>

Their observation points to the role of non-Islamic financial institutions like HSBC in fueling market expansion. Such banks tend to be larger and better capitalized than most Muslim banks, and have a more extensive international network of branches and agencies. Without their involvement, the market for financial instruments like *shukuk* that comply with the *Shari'a* might have been slower to grow and smaller in size.

Islamic financial instruments are important for both economic and ethical reasons. They play a significant role in funding business projects, and thereby contribute to the overall economic growth of a community, region, or country. More significant, however, is their ethical dimension. In the last analysis, Islamic Banking Law is not merely a flexible body of rules to support modern capitalist growth *per se*, but rather a set of Divinely-inspired moral precepts that support economic betterment in a way that comports with the will of God (Allāh).

Despite the enthusiasm, there is on occasion hypocrisy, even unscrupulousness, in some Islamic financial markets, and in respect of some Islamic financial instruments. For instance, no Sovereign Wealth Fund (SWF) of any Islamic country (as of March 2011) operates exclusively on *Shari'a* principles. Not infrequently, the investors that try most scrupulously to adhere to those principles are private individuals or institutions in non-Muslim countries, including the United States and United Kingdom. As another example, it is not evident that the financial returns from *Shari'a* compliant financial instruments are any better, in the long term, than conventional non-Muslim analogs. The returns may be superior in a moral or religious sense, but that is true only if the issuers of the instruments are not cheating their investors. As any actual or would-be investor knows, cheating is a temptation that knows no religious boundaries.

Wherever located, financial institutions that seek to provide customers with *Shari'a* compliant investment vehicles face a problem: how can they certify to prospective investors that the financial instrument they propose to sell truly adheres to Islamic Law? Invariably, the answer is certification from one or a group of prominent Islamic legal and religious scholars. Yet, as in any field, not all scholars are alike. Some are more prone to being hired out to give an opinion in exchange for a fee, and more susceptible to influence by the payor, than others. Indeed, the universe of truly exceptional, unbiased, high-integrity *Shari'a* experts on Banking Law is small. Of course, the same critique may be offered of non-Islamic financial products that are marketed as socially responsible investments.

These kinds of problems aside, the fact is Islamic finance is a significant force in world financial markets. Regrettably, the modern mainstream media in countries like the United States tends not to focus on this fact. Thus, lost amidst the attention of much of the media on war and terrorism is a second fact. Islamic financial products have a long, rich history of legal and religious thought in their support.

## § 29.02 CONVENTIONAL NON-ISLAMIC BONDS

### [A] Definition

In both Islamic and non-Islamic finance, a "bond" is a debt security, which is: a claim on a specified periodic stream of income. Debt securities are often called *fixed-income securities*, because they promise either a fixed stream of income or a stream of income that is determined according to a specified formula. These securities have the advantage of being relatively easy to understand because the payment formulas are specified in advance. Uncertainty surrounding cash flows paid to the security holder is minimal as long as the issuer of the security is sufficiently creditworthy. . . .

The bond is the basic debt security. . . .<sup>2</sup>

A "bond," then, is "a security that obligates the issuer to make specified payments to the holder over a period of time." That is true in both non-Islamic and Islamic finance.

However, the role of interest (*ribā*) is the critical factor differentiating conventional bonds from Islamic bonds (*shukūk*). In non-Islamic finance, a "bond" is an interest-bearing certificate sold by a company or government to raise capital, i.e., money. In Islamic finance, interest plays no role, or at least it is not supposed to.

In both financial systems, the relationship created by a bond between issuer and purchaser is analogous to a loan. With a bond, a purchaser, or investor, is the creditor, who loans the issuer, which is the debtor, funds in the form of the initial payment for the bond, which is the original issue value, or initial public offering (IPO) price. That price is known as the "par value," "face value," "nominal value," "stated value," or "principal amount" of the bond. Typically, it is U.S. \$1,000 per bond. Thus, bonds are issued "at par," meaning sold in an IPO at the value on their face, such as \$1,000.

A bond issuer uses the funds raised through floating bonds for purposes made known to the investors, which range from financing current expenditures to providing for long-term physical capital projects. For instance, for private issuers, the expenditures may pertain to purchasing a company in a merger-and-acquisition deal, and the projects may be construction of a new factory. For public sector (i.e., governmental) issuers, the expenditures may relate to defense or health care, and the projects may relate to infrastructure (e.g., ports, roads, or telecommunications facilities) or education (e.g., new schools).

<sup>2</sup> ZVI BODIE, ALEX KANE & ALAN J. MARCUS, *ESSENTIALS OF INVESTMENTS* (New York, New York: McGraw-Hill/Irwin, 5th ed., 2004) (emphasis original). [Hereinafter, BODIE ET AL.]

Note that unlike a bond, a certificate of deposit (CD), and commercial paper, are considered short-term money market instruments, not a species of debt securities.

### [B] Investment Appeal

Why invest in bonds? Bonds are an attractive investment vehicle. Like a fixed-term loan, there is a specified rate at which the issuer must pay the bond holder at fixed intervals. This rate is fixed and thereby provides the bond holder with a steady stream of income throughout the life, or tenor, of the bond. Second, the bond issuer must pay the bond holder the principal amount of the bond upon maturity. In brief:

- The steady income stream is interest, also called the "coupon rate," such as 5 percent. Typically, this coupon rate payment is made annually in Europe and semi-annually in America.<sup>3</sup> The term "coupon rate" derives from the era in which all bonds were paper-based (that is, certificated rather than uncertificated securities), and the bond holder claimed her interest payment from the issuer by clipping off the coupon from the bond and mailing it to the issuer.<sup>4</sup>
- The repayment upon maturity, i.e., when the bond is redeemed, is the principal amount borrowed by the issuer, namely, the par value, such as \$1,000.

For example, suppose an investor purchases a bond with a par value of \$1,000 and coupon rate of 8 percent and maturity of 30 years.<sup>5</sup> The issuer must pay the investor 8 percent of \$1,000, or \$80, annually until the bond matures in 30 years. Upon maturity, the issuer redeems the bond, which means it pays back the face value of \$1,000, to the bond holder. Thus, if the investor held the bond from its initial IPO until maturity, she will have obtained \$2,400 in interest payments for having loaned the issuer \$1,000, and will receive back that \$1,000 loan.

Manifestly, interest plays an indispensable and central role in conventional finance, in contrast to Islamic finance. Indeed, typically an issuer sets the coupon rate high enough to induce investors to purchase its bonds at par value.<sup>6</sup> Coupon payments typically are fixed. Fixed-rate bonds offer reliable, stable income and thereby diversify an investment portfolio that contains instruments like stock or real property, which entail the risk of dramatic fluctuations in value and returns.

Note, however, that coupon payments on certain bonds are based on a dynamic index, such as one based on a particular financial market. Such instruments are called "floating rate" bonds. For instance, the coupon rate on a floating rate bond might be linked to an index of interest rates, and rise and fall directly with that index. Conversely, there are bonds known as "reverse floaters." Their coupon rate falls when interest rates rise, i.e., the relationship between the coupon rate and index is inverse. Thus, an investor suffers a double loss of interest rates rise: the

<sup>3</sup> BODIE (Finance), WIKIPEDIA, posted at [http://en.wikipedia.org/wiki/Bond\\_\(finance\)](http://en.wikipedia.org/wiki/Bond_(finance)). [Hereinafter, BODIE (Finance).]

<sup>4</sup> See BODIE ET AL., *supra*, at 296.

<sup>6</sup> See BODIE ET AL., *supra*, at 296.

<sup>7</sup> See BODIE ET AL., *supra*, at 302.

present value of the coupon payments fall with this rise, and the amount of the payments falls.

Diversification, then, is a key reason for investing in bonds. The adage "do not put all your eggs in one basket" applies to savings. It is imprudent to invest all assets in one particular market. In times of crisis, different asset markets across regions or countries tend to be linked. But, in normal times, asset price movements in different markets tend to reflect underlying fundamental economic and political factors in those markets. That means different assets entail different risks. An investor is wise to diversify risks, so that if prices fall in one asset category in her portfolio, they rise in another category. A diversified portfolio, then, includes bonds, along with stock, precious metals, foreign currency, and real property.

### [C] Differences with Equity

As indicated, a bond is a security, and so is stock (equity). Both financial instruments fluctuate in value as long as they are outstanding and the underlying company continues to operate. However, when issued by a private company, there are important differences between these two instruments. First, with the exception of a consol bond,<sup>8</sup> which has no maturity date (i.e., it is a perpetuity), a bond matures over a pre-determined period. Second, mere ownership of a bond does not give its holder an equity stake in the company, as does stock ownership. An equity investor is a part-owner of the entity issuing the stock, whereas a bond holder is a creditor of the issuer. Depending on the terms of the bond, the bond holder is at best a secured creditor, and at worst an unsecured creditor, of the issuing company.

### [D] Bond Issuers and Types

Bonds are issued either by a private entity or sovereign government. They also are issued by certain international organizations, such as the World Bank and regional development banks. A private issuer typically floats a bond in the form of a "debenture" or an "asset-backed" security. A debenture is issued against unsecured collateral and based upon the general creditworthiness of the issuer.<sup>9</sup>

Technically, debentures are used by sovereign issuers as well. For instance, United States Treasury Bills and Treasury Bonds are debentures. Regarding private issuers, in contrast to a debenture, an asset-backed bond is secured with an asset or pool of assets. Asset-backed bonds are common instruments. Examples include mortgage-backed securities (MBSs), collateralized mortgage obligations (CMOs), and collateralized debt obligations (CDOs). With an asset-backed bond, payment of the coupon rate and redemption at par value is integrally linked to, and derived from, the cash flow from the assets underlying the bond. Motivated at bottom by greed and fear, there seem to be no bounds on the innovativeness of Wall Street financiers. "David Bowie" bonds are backed by royalties from some of his musical albums, and "Walt Disney" bonds are securitized by the income stream

from Disney movies.<sup>10</sup>

Among bonds floated by private issuers, specifically corporations, another distinction is important: "convertible" versus "exchangeable" bonds. A convertible bond allows the bond-holder to convert the bond into shares of stock in the issuing company. Typically, convertibles have a low coupon rate, precisely because they offer an investor the appeal of the convertibility option, meaning that the investor can decide whether to remain a creditor of the issuer, or become a part-owner in it. An exchangeable bond allows the bond holder to convert the bond into shares of stock in a corporation other than the issuing corporation. Usually, this company is a subsidiary or otherwise affiliated with the issuer. A similar but distinct innovation is known as a "pay-in-kind" bond.<sup>11</sup> An issuer of such a bond has the flexibility of paying interest either in the form of cash or additional bonds. This option protects the bond issuer against cash shortages, as it can make coupon payments to investors with more bonds rather than consume precious cash reserves.

One unique type of privately issued debt security is a "subordinated" bond. An indenture governing this bond gives the bond a lower priority in liquidation if the issuer files for bankruptcy — hence the adjective "subordinated." In a liquidation proceeding, if there are any proceeds remaining once previous debts are settled, then senior bond-holders are paid before subordinate bond-holders. Not surprisingly, unsubordinated bonds tend to have a lower credit rating because they are riskier than asset-backed securities.

The New York Stock Exchange (NYSE) is the largest bond market. It boasts a vast number of corporate bond listings. However, most bonds trade in the over the counter (OTC) market. Of course, sovereign governments regularly issue bonds, which trade OTC. These bonds are typically auctioned at pre-determined times, although the United States Treasury sometimes re-opens a bond, selling more bonds of a previous issuance.<sup>12</sup> Here again, Wall Street plays a leading role. Treasury securities are issued through a primary dealer system, with the United States Treasury Department auctioning Treasury securities to primary dealers through the Federal Reserve Bank of New York. Primary dealers, in turn, buy and sell Treasuries on the secondary market. In the United States, sub-federal governments — that is, states, territories, counties, and municipalities, and other sub-regions or districts — also issue bonds. They do so typically to fund large projects that cannot easily be financed through taxes or federal aid.

Like private issuers, sovereign governments float certain species of bonds that are noteworthy. For example:

- The United States issues "zero-coupon bonds," which pay no interest, i.e., there are no coupon payments associated with them.<sup>13</sup> United States Savings Bonds are an example. But, such bonds are issued at prices

<sup>10</sup> See BODIE ET AL., *supra*, at 302.

<sup>11</sup> See BODIE ET AL., *supra*, at 302.

<sup>13</sup> See BODIE ET AL., *supra*, at 296, 314-316.

<sup>8</sup> See *Consols*, WIKIPEDIA, posted at <http://en.wikipedia.org/wiki/Consols>.

<sup>9</sup> See *Debenture*, INVESTOPEDIA, posted at <http://www.investopedia.com/terms/d/debenture.asp>.

significantly below par value. Consequently, the investment return on them is a capital gain, namely, the difference between the below-par issue price and the par value paid to the holder at maturity.

- "Inflation-indexed" bonds are another example. The coupon rate on them depends on the interest rate of the issuing country, and is a percentage of the face value of the bond. The United Kingdom popularized this form of bond in 1981 with Gilt bonds, as the late 1970s and early 1980s were a period of high inflation.<sup>14</sup> The United States Treasury introduced inflation-indexed bonds, known as Treasury Inflation-Protected Securities (TIPS), in 1997. The income and principal of TIPS is tied to the Consumer Price Index (CPI).<sup>15</sup>
- "Investment-indexed" bonds, or "I-bonds," which the United States Treasury issues.<sup>16</sup> As their name suggests, their coupon rate is linked to a specified investment index.
- European sovereign issuers, particularly Belgium and France, pioneered so-called "lottery bonds."<sup>17</sup> All lottery bonds are fixed-term bonds. But, bond holders are randomly selected for redemption at a rate higher than the par value of the bond. The purpose of these bonds is to encourage investment.
- Historically, war bonds are a significant form of bond sovereigns issue to finance expenditures associated with a war. They were popular, and it was considered a patriotic duty to purchase them, during the Second World War.

In sum, like the private sectors in non-Muslim developed countries, many non-Muslim sovereign governments have been creative in engineering debt securities to attract investor interest and thereby meet important financing needs.

<sup>14</sup> *Inflation-indexed Bond*, WIKIPEDIA, posted at [http://en.wikipedia.org/wiki/Inflation\\_linked\\_bond](http://en.wikipedia.org/wiki/Inflation_linked_bond). Observe that a bond holder likely would want to sell a fixed-rate bond if the currency in which the bond is denominated is rapidly inflating, as inflation cheapens the value of the fixed-rate coupon payments. However, in these inflationary circumstances, there likely would be few buyers.

The discussion herein ignores the distinction between real interest rates (which are corrected for inflation) and nominal (or money) interest rates (which are not corrected for inflation). Essentially, the real interest rate is the nominal interest rate minus the rate of inflation. See PAUL A. SAMUELSON & WILLIAM D. NORDHAUS, *ECONOMICS* 509 (New York, New York: McGraw-Hill/Irwin, 18th ed., 2005) (emphasis original). [Hereinafter, SAMUELSON & NORDHAUS.]

<sup>17</sup> *Lottery Bond*, WIKIPEDIA, posted at [http://en.wikipedia.org/wiki/Lottery\\_Bond](http://en.wikipedia.org/wiki/Lottery_Bond).

Such instruments raise the more general issue of whether a bond issuance runs afoul of applicable gambling laws. For example, consider a "catastrophe bond," which ElectroLux issued, the final payment of which depended on whether an earthquake occurred in Japan. Similarly, Winterthur issued a bond the payments on which depended on severe hailstorms in Switzerland. Issuers of such bond are attempting to transfer the risk of a catastrophe from themselves to investors, and must pay investors higher coupon rates for assuming the risk. But, are they consistent with rules on gambling? Consider, too, a hypothetical bond the interest rate on which is linked to the performance of an athletic team, such as the success of the Kansas Jayhawks Basketball Team.

## [E] Indenture and Covenants

As a legal matter, a bond is memorialized through an indenture with covenants. An "indenture" is a formal debt contract between the issuer and bond holder wherein the terms of the bond issuance are established.<sup>18</sup> The clauses of the indenture agreement are known as "covenants." Thus, the covenants contain the rights and obligations of the issuer and bond holder. Most significantly, the par value, coupon rate, and maturity date of the bond are set out in covenants. They also cover matters like collateral, further borrowing, restrictions on dividend payments to stock holders, sinking funds (*i.e.*, a pool of cash to allow the issuer to repurchase a fraction of outstanding bonds each year, possibly at a special call price), and callability and putability.

In the United States, Contract Law governs the agreement and relationship between these parties. Importantly, modifying the terms of the indenture is more difficult than in a normal, non-financial contract. That is because amendments potentially could affect all holders of a bond issuance. Consequently, after bonds are floated (that is, issued), to alter the terms and conditions in a covenant of an indenture, approval by a majority, or sometimes super-majority, of bond holders is required.<sup>19</sup>

## [F] Callability and Putability

A key type of covenant concerns option-like features for a bond-holder. There are two basic types of options:

- Call options — the right, but not the obligation, to buy an instrument at a specified price, known as the "strike price," on or before a defined expiry date, known as the "exercise date."
- Put options — the right, but not the obligation, to sell an instrument, at a strike price on or before the exercise date.

Thus, there are two option-like features for a bond: callability and putability.

"Callability" allows a bond issuer to repay the bond prior to maturity on defined call dates, and thereby retire the entire class of bonds.<sup>20</sup> Typically, if this option exists, the issuer must repay the bond at par value. Alternatively, some callability options require repayment at a premium, that is, above the par value price. That typically only happens if the bond is a high-yield one. Why might an issuer want to repay early? The answer concerns financing costs. If the coupon payments plus the nominal value payment hampers the financing needs underlying the issuance of that bond, then the issuer may decide to call the bond.

"Putability" is the converse of callability. Putability gives a bond holder the right, but not the obligation, to require the issuer to pay the bond before maturity

<sup>18</sup> See BODIE ET AL., *supra*, at 318-320.

<sup>19</sup> *Bond (Finance)*, *supra*.

<sup>20</sup> See BODIE ET AL., *supra*, at 309-310 (including the treatment of the measure of "yield to call," which values a callable bond by taking into account the possibility it is called before maturity).

on put dates. In this circumstance, the price to be paid for the bond is its "strike price." The strike price typically is fixed.<sup>21</sup> But if it is fixed, then why would a bondholder seek to put the bond? If the strike price exceeds the market value of the bond (that is, the secondary market trading price at which the investor could sell the bond), then it is financially rational for the bond holder to exercise the put option.<sup>22</sup>

Regarding call and put dates, there are four categories commonly referred to in the finance vernacular.<sup>23</sup> A Bermudan call has several call dates, typically coinciding with coupon dates. A European call has only one call date.<sup>24</sup> An American call can be called at any time before maturity of the bond.<sup>25</sup> A death put, or survivor's option, allows the beneficiary's estate to put the bond.

### [G] Secondary Market Trading

Subsequently, that is, after issuance in the primary market, bonds are traded in the secondary market. Many investors do not buy a bond in an IPO with the intention of holding it until maturity. Rather, they sell the bond, and buy other bonds — that is, they trade them. Their trading activity creates liquidity in the bond market, which refers to the near-constant presence of buyers and sellers who are ready, willing, and able to trade bonds. That is, a financial asset like a bond "is said to be *liquid* if it can be converted into cash quickly and with little loss in value," whereas an illiquid asset is one "for which no well-established market exists."<sup>26</sup>

The price at which a bond is traded may be over par (*i.e.*, above the par value) or under par (*i.e.*, below par value). The difference between the secondary market trading price of a bond and its par value reflects the supply and demand for the bond. If demand in the secondary market is high, then investors bid up the price of the bond over par, whereas if demand is low, then the price slumps under par. A bond trading on the secondary market above par is said to sell at a premium, whereas one selling for below par is at a discount to par.

What determines investor demand for a bond, and thus affects the secondary market price? In non-Islamic banking systems, interest rates prevailing in the economy are a key factor. There is an inverse relationship between interest rates and secondary market bond prices: if interest rates rise, bond prices fall, and *vice versa*. That is, the formula by which the secondary market bond price is set adduces the inverse relationship between this price and the interest rate, which

<sup>21</sup> See *Strike Price*, WIKIPEDIA, posted at [http://en.wikipedia.org/wiki/Strike\\_price](http://en.wikipedia.org/wiki/Strike_price). [Hereinafter, *Strike Price*.]

<sup>22</sup> For a more technical description of determining if the strike price exceeds the market value, see *Strike price*, *supra*.

<sup>23</sup> See *Bond (Finance)*, *supra*.

<sup>24</sup> See FRANK J. FAROZZI, *BOND MARKETS, ANALYSIS, AND STRATEGIES* 546 (Upper Saddle River, New Jersey: Prentice Hall, 5th ed., 2004). [Hereinafter, *FAROZZI*.]

<sup>25</sup> See *FAROZZI*, *supra*, at 546.

<sup>26</sup> SAMUELSON & NORDHAUS, *supra*, at 507 (emphasis original).

also is known as the "yield." Diagram 29-1 depicts this inverse relationship.<sup>27</sup> Interest rates, of course, are a macro-economic variable characteristic of non-Muslim banking systems. Additional factors affecting demand are issuer-specific, such as the creditworthiness of the issuer.

Diagram 29-1:  
Inverse Relationship between Bond Price and Interest Rate (Yield)

By convention, secondary market bond prices are listed as a percentage of the par value of the bond in question, whatever that figure is.<sup>28</sup> For example, a bond with a par value of \$1,000 that sells at par in the secondary market would be selling at 100 percent of par. Its price, therefore, would be 100. That also is true of a bond with a par value of \$5,000 that sells at par — its price is listed as 100. The advantage of this convention is that it allows investors to compare directly the secondary market prices of bonds with different par values. (Note that it is a historical convention of the United States Treasury to price Treasury securities in terms of thirty-seconds (1/32) of a dollar. For example, a price of 102.01 means 102 1/32.)

Accordingly, suppose a \$1,000 corporate bond issued by the Garmin GPS company in Kansas City lists on the secondary market at 90, and a \$1,000 municipal bond issued by the city of Lawrence, Kansas is priced at 95. The Garmin bond is selling at a steeper discount to par than the Lawrence bond. Because of the inverse relationship between the price of a bond and its yield, the steeper discount connotes the Garmin bond has a higher yield than the Lawrence bond. What would the secondary market price of the two bonds be? The answer is straightforward: simply multiply the par value of each bond by the listed price:

<sup>27</sup> This Diagram is adapted from BOOIE ET AL., *supra*, at 305.

<sup>28</sup> See William C. Spaulding, *Bond Pricing*, posted at [http://thismatter.com/money/bonds/bond\\_pricing.htm](http://thismatter.com/money/bonds/bond_pricing.htm).

Secondary Market Price of Bond	=	Par Value of Bond	x	Percentage of Par Value at which Bond Trades
-----------------------------------	---	----------------------	---	--

Thus, the Garmin bond would sell for \$900 (the product of \$1,000 and 90 percent), and the Lawrence bond sells for \$4,750 (the product of \$5,000 and 95 percent).

In the secondary market for non-Islamic bonds, premiums and discounts relative to par sometimes are expressed in terms of "points." One point equals 1 percent of the par value of the bond. For a bond with a face value of \$1,000, 1 point equals \$10. Thus, with the Garmin bond trading at 90 percent of par, the discount is 10 points, or \$100. For a bond with a face value of \$5,000, 1 point equals \$50. Consequently, the Lawrence bond selling in the secondary market for 95 is at a 5 point discount, or \$250 (the product of 5 and \$50) from par value. Here, again, the central role of interest in conventional finance is evident.

### [H] International Bonds

Generally, sovereigns issue bonds denominated in the currency of their country. But, that is not invariably the case. Indeed, in an era of globalization, both sovereign and private issuers seek to attract investment funds from outside their geographic borders. To do so sometimes means floating a bond denominated in the currency of a foreign country, which obviously will appeal to investors in that country, and even to investors in the home country of the issuer, and in third countries, who seek to diversify the foreign exchange rate risk associated with their portfolios. Thus, when the economic and political climate is appropriate, sovereign and private issuers offer bonds in foreign currencies.

Technically, there are two kinds of international bonds: "foreign bonds" and "Eurobonds." "Foreign bonds" are floated by an issuer:

from a country other than the one in which the bond is sold. The bond is denominated in the currency of the country in which it is marketed. For example, if a German firm sells a dollar-denominated bond in the U.S., the bond is considered a foreign bond. These bonds are given colorful names based on the countries in which they are marketed. For example, foreign bonds sold in the U.S. are called *Yankee bonds*. Like other bonds sold in the U.S., they are registered with the Securities and Exchange Commission. Yen-denominated bonds sold in Japan by non-Japanese issuers are called *Samurai bonds*. British pound-denominated foreign bonds sold in the U.K. are called *bulldog bonds*.<sup>29</sup>

In brief, a "foreign bond" is issued by a foreign issuer in a host country market.

In contrast, a "Eurobond" is issued by a home-country entity outside of its home jurisdiction:

. . . Eurobonds are bonds issued in the currency of one country but sold in other national markets. For example, the Eurodollar market refers to dollar-denominated bonds sold outside the U.S. (not just Europe), although

London is the largest market for Eurodollar bonds. Because the Eurodollar market falls outside of U.S. jurisdiction, these bonds are not regulated by U.S. federal agencies. Similarly, Euroyen bonds are yen-denominated bonds selling outside Japan, Eurosterling bonds are pound-denominated Eurobonds selling outside the U.K., and so on.<sup>30</sup>

Table 29-1 summarizes examples not only of foreign bonds and Eurobonds, but also international bonds that defy easy categorization, such as where an issuer from one country floats bonds denominated in a foreign currency in the market of a third country.

Table 29-1:  
International Bond Descriptions

Name of Bond	Denominated Currency (i.e., currency in which par value and coupon rate is denominated, and in which trading occurs)	Issuer Nationality (i.e., country of origin of bond issuer)	Investment Market (i.e., principal financial market(s) in which bond is issued)
<b>Eurobonds</b>			
Eurodollar	U.S. Dollar	Any	Outside United States
Eurosterling	Pound sterling	Any	Outside United Kingdom
Euroyen	Japanese Yen	Any	Outside Japan
<b>Foreign Bonds</b>			
Kangaroo	Australian Dollar	Non-Australian	Australia
Maple	Canadian Dollar	Non-Canadian	Canada
Samurai	Japanese Yen	Non-Japanese	Japan
Yankee	U.S. Dollar	Non-U.S.	United States
Bulldog	British Pounds	Non-British	United Kingdom
Matrioshka	Russian Ruble	Non-Russian	Russia
Arirang	Korean Won	Non-Korean	Korea
Panda	Chinese Renminbi (Yuan)	Non-Chinese	China
<b>Other International Bonds</b>			
Shogun	U.S. Dollar (or other non-Yen currency)	Non-Japanese	Japan
Kimchi	U.S. Dollar (or other non-Korean Won currency)	Non-Korean	Korea
Formosa	Non-New Taiwan Dollar	Non-Taiwanese	Taiwan
State of Israel	Multiple Currencies	Israeli — Development Corporation of Israel	Israel

<sup>30</sup> BODIE ET AL., *supra*, at 301.

### § 29.03 PRESENT VALUE, PRICE, AND YIELD OF NON-MUSLIM BONDS

In conventional bond finance, interest rates, and the risk that interest rates price, play a role so important it cannot be overstated. To begin, the current price of a bond is determined by aggregating the total coupon payments until maturity with the present value of the bond upon maturity.<sup>31</sup> A coupon payment is determined by multiplying the par value by the coupon rate.<sup>32</sup> So, a bond with a par value of \$5,000 and coupon rate of 5 percent has an annual coupon payment of \$250. This calculation assumes the coupon rate is paid annually. If paid semi-annually, then this figure is halved to \$125, and then doubled to get the annual payment.

Of course, a bond issuer makes the coupon payment annually or semi-annually until the bond matures. That means the bond must have a value greater than the figure of a single coupon payment (unless all payments except the last one have been made). For instance, if the \$5,000 par value bond has a life of 15 years, and it is only year 5 in that life, then there are 10 years more of coupon payments forthcoming. The bond holder would not sell the bond on the secondary market for a mere \$250, but rather for a much higher price that reflects the value today of a stream of annual income of \$250 over the next 10 years — as well as the lump-sum repayment of principal upon maturity.

As intimated, "present value," also known as "present discounted value," is a critical concept in non-Muslim finance, and interest is indispensable to this concept. To determine that present value, a mathematical equation is used — namely, a present value, or present discounted value, formula. The "present value" of a bond, or indeed of any asset denominated in United States dollars, is:

the dollar value today of the time stream of income generated by that asset. It is measured by calculating how much money invested today would be needed, at the going [i.e., market] interest rate, to generate the asset's future stream of receipts.<sup>33</sup>

The formula used to calculate present discounted value, or current price, of a bond, determines the current price of the number of expected coupon payments remaining until maturity, and weights each expected payment by an appropriate interest rate. Significantly, the formula also includes the present value of the redemption payment, that is, the payment by the issuer to the bond holder of the par value upon the maturity of the bond.

The interest rate in the formula used to discount the value of the stream of coupon payments, and redemption payment, is critical. It reflects the time value of money. This time value is the common sense idea that the bond holder can invest the coupon payment she receives in an interest-bearing asset. For instance, when she obtains a \$250 payment in year 21, she will not put the cash under her mattress. Rather, she will put the \$250 in her bank account, which (hypothetically) pays 3 percent on the balance in the account. Or, to view the transaction from the

standpoint of today, she appreciates that a sum less than \$250 given to her today would yield \$250 in the future, because she would invest that sum in an interest-bearing account, and it would grow in amount to \$250.

What, then, is the formula for the present discounted value of an expected future earnings stream of interest payments plus the redemption at par value? Conceptually, the formula is:

$$\text{Bond Price} = \text{Present Value of Coupon Payments} + \text{Present Value of Par Value}$$

Expressed in mathematical terms, it is:

$$\text{Bond Price} = \frac{\text{Coupon}}{1+r} + \frac{\text{Coupon}}{(1+r)^2} + \frac{\text{Coupon}}{(1+r)^3} + \dots + \frac{\text{Coupon}}{(1+r)^n} + \frac{\text{Par Value}}{(1+r)^n}$$

Or, using the following variables:

- $P$  = current price, that is, the price of the bond on the secondary market.
- $t$  = number of coupon payments remaining from today until maturity.
- $C$  = annual coupon payment.
- $r$  = the discount rate, that is, the market interest rate used to discount coupon payments and par value.
- $M$  = maturity value, that is, the par value paid by the bond issuer to the bond holder when the bond matures.
- $T$  = the time period when the payment is to be received, that is, the maturity date.<sup>34</sup>

The formula becomes:

$$P = \frac{C}{1+r} + \frac{C}{(1+r)^2} + \frac{C}{(1+r)^3} + \dots + \frac{C}{(1+r)^t} + \frac{M}{(1+r)^T}$$

Observe that the par value ( $M$ ) is discounted by the same interest rate as the coupon payments. Thus, the last term on the right-hand side of the equation is the present value of a lump sum payment,  $M$ . Because of the time value of money, an expected lump sum payment is not presently worth as much as it will be when paid in hand in the future. All the other terms on the right-hand side are the present value of an annuity (i.e., of a steady stream of payments).

<sup>34</sup> See FABIUZZI, *supra*, at 21. If the stream of payments differs, and there is no repayment of principal, i.e., if what is being measured is the present discounted value of a variable stream of income, then the formula becomes:

$$P = \frac{N_1}{1+r} + \frac{N_2}{(1+r)^2} + \frac{N_3}{(1+r)^3} + \dots + \frac{N_T}{(1+r)^T}$$

In this formula,  $N_1$ ,  $N_2$ , and so forth represent net receipts (which may be positive or negative) received by the asset holder in each time period,  $t$ . See SAMUELSON & NORDHAUS, *supra*, at 506. Of course, the discount rate,  $r$ , is essential to the computation, again illustrating the central role interest plays in non-Muslim finance.

<sup>31</sup> See FABIUZZI, *supra*, at 21.

<sup>32</sup> See FABIUZZI, *supra*, at 20.

<sup>33</sup> SAMUELSON & NORDHAUS, *supra*, at 506.

Consider a simple example. Assume a \$1,000 par value bond has a 1 year life, and pays a coupon rate of 5 percent once during its life. Suppose also that the interest rate is 10 percent. Thus, if the investor holds the bond until maturity, the investor will obtain the \$50 coupon payment (5 percent of the par value), and get back her initial \$1,000 purchase price. What should an investor pay to purchase this bond when it is initially floated? Common sense suggests the answer must be less than \$1,050, because paying that amount or more would mean the investor receives no return on the investment, and indeed loses money. Common sense also suggests the answer must be less than \$1,000. That is because the market interest rate is 10 percent. The investor could take her \$1,000, purchase a financial instrument bearing an interest rate of 10 percent, and thereby obtain \$100 in interest income. Using the above formula, the correct answer is as follows:

$$\begin{aligned} P &= \frac{C}{1+r} + \frac{C}{(1+r)^2} + \frac{C}{(1+r)^3} + \dots + \frac{C}{(1+r)^T} + \frac{M}{(1+r)^T} \\ P &= \frac{50}{1+0.10} + \frac{1,000}{(1+0.10)^1} \\ P &= \frac{50}{1.10} + \frac{1,000}{(1.10)^1} \\ P &= 45.45 + 909.09 \\ P &= 954.54 \end{aligned}$$

Thus, it is financially rational for the investor to pay \$954.54 today for the right to receive a 5 percent coupon payment and return of principal 1 year from today.

Note two points about this simple example. First, if the par value of the bond is changed to \$1,050, then the present value of the bond is exactly \$1,000.<sup>35</sup>

Second, suppose the market interest rate and the coupon rate are the same — 5 percent. Then, assuming a par value of \$1,000, the present value of the bond is the same as its par value, namely, \$1,000:

$$\begin{aligned} P &= \frac{C}{1+r} + \frac{C}{(1+r)^2} + \frac{C}{(1+r)^3} + \dots + \frac{C}{(1+r)^T} + \frac{M}{(1+r)^T} \\ P &= \frac{50}{1+0.05} + \frac{1,000}{(1+0.05)^1} \\ P &= \frac{50}{1.05} + \frac{1,000}{(1.05)^1} \\ P &= 47.62 + 952.38 \\ P &= 1,000 \end{aligned}$$

This variation illustrates a basic point: whenever the market interest rate and coupon rate are the same, the present value of a bond at the start of its life is the same as its par value. If an issuer seeks to sell its bonds at par value, it must select a coupon rate that "very closely approximates market yields."<sup>36</sup> If the coupon and discount rates differ, then the IPO price will deviate from par value. Indeed, typically, a bond issuer tries to set the coupon rate as close as possible to the market rate. That way, the IPO price of the bond will equal its par value.

<sup>35</sup> See SAMUELSON & NORDHAUS, *supra*, at 506.

<sup>36</sup> BODIE ET AL., *supra*, at 300.

Now consider the valuation formula with respect to a bond with a par value of \$5,000, a fixed coupon rate of 5 percent paid annually, but with a 5-year maturity. Suppose the coupon rate is the same as the market interest rate used for discounting, i.e.,  $r$  is 5 percent. What is the value of the bond when it is issued, before any coupon payments are made? In these circumstances, the answer should be that the present value of the bond is its par value. Inputting these numbers into the above equation, the current price of this bond is:

$$\begin{aligned} P &= \frac{250}{1+0.05} + \frac{250}{(1+0.05)^2} + \frac{250}{(1+0.05)^3} + \frac{250}{(1+0.05)^4} + \frac{250}{(1+0.05)^5} + \frac{5,000}{(1+0.05)^5} \\ P &= \frac{250}{1.05} + \frac{250}{(1.05)^2} + \frac{250}{(1.05)^3} + \frac{250}{(1.05)^4} + \frac{250}{(1.05)^5} + \frac{5,000}{(1.05)^5} \\ P &= \frac{250}{1.05} + \frac{250}{(1.10)} + \frac{250}{(1.16)} + \frac{250}{(1.22)} + \frac{250}{(1.28)} + \frac{5,000}{(1.28)} \\ P &= 238.10 + 227.27 + 215.52 + 204.92 + 195.31 + 3,906.25 \\ P &= 4,987.37, \text{ or in effect } \$5,000 \text{ with the difference accounted for by rounding.} \end{aligned}$$

In other words, for the right to receive a 5 percent annual coupon rate for 5 years, and the return of the \$5,000 lump sum investment at the end of the 5th year, an investor would be willing to pay par value today.

The above formula can be simplified to a succinct time-series equation using the Greek letter " $\Sigma$ " (*sigma*), which means "sum of." Accordingly:<sup>37</sup>

$$\begin{aligned} P &= \frac{C}{1+r} + \frac{C}{(1+r)^2} + \frac{C}{(1+r)^3} + \dots + \frac{C}{(1+r)^T} + \frac{M}{(1+r)^T} \\ P &= \sum_{t=1}^T \frac{C}{(1+r)^t} + \frac{M}{(1+r)^T} \end{aligned}$$

The formula can be expressed in an alternative manner, based on the insight that all of the terms on the right-hand side of the equation, except the last one, are the present value of an annuity (i.e., of a stream of payments). The formula for an annuity is:

$$\text{Value of Annuity} = \frac{1}{r} \times [1 - 1/(1+r)^T]$$

Accordingly, the formula becomes:<sup>38</sup>

$$\text{Price} = C \times 1/r \times [1 - 1/(1+r)^T] + M/(1+r)^T$$

Manifestly, in all expressions of the formula, the interest rate,  $r$ , is a crucial determinant of the price of a bond.

The simplified formula can be used to ascertain what happens to the price of a bond when the coupon rate and discount rate differ, and thereby highlight the inverse relationship between bond prices and market interest rates. If the discount rate does not equal the coupon rate, then a bond does not sell at par value. For

<sup>37</sup> See BODIE ET AL., *supra*, at 304.

<sup>38</sup> See BODIE ET AL., *supra*, at 304.

instance, if the market interest rate rises above the coupon rate, say to 10 percent, then the par value falls:

At a higher interest rate, the present value of the payments to be received by the bond holder is lower. Therefore, the bond price will fall as market interest rates rise. This illustrates a crucial point in bond valuation. When interest rates rise, bond prices must fall because the present value of the bond's payments is obtained by discounting at a higher interest rate.

...

In . . . secondary markets [such as the NYSE and OTC], bond prices move in accordance with market forces [of supply and demand, which in turn reflect in part analysis of the creditworthiness of the issuer of a bond.] The bond prices fluctuate inversely with the market interest rate.

The inverse relationship between price and yield is a central feature of fixed-income securities. Interest rate fluctuations represent the main source of risk in the bond market. . . .

[Moreover, a] . . . general rule in evaluating bond price risk is that, keeping all other factors the same, the longer the maturity of the bond, the greater the sensitivity of its price to fluctuations in the interest rate.<sup>39</sup>

Intuitively, the longer an investor ties up money in a bond, the greater the loss the investor suffers when the price of that bond falls relative to alternative interest-bearing assets that offer higher returns. That is why short-term bonds are considered safer than long-term bonds — namely, a lower price risk associated with interest rate volatility.

The safest of all such short-term bonds is the United States Treasury Bill (T-Bill), as there is no risk of default.<sup>40</sup> The distinction between T-Bills and Treasury Bonds (T-Bonds) is maturity: T-Bills are short term, and T-Bonds are medium- or long-term. But, there is no risk of non-payment, because the American government could print money, or raise taxes, to pay off obligations owed on these debentures:

The safest assets in the world are the securities of the U.S. government. These bonds and bills are backed by the full faith, credit, and taxing powers

<sup>39</sup> BODIE ET AL., *supra*, at 304, 306. This insight also is stated as follows:

Bonds with shorter maturities generally offer lower yields to maturity than longer term bonds.

*Id.* at 322. This relationship, namely, between YTM and term to maturity, is plotted on a graph and called the "yield curve," or "term structure of interest rates." YTM is plotted on the vertical (y-) axis, and maturity date is plotted on the horizontal (x-) axis. Financial media publish yield curves regularly. The most commonly observed yield curve is one that is rising (upward sloping), whereas a downward-sloping yield curve is called an "inverted" yield curve. A rising yield curve is considered normal, as it indicates that investors demand a risk premium on a long-term bond (i.e., a "liquidity premium," meaning an extra return as compensation for the greater risk of a long-term bond), and/or expect long-term interest rates to be higher than short-term rates (perhaps because of anticipated central bank monetary policy). See *id.* at 322-327. The yield curve is yet another illustration of the centrality of interest rates in non-Muslim finance.

<sup>40</sup> On default risk, determinants of the safety of a bond, and bond ratings, see BODIE ET AL., *supra*, at 316-318.

of the government. Intermediate in risk are borrowings of creditworthy corporations, states, and localities. Risky investments, which bear a significant chance of default or nonpayment, include those of companies close to bankruptcy, cities with shrinking tax bases, or countries like Argentina with large overseas debts and unstable political systems.<sup>41</sup>

In brief, United States Treasury securities are seen as "riskless" for this reason, and the coupon rate associated with them is the "risk-free" rate.

Nevertheless, the fact that an investor must tie up funds a T-Bond for a longer period than with a T-Bill leads to another general observation. The longer the tenor of a bond or other interest-bearing asset, the higher coupon rate that asset must pay. That is because investors, who are loaning their funds to the issuer of the debt security, "are willing to sacrifice quick access to their funds only if they can increase their yield."<sup>42</sup>

Refer to Diagram 29-1. As an example of what happens when the coupon rate and market interest (discount) rate differ, consider a 30-year maturity bond with a par value of \$1,000 and an 8 percent coupon.<sup>43</sup> The payments are made semi-annually, so there are 60 total payments. Thus,  $T = 60$ , and  $C = \$40$  (one-half of \$80, which is the annual coupon rate, derived from the product of \$1,000 and 8 percent). The coupon rate is 8 percent annually, or 4 percent semi-annually. But, suppose market interest rate rises to 10 percent, or 5 percent semi-annually. Then, the bond price falls from the par value of \$1,000 to \$810.71, i.e., a decline in value of \$189.29. This change is evident from the following formula:

<sup>41</sup> SAMUELSON & NORDHAUS, *supra*, at 506.

<sup>42</sup> See SAMUELSON & NORDHAUS, *supra*, at 506.

<sup>43</sup> See BODIE ET AL., *supra*, at 304.

$$\begin{aligned}
 P &= \sum_{t=1}^{60} \frac{40}{(1+.05)^t} + \frac{1,000}{(1+.05)^{60}} \\
 P &= 757.17 + 53.54 \\
 P &= \$810.71
 \end{aligned}$$

Intuitively, the decline makes sense: if the market interest rate rises above the coupon rate, then investors can earn a higher interest rate — 10 percent instead of 8 percent (or 5 percent instead of 4 percent every 6 months) — in a different financial instrument that pays that higher rate. Investors will sell the 8 percent coupon bond, and buy the 10 percent asset. The selling activity will push down the price of the bond.

Conversely, when interest rates fall, bond prices rise, because the payments associated with the bond are discounted at a lower rate. Here, too, this result makes common sense. Investors will seek to purchase the bond paying a coupon of 8 percent, because that rate is higher than the interest earned from other interest-bearing instruments available in the market.<sup>44</sup> Investors will sell those instruments, and buy the 8 percent bond. That buying pressure will push up the price of the 8 percent bond.

In sum, there is an inverse relationship between bond prices and bond yields. The term "yield," or more specifically "current yield," is a measure of "the cash income provided by the bond as a percentage of bond price."<sup>45</sup> The current yield does not include possible capital gains or losses, that is, price increases or decreases of a bond, over the life of the bond. That measure is known as the "yield to maturity," or "YTM," which is the total return from a bond over its full life. The YTM is the "discount rate that makes the present value of a bond's payments equal to its price."<sup>46</sup>

There are two noteworthy variations on the present value formula. First, consider a consol bond, that is, one with no maturity. For any such perpetual asset with a constant yield forever, the present value is simply:<sup>47</sup>

$$P = \frac{C}{r}$$

For instance, a bond that pays a coupon of \$100 per year in perpetuity is worth \$2,000 based on a discount rate of 5 percent.

Second, when the formula for the present value (price) of a bond is applied to a zero-coupon bond, the discount is made only to its par value. That is because there are no annual or semi-annual coupon payments. However, the number of years to

<sup>44</sup> This discussion implicates the more general topic of bond pricing over time, the distinction between (1) interest income from coupon payments and (2) capital gains or losses, and secondary market pricing of a bond after it has been outstanding for several years since its IPO. For a treatment of that topic, see BOEDE ET AL., *supra*, at 312-314.

<sup>45</sup> BOEDE ET AL., *supra*, at 306.

<sup>46</sup> BOEDE ET AL., *supra*, at 306-307. See also *id.* at 310-312 (distinguishing YTM from "realized compound yield") and 320-322 (concerning YTM and default risk).

<sup>47</sup> See SAMUELSON & NORDHAUS, *supra*, at 506.

maturity is doubled in the calculation.<sup>48</sup> The mathematical expression is:

$$P = [M / (1+r)^{2n}]$$

Thus, suppose an investor considered selling or purchasing a zero-coupon bond with a nominal value of \$5,000 and a 15-year maturity date, and this purchase occurs on the 5-year anniversary of its issuance. Using this revised formula, the current price of this bond is \$1,884.66.

The more exotic the measure on which the coupon rate of a bond is based, the more risk that the current price unexpectedly may change over the life of the bond. There are four common risks investors consider. First, as time passes, *i.e.*, as a bond approaches maturity, current price likely will increase. That is because the par value payable at maturity is not discounted as greatly.<sup>49</sup> Second, "if the Treasury rate does not change, but the spread to Treasuries for all corporate bonds changes (narrows or widens), corporate bond prices will change."<sup>50</sup> Third, if the creditworthiness of the issuer of the bond changes, the current price, or at least how much a prospective purchaser is willing to pay for that bond, changes accordingly.<sup>51</sup> Fourth, if the benchmark interest rate of an economy changes, the price of a bond is affected. For instance, if the Federal Reserve increases a key interest rate, such as the Fed Funds rate, then the price of a bond decreases.

What is the relationship with the price of a bond and its yield, that is, "the yield for financial instruments with comparable risk and features [?]"<sup>52</sup> As indicated, the current price of a bond equals the present value of the expected cash proceeds from the bond. The yield of a bond, however, is inversely related to the price of the bond.<sup>53</sup>

As the required yield increases, the present value of the cash flows decreases; hence, the price decreases. The opposite is true when the required yield decreases: the present value of the cash flows increases and, therefore, the price of the bond increases.<sup>54</sup>

When the coupon rate exceeds the bond yield, the bond sells at a premium.<sup>55</sup> If the coupon rate is equal to yield, then the bond sells at its par value.<sup>56</sup> If the coupon rate is less than yield, then the bond sells at a discount.<sup>57</sup>

<sup>48</sup> See RICHARD S. WILSON & FRANK J. FAROZZI, *CORPORATE BONDING STRUCTURES & ANALYSIS* 246 (New Hope, Pennsylvania: Frank J. Farozzi Associates, 1996). [Hereinafter, WILSON & FAROZZI.]

<sup>49</sup> See WILSON & FAROZZI, *supra*, at 248.

<sup>50</sup> WILSON & FAROZZI, *supra*, at 249.

<sup>51</sup> See WILSON & FAROZZI, *supra*, at 249.

<sup>52</sup> WILSON & FAROZZI, *supra*, at 243 (emphasis original).

<sup>53</sup> WILSON & FAROZZI, *supra*, at 246.

<sup>54</sup> WILSON & FAROZZI, *supra*, at 246.

<sup>55</sup> See WILSON & FAROZZI, *supra*, at 247.

<sup>56</sup> See WILSON & FAROZZI, *supra*, at 247.

<sup>57</sup> See WILSON & FAROZZI, *supra*, at 246.

The current yield of a bond is the ratio of its annual dollar coupon interest to the current price of the bond.<sup>58</sup> For example, a 30-year maturity bond with an 8 percent coupon and par value of \$1,000 that sells at a current price of \$1,276.76 has a current yield of:<sup>59</sup>

$$\begin{aligned} \text{Current Yield} &= \frac{\text{Annual Coupon Interest Payment}}{\text{Current Bond Price}} \\ \text{Current Yield} &= \frac{80}{1,276.76} = 0.0627 = 6.27 \text{ percent per annum.} \end{aligned}$$

Evidently, this bond sells at a premium over par value, and its coupon rate exceeds the current yield. (It also can be shown that the YTM for this bond is 6.09 percent.) This fact illustrates a general point: for a premium bond (i.e., one selling above par), the coupon rate is greater than the current yield (and, the current yield is greater than the YTM). Conversely, for a discount bond (i.e., one selling below par), the coupon rate is less than the current yield (and, the current yield is less than the YTM).

To summarize, observe the central role interest and interest rates play in conventional finance:

- Money has a time value.
- That time value is computed using a present discounted value formula.
- The discount rate is indispensable to the formula.
- The coupon rate paid on interest-bearing assets is intimately and directly connected with the risk associated with them: lower risk, lower return; higher risk, higher return.

Simply put, non-Muslim banking and finance is unthinkable without interest and risk. In sharp contrast, pure Islamic banking and finance is unthinkable with them. The *Shari'a* prohibits *riba*, but devises a substitute for it — profit sharing — and disciplines exposure to *gharar*.

## § 29.04 DEFINING “ISLAMIC” BONDS (\$UKUK)

### [A] Overview

Islamic bonds, called “*sukuk*” (sometimes transliterated simply as “*sukuk*”), are a highly significant instrument in Islamic finance. Indeed, interest in Islamic bonds, evidenced by the value and volume of IPOs, and by secondary market trading, has been growing rapidly in the past three decades. By no means is enthusiasm for *sukuk* confined to Muslims and Muslim countries. Rather, it is global. None other than Her Majesty's Government, as early as April 2007, confirmed the possibility it might issue sovereign, sterling-denominated debt as *sukuk*.<sup>60</sup> Prominent multinational banks, such as the Hong Kong Shanghai

<sup>58</sup> See WILSON & FAROEZ, *supra*, at 250.

<sup>59</sup> See BOHRE ET AL., *supra*, at 308.

<sup>60</sup> See Mushtak Parker, *U.K. Government Serious About Sukuk*, ARAB NEWS, 27 April 2007, posted at

Banking Corporation (HSBC), have engaged in many *sukuk* transactions, as issuers, underwriters, and investors. In other words, it is not strange to see banks in non-Muslim countries enter into bond transactions that comply with the *Shari'a*, or provide complying bonds to their customers.

What are *sukuk*? Table 29-2 summarizes the key differences between conventional, non-Islamic bonds, and *sukuk*. Loosely translated, the term “*sukuk*” means “Islamic bonds,” the singular being “*sakk*” (Islamic bond). More precisely, the term refers to Islamic bonds approved under the *Shari'a*. Note the term “*sukuk*” does not refer to securitization. That is because securitization — in the conventional non-Muslim sense of the term — is prohibited under Islamic Law. In conventional non-Muslim parlance, “securitization” refers to a transaction in which an issuer issues debt securities to investors by combining individual financial assets (such as mortgage loans) into a pool that serves as collateral for those debt securities. As explained further below, the assets are owned by an “originator,” which bundles identical contracts (again, such as mortgage loans) and sells them to a special purpose entity.

Economically, “*sukuk*” involve a highly similar transaction, but there are two critical distinctions. First, “*sukuk*” do not involve a fixed rate of interest paid to investors. That is obviously necessary in order to respect the rule against *riba* (interest). Second, “*sukuk*” are not debt securities. Rather, they are technically referred to as “certificates of participation.” That is, “*sukuk*” are certificates of participation, for which investors pay the offering price in an initial public offering (IPO), and which are issued to the investors against a pool of assets. To put it succinctly, the basic structure of any *sukuk* deal is money-against-assets.

Table 29-2:

Summary of Differences between Conventional Non-Islamic Bonds and *Shukuk*

Topic	Conventional Non-Islamic Bonds	<i>Shukuk</i>
<b>Definition</b>	A long-term debt obligation issued by a borrower, which may be a private or public entity.	A certificate that is evidence of participation in an underlying asset, which may be issued by a private or public entity.
<b>Economic Nature of Relationship between Issuer and Investor</b>	Debtor-Creditor. The issuer is a debtor/borrower/obligor. The investor is a creditor/lender/obligee. The issuer is a borrower of funds, and thus indebted to the lenders of those funds, which are the investors in the bond. The borrower/debtor is legally obliged to repay the lender/creditor of those funds. That legal obligation is for both the initial capital investment (principal), and a rate of return (interest) specified by the debt instrument. The relationship is potentially adversarial insofar as the borrower/debtor fails to make good on its obligation, or takes steps that jeopardize its ability to do so.	Partnership. The issuer and investor are partners with shared interests and outlook. The issuer of the certificates borrows funds from the investors that purchase those certificates in an IPO. Thus, economically, investors are providing financial capital to the issuer to fund a specified project.
<b>Religious and Moral Nature of Relationship between Issuer and Investor</b>	Not an explicit part of the issuer — investor relationship.	The investors are on the same side as the issuer. The relationship between the issuer and investors is one of partnership in a shared venture, and not (in theory, at least) supposed to be adversarial. The issuer and investor all share in the gains from a successful project. The investors expect to receive back their full initial capital investment, and also hope to share in any profits generated by the project made possible by the funds they advanced to the issuer of the certificates when they bought them.

Topic	Conventional Non-Islamic Bonds	<i>Shukuk</i>
<b>Repayment of Initial Capital Investment (Principal)?</b>	Yes (assuming to untoward events, such as insolvency of the issuer and lack or failure of any guarantees or insurance).	Yes (assuming to untoward events, such as insolvency of the issuer and lack or failure of any guarantees or insurance).
<b>Return to Investor</b>	Interest, as specified in the legal documentation for the bond.	No interest permitted, because of the rule against <i>riba</i> .  Indeed, the certificate must not be a debt instrument that creates an obligation to pay interest or any fixed return. Rather, the return to the investor is a share in the profits generated by the project funded by the proceeds from the issuance of the certificates.

**[B] Derivatives, the Financial Crisis, and *Shari'a***

This definitional limitation is a significant contrast with conventional non-Islamic finance. As the global financial crisis triggered by the September 2008 collapse of Lehman Brothers highlights, asset securitization — including of sub-prime mortgage loans — is common on Wall Street. For decades, Wall Street financiers have securitized a wide variety of underlying asset pools, from credit card receivables to the future earnings stream of prominent rock and roll musicians. MBSs and other asset-backed securities are first-level derivatives, in that their value is based on an underlying asset pool.

A “derivative” is a generic term referring to any financial instrument whose price or value is derived from, or dependent on, an underlying asset or pool of assets. By definition, ordinary common stock is excluded from the term, otherwise it could be reasoned that shares in a company are a “derivative” because their worth (the share price) depends on the assets of the company that issued them. Similarly, bonds — traditional debt instruments — are excluded from the term. Thus, illustrations of “derivatives” include forwards, futures, options, and swaps. Depending on the derivative, it may be traded on an organized exchange, or it may be traded OTC. Futures and certain options are exchange-traded, while forwards, swaps, and other options are traded OTC. Asset-backed securities qualify as “derivatives,” and tend to be traded OTC.

In respect of an asset-backed security, the underlying asset pool may consist of residential mortgages, and the securities issued that are backed by this pool (meaning payments of principal and interest from mortgagors are passed through to holders of the securities) are called “residential mortgage-backed securities,” or “RMBs.” Throughout the non-Muslim world, at least up until the sub-prime crisis of the fall of 2008, RMBs were popular. Indeed, as is now well known, they were popular to an irrational degree.

Sub-prime mortgage assets were used to back many issuances of RMBs. Yet, because those assets were sub-prime, *i.e.*, the mortgage debtors had little ability to make timely payments of principal and interest, the default risk on the mortgages was high. In turn, the RMBs backed by sub-prime loans carried a huge credit risk (the risk that investors would not receive timely payments owed to them because of the default of sub-prime borrowers). To make matters worse, rating agencies over-rated the value of those loans, by under-estimating their credit risk. Using what is known as "portfolio theory," the rating agencies assigned high ratings to RMBs backed by sub-prime mortgages, such as "AAA," as if they were backed by prime mortgages. By September 2008, the grave situation was exposed, and banking supervisors and regulatory authorities — which apparently had blessed, directly or indirectly, many of the suspect transactions and transactors — struggled to cope.

To mitigate against credit risk, *i.e.*, to provide credit enhancement and thereby gain favor with rating agencies, supervisors, and regulators, Wall Street financiers developed and provided insurance to back the first-level derivatives like RMBs. One such insurance contract was known as a "credit default swap" (CDS). Financiers engineered it to guarantee against the default of MBSS based on sub-prime mortgages. In general, a "swap" is a form of financial insurance to transfer exposure to the risk of credit default from one party, which does not want to bear that risk, to another party, which is willing to take on the risk, but in exchange for a fee from the first party. Essentially, the second party is betting that the worst-case scenario of credit default will not materialize, so that it will have earned the fee income, but not had to pay out on the insurance. The first party is concerned enough about the risk materializing that it is willing to part with the fee, especially if paying it saves it from a total loss.

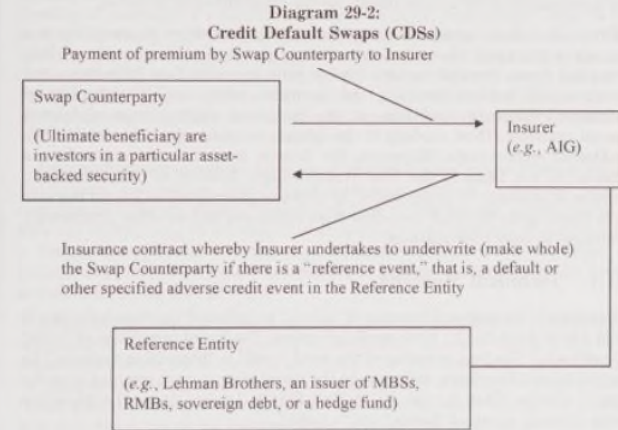

As for CDS contracts, they were issued by the American Insurance Group (AIG) and other now disgraced Wall Street financial institutions. Diagram 29-2 presents a simplified version of a CDS transaction. Under a CDS, an "investor," which really is an insurer like AIG, insures a "swap counterparty." In essence, this counterparty ultimately is the holder of an MBS, such as a pension or mutual fund, or an individual — in effect, the investor in the securities being insured. The insurance is against a "reference event," which is a default on a credit obligation by a specified "reference entity." The reference entity typically is a financial institution, a hedge fund, or an issuer of asset-backed securities (such as RMBs backed by sub-prime loans). The investor/insurer receives a fee for providing this guarantee from the swap counterparty.

In reality, in 2008, Lehman Brothers was a reference entity. The reference event pertained to a peculiar kind of financial instrument, namely, a CDO. A CDO is a debt security backed by a pool of bonds, loans, and other assets, including sub-prime assets. The touchstone of the CDO is that the pool consists of un-like assets, *i.e.*, it is a heterogeneous mix of assets that entail vastly different degrees of credit risk. In a traditional MBS flotation, the underlying mortgage pool consists of thousands of identical mortgages, *e.g.*, 30 year mortgages paying a 6 percent interest rate.

The reference event on the AIG-issued CDSs for the Lehman CDOs was default on sub-prime mortgages in the asset pool underlying those CDOs. When Lehman

Brothers collapsed in September 2008, in part because of the sub-prime defaults, AIG was legally obliged, under the CDS contracts it had issued, to pay out to cover the losses. As the crisis exposed, other reference entities and attendant reference events were Fannie Mae and default on CDOs it issued, and Freddie Mac and default on CDOs it issued.

Amazingly, the amount of CDSs issued in respect of the reference entity can be far greater than a particular bond issuance. For example, an issuance of RMBs may have a market value of U.S. \$1 billion, but an insurer may have issued CDSs in which Lehman Brothers is the reference entity that cover a total potential amount of \$50 billion. Indeed, this kind of incongruity existed, and exacerbated the financial crisis of the fall 2008.

With reference to the *Shari'a*, the key point to appreciate is that first-level derivative transactions, such as MBSs and RMBs, and the insurance contracts to back them, such as CDSs, are not encompassed by the term "*shukuk*." Moreover, critically, they generally are forbidden (*haram*). The term "*shukuk*" is confined narrowly to the good, old-fashioned conventional bond, but one that comports with Islamic legal and moral precepts. That also is true with respect to second-level derivatives, such as collateralized mortgage obligations (CMOs). A CMO is backed by a pool of asset-backed securities (the first-level derivative), and those securities, in turn, are backed by a pool of underlying assets, such as sub-prime mortgage loans. *A fortiori*, second-level derivatives are not covered by the term "*shukuk*" and are generally *haram*.

Simply put, first- and second-level derivatives run afoul of Islamic legal rules on *gharar* (uncertainty) and *riba* (interest). It is important to qualify this broad

statement. Every derivative must be looked at on its own merits. It is an over-simplification to say Islamic Law condemns every conceivable kind of derivative security. After all, Islamic financiers are no less clever than their Wall Street counterparts in devising structures to allay at least some concerns about *gharar* and *ribā*. Moreover, they should be encouraged to do so, so that Islamic finance continues to offer fresh and innovative products.

This definitional point, and the prohibition under the *Shar'ā* against some of the financial instruments that played a major role in the financial market meltdown of the fall 2008, led some observers to question whether Islamic finance was not superior to conventional non-Muslim finance. By "superior," they tended to mean the absence of risky derivatives and insurance contracts from their financial markets insulated them from the worst effects of the financial collapse. However, they were countered by a stark reality. As the crisis unfolded, it spread.

Financial markets tend to be de-coupled during good times, as securities in a particular market perform on the basis of issuer and local market conditions. But, during bad times, financial markets tend to move in synch. Fear links them, and spreads across borders instantly, and securities prices tumble regardless of fundamental economic conditions, or the purported righteousness of Islamic financial practices. Thus, markets in the Islamic world fared poorly, as did their non-Muslim counterparts. Moreover, the Islamic markets were exposed to a vulnerability not found in the New York, Chicago, London, or Tokyo markets: excessive dependence on commodities. As oil prices plummeted, so too did markets in the Gulf region, and their non-diversified economies had no other comparative advantages to buoy their markets.

### [C] Technical Meaning

To return to the technical meaning of "*šukuk*," as indicated the term is the plural of the Arabic word "*šakk*." Both words are nouns. The literal translation of "*šakk*" is "certificate." The legal meaning of the word "*šakk*" is "financial instrument." In practical financial parlance, reference to the plural term is more common than the singular version. That is, just as on Wall Street, Islamic financial transacting parties typically speak of "bonds," not "a bond."

To amplify the discussion, as to the legal meaning of "*šukuk*," two scholars offer the following pithy definition.

Plural of the Arabic word *Sakk* meaning certificate, reflects participation rights in the underlying assets.<sup>61</sup>

The italicized clause is the key to understanding what *šukuk* are. *Šukuk* are a financial instrument through which a transfer of ownership occurs. The underlying property, the ownership of which is transferred, may be an asset of an existing project, a leased object, a sleeping partnership (*muḍārabah*), or participation in a business (*mushārahah*). This list is not exclusive. Notably, the certificates may be "asset based," meaning they are secured by cash flows generated by the underlying property, but not "asset backed," and thus not collateralized by "hard" assets.

<sup>61</sup> Iqbal & Mirakhor, *supra*, Glossary at xiii (emphasis added).

Moreover, *šukuk* are negotiable instruments of equal value — equal, that is, on the day they are issued to the value of the underlying assets to which they relate. Therefore, an investor in a bond becomes an owner of part of the assets in question, or a participant in the business in question. The equality of these bonds exists only at the time of issuance. After the IPO of the bonds, the investor-owner has the right to sell them for more or less than the amount she initially paid for them. The sale price on the secondary market will depend on supply and demand conditions for the bonds, as well as the credit condition of the underlying asset or business.

### [D] Clearing and Settlement in Secondary Markets

Secondary market trading of any financial instrument raises the matter of clearing and settlement. "Clearing" refers to the correct recordation and timely transfer of ownership of a security from seller to buyer. "Settlement" refers to the correct and timely payment for the security by the buyer to the seller. These functions are critical to the smooth operation of any financial market. They are akin to the plumbing in a building — few people take notice, and simply assume it operates, unless and until there is a problem. Like persons in a building who rely on its plumbing, financial market participants expect their trades will be registered and paid for with alacrity and without error.

Intermediary organizations, known as "clearing houses," stand between sellers and buyers, and provide clearing and settlement services to financial market participants. Different clearing houses specialize in clearing and settling trades of different instruments. In the case of international *šukuk* offerings, Clearstream is a leading international clearing and settlement house. It is domiciled in Luxembourg. Euroclear, based in Brussels, is another clearing house for equity and debt, including Islamic bonds.

Interestingly, clearing houses are supervised or regulated in some fashion, depending on the house, and typically must maintain adequate capital in the event of insolvency of a seller or buyer of securities. Also of interest is the legal fact that, for many financial instrument trades, the counterparty of the seller is the clearing house, and the counterparty of the buyer is the clearing house. That is, the security is sold by the seller to the clearing house, and then by the clearing house to the buyer, with funds for the purchase flowing in the opposite direction. For present purposes, the key point to keep in mind is that *šukuk* are so prominent in international finance that they have attracted the attention and services of major clearing houses outside of the Muslim world.

## § 29.05 COMPARING ISLAMIC BONDS AND NON-MUSLIM SECURITIZATION

### [A] Typical Transactions

As the above discussion indicates, *šukuk* are not debt instruments. They are alternative financial products approved by Islamic legal scholars (*fuḳahā*) for the purpose of a conventional securitization. However, conventional non-Muslim securitizations typically involve payment of interest (*ribā*) from a bond issuer to

investors, which is forbidden. Muslim scholars essentially substitute such payments through *shukuk*. Two scholars explain how, as follows:

The idea behind *Sukuk* is simple. The prohibition of interest virtually closes the door for a pure debt security, but an obligation that is linked to the performance of a real asset is acceptable. In order words, the *Shariah* accepts the validity of a financial asset that derives its return from the performance of an underlying real asset. The design of *Sukuk* is very similar to the process of securitization of assets in conventional markets where a wide range of asset types are securitized. The asset types include mortgages, auto loans, accounts receivables, credit card payoffs, and home equity loans. Just as in conventional securitization, a pool of assets is built and securities are issued against this pool. *Sukuks* are participation certificates against a single asset or a pool of assets.

Formally, *Sukuk* represent proportionate beneficial ownership of an asset for a defined period when the risk and the return associated with cash flows generated by underlying assets in a pool are passed to the *Sukuk* holders (investors). *Sukuk* is similar to a conventional bond as it is also a security instrument that provides a predictable level of return. However, a fundamental difference between the two is that a bond represents pure debt of the issuer but a *Sukuk* represents, in addition to the risk on the credit-worthiness of the issuer, an ownership stake in an existing or well-defined asset or project. Also, while a bond creates a lender/borrower relationship, the relationship in *Sukuk* depends on the nature of the contract underlying the *Sukuk*. For example, if a lease (*Ijarah*) contract underlies a *Sukuk*, then it creates a lessee/lessor relationship, which is different from the typical lender/borrower relationship.<sup>62</sup>

The first paragraph of this explanation discusses conventional non-Islamic securitization. The second paragraph contrasts the conventional arrangement with *shukuk*.

A better appreciation of the two above-quoted paragraphs is possible through appropriate Tables and Diagrams. Accordingly, Tables 29-3 and 29-4 lay out, in a Step-by-Step manner, the two distinct transactions. Diagrams 29-3 and 29-4 follow each Table and summarize the transactions. There are key distinctions between the issuance of conventional non-Islamic asset securities and *shukuk*, particularly concerning interest payments (*riba*) associated with a pool of assets in question. But, there also are similarities.<sup>63</sup>

The Tables and Diagrams are conceptual in nature. Therefore, two major caveats must be kept in mind when studying them. First, not every non-Islamic or *shukuk* follows each and every one of the steps above precisely, in the same order as outlined above. To some degree, every deal is unique.

Second, in both the non-Islamic and *shukuk* cases, the Steps do not always proceed in the algorithmic manner suggested by the Diagram and Table. For

example, when issuing *shukuk*, the SPM may obtain credit enhancements earlier in the transaction than Step 6. After all, investors would like to know as soon as possible what enhancements, if any, are available, and the IPO cannot be priced properly without resolving this matter. As another example, Steps 3 and 4 in a *shukuk* issuance may occur more or less contemporaneously. That is because the SPM needs funds from the IPO (Step 4) to purchase the underlying asset or pool (Step 3).

Table 29-3:  
Conventional Non-Islamic Asset Securitization

Step Number in Overall Transaction	Elements of Each Step
1	<p><b>Creation of an Asset on the Balance Sheet of a Commercial Bank (or Other Financial Institution) through a Loan Transaction</b></p> <p>The asset could be a mortgage loan, home equity loan, auto loan, credit card loan, or other kind of account receivable.</p> <p>The asset of the lending bank, known as the "originator," is a liability for the borrower, which may be a business or individual.</p> <p>The loan requires the borrower to make regular payments of principal and interest.</p> <p>In both a <i>shukuk</i> transaction and a conventional non-Muslim asset-backed security transaction, the underlying asset or pool generates a stream or revenues, i.e., a cash flow.</p> <p>However, in contrast to a <i>shukuk</i> deal, in a conventional non-Muslim asset-backed security deal, the underlying asset or pool generates revenues that involve interest, as well as principal, streams. In a <i>shukuk</i> deal, any interest payments would be <i>riba</i>, and, therefore, forbidden (<i>harām</i>).</p>
2	<p><b>Creation of a Special Purpose Vehicle (SPV)</b></p> <p>The SPV is created by a bank (or other financial institutions), but as a separate entity, and on a non-recourse basis. The SPV is a distinct corporation, and if it were to default on its obligations, its creditors would have no recourse to the parties that created it.</p> <p>The bank that creates the SPV provides financial capital to it.</p> <p>The key benefit of the independence of the SPV from the bank that creates it is that the SPV is able to obtain its own credit rating. It does not automatically receive the credit rating of the entity that originally owned the asset or pool.</p> <p>For instance, if that bank had bad debt, in addition to the asset or pool, then its credit-rating might be downgraded. The SPV would not be tainted by the bad debt. Thus, any financial instruments — such as asset-backed securities — issued by the SPV (discussed below) carry their own credit-rating, not that of the bank that created the SPV.</p>

<sup>62</sup> Iqbal & Mirakhor, *supra*, at 177-178.

<sup>63</sup> Table 29-4 and Diagram 29-4, with respect to *shukuk*, are drawn from Iqbal & Abbas, *supra*, at 177-181.

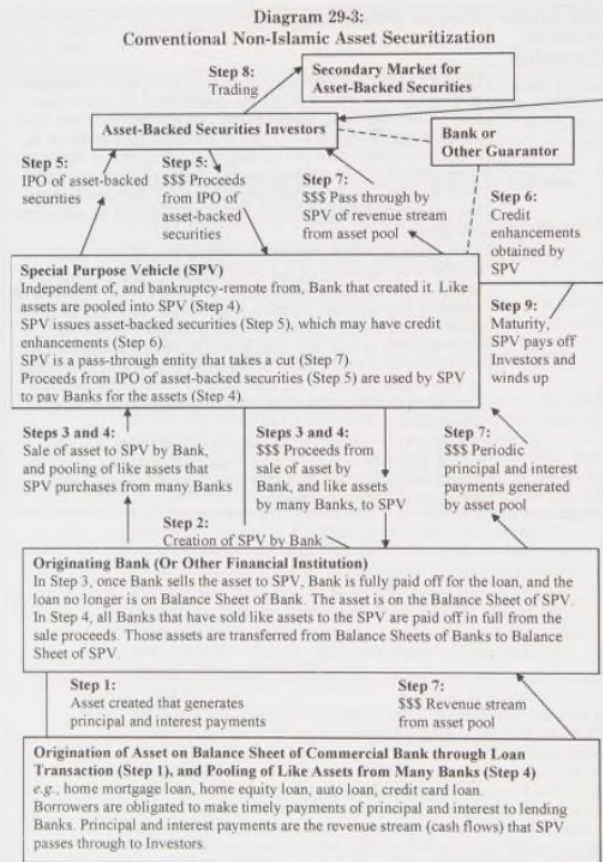

Step Number in Overall Transaction	Elements of Each Step
	<p>In brief, the independence of the SPV is a credit enhancement for prospective asset-backed security investors (discussed below), in that they have greater certainty and predictability about the cash flows from the asset or pool that underlies that security.</p> <p>Moreover, as a distinct legal entity, the SPV is bankruptcy-remote. That is, the insolvency of the bank that created it does not affect that of the SPV.</p>
3	<p><b>Sale of the Asset by the Lending Bank to the SPV</b></p> <p>The lending bank that originated the asset, i.e., the underlying loan, sells that loan to the SPV. At that point, the originating bank is fully paid off by the SPV for the loan, and the loan is no longer on the balance sheet of the bank. Rather, the loan is an asset of the SPV.</p> <p>The SPV uses its initial capital funding to purchase the loan, as well as to pool assets (below).</p> <p>The bank informs the borrower to make payments of principal and interest to the SPV, or other designated institution that will channel the payments to the SPV.</p> <p>When an originating bank is paid for the loan by the SPV, it is thereby re-liquified. That is, the bank gets cash for the asset it sold, and the bank can use this cash to create a new loan.</p>
4	<p><b>Pooling of Assets by the SPV</b></p> <p>Assets that are like one another are pooled into the SPV. That is, all of the originators (lending banks) of identical contracts sell them to the SPV (as in Step 3). For example, the SPV might acquire home mortgage loans paying 7 percent interest over a tenor of 30 years made to prime borrowers, the principal value of which is U.S. \$250,000 or less. The process of pooling assets together is known in Wall Street parlance as "repackaging."</p> <p>Accordingly, all banks that sell like assets to the SPV for pooling are paid off in full from the sale proceeds. Those assets then are transferred from the balance sheet of the originating banks to the balance sheet of the SPV. To use the common Wall Street parlance, the assets formerly owned by the originators are bundled and sold to the SPV.</p> <p>Technically, there may be an intermediate step in which the lending banks sell their assets to a single, separate institution, which serves as the "originator," and which then repackages and bundles the assets for onward sale to the SPV. However, the term "originator" more precisely applies to the financial entities that created — or originated — the assets in question, such as banks that made mortgage loans.</p>

Step Number in Overall Transaction	Elements of Each Step
	<p>Regardless of the exact transactional structure, the key point is that the underlying pool of assets generates a regular stream of revenues. For example, mortgagors make payments of principal and interest on their home loans to the SPV, car owners make payments of principal and interest on their car loans to the SPV, and credit card holders make payments of principal and interest on their credit card debt to the SPV.</p>
5	<p><b>IPO of Asset-Backed Securities by the SPV</b></p> <p>The SPV is the issuer of securities that are backed by the revenue stream from the underlying pool of assets.</p> <p>The investors may be individuals or institutions, and may be located anywhere in the world. Investors purchase the asset-backed securities from the issuer at the offering price.</p>
6	<p><b>Credit Enhancement</b></p> <p>Investors, in both the primary and secondary market for asset-backed securities, will examine the credit quality of those certificates. The higher the risk of default on them, the higher return the investors will expect. Thus, to lower the cost of capital, the SPV will seek to obtain credit enhancements from reliable, reputable third parties.</p> <p>The credit enhancements may take the form of a guarantee issued by a commercial or investment bank, along with a strong credit rating from a well-regarded rating agency.</p> <p>Thus, the asset-backed securities may receive one or both of the following types of credit enhancements, which reduce the credit risk to investors (i.e., the risk of default associated with the securities):</p> <ol style="list-style-type: none"> <li>(1) Rating by a credit-rating agency, such as Moody's or Standard &amp; Poors. Investors will demand a higher interest premium on the securities if the credit rating is low.</li> <li>(2) Insurance, for example, by a derivative such as a CDS of the kind that the infamous insurance giant AIG provided. Investors will demand a higher interest premium on the securities if they are uninsured.</li> </ol> <p>The essence of the guarantee is that a third-party guarantor, such as a bank, agrees to make payments to holders of asset-backed securities in the event of default on the revenue stream from the underlying asset or pool. For example, if the pool consists of auto or home loans, and the auto or home owners cannot meet their obligations, then the SPV lacks revenue from them to pass through to the certificate holders. The guarantor steps in and makes the necessary payments.</p> <p>An alternative guarantee structure is where the bank agrees to buy or replace the underlying asset or pool from the entity that owns it.</p> <p>Of course, in exchange for the guarantee, the bank charges a fee.</p>

Step Number in Overall Transaction	Elements of Each Step
	For institutional investors, such as pension (retirement) funds, it is essential that the asset-backed security be guaranteed. That is, the terms under which such investors operate often prohibit them from purchasing financial instruments that are not guaranteed.
7	<p><b>Receipt of Principal and Interest Payments by Investors Holding the Asset-Backed Securities</b></p> <p>The SPV serves as a pass-through vehicle, meaning that principal and interest payments from borrowers on the underlying loan transaction are paid into the SPV, pass through it, and are transmitted to the investors.</p> <p>In contrast to a <i>shukuk</i> transaction, in an asset-backed security deal, the cash flows generated by the underlying asset or pool of assets and passed through to investors involve interest payments. In a <i>shukuk</i> transaction, interest would be forbidden (<i>haram</i>) as <i>riba</i>.</p> <p>To be sure, the interest rate paid by borrowers is not identical to the rate received by investors. If it were, then the issuer of the securities (the SPV) would make no profit. Rather, the issuer takes a "cut" when it passes through payments from borrowers. For example, the borrowers might pay an interest rate of X percent (e.g., a home mortgage rate of 6 percent), and the SPV passes through to investors Y percent (e.g., an investment return of 5 percent). X will be greater than Y, and the difference will be the cut (e.g., 1 percent). In brief, the income stream from the asset pool backing the securities is greater than the cash payouts to the investors.</p>
8	<p><b>Secondary Market Trading of Asset-Backed Securities</b></p> <p>The asset-backed securities may be bought and sold by investors, typically OTC, i.e., not on an organized securities exchange such as the NYSE.</p>
9	<p><b>Maturity</b></p> <p>Asset-backed securities will have a defined maturity (as well as events of default). When the maturity date is reached, the SPV winds up. It does so by paying back the security holders their original capital investment or other appropriate amount. In effect, the SPV retires the securities. The SPV may obtain funds for this purpose from the original entity that owns the underlying asset or pool. That entity may sell the asset or pool, and transfer the proceeds to the SPV, which uses the funds to pay off the investors.</p>

Step Number in Overall Transaction	Elements of Each Step
	<p>Unlike a <i>shukuk</i> transaction, the amount paid to the investors in asset-backed securities is not pre-determined. It is possible that an investor in an asset-backed security incurs a loss vis-à-vis the original capital contribution made by that investor. In other words, investors are subject to the vagaries of the market in respect of the underlying asset or pool, which might not fetch a price high enough to pay them off. Examples include the sub-prime mortgage crisis and MBSs backed by sub-prime mortgages.</p> <p>Also unlike a <i>shukuk</i> transaction, typical non-Muslim asset backed security deals do not involve a "put" option (i.e., and option to sell an underlying asset, whereas a "call" option is an option to buy an asset). Under a put option, investors in an asset-backed security would be legally entitled to sell back their security to the SPV that issued it, for a pre-determined price such as the face value of the security. That option would be exercisable up to, or at, the maturity date of the security. The put option typically does exist with respect to a <i>shukuk</i> transaction.</p> <p>Once the SPV retires the asset-backed securities, it is dissolved. There is no need for its continued existence, as it has served its purpose as an issuer of the certificates and pass-through vehicle for payments.</p>

**Table 29-4:**  
***Shukuk***

Step Number in Overall Transaction	Elements of Each Step
1	<p><b>Identification of Asset or Pool of Assets for Securitization</b></p> <p>An entity seeks to raise financial capital. The entity could be a commercial bank, non-bank financial institutions, or non-financial business (such as an agricultural or industrial enterprise).</p> <p>Typically, the entity may seek funding from the IPO of <i>shukuk</i> to purchase the asset or pool. In some cases, the entity already may own and control the asset or pool, and seeks funding to improve the nature or character of that asset or pool.</p> <p>Indeed, in many instances, the entity is the originator (creator) of the asset or pool. In such cases, the entity is properly and precisely called the "originator" or "originating bank."</p> <p>The asset or pool could be tangible, such as an air or sea port, building (e.g., house, apartment complex, office tower, or stadium), highway, or agricultural or industrial land. Or, the asset could be intangible, such as a financial instrument. Whether tangible or intangible, the asset may be pooled with other assets. Homogenous assets (e.g., the same kind of financial instruments) may be pooled. However, heterogeneous assets (e.g., a tangible and a non-tangible asset) may not be pooled.</p> <p>The entity seeks to securitize the asset or pool of assets. Critically, the asset or pool generates a stream of revenues — a cash flow — but these revenues do not involve interest payments, which would be <i>ribā</i>, and, therefore, forbidden (<i>harām</i>).</p>
2	<p><b>Creation of a Special Purpose <i>Mudārabah</i> (SPM)</b></p> <p>The entity seeking to securitize the asset or pool of assets creates an SPM. That entity also capitalizes the SPM.</p> <p>The SPM is a separate legal entity from the entity that creates it, and from the issuer (discussed below) of the <i>shukuk</i>. It may or may not be affiliated with the creating entity, but its only purpose is to receive and hold the asset or pool.</p> <p>The key benefit of the independence of the SPM from the entity that creates it is that the SPM is able to obtain its own credit rating. It does not automatically receive the credit rating of the entity that originally owned the asset or pool. For instance, if that entity has bad debt, in addition to the asset or pool, then its credit-rating might be downgraded. The SPM is not tainted by the bad debt. Thus, any financial instruments — such as asset-backed securities — issued by the SPM (discussed below) carry their own credit-rating, not that of the entity that created the SPM.</p>
3	<p><b>Transfer of Assets or Pool to SPM</b></p>

Step Number in Overall Transaction	Elements of Each Step								
	<p>The entity owning the asset or asset pool transfers that asset or pool to the SPM. The sale of the asset or asset pool is at a pre-determined price.</p> <p>At this juncture, the asset or pool no longer is on the balance sheet of the original entity, but rather is on the balance sheet of the SPM. As a result, the asset or pool backs issuance by the SPM of <i>sukuk</i> certificates (Step 4). (Note the possibility that the certificates are asset-based, not asset-backed, and thus collateralized by the cash flows from the assets, but not the assets themselves.)</p> <p>As in the case of conventional non-Muslim securitization, when an originating bank is paid for its asset by the SPM, that bank is thereby re-liquefied. That is, the bank gets cash for the asset it sold, and the bank can use this cash to acquire a new asset, including creation of a new loan.</p> <p>Further, the asset or pool is immune from any financial difficulties that the entity that previously owned them might suffer. As a distinct legal entity, the SPM is bankruptcy-remote. That is, the insolvency of the entity that created it does not affect that of the SPM.</p> <p>In brief, the independence of the SPM is a credit enhancement for prospective <i>sukuk</i> investors (discussed below), in that they have greater certainty and predictability about the existence of "hard" assets, or a pool of "hard" assets, to back the certificates. In turn (as per Step 7), these "hard" assets will generate cash flows for the <i>sukuk</i> investors.</p>								
4	<p><b>Issuance of certificates (<i>Sukuk</i>)</b></p> <p>As in Step 3 above, the SPM purchases the underlying asset or pool from the entity that created it. The SPM pays for the purchase by issuing participation certificates — the <i>sukuk</i>. Thus, the asset side of the balance sheet of the SPM contains the asset or pool. The liability side of the ledger contains the certificates (akin to a note payable). In brief:</p> <table border="1"> <thead> <tr> <th colspan="2">SPM BALANCE SHEET (SIMPLIFIED)</th></tr> <tr> <th>Assets</th><th>Liabilities</th></tr> </thead> <tbody> <tr> <td>Underlying asset or pool of assets (purchased from original creating entity) <i>e.g.</i>, <i>ijāra</i> (lease) contracts</td><td><i>Sukuk</i> (certificates issued to investors)</td></tr> <tr> <td colspan="2">The value of the participation certificates equals the price of the asset or pool sold to the SPM. Each certificate represents an undivided share in the ownership of the asset or pool from the entity that originally owned and controlled that asset or pool.</td></tr> </tbody> </table>	SPM BALANCE SHEET (SIMPLIFIED)		Assets	Liabilities	Underlying asset or pool of assets (purchased from original creating entity) <i>e.g.</i> , <i>ijāra</i> (lease) contracts	<i>Sukuk</i> (certificates issued to investors)	The value of the participation certificates equals the price of the asset or pool sold to the SPM. Each certificate represents an undivided share in the ownership of the asset or pool from the entity that originally owned and controlled that asset or pool.	
SPM BALANCE SHEET (SIMPLIFIED)									
Assets	Liabilities								
Underlying asset or pool of assets (purchased from original creating entity) <i>e.g.</i> , <i>ijāra</i> (lease) contracts	<i>Sukuk</i> (certificates issued to investors)								
The value of the participation certificates equals the price of the asset or pool sold to the SPM. Each certificate represents an undivided share in the ownership of the asset or pool from the entity that originally owned and controlled that asset or pool.									

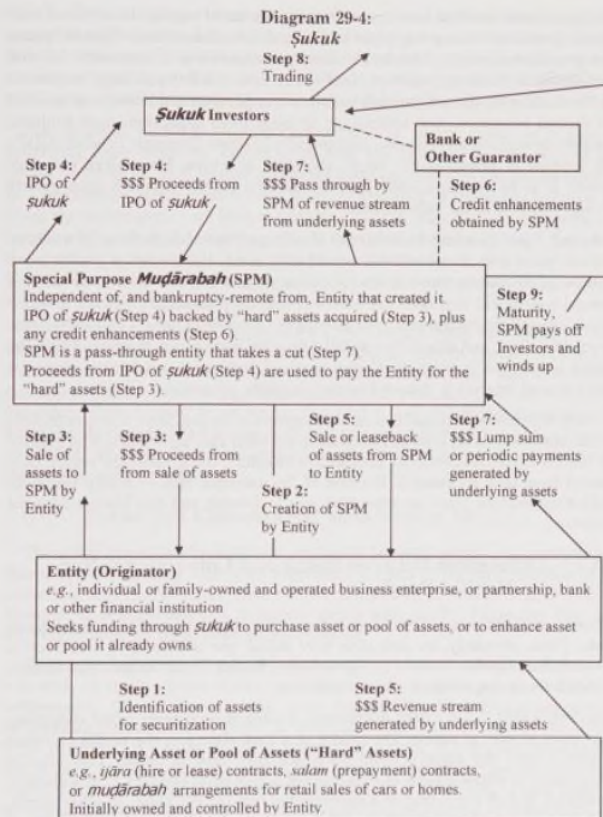

Step Number in Overall Transaction	Elements of Each Step						
	<p>The purchasers of the certificates are investors, the <i>sukuk</i> investors. The funds they provide to the SPM in exchange for the certificates are used by the SPM to buy the asset.</p> <p>By holding a certificate (<i>sakk</i>), an investor has an ownership stake in the underlying asset or pool. That stake is a joint one. All of the investors, along with the SPM, are joint owners of the asset or pool.</p>						
5	<p><b>Sale or Leaseback of Assets from SPM</b></p> <p>The SPM sells the asset or pool back to the original entity with which they were associated. Alternatively, the SPM leases the asset or pool to that entity (meaning the SPM is a lessor, and the entity is the lessee).</p> <p>In exchange, the SPM receives a future payment, namely, the sale price of the asset or pool. Alternatively, the SPM receives future periodic lease payments. Herein is the key point of this Step: the revenue stream generated by the underlying asset or pool flows into the SPM, and flows from the original entity or other buyer or lessee.</p> <p>In other words, in terms of accounting, the purpose of the sale or leaseback is to re-structure the balance sheet of the SPM. As indicated in Step 4, before the sale/leaseback, and after issuance of the <i>sukuk</i> (certificates), the asset side of the Balance Sheet of the SPM contains the underlying assets or pool, and the liability side contains the certificates. To pay the investors in the <i>sukuk</i>, the SPM needs not the "hard" assets or pool. Rather, the SPM needs the revenue stream generated by those assets or pool. Thus, by selling the assets or pool, and receiving the income from them, the SPM acquires the revenue stream. It then passes the revenues through to the holders of <i>sukuk</i>, functioning as a pass-through vehicle. Of course, the SPM deducts a minor sum to cover its administrative, insurance, and debt servicing costs.</p> <p>Accordingly, after this Step, the Balance Sheet of the SPM looks as follows:</p> <table border="1"> <thead> <tr> <th colspan="2">SPM BALANCE SHEET (SIMPLIFIED)</th></tr> <tr> <th>Assets</th><th>Liabilities</th></tr> </thead> <tbody> <tr> <td>Future payment or periodic payments generated by underlying asset or pool of assets (sold or leased back to original creating entity) <i>e.g.</i>, rental payments from lessees on <i>ijāra</i> (lease) contracts</td><td><i>Sukuk</i> (certificates issued to investors)</td></tr> </tbody> </table>	SPM BALANCE SHEET (SIMPLIFIED)		Assets	Liabilities	Future payment or periodic payments generated by underlying asset or pool of assets (sold or leased back to original creating entity) <i>e.g.</i> , rental payments from lessees on <i>ijāra</i> (lease) contracts	<i>Sukuk</i> (certificates issued to investors)
SPM BALANCE SHEET (SIMPLIFIED)							
Assets	Liabilities						
Future payment or periodic payments generated by underlying asset or pool of assets (sold or leased back to original creating entity) <i>e.g.</i> , rental payments from lessees on <i>ijāra</i> (lease) contracts	<i>Sukuk</i> (certificates issued to investors)						

Step Number in Overall Transaction	Elements of Each Step
	It may appear at first glance that it is odd for the SPM to purchase the assets for the pool in Step 3, and then sell (or lease) them in Step 5. However, the purchase in Step 3 is necessary, because prospective investors in the <i>shukuk</i> are disinclined to purchase certificates of a shell company (one with no assets) that is legally distinct from the original entity. In other words, putting the asset or pool on the Balance Sheet of the SPM is an important inducement for investors to purchase the certificates. Then, after their investment, their concern is obtaining an investment return, which requires that the SPM have liquid ( <i>i.e.</i> , cash or near-cash) assets. The asset or pool may not be liquid — it could be an <i>ijara</i> contract, or a machine. Thus, in Step 5, the SPM sells the asset or pool in exchange for a liquid asset.
6	<p><b>Credit Enhancements</b></p> <p>Investors, in both the primary and secondary market for <i>shukuk</i>, will examine the credit quality of those certificates. The higher the risk of default on them, the higher return the investors will expect. Thus, to lower the cost of capital, the SPM will seek to obtain credit enhancements from reliable, reputable third parties.</p> <p>The credit enhancements may take the form of a guarantee issued by a commercial or investment bank, along with a strong credit rating from a well-regarded rating agency.</p> <p>The essence of the guarantee is that a third-party guarantor, such as a bank, agrees to make payments to <i>shukuk</i> holders in the event of default on the revenue stream from the underlying asset or pool. For example, if the pool consists of auto or home loans, and the auto or home owners cannot meet their obligations, then the SPM lacks revenue from them to pass through to the certificate holders. The guarantor steps in and makes the necessary payments.</p> <p>An alternative guarantee structure is where the bank agrees to buy or replace the underlying asset or pool from the entity that owns it.</p> <p>Of course, in exchange for the guarantee, the bank charges a fee.</p> <p>For institutional investors, such as pension (retirement) funds, it may be essential that the <i>shukuk</i> be guaranteed. That is, the terms under which such investors operate often prohibit them from purchasing financial instruments that are not guaranteed.</p>
7	<b>Periodic Payments to <i>Shukuk</i> Investors (Revenue Streams from Underlying Asset or Pool Passed Through by SPM)</b>

Step Number in Overall Transaction	Elements of Each Step
	<p>During the life of the <i>shukuk</i>, the SPM passes through payments received from the borrowers or other obligors on the underlying asset or pool. For example, if the pool consists of <i>ijara</i> contracts, then the lease payments from lessees are received by the SPM, and passed by it to the certificate investors. The SPM makes these payments periodically, much like a coupon (<i>i.e.</i>, interest) payment on a conventional, non-Islamic bond.</p> <p>However, there is a critical difference in the two types of instruments. An issuer of a conventional, non-Islamic bond is legally obligated to make principal and interest payments regularly, on schedule, to bond holders. That is true regardless of the status of the asset, pool, or project that underlies the bond (unless, of course, the issuer goes bankrupt).</p> <p>In sharp contrast, the SPM that issued the <i>shukuk</i> makes payments to investors only if the underlying asset or pool generates revenue. In other words, only if the securitized asset produces a revenue stream do the investors get paid. (The exception is if an event triggering a guarantee occurs.) Thus, for example, if the <i>shukuk</i> is lease-based, then the SPM passes through the lease payments to the investors. But, if the lessees default on their rental payment obligations, then the SPM passes through nothing to the investors (again, unless a guarantee is triggered).</p> <p>To be sure, assuming the underlying asset or pool generates revenue, the payment received by the SPM from borrowers or other obligors is not identical in amount to the payment the SPM passes through to investors. If it is, then the issuer of the securities (the SPM) makes no profit. Rather, the issuer takes a "cut" when it passes through payments from borrowers. For example, the borrowers might pay a profit return of X (<i>e.g.</i>, a home installment payment of U.S. \$100,000), and the SPM passes through to investors Y (<i>e.g.</i>, an investment return of \$90,000). X will be greater than Y, and the difference will be the cut (<i>e.g.</i>, 10 percent). In brief, the income stream from the asset pool backing the <i>shukuk</i> is greater than the cash payouts to <i>shukuk</i> investors.</p>
8	<p><b>Secondary Market Trading</b></p> <p>Investors from a primary issuance of <i>shukuk</i> may choose to sell their certificates on the secondary market. The new holders step entirely into the position vacated by the sellers, and enjoy both pro rate ownership of the underlying asset or pool as reflected in their certificate holding, and full legal entitlement to investment returns.</p>

Step Number in Overall Transaction	Elements of Each Step
	As with secondary market trading of non-Islamic bonds, the secondary market price of <i>shukuk</i> varies according to two broad categories of factors: the certificate, and the market. As to the certificate, the nature and quality of the issuer and any guarantee will be relevant, as will be the terms, tenor, and remaining life of the certificates, and expectations of profitability from the underlying asset or pool. As to the market, the factors affecting pricing will relate to the forces of supply and demand, and domestic and international economic and political conditions. Note that depending on the secondary market, trading may be restricted in some way by government regulation. One example is a minimum holding period (explained below) following an IPO.
9	<p><b>Maturity</b></p> <p><i>Shukuk</i> will have a defined maturity (as well as events of default). When the maturity date is reached, the SPM winds up. It does so by paying back the certificate holders their original capital investment or other appropriate amount. In effect, the SPM retires the certificates. The SPM may obtain funds for this purpose from the original entity that owns the underlying asset or pool. That entity may sell the asset or pool, and transfer the proceeds to the SPM, which uses the funds to pay off the investors.</p> <p>Note that the amount paid to the investors is pre-determined, so that they do not incur a loss vis-à-vis their original capital contribution. In other words, the investors are not subject to the vagaries of the market in respect of the underlying asset or pool, which might not fetch a price high enough to pay them off.</p> <p>Note also that many <i>shukuk</i> deals involve a "put" option (i.e., an option to sell an underlying asset, whereas a "call" option is an option to buy an asset). Under the put option, the certificate investors can sell the <i>shukuk</i> back to the SPM that issued the <i>shukuk</i> for a price equal to the face value of the certificates. This option is exercisable at the maturity date of the <i>shukuk</i>.</p> <p>Once the SPM retires the <i>shukuk</i>, it is dissolved. There is no need for its continued existence, as it has served its purpose as an issuer of the certificates and pass-through vehicle for payments.</p>

## [B] Similarities Between *Shukuk* and Conventional Non-Muslim Bonds

Looking generally at non-Islamic bonds and *shukuk*, three similarities are evident. First, both products exist to fit and fill the needs of markets, specifically, of savers and borrowers. Savers of funds look for a return on their savings through investing them. Borrowers — such as individuals and businesses seeking to expand

their operations through leverage — require increased capital. Islamic and non-Islamic bonds are among the types of financial instruments that channel finance from providers to users of funds. Put simply, both are loan instruments. In turn, the individuals, small and medium sized enterprises (SMEs), and large businesses use the funding for growth through investment in physical and human capital, land and natural resources, new technology, or labor force expansion. Such projects, repeated throughout an economy, lead to gains in Gross Domestic Product (GDP). This process of private-sector credit allocation is critical for modern economic growth. It is to be emphasized that the *Shari'a* readily supports such growth through (*inter alia*) the *shukuk* device.

Second, liquidity is important in both Muslim and non-Muslim financial markets. Like an investor in a conventional non-Muslim bond, the holder of a *sakk* has a right to trade that instrument. Yet, potential buyers are not keen to invest in a financial instrument that does not have a broad, deep secondary market in which they can re-sell the instrument. The greater the number of buyers and sellers that are ready, willing, and able to buy or sell a financial instrument, the more liquid the market is for that instrument. Consequently, Islamic and non-Islamic countries have a shared interest in financial market liquidity generally.

Third, whether a financial instrument is governed by the *Shari'a* or non-Muslim secular law, there is an inverse relationship between risk and return. The greater the degree of risk perceived by prospective investors, the greater the return they demand from that instrument. Because of the universal risk — return trade-off, credit enhancement plays an important role in Islamic and non-Islamic financial markets.

### [C] Differences Between *Shukuk* and Conventional Non-Muslim Bonds

There are three salient differences between *shukuk* and conventional, non-Islamic bonds. First, obviously, by definition only *shukuk* are condoned by the *Shari'a*. Conventional bonds issued by American, British, and other non-Muslim corporations do not comport with Islamic Law.

Second, a *sakk* is not a debt instrument. Rather, it represents a part ownership in an asset or pool of assets. The holder of a *sakk* shares in the profits or losses associated with the asset or pool on which that *sakk* is based. This kind of arrangement is characteristic of conventional non-Muslim equity, i.e., of a stock in a company. But, it is not true of a conventional non-Islamic bond. In other words, the holder of a *sakk* is somewhat akin to a shareholder, whereas a conventional bondholder is a creditor of the issuer of the bond. The creditor may be a secured party, with the security lying in the assets of the issuer. But, the creditor is not an owner of those assets.

Third, and following from the second point, an issuer of *shukuk* is not obligated to return a fixed profit to the investor. That feature resembles a conventional, non-Muslim stock. The stock issuer does not guarantee a fixed dividend to the stock holder. In contrast, the issuer of a conventional, non-Muslim bond or asset-backed security does have a contractual obligation to repay principal and interest to bond

holders. True, that issuer does not guarantee a return to them of a fixed profit connected to the assets of the issuer or assets backing the security. But, the issuer defaults on the bond if it fails to make timely payment of principal and interest. In the case of *shukuk*, profits — if they arise — are generated from underlying business transactions, namely, the asset or pool underlying the *shukuk*.

For example, consider an *ijāra shukuk*, that is, bonds based on a pool of underlying lease contracts. Profits come from the tenants who pay rent on the rented property, or from lessors who make lease payments on the loaned objects. In a *mudārabah shukuk*, profits come from the proceeds of trading in the area for which the instruments have been established. That is, they come from commercial transactions in which the working partners (*mudārib*) of the *mudārabah*, for which they received a loan from the sleeping partner (*rabb al-māl*). Yet, in neither the *ijāra shukuk* nor the *mudārabah shukuk* does the *shukuk* issuer guarantee by contract any financial return to the investors.

Indeed, as a legal matter, to guarantee a fixed return would be considered *ribā*. The presence of *ribā* would transform the debt instrument (*shukuk*) into a loan transaction that is forbidden (*harām*). A demand by a lender that a borrower guarantee a fixed interest payment would entail *ribā*, and thereby would be forbidden. That demand is an act by the lender that potentially oppresses the borrower. By expecting the borrower to pay up a sum certain, when in fact there is uncertainty as to whether the borrower can repay, the lender puts all of the risk (*gharar*) on the borrower.

### [D] *Shukuk* and Conventional Non-Muslim Stocks

The prior discussion highlights a similarity between *shukuk* and conventional shares of stock, namely, that each represents a claim of partial ownership in an underlying asset or pool, and that neither guarantees its holder a fixed return. However, it is important not to equate *shukuk* with equity. There are four key differences between these financial instruments.

First, investors generally regard *shukuk* as stable, low-risk securities. That is not true with all stocks. Some stocks are rather steady in their price and dividend performance. Others, however, are quite volatile. The Wall Street concept to differentiate the two kinds of stocks is “beta” (sometimes abbreviated by the Greek letter B). “Beta” is a measure of the volatility of a stock. A high beta stock is one that is risky, particularly in terms of capital losses, but offers the possibility of high capital gains and thereby high returns. Specifically, a stock with a beta value of more than 1 historically moves (in terms of price) more than the relevant index for the market on which the stock is traded. (By definition, the beta value of the market equals 1.) It is considered an aggressive stock, and the higher the beta value, the more aggressive. Conversely, a stock with a beta value of less than 1 historically moves less than the market, and is considered defensive. It offers the possibility of lower returns than a high beta stock, but the certainty of those lower returns is greater than with a high beta stock. The point is *shukuk* are, or at least perceived as, rather mundane. For many investors, such as pensioners and charitable trusts, a boring security, one that is defensive, is precisely what excites them.

Second, the life of *šukuk* is finite. That is, Islamic bonds have a fixed maturity date. The contract relating to the *šukuk* clearly spells out the due date. In contrast, conventional equity has no fixed lifespan. In theory, the life of a stock is coterminous with the life of the company that issues it. Of course, in practice, from time to time, depending on market and other conditions, some companies do engage in stock swaps, changing (and thereby retiring) one class of security for another.

Third, *šukuk* are a supplementary means of finance for an enterprise, whereas conventional shares represent the paid-in capital of a company. An enterprise — that is, a *sharikah* (a partnership or association organized under the *Shari'a*) — that issues *šukuk* already has a primary source of capital. That source is the capital contributions from partners. Issuance of Islamic bonds is an additional source of funds for the *sharikah*, in the way that floating bonds is a supplementary source of finance for a corporation operating on non-Muslim principles.

Finally, there can be different classes of equity, but not of *šukuk*. As explained below, there are different types of *šukuk*, with the differences relating to the asset or pool that underlies the certificates. But, for any one type of *šukuk*, there is only one class of certificates. That is why, at the IPO, each certificate has equal value — and equal legal rights and obligations — with all other certificates in that IPO. In contrast, a non-Muslim corporation may issue two or more categories, or classes, of equity. For example, it will issue common stock, and also may issue preferred stock (which may be convertible into underlying ordinary shares, and may be issued on the basis of common stock, not as a distinct IPO). The company also may issue convertible bonds, that is, a bond-equity hybrid in which the bond is convertible to specified number of shares at a conversion price.<sup>64</sup> While the IPO price of any one specific equity instrument will be the same, the prices of common and preferred stock, and convertibles, will differ. Put succinctly, there is no such thing as “common *šukuk*,” “preferred *šukuk*,” or “convertible *šukuk*.”

<sup>64</sup> Examples of hybrid securities include preferred stock, convertible bonds, and moving strike convertible bonds (MSCBs). Many hybrid securities are privately placed, not issued through an IPO. Consequently, during the global economic crisis that began in 2008, when valuations of exchange-traded securities tumbled, the private market for hybrids remained robust. Of course, for holders of ordinary (common) stock, hybrids pose at least three problems. Hybrids dilute ordinary shareholders and their voting rights, can lead to an actual or apparent transfer of control, and sometimes lack transparency.

## Chapter 30

### FINANCE (TAMWEEEL): TYPES AND RISKS OF ISLAMIC BONDS (ŠUKUK)

Anyone who lives within their means suffers from a lack of imagination.

Oscar Wilde (1854-1900, Irish writer)

#### SYNOPSIS

##### § 30.01 PRIVATELY-ISSUED ŠUKUK

[A] Secondary Market Restrictions

[B] Nine Types

##### § 30.02 INNOVATIONS AND CHALLENGES FOR PRIVATELY-ISSUED ŠUKUK

##### § 30.03 RISKS ASSOCIATED WITH ŠUKUK

[A] Distinction Between “Asset-Backed” and “Asset-Based”

[B] Credit Risk

[C] Legal Risk

[D] *Shari'a* Risk

##### § 30.04 SOVEREIGN ŠUKUK

[A] Need for Sovereign *Šukuk*

[B] How Sovereign *Šukuk* Work

##### § 30.01 PRIVATELY-ISSUED ŠUKUK

There are various types of Islamic bonds (*šukuk*). One threshold distinction is the nature of the issuer: is it a private entity, or is it a public body, such as a government? A variety of private bodies, including financial and non-financial business associations of all kinds, issue *šukuk*. Likewise, many governments issue *šukuk*. This category is known as “sovereign *šukuk*,” to reflect the legal status of the issuer — a sovereign entity.

The obvious denominator common to both private and sovereign *šukuk* is that they are *Shari'a* compatible transactions. In consequence, except for *salam šukuk* (a privately issued bond, discussed below), investors have the right (subject to local financial market regulations) to sell their bonds at the prevailing market price. As market conditions change, the secondary market price is almost certain to be different from the IPO price. Certainly, the IPO price for a *sakk* is identical for the same type of instrument being floated, i.e., at the IPO all *šukuk* of the same class have the same unit value.

### [A] Secondary Market Restrictions

Of the nine types of Islamic bonds (*shukuk*) discussed below, there is no secondary market for three of them — *salām shukuk*, *istiṣnā' shukuk*, and *murābaḥa shukuk*. Secondary market trading of these three instruments is considered incompatible with the *Shari'a*. In limited circumstances, secondary market trading of two other kinds of *shukuk*, namely, *muzāra'ah shukuk*, and *musāqāḥ shukuk*, is deemed contrary to the *Shari'a*. As a practical investment matter, any restriction on secondary market trading is vital.

A financial asset that cannot be sold or bought after an IPO is less attractive to prospective investors than one with the possibility of subsequent trading. That is because the funds of the investor are locked into that instrument, with no possibility of escape in a secondary market, for the entire life of that instrument. There is no possibility of realizing a short-term capital gain, or even of a capital loss, the latter event being useful to offset gains under some tax law regimes. In Wall Street parlance, the instrument is illiquid — there is no post-IPO market of ready, willing, and able buyers and sellers. Consequently, investors are likely to eschew a financial instrument with no secondary market, in favor of one which permits post-IPO purchases and sales. When they do, the ramifications for the issuer cannot be ignored. The issuer must offer a better return on an instrument that has no secondary market than on one that does (*ceteris paribus*, i.e., all other factors being equal), so as to compensate investors for the liquidity risk, that is, the risk that they bear in not being able to turn the instrument into cash until its maturity.

Why, then, would Islamic Law squelch a secondary market for certain kinds of *shukuk*? The answer in respect of each of the types is explained more fully below. The general precept, which applies to all *shukuk*, is set out in a *Shari'a* ruling from the *Fiqh* Council of the Organization of Islamic Countries (OIC). The OIC is the leading international forum for Muslim nations, in which all of them participate, and the Council is its supreme jurisprudential body. Its rulings, while not binding on all Muslim nations, are highly respected by most of them. The *Fiqh* Council ruling states:

[A] bond or note can be sold at a market price provided that the composition of the group of assets, represented by the bond, consists of a majority of physical assets and financial rights, as compared to a minority of cash and interpersonal debts.<sup>1</sup>

The *Fiqh* Council is counseling against trading *shukuk* that are backed by cash or debt-like financial instruments. Note carefully that the Council is not ruling against secondary market trading of all debt instruments. Whether secondary market buying and selling is acceptable under the *Shari'a* depends on the design of the debt instrument. On the one hand, suppose the instrument is backed mainly by hard assets — physical things — and financial rights. Then, such trading is acceptable. On the other hand, suppose the asset or pool underlying the debt instrument

consists mainly of cash, or of debts between parties (i.e., promises to pay, or IOUs). Then, such trading is not agreeable.

Why is trading not agreeable in the latter case? The answer is that such trading could run afoul of the rule against *ribā*. That is because *shukuk* not backed by a majority of hard assets essentially is money. Trading money for money involves *ribā*, where the values are unequal, such as where an investor buys *shukuk* at one price, and sells it at a higher price. In sum, as a sacred legal system, Islamic Law exalts religious and moral teaching over economic rationality. While there are sound financial reasons to promote a secondary market, the *Fiqh* Council is duty-bound to subordinate those reasons if and when they conflict with that teaching.

### [B] Nine Types

Indubitably, it is a simplification to declare there are nine principal types of privately issued *shukuk*. The market for Islamic bonds is not static. Financial engineering technology, along with dynamic market conditions, lead to innovations. That said, there are nine prominent types of *shukuk*. All nine of them are permissible under the *Shari'a* throughout the Muslim world. The types of *shukuk* discussed below are found in Islamic financial markets such as Bahrain, Doha, Dubai, Kuwait, Riyadh, and Kuala Lumpur, as well as in certain non-Islamic markets, such as London, Hong Kong, and Tokyo.

#### (1) *Ijāra Shukuk* (certificates of ownership of leased assets)

These *shukuk* are based on the contract of *ijāra*, which is a conventional agreement for the hiring or leasing of a good or service. Thus, the asset or pool that underlies the bonds is one or more lease agreements. The *shukuk* channel rental payments from the party or parties leasing a good or service to the investors in the *shukuk*.

What, precisely, does the certificate — each *sakk* — represent? The answer is a partial ownership interest in the asset that is the object of the *ijāra* contract or contracts. For instance, if the *ijāra* contracts are for the lease of aircraft, or for apartments, then the *shukuk* investors are part owners of the planes, or of flats, respectively.

A critical purpose of the issuance of *ijāra shukuk* is to provide financing for a party that ultimately seeks to own the aircraft or apartments. That party is the issuer of the certificates. The purchase price paid by the *shukuk* investors at the time of the IPO flows to the issuer. The issuer uses the funds to lease the aircraft or apartments from a manufacturer or developer, respectively. The issuer then puts the aircraft or apartments to productive use, carrying passengers on commercial flights, or renting out the flats to expatriates and tourists. The issuer takes some of the earnings from these uses (e.g., airplane ticket revenues or rental payments from tenants) to pay back the *shukuk* investors. When the issuer has paid off all the investors, then it becomes the full owner of the airplanes or flats.

<sup>1</sup> Quoted in ZAMIR IQBAL & ABBAS MIRAKHOR, AN INTRODUCTION TO ISLAMIC FINANCE THEORY AND PRACTICE 181 (Singapore: John Wiley & Sons (Asia) Pte Ltd, 2007). [Hereinafter, Iqbal & Mirakhor.] Unfortunately, Professors Iqbal and Mirakhor do not cite the specific source or date of this ruling.

In three key respects, *ijāra shukuk* are flexible instruments, which makes them particularly attractive to investors.<sup>2</sup> First, the timing of the cash flows to *shukuk* investors need not be exactly coincident with the timing of rental payment by lessees for the asset or assets they are leasing. A delay in the underlying rental payments need not hold up the pass through of returns to investors.

Second, the life of *ijāra shukuk* can last as long as the leased property is in existence and usable by the lessee. The maturity of the bonds can be any period up to and including the full, practically usable life of the asset that is the object of the *ijāra* contract. Note the importance of the usable life of the asset. If the user of the leased property can no longer benefit from the asset, then there is no reason for that user to make rental payments. In turn, cash flows supporting the payments to investors would cease.

Third, assuming the underlying contracts are for the lease of a good or goods, the *Shari'a* does not require that the property that is the object of the *ijāra* contract actually exist at the time the *ijāra* contract is created.

For example, suppose Emirates Airlines leases 10 new Boeing 777 aircraft. The leases are made via *ijāra* contracts between Emirates Airlines and Boeing. The aircraft are under construction at facilities in Wichita, Kansas and other locations. Before construction of the aircraft is complete, and delivery is made to Emirates Airlines, *ijāra shukuk* are issued. These *shukuk* are based on the *ijāra* contracts between Emirates Airlines and Boeing. Even though the aircraft are still being built, the issuance of the bonds is permissible. Presumably, the Airlines makes payments to Boeing under the lease contracts, even before completion and delivery of the aircraft. These payments are a sufficient security on which to premise the IPO of the *shukuk*.

To be compliant with the *Shari'a*, *ijāra* must satisfy four conditions. First, the *ijāra* contract or contracts must comply with Islamic Contract Law. For instance, an IPO of *shukuk* based on *ijāra* contracts that are lease agreements for casinos would be forbidden (*harām*). That is because gambling is forbidden.

Second, the use of the assets must comply with the *Shari'a*. It would be *harām* to issue *shukuk* based on *ijāra* contracts in which multi-purpose, non-specific buildings are leased, but the buildings are used by the lessee as casinos. Here, the lease contract is permissible, but the use to which the property is put — gambling — is impermissible, namely, gambling.

Third, the leased asset or assets must yield a benefit to the user who pays the rent for hiring them. If the user paid rent but obtained no benefit from the property, then the *ijāra* arrangement would be dubious, even fraudulent. This requirement does not mean the lessee actually uses the asset, or that the lessee gains a certain threshold level of benefit. It simply means that the asset is potentially beneficial for the party that pays the rent. Hence, *ijāra shukuk* could be based on contracts to rent beach-front holiday apartments, regardless of whether any of the renters actually stay in the apartments, or enjoy the beach.

<sup>2</sup> See IQBAL & MIRAKHOR, *supra*, at 182.

Fourth, the owner of the property that is the object of the *ijāra* contract must be responsible under that agreement for performing all necessary maintenance on the property. The owner, or owners, is none other than the *shukuk* investors. Yet, this requirement protects the *shukuk* holders. It ensures the property is in a condition suitable for the lessee to benefit from it, and in turn helps avoid disputes with the owner. For instance, if the owner of beach-front apartments does not repair them after a natural disaster, then they may be uninhabitable. Renters would withhold payments, which in turn would compromise the pass-through of returns to *shukuk* investors.

## (2) *Salam Shukuk* (certificates for deferred delivery contracts)

*Salam* contracts are pre-payment agreements whereby a buyer pays for the object of the contract, and receives delivery at a later date. They are short-term contracts, in that generally, the time gap between payment and delivery is between 3 months to one year. Each certificate represents a partial ownership interest in the object of the underlying *salam* contract or contracts.

An important purpose of *salam shukuk* is to provide financing to the buyer in the underlying *salam* contract. The buyer is obliged to pre-pay for goods yet-to-be delivered. The goods may be a commodity such as aluminum, copper, crude oil, or natural gas. Or, they could be a manufactured product, such as cars.

But, where does the buyer get the funds to make that pre-payment? The answer is the funds raised from the IPO of the *salam shukuk*, i.e., the initial purchase price paid by the *shukuk* investors. Put succinctly, the IPO provides the financial capital for the buyer. Of course, the *salam shukuk* investors get something in return, namely, their certificates represent part ownership in the underlying goods that are to be delivered to the buyer. That is, the goods become commodities owned jointly among the holders of the *shukuk*. Only when the buyer has paid off the investors in the *salam shukuk* does that buyer take full ownership of the underlying asset that was the object of the *salam* contract.<sup>3</sup>

Technically, the underlying *salam* transactions may take either of two forms. Both forms involve deferred delivery of the object of the contract. The delivery date must be specified in the contract, indicating that the object will be delivered at the promised date. The difference between them is in the exact payment terms. First, a *bay' al-salam* (spot sale) contract requires immediate payment of the full purchase price. That is, the buyer pays the entire price to the seller of the good upon finalization of the contract. Second, a *bay' al-mu'ajjal* (deferred delivery) contract requires immediate payment, but not of the full purchase price. The buyer pays either in a lump sum at a contractually-identified later date (but one that is

<sup>3</sup> Note the Bahrain Monetary Agency (BMA) was a pioneer of *salam shukuk*. The BMA advocated a transactional structure in which an SPM would issue certificates to investors, and use the proceeds from the issuance to purchase a commodity through a *salam* contract. The SPM was never intended as the ultimate beneficiary of the commodity. Rather, that beneficiary (such as an oil refinery in respect of crude oil) agreed, after the *salam* contract was arranged, to buy the commodity from the SPM on the date of delivery set in the *salam* contract. Investors in the *salam shukuk* would receive an amount based on the agreed cost of financing the purchase of the commodity. See IQBAL & MIRAKHOR, *supra*, at 184-185.

still before the delivery of the good), or pays in installments according to a schedule prescribed in the contract.

*Salam shukuk* are commonly floated financial instruments. In part, their popularity stems from the fact that many commodities are not readily available, or cannot be made so without financial capital, at the time a buyer and seller reach an agreement. As indicated above, the buyer needs financing to afford the commodity. Conversely, the seller needs payment from the buyer in order to produce, refine, and deliver the object of the contract. Investors in the *salam shukuk* effectively finance the needs of the buyer and seller on the underlying *salam* contract. In return for doing so, the certificate holders become joint partial owners in the underlying arrangement, and remain as such until the buyer has paid off their investment in the arrangement.

To comply with the *Shari'a*, *salam shukuk* must meet two basic conditions. First, the underlying *salam* contract or contracts must be consistent with Islamic Contract Law. It would be unlawful, for instance, for the contracts to call for delivery of a forbidden (*harām*) product, such as alcohol, pork, or pornographic materials.

Second, there is no secondary market for *salam shukuk*. It is not permissible for an investor to sell, negotiate, or otherwise transfer the certificates to any other party until the good that is the object of the *salam* contract has been delivered by the seller in that contract to the buyer. (Conversely, it is unlawful for a prospective buyer to purchase a *salam shukuk* before the delivery of the good.) One explanation is that a *salam* contract embodies a debt, namely, the debt of the seller to deliver the object of the contract. The *salam shukuk* are rather remote, i.e., delinked from, the risk-return ratio associated with this underlying object. Instead, the certificates are akin to a debt security. Allowing trading in *salam shukuk* could introduce an incentive to indulge in *ribā* in the debt of the seller to the buyer to deliver the good.<sup>4</sup>

Perhaps a clearer and more cogent reason there is no secondary market concerns ownership. It is generally forbidden (*harām*) to sell an object one does not own. That is the heart of the rationale against short-selling. *Salam shukuk* certificates represent ownership interests. But, if the underlying object of a *salam* contract has not been delivered, then the investor does not own anything until delivery. Selling the *salam shukuk* would be tantamount to the investor selling a thing the investor does not yet own.

As a related matter, it would be improper to sell the certificates not only before the good (e.g., cars, the purchase of which is financed by the IPO of the *salam shukuk* is delivered to the buyer (e.g., a car dealer), but also after the buyer itself starts to use or re-sell the good (e.g., the dealer re-sells the cars to retail buyers). Only in the brief period (if there is one) between the time the buyer takes delivery of the good and re-sells the good is there a window in which to engage in secondary market trading of the *salam shukuk*. In sum, investors in *salam shukuk* — unlike any

<sup>4</sup> See Iqbal & Mirakhor, *supra*, at 184. This rationale remains unclear, yet apparently no better one is readily available.

other type of Islamic bond investors — have to hold their instruments until they mature.

### (3) *Istisnā'* *Shukuk* (certificates in manufacturing)

*Istisnā'* *shukuk* are issued on the basis of proceeds from the manufacture of one or more products. *Istisnā'* *shukuk* holders have an ownership interest in the product that is being manufactured. For that interest, they pay a price, namely, the IPO price of the certificates. The revenues generated by the IPO are channeled to the manufacturer, to finance production. Once production is complete, the manufacturer sells the product to a third party, or to the public, thus generating proceeds. These sale proceeds are passed through to the *istisnā'* *shukuk* investors to pay off their investment, with a return.

Secondary market trading in *istisnā'* *shukuk* runs contrary to the *Shari'a*. The certificates are backed by a debt-like instrument, namely, the underlying *istisnā'* contracts, not by a physical assets or financial rights. By their nature, those contracts are an inter-personal debt, namely, of the manufacturer to the purchaser of an item to be produced by the manufacturer. Hence, trading in *istisnā'* *shukuk* after their IPO would raise concerns about money-for-money transactions and *ribā*.

### (4) *Murābaḥa* *Shukuk* (certificates in a *murābaḥa* operation)

The purpose of issuing *murābaḥa shukuk* is to finance banks that engage in *murābaḥa* transactions with consumers. The basic idea of a *murābaḥa* arrangement is a deal with the prohibition on *ribā*. The arrangement is one of sale and repurchase, which has the economic effect of being a non-interest bearing loan, because the contract is one for resale plus a stated profit.

For example, a consumer seeks to buy a home or car, goes to her bank, which buys the home or car for her, and sells it to her. She repays the bank in installments both the price the bank paid to acquire the home or car, plus a return or profit for the bank. How does the bank finance its initial acquisition of the home or car? One funding mechanism is *murābaḥa shukuk*. A bank issues these certificates to investors, receiving from them the IPO price. The bank uses the revenues from the offering of certificates to buy the home or cars (or, in practice, many homes and cars). As and when the customer of the bank makes installment payments, a portion of those payments is passed through to the investors. Until the final payments are made, the investors are joint owners of the underlying home or car, along with the bank. Upon final payment from the customer, the customer takes full ownership of the home or car.

Secondary market trading in *murābaḥa shukuk* is considered contrary to Islamic Law, specifically, the rule against *ribā*. Plainly, the asset or pool underlying *murābaḥa* certificates are cost-plus pricing transactions, namely, a sale with a promise to repurchase. The asset (e.g., home) or consumer good (e.g., car) that is the subject of the *murābaḥa* arrangement is not what backs the *shukuk*. That asset or good serves as security for the bank for the arrangement it enters into with a borrower. If the borrower defaults on its installment payments, then the bank has ownership of the asset or good, and can sell the item to be made whole. As for the

certificate, it is backed by an inter-personal debt, or more accurately, the debt of a person to an institution: the promise of the borrower to repay the bank not only the initial cost of the item, but also the profit amount stated in the *murābahah* contract the borrower signed with the bank. The certificate holders expect to receive a portion of that profit. Thus, a *murābahah shukuk* is supported by the cash of the borrower, or its promise to make good on its indebtedness. Trading in such *shukuk* would amount to trading money-for-money, and potentially violate the rule against *ribā*.

#### (5) *Mushārakah Shukuk* (certificates in project finance)

*Mushārakah* certificates are *shukuk* issued to establish or finance a project. The project becomes the property of the holders of the *shukuk*. The underlying project is structured as a *mushārakah* contract, which is similar to a *muḍārabah* arrangement, with a key difference: both parties (lender and borrower) contribute funds to finance the project, and if the project loses money, then both parties suffer a loss in proportion to their investment contributions.<sup>5\*</sup>

The *Mushārakah* bonds are managed on the basis of either general *sharikah* (partnership), or through a *sharikah al-muḍārabah*. Thus, a *mushārakah* arrangement is not a distinct form of partnership under the *Sharī'a*. Rather, the arrangement covers any project, including major infrastructure development such as the construction of air and sea ports, bridges, dams, power stations, roads, sewage treatment facilities, and water supply. In non-Muslim finance, the well-known term analogous to *mushārakah* is "project finance."

Thus, the IPO proceeds from *mushārakah shukuk* fund the partnership (whatever its form) that is actively engaged in that project. The project, when complete, is expected to generate revenues, such as tolls from a bridge, user fees from ports, and tariffs for power and water. Those revenues are passed through to the certificate investors. When the investors are all paid off, in terms of both their initial investment and a margin (such as sharing in some of the revenues from the project), then ownership of the project transfers from the investors to the partnership. Until then, the *shukuk* holders are joint owners, with the partnership, of the project. After full payment, the *shukuk* are retired.

#### (6) *Muḍārabah Shukuk* (certificates in a *muḍārabah* partnership)

*Muḍārabah shukuk* are also sometimes referred to as "*muḍāradah*" bonds. That is because Islamic legal scholars (*fukahā*) from the Ancient Schools of Mecca and Medina, along with the *Mālikī* School (the second oldest of the *Sunni* Schools, and an outgrowth of these Ancient Schools, founded by *Imām Mālik*, who came from Medina) eschew the term "*muḍārabah*."

Regardless of the appellation, in this type of *shukuk*, capital is provided by the *rabb al-māl*, i.e., the investor(s), commonly referred to as the sleeping partner(s). In exchange for contributing funds, the *rabb al-māl* receive *muḍārabah*

certificates. Consequently, the *rabb al-māl* are bond holders, or more accurately, certificate holders.

Conversely, the issuer of the certificates is (are) the working partner(s) (*muḍārib*). In effect, the *muḍārib* is an entrepreneur seeking capital for a particular project. In that respect, *muḍārabah shukuk* are analogous to a conventional, non-Muslim revenue bond. Such a bond is designed to finance a specific project, and it is backed only by revenues expected to be generated from the project upon completion.

Note an alternative structure also is possible. The issuer could be a third party that appoints a *muḍārib*, that is, workers, to manage the partnership. Under either structure, it is critical to appreciate that the investors (*rabb al-māl*) have no recourse to the *muḍārib*. That is, absent fraud, the entrepreneur is not personally liable to them if the project fails to generate revenue.

The same rules and requirements of *sharikah al-muḍārabah* apply to a *muḍārabah* partnership that backs this type of *shukuk*. The funding obtained by the *muḍārib* from the issuance of *shukuk* is put to use in the *muḍārabah* partnership. If and when profits are earned by the partnership, then the certificate holders receive a portion of them. When the venture is terminated, the partnership assets are sold, the proceeds used to pay off the certificate holders, and the *shukuk* retired.

#### (7) *Muzāra'ah Shukuk* (sharing cropping certificates)

*Muzāra'ah shukuk* are issued for the use of financing a project organized under the *Sharī'a* as a *muzāra'ah* association, that is, an agricultural sharecropping venture. The holder(s) of the certificates become partners in the farming enterprise. Typically, they would be the owners of a parcel of farm land. Practically speaking, that means the landowner — certificate holders have the right to a share of the crops from the land, as well as rights as joint owners of that land.

As for the tenant farmer who work the land, she use proceeds from the issuance of the *shukuk* to finance planting, growing, fertilizing, and harvesting operations, or other complementary farm activities. When the maturity date of the *muzāra'ah shukuk* arrives, the certificates are retired. The *muzāra'ah* arrangement that underlies the issuance of *muzāra'ah shukuk* is governed by the usual rules as any *sharikah al-muzāra'ah*.

Note that in certain *muzāra'ah shukuk*, the holders of the certificates do not own the land that is the subject of the sharecropping arrangement. In such cases, secondary market trading of the *muzāra'ah shukuk* is considered incompatible with Islamic Law. As per the ruling of the OIC *Fiqh* Council (quoted above), the certificates are backed not by a majority or hard assets, namely, real estate. Rather, the certificates are backed by the promise of the tenant farmer(s) to repay the indebtedness through the sharecropping arrangement. That is, the *shukuk* are debt-like instruments. Secondary market trading of them would amount to trading money-for-money, thus raising concerns about *ribā*.

\* See BRIAN KETTEL, FREQUENTLY ASKED QUESTIONS IN ISLAMIC FINANCE 71 (Chichester, West Sussex, United Kingdom: Wiley, 2010).

(8) *Musāqāh Shukuk* (irrigation certificates)

*Musāqāh shukuk* are certificates issued to raise funds for an irrigation project. The same conditions of *sharikah al-musāqāh* apply here. The purpose of this type is to finance in the project of watering farms. Partners in the underlying *musāqāh* arrangement — namely, the owner of agricultural property to be irrigated, and the worker(s) who provide(s) irrigation goods and services — receive shares of the outcome. They anticipate that outcome is an increased quantity and quality yield from the irrigated farm land. Upon maturity of the *shukuk*, the investors are paid off and the certificates retired.

Note that in certain *musāqāh shukuk*, holders of the certificates do not own the land that is the subject of the irrigation project. In such cases, secondary market trading of the *musāqāh shukuk* is incompatible with Islamic Law. Pursuant to the ruling of the OIC Fiqh Council (quoted above), the certificates are backed not by a majority or hard assets, namely, real estate. Rather, the certificates are backed by the promise of the tenant farmer(s) to repay the indebtedness through the yield from the irrigation project. Accordingly, the *shukuk* are debt-like instruments. Secondary market trading of them would amount to trading money-for-money, thus raising concerns about *ribā*.

(9) *Mughārasa Shukuk* (agricultural seed planting certificates)

*Mughārasa shukuk* are certificates issued to finance the planting of trees or other farm-related products. That planting is done on the basis of a type of contract known as "*mughārasa*." This kind of contract is one for planting, but specifically of agricultural commodities. This specification does not mean the subject matter of the contract need be narrow. Any kind of lawful crop may be the subject of a *mughārasa* contract. Obvious examples are cotton, dates, oranges, and wheat. A less obvious example might be seeding a large tract of land for trees that later will be used for timber, and milled into lumber for construction purposes. Arguably, aquaculture (i.e., harvesting certain kinds of fish for consumption) might qualify.

The issuer of *mughārasa shukuk* is the owner (or owners) of land that is the subject of a *mughārasa* contract. The purpose of the issuance is for the owner to finance planting operations under that contract. The investors — the *shukuk* holders — become partners with the landowner in the venture. Their certificates represent a joint ownership stake in the items planted, and also in the land on which those items are planted. The underlying *mughārasa* contract lays out their rights and duties as joint owners. Investors in the certificates receive a share of the profits from the revenues resulting from the agricultural products, the seeding of which their initial investments funded. Upon maturity of the *shukuk*, the investors are paid off and the certificates retired.

## § 30.02 INNOVATIONS AND CHALLENGES FOR PRIVATELY-ISSUED *SHUKUK*

The list above of nine types of Islamic bonds is not exclusive. Through the ingenuity of financial professionals, new, *Shari'a* compliant *shukuk* are being, and will continue to be, developed to suit changing market needs. Indeed, failure to innovate

likely would lead to the decline of Islamic finance, either in absolute terms or in comparison with conventional non-Muslim finance.

One example of new Islamic financial technology is noteworthy. It spotlights a difference of opinion among *Shari'a* scholars in the Far East and Middle East, and thereby points to an observation made later on — the attractions of Kuala Lumpur, Malaysia as an Islamic financial center:

*Shukuk* based on *Bai' Bithaman Ajil* (BBA) is an innovation of the Malaysian market. The contract is based on a sale of an asset to the investors, with a promise by the issuer to buy the asset back in the future at a pre-determined price, which includes a margin of profit as well. Therefore, the issuer gets immediate cash against the promise to buy back at the purchase price, plus a pre-agreed profit, which creates an obligation to be released over an agreed period. The issuer issues securities (*shukuk*) to the investors to reflect this financing arrangement. Investors expect to earn a return equal to the pre-agreed profit.

This structure is not very popular with the Middle Eastern investors, because of a debatable *Shari'a* issue, which does not accept [*sic*] the tradability of debt created through [the] BBA arrangement. In addition, some BBA issuances in Malaysian markets are based on financial assets — an objectionable practice in the eyes of *Shari'a* scholars in the Middle East.<sup>6</sup>

The international disagreement is healthy. Innovation in finance comes not from self-satisfied complacency and lazy acceptance, but rather from non-violent struggle and reasoned argument. That is true whether or not the drive for profit is subordinated to religious and moral doctrine.

There are still other illustrations of new technology in respect of *shukuk*. For instance, Islamic bonds may be backed by agreements that create the right of one or more parties to use an existing or described future asset, the services of a particular party, or of specified services to be provided in the future. The certificates could represent an ownership interest in the right to use a current or soon-to-be-built scientific laboratory, the performances of a famous singer, or even satellite launch facilities.

To achieve continued growth through innovation requires addressing certain challenges that the market for *shukuk*, both private and sovereign, face. One problem discussed at the outset is the lack of secondary market trading for certain kinds of Islamic bonds. A corollary issue is that where secondary market trading does exist, the values and volumes are thin. That is, for *shukuk* for which secondary market trading is permissible, the activity level is not robust. Prospective investors like to see a highly liquid secondary market for a financial instrument they are considering buying. That is, they prefer an instrument for which there is strong secondary market demand. For some *shukuk*, however, demand is weak. Consequently, the spread between bid and ask prices (i.e., what buyers offer to pay, and what sellers ask as payment) is large. The weakness in demand is due to a number of factors, one

<sup>6</sup> Iqbal & Mirakhor, *supra*, at 184.

of which may be low levels of supply. In other words, by increasing the supply of Islamic bonds, investors may be persuaded they can be traded easily in a broad, deep retail market.

A second problem concerns the inchoate asset securitization market in many Muslim countries. In the discussion above, frequent reference is made to an asset or pool of assets that underlie an issuance of Islamic bonds. In reality, most offerings (up to at least 2007) have been backed by a single real asset, not a large pool of assets. That practice is adequate for a large issuer, such as a large business association or a government. But, it is ill-suited for small and medium-sized enterprises (SMEs), including some banks, which simply do not own or have access to a single large asset. They would like to raise capital on a small or medium-sized scale, but the assets they have to back a bond offering may be not large enough to make a *shukuk* transaction financially viable. For them, the solution is asset securitization. They need to be able to sell assets on their balance sheet to entities willing to re-package and pool their assets with other like assets. Yet, securitization among Islamic banks has not occurred to a significant degree. In other words, modestly-sized Islamic banks need to engage to a greater extent in asset securitization so that they can remove assets from their balance sheet, and thereby enhance the liquidity of their portfolios.

A third problem concerns the pricing of *shukuk*. From the perspective of a business association or sovereign entity seeking funding, a bottom-line question is cost: how much will the issuer have to pay investors to get their funds? With conventional non-Muslim bonds, the answer is the interest rate, and the higher that rate, the higher the cost of funds. With Islamic bonds, the answer is cast in terms of sharing in a stream of collateralized cash flows, i.e., profit sharing in respect of revenues generated by the underlying asset or pool. From the perspective of investors, the bottom-line question involves a risk-return trade off: how much of a return is required in relation to the risk associated with holding the bond? The intersection point of the issuer and investor interests is, in effect, the equilibrium, market-clearing agreement between the two sides.

Conventional non-Muslim bonds are priced in relation to a risk-free rate, which is the rate associated with United States Treasury securities. That is, the cost of funding to issuers, and the returns to investors, are gauged against an instrument that is seen as having no serious credit or other risks, because of the full faith and credit backing of the American government. Sometimes, the funding costs and returns are measured against a widely-quoted market interest rate. One such rate is the Fed Funds rate, which is the interest rate banks charge to other banks for loans, i.e., it is an inter-bank rate in the United States, specifically on short-term, usually overnight, loans of balances, called "federal funds," which depository institutions hold in accounts at their local Federal Reserve Bank. Another such rate is LIBOR, the interest rate in the London wholesale (i.e., inter-bank) dollar market. LIBOR is comparable to the Fed Funds rate, but pertains to offshore dollar-denominated unsecured loans between banks. Still another such rate is EURIBOR, the Euro Inter-Bank Offered Rate, which is a wholesale rate for unsecured euro loans between banks. The Fed Funds rate, LIBOR, and EURIBOR are quoted daily.

Thus, a conventional, non-Muslim bond may be said to offer an interest rate of "200 basis points above LIBOR." Each basis point is one-one hundredth of a percent (0.01 percent). Thus, this statement means the bond pays 2 percent above LIBOR. This statement may pertain to the fixed (coupon) rate, if the bond pays such a rate. Alternatively, if the bond offers a floating rate, then the statement may refer to that rate, which varies inversely with the price of the bond.

Islamic bonds, too, are measured against the same indexes of market interest rates. For example, issuers ask how much above LIBOR it will cost them to float an offering of *shukuk*. Prospective investors ask how much they will obtain above LIBOR from buying the *shukuk*. These questions do not imply the *shukuk* pay an interest rate — manifestly, as *Shari'a* compliant instruments, they do not. Rather, these questions indicate the bottom-line trade-offs that issuers and investors — be they Muslim or non-Muslim — must consider when making hard financial choices.

Generally speaking, conventional non-Muslim bonds and *shukuk* have been competitive with one another in terms of pricing. Stated differently, the spreads — the return they offer vis-à-vis an appropriate index — are relatively similar. Given that markets for conventional, non-Muslim bonds are more liquid than those for *shukuk*, that competitiveness is an accomplishment for Islamic bonds. The challenge for Islamic bonds is to continue to be competitive in this respect, without losing their distinctive character as instruments that comport with a religious and moral paradigm. Doing so will require greater transparency among market participants and governmental authorities, and greater efficiency and reduced transactions costs in securities markets. In turn, transparency and efficiency are hallmarks of the rule of law, thus its advancement is essential if Islamic bonds are to flourish in a globally competitive environment.

### § 30.03 RISKS ASSOCIATED WITH *SHUKUK*

#### [A] Distinction Between "Asset-Backed" and "Asset-Based"

Any *shukuk* offering is structured to avoid the Islamic prohibition on interest (*riba*). Prospective investors should not be lulled into complacency that because the offering comports with the *Shari'a*, they are free of uncertainty. Ethical satisfaction does not mean financial risk minimization.

Of great importance in the *shukuk* market is the distinction between an "asset-backed" versus and "asset-based" security. The former category implies that the participation certificates reflect an ownership interest in "hard" assets that underlie the *shukuk*. The latter category means that the certificates embody an ownership interest in the cash flows generated by the underlying assets, but not the assets themselves. In other words, asset-backed *shukuk* are collateralized with property, but asset-based *shukuk* are collateralized with the income stream from property.<sup>7</sup> The key consequence occurs in the event of a default: holders of an asset-backed *shukuk* can lay claim on specific assets that have been pooled in a

<sup>7</sup> As many as 90 percent of *shukuk* are not collateralized by real property. See *Shukuk It Up*, TUE ECONOMIST, 17 April 2010, at 82-83 (quoting Anouar Hassoune of Moody's: "Many *shukuk* holders have a

special purpose vehicle (such as a special purpose *muḍārabah*), whereas holders of an asset-based *shukuk* cannot do so.

This distinction became apparent, and internationally renowned, in the fall 2009, when \$24 billion of *shukuk* issued by Dubai World and its subsidiary, Nakheel, a troubled property developer in Dubai, United Arab Emirates (UAE) required restructuring. Dubai World and Nakheel had run up too much debt, and could not make payments on schedule to holders of its *shukuk*. Ultimately, Abu Dhabi stepped in to shore up damaged investor confidence, and a restructuring deal, without a UAE government bailout, was agreed to in March 2010. The episode taught investors the Nakheel *shukuk* did not represent ownership claims on real property in Dubai, but rather on cash flows from income generated by that property. With the global economic downturn, that income flow was a trickle. The certificates were asset-based, not asset-backed. Had there been a default, creditors (i.e., *shukuk* investors) could not have looked for relief to specific underlying assets, which in any event declined in value with the Dubai property market crash.

### [B] Credit Risk

With an asset-based *shukuk*, property underlying the certificates is not truly sold to the special purpose vehicle created for the transaction. Rather, the assets remain on the balance sheet of the issuer, such as Nakheel. Hence, prospective investors ought to scrutinize the balance sheet (and income statement) of the issuer. After all, should they decide to invest in the *shukuk*, they take on three credit risks:

- First, the risk that the underlying assets might not generate income for them.
- Second, the risk that the assets themselves are or turn sour.
- Third, the risk that the issuer might default on the certificates.

Consequently, prospective investors ought to demand clarity and transparency from the issuer.

In particular, prospective investors must engage in due diligence to uncover who owns what assets, the quality of those assets and reliability of income streams from them, and what they can look to in the event of default to get repaid. The need for them to do so was apparent not only in the Nakheel *shukuk* case, but also in two other instances, which involved actual defaults in 2009-2010: *shukuk* issued by East Cameron Partners, an American oil and gas producer, and Saad Group, a Saudi conglomerate.<sup>8</sup> East Cameron was a poor credit risk, with a CCC+ rating when it issued *shukuk*, and Saad Group was alleged to have engaged in fraud.

perception that they hold a security that is collateralized. In 90% of cases, that is incorrect.”). [Hereinafter, *Shukuk It Up*.]

<sup>8</sup> See *Shukuk It Up*, *supra*.

### [C] Legal Risk

Questions about credit risk intimate another risk investors in any *shukuk* offering (whether asset-based or asset-backed) take on: legal risk. “Legal risk” is the uncertainty created by rules potentially applicable to a transaction, or the lack of such rules. In practice, many *shukuk* deals are governed by the law of England. That is not a surprise, given the well-developed commercial laws of that country and the premiere international financial status of London. Yet, the assets backing or basing *shukuk* are located outside England, such as in Persian Gulf countries. If a default occurs, and a case is brought in English court, how can investors be sure that any judgment in their favor will be enforced in a foreign jurisdiction?

Of course, this problem is not unique to *shukuk*. Rather, it arises whenever there is a divergence between the country whose law is chosen to govern a security and the country in which assets related to that security are located. In other words, as *The Economist* rightly stated: “Enforceability is an issue in any cross-border transaction.”<sup>9</sup>

### [D] *Shari’a* Risk

Still another risk demanding the attention of prospective *shukuk* investors, which is peculiar to Islamic finance, is dubbed “*Shari’a* risk.” It is the uncertainty that an issuer will not make timely payments to *shukuk* holders on the ground that the transaction is not truly compliant with the *Shari’a*. This matter ought to be one sorted out well in advance of a public offering of certificates. It seems disingenuous of an issuer to argue later on that it lacks the legal capacity to perform its obligations because, in retrospect, the transaction offends Islamic Law.

Nevertheless, this argument was made by Investment Dar, a Kuwaiti investment firm that defaulted on *shukuk* it issued in 2010, principally because it was too dependent on short-term debt for funding its operations.<sup>10</sup> Note that while the epithet “*Shari’a* risk” obviously arises in an Islamic context, the possibility a counterparty will not carry through on its duties, invoking the argument it lacks legal capacity to do so, is a generic one, not unique to Islamic finance.

## § 30.04 SOVEREIGN *SHUKUK*

### [A] Need for Sovereign *Shukuk*

Official public bodies issue debt instruments to finance their operations. Famous examples in non-Muslim countries are the United States government, which issues three basic types of Treasury securities to finance the public deficit, namely, Treasury bills (T-bills), which are short-term instruments, generally with a maturity of less than one year; Treasury notes (T-notes), which are medium-term instruments, typically with a maturity of between two and five years; and Treasury bonds, which are long-term securities with a maturity in excess of 10 years, and as

<sup>9</sup> *Shukuk It Up*, *supra*.

<sup>10</sup> See *Shukuk It Up*, *supra*.

long as 30 years. American Treasuries are regarded by the international financial community as the safest investment vehicles in the world, a tribute to the relative strength of the American economic and political system, and the certainty and predictability afforded by the legal system. Thus, interest rates associated with Treasuries are known as the "risk free" rates. The United Kingdom, of course, is another well-known, highly-regarded issuer of bonds. Known as "gilts," Her Majesty's Treasury (HMT) routinely issues these securities to finance the public sector borrowing requirement (PSBR), *i.e.*, the British government deficit.

Muslim countries are no exception in terms of needing to finance gaps between tax revenues and government outlays. Debt certificates — *shukuk* — are an important tool for them to do so, and one that comports with the *Shari'a*. In fact:

The market for the *shukuk* was originated by government entities. Although the market is still dominated by the sovereign issues, gradually corporate [*i.e.*, business associations'] issues are also emerging. In terms of total amount outstanding, the current ratio (as of 2007) between sovereign and corporate *shukuk* is 3.5 to 1. With a growing market for *shukuk*, many conventional rating agencies, including Standard & Poors (S&P) and Fitch [*i.e.*, FitchRatings], have started to rate select issues. For example, S&P has now designed a methodology to rate *ijara*-based *shukuk*. In another positive development, Dow Jones has announced plans to constitute a *Shukuk* Index to monitor the performance of this market. [The Dow Jones Citigroup *Shukuk* Index was launched in Kuala Lumpur on 17 March 2006. It was the world's first Islamic bond index.] Another particularly encouraging sign in the *shukuk* market is that it is no longer the sole preserve of specialist Islamic issuers or investors. For example, 48% of a recent sovereign issue was subscribed for by conventional [non-Muslim] investors, including 24% by institutional investors, 11% by fund managers, and 13% by central banks and government institutions.<sup>11</sup>

Thus, for example, the governments of Bahrain, Kuwait, Malaysia, Pakistan, Qatar, and the United Arab Emirates (UAE) have issued *shukuk*, as has the Islamic Development Bank (IDB).<sup>12</sup> As the above passage implies, sovereign *shukuk* offerings helped advance the market for private businesses to float Islamic bonds.

As the above passage also suggests, sovereign issuers are not confined to governments of Muslim countries. Likewise, the investment banks that design, and the agencies that rate, sovereign *shukuk* offerings need not be Muslim. In June 2004, the Saxony — Anhalt State Properties of Germany raised €100 million through an IPO of *shukuk* with a 5-year tenor and spread of 1 percent over the EURIBOR index. Its advisors were CitiGroup and the Kuwait Finance House (KFH), and it had an AA rating from S&P and an AAA rating from Fitch. In April 2005, the World Bank issued U.S. \$760 million of *shukuk* with a 5-year maturity (and no defined spread against an index). Financial advisors to the World Bank were the CIMB Group (incorporated in Malaysia in 1974, and headquartered in Kuala Lumpur) and ABN Amro Bank Berhad (based in Kuala Lumpur, and which since late 2007 has been

part of the Royal Bank of Scotland Berhad).

With IPO and secondary market interest in *shukuk* among Muslims and non-Muslims alike, it should not be surprising that stock exchanges outside of Muslim countries list Islamic bonds. The first European stock exchange to list *shukuk* was the Luxembourg Stock Exchange. All major *shukuk* offerings are listed on this Exchange. As of September 2008, there were fourteen different *shukuk* listings on that Exchange, with a total market value of \$5.5 billion. In brief, the sovereign *shukuk* market is a truly an ecumenical one, which is fitting in an era of globalization.

Indonesia is a prominent example of a Muslim country using *shukuk* to finance its operations. In 2008, the Indonesian government passed Law Number 19, which recognizes sovereign *shukuk* as a lawful financial instrument. The previous law had defined a "bond" as a long-term debt security that paid interest to holders of that security. That definition did not work for *shukuk*. First, *shukuk* are not long-term debt instruments. Rather, they are certificates of participation. Second, because of the rule against *riba*, *shukuk* do not involve any interest.

Thus, Law Number 19 defined "sovereign *shukuk*" as an issuance by the state of commercial paper based on the *Shari'a*. That definition clearly implies the purpose of sovereign *shukuk* is to raise funds for the issuing government on a basis that complies with Islamic Law, and thereby involves sharing of profits, or provision of a fee or margin, to investors, as well as repayment of capital investments to them. Note that the reference to "commercial paper" is interesting, because in Wall Street parlance that term refers to short-term promises to pay (IOUs) issued by prime corporate borrowers, and the issuers attract investors by paying them interest on top of principal. Note, too, that in Indonesia, an *Ulema* Council exists. Its activities include the issuance of *fatwas*, *i.e.*, well-thought out rulings, on *Shari'a* topics, including issues pertaining to *shukuk*.

## (B) How Sovereign *Shukuk* Work

At bottom, every *shukuk* issuance involves certificates of participation against assets. In a sovereign *shukuk* deal, the underlying assets are state-owned assets that are engaged in certain kinds of transactions. The defining feature, therefore, of public *shukuk* is government ownership of the asset pool used to back the certificates. What kinds of transactions are permissible (*halal*)? That is, what are the activities in which state-owned assets backing a sovereign *shukuk* floatation may be engaged?

The answer is the same as the list that is permissible for private *shukuk* offerings. This list includes, but is not limited to, the following *halal* transactions:

- *Mudārabah*, *i.e.*, a profit-sharing partnership between a sleeping partner (*rabb al-māl*) and working partner(s) (*mudārib*), with profits generated by a project using state-owned assets, with the sleeping partner funding the project, and the working partners engage in the project through their work. For example, a government may issue *shukuk* to raise funds for its Ministry of Finance by establishing a social security trust fund. Note that in a sovereign *mudārabah shukuk* transaction, the issuer is the *mudārib*, and the bondholder(s) is (are) the *rabb al-māl*.

<sup>11</sup> Iqbal & Mirakhor, *supra*, at 185-186.

<sup>12</sup> See Iqbal & Mirakhor, *supra*, at 187-188, Table 8.1A, Sovereign *Shukuk*.

- *Mushārakah*, i.e., project finance whereby proceeds from an IPO of *shukuk* are used by a partnership to fund establishment or development of an infrastructure or other major public works project. For instance, a government may issue *mushārakah shukuk* to raise funds so that its Ministry of Transportation can upgrade a railway network.
- *Murābaḥah*, i.e., a sale and repurchase arrangement, which has the economic effect of being a non-interest bearing loan, because the contract is one for resale plus a stated profit. For example, a government may issue *murābaḥah shukuk* to raise funds for its Ministry of Housing, so that it may help citizens buy homes.
- *Salam*, i.e., deferred delivery contracts. For instance, a government may issue *shukuk* to raise funds for its Ministry of Energy to purchase a commodity such as oil or natural gas at a favorable price, with delivery six months hence. (In effect, the underlying transactions would be forward energy contracts.)
- *Istisnāʾ*, i.e., a contract for manufacturing one or more objects. For example, a government may issue *istisnāʾ shukuk* to raise funds for its Ministry of Commerce, which seeks to build a steel plant.
- *Ijārah*, i.e., a contract for the hiring or leasing of a good or service. For instance, in August 2008, the government of Indonesia issued sovereign *ijārah shukuk* with a ten-year tenor, maturing in August 2018. The yield on these *shukuk* (as of May 2009) was roughly 11 percent.

Thus, sovereign *shukuk* may be *muḍārabah shukuk*, *mushārakah shukuk*, *murābaḥah shukuk*, *salam shukuk*, *istisnāʾ shukuk*, or *ijārah shukuk*. Differences turn simply on how the underlying pool of state assets is put to use. Note, therefore, that state-owned assets may not be engaged in the production or distribution of immoral goods or services, such as non-*halal* foods or gambling, or conventional interest-bearing financial transactions.

Logistically, the basic transaction to create a sovereign *shukuk* of any of the aforementioned types is quite similar to that for a floatation of private *shukuk*. The differences are relatively minor, and pertain to the involvement of the government issuer and the pool of state-owned assets. Accordingly, the basic outline of steps is as follows:

- A government establishes a Special Purpose Vehicle (SPV).
- For an *ijārah shukuk*, the SPV purchases state assets from the government, thereby taking beneficial title to those assets. The SPV then hires or leases out the assets, collects rental income from the users of the hired or leased assets, and passes this income through to the holders of *shukuk* certificates.
- For all other types, the issuer government and SPV enter into a *muḍārabah* agreement. The issuer of the *shukuk*, which is the SPV (explained below), is the working partner (*muḍārib*), and the government is the sleeping partner (*rabb al-māl*). The state assets are the subject of the partnership, from which profits are generated and passed through by the SPV to investors in the *shukuk*.

- In the case of *muḍārabah shukuk*, there may be two levels of *muḍārabah* partnership. The first level is as explained above. The second level is a *muḍārabah* arrangement between the SPV as issuer and the investors as bondholders. The SPV is the working partner (*muḍārib*). The bondholders are the sleeping partners (*rabb al-māl*). The bondholders are entitled to receive a share of profits generated by the underlying assets.
- The government issues a purchase undertaking, whereby the government agrees to buy back the state-owned assets when the *shukuk* mature.
- The SPV issues *shukuk* to investors through an IPO, which may be listed on a prominent stock exchange, such as the Luxembourg Stock Exchange. Technically, then, from a legal perspective, it is the SPV that is the *shukuk* issuer. However, in common financial parlance it is said the government is the issuer, because it owns and operates the SPV.
- The IPO generates proceeds — the purchase price of the certificates — that the SPV passes through to the government. The government then uses those proceeds for the project that is the purpose of the *shukuk* floatation.
- The government leases the asset that underlies the *shukuk* from the SPV. Thus, the government pays rent to the SPV. This rental fee is distributed by the SPV to the *shukuk* holders.
- On the maturity date for the *shukuk*, the SPV sells back the underlying assets to the government. The government, of course, pays for the assets. The SPV passes through this payment to the investors, thereby paying off and retiring the certificates.

In sum, the design, issuance, and trading of sovereign *shukuk* are relatively straightforward, and closely akin to that of private *shukuk*. Functionally, sovereign *shukuk* serve the funding needs of governments, a role by no means limited to Muslim countries, and have an increasingly prominent profile in global financial markets.

## Chapter 31

### FINANCE (*TAMWEEL*): INSURANCE (*TAKAFUL*) AND MONEY TRANSFERS (*HAWĀ LAH*)

---

Religion is insurance in this world against fire in the next.

Anonymous.

#### SYNOPSIS

##### § 31.01 CONVENTIONAL NON-ISLAMIC INSURANCE PRODUCTS

- [A] Definition
- [B] Government Insurance Products
- [C] Private Insurance Products
- [D] Investment Products
- [E] Reinsurance

##### § 31.02 DEFINING “*TAKAFUL*”

##### § 31.03 HISTORIC TYPES OF *TAKAFUL*

##### § 31.04 MODERN *TAKAFUL* AND DEBATE ABOUT *GHARAR* (UNCERTAINTY) AND *RIBĀ* (INTEREST)

##### § 31.05 HOW MODERN *TAKAFUL* WORKS

##### § 31.06 *HAWĀ LAH* BANKING TRANSACTIONS

- [A] Definition of “*Hawālah*” and Sources for Permissibility (*Mubāh*)
- [B] Three Conditions
- [C] Hypothetical *Hawālah* Transactions
- [D] Law Enforcement Issues

##### § 31.01 CONVENTIONAL NON-ISLAMIC INSURANCE PRODUCTS

###### [A] Definition

At bottom, insurance is a mechanism to allocate risks among parties. Risk is inherent in any human endeavor.<sup>1</sup> Through the ages, insurance developed to transfer and distribute that risk. Thus, insurance companies arose to cover the risk of a party willing to make regular payment, which is most often the case, to

<sup>1</sup> See generally, PETER L. BERNSTEIN, *AGAINST THE GODS — THE REMARKABLE STORY OF RISK* (New York, New York: John Wiley & Sons, 1998) (chronicling the history of risk and risk management).

minimize or eliminate that risk. In brief, to buy insurance is to enter into "an agreement in which one party (the insurer), in exchange for a consideration provided by the other party (the insured), assumes the other party's risk and distributes it across a group of similarly situated persons, each of whose risk has been assumed in a similar transaction."<sup>2</sup>

To be sure, most, if not all, commercial contracts allocate risks between its parties in some manner. A simple contract of sale allocates risk between buyer and seller. A difficulty encountered from the outset is the definitional concern regarding what is "insurance." In *Jordan v. Group Health Associations* the United States Court of Appeals for the District of Columbia Circuit stated that a contract is an insurance contract, as distinct from a non-insurance commercial contract, if the principal object and purpose of it is the assumption and distribution of risk.<sup>3</sup> The rationale for its holding is:

[t]hat an incidental element of risk distribution or assumption may be present should not outweigh all other factors. If attention is focused only on that feature, the line between insurance or indemnity and other types of legal arrangement and economic function becomes faint, if not extinct.<sup>4</sup>

Though decided in 1939, *Jordan* still is a leading authority for determining what qualifies as an insurance contract.<sup>5</sup> More recently, in 1987 in *Griffin Systems v. Washburn*, the Illinois Court of Appeals articulated the four elements of an insurance contract:

(1) [A] contract between an insurer and insured that exists for a specific period of time, (2) an insurable interest possessed by the insured, (3) consideration in the form of a premium paid by the insured to the insurer, and (4) the assumption of risk by the insurer who agrees to indemnify the insured for potential loss resulting from specified perils.<sup>6</sup>

Yet, even the identification of these four elements has not settled the issue of whether a contract is an "insurance" contract in the United States.

A significant complicating factor is bifurcated regulation of the insurance industry between the federal government and the states. In *United States v. South-Eastern Underwriters Association*, the United States Supreme Court "held that insurance transactions were subject to federal regulation under the Commerce Clause,"<sup>7</sup> and thus within the sole purview of the federal government. Fear of a patchwork of regulation animates such a holding. But, insurance companies actually prefer the established — and lax — regulation of their industry by state

authorities.<sup>8</sup> The *McCarran-Ferguson Act* was passed in the wake of the *South-Eastern Underwriters* decision.<sup>9</sup> This *Act* gives states explicit, almost exclusive authority to regulate the business of insurance.<sup>10</sup> Thus, when litigation occurs in which the definition of "insurance" is relevant, states have latitude to define the term in the manner their legislatures and courts see fit.

## [B] Government Insurance Products

Government and private entities provide insurance coverage. The vast majority of insurance policies are privately issued. But, a prominent area of coverage by many developed country governments is health insurance.

In the United States, Medicare is available to Social Security recipients who are over 65 years of age or are disabled.<sup>11</sup> A portion of income tax paid by American citizens and residents funds this program. Medicaid also, in effect, insures health of low-income persons, though it is not technically an insurance plan.<sup>12</sup> Other United States government insurance programs cover crop insurance,<sup>13</sup> flood insurance,<sup>14</sup> bank deposit insurance,<sup>15</sup> loan and mortgage insurance,<sup>16</sup> insurance for damage caused by nuclear power-generation accidents,<sup>17</sup> insurance against political risk for businesses exporting goods overseas,<sup>18</sup> insurance against expropriation by a foreign government of American-owned assets held overseas,<sup>19</sup> and crime insurance for urban property owners unable to obtain affordable coverage.<sup>20</sup> Many of these public insurance schemes have undergone considerable revisions — particularly health care — in recent years.

<sup>8</sup> JERRY, *supra*, at 57.

<sup>9</sup> 15 U.S.C. §§ 1011 et seq. (cited in JERRY, *supra*, at 57).

<sup>10</sup> 15 U.S.C. §§ 1011 et seq. (cited in ROBERT H. JERRY, II, *UNDERSTANDING INSURANCE LAW* 57 (2d ed., 1996)). Section 1 of this *Act* states that "Congress declares that the continued regulation and taxation by the several States of the business of insurance is in the public interest, and that silence on the part of the Congress shall not be construed to impose any barrier to the regulation or taxation of such business by the several States."

### [C] Private Insurance Products

Though states have the latitude to define insurance in different ways, the actual, as opposed to potential, differences in definition are not great. The National Association of Insurance Commissioners has developed the Uniform Product Coding Matrix ("UPCM") to categorize insurance products. This schema applies to non-Muslim insurance products. It is vital to understanding the insurance industry and products offered, because insurance rates and policy forms are based upon the UPCM template.<sup>21</sup> Broadly, an insurance product first is classified into property or casualty products, or into life, accident or health products.<sup>22</sup> Table 31-1 further explains the UPCM.<sup>23</sup>

Table 31-1:  
Categories of Non-Muslim Insurance

Category of Insurance	Description
Property or Casualty	Coverage against loss or damage to property and liabilities to third parties resulting from such loss, damage, or other event
Life, Accident, Health, Annuity, and Credit	Continuing Care Retirement Community
	Credit Insurance
	Health Insurance
	Health Maintenance Organization
	Life Insurance
	Long-Term Care Insurance
	Medicare Supplement
	Multiline
	Viatical Settlements

Even the UPCM template does not capture all insurance policies offered in the non-Muslim world. Many policies contain significant components that fit into more than one of the above-listed categories. Table 31-2 sets out the most common such

policies.<sup>24</sup> Moreover, in its economically rational profit-seeking behavior, the insurance industry is creative. It offers an array of vehicles against nearly any risk imaginable.

Table 31-2:  
Common Forms of Non-Muslim Life Insurance Products

Product	Description
Accident	Coverage for death, dismemberment, disability, or hospital and medical care caused by or necessitated as a result of specified accidents
Credit Disability	Makes monthly loan/credit transaction payments to the creditor upon disablement of an insured debtor
Credit Life	Coverage sold in connection with loan and credit transactions to provide protection against death
Credit Insurance	Coverage of an obligation to a creditor upon the death or disablement of the insured debtor; includes coverage to protect the value of collateral for a loan
Disability Income	Coverage to compensate an insured individual for a portion of the income he or she loses because of a disabling injury or illness
Employee Benefit Liability	Liability protection for employers against employee claims such as wrongful termination or improper calculation of employee benefits from pension plans, group life, health, or disability income insurance, or accidental death and dismemberment insurance
Employers Liability	Coverage for the legal liability of employers arising out of injury to employees
Workers' Compensation	Coverage for an employer's liability for injuries, disability, or death to a person in the scope of his or her employment, without regard to fault, as prescribed by state or federal workers' compensation laws or other statutes

### [D] Investment Products

Insurance products containing an investment product and attendant risk require further attention. That is because an additional level of regulation may be needed. Some insurance products include an annuity, variable annuity, or an equity-indexed annuity. If the policy includes only an annuity, then there is not typically any investment risk, except perhaps a currency risk, because a series payments are guaranteed for a fixed term or until the death of the policyholder.<sup>25</sup> No further regulation or oversight is needed, as the investment risk is minimal.

But, if the policy contains a variable annuity — that is, an annuity based upon the performance of certain investments — then a policyholder has a substantial investment risk. As such, the United States Securities and Exchange Commission

<sup>21</sup> See 2006 GAO Report, *supra*, at 3.

<sup>22</sup> See 2006 GAO Report, *supra*, at 3.

<sup>23</sup> See 2006 GAO Report, *supra*, at 25.

<sup>24</sup> This Table is adapted from 2006 GAO Report, *supra*, at 42.

<sup>25</sup> See 2006 GAO Report, *supra*, at 36.

(SEC), plus some states, regulate this product as a "security."<sup>26</sup> If a policy includes an equity-indexed annuity pegged to, for instance, the Standard & Poors (S&P) 500, then that policy also may be further regulated, if it qualifies as a "security."<sup>27</sup> Often, these policies are less likely to be considered securities than ones containing a variable annuity. That is because policyholders incur less investment risk, as the contract for this policy usually guarantees at least a minimum return.<sup>28</sup>

A finite risk contract typically "transfer[s] less insurance risk than traditional reinsurance or insurance."<sup>29</sup> The subject of these contracts are almost always financial in nature "allow[ing] the insured to transfer to a reinsurer or insurer both insurance risk and uncertainties about the timing of certain cash flows and recognition of certain income and expenses."<sup>30</sup> The difficulty with these sorts of contracts is to determine whether risk is sufficiently transferred in order to legitimately impact the insured's financial health in a manner regulators find appropriate.

### [E] Reinsurance

In the past 30 years, reinsurance has become an increasingly prominent feature of the global insurance industry. Essentially, reinsurance is insurance for insurance companies. Reinsurance offsets risk to a primary insurer from potential liability associated with insurance policies the primary insurer has issued. Thus, an insurance company, the primary insurer, which previously issued a bundle of individual policies, collectively insures these policies with another insurance company, the reinsurer.<sup>31</sup>

Why does an insurance company choose to get reinsurance, especially if an insurance company is supposed to be an expert at appraising and pricing risk? The answer is protection, as is the case with any insurance policy. For instance, consider a primary insurance company that sells flood insurance policies to property owners in the Mississippi River Delta. The policies have common features, and the primary insurer can bundle them. The primary insurer is concerned about its potential liability to pay out on the policies if there is a catastrophic flood. This flood scenario may be a low-probability event. But, the risk to the primary insurer is that if this once-in-a-century event occurs, it may be hard-pressed to meet all the claims. The primary insurer might go bankrupt. Thus, the primary insurer purchases an insurance policy — reinsurance — for the bundled flood insurance policies it has issued. If the dreadful scenario occurs, it can call on its reinsurance as a source of funds to pay off underlying claimants.

<sup>26</sup> See 2006 GAO Report, *supra*, at 36.

<sup>27</sup> See 2006 GAO Report, *supra*, at 36.

<sup>28</sup> See 2006 GAO Report, *supra*, at 36.

<sup>29</sup> See 2006 GAO Report, *supra*, at 7.

<sup>30</sup> See 2006 GAO Report, *supra*, at 7.

<sup>31</sup> See JERRY, *supra*, at 897.

Reinsurance is not sold as a standard product.<sup>32</sup> Rather, each contract is separately negotiated. There are two sorts of reinsurance contracts: treaty and facultative:

In a treaty reinsurance contract, the reinsurer and insurer agree on which select class(es) of underlying policies of the insurer's to underwrite. In a facultative reinsurance contract, the reinsurer and insurer agree on individual underlying policies.<sup>33</sup>

While the transfer of risk is the main objective of any reinsurance contract, there is an ancillary benefit. Subject to statutory and industry regulation, a primary insurer may account for that transfer in financial statements (e.g., annual and quarterly reports, and regulatory filings), to its substantial business advantage.<sup>34</sup>

### § 31.02 DEFINING "TAKAFUL"

"*Takaful*" is an important institution in the *Shari'a*, with roots in the pre-Islamic era. Tribes on the Arabian Peninsula in the pre-Islamic period, or "*al jahiliyyah*," and after the birth of the Islamic faith, lived in a tight community. Each tribe was responsible for covering damages caused by any one of its members to any member of that or another tribe, if the harm-causing member lacked the resources to pay off the debt. The tribe provided insurance, in a financial sense, for a liable member of scarce resources.

"*Takaful*" refers to Islamic insurance. Such insurance is based on mutual guarantee and mutual responsibility. The literal meaning of "*takaful*" is "joint guarantee" or "joint responsibility." From this literal definition, the legal definition emerges:

[*Takaful* is an] [i]nsurance contract through mutual or joint guarantee.<sup>35</sup>

Essentially, then, "*takaful*" is the Arabic term for the modern American legal and financial concept of insurance, but suffused with Islamic precepts about community. The term is generic, covering all types of modern insurance contracts, such as life, health, property, and casualty.

### § 31.03 HISTORIC TYPES OF TAKAFUL

In early Islamic history, four kinds of *takaful* existed: *'aqila*, *'okd muwalat*, *daman khatr al-tariq*, and *hily*. There is one key difference between these historical categories and modern types of *takaful*? Historically, a member of a community or tribe was not required to make a monthly payment to be covered by the insurance policy. Today, a premium is demanded of an insured party in modern, but not early, times.

<sup>32</sup> See 2006 GAO Report, *supra*, at 5.

<sup>33</sup> 2006 GAO Report, *supra*, at 5.

<sup>34</sup> See 2006 GAO Report, *supra*, at 6.

<sup>35</sup> ZAMIR IQBAL & ABBAS MIRAKHOR, AN INTRODUCTION TO ISLAMIC FINANCE THEORY AND PRACTICE IN GLOSSARY xiii (Singapore: John Wiley & Sons (Asia) Pte Ltd, 2007). [Hereinafter, Iqbal & Mirakhor.]

- 'Aqila (tribal aid after wrongful killing)

"Aqila" refers to tribal aid after a wrongful killing. Payment by a tribe of blood money (*diyyah*) in a case of manslaughter is a species of *takaful*, namely, insurance for the perpetrator. The policy insures only what in modern Penal Law is classified as manslaughter. Šālih Al-Fawzān, Professor of Islamic Jurisprudence at Imām Muhammad ibn Saud University in Riyadh, Saudi Arabia, explains:

If the murder is intentionally committed, the *diyyah* is to be paid from the killer's own money, as the original rule states that the compensation for an offense is obligatory to be paid by the offender. In this regard, Al-Muwaffaq Ibn Qudāmah [a leading *Hanbali* scholar who pioneered comparative law among the Four Schools] said:

Muslim scholars unanimously [i.e., all Four Schools] agree that the *diyyah* for premeditated murder is obligatory to be taken from the murderer's wealth according to the original rule, not to be paid by the perpetrator's agnate relatives [i.e., relations on the father's side]. Allah, Exalted be He, says "... And no bearer of burdens will bear the burden of another ..." (Qur'ān: *Al-An'ām*:164 [Livestock, 6:164].)

However, this original rule — that the *diyyah* is to be paid from the perpetrator's own money — is inapplicable in the case of manslaughter. This is because cases of manslaughter recurrently happen and the amount of *diyyah* for killing a human being is very large. Thus, it would be unfair if the offender had to pay it alone. Therefore, wisdom necessitates that such a large amount of *diyyah* is to be paid by the offender's agnate relatives as a means of helping and supporting the offender and a way of relieving him as his case is excusable. However, in the case of premeditated murder, the murderer has no excuse for his crime, so he deserves no commutation of penalty; rather, killing him as *qisās* (legal retribution) is applicable to him. Yet, if the premeditated murderer is pardoned by the deceased's family or legal representatives, i.e., they decide not to kill him in retaliation, he is to be burdened by paying the *diyyah* alone, without his relatives' support, as a means of redeeming his life. Thus, the *diyyah* becomes obligatory for him to pay, just like the obligation of paying indemnity for damages.<sup>36</sup>

This explanation reveals the justifications for providing *takaful* in a manslaughter case, namely, frequency and justice.

Tragically, non-premeditated deaths occur every day. The value of human life is inestimable. They happen in contexts such as falling down from a ladder, scaffolding, or tree, or into a well, car and other vehicular accidents, defective products, food, or medicine, and even routine, on-the-job activities. It would be a disproportionate punishment to impose financial liability on one person, even the one legally liable for the death. A follow-on justification is that without the tribal guarantee of *diyyah*, individuals might be discouraged too strongly from taking appropriate risks in everyday personal or business life. However, a murder with malicious afore-

thought is an entirely different matter. Visiting full punishment on the murderer is just. The *diyyah* payment cannot be an insurance policy against this kind of killing. That would create a blatant moral hazard problem, encouraging the intentional taking of lives under any pretext.

In sum, *'aqila* is analogous to the contemporary concept of an insurance policy against wrongful death. It could well be that the *Sharī'a* concept of *'aqila* is an intellectual or practical origin for the contemporary policy. The responsibility of a tribe is to bear the payment of *diyyah*, but not in an instance of pre-meditated murder. The only conditions for the perpetrator to be covered by the policy of the tribe, as it were, and thereby to trigger the liability of the insurer (tribe), are (1) manslaughter is committed, and (2) the death of another is caused by a member of the tribe. Significantly, the victim may be from another tribe, or from the same tribe.

- 'Akd *Muwalat* (mutual contract)

What happens if a person converts to Islam, but belongs to no tribe, and has no family? This situation occurred in the early days of Islam when people migrated from Mecca to Medina (during the *Hijra*) and embraced Islam, leaving their material possessions in Mecca. Concern arose about how to help them. Such persons were in need, perhaps to repay a debt or deal with a liability. The solution that developed was a mutual contract, called "*'akd muwalat*," ("*Muwalat*" means "mutual" or "alliance," and "*'akd*" is "contract.") Under it, the convert to Islam would go to another person and arrange for financial help from that person in the event of a debt or liability. The contract provided for mutual assistance, and even inheritance. So, the convert would step in and aid the other person, if that other person could not fulfill a debt or other legal obligation. In essence, "*'Akd muwalat*" was a reciprocal insurance policy against financial exigency.

However, Islamic *fukahā'* were deeply skeptical of this kind of contract. That is because, under *Sharī'a* Inheritance Law, only a family member (a blood relation) is entitled to be a beneficiary. Note that under *surah* 33, *ayah* 5 of the Qur'ān, adoption is prohibited under Islamic Law, but one person may sponsor another. Jurists agreed *'akd muwalat* is forbidden (*harām*). Accordingly, this early form of *takaful* died out long ago.

- *Daman khatr al-tariq* (surety for the safety of the road)

A third historical kind of insurance used in Arabia and Middle East was known as "*daman khatr al-tariq*." Literally, "*daman*" is a verb meaning "to guarantee," "*khatr*" is a noun meaning "danger" or "risk," and "*al-tariq*" is a noun meaning "the road." Put together, "*daman khatr al-tariq*" means an insurance against dangers from traveling.

In former times, one party would issue a guarantee to a traveler that the road or route the traveler planned to take would be safe. Technically, the party providing the guarantee was — in modern American legal parlance — a "surety," not an "insurer." That is because this party provided the guarantee out of pride, and usually did not receive a fee for the guarantee. (Recall that a "surety" generally receives no compensation from the beneficiary, whereas an "insurer" receives a fee

<sup>36</sup> DR. ŠALIH AL-FAWZĀN, A SUMMARY OF ISLAMIC JURISPRUDENCE, vol. 2 at 552 (Riyadh, Kingdom of Saudi Arabia: Al-Maiman Publishing House, 2005). [Hereinafter, AL FAWZĀN.]

or premium.) Also in a technical sense, the party was a "surety" as distinct from a "guarantor," because this party was primarily liable for performance of the obligation of another. (Recall that a "guarantor" is secondarily liable. Liability is triggered if the beneficiary — typically a debtor — does not satisfy its obligations to a creditor.)

The obligation against which the surety was liable was for safe passage. The surety arrangement covered any damages incurred by the traveler while en route. The potential damages were bodily or property harm caused by attacks by hostile persons. Thus, the surety was primarily liable to the traveler for the performance of third parties, namely, that the third parties would not attack the traveler. The coverage excluded breakdowns of the vehicle from normal wear-and-tear in which the traveler was voyaging. Typical beneficiaries were caravans, whether of merchants or pilgrims, going from one destination to another, like from Mecca to Damascus, Jerusalem, Yemen, or destinations in Iraq such as Basra and Kufa. The sureties were tribal leaders responsible for the governance of the land through which the travelers sought to traverse.

There is a word closely related to "*ḍaman*," namely, "*aman*." The latter term may be used as a noun and connotes a surety for safe passage, or as an adjective, as in a safe place. In modern times, "*ḍaman khatr al-tariq*" is not used. Rather, a modern insurance policy would be taken out by a traveler, as needed. However, from time to time, official governmental authorities provide an "*aman*."

For instance, during the December 2008 — January 2009 Israeli invasion of the Gaza Strip, suppose an Israeli official sought to enter Gaza City to negotiate a truce with the local authority, Hamas. Or, suppose the United Nations sought to deliver humanitarian aid to residents in Gaza and avoid any difficulties with that authority. In these instances, an insurance of (or surety for) safe passage into and out of the Gaza Strip, and of safety while there, could be given by Hamas. That insurance (surety) would be characterized as "*aman*." Another interesting example, from slightly earlier times, comes from the great desert explorations of Sir Wilfred Thesiger. In his engrossing account of crossing the Empty Quarter (*Rub' al-Khali*), *Arabian Sands* (1959), he refers to guarantees of safe passage provided by various governing tribal authorities — not all of which he obtained before embarking on his remarkable explorations.

- *Hilf* (confederation for mutual assistance)

The literal meaning of "*hilf*" is "cohort." Tribes in the Arabian Peninsula used to form confederations for mutual support. The idea was that each tribe would come to the assistance of another tribe when that other tribe was in need. The assistance not only could be financial, but also military. In contemporary times, tribal guarantees in the old-fashioned sense of *hilf* are rare. However, the basic concept of a confederation agreeing to provide mutual assistance still is used. Indeed, during the first Gulf War (1991), the allied forces (American, Bahraini, British, Saudi, etc.) marshaled against the then Iraqi dictator Saddam Hussein called themselves "*hulafa*," which is the name for the parties that came together to provide what, in effect, was a "*hilf*" on behalf of Kuwait.

In the financial sense, *hilf* was an early version of collateral and other monetary guarantee arrangements in modern financial markets such as Wall Street, whereby a group of banks agrees to assist a potentially failing bank, or help in a situation of illiquidity in the market for a particular kind of financial instrument, by anteing up funds. In the military sense, *hilf* was an early version of Article 5 of the *Charter of the North Atlantic Treaty Organization* (NATO), whereby an attack on one NATO country is considered as an attack on the rest of the NATO members, and obligates those members to come to the defense of that country.

The above discussion of the four early types of *takaful* adduces an important point. Islamic Law knew from its earliest days the concepts of insurance, suretyship, and guarantees. While these early species have died out or changed, their significance remains in two respects. First, modern kinds of insurance contracts have evolved from them. The early forms are the conceptual foundations for contemporary *takaful*. Second, through the ages, Islamic *fukahā'* have studied the early arrangements, using them as a basis for *qiyās*. They analogize to and distinguish from these arrangements to opine on the permissibility of actual or proposed new forms of *takaful*.

#### § 31.04 MODERN TAKAFUL AND DEBATE ABOUT GHARAR (UNCERTAINTY) AND RIBĀ (INTEREST)

The theme and purpose of modern *takaful* is not completely different from the historical types. The former evolved from the latter, hence this continuity is unsurprising. Underlying both is unity within the community and mutual collaboration among community members to help an injured party. That help is not just financial, but also emotional, psychological, and physical. The critical difference between early and contemporary types is modern *takaful* requires a monthly payment, a fee American Insurance Law calls a "premium," for the insured party to have policy coverage.

Indubitably, the legality of *takaful* is a hot topic among *fukahā'*. Some Muslim legal scholars declare that *takaful* should be banned, and say it is forbidden (*ḥarām*). Other scholars condone it, saying *takaful* is permitted (*ḥalāl*). *Gharar* (uncertainty) and *ribā* (interest) are the issues on which the scholars divide.

The argument is whether a *takaful* contract can be engineered to resolve the problems of *gharar* and *ribā*. If *fukahā'* conclude that an insurance product is permitted, then they do so only if two requirements are satisfied. First, the terms of maturity must be fixed and definite. The duration of the contract — the length of time of coverage of the insured by the insurer — must be set and clear. This provision is meant to prevent *gharar*. Life insurance (in the conventional American sense, as distinct from life *takaful*, discussed below) always is *ḥarām*. Only Allāh knows how long a person will live. There always is uncertainty about when a person may die. Consequently, when a life insurance contract matures, and a payout is required, is uncertain. In contrast, a *takaful* arrangement that lasts for 10 years does not involve *gharar*. The arrangement covers the insured party for that decade against specified losses. The policy lapses at the end of the decade.

Second, monthly payments received by an insurer must be invested by it in an acceptable manner. The funds cannot be invested in interest-earning assets, *i.e.*, *ribā* must be avoided. This second condition reflects the communitarian basis of *takaful*, and is redolent of arrangements to avoid *ribā* (namely, *muḍārabah* and *murābaḥah*). The idea is the insurer and insured are engaged in a joint profit-sharing enterprise for mutual gain, as is the case with a lender and borrower. It does not comport with the Islamic ideal of community for the insured to appropriate the premiums of the beneficiary for itself, and invest those premiums in interest-earning assets, the returns from which the insured exclusively keeps. (Indeed, *muḍārabah* is used in the context of a life *takaful*.)

Assuming these two conditions are met, then *takaful* is seen by some scholars as compliant with the *Shari'a*. Even then, other *fukahā'* aver that *takaful* remains forbidden, principally because they remain unconvinced that the challenges of *gharar* and *ribā* are overcome. They claim that ultimately, in some fashion, uncertainty or risk exists with any insurance contract. They also find recourse to *qiyas* is unhelpful. That is, analogies to the historic types of *takaful* do not rescue modern *takaful*. *Aqd Mucalat* (mutual contract) has long-since been banned, and the other three ancient forms — *'aqila* (tribal aid after wrongful killing), *daman khatr al-tariq* (surety for the safety of the road), *hilf* (confederation for mutual assistance) — do not involve regular, periodic payment of premiums by the insured to the insurer, as does modern *takaful*.

### § 31.05 HOW MODERN TAKAFUL WORKS

Assuming the problems of *gharar* and *ribā* are resolved, so that a *takaful* arrangement is deemed *halal*, how does the arrangement actually work in practice? Conceptually, there are three parties to the transaction:

- The insured party, also called the “participant” or “policy holder”:

This party is the one that faces a risk against which it seeks insurance. The *takaful* is the assistance it seeks to mitigate the risk. For that insurance, the participant contributes a premium — *i.e.*, money — to an operator of a fund into which the premiums are put. The premiums are fixed. That means the operator providing the insurance is not permitted to require an additional payment to cover an extra risk. That is, the operator cannot discriminate against a participant if the level of danger increases, either by raising the premiums, or terminating the *takaful* arrangement.

- The operator:

The operator is the provider of *takaful*. It is a licensed body that acts as the manager of, or trustee for, the funds. This management or trusteeship is conducted in accordance with *Shari'a* principles. Hence, for example, the operator may not place the funds in investments in financial instruments issued by producers of forbidden (*haram*) items (e.g., alcohol, pork, pork products, or pornography). Any claim by the insured party or beneficiary under the insurance contract is paid out of the funds. Note that the operator does not give a contractual guarantee to a beneficiary. (In contrast, in conventional non-Islamic insurance contracts, the

insurer guarantees the provision of benefits to the insured party, particularly in the case of death benefits.)

- The beneficiary:

The beneficiary may or may not be the same as the insured party. It depends on the precise arrangement. For example, in a *muḍārabah*, the legal heirs of the insured party are the beneficiaries.

Overall, the *Shari'a* permits two categories of *takaful*:

- (1) General *takaful*, and

- (2) Life *takaful*.

Both kinds of policies have a fixed, definite term. Common terms are 10, 15, or 20 years. It is essential that the terms be fixed and definite to avoid any *gharar* (uncertainty) as to the contract period and the attendant rights and obligations of the parties.

A general *takaful* contract is a short-term insurance policy for the benefit of the participant who establishes it. The purpose is to offset any kind of risk as defined in the contract, with the beneficiary being the participant, not a third party. In contrast, a life *takaful* contract focuses on protecting a third party, namely, one or more beneficiaries specified by the participant. The protection is against financial risk in particular. Diagrams 31-21 and 31-2 set out the structure of each kind of policy.

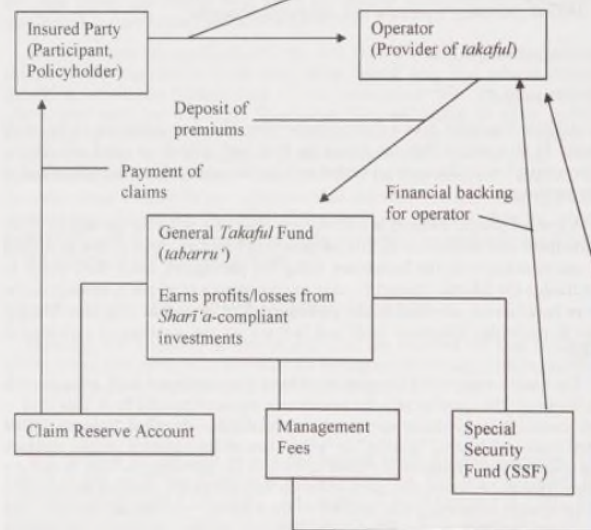

The basic arrangement in a general *takaful* is a participant pays a premium to an operator. The operator puts the premium in a general *takaful* fund. This fund — the account into which the operator puts premiums — is called “*tabarru'*.” That word means “donation,” “charity,” or “gift.” Thus, under a general *takaful* contract, the operator is not required to return *tabarru'* to the participants. That is, under a general *takaful* contract, the operator has no legal obligation to return the full value of the account supporting that contract — the *tabarru'* — to the participants. That is a stark contrast to life *takaful* arrangement, effected through a *muḍārabah* partnership, wherein the operator is obligated to return the full value of the supporting fund to the participants.

The *tabarru'* account earns profits from investments in *Shari'a* compliant assets. Those profits add to the aggregate market value of the account. Conceptually, the *tabarru'* has three sub-accounts. First, in the event a participant needs to make an insurance claim, the operator pays the claim out of the *tabarru'* account, specifically, a “Claim Reserve Account.” Second, from a Management Fees account, the operator pays itself a management or trustee fee for its services. That fee covers the salaries of its staff and its fixed and variable costs of operation. Third, a portion of the premiums go to a segregated account, sometimes called a “Special Security Fund,” or SSF. The purpose of the SSF is to provide financial backup to the operator, essentially serving as insurance against the risk the operator becomes insolvent. The size of the portion channeled to the SSF depends on the estimate by the operator of its bankruptcy risk. For instance, if an operator computes the risk

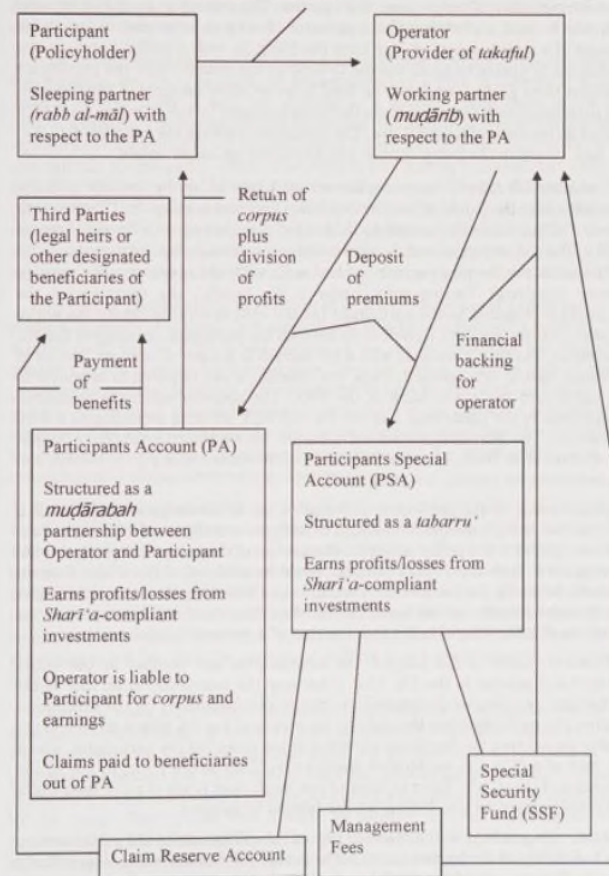

of insolvency over the next decade and determines it needs U.S. \$10 million, then it will levy on the premiums from the participants an appropriate percentage to build up the SSF to this amount. Insurance against this risk could take the form of re-insurance, known as *re-takaful*.

**Diagram 31-1:**  
**Structure of a General Takaful**  
Payment of premiums

**Diagram 31-2:**  
**Structure of a Life (Family) Takaful**  
Payment of premiums

A life *takaful* also is called a "family *takaful*." Sometimes, this second type is dubbed "life insurance." However, it is critical to understand a life *takaful* is not strictly a contract to insure the life of a participant. Rather, it is a contract for the financial protection of one or more third parties. The protection is against financial risk, which could materialize if the operator dies or is otherwise incapacitated because of a serious injury or long-term disability. In such dreadful instances, the participant is unable to make income to support his family. Thus, the participant identifies third parties, who may be legal heirs or other designated beneficiaries. The participant seeks for them, from the funds managed by the operator; protection against an unexpected financial risk. The participant chooses the maturity date, i.e., the date on which the policy expires and protection no longer exists.

Under the life *takaful*, there are two accounts into which the operator puts the premiums from the participants. The first kind of account is called the "Participant's Account" (PA), while the second kind is called the Participant's Special Account (PSA). The PA arrangement is structured as a *mudārabah* partnership. The participant is the sleeping partner (*rabb al-māl*), while the operator is the working partner (*mudārib*). Consequently, under a life *takaful*, the operator (as the *mudārib*) is obligated to the participant (as the *rabb al-māl*) to return the entire *corpus* (principal amount), as well as divide with the participant earnings of the PA. In contrast, the PSA associated with a life *takaful* is a *tabarru'* account, just as in a general *takaful* arrangement. Thus, the operator is not required to turn over to the participant the whole value of the PSA. The operator splits the premiums contributed by the participant into the PA and PSA accounts according to a fixed percentage. This percentage is defined under the life *takaful* contract. For example, the split could be 70-30, whereby 70 percent of the contributions go to the PA, and the remaining 30 percent are put in the PSA.

Claims made by the participant on behalf of the beneficiaries would be made if the risk that the life *takaful* is designed to mitigate actually occurs. The beneficiaries are entitled to the policy value (i.e., the amount of the insurance specified in the arrangement) from the PSA. The claim would be paid out of the Claim Reserve Account. After all, the point of the PSA and the Claim Reserve Account is to give the financial security to the beneficiaries when they need it. This aspect of the operation of a life *takaful* is the same as that of a general *takaful*.

However, under a life *takaful*, the beneficiaries are entitled to the entire accumulated amount in the PA. That is because the beneficiary is an heir of the participant, or obviously designated specifically as a beneficiary by the participant. In turn, the participant has the right to the *corpus* of the PA, plus a division of the profits. In essence, the beneficiaries "stand in the shoes" of the participant, who is the *rabb al-māl* in the *mudārabah* partnership. They would do so in one of two instances: (1) the Claim Reserve Account has insufficient funds to cover their claim, or (2) the participant dies before the life *takaful* terminates.

As for the participant, the operator pays a *takaful* benefit to the participant, or to a beneficiary as designated by the participant, from defined funds — specifically, the PA. This payment from the PA is made under a joint indemnity borne by the participant. Moreover, the operator and participant share profits earned by those funds. The division of profits is according to the terms of the *mudārabah* contract

(which is the same document as the life *takaful* contract). That is, the partners — operator and participant — agree *a priori* in their *mudārabah* partnership on the terms, including the ratio, for sharing profits. Note, then, there could be two or more participants in a life *takaful*, such as a few family members. Profits would be distributed to them according to the terms and conditions of the *takaful* contract.

What is the reason that in a life *takaful*, the operator puts premiums into one of two accounts, the PA (a *mudārabah* arrangement) or a PSA (a *tabarru'*)? With a general *takaful*, there is only one account — a *tabarru'*. Why, then, is the life *takaful* a relatively more complicated structure? The answer is *fukahā'* require this structure to differentiate a life *takaful*, which is permissible under the *Shari'a*, from conventional life insurance, which is common in non-Muslim countries, but which is forbidden (*harām*) under Islamic Law. Precisely because the PA is a *mudārabah* partnership, the operator/working partner (*mudārib*) and participant/sleeping partner (*rabb al-māl*) agree mutually to share profits and losses. Therefore, profit distribution in a life *takaful* is determined by the contract conditions and terms. The amount of profits depends on the investment performance or returns each year.

This kind of profit-sharing is evidence of the community-based nature and joint venture approach of *takaful*. In a conventional non-Islamic insurance contract, the insured party has no right to any portion of the profits earned by the insurance company or the investments it supervises. The only way in which an insured party participates in those profits is if it so happens to be a shareholder — that is, own stock — in the same insurance company with which it has taken out a policy. This contrast with a life *takaful* indicates the moral spirit with which the *Shari'a* suffuses the realm of insurance. Providing insurance solely for profitability, with no communitarian ethos, is contrary to that spirit.

A participant does not forfeit her paid premiums to the operator, even if she fails to act in good faith or makes some other wrongful commitment. That is because the PA is a *mudārabah* partnership, so it is terminated according to the rules governing that partnership. That termination can occur at any time, depending on the wishes of the participant and operator. The premiums effectively are a capital contribution to the partnership. If and when the partnership is terminated, then the participant is entitled to receive back that contribution. If there are insufficient funds remaining in the PA, then the participant collects a *pari passu* amount, or possibly nothing.

Obviously, when a life *takaful* matures, a participant in it is legally entitled to obtain from the PA all the premiums it paid, and which the operator deposited in the PA. In other words, if no claim is made under the life *takaful*, then the claim of the participant is against the PA — but not the PSA, because the participant is a donor to the PSA, which is a *tabarru'*; and by its nature a donation cannot be taken back by the donor. That is also true if early termination occurs. A participant who surrenders the life *takaful* policy before the expiration date of that policy has the right to receive all premiums it paid to the PA, but nothing from the PSA. In both instances — where the policy matures, or where it is ended early — the participant is entitled to a proportion of the profit from the investment returns made on her premiums.

For these scenarios, there are variations among Muslim countries. The variations occur because of applicable local financial regulations and policies. For example, in Malaysia, there can be a penalty for early termination.<sup>37</sup> A participant is charged a penalty fee if she seeks to withdraw her premiums having terminated the policy less than two years after it took effect. If she seeks to get back her premium within two to five years, she may withdraw 50 percent of her premiums without charge, and 70 percent without charge if her attempt is more than 5 years from the time she agreed to the policy.

An interesting point about the PSA, under both a general or life *takaful* arrangement, concerns the disposition of a large surplus. What happens if the PSA develops a large excess of funds, perhaps because of strong returns on *Shari'a*-compliant investments? The answer is the operator — rather than greedily claiming the entire surplus for himself — can donate some of the surplus to a charity, or deploy it to the development of social infrastructure projects. This possibility, which rests in the discretion of the operator, bespeaks the ethical impulse behind Islamic insurance products.

In sum, the Islamic system of insurance not only boasts long historical roots, but also generates considerable recent attention. Data suggest *takaful* policies are increasingly prominent, with ever-greater sales of them and assets under management:

According to some estimates, the global *takaful* industry currently [as of 2007] stands at U.S. \$550 million, with around U.S. \$1.5 billion of assets under its management, which is significantly below its true potential.<sup>38</sup>

Prospective policy holders and investors are attracted by the harmony and mutual cooperation they associate with *takaful*. Indeed, demand for *takaful* is not limited to Islamic countries. Rather, interest is worldwide, and *takaful* is marketed in some non-Muslim countries. Such figures also intimate there is room for growth of *takaful* in the global insurance market.

## § 31.06 HAWĀLAH BANKING TRANSACTIONS

### [A] Definition of “*Hawālah*” and Sources for Permissibility (*Mubāh*)

“*Hawālah*” is defined as the transference of debt from the liability of the debtor to the liability of another person.<sup>39</sup> A *hawālah* transaction involves a transfer, as distinct from a sale, of a debt obligation. Debt sales may raise problems of *ribā* (interest), as in *ribā al-jahiliyya* (defer and increase), and thereby generally are forbidden (*ḥarām*). The idea in a *hawālah* arrangement is simply to transfer the obligation in question, not its amount. In other words, the response to the question

“who pays?” shifts from one party to another, but the answer to the question “how much?” stays the same.

Why are *hawālah* arrangements permissible (*mubāh*)? Two sources of the *Shari'a* support them: the *Sunnah* of the Prophet, recorded in the *ḥadīth*, and consensus (*ijma'*) of the majority of Islamic religious and legal scholars (*ulema* and *fukahā'*, respectively). First, Muhammad condoned the transfer of debt obligations. He states:

“Procrastination (delay) in paying debts by a wealthy person is injustice. So, if your debt is transferred from your debtor to a rich debtor, you should agree.”<sup>40</sup>

Read literally, in this *ḥadīth* Muhammad does not say the debt must, or even should, be shifted from one obligor to another. Rather, it can be, as long as the relevant parties agree. Thus, the permission to do so is implicit. But, there is an explicit condition: the transfer should not cause a delay in the timely payment of the obligation. Otherwise, the creditor would be the victim of an injustice. In turn, the creditor — “you” — essentially is told to agree to the transfer.

Interestingly, the Prophet did not take a dim or pessimistic view of debt transfers, which might have led him to rule all of them unlawful. Again implicitly, he seems to have appreciated that transfers of obligations would facilitate the repayment of debt. His own considerable experience in commerce might well have inclined him to a flexible, indeed lenient, approach that would help people make good on their obligations. To be sure, some Muslim scholars take issue with debt transfers, notwithstanding this logic. They hold such transfers to be a kind of selling of debt, and hence *ḥarām*. In response to this objection, *Imām* Ibnul Qayyim argued *hawālah* is a permissible transaction because it is a kind of paying back debt. It is not selling debt, nor is it an exception to the rule against debt sales. *Imām* Qayyim stated:

Even if the transference of debts is a kind of selling of debt for another, the Lawgiver doesn't prohibit it since the principles of the *Shari'ah* necessitate the permissibility to transfer a debt from the liability of the original debtor to the liability of a new one (substitute debtor).<sup>41</sup>

Accordingly, all Four *Sunnite* Schools agree that a *hawālah* transaction is permissible, and legally valid, if it satisfies three conditions.<sup>42</sup>

In brief, they are (1) legal responsibility of the substitute debtor, (2) identical debts, and (3) consent of the original debtor. Consent of the creditor is not a condition, which follows logically from the *ḥadīths*. The Prophet did not establish creditor consent as a prerequisite. Rather, he focused on the agreement of the first and second debtors.

<sup>40</sup> THE TRANSLATION OF THE MEANINGS OF SAHIH AL-BUKHARI, ARABIC-ENGLISH by Dr. Muhammad Muhsin Khan, vol. III, book XXXVII (*Al-Hawālah* — Transference of a Debt from One Person to Another), p. 270, *ḥadīth* no. 487 (Islamic University, Medina, Kingdom of Saudi Arabia: Dar Ahya Us-Sunnah, Al Nabawiya, March 1978).

<sup>38</sup> IQBAL & MIRAKHOR, *supra*, at 123 (emphasis added).

<sup>39</sup> See AL FAWZAN, *supra*, vol. 2 at 79.

### [B] Three Conditions

First, the debt being transferred from the original debtor to the substitute debtor must become the legal responsibility of the substitute debtor. After all, the point of the transference is to shift the obligation to pay from the first to the second debtor. Hence, the transfer must mean the substitute debtor is compelled to repay the debt to the appropriate creditor. If the debt is not yet determined to be the responsibility of the substitute debtor, then its transference is not valid. That is because the substitute debtor could balk at the debt, *i.e.*, declare it has no obligation to pay, and thereby cancel the debt.

How, then, is responsibility determined? The straightforward means is consent of the substitute debtor. The substitute debtor declares that it agrees to assume responsibility for repaying the obligation. For example, suppose Hassan (the original debtor) owes U.S. \$25,000 to Commerce Bank for financing his Doctorate in Juridical Science (S.J.D.) degree at the University of Kansas. Hassan cannot transfer this debt to his father (the substitute debtor), and thereby cannot take advantage of the creditworthiness (*i.e.*, ability to repay) of his father, unless his father consents to the arrangement.

Second, a *hawālah* transfer must involve debts that are identical in kind. The Four Sunnite Schools debate what "identical" means. To the *Hanbali* School, this condition means the exchange must be Saudi *riyals* for Saudi *riyals*, or *dirhams* for *dirhams* — and, more specifically, United Arab Emirates (UAE) *dirhams* for UAE *dirhams*, not UAE *dirhams* for Moroccan *dirhams*. Additionally, the two debts must have the same time for due payment (regardless of whether it is cash or credit). In other words, *hawālah* is valid only if both are cash transactions, or both are credit transactions. For example, if the obligation of the original debtor is to pay 1 million Saudi riyals today to a certain creditor, then that obligation may be transferred to a substitute debtor, as long as the debt remains due today. That would be a cash, or spot, transaction. Changing the due date would convert the deal into a cash-credit transaction. As the Prophet warned, it would be unfair to the creditor. As another example, if the obligation is to pay 100,000 UAE *dirhams* in 30 days, then that obligation may be transferred. But, a transfer of a 100,000 UAE *dirham* debt, payable in 60 days, would be invalid. Again it would wreak the kind of injustice to the creditor against which the Prophet warned.

In contrast, the *Hanafi*, *Shāfi'i*, and *Māliki* Schools adopt a more flexible position than does the *Hanbali* School. All Four Schools require the amount of the obligation transferred to be the same. Thus, for instance, none of the Four Schools would permit an original debtor owing 100 Saudi *riyals* to transfer a debt of 110 *riyals*. *Hawālah* transfers are not meant to gain profit, which would accrue to the creditor in the amount of 10 *riyals*. But, the *Hanafi*, *Shāfi'i*, and *Māliki* Schools allow for a difference in currencies. Suppose the exchange rate between Saudi *riyals* and UAE *dirhams* is 2:1, *i.e.*, 2 Saudi *riyals* are worth 1 UAE *dirham*. Suppose, further, the original debt to be transferred is 500 Saudi *riyals*. The original debtor seeks to transfer this obligation, but in UAE *dirhams*. The three Schools hold that such transfer is permissible, if the amount of the debt remains unchanged. Given the exchange rate, equivalence would mean the substitute debtor takes on an obligation of 250 UAE *dirhams*. In essence, the *Hanafi*, *Shāfi'i*, and

*Māliki* Schools are satisfied that the test for an "identical" transfer is equality of value, regardless of the denomination of the currency. To the *Hanbali* School, formal and substantive equivalence both matter. After all, this School would counter, if currency denominations can be changed, then why not currency for credit, or currency for commodities, which would be a slippery slope toward permitting *ribā*.

Is it permissible for the original debtor to transfer only part of the obligation? In the above example of a 100 Saudi *riyal* obligation, could the debtor transfer a 90 *riyal* debt to the substitute debtor, and thereby remain "on the hook" for 10 *riyals*? The answer is yes. The creditor still is owed 100 *riyals*, at the prescribed time, and no harm is done if the payments come from two sources. Note, then, that transference of part of an obligation amounts to a modest exception, along with currency denomination, to the rule that transfers be "identical."

Third, *hawālah* transfers require the consent of the original debtor. The consent of the creditor is not required. In addition, the consent of the creditor is not necessary to transfer the debt to the credit of a wealthy party (*i.e.*, the substitute debtor) that wants to transfer immediately. In effect, early payment of the debt (pre-payment) by a substitute debtor is permitted. Based on the *hadiths* (quoted earlier), Muslim scholars deduce that the original debtor must agree on the transference of the debt. If the substitute debtor does not fulfill the debt or procrastinates in its delivery, then original debtor need not consent to the transfer in the first place. The reputation of transferees that procrastinate suffers, and *hawālah* transactions rely primarily on reputation for integrity and personal trust.

Assuming a *hawālah* transfers meets all three of these criteria, the debt transfers from the liability of the original debtor to the liability of a substitute debtor. The original debtor is absolved of any liability, which the substitute debtor assumes. The key legal consequence of this transfer of liability is the creditor is prohibited from claiming against the original debtor.

### [C] Hypothetical *Hawālah* Transactions

*Hawālah* has been a common method of transferring money in the Middle East since the 8<sup>th</sup> century A.D. In recent times, businesses and individuals have found the economic rationality in favor of *hawālah* transactions increasingly compelling: these transfers are cheap (low cost) and fast (high speed). The efficiencies are possible because such transfers skirt currency controls and other banking law regulations, do not entail bureaucratic hold-ups, and are performed by small operators with low overhead expenses.<sup>43</sup> Today, *hawālah* transfers can be completed in less than 48 hours. Often times, a *hawālah* transfer costs a low flat rate of \$50, or a commission of 1.5 percent of the amount transferred, both of which are cheaper than moving fund through the official, regulated banking system via electronic funds (wire) transfers.<sup>44</sup> Thus, for example, large numbers of migrant workers from South and South East Asia working in the Middle East and elsewhere send money to families back home through the *hawālah* method. In

<sup>43</sup> See Anna Field, "No Problem," FINANCIAL TIMES, 15 April 2008, at 7. [Hereinafter, Field.]

<sup>44</sup> See Field, *supra*.

total, over U.S. \$100 billion is transferred annually (as of 2010).

A third incentive for using *hawālah* transfers is dependability based on reputation. All such transfers depend on the honor of brokers, who are usually family members and friends, and who are fully aware that their businesses and success depends on their ability to fulfill their promises. To outsiders, it might seem risky to depend on the integrity of small "mom-and-pop" operations that may be thinly capitalized and unregulated. However, the rebuttal from *hawālah* advocates is easy: as the financial crisis of 2008 showed once again, blue-blooded, money center American and European banks, and their banking supervisors, hardly are trustworthy. Why not use a local *hawālah* transferor rather than a faceless western bank?

To illustrate a simple *hawālah* transfer, suppose Istaz, based in Tehran, Iran, is an importer of Italian leather. He proceeds to a money exchanger in Tehran, saying he would like to send \$10,000 to his leather supplier. Istaz hands over to Hakeem \$10,000, but this money does not "move" to the leather supplier, as it would through the banking system in a conventional transfer. Rather, the broker, Hakeem, calls his counterpart in Rome, Omar. Omar goes to the bank of the leather supplier in Rome and deposits \$10,000 in the account of that supplier. The supplier has been paid, and can safely ship Istaz the leather (assuming it did not export the leather already). But, Omar is "out" \$10,000, i.e., Omar holds a \$10,000 debt claim against the broker in Tehran, Hakeem. How does Omar get repaid, given that Hakeem retains the \$10,000 cash given to him by Istaz?

The answer is a separate, distinct transaction that wholly or partially offsets the first transfer. Later on, when an Iranian in Italy, called Reza, wants to send \$5,000 to his family in Iran, Reza goes through the *hawālah* process in reverse. Reza goes to a money transmitter in Rome, namely, Omar, asking to transfer \$5,000 to Iran. Reza gives Omar \$5,000. Omar then calls his correspondent in Tehran, Hakeem. Hakeem deposits \$5,000 in the account of Reza's family. Omar and Hakeem are aware of their ongoing transactional relationship, so they appreciate the off-set that just occurred: against the \$10,000 debt Hakeem owed Omar, Hakeem just paid \$5,000 of it. Over time, the debts of the brokers in Tehran and Rome cancel each other out.<sup>45</sup>

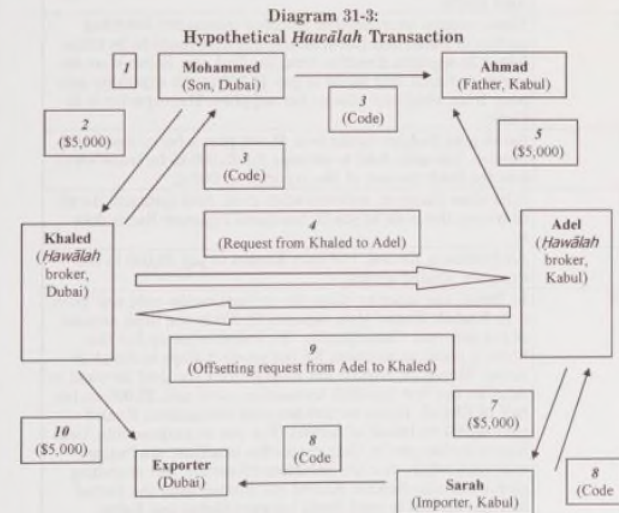

Similarly, Diagram 31-3 and Table 31-3 summarize another hypothetical *hawālah* transaction in step-by-step fashion.

#### [D] Law Enforcement Issues

While they play a significant and arguably essential role for expatriate workers seeking to transfer money to their families in their home countries in a cheap, fast, and reliable manner, *hawālah* transfers are not the favorite payments system for banking and law enforcement authorities. These authorities much prefer to have a clear paper or electronic record of every transfer of funds that is made through their banks. That way, they can trace whether funds are produced by criminal activities and are being laundered illegally, whether the funds are being sent to a

country that is the subject of international sanctions, and whether the funds are going to terrorists. Most *hawālah* transfers involve transfers of funds from legitimate sources for lawful purposes. But, understandably, the United States and other countries believe that the anonymity of the transfers and lack of documentation allows dubious transfers to evade scrutiny.

These concerns are all the heightened with international narcotics and arms smuggling, financial embargoes against Iran and North Korea, and counter-terrorism efforts following the 11<sup>th</sup> September 2001 attacks. In this climate, the United States and many western countries have employed more stringent standards for international money transfers, particularly in respect of reporting and record-keeping requirements. Those regulations raise the cost of a money transfer through official banking channels, creating even a greater disincentive for a lowly-paid Pakistani construction worker in Dubai to use the transfer services of the Bank of America or Standard Chartered Bank. Of course, the added regulations increase the incentive for evasion. For instance, with sanctions placed against Iran, Iranian businesses have resorted to *hawālah* to complete money transfers.

<sup>45</sup> See Field, *supra*.

Table 31-3:  
Steps in Hypothetical *Hawālah* Transaction

Step Number	What Happens
1	Mohammed is an Afghan who works in Dubai, UAE. He wants to send \$5,000 to his father, Ahmad, in Kabul, Afghanistan.
2	Mohammed hands over \$5,000 to his local <i>hawālah</i> broker, whose name is Khaled. Mohammed also pays a modest flat fee or low-percentage commission to Khaled.
3	Khaled gives Mohammed an authentication code. He instructs Mohammed to give this code to Ahmad (but only to Ahmad). Mohammed conveys the code to Ahmad.
4	Khaled has a pre-existing relationship with a <i>hawālah</i> broker located in Kabul. The Kabul-based broker is named Adel. Khaled asks Adel to pay Ahmed \$5,000. Adel agrees.
5	Adel transfers \$5,000 to Ahmed, as soon as Ahmed provides Adel with the necessary authentication code. Thus, the father, Ahmed, living in Kabul, now has the funds intended for him by his son, Mohammed, working in Dubai. However, Khaled owes Adel \$5,000.
6	Three months later, another <i>hawālah</i> transaction involving parties in Dubai and Kabul arises, but with funds to be transferred in opposite direction from the first one. Sarah is an importer in Kabul. She seeks to pay \$5,000 to the exporting company from which she obtains her supplies. The exporter is in Dubai.
7	Sarah goes to Adel, hands over \$5,000 plus a fee or small commission. She asks Adel to arrange for \$5,000 to be transferred into the bank account of the exporter in Dubai.
8	Adel gives Sarah an authentication code. Adel instructs Sarah to convey this code to the Dubai-based exporter. Sarah does so.
9	Adel contacts Khaled, and asks Khaled to pay \$5,000 to the exporter. Khaled agrees.
10	In Dubai, the exporter takes the authentication code and gives it to Khaled. Khaled then deposits \$5,000 in the bank account of the exporter. Consequently, the Dubai exporter has the funds it needs as payment for the goods it ships to Sarah in Kabul. Moreover, Khaled has wholly offset the debt he owed to Adel. In the first <i>hawālah</i> transaction, Adel paid \$5,000 on behalf of Khaled. In the second <i>hawālah</i> transaction, Khaled paid \$5,000 on behalf of Ahmed. The two correspondents, both money exchangers in their respective localities, are "square" with each other, with the liabilities off-setting and cancelling each other out. Neither Khaled nor Ahmed used the formal banking system to send funds between Dubai and Kabul.

Not all *hawālah* brokers go unnoticed however, especially those inside the United States. In fact, there are over 40,000 registered *hawālah* brokers registered with

American authorities.<sup>46</sup> These dealers are required to keep records and are subject to the same kind of constraints that banks are subject to, including penalizing unregistered dealers. While more stringent standards are making it harder for dubious transactions to go forward, it is still very difficult to trace transfers that originate in the Middle East, usually in the Gulf. This situation makes it difficult for authorities to specify exactly who initiated the money transfer. For example, although the United States has placed pressure on banks in the UAE to tighten restrictions on Iranian and Syrian businesses, the UAE has had to proceed cautiously to avoid angering their next door neighbors whose economy often depends on the export/import funds.

<sup>46</sup> See Field, *supra*.

## Chapter 32

### FINANCE (*TAMWEEL*): INNOVATIVE INSTRUMENTS AND MARKETS

---

Money is better than poverty, if only for financial reasons.

Woody Allen (1935– ),  
American Screenwriter, Director, and Comedian, and  
Winner of three Academy Awards

#### SYNOPSIS

##### § 32.01 MICROFINANCE

- [A] Definition of “Microfinance”

- [A] Defining “*Shari’a* Compliant”
- [B] Certification from *Shari’a* Board
- [C] A Sole Certification Authority?

§ 32.01 MICROFINANCE<sup>1</sup>**[A] Definition of "Microfinance"**

The term "microfinance" is defined as the provision of financial services to the poor. The range of such services is broad, and includes:

- Payment transactions, *e.g.*, making or receiving payments of bills.
- Retail sales transactions, *e.g.*, making or receiving payments for goods or services.
- Loans, *e.g.*, providing or receiving funds for an entrepreneurial venture.
- Remittances, *e.g.*, transferring funds from one village to another, one city to another, or one country to another.
- Savings transactions, *e.g.*, depositing or withdrawing funds from a savings account.
- Property transactions, *e.g.*, buying or selling residential or commercial property.
- Leasing, *e.g.*, paying or receiving lease payments on an asset, including rented property.
- Insurance transactions, *e.g.*, purchasing insurance, or paying premiums on an insurance policy.

Microfinance is nothing if not flexible. To this list, new transactions are added at any given time, in any particular country.

That is because the needs of poor people evolve commensurate with the local economies in which they participate, and with the forces of globalization that impact on their localities. Moreover, technological developments — not only in the sense of newer and more secure devices, but also in terms of lower costs for existing hardware and software — have a major impact on microfinance. Indeed, it is through technology that microfinance services often are provided, even in remote, impoverished circumstances.

In truth, microfinance is not new. It has existed for centuries, through pawnbrokers, moneylenders, rotating associations, mutual support networks and exchanges, and tribes, clans, and families. It has been used to engage in transactions from investing in livestock to paying school fees.

Table 32-1 summarizes some of the key differences between traditional financial transactions in the formal sector of an economy, and modern microfinance in the small, informal sector of an economy. Even a glance at the Table reveals the attractions of microfinance to poor people, be they Muslim or non-Muslim.

<sup>1</sup> This discussion draws from *Banking at the Base of the Pyramid: How Microfinance is Changing and How You Can Be Involved* (panel presentations), Inter-Pacific Bar Association, 19th Annual Conference, Manila, Philippines, 30 April 2009.

**[B] Features**

A robust appreciation for modern microfinance requires understanding five important features. First, microfinance focuses on a large number of small value transactions involving individual parties (or a small number of individuals per party, such as a household or small business). For example, in Mongolia (as of May 2009), microfinance transactions were conducted for U.S. \$9. That focus contrasts with traditional non-Muslim and Muslim banking, both of which involve a small number of large players (*e.g.*, sizeable commercial bank lenders and business borrowers), and a small number of large-value transactions. In other words, microfinance does not anticipate, nor indeed search for, high profit margins. Rather, profits are made through tiny margins on a large number of transactions. Traditional non-Muslim and Muslim banks seek to maximize profits through a judicious number of high-margin deals.

**Table 32-1:**  
**Contrasts between Conventional Finance and Microfinance**

Issue	Traditional, Formal Finance	Microfinance
<i>Where is the service provided?</i>	In a formal office, such as the branch of a commercial bank, which a poor person may find intimidating. The location of the office, if not in the village of that poor person, may be expensive for the person to travel to. The distant location may require her to close temporarily her family store (which itself means lost profits), purchase a bus ticket, and travel several hours to a city to get to a branch.	In an informal environment, at or near the home or village of a poor person, which does not intimidate that person. Moreover, the transaction costs of accessing the service provider are minimal.
<i>Who provides the service?</i>	An official of a commercial bank who holds a defined status in that bank, and who dresses in business attire ( <i>e.g.</i> , suit, shirt and tie), both of which may be intimidating to some poor people.	A person informally dressed, and probably known (actually or by reputation) to many poor people in the relevant home or village market area.
<i>How complex is the provision of the service?</i>	Written legal documentation is required for any transaction.	Recognition of the transaction among nearby inhabitants and market participants usually suffices to "document" the transaction.
<i>How large is the typical transaction?</i>	The minimum value for any transaction is large, at least for any poor person.	There is no fixed minimum value, and the typical transactional amounts are small.

Issue	Traditional, Formal Finance	Microfinance
<i>How literate and numerate must the client of the service be?</i>	Literacy and numeracy at a high level is required.	There is no need for a high level of literacy or numeracy.

Second, and following from this first feature, microfinance seeks a so-called "double bottom line," i.e., a social return and a commercial return. The pre-eminent motive for any microfinance transaction is (or is supposed to be) the provision of social benefits. That is the first bottom line. The second bottom line is making a profit. The commercial return serves the first bottom line — unless a small profit is turned, it will be impossible for a microfinancier to continue to offer services that yield a social return.

Third, by definition, poor people have few, if any, assets to pledge as security for loans or other banking transactions. Therefore, as microfinance service providers are wont to say, the "2 Cs" are important to assess the prudence of entering into a transaction with a prospective party: character and capacity. Does the party have a good character, in a moral sense, which suggests the party can be trusted to repay any obligation? Does the party have the capacity to repay any obligation, such as through a stream of revenues the party will generate through skillful deployment of loaned funds in a business venture? the logic in favor of the prefix "micro" in "microfinance" is clear from the first three features: small transactions, modest profits, and poor, individual customers.

The fourth feature of microfinance follows from the third one. Many poor countries — Muslim and non-Muslim alike — are plagued by a rickety, inchoate rule of law framework in which property rights are ill defined, and a commercial law on secured transactions (if it exists at all) is ill drafted and ill enforced. When those rights are not clearly demarcated, prospective creditor institutions do not see assets against which they can lend, and would-be debtors cannot credibly pledge assets against which they can borrow. In turn, without extensions of credit, it is not possible for an economy to put all of its extant assets to their highest and best — that is, most efficient — use. That is, the lack of property and commercial law stifles capital raising, which in turn inhibits modern economic growth. Microfinance is not a systemic solution to this situation. However, it is part of the answer: Lending to poor people occurs, notwithstanding their deficit in hard assets. Such borrowers contribute to robust, if ground-level and bottom-up, growth.<sup>2</sup>

Fifth, new technologies are being used in microfinance. Automated teller machines (ATMs), personal digital assistants (PDAs), point of sale (POS) terminals, and smart cards are all illustrations. For example, third-parties, rather than major

banks, set up ATM networks to provide deposit, withdrawal, and payment services to microfinance customers. It is much cheaper for a provider of microfinance services, whether it be a non-governmental organization (NGO) or a major bank, to provide services through an agent using technology, than to set up an office, such as a branch, which has fixed overhead costs. Using technology also can be safer than setting up an office. For instance, in a dangerous neighborhood of Bogotá, Colombia, no bank wanted to establish a branch. However, one enterprising bank designated a small shop as an agent. Using a POS, the agent partnered with a next-door hardware store to provide payment services.

Mobile (cellular) phones are perhaps the most promising technology through which to provide so-called "mobile phone banking" microfinance services. Around the world (as of May 2009), there were 4 billion mobile phone accounts, and 3 billion subscribers. In many countries, even Afghanistan, the tipping point of 50 percent of the adult population owning a mobile phone has been crossed. In the Philippines, over 60 percent of the adult population had a mobile phone. Mobile phone banking allows for "mobile money," that is, the transfer of money using a mobile phone. In effect, a cell phone becomes a mobile wallet, into which to receive funds and loan disbursements, and out of which to make bill and other payment obligations. It may even be said that mobile phone banking is the ATM of the future, in Islamic and non-Islamic countries alike.

### [C] Empowerment of Women

Microfinance improves the economic, political, and social influence of women, as well as their personal health and sanitary conditions. A challenge facing modern microfinance in its early years was to ensure it did not automatically mean women borrow, but men control. That problem afflicted the famous Grameen Bank in Bangladesh in the early years of microfinance. Likewise, microfinance is not supposed to mean poor borrow and rich control. These problems, at least to some degree, have been addressed, though continued vigilance is necessary as microfinance matures and larger players enter the market for providing microfinance services.

In 2007, 155 million people were microfinance customers, and the outstanding loan portfolio of microfinance borrowings was \$32 billion. Women accounted for two-thirds of this total figure, and two-thirds of the total were well below the absolute poverty line (i.e., living below roughly U.S. \$1 per day). Thus, beneficiaries of microfinance tend overwhelmingly to be poor women. With greater financial resources at their disposal through microfinance, women have greater say in household decision-making, in particular, over how money is to be earned, spent, and invested. In their communities, microfinance enhances their standing.

For example, in Nepal, men (and women) started electing women to local councils when they realized — by observing microfinance in operation — that women can manage money efficiently and honestly. This observation has been replicated in many countries, namely, that women often manage finances more effectively, and with less corruption, than men. Not surprisingly, through prudent use of funds provided through microfinance, women have enhanced their own

<sup>2</sup> See generally C.K. PRAHALAD, *THE FORTUNE AT THE BOTTOM OF THE PYRAMID — ERADICATING POVERTY THROUGH PROFITS* (Upper Saddle River, New Jersey: Pearson Education, Inc., 5th ed., 2010) (arguing companies should revolutionize how they do business in developing and least developed countries by serving the poor, and that if they do so, they will realize increased profits and growth); PAUL COLLIER, *THE BOTTOM BILLION — WHY THE POOREST COUNTRIES ARE FAILING AND WHAT CAN BE DONE ABOUT IT* (Oxford, England: Oxford University Press, 2007) (arguing that while poverty is falling in 80 percent of the world, it is not being reduced in about 50 failing states).

personal health and education, and that of their children, neighbors, and communities.

### [D] Islamic Microfinance

There is nothing inherently incompatible between microfinance and Islam. Microfinance transactions can be conducted in conformity with the *Shari'a*. Indeed, they are, every day, in many Muslim countries. Conceptually, that conclusion makes sense. Conventional, non-Muslim large-value transactions can be re-worked as needed to conform to *Shari'a* precepts, and a *fortiori* smaller deals can be rendered consistent with Islamic legal principles.

Historically, too, that conclusion makes sense. Modern microfinance originated in the Muslim world — specifically, Bangladesh. It was Muhammad Yunus, a Lecturer in Economics at Chittagong College (located in Chittagong, the major port city of Bangladesh), who originated modern microfinance, and who founded the now-famous Grameen Bank.<sup>3</sup> “For their efforts to create economic and social development from below,” he and the Bank earned the 2006 Nobel Peace Prize.<sup>4</sup>

In 1976, during visits to the poorest households in the village of Jobra near Chittagong University, Yunus discovered that very small loans could make a disproportionate difference to a poor person. Jobra women who made bamboo furniture had to take out usurious loans for buying bamboo, to pay their profits to the moneylenders. His first loan, consisting of U.S.D. 27.00 from his own pocket, was made to 42 women in the village, who made a net profit of BDT [Bangladesh taka] 0.50 (USD 0.02) each on the loan. Thus, vastly improving Bangladesh's ability to export and import as it did in the past, resulting in a greater form of globalization and economic status.<sup>5</sup>

A different account sources the origin even earlier. In 1965, a woman begging him for money approached Dr. Yunus. He responded with words to the effect: “How about I give you five combs? You can go sell them, and then come back and we will start from there.”

Following the latter account, Professor Yunus and the woman — perhaps unbeknownst to them — were about to launch a contemporary microfinance revolution. This revolution — like many revolutions — occurred because of a failure, in this case, market failure. Conventional banking institutions, whether they were operating on Islamic principles or not, were not providing services to the poor. (Their failure to do so could be viewed as both un-Islamic and un-Christian, but that is another matter.) Those institutions believed there was no money in offering

financial services to impoverished persons. Social justice simply was not a bottom-line principle by which they operated.

By the 1970s and 1980s, NGOs extended credit. The 1980s and 1990s were a great leap forward in microfinance. Then, with the success of microfinance, those same institutions began to take a second look. On the supply side of the microfinance market, commercial banks started to move “down market” and think they could benefit and profit from microfinance. They began to appreciate that poor people often are smart at managing money, because they have so little of it. They also observed that the repayment rate on loans to poor people was far better than to rich people — on average, 98 percent.

On the demand side of that market, it was clear the sums needed to combat poverty were staggering enough that only the private sector — which includes NGOs — can provide the needed capital. Today, put bluntly, it is manifest that the only way to attract the kind of money needed to fight and defeat poverty is through the private sector, regardless of whether specific institutions in that sector operate along *Shari'a* lines or not. Moreover, the private sector is adept at offering services efficiently, providing the maximum offerings at the cheapest cost to the widest range of customers.

### [E] Challenges

A critical issue about microfinance does not concern the application of Islamic principles. Rather, it is about motive. Islamic Law has plenty of devices (*hiyal*) to render a transaction that otherwise would be forbidden (*haram*) permissible (*halal*). For instance, in many microfinance transactions in Pakistan, the word interest (*riba*) is not used (e.g., in documentation). Instead, the term “service charge” is applied. Intriguingly, the service charge typically is calculated in the same way as interest. In both Egypt and Jordan, microfinance lending occurs in accordance with the *Shari'a*, using *sharikah al-mudharabah* arrangements. That is true even though, as a practical matter, it can be difficult to decide how to split up any profits among the working partners (*mudharib*) and sleeping partner (*rabb al-mal*), because the transaction values are so small.

Yet, there is an obvious concern when Wall Street institutions, or their Islamic counterparts, enter the microfinance market. Are they, at bottom, taking a commercial return approach, or a social return approach — what matters most to them? That concern is amplified by the rapid, and largely unregulated, growth of microfinance. One anecdote is that in a recent 3-year period following the turn of the millennium, in Kenya, more people opened microfinance accounts than regular bank accounts. Microfinance, then, has become the proverbial victim of its own success, attracting mainstream Muslim and non-Muslim banks and NGOs into the game, not all of which share the pure-hearted motives with which Dr. Yunus and his followers resonate.

Still, there are other realities about microfinance, five of which are especially noteworthy. First, there are regulatory concerns. As discussed below, not every provider of microfinance services is concerned primarily with social returns. Moreover, there are law enforcement issues that can arise. For example, if

<sup>3</sup> The seminal works authored by Professor Yunus on microfinance are:

<sup>5</sup> *First Loan He Gave was \$27 from Own Pocket*, THE DAILY STAR, front page, 14 October 2006, posted at [http://en.wikipedia.org/wiki/Muhammad\\_Yunus](http://en.wikipedia.org/wiki/Muhammad_Yunus).

microfinance services involve taking of deposits, then can authorities be sure that money laundering is not going on?

Second, microfinance does not work in markets dominated by counter-trade. That is, it is ill-suited for a climate in which goods are exchanged for goods, commonly known as "barter trade." That is because microfinance involves currency-based transactions. Papua New Guinea is an example of a country characterized by a high degree of counter-trade. In times of hyperinflation, barter typically replaces monetary payments.

Third, while microfinance empowers women, it does not ineluctably lead to an easing of their lot. They often have to work quite hard in their microfinance-based arrangements. Moreover, female beneficiaries of microfinance sometimes wind up in competition with one another in the same services markets.

Fourth, not all poor households have the right mix of labor skills to benefit from microfinance. A certain skill for service-based transactions, coupled with an entrepreneurial drive, is essential. To be sure, that does not mean a high degree of education is required.

The fifth point follows from the third and fourth observations. Microfinance will not save all women, all of the poor, or all poor women. Rather, it is one tool in the kit to empower women and fight poverty. Microfinance enhances economic growth, particularly at lower socioeconomic strata, and helps ensure growth is more evenly distributed than it might otherwise be. But, putting a person into debt — through microfinance or conventional banking — does not automatically put them out of poverty.

## § 32.02 ISLAMIC REAL ESTATE INVESTMENT TRUSTS (I-REITS)<sup>6</sup>

### [A] Advantages of Malaysia over Arab Muslim World

While Islam is a global religion, developments in Islamic finance have been limited to just a few Muslim countries, such as the United Arab Emirates (UAE), specifically, Dubai. The lodestar among Muslim countries is the non-Arab, Southeast Asian nation of Malaysia. The country boasts a robust Islamic capital market, and is a center for Islamic banking assets, *shukūk* (Islamic bonds), and *takaful* (Islamic insurance). Indeed, since the 1980s, Malaysia has been at the forefront of efforts in the Islamic world to sponsor a sustainable, workable capital market that conforms with *Shari'a* precepts, and that is of financial and ethical appeal to Muslim and non-Muslim customers alike. Kuala Lumpur, the capital city of Malaysia, aspires to outpace Dubai not only as the pre-eminent center for Islamic finance, but also as a major center for international financial.

What explains the success of Malaysia thus far? Candidly speaking, Malaysian financiers and lawyers have worked with their colleagues among Islamic legal and

religious scholars (the *fukahā'* and *ulema*, respectively). These interdisciplinary teams, which generally have a pragmatic rather than dogmatic orientation, have provided impressive work on Islamic finance. In turn, Malaysia boasts at least six advantages over any Middle Eastern financial center.

First, Malaysia is a pluralistic, multi-religious, multi-racial society.<sup>7</sup> Indigenous Malays are Muslim, and account for slightly over 50 percent of the population. Ethnic Chinese, who represent nearly 25 percent of the population, migrated to the Malayan peninsula over centuries, while Indians, who represent a bit more than 7 percent were brought there by British colonial masters to work in rubber plantations and tin mines. Chinese tend to be Buddhist or Catholic Christian, and Indians tend to be Hindu or Catholic Christian. This heterogeneity is not only an inherent strength of the country, but also makes it an attractive destination, with a tolerant environment and (as Malaysians love to tout) exquisite, inexpensive food. Put bluntly, many bankers and lawyers prefer Malaysia to most Arab Muslim countries, which they find lack stimulating diversity and have an oppressive atmosphere characterized by a lack of religious freedom, unjust treatment of women, and uncomfortable segregation of expatriate and local workers.

Second, Malaysia has a diverse economy, rich in natural resources and a talented, enterprising labor force. In broad terms, traditionally, Muslim Malays dominated the agricultural sector, Chinese dominated the trading sector, and Indians dominated the industrial sector. Now, these lines are increasingly blurred, with good effect. While not quite an East Asian Tiger like Hong Kong, Korea, Singapore, or Taiwan, Malaysia has achieved impressive growth. Malaysia has sought balance in that growth among the Malays, Chinese, and Indians through controversial redistributive affirmative action-style programs that began in the 1970s (under the rubric of the "New Economic Policy," or "NEP") initiated after race riots in 1969-1970.<sup>8</sup> Yet, much of the NEP is being dismantled, albeit slowly, by the government, because it has created complacency and dependency among some elements in the Malay community when what is prized in the modern global economy is energy and entrepreneurship. Notwithstanding the debate about the NEP, what is manifest is that Malaysia has largely avoided the obscene disparities of wealth found in many Arab Muslim countries.

Third, again in sharp contrast to most of the Arab Muslim world, Malaysia is a multi-party parliamentary democracy. The Malay-dominated governments that have ruled Malaysia are invariably coalitions involving Chinese and Indians, and Islamic and secular interests. Free and fair elections are held regularly, on schedule, and a free press communicates competing ideas among the electorate. Open and sometimes fierce criticism of the government — both policies and officials — is part of the culture.

<sup>7</sup> See CENTRAL INTELLIGENCE AGENCY, THE WORLD FACTBOOK, posted at [www.cia.gov/library/publications/the-world-factbook/geos/try.html](http://www.cia.gov/library/publications/the-world-factbook/geos/try.html). The statistics are as of July 2010.

<sup>8</sup> See generally HOLLIS CHERNEY, REDISTRIBUTION WITH GROWTH: POLICIES TO IMPROVE INCOME DISTRIBUTION IN DEVELOPING COUNTRIES IN THE CONTEXT OF ECONOMIC GROWTH (Oxford, England: Oxford University Press, 1974) (discussing the balance between growth measured conventionally through gains in per capita Gross Domestic Product (GDP) and distribution of income).

<sup>6</sup> This discussion draws from *Current Trends in Islamic Finance*, (panel presentations), Inter-Pacific Bar Association, 19th Annual Conference, Manila, Philippines, 30 April 2009.

Fourth, Malaysian law is based on English Common Law. That is thanks to the colonial experience of Malaya under British Rule. Thus, in a manner redolent of Anglo-Muhammadian Law, the Malaysian legal system is a synthetic one that eschews extremes sometimes observed in the regimes of some Middle Eastern countries, most infamously, the Kingdom of Saudi Arabia. Its separation of powers is imperfect. But, Malaysia is far closer to rule of law than rule of man than is the case in many Arab Muslim countries.

In the particular instance of Islamic Real Estate Investment Trusts (I-REITs), the Common Law culture of Malaysia has proved to be a key asset. One reason Malaysia has been so successful in developing and promoting this kind of financial instrument is that it is a Common Law country with well defined property rights. That is, its Property Law and Trust Law are based on English Law, which provides great comfort to investors, be they Muslim or non-Muslim. Those investors look askance at the political and legal risks they incur in most Arab Muslim countries. Those risks, put bluntly, are that at any moment, their investment can be lost or damaged because of the whim of a single ruler.

Certainly, it is not that Islamic Law lacks sound Property or Trust Law principles. It not only has such principles, but in some respects was a forerunner of the Common Law. Rather, the problem from the perspective of modern investors is the perception that Arab Muslim countries do not systematically apply the rule of law, and their financial markets lack transparency. (The same perception exists with China.) Consequently, at least since the Second World War, if not earlier, international investors have viewed as a benefit in any financial instrument documentation a choice of law clause identifying the law of New York, or the law of England, as the governing law. Concomitantly, they are accustomed to the courts of New York (particularly the federal court of the Southern District), and the commercial court in London, as the venue for resolving disputes. In turn, New York and English law are well-developed in the area of finance, and the judges tend to be well-schooled about the field. As for Malaysia, international investors admire the semblance of its legal system with the familiar American legal system, and also the relative transparency of its financial market.

To be sure, Gulf Arab states are not oblivious to the negative perceptions about rule of law and transparency, and a few rulers have sought to counter them. Prominent examples include leaders of the Emirate of Dubai. In the Dubai International Financial Centre (DIFC), the law of England applies. Stepping physically into the DIFC is legally equivalent to being in England.

But, the DIFC is the exception that proves the rule. It is an exception for a limited geographical zone within the UAE, and the exception exists because of the grace of the one or more senior-most members of a ruling family, and the appreciation of the rulers that international financial capital will be attracted to the DIFC if English law — and English trained lawyers and judges — are used. Throughout most of the rest of the Gulf, international financiers and their lawyers worry that local law might apply to their transactions, that law might be a rigid version of the *Shari'a*, and the judges applying that law might be poorly trained in modern international banking, commerce, and trade. Malaysia does not quite conjure up the same degree of legal risk.

Fifth, Malaysians tend to be well schooled in English, and also at least one Asian language, such as Chinese, Malay, or Tamil. The notable exception is the generation of Malaysians educated in the 1980s, when a pro-Malay language policy was pushed by the central government. The consequences, in terms of producing a sophisticated labor force rich in human capital was disastrous. Chinese and Indians with the ability to do so emigrated from the country to Australia, Canada, New Zealand, the United Kingdom, and United States, contributing to a brain drain that weakened the global competitiveness of the country. With the government reversing the pro-Malay language policy, the importance of fluency in English is now increasingly stressed throughout the education system at all levels. This emphasis contrasts with many Arab Muslim countries, in which English is at best a secondary language, and when mastered, is mastered by elites.

Finally, Malaysia has enjoyed regional stability. Under the British, with particular credit to Field Marshall Sir Gerald Templer (1898-1979), who coined the phrase "winning hearts and minds," a communist insurgency was defeated in the 1950s. Following this "Emergency Period" of 1948-1960, and independence in 1957, Malaysia avoided war. Rivalry with Singapore is, at bottom, good-natured, with competition focusing on commerce, culture, and food. The rivalry has some salubrious effects. For example, Klang (the port near Kuala Lumpur) is a better facility in part because of world-class competition offered by the Port of Singapore Authority (PSA). In sharp contrast, most Arab Muslim countries, with the notable exception of Egypt since 1979 and Jordan since 1993, have been obsessed with Israel. On a permanent war footing with that country, and fighting wars with it in 1948, 1956, 1967, and 1973, they channel large amounts of resources to their militaries. The emergence of Iran as a potential nuclear threat has lessened stability in the Gulf region. As if to underscore the insecurity, whether the Gulf is rightly called the "Arabian Gulf" or "Persian Gulf" is itself a hot topic.

These advantages translate into a competitive edge in international Islamic finance. They have led to innovative products, such as I-REITs. To be sure, some Arab Muslim countries — most notably, the UAE — look admiringly at Malaysia for lessons to bring home. Yet, it is not at all clear whether they can or will do so in a manner convincing to professional bankers and lawyers.

## [B] Attractions of I-REITs

Given the aforementioned advantages, it ought not to be a surprise Malaysia was the pioneer in developing Islamic Real Estate Investment Trusts, or "I-REITs." These instruments are attractive to Muslim and non-Muslim investors for at least four reasons.

First, I-REITs provide a stable stream of income, or cash flow, to investors. A solid portfolio of real property backs this cash flow. In turn, the underlying properties typically consist of tenants — users of the property — that make regular, contract-based rent payments. These payments provide I-REIT investors with certainty of income. That income, measured by a key financial metric, tends to provide a high yield return.

Second, the Malaysian Securities Commission has issued guidelines for I-REITs. This fact is critically important. It means the Malaysian government, via regulation, provides a stable, secure, and transparent legal footing for the financial instruments. The guidelines address the classification of asset types used to back I-REITs, and the permissibility of assets that may be used for this backing.

In particular, the guidelines say an "I-REIT" is defined as an investment vehicle that proposes to invest at least 50 percent of the total assets in real estate. This figure indicates the flexibility of the Malaysian authorities. There is no set international standard for the percentage of assets that must be dedicated to real estate. But, in major, developed country markets the figure tends to be over 50 percent. In the United States, it is 75 percent. In Korea and Singapore, it is 70 percent.

Third, the Malaysian government offers tax incentives to promote a flourishing Islamic financial market in Kuala Lumpur. For example, it has reduced certain levies imposed on investors. Such moves encourage an influx of liquidity from the Middle East.

In May 2006, the first I-REIT in the world was issued on *Bursa Malaysia*, that is, the Kuala Lumpur Stock Exchange (KLSE). The assets underlying the May 2006 I-REIT flotation consisted of hospitals. In other words, property dedicated to hospitals backed share certificates. The issuance raised financial capital for the hospitals, and income generated from medical services provided by the hospitals was the source of cash flow passed through to investors in the certificates.

In January 2007, the first I-REIT backed by plantations was issued on *Bursa Malaysia*. Like the hospital I-REIT, the plantation I-REIT did not raise significant difficulties under the *Shari'a* in terms of the use to which the underlying property assets were put. Hospitals and plantations engage in activities that, almost by their nature, comply with Islamic Law. They do not involve the consumption of forbidden (*haram*) products, namely, alcohol (except for medicinal purposes in the case of hospitals), pork, pork products, or pornography. They do not involve even the production of these items. The only question these I-REITs posed was avoidance of interest (*riba*).

In December 2008, an I-REIT backed by commercial, office, industrial, and retail property was floated on *Bursa Malaysia*. This offering, in contrast to the hospital and plantation I-REITs, did require careful scrutiny to ensure the underlying properties were not put to use in a manner inconsistent with the *Shari'a*. By May 2009, 13 I-REITs had been issued on the Malaysian securities market, returning an impressive average annual dividend yield of 7 percent. This figure, while it does not account for inflation or taxes (or, for foreign investors, possible currency exchange losses), was impressive, particularly given the dreadful performance of nearly every financial asset category around the world following the 15 September 2008 collapse of Lehman Brothers on Wall Street. Note that the 7 percent annual dividend yield is not a fixed or guaranteed interest rate, which would be impermissible. Rather, it reflects a calculation of profit returned to a holder of an I-REIT certificate against initial investment by a certificate holder.

### [C] Compliance with Islamic Law

Conventional non-Muslim REITs and I-REITs have a number of features in common. That includes techniques used to value the instruments, and the engagement of institutions like a trustee and special purpose vehicle. There are two key differences, of course, which may be put in the form of questions:

- (1) How is income from the underlying REIT derived or earned? In a conventional non-Muslim REIT, the income may be from any source. But, in an I-REIT, the income must be from an economic activity that is compliant with the *Shari'a*.
- (2) How is an investment in a REIT determined? That is, who makes the decision about which real estate properties are acceptable to back a REIT, and which are not? In a conventional non-Muslim REIT, the decision is made by the financial manager of the REIT, or fund of REITs. The decision is made based on purely financial criteria. In an I-REIT, the decision also is made by a manager, but only after an individual *Shari'a* Advisor or Advisory Committee has provided an opinion on what properties are permissible (*halal*) versus forbidden (*haram*) investments. That delineation depends on Islamic legal criteria, which must be met before the manager can make decisions on financial grounds.

In brief, the central difference between a regular REIT and I-REIT is the latter instrument undergoes an assessment for compliance with the *Shari'a*. Knowing that certification for consistency with Islamic Law is necessary, the issuers of an I-REIT, plus their banking and legal advisors, structure the proposed instrument in a way to pass muster.

Ultimately, before an initial public offering (IPO) of an I-REIT, an individual *Shari'a* Advisor, or a *Shari'a* Advisory Committee, undertake the requisite assessment. The person or persons is supposed to be suitably qualified in Islamic law and finance to render an authentic, unbiased opinion. They are selected by the Malaysian Securities Commission, which retains a registry of eligible, well-credentialed *Shari'a* experts. They also are paid a fee for their work. The individual Advisor or Committee is responsible not only for certifying a proposed I-REIT issuance for *Shari'a* compliance, but also for overseeing operation of the I-REIT after the IPO to ensure continued compliance.

In reality, a difficulty facing not only Malaysia, but all governmental and private sector bodies interested in obtaining a reliable opinion on an Islamic financial matter is a shortage of *bona fide*, neutral experts. As in non-Muslim securities markets, Muslim markets are plagued by fraudsters, and in the latter context the problem of "renting an Imam" and thereby getting an opinion that is biased by the amount and timing of the fee has been observed. (In the former context, there is a cynical adage that one would never want to buy anything an American investment banker wants to sell.)

What, exactly, are the issues an individual *Shari'a* Advisor or Advisory Committee check when opining on a proposed I-REIT transaction? The answer is the individual or Committee look to see the deal meets five key Islamic legal

requirements, which also are reflected in the Malaysian government guidelines, as follows:

(1) *Halal* Uses of Properties —

First, rental properties must be put to a use or use that is *halal*. Stated differently, rental income generated by the properties that back an I-REIT, and which flow through to investors in the I-REIT certificates, must be from permissible activities. Impermissible activities would be any financial services based on *riba*, certain entertainment facilities (particularly gambling), or manufacturing of non-*halal* goods (e.g., alcohol, pork, or pornography). Thus, for example, suppose the underlying properties consisted of banks that do not operate on *Shari'a* principles, casinos, breweries, vineyards, pig farms, racy lingerie companies, or production studios that make "X" rated movies. It is forbidden (*haram*) to issue I-REIT certificates backed by the income from such properties, because of the use to which the properties are being put — namely, un-Islamic purposes.

Interestingly, two other categories of property activity also are considered impermissible: tobacco products; and hotels and resorts. Tobacco products, such as cigarettes, cigars, chewing tobacco, and pipe tobacco, are not strictly forbidden under the *Shari'a*. Certainly, there are incontrovertible health reasons to deny tobacco farms or companies engaged in making tobacco products status as an acceptable property basis for an I-REIT flotation. As for hotels and resorts, depending on how strict, indeed puritanical, the scrutiny is of a potential I-REIT deal, several of their services may pose problems. A few examples include: (1) offering alcoholic beverages and pork products, (2) serving non-*halal* food; (3) having a karaoke bar and lounge, and (4) providing massage services by female massage therapists to males, or *vice versa*. Likewise, failure to sponsor certain architectural layouts, or failure to make certain logistical arrangements, can raise difficulties. For example: (1) not having segregated swimming pools, beach areas, or fitness centers for women (i.e., so that they are screened off from men); (2) not having dining facilities that allow for screens between guests (so that women in one family may not be seen by men at other tables); and (3) not having separate floors for guests who are families and guests who are singles.

Under the Malaysian government guidelines, the individual *Shari'a* Advisor or Advisory Committee is entitled to use discretion, specifically *ijtihad*, in two directions, as it were. On the one hand, *ijtihad* may be applied to determine whether an activity not listed as impermissible actually is forbidden (*haram*). On the other hand, *ijtihad* may be used to discern that property — despite initial appearances — is not actually being used in an impermissible manner, and thus can be the basis for an I-REIT transaction. For example, in one 2009 Malaysian case, a *Shari'a* Committee determined that revenues from a hotel could be used to back an issuance of new I-REIT certificates. The hotel served only *halal* food, provided only permissible entertainment (which excluded karaoke), had separate floors for families versus single guests, constructed a barrier by its swimming pool so that persons inside a nearby office tower could not see the pool, and provided separate pool areas for women versus men.

The point, then, is the list differentiating permissible from impermissible uses for property proposed to undergird an I-REIT deal cannot be regarded as wooden — at least not if a financial center like Kuala Lumpur seeks world-class status. Rather, each individual property needs to be checked carefully to see what actually is going on. Otherwise, large sums of potential investment will be lost, because some properties that are operating entirely or closely in conformity with the *Shari'a* will be ruled out *a priori*, and their revenues unjustly deemed forbidden as an investment return. This kind of property-by-property check requires not only time and expense, but also flexibility — the flexibility that is inherent in *ijtihad*.

(2) Mixed Use Properties —

From a *Shari'a* perspective, an ideal portfolio of real estate to back I-REIT certificates would consist only of properties the income from which is derived from activities that, without question, are permissible (*halal*). Such portfolios, of course, do exist, and are used in asset-backed securities transactions. However, to constrain finance only to such portfolios is — from a practical economic perspective — to constrain growth.

By exalting purity of activity, albeit for sound religious and ethical reasons, over all else, the possibility of slightly less-than-perfect portfolios is excluded. Put simply, the best becomes the enemy of the good. The larger the value and volume of properties that are excluded from backing asset-backed securities, i.e., the smaller the pool of underlying assets, the smaller the number and size of asset-backed offerings that are possible. The market for *Shari'a* compliant securities must await growth in *Shari'a* compliant property activities. In the meantime, potential investors — Muslim as well as non-Muslim — may have little choice but to put their savings elsewhere. Another reality particular to Malaysia mitigates against a hard-line rule of permitting only 100 percent *halal* property activities to back an I-REIT deal. That reality is the heterogeneous ethnic, racial, and religious population of the country. A hard line rule is easier to advocate when nearly 100 percent of the citizens and landowners are Muslim, as is true in most of the Gulf region. If Chinese and Indians, who are Buddhists, Christians (largely Catholics), and Hindus, dominate large commercial sectors, as they do in Malaysia, then economic diversity calls for financial flexibility.

In brief, the question is: Why not allow a portfolio of real properties, most of which are engaged in *Shari'a* compliant activities, but some of which skirt or cross the line, to be the basis for an IPO of I-REIT certificates? Not surprisingly, Malaysian authorities, clerics (*ulema*) and legal scholars (*fuqahā*) take a flexible approach (at least within boundaries). They regard as acceptable for an I-REIT transaction rental income from tenants that operate mixed activities. "Mixed," here, means rental income that ultimately is passed through to I-REIT certificate holders is derived from a potpourri of activities, some of which consistent with the *Shari'a*, but others of which are incongruous with it. Their flexibility is manifest in what may be dubbed a "20 Percent Rule."

Under this rule, a financial manager of an I-REIT cannot invest in a property if the rental income from tenants of that property from non-*Shari'a* compliant sources exceeds 20 percent of total turnover per year. The formula is:

$$20 \text{ percent} < \text{or} = \frac{\text{Rental income from sources that do not comply with the } \textit{Shari'a}}{\text{Total annual rental income from the property}}$$

In other words, any property the income from which is derived from activities impermissible under the *Shari'a*, nevertheless may qualify to back an I-REIT. The question is "how much?," i.e., how much of the income comes from forbidden (*haram*) or otherwise suspect activities? As long as the answer is 20 percent or less, then that property can be used in an I-REIT, or stated equivalently, the financial professional running the I-REIT can invest in that property.

The 20 percent threshold is calculated on an annual basis, and is a percentage of total revenue from all property activities, both *Shari'a* and non-*Shari'a* compliant ones. If in one year the figure creeps above 20 percent, then a problem could arise. The manager would have to divest the I-REIT fund of that property. But, depending on market conditions, the sale of the interest in the property could be at a considerable loss, and redound back to the I-REIT investors. Moreover, the problem may arise for reasons beyond the control of the manager. For instance, revenues from a *Shari'a*-compliant activity, such as making Persian carpets, could collapse, and revenues from a non-compliant one, such as alcohol sales, could skyrocket. That pattern would be consistent with a recession, in which luxury items like Persian carpets fare poorly, but beer and wine sales tend to hold steady or even rise. Of course, the response to the problem is simple: the manager is paid a healthy salary for her expertise in dealing with uncertainty.

Malaysian authorities and *Shari'a* experts also have been flexible in permitting alternative methods to calculate the acceptable degree of non-*Shari'a* compliant properties backing an I-REIT. Suppose accurate sales revenue figures from all underlying properties are unavailable (e.g., they are missing or unreliable) in a given year. Or, suppose the extant figures do not convey an accurate portrayal of the nature of the real estate portfolio. For these and other reasons, a different criteria to judge *Shari'a* compliance is needed. Square footage is that alternative. That is, an individual *Shari'a* Advisor or Advisory Committee may check the ratio of square footage dedicated to *Shari'a* versus non-*Shari'a* compliant activities. The quantitative benchmark is 20 percent, meaning that non-compliant activities must take up no more than 20 percent of the total square footage space. The formula is:

$$20 \text{ percent} < \text{or} = \frac{\text{Square footage in a property dedicated to purposes that do not comply with the } \textit{Shari'a}}{\text{Total square footage of the property}}$$

For example, suppose the property in question is a supermarket — it is proposed as the backing for an I-REIT issuance, or more likely, it is one of several properties in the mix that would underlie the I-REIT certificates. The supermarket has 10,000 square feet total. Of this amount, 1,000 square feet are dedicated to the sale of alcoholic beverages and non-*halal* food. The supermarket qualifies for the I-REIT, because only 10 percent (1,000 square feet divided by 10,000 square feet) of its floor space is used for un-Islamic purposes. There is no prohibition on the I-REIT manager investing in this supermarket.

### (3) I-REIT Investments —

An I-REIT generates cash flow, and passes it through to certificate holders, from underlying revenue sources. Those sources, of course, must comport with Islamic Law, as explained above. A third rule checked by an individual *Shari'a* Advisor or Advisory Committee, pursuant to Malaysian government guidelines, concerns the deposit, financial, and investment instruments associated with an I-REIT. Simply put, all of them must comply with the *Shari'a*. This rule covers deposits taken or made by the I-REIT, financial arrangements of the I-REIT, and any investments in which the I-REIT places revenue streams from the underlying portfolio of real estate holdings.

### (4) Insurance (*Takaful*) —

Many non-Islamic financial securities carry with them some form of guarantee appropriate to their risk. The guarantee helps assure investors that they will be paid a certain sum, at least their initial capital investment, if one or more events of default occur as specified in the relevant legal documentation for the securities. That is also true for many Muslim securities, including I-REITs. What happens, for instance, if the rental payments from properties underlying an I-REIT cease, perhaps because of poor business fortunes, or insolvency, of the tenants? The certificate holders would like to receive at least their initial principal investment, if not also some return.

This kind of situation goes by the rubric of "credit risk." It is the risk investors assume in buying and holding a financial instrument that the issuer of that instrument obligated to make or pass through payments to them defaults on those obligations. An insurance policy under which the investors are the ultimate beneficiaries helps mitigate credit risk. For an I-REIT, an individual *Shari'a* Advisor or Advisory Committee must check to see that such a policy exists. In particular, the policy must insure the assets — the real property — that back the I-REIT. Moreover, that policy must conform with Islamic insurance principles, i.e., it must be *takaful* insurance. Here again, though, the Malaysian government guidelines allow for flexibility. If there is no appropriate *takaful* available, then conventional, non-Islamic insurance may be used.

Almost certainly, the above requirements will evolve. That is because financial market conditions are never static, and because of the ingenuity of financial professionals to devise new instruments to meet dynamic conditions. Malaysian government authorities, *ulema*, and *fukahā'* will be presented with new environments and proposed securities in which to issue them.

## § 32.03 CONVENTIONAL NON-ISLAMIC INVESTMENT FUNDS

### [A] Mutual Funds

Mutual funds are a prominent investment vehicle in the United States and many other developed countries. The term "mutual fund" is a generic, but precision as to its meaning is gained by understanding the relevant legal and commercial

framework. The starting point is the definition of an "investment company" in the *Investment Company Act of 1940*:<sup>9</sup>

An investment company invests the money it receives from investors on a collective basis, and each investor shares in the profits and losses in proportion to the investor's interest in the investment company.<sup>10</sup>

There are three sorts of investment companies:

- (1) Open end companies.
- (2) Closed end companies.
- (3) Unit investment trusts (UITs).

The United States Securities and Exchange Commission (SEC) regulates each type of investment company.

Any investment company sells securities through the activities of an "investment adviser." An investment adviser is defined as:

any person who, for compensation, engages in the business of advising others, either directly or through publications or writings, as to the value of securities or as to the advisability of investing in, purchasing, or selling securities, or who, for compensation and as part of a regular business, issues or promulgates analyses or reports concerning securities. . . .<sup>11</sup>

Unless a specific exemption applies, all investment advisers must register with the SEC.<sup>12</sup> The SEC regulates investment advisors pursuant to the *Investment Advisors Act of 1940*.

#### • Open End Companies:

Open end companies are the most numerous of the three sorts of investment companies. Statutorily, an open end company is a:

management company which is offering for sale or has outstanding any redeemable security of which it is the issuer.<sup>13</sup>

Commonly, open end companies are referred to as "mutual funds." A "mutual fund:"

<sup>9</sup> *Investment Company Act of 1940* § 3, 15 U.S.C. § 80-a3 (2006), posted at [www.law.uc.edu/CCL/InvCoAct/index.html](http://www.law.uc.edu/CCL/InvCoAct/index.html). This Act is codified at 15 U.S.C. §§ 80-a1-80-a-64 (2006). [Hereinafter, *1940 Investment Company Act*.]

<sup>11</sup> *Investment Advisers Act of 1940* § 202(a)(11), 15 U.S.C. § 80b2-1-80b-18a (2006), posted at [www.law.uc.edu/CCL/InvAdvAct/index.html](http://www.law.uc.edu/CCL/InvAdvAct/index.html). This Act is codified at 15 U.S.C. §§ 80b-1-80b-18a (2006). [Hereinafter, *1940 Investment Advisers Act*.]

<sup>12</sup> See *1940 Investment Advisers Act of 1940*, *supra*, § 203, 15 U.S.C. § 80b-3.

<sup>13</sup> *1940 Investment Company Act*, *supra*, § 5(a)(1), 15 U.S.C. § 80-a5.

is a company that pools money from many investors and invests the money in stocks, bonds, short-term money-market instruments, or other securities.<sup>14</sup>

Mutual funds are diverse in nature. They can consist of stocks, bonds, money market instruments, an index, or any combination thereof. Financial assets in them may be domestic, international (*i.e.*, outside of home country of the fund, *e.g.*, outside the United States), or global (*i.e.*, both domestic and international). But, there are four characteristics common to all mutual funds that distinguishing them from other investment companies.

First, an investor in a mutual fund does not purchase directly the underlying investments in the fund. Rather, the investor obtains shares in the fund itself.<sup>15</sup> Those shares represent an ownership interest in a portion of the assets in which the fund is invested. The price an investor pays is the ratable net asset value (NAV) plus any applicable fees. The NAV is the total assets less total liabilities of the mutual fund.<sup>16</sup>

Second, at any time after purchase, an investor can redeem her investment share.<sup>17</sup> The redemption amount is determined similarly to the calculation of the purchase price. That is, it is based on the ratable NAV at the time of redemption less any applicable fees. Stated differently, there is no secondary market for trading the mutual fund securities; rather, an investor seeking to terminate its investment in the fund does so by selling the shares back to the open end company and receive cash in exchange. Redemptions can create cash-flow problems for an open end company. If there are a large number of redemptions in a short period, then the fund may run short of cash. This scenario often occurs during periods of market decline, despite the common sense advice to "buy low and sell high." Consequently, at the very time when the fund would like to acquire more financial assets, because their prices have fallen, it must use up cash to redeem shares in the fund, rather than to buy attractive low-priced assets.

Third, a mutual fund typically sells shares continuously.<sup>18</sup> Some funds may suspend trading if they determine there are too many sold, but unredeemed shares. In other words, new investors can come into the mutual fund at virtually any time in the life of the fund. Issuance of new shares, of course, generates liquidity for the fund.

Fourth, an investment advisor manages a mutual fund. Specifically, an investment advisor runs the portfolio of financial assets contained in the fund.<sup>19</sup> For example, the former Merrill Lynch Dragon Fund was an open end mutual fund

<sup>17</sup> See *MUTUAL FUNDS*, *supra*.

<sup>18</sup> See *MUTUAL FUNDS*, *supra*.

<sup>19</sup> See *MUTUAL FUNDS*, *supra*.

worth U.S. \$1.2 billion at its peak in 1993. This Fund was run by an investment advisor, Merrill Lynch Asset Management (MLAM), which the Board of Directors of the Fund hired. The investment advisor had specialty expertise in the instruments in which the Fund was invested, namely, equities issued and traded on all East Asian stock markets except Japan. If an investment advisor manages a portfolio of over \$25 million, then it must register with the SEC.<sup>20</sup> If the portfolio is less than \$25 million, then advisor must register with the state securities commission where the principal place of business is located.<sup>21</sup>

• Closed End Companies:

A closed end company, more commonly referred to as a closed end fund, is an investment company whose shares are traded like publicly traded stocks.<sup>22</sup> Such a company is defined by reference to an open end company; namely, as "any management company other than an open end company."<sup>23</sup>

There are five common features of closed end funds that delineate them from mutual funds. First, shares in a closed end fund are traded like publicly traded stock. Hence, the process of selling and buying shares in a closed end fund is different from a mutual fund. Shares in a closed end fund are not offered continuously by the investment company. Rather, they must be purchased on a secondary market, like the New York Stock Exchange (NYSE).<sup>24</sup> Thus, for example, the former Merrill Lynch Emerging Tigers Fund was a \$300 million closed end fund, specializing in stocks issued and traded in developing Far Eastern countries. (Japan, Korea, and Taiwan were excluded.) Shares in that Fund were issued once by Merrill Lynch. Following the 1994 IPO, investors seeking to acquire shares in the Fund had to do so on the NYSE.

Second, pricing shares in a closed end fund after its IPO is determined by its share price.<sup>25</sup> If the share price exceeds the NAV, then the fund is trading at a premium.<sup>26</sup> Conversely, if the NAV exceeds the share price, then the fund is trading at a discount.<sup>27</sup>

Third, a closed end fund is not obligated to redeem shares in it at the request of an investor.<sup>28</sup> Rather, if the investor wants to sell its shares, then it must do so on the secondary market. Consequently, a closed end fund does not have problems of redemption as does an open end fund. However, there are some closed end funds,

known as "interval funds," which periodically offer to repurchase shares from their investors.<sup>29</sup>

Fourth, and like a mutual fund, an investment advisor manages the investment portfolios of a closed end fund.<sup>30</sup> The same advisor can run both an open and closed end fund, as was the case of the Merrill Lynch Dragon and Emerging Tigers Funds.

Fifth, a closed end fund may invest in more illiquid securities than a mutual fund.<sup>31</sup> An illiquid security, in this context, is "a security that cannot be sold within seven days at the approximate price used by the fund in determining net asset value."<sup>32</sup> This feature is connected with the point about redemption. If a closed end fund were obligated to redeem shares on demand, then it might have to sell underlying financial assets to generate cash to meet the redemptions. If those assets were illiquid, then it might not be able to do so. But, relieving the fund of the redemption obligation means it has greater freedom to invest in assets that are not readily tradeable.

• Unit Investment Trusts

The third type of investment company is a UIT. A UIT is:

an investment company which (A) is organized under a trust indenture, contract of custodianship or agency, or similar instrument, (B) does not have a board of directors, and (C) issues only redeemable securities, each of which represents an undivided interest in a unit of specified securities; but does not include a voting trust.<sup>33</sup>

There are five common characteristics of UITs.

First, units (which function like shares) in a UIT sold to investors may be redeemed at any time for the ratable NAV of those units.<sup>34</sup> Second, units are sold at one time.<sup>35</sup> A secondary market, however, often is maintained by sponsors of the UIT that allows for the additional sale of units. Third, a UIT only operates for a fixed time.<sup>36</sup> If at the termination date the trust still has outstanding investments, then those investments are redeemed and the proceeds distributed proportionately to unit owners. Fourth, a UIT buys a portfolio of securities at the inception of the UIT, and those securities change little, if at all, during the term of the trust.<sup>37</sup> The investment portfolio of a UIT is listed in the UIT prospectus. Fifth, "[a] UIT does

not have a board of directors, corporate officers, or an investment adviser to render advice during the life of the trust."<sup>38</sup>

### [B] Hedge Funds

A hedge fund is similar to a mutual fund in that both pool money from investors to purchase and sell financial instruments. However, a hedge fund is less stringently regulated by the SEC than a mutual fund, even though it deals actively in securities. Shares in a mutual fund, as well as a closed end fund, are registered pursuant to the *Securities Act of 1933*. In contrast, shares in a hedge fund are sold through a private offering. Such private placements are exempt offerings under the *1933 Act*.<sup>39</sup>

Hedge funds invest in the same types of financial assets as an open or closed end fund. But, the manner in which it makes these investments tends to differ. Hedge funds pursue riskier investment strategies including leveraged investing and other speculative investment practices, than mutual or closed end funds.<sup>40</sup> Some hedge funds also invest in the funds of other hedge funds.<sup>41</sup> Hedge funds have varying investment strategies that use a dizzying array of complex mathematical and computational formulae in search of extraordinary profit-maximizing objectives. Often, these formulas exploit short-term market inefficiencies and other circumstances in which there may be a large, but uncertain, return in a quick period.

In exchange for the opportunity for super-normal return vis-à-vis conventional funds, a hedge fund charges more substantial fees than the alternative vehicles. The customary hedge fund charge is a 2 percent management fee on assets initially invested in the fund, and an additional 2 percent fee on the assets of each investor for each subsequent year.<sup>42</sup> On top of the 2 percent *per annum* management fee, a hedge fund charges a 20 percent performance fee on any profits (realized or unrealized) by the investor.<sup>43</sup> Thus, a — if not the — defining feature of a hedge fund is its fee structure, commonly referred to in Wall Street parlance as a "2 and 20" arrangement.

Hedge funds are not for modest wallets or faint hearts. Typically, hedge funds require large minimum investments, such as U.S. \$1 million, and lock up these

investments for a defined period, such as a year, or mandate a minimum notice period for withdrawal of 30 days. The aggressiveness, if not outright greed, of the high net worth investors is matched by the hedge fund managers. They are under enormous pressure to justify their 2 and 20 fee structure with far better than average returns, and to outperform themselves (and their competitors) each successive year. Indeed, if the fund falls below the high-water mark of performance in the previous year, then the manager does not get a performance fee until it surpasses that mark.

### [C] Socially Responsible Funds: A Case Study of Ave Maria

Traditionally, none of the aforementioned investment products is judged by financial market participants on religious or moral criteria. What matters, indeed, all that matters, is making money for shareholders in a lawful manner. Thus, if the shares in a mutual fund, closed end fund, UIT, or hedge fund are in equity or debt of (for example) a —

- cosmetics company that tests beauty products on animals,
- defense contractor that makes Predator drones that kill innocent civilians,
- industrial manufacturer that dumps pollutants into the atmosphere,
- jeweler that uses conflict diamonds,
- multinational corporation that operates sweatshops in poor countries,
- pharmaceutical firm that makes abortifacient pills, or
- publisher that sponsors pornographic magazines,

so be it. The inexorable logic of capitalist finance is on profits.

Yet, questioning this logic is a growing trend in non-Muslim western financial circles. Investors increasingly are concerned about the taint on their profits, and by extension their souls, of financial returns obtained from investments that, while not illegal, offend their consciences. Many such investors are willing to forego some — but not all — financial gains in exchange for what are called "socially responsible" or "ethical" investments.

Eager to fill this market, Wall Street offers a range of conforming vehicles. The vehicles are not all alike. Some of them are distinctly Christian funds, which — depending on the exact fund — look askance at companies that make money from abortion, artificial birth control, gambling, tobacco, pornography, and weapons. Others are independent of religion, but stress ethical principles like good stewardship of the environment when searching for companies in which to invest.

Established in 1980, Ave Maria Mutual Funds are one example of the many choices available to investors. The objective of Ave Maria is:

to seek long-term capital appreciation from equity investments in companies that do not violate core values and teachings of the Roman Catholic Church.<sup>44</sup>

Ave Maria offers five different types of funds. Four of them are equity funds, and the fifth is a bond fund.

In managing each fund, Schwartz Investment Counsel, Inc., the investment advisor for Ave Maria, regards adherence to the ideals of Catholic Church as important as earning potential. Using standard investment tools, the fund managers analyze the earning potential of common stock and bonds of various issuers. For example, they consider price-earnings ratios, dividend yields, and a variety of other standard quantitative benchmarks. But, even if a prospective equity or debt investment passes conventional financial criteria, the managers will not purchase an investment for an Ave Maria portfolio if the issuer operates inconsistently with Catholic precepts. Specifically:

Under normal circumstances, all of the Fund's equity investments and at least 80% of the Fund's net assets, including the amount of any borrowings for investment purposes, will be invested in securities meeting the Fund's religious criteria.<sup>45</sup>

The only way to deviate from this commitment is by a majority vote of the outstanding shares of the Ave Maria fund in question.<sup>46</sup>

Ave Maria realizes that restricting investment to equity stakes in qualified companies may cause its funds to lag behind growth in the stock market.<sup>47</sup> There are gauges, such as KLD Indexes, which track investment vehicles like the Ave Maria funds that adhere to religious, moral, or other non-financial criteria (e.g., parameters concerning corporate governance).<sup>48</sup> Using these value-based investment screens, KLD tracks the performance of socially responsible companies against an index, like the Standard & Poor's 500 (S&P 500), which has no comparable restriction. Another example, launched in April 2010, is the first Christian equity index in Europe:

The Stoxx Europe Christian Index comprises 533 European companies that only derive revenues from sources approved "according to the values and principles of the Christian religion."

BP, HSBC [Hong Kong Shanghai Banking Corporation], Nestlé, Vodafone, Royal Dutch Shell, and Glaxo-SmithKline are among the companies in the index. Only groups that do not make money from pornography, weapons, tobacco, birth control, and gambling are allowed to be listed.

<sup>46</sup> Ave Maria Prospectus, *supra*, at 4.

<sup>47</sup> Ave Maria Prospectus, *supra*, at 4.

<sup>48</sup> See KLD Indexes, posted at [www.kld.com/indexes/index.html](http://www.kld.com/indexes/index.html).

A committee, which Stoxx says includes representatives of the Vatican, screens shares, which are drawn from the Stoxx Europe 600 Index.<sup>49</sup>

Note the Stoxx Europe Christian Index tracks shares of individual companies, thereby meeting investor demand for buying and selling equities in specific companies, as distinct from funds.

Such indices bolster the transparency of the market and empower investors to make choices with fuller, though not necessarily full, information. Armed with such information, however, it becomes clear that often there is a trade-off between sticking to principles of conscience and maximizing investment returns. The severity of the trade-off depends on the investment vehicles being compared, and the time period of the comparison. Further, it may be difficult to differentiate the cause of differential performance, i.e., whether a socially responsible investment fund underperforms a market index because of values-based strictures on the fund, or because of exogenous economic and political factors affecting investments in that fund.

How does Ave Maria determine if a company in which it is considering an investment violates Catholic teaching? Ave Maria has a Catholic Advisory Board ("CAB") composed of distinguished individuals "familiar with the magisterium of the Roman Catholic Church."<sup>50</sup> The CAB is assisted by a distinguished, senior Ecclesiastical advisor (e.g., a Cardinal), who does not serve in an official role for Ave Maria and thus is independent of Ave Maria.<sup>51</sup> The CAB does not support:

two major categories of companies: first, those involved in the practice of abortion, and second, companies whose policies are judged to be anti-family, such as companies that distribute pornographic material or whose policies undermine the Sacrament of Marriage.<sup>52</sup>

The CAB serves in an advisory capacity and does not itself make investment decisions on behalf of Ave Maria.<sup>53</sup>

Among the religious and moral criteria examined by Ave Maria when making investment choices are policies of an issuer concerning the family. The Catholic Church regards the traditional family as the essential building block of civilization. In respect of anti-family policies, Mr. George P. Schwartz, CFA, founder of Ave Maria, states:

when a company offers to put a non-marital union on par with marriage, it's a slap in the face to the Catholic Church and such companies should be screened out.<sup>54</sup>

<sup>49</sup> David Oakley, *Vatican-Backed Index Aims to Meet Demand for Ethical Stocks*, FINANCIAL TIMES, 27 April 2010, at 13.

<sup>50</sup> Ave Maria Prospectus, *supra*, at 33.

<sup>51</sup> See Ave Maria Prospectus, *supra*, at 33.

<sup>52</sup> Ave Maria Prospectus, *supra*, at 10.

<sup>53</sup> See Ave Maria Prospectus, *supra*, at 33.

<sup>54</sup> William Baue, *Ave Maria Funds Promote Catholic Values Through Morally Responsible Invest-*

Thus, providing benefits to non-marital partners of employees — whether heterosexual, homosexual, or any other category — is sufficient to preclude investment by Ave Maria. However, Ave Maria does not screen out companies that ban employment discrimination based on sexual orientation.<sup>55</sup>

The job of the CAB — to discern religiously and morally acceptable investments — is not always easy. In turn, decisions about investing may not always be consistent, or even transparent. Consider Wal-Mart and Lockheed Martin. These two companies have policies banning employment discrimination based on sexual orientation. Ave Maria previously invested in them (as of 2003).<sup>56</sup> Yet, Wal-Mart sells both barrier contraceptives and, in its pharmacy (as of 2006), abortifacient drugs (namely, the morning-after pill).<sup>57</sup> Ave Maria funds no longer hold investments in Wal-Mart. As for Lockheed Martin, which is a defense contractor, weapons manufacturing poses a Catholic theological objections. It appears Ave Maria invests in this company. Still other examples of controversial investment choices concern companies that sponsor gambling, produce tobacco, or are excessive polluters.

## § 32.04 SHARĪ'A COMPLIANT INVESTING

### [A] Defining "Sharī'a Compliant"

Like their non-Muslim counterparts, many Muslim investors are interested in putting their money into vehicles that are acceptable from a religious and moral standpoint. An example of such a vehicle is the Amana Mutual Funds Trust Growth Fund, which is one of several funds sponsored by the Amana Mutual Funds Trust. Funds in this Trust abjure investments in stocks and bonds of companies dealing in alcohol, pork, or pornography, as well as of banks that practice interest (*ribā*).

The size (as of November 2009) of the Islamic financial market, in terms of assets under management in a Sharī'a compliant manner, is around U.S. \$750 billion to \$1 trillion, and growing at a rate of 15-20 percent.<sup>58</sup> This market has caught the attention of non-Muslim investors, both individual and institutional. It must do so if it is to be truly global and deeply liquid. Thus, it is not unusual to see

ing, SOCIAL FUNDS, 12 September 2003, posted at [www.socialfunds.com/news/article.cgi/1219.html](http://www.socialfunds.com/news/article.cgi/1219.html). [Hereinafter, Baue.]

<sup>55</sup> See Baue, *supra*.

banks in Hong Kong, the United Kingdom, and elsewhere offer and invest in such Sharī'a compliant vehicles.

Broadly speaking, "Sharī'a complaint" investing refers to allocating funds into financial instruments, transactions, and markets that are themselves consistent with Islamic Law. In turn, a financial instrument, transaction, or market is "Sharī'a compliant" if it is, along the Scale of Religious and Legal Qualifications (*Al Ahkām Al Khamsa*), at least permissible (*mubāh*) under Islamic Law. Thus, obtaining the imprimatur "Sharī'a compliant" requires filtering out proposed financial products, dealings, and platforms that are *harām* (forbidden), and identifying ones that mix elements that are *harām* and *halāl* (permissible). Some proposals involve indisputably *harām* activities, such as consumption of alcohol, pork, *maisir* (gambling), pornographic products, or violations of human rights, or have obvious forbidden components, such as *ribā* (usury) or *gharar* (uncertainty). Other proposals might blend the forbidden with the permissible, such as the service of alcohol aboard a luxury cruise ship.

Generally speaking, the Sharī'a provides a flexible framework for financial instruments, transactions, and markets. The starting point for "Sharī'a compliance" is that a proposal is permissible unless proven otherwise, rather than every proposal is immediately suspect and assumed impermissible until proven otherwise. This pro-free market orientation is derived from *surah* 2, *ayah* 276 of the Qur'ān:

... God has allowed trade and forbidden usury.<sup>59</sup>

Put simply, unless a proposal is found to have a prohibited () element in it, such as *ribā* (interest) it may go forward.

### [B] Certification from Sharī'a Board

In practice, who defines "Sharī'a compliance"? The answer is a legal scholar, or more typically, a group of them (*fukahā*) assembled into a "Sharī'a Board." Note that an alternative name for a "Sharī'a Board" are "Sharī'a Advisory Committee." Sometimes, a Sharī'a Board bears the rubric "*Majlis of Ulema*," that is, a Committee of Religious Scholars. Like a Board, this *Majlis* would be responsible for issuing a *fatwā* concerning the legality of a proposal.

The importance of this body, gaining its approval, and the considerable variations among opinions depending on the legal scholars, cannot be over-stated:

Each *madhhab* [School of Islamic jurisprudence] is a body of juristic opinions and a related methodology of how to use text, tradition, and reason to understand pure Sharī'a. Historically, the *madhahib* [Schools] frequently interpreted and applied the Sharī'a differently to different factual or structural situations, and there have been variations even within individual schools. Thus, scholars that [*sic*] have specialized in the study of the Sharī'a play a prominent role in the interpretation and application of

<sup>59</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 2:276 at 32 (Oxford, England: Oxford University Press, 2004).

the *Shari'a*, particularly in the field of Islamic finance. Islamic banks and financial institutions, some higher net worth families and individuals, sponsors and developers of *Shari'a*-compliant funds and investment products have retained one or more *Shari'a* scholars, comprising a *Shari'a* board, to assist in making the relevant determinations. The boards oversee the complete range of investment practices as well as the principles, methodology, and operational activities of the entity or individual that has retained that particular board. Each board will certify, pursuant to *fatwa* (juristic opinions; *fatwa* is the singular), *Shari'a* compliance of a given fund, structure, or instrument, usually on a confidential basis on behalf of the retaining party or entity.<sup>60</sup>

Obviously, the key question for approval of a proposed financial instrument, transaction, or market involves an admixture of law, religion, and morality: is the proposal consistent with the *Shari'a*? The idea is to screen out proposals that would violate Islamic Law, but rule in ones that accord with conscientious Muslim precepts about what is fair for individuals and the community.

Given the current *ad hoc* system for opining on *Shari'a* compliance, what, exactly, does a *Shari'a* Board do? That is, how does it go about its work of determining compliance? There is no single template. Consider the context of a Board evaluating a proposal to establish a new investment fund designed to hold assets that are engaged in Islamically-acceptable activities:

The precise role of a *Shari'a* board varies from entity to entity; it is a function of the unique relationship between the individual *Shari'a* board and its related retaining entity. As a general matter it can be said that a *Shari'a* board will perform a number of different roles, including, typically, the following: participation in product development and structuring activities; review and approval of the fund or entity structure and its objectives, criteria and guidelines, and issuance of a *fatwa* in respect thereof; review and approval of disclosure and offering documents, and issuance of a *fatwa* in respect thereof; review, approval and oversight of investment and business operational structures and methodology, and issuance of a *fatwa* in respect thereof; ongoing review, oversight, and approval of transactional or operational variances or applications to unique or changing circumstances; and annual audits of the operations of the fund or entity and issuance of an annual certification of *Shari'a* compliance.<sup>61</sup>

Thus, before launching a new financial instrument, entering into a different transaction, or establishing a new market, the *fukaha*<sup>62</sup> that comprise the *Shari'a* Board discuss and debate the proposal at hand.

Indeed, even before the topic of *Shari'a* compliance rises to the level of the Board, it is likely to have been vetted by lawyers for the financial institution sponsoring the proposal. Every Islamic bank has a Legal Department, sometimes called the

"*Shari'a* Department." Some non-Islamic banks that sponsor Islamic windows, i.e., that offer *Shari'a* compliant financial products, have such Department, or an attorney specializing in Islamic Law. Alternatively, of additionally, these financial institutions may retain outside counsel to opine on *Shari'a* compliance issues.

All of the common Islamic financial transactions are the subject of a *fatwa* for *Shari'a* compliance. For example, savings accounts require scrutiny to ensure they do not involve *riba*, but rather are genuine profit-sharing ventures. That also is true of *sukuk*. If a customer lacks funds to pay the full purchase price of a car, and thus seeks an Islamic auto loan, then the question is whether the resulting *murabahah* transaction (whereby the bank buys and then sells the car at a higher price, with payments from the customer in installments) comports with the *Shari'a*. *Takaful* products must be checked to see that they do not run afoul of the rules about *ghavar*.

### [C] A Sole Certification Authority?

Manifestly, there is no world-wide accreditation agency for determining "*Shari'a* compliance." Consequently:

... Islamic finance tends to develop in a rather disjointed fashion, without coordination across markets or *madhahib*. A different and more coordinative trend is exemplified by the existence and prestige of *Shari'a* boards of institutions such as the Accounting and Auditing Organization for Islamic Financial Institutions (AOIFI), the Fiqh Academy (*Majma' Al-Fiqh Al-Islami*) of the Organization of the Islamic Conference (OIC) (*Munazamat Al-Mu'tamar Al-Islami*), the Islamic Jurisprudence Institute (*Al-Majma' Al-Fiqh Al-Islami*) of the Islamic League (*Rabitat Al-Alam Al-Islami*), the Islamic Development Bank, Bank Negara Malaysia, and Suruhanjaya Sekuriti, Securities Commission, of Malaysia, among others.<sup>62</sup>

Is there an argument for a single, centralized, and transparent *Shari'a* authority?<sup>63</sup>

Such an entity could provide predictability, certainty, and protection to financial market participants, and generally stabilize Islamic financial markets through greater uniformity and integrity. Is it not rather messy to have hundreds if not thousands of *Shari'a* Boards? Is it also not rather inefficient, given the dearth of *bona fide* experts in Islamic finance, to have many banks chasing a limited pool of talent? Moreover, the *status quo* has provoked the cynical charge that all a financial institution need do when proposing a *Shari'a* compliant product is rent the right *imam* to get the right *fatwa*. Finally, a single authority might prevent regionalization of Islamic financial markets, and promote *Shari'a*-compliant investment vehicles world-wide.

<sup>62</sup> McMillen, *supra*, fn. 8 at 1019-1020.

<sup>63</sup> See, e.g., Kevin Brown, *Malaysian PM Warns Islamic Financial Sector*, FINANCIAL TIMES (3 November 2009), posted at [www.ft.com](http://www.ft.com) (quoting Dr Abbas Mirakhor, a former executive director of the International Monetary Fund (IMF), who has called for a transnational regulatory authority to replace the myriad of *Shari'a* Boards and individual Islamic scholars: "It is possible to standardise and harmonise across borders a system of sharia rulings that would obviate the need for every bank and every instrument to have its own sharia boards.").

<sup>60</sup> Michael J.T. McMillen, *International Legal Developments in Review: 2007 — Islamic Law Forum*, 42 THE INTERNATIONAL LAWYER 1017, fn. 8 at 1019 (Summer 2008) (emphasis added). [Hereinafter, McMillen.]

<sup>61</sup> McMillen, *supra*, fn. 8 at 1020.

However, there are strong counter-arguments. A sole, global Islamic financial regulator might squelch innovation. Competition and creativity go hand-in-hand. Arguably, the idea of unifying rule and regulator might be akin to Closing the Gate to *Ijtihād*. Consider the conversation between *Imām* Mālik and Caliph Harūn Al Rashid during the *Abbasid* Caliphate. Caliph Harūn Al-Rashid asked *Imām* Mālik if he wished to have his book as the law that governs the entire Islamic Empire. The Caliph replied:

O Abū Abdullah [*i.e.*, the Caliph refers to the *Imām* in a respectful manner as “Father of Abdullah,” with Abdullah being the eldest son of *Imām* Mālik], if you wish, we could write this book and hold people to use it. *Imām* Mālik said, “O Emir of All Believers, the difference in the perspectives [views] among the *ulema* [and *fuqahā*] is a mercy for the nation [the Caliphate] from Allāh — the Almighty — everyone follows the right he or she has and they all follow the right path to Allāh.”<sup>64</sup>

That is, relying on *Imām* Mālik, the Caliph articulated the idea that differences, so long as they are not errant deviations, lead to the same end.

Still another argument against a single entity is that it could be captured by the institutions it purportedly oversees. It also could become the playground of a corrupt cabal. Finally, there would be a major problem of coordination between a sole Islamic regulator national-level banking supervisors, such as the United States Federal Reserve, and respect for the sovereign concerns of the individual countries.

<sup>64</sup> Quoted from an article written by Dr. Abdullah Mahfoudh Beyh (former Minister of Justice of Mauritania), posted at [www.islamtoday.com](http://www.islamtoday.com) (2 August 2004, 1425 166 A.H.) (translated from Arabic by Mr. Ahmed Alyousef). The exact date of this conversation is not available. The Caliph who talked to *Imām* Mālik was Harūn Al Rashid, the fifth and most famous of *Abbasid* Caliphs, who ruled from 786-809 A.D. His interests were eclectic, covering culture and science as well as religion, and he established the famous Baghdad library, the “*Bayt Al-Hikmah*” (House of Wisdom).

## PART NINE

### FAMILY LAW AND WOMEN

## Chapter 33

### MARRIAGE AND DIVORCE

---

Love seems the swiftest but it is the slowest of all growths. No man or woman really knows what perfect love is until they have been married a quarter of a century.

Mark Twain (1835-1910, American author and humorist)  
(posted at [www.muslim-marriage-guide.com](http://www.muslim-marriage-guide.com))

#### SYNOPSIS

##### § 33.01 UNDERLYING THEORY

- [A] Three Persons in Marriage?
- [B] Sacrament or Contract?
- [C] Between Man and Woman?
- [D] Importance
- [E] Addressees and Effects
- [F] Incongruity and Orientalist Fallacy

##### § 33.02 MARRIAGE (NIKĀḤ)

- [A] Overview of Marriage Contract
- [B] Witnesses and Conclusion
- [C] Impediments to Marriage
- [D] *Fāsīd* (Voidable) versus *Bātil* (Invalid) Marriage Contracts

##### § 33.03 AUTHORITY OF LEGAL GUARDIAN (WALĪ)

- [A] Minor Female and Controversial Right of Rescission
- [B] Mature Female and Controversial Objection Based on Equality of Birth

##### § 33.04 DIVORCE

- [A] Overview of Methods
- [B] Repudiation (*Ṭalāq*)
- [C] Oath of Abstinence (*Iḥā'*)
- [D] Separation (*Tafriq*)
- [E] Unchastity (*Li'ān*)
- [F] Apostasy (*Riddah*)
- [G] Waiting Period (*Idda*)

##### § 33.05 MODERNIST LEGISLATION ON DIVORCE

##### § 33.06 *SHĪ'ITE* DISTINCTION: TEMPORARY MARRIAGE (*MUT'Ā*)

### § 33.01 UNDERLYING THEORY

#### [A] Three Persons in Marriage?

A not uncommon characterization among Christians is that there are three persons in every marriage: the husband, the wife, and God. That is, God joins a man and woman together, giving each of them the gift of the other and uniting them as one. The marriage is more than a contract between the husband and wife. It also is a covenant they jointly make with God. (In this sense, a "contract" involves a promise between two or more persons to each other, but a "covenant" is a promise between one or more persons and God.) Of course, it is up to them, as husband and wife, to remain open to His presence in their union, and to appreciate how they love each other is a direct manifestation of how they love God. This characterization is based on Biblical passages, and interpretations of them, on marriage. The characterization is visually evident in the bedrooms of some Christian couples, in which a Crucifix or Cross is displayed prominently.

Do Muslims also speak of three persons in a marriage? The answer is "no," at least not commonly or explicitly. That is understandable, in the sense that the Doctrine of the Trinity — three Persons in One God — is rejected in Islam. The *Shari'a* expressly treats marriage as a contract between the bridegroom and the male guardian of the bride. But, in another sense, it would be wrong to infer Muslims reject the idea that God (Allāh) is not a force in marriage. He is a foundation of the unity of husband and wife from which they derive strength in good times and bad. As in Christian marriages, among Muslim ones, the extent to which that force is expressly recognized differs from one couple to another.

#### [B] Sacrament or Contract?

Catholic Christianity understands a "sacrament" to mean an outward, visible sign of inner, invisible grace instituted by Jesus Christ and entrusted to the Church for our salvation.<sup>1</sup> There are seven sacraments: Baptism, Reconciliation (Confession, or Penance), Communion (the Eucharist), Confirmation (Chrismation), Matrimony (Marriage), Anointing of the Sick (Last Rites), and Holy Orders.<sup>2</sup> The first six sacraments pertain to all laity, while the last sacrament concerns the ordination of priests and implicates the doctrine of apostolic succession. Each of these sacraments is rooted in one or more passages from the New Testament, and through each of them, Divine life is imparted to a recipient who has the appropriate disposition. The key point, for present purposes, is that marriage is one of the sacraments. As such, it is through the vocation of marriage that a husband and wife are called to be not just good, but also holy, and help each other toward eternal life in Heaven.

<sup>1</sup> See CATECHISM OF THE CATHOLIC CHURCH ¶¶ 1114-1116 at 289, ¶ 1131 at 293 (United States Catholic Conference, Inc., Washington, D.C.: Libreria Editrice Vaticana, 2nd ed. 1997) (especially *Part Two: The Celebration of the Christian Mystery*). [Hereinafter, CATECHISM.]

<sup>2</sup> See CATECHISM, *supra*, ¶ 1113 at 289.

As part of a secular legal system, American Family Law does not treat marriage as a sacrament. The important issue is not the relationship of the couple to God, or even whether the couple believes in God. Rather, this system focuses on the establishment of conditions for a valid marriage under the laws of the country (*i.e.*, criteria for issuance of a marriage license), and the recognition of that marriage throughout the entire country (*i.e.*, in the context of American federalism, that each state accept marriage licenses issued by each other state according to the Full Faith and Credit Clause of the Constitution). Accordingly, in the American legal tradition, marriage is nothing more (or less) than a contract between two persons given legal effect by a governing authority.

The *Shari'a* is, of course, a sacred legal system. Does it view marriage as a sacrament? The answer is "no." But, that is because Islam is not a faith based on sacraments. Does Islamic Family Law view marriage as a covenant between either or both the husband and wife, on the one hand, and God (Allāh), on the other hand? It does not do so explicitly, but it also does not rule out this view. It is a matter left to the privacy of the husband and wife. They are free to regard each other as a Divine gift to the other, and to view their loving treatment of each other as a religious expectation on which they will be judged by Allāh. Many Muslim couples do indeed take this view, though these happy marriages are not held to be newsworthy by the mainstream media in the non-Muslim world, which tends to dwell on cases of abuse and exploitation.

Thus, on the view of marriage, despite being a sacred legal system, the *Shari'a* is more analogous to secular American Family Law than to Catholic Christian teaching. Marriage in Islamic Family Law is a contract. Professor Hussain writes:

Marriage is a contract, not a sacrament, as it is in Hinduism and Christianity. However, the contract does have religious overtones. Although it is not strictly essential, in most cases there will be some religious ceremonies associated with the marriage. Also, many of the rules and principles pertaining to marriage are laid down in the *Quran*, and elaborated on in the *Sunnah* of the Prophet.<sup>3</sup>

But, the analogy is not perfect.

First, a religious official — an *imām* — is present at a marriage ceremony, and readings from the Qur'an are typical. His presence is required from a religious perspective to confer a valid Muslim marriage. Under American Family Law, a lay person, such as a justice of the peace, with no religious credentials, can marry two persons, so long as that person is authorized to do so by the relevant governing authority. In other words, the ceremony itself, and the issuance of a marriage license, can be entirely devoid of religious content. Second, Islamic Law forbids same-sex marriages or unions. In contrast, such unions — even with the rubric "marriage" — are permissible in certain states of the United States. This issue remains a hotly contested one, and such "marriages" have been specifically outlawed in other states, akin to the treatment under the *Shari'a*. Third, Islamic Family Law identifies categories of impediments that make marriage impossible.

<sup>3</sup> JAMELA HUSSAIN, ISLAMIC LAW AND SOCIETY — AN INTRODUCTION 60 (Annandale, New South Wales, Australia: The Federation Press, 1999). [Hereinafter, HUSSAIN.]

These categories are not identical to the ones under American Family Law. (The second and third points are discussed more fully below.)

### [C] Between Man and Woman?

Christianity explicitly articulates the idea of three persons in a marriage, and Catholic Christianity views marriage as a sacrament. Islam does not explicitly articulate this idea, and approaches marriage as a contract. Yet these distinctions do not mean Christianity and Islam differ completely on their theory of marriage. An important area of agreement is that under the *Shari'a*, as in Catholic Christian teaching, a "marriage" is a bond between a man and a woman. Professor Hussain observes:

Homosexuality is forbidden in Islam and so it is an essential requirement that one party be male and the other female. In Malaysia, the *Islamic Family Law Enactment* 1983 of Kelantan specifies in the Fourth Schedule that marriage requires as an essential condition a prospective husband who is male and a prospective bride who is female.<sup>4</sup>

Same-sex unions do not carry the label "marriage," and indeed are not legally recognized in any Muslim country. In either a Catholic Christian or Islamic paradigm, such unions cannot carry that label. Both Catholic Christianity and Islam understand God to have created men and women for each other, going back to the first man and first woman. In each paradigm, the essential, distinctive feature of a "marriage" is the ability of the two persons in the union to procreate. Both paradigms look askance at homosexual actions.

Catholic Christianity insists that the family is the fundamental building block of civilization. Pope John Paul II warned of attacks on the family unit — from regimes of political economy like communism and fascism to norms in modern culture such as materialism and secularism. He observed the weakening of the family unit as a characteristic of the decline of previous civilizations, including Ancient Rome, and himself lived through many "isms" of the 20th century in which proponents of one or another ideology sought to supplant family ties with loyalty to a collective body or governing authority. Regulation of the fertility of women, such as the infamous "One Child" policy of the Chinese Communist Party (CCP), was a particularly brutal attack on the family, with the primary and immediate victims being aborted children.

In general, Islam shares these perspectives. That is not to say all Muslims agree on each and every point, or articulate the points the same way. Rather, it is to say that the overarching observation that the family is a (if not the) bedrock of civilization, and that it has been under attack is widely shared. Tellingly, Professor Schacht observes:

The family is the only group based on consanguinity or affinity which Islam recognizes.<sup>5</sup>

<sup>4</sup> HUSSAIN, *supra*, at 61.

<sup>5</sup> JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW 161 (Oxford, England: Oxford University Press (Clarendon Paperbacks) 1982). [Hereinafter, SCHACHT.]

In other words, Islamic Law does not recognize tribal, ethnic, linguistic or other ways of delineating one group of people from another, simply "because the solidarity of believers [*i.e.*, a sense of community unified by Islam] should supersede" these other centripetal forces. After all, the Qur'an contains more than a few verses, and the Prophet Muhammad spent more than a bit of time, de-emphasizing tribal-like behavior and clan-like sentiments. As for the acute threats to the family in current times and the last several decades, many Muslims suggest they come from the non-Muslim western world, where materialism and secularism are rampant. Many Catholic Christians agree.

### [D] Importance

Given the emphasis Muslims traditionally place on the family, it should come as no surprise that Family Law is an important field within the *Shari'a*, one to which religious and legal scholars (*ulema* and *fukahā'*, respectively) over the ages have devoted a considerable degree of thought and writing. Along with Criminal Law, Family Law is the area of Islamic Law about which non-Muslim westerners, and lawyers in the American tradition, are most likely to have heard about. The basic familiarity is not surprising. These two areas of law are where some of the most striking differences between the Islamic and American legal systems are most pronounced (though perhaps they are overstated). Points of contrast tend to pique the interest of lawyers at least as much as points of similarity. Moreover, both Family and Criminal Law are treated extensively in the Qur'an, especially in *suras* 2 and 4, but also in many scattered *ayat*. In turn, in mainstream media coverage and everyday conversations in the non-Muslim western world, questions along the lines of "What does the Qur'an say about this?" or "Does the Qur'an really say that?" often are posed.

Further, given the nature of the *Shari'a* as a sacred legal system, it should not be surprising that the impulse behind Islamic Family Law is like that behind other specialty fields: to provide a religious and ethical basis for relationships and transactions, in this instance, those pertaining to the family. Thus, the Qur'an and other classical sources of Islamic Family Law — that is, the tradition of the Prophet (*hadith*), analogical reasoning (*qiyās*), consensus (*ijma'*) — deal with normative questions. The foundational question is: how should one act according to one's position in a family? The answer — the substantive content of the rules — is imbued with a distinctly spiritual and moral character. Indeed, it is hard to imagine an area of the law that the average Muslim would regard as more closely connected with religion than Family Law and Criminal Law.

### [E] Addressees and Effects

To answer the foundational normative question of how one ought to behave toward one's family members, Islamic Family Law provides many rules on how one ought to act toward five categories of people:

- (1) Women
- (2) Children
- (3) Relatives

- (4) Dependents, and
- (5) Orphans.<sup>6</sup>

Thus, Islamic Family Law has a large scope. This scope covers anyone connected to a family unit through blood, marriage, or certain dependency categories. Anyone with that connection is an addressee of a potentially relevant *Shari'a* rule, along with the other person involved (e.g., a woman, child, or parent). The exact rule and its applicability depend on the status, within the family unit, of the person whose act is in question.

Once the relevant rule is identified, and — presumably — followed by the person, what legal effect occurs? The answer is validity. The act at issue is determined to be valid or invalid. For example, the act might be a marriage or divorce, or concern guardianship, and the event might be either planned for the future or already have transpired. The rule establishes whether the future or past marriage or divorce will be, or was, valid, and likewise with a guardianship. Thus, the legal effect of following *Shari'a* rules on Family Law is quite similar to the repercussions of following Islamic rules on Contracts — those rules determine whether an obligation is valid or not.

Interestingly, neither Islamic Family Law nor Islamic Contract Law deals extensively with the effects of a breach. Common sense would say that a family "transaction" effected in violation of a prohibition is invalid. That consequence indeed is the case. But, the source of this rule is the *Sunnah*, not the Qur'an. That is to say, the Qur'an contains almost no technical provisions about the legal consequences of failure to fulfill one or the other of the various family obligations, i.e., about the legal ramifications of a factual predicate in which *Shari'a* obligations have been breached. Rather, the *Sunnah* is the source for the legal effect of actions contrary to the rules.

## [F] Incongruity and Orientalist Fallacy

Under the classical theory of Islamic Law, that is, the conventional approach to the *Shari'a* following in particular the Qur'an and *Sunnah*, traditional family values are championed, and women are protected. Yet, by many modern-day standards — the normative benchmarks found in international agreements and in American Law — the *Shari'a* rules on the family and inheritance raise serious controversies as to the rights of women. That is true in a *de jure* and *de facto* sense: the substantive nature of the rules, and the way in which rules are applied in practice, sometimes seem anything but supportive of the family or women. Thus, there is an incongruity between the:

- (1) ideal type, i.e., the idealized self-image of Islamic Family Law as it has been conventionally defined and elaborated, and;
- (2) measurement of Islamic Family Law against norms from an international or comparative perspective.

<sup>6</sup> It also has rules on behavior toward a sixth category — slaves. Such rules are not treated herein, given the *de jure* and (in most countries) *de facto* bans on slavery around the world.

This incongruity becomes evident every time a news story appears about the mistreatment of women in an Islamic jurisdiction.

How is this incongruity to be dealt with? One argument is to justify Islamic Family Law, in both theory and practice, as the will of God (Allāh) *per se*. In itself, that is viewed by some Muslims as both a necessary and sufficient defense. There are obvious problems with this rationale. First, not everyone, even among Muslims, accepts the defense as sufficient. It is in the nature of the human intellect to use reason, and search for a rationale that buttresses a justification from faith alone. Faith alone can lead to blind and unquestioning adherence, and thereafter, misinterpretation and extremism. Reason alone is cold, lacking the characteristics of mercy and forgiveness that are endemic to faith, and can yield inhumane outcomes. Thus, as Popes John Paul II (particularly in his September 1998 Encyclical Letter, *Fides et Ratio* (*Faith and Reason*)) and Benedict XVI (for example, in his controversial September 2008 at the University of Regensburg) have urged, both faith and reason should be employed to shed greater light on issues and problems, and to lead people to a closer union with each other and God.<sup>7</sup>

A second argument is to justify Islamic Family Law by looking not to the present for a benchmark, but to the remote past. Never mind a comparison between the *status quo* in some Islamic jurisdictions and *status quo* in the United Kingdom or United States. Why not contrast the *status quo* in Muslim communities with the *status quo ante*? Surely the rules, and the lot of the addressees of those rules, are much better than what they were before the advent of Islam on the Arabian Peninsula. That is, surely the *Shari'a* is a significant improvement over the customary law of the Bedouins.

This argument rationalizes Islamic Family Law by juxtaposing it with an earlier historical and legal context. For example, the Qur'an condones polygamy, allowing a man to marry up to four wives, if he treats them equally. But, so the argument goes, before Islam, sexual promiscuity was rampant, and the distinction between marriage and concubinage (i.e., status as a wife versus a prostitute) was blurry. Like that of women, the position of orphans was weak, insecure, and often exploited. Islamic Family Law protects women from being treated as sexual objects, and orphans from being abused, as they often were in the culture of the ancient Bedouins. In brief, Qur'anic injunctions are not only the will of God (Allāh) *per se*, but also his specific will to improve the condition of the family and its dependents vis-à-vis their condition before His revelation of the sacred text to the Prophet Muhammad. Put directly, God gave the *Shari'a* to man to make families better off than what they were before Islam.

As with the first argument, the second argument has its deficiencies. First, the argument does not preclude the possibility that Islamic Family Law can evolve in a manner to improve yet more the condition of families and their dependents. If the *Shari'a* is viewed as a static, adamant legal system, the Qur'an is read inflexibly, and the *Sunna* applied with no creativity, then there is no basis for the proposition that God (Allāh) forbade Muslims from continually strengthening family life, and rather expects the benchmark for quality to be fixed as of 570/571 A.D. (the year

<sup>7</sup> See [www.vatican.va](http://www.vatican.va) and [www.catholicculture.org](http://www.catholicculture.org), respectively.

Muhammad was born) or 609 A.D. (the year before the first revelation to Muhammad).

A second weakness concerns the Orientalist Fallacy. This Fallacy is an accusation leveled by some Muslim scholars at some non-Muslim British, Continental, and American scholars of Islam, particularly ones who worked in the 19th and 20th centuries. These "Arabists," as they were sometimes called, examined Islam from the perspective of history, specifically, the cultural, economic, legal, social, and political climate in which it was born and developed. The criticism is they failed to take Islamic Law on its own terms, as a sacred legal system revealed by God (Allāh) for all people and all times. Instead, they tried to explain the *Shari'a* as a reaction to one or another condition, and thus imply Islam does not have a universal and eternal message.

The second argument is an example of the Orientalist Fallacy — yet, ironically, committed by some Muslims in defense of Islamic Family Law. To argue the *Shari'a* improves the lot of families and their dependents relative to pre-Islamic conditions is to suggest the *Shari'a* was a response to those degrading conditions. It is a defense of the Word of God (Allāh) based on extrinsic environmental factors. The argument bounds Islamic Family Law in time and place, namely, the Arabian Peninsula before Islam. In turn, the argument fails to defend Islamic Family Law today. Now that the pre-Islamic conditions no longer exist, it becomes difficult to justify some Islamic Family Law rules and practices. Therefore, the *Shari'a* has served its purpose (narrowly defined), and today it must either be overhauled, or abandoned. Surely this outcome cannot be what proponents of the argument seek.

Thus, the incongruity remains unresolved. In the intervening centuries following the birth and spread of Islam, and subsequent to which the American legal system developed, remarkable progress has been made as to the theory and practice of Family Law. Justifying Islamic Family Law using such an outdated historical point of reference is little else than a recipe for *stasis*. As long as that reference point is used, how can modern developments — including standards about the rights of women and children — be imported into Islamic Law without, of course, that Law losing its central features? This question is one of the central challenges facing not just Islamic Family Law, but also Islamic Criminal Law, and indeed the entire *Shari'a*.

### § 33.02 MARRIAGE (NIKĀH)

#### [A] Overview of Marriage Contract

The Arabic term for "marriage" is "*nikāh*." A *nikāh* occurs between a male bridegroom and a female bride. The result of the marriage is the status of the bridegroom becomes that of a husband, called the "*zawj*," and the status of the bride becomes that of a wife, called the "*zawja*." The marriage itself is a contract under the *Shari'a*.

Critically, Professor Schacht reports "the bridegroom *concludes* the contract with the legal guardian (*wali*) of the bride. . . ." <sup>8</sup> Much turns on what he means by "concludes." One understanding is the marriage contract is between not bridegroom and bride, but rather bridegroom and *wali*. In truth, whether, as a matter of law, the *nikāh* contract is between the bridegroom-husband and guardian of the bride-wife is a matter of debate among Islamic legal scholars. Accordingly, Professor Ali states that "[t]he spouses may or may not conclude the contract themselves." <sup>9</sup> Some renditions of the rule indicate the presence of a *wali* is a condition for the contract, but not an essential element thereto.

Given that in some circumstances a wife has a right to rescind the contract, her being akin to a third rather than principal party to the agreement would seem odd. Moreover, in everyday family life, the marriage is between the husband (*zawj*) and wife (*zawja*). Still, here lies a contrast between Islamic and American Family Law. Under the other legal systems, marriage unambiguously occurs between the bridegroom and bride. As child marriage generally is illegal, in respect of the man, the bridegroom no longer is under any guardianship. Unless he is married off as a child, he is an adult and is his own guardian. But, under the *Shari'a*, a woman has a guardian throughout her life. This legal guardian is called the "*wali*." The *wali* is the male — and the guardian must be a male — relative who is closest, in terms of family ties and in the order of succession, to the bride. If there is no *wali*, then an Islamic judge (*qāḍī*) may serve the role.

In the marriage contract, the bridegroom agrees to pay a nuptial gift, called a "*mahr*" or, in English, a dowry. This payment is made directly to the new wife, not to the *wali*, and becomes and remains her property. In pre-Islamic times, the payment was made to the *wali*, was under his control, and was vulnerable to mismanagement or misappropriation by him. Hence, at the risk of commission of the Orientalist Fallacy, the *Shari'a* rule implies an improvement in the status of women relative to those times.

Once married, the contract confers distinct powers on the husband (*zawj*) and wife (*zawja*). A wife has a right to maintenance from her husband. Moreover, she may choose to eschew a long voyage with her husband, and hold her children back from such voyages. But, as Professor Schacht points out, the husband has "a limited right of correction." <sup>10</sup> He may forbid his wife from leaving the house, and limit access of her relatives to see her. Her disobedience may cause her to lose her right of maintenance. Even more ominously, this right of correction sometimes is understood — or misunderstood — to include physical punishment of the wife.

<sup>8</sup> SCHACHT, *supra*, at 161 (emphasis added).

<sup>9</sup> Kecia Ali, *Marriage in Classical Jurisprudence: A Survey of Doctrines, in THE ISLAMIC MARRIAGE CONTRACT — CASE STUDIES IN ISLAMIC FAMILY LAW* 11, 13 (Cambridge, Massachusetts: Islamic Legal Studies Program, 2008, Asifa Quraishi & Frank E. Vogel eds.). [Hereinafter, Ali.] Parts One and Two of this book contain essays on Islamic marriage in comparative and historical perspective, respectively. Part Three discusses modern practices and reforms, and Part Four discusses Muslim marriages under German and English law.

<sup>10</sup> SCHACHT, *supra*, at 166.

## [B] Witnesses and Conclusion

There must be witnesses to any marriage (*nikāh*) contract, though even this requirement, as well as the qualifications of any requisite witnesses, are matters of debate among the Four *Sunni* Schools and *Shī'ites*.<sup>11</sup> Generally, the contract is concluded by a bridegroom-husband (*ṣawḡ*) and guardian (*walī*) of the bride-wife (*ṣawja*) in the presence of witnesses. Those witnesses must be two men, or under *Ḥanafi* School teaching, one man and two women.<sup>12</sup> The exclusion of female witnesses by the *Mālikī*, *Shāfi'i*, and *Ḥanbali* Schools, and the latter flexibility under the *Ḥanafi* School, unfortunately imply the evidentiary value of a woman is either zero or half that of a man. Both implications have no basis in reality.

As Professor Schacht points out, there are two reasons for the requirement of witnesses.<sup>13</sup> The first, and more obvious, justification is to offer proof of marriage in the event that is needed. The second reason is to offer proof of chastity (for example, that the bride is a virgin). The contract ought to be memorialized in writing, but Muslim jurists do not require a writing, at least not if the agreement is property witnessed.<sup>14</sup>

Interestingly, for a marriage to be valid, the *Sharī'a* requires only the marriage contract itself. Whether there is privacy — called "*khalwa*" — between husband (*ṣawḡ*) and wife (*ṣawja*) is legally irrelevant to the conclusion of a marriage. Likewise, and perhaps even more surprisingly, consummation through sexual intercourse is not essential for the purpose of concluding a legally valid marriage. Consummation of a marriage through intimate relations is known in Arabic as "*dukhūl*." However, *khalwa* and *dukhūl* may be legally relevant if the marriage is subsequently dissolved.<sup>15</sup>

## [C] Impediments to Marriage

In addition to concerns about equality of birth, there are reasons why a marriage (*nikāh*) might be blocked. These reasons are known as "impediments" to marriage, and for the most part are obvious restrictions on the choice of a prospective spouse. The operative provision in the Qur'ān is *surah 4, ayat 22-24*:

<sup>22</sup>Do not marry women that your fathers married — with the exception of what is past — this is indeed a shameful thing to do, loathsome and leading to evil. <sup>23</sup>You are forbidden to take as wives your mothers, daughters, sisters, paternal and maternal aunts, the daughters of brothers and daughters of sisters, your milk-mothers and milk-sisters [*i.e.*, women who breast feed the infant of another couple], your wives' mothers, the stepdaughters in your care — those born of women with whom you have consummated marriage, if you have not consummated the marriage, then you will not be blamed — wives of your begotten sons, two sisters

simultaneously — with the exception of what is past: God is most forgiving and merciful — <sup>24</sup>women already married, other than your slaves: God has ordained all this for you.<sup>16</sup>

Evidently, the impediments are based on a blood relationship between a prospective bridegroom and bride. If a certain blood relationship exists, then marriage is not possible.

Based on the above-quoted provision, the *Sharī'a* delineates three broad categories of impediments to marriage:

### (1) Non-marriageable persons (*Maḥārim*) —

The Arabic term "*maḥārim*" means non-marriageable persons, or more technically, persons related to one another within a forbidden degree of closeness. (The singular term is "*maḥram*." Such persons cannot be married. Who, exactly, are the "*maḥārim*"? They are the following persons in relation to a man:

- Female descendants (*e.g.*, daughters, granddaughters)
- Female ascendants (*e.g.*, mothers, grandmothers).
- Wives of a female descendant.
- Wives of a female ascendant.
- A sister.
- The female descendants of a sister (*e.g.*, a niece or daughter of a niece).
- The female descendants of a brother (*e.g.*, a niece or daughter of a niece).
- An aunt (whether paternal or maternal).
- The sister, or the aunt, of an ascendant (*i.e.*, the sister or aunt of a father or mother, or grandfather or grandmother).
- A mother-in-law (*i.e.*, the mother of a wife), or any other female ascendant of a wife (*e.g.*, the grandmother of a wife).
- A step-daughter (*i.e.*, the daughter of a wife, where the father is another man), and any other female descendant of a wife (*e.g.*, a grand-daughter).

Thus, a man cannot marry a *maḥram*. This list of *maḥārim* is not controversial. It corresponds to incest rules in American Family Law.

### (2) Foster children (*Raḍā'*) —

The Arabic term "*raḍā'*" means "fosterage," which refers to a relationship between or among children through nursing. Even the smallest degree of sucking at the same breast, if done during the first 2 ½ years of life, creates a fosterage relationship between the babies. The wet nurse is thus akin to the mother. Children nursing with the same wet nurse are forbidden from marrying one another, *i.e.*, a

<sup>16</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 4:22-24 at 52-53 (Oxford, England: Oxford University Press, 2004). [Hereinafter, QUR'AN.]

person cannot marry his foster-brother or foster-sister. Professor Schacht observes that two of the impediments can work together and cause blockage of a marriage.<sup>17</sup> For example, a person cannot marry the sister of his foster-mother.

(3) Simultaneous marriage of related women (*Jam'*) —

"*Jam'*" means "combination." It is forbidden to marry two or more women simultaneously who themselves are related within a forbidden degree (*maḥārim*) or connected by fosterage (*radā'*). Not all of the women pose an impediment to marriage — one of them could be married, but not the others. The quintessential example would be a man attempting to marry simultaneously two women who are sisters. The combination (*jam'*) of the two sisters into wives of this man is an impediment to the marriage, making it legally impermissible as well as religiously forbidden.

Further, a man cannot marry simultaneously two women if one of them has an affinity that acts as an impediment to marriage. As Professor Schacht explains, such an affinity can result from sexual interaction short of intercourse.<sup>18</sup> For instance, suppose a man has two wives. One of the wives kisses her step-son (the son of her husband and the other wife) in a lustful manner. That lustful kiss establishes an affinity between the wife and her step-son that becomes an impediment to marriage, namely, the marriage of the wife with her husband. The result is that both of the husband's marriages become legally invalid. They remain invalid until the husband chooses a wife as between the two women. Another example is where there is lustful contact between the two women. The logic is that there cannot be a combination — two or more marriages — if one element of the combination is defective, in the sense of a wrongful relationship.

Additionally, Professor Schacht observes that the *Shar'ā* contains the principle "that adultery creates an impediment to marriage."<sup>19</sup> This principle, he says, is derived from Roman Law, specifically, of the late Byzantine Period, i.e., the Canon Law of the Eastern Churches. It is manifest in both *Sunni*te and Twelver *Shī'ite* Law, as well as the teachings of the Roman Catholic Church.

From an American legal perspective, what is perhaps most striking about the three impediments is what is not considered a barrier to marriage. Consider two categories of persons related to a prospective bridegroom-husband (*zawj*) who, under the *Shar'ā*, are not on the list of *maḥārim*:

- A first cousin.
- The half-sister of a half-brother from another marriage.

In other words, first cousins can marry under Islamic Family Law, whereas such marriages are illegal as incestuous in nearly all (if not all) American jurisdictions. That is true despite the serious genetic risks associated with children of first cousins. It is well known that birth defects are commonly associated with marriages

between first cousins. Tragically, such defects are observed among Arab countries of the Persian Gulf, and in Pakistan. They occur among some high-class and royal families, in part because of their fixation on equality of birth (discussed earlier) among husband and wife.

As for a half-sister of a half-brother, who is considered marriageable, consider the following hypothetical. Assume Nawazish and Zakir have the same father, but different mothers. They have different mothers because their father had more than one wife, which could occur through a polygamous marriage. Nawazish and Zakir are half-brothers. Suppose that from the marriage of their father with a third woman, there is a daughter. That daughter is the half-sister of Zakir. Nawazish could marry her.

### [D] *Fāsid* (Voidable) versus *Bātil* (Invalid) Marriage Contracts

As is true for much of the *Shar'ā*, in Family Law — in particular, the contract of marriage — there is a distinction between "*fāsid*" and "*bātil*." A marriage (*nikāh*) contract that is "*fāsid*" is defective or voidable. In contrast, a marriage contract that is "*bātil*" is invalid, or null and void. What facts make a marriage *fāsid* as distinct from *bātil*? The answer is formulated case-by-case — "casuistically," as Professor Schacht puts it.<sup>20</sup>

To illustrate the distinction between *fāsid* and *bātil* contracts, consider the following hypothetical. Suppose a *fāsid* marriage is consummated (*dukhāl*). That is, the marriage contract is entered into, and the couple engages in intimate relations. Yet, the contract is *fāsid* — defective or voidable. What are the legal consequences? There are three principal ramifications:

- (1) Any children born are considered legitimate.
- (2) The husband (*zawj*) must pay to the wife (*zawja*) a nuptial gift (*mahr*).
- (3) If the marriage is dissolved (i.e., it is voided), then the wife must observe the prescribed waiting periods (e.g., for remarriage).

Suppose one fact is altered in the above hypothetical: the marriage contract that was concluded is *bātil* (invalid), not *fāsid*. What, then, are the legal consequences?

The answer is all the legal repercussions change. The children are illegitimate. The "husband" (which the man technically is not, as the marriage is invalid) need not pay a *mahr*. The "wife" (which she technically is not) need not follow any waiting periods.

<sup>17</sup> See SCHACHT, *supra*, at 162.

<sup>19</sup> SCHACHT, *supra*, at 21.

<sup>20</sup> SCHACHT, *supra*, at 163.

### § 33.03 AUTHORITY OF LEGAL GUARDIAN (WALĪ)

#### [A] Minor Female and Controversial Right of Rescission

Throughout the Islamic world, in a variety of transactions, it is common to use an agent, or "*wakil*." That is true in business transactions, wherein a principal may delegate authority to enter into certain obligations to a *wakil*. An agent in the context of Islamic Family Law is called a "*wali*," who is a legal guardian. In other words, a *wali* connotes a specific type of agency relationship. Likewise, another particular kind of agency relationship, which arises in Islamic Inheritance Law, is a *wasī*. A "*wasī*" is a legal guardian appointed by testament (*i.e.*, in a will) as executor of an estate.

A *wali* exists not only for a woman throughout her life, but also may be appointed to safeguard the interests of a minor, *i.e.*, a child before the age of puberty. As Professor Schacht reports, the *wali* is the "nearest male relative of his female relations, and of his minor male relations."<sup>21</sup> Typically the *wali* of a woman would be her father (before marriage) or husband (after marriage). If the father or husband dies, then the grandfather, eldest uncle, or eldest brother of the woman are likely candidates for succeeding as *wali*. This pattern also holds true in respect of guardianship of a minor. Only one *wali* exists at a time. A woman or minor does not have multiple simultaneous guardians.

A *wali* holds the authority of a parent with respect to a woman or child. Thus, the *wali* has the legal ability to give away in marriage a female relative for whom he serves as *wali*. That is why the contract for marriage (*nikāh*) technically is between the bridegroom-husband and *wali*, and again is a major contrast between the *Shari'a*, on the one hand, and American Family Law and Catholic Christian teaching, on the other hand. Just how much authority does the *wali* have over a prospective bride?

If the bride is a minor, then she is his ward. Therefore, he can consent or refuse permission for marriage, regardless of her will. (A similar rule applies to a minor bridegroom under the charge of a *wali*.) Of course, if the bride is a minor, then the *wali* ought to reject all marriage proposals — precisely because she is a minor and child marriage typically is illegal under the law of most countries. Sadly and shockingly, in reality, this law is not uniformly respected or enforced, particularly in small or remote villages of some Muslim countries. One of the most important variables that affect not only the number of children a woman has, but more generally her level of education, income, and overall freedom, is the age at which she is married. That is why raising the *de jure* age-at-first-marriage to levels like 18 or 21 is important as a legal matter, and encouraging women (and their guardians) to defer marriage until their late 20s or early-to-mid 30s, is critical as a cultural matter.

Once a bride is of age (*i.e.*, she has had her first menstrual cycle), then — according to the majority view in the Four Schools — she has the final say about entrance into a marriage contract. If she happened to have been married off by her

*wali* while she still was a minor, then she has a deferred right of rescission. She cannot exercise it immediately. Rather, the right of rescission vests in her when she comes of age. For example, suppose her *wali* enters her into a contract against her wishes while she is a minor. In theory, she could exercise her right to rescind the contract once she crosses into the age of majority. That age is when she has reached sexual maturity (*i.e.*, had her first menstrual cycle) and is capable of conceiving a child. Thus, her rescission right vesting is linked to her sexual maturity. The way she would exercise this right is through a divorce procedure called "*tafriq*," which means separation.

An interesting question is whether she must exercise the right of rescission, as soon as it vests, or whether she can decide to rescind the marriage contract subsequently, even after a few years. There appears to be no rule mandating immediate exercise, *i.e.*, with respect to this right, she does not required to "use it or lose it." A related question is what happens if the child marriage has produced one or more children, and then the bride exercises rescission. This matter of child custody likely would be handled either amicably by the parties involved, or via an arbitral or adjudicatory proceeding.

As a legal matter, this right is curious. A woman is a third-party participant (both a beneficiary and obligor) of a marriage contract, which is between the bridegroom/husband and her *wali*. But, she holds a right of rescission, which is not usually held by third parties under American Contract Law. Interestingly, men also appear to have a right of rescission. If they are married before puberty, then when they come of age, they too are able to rescind the marriage contract through *tafriq*.

Notably, not all religious scholars (*ulema*) agree with this theory as to women. Some *ulema* believe a bride who has come of age still has no right of rescission if her father or grandfather agreed to the marriage contract. That means that if the *wali* is the father or grandfather, and arranges a marriage of a minor girl, then the girl cannot rescind the contract even after she becomes an adult. In that case, her only route out of the marriage would be divorce — a route that has its own complications.

A scenario that is not uncommon involves the question of whether silence can be an expression of consent. (The Arabic term for "consent" is "*ridā*.") In particular, suppose the *wali* of a minor female virgin asks her about a marriage proposal he has been given for her. He seeks her consent (*ridā*) to the proposed marriage. She says nothing. Can the silence of this young girl serve as consent, *i.e.*, can the omission of a declaration by her substitute for a declaration of consent from her? The answer is "no." But, there is a key exception. Suppose she cries quietly, or laughs quietly. That behavior qualifies as a declaration of consent. That seems to be true regardless of whether the tender-aged girl knew her crying or laughter could be deemed by her *wali* as implicit consent.

The rule about rescission raises a general point, namely, Islamic Family Law contains conditions that must be realized for a legal right to ripen. Until the condition occurs, the legal right (in this case, rescission) is in suspense, or abeyance, called "*wukūf*." Examples suggested by Professor Schacht, in addition to a woman reaching the age of majority, include the marriage of a slave, which must

<sup>21</sup> SCHACHT, *supra*, at 120.

await the consent of the master, the right of a missing person who cannot be traced, which must await the return of the person, and the right of an apostate, which must await repentance by the apostate.<sup>22</sup>

To be sure, as a practical matter there are a number of pressures that could prevent a wife from actually exercising her right of rescission. Her ability to rescind the contract will hinge almost entirely on two factors: family and finance, i.e., the support of her family and, failing that, her ability to live independently. Again sadly in some Muslim countries, family pressure on women to stay in marriages against their will is excruciating, and the women cannot easily walk out, rent a flat in a city, get a job, and lead the life of a single person.

### [B] Mature Female and Controversial Objection Based on Equality of Birth

What about the typical case of a woman who has come of age and seeks to give herself away in marriage? Must she rely on her *wali* to do so? Again the answer requires a distinction between theory and practice. Islamic legal theory is that a majority-age woman is free to choose whom she would like to marry. There is no requirement that a *wali* pick the husband of a mature Muslim woman. But, her freedom is not absolute.

First, in practice, if she lives in a conservative society, she will have few if any opportunities to meet prospective husband on her own accord, and not have them introduced to her by others. Second, as legal matter, a *wali* has a right to object to a marriage if he judges the bridegroom is not of equal birth. This caveat is a major legal constraint. In theory, the right of a *wali* to object protects a woman from marrying "downward." But, the right is not two-way: the *Shari'a* does not obligate the *wali* of a bridegroom to evaluate brides based on equality of birth. The bridegroom is his own *wali*.

How does a *wali* determine "equality" of birth under the *Shari'a*? The theoretical answer is that he should not do so on the basis of tribe, race, ethnicity, or other such distinction. The reality is that in practice, the answer largely is determined by culture.

Indubitably, the Prophet favored the theoretical answer. A female cousin of the Muhammad was married to a black African man named "Bilal." The cousin, like the Prophet, was a member of the *Quraysh* tribe. In contrast, Bilal had been a slave, but the first of the Four Rightly Guided Caliphs, Abū Bakr (who reigned from 632-634 A.D.), purchased Bilal and freed him from his master. Bilal became a Muslim, and after his conversion, became a *muezzin* (*muadhlin*), that is, a caller to prayer. At the time, members of the *Quraysh* tribe were accorded the highest standing, yet Muhammad himself tried to de-emphasize social stratifications, urging that all persons are equal. One follower of Islam said in front of the Prophet to Bilal words of anger, to the effect that "You (Bilal) are the son of a black woman." The *hadith* is recounted by Ibn Al-Mubarak in his two books, *Kitab Al-Birr wa'l-Sila* and *As-Salah*:

<sup>22</sup> SCHACHT, *supra*, at 119.

Abū Dharr, the leader of the tribe of Ghifar, and one who accepted Islam in its early days, narrates:

Once I was conversing with Bilal. Our conversation gave way to a dispute. Angry with him, the following insult burst from my mouth: "You cannot comprehend this, O son of a black woman!"

As Islam expressly forbade all kinds of racial, tribal and colour discrimination, Bilal was both upset and greatly angered.

A while later a man came and told me that the Messenger of Allāh . . . summoned me. I went to him immediately. He said to me:

"I have been informed that you addressed Bilal as the son of a black woman."

I was deeply ashamed and could say nothing. Allāh's Messenger continued his reprimand: "This means you still retain the standards and judgments of the pre-Islamic days of ignorance. Islam has eradicated all those false standards or measures judging people by blood, fame, color or wealth. It has established that the best and most honorable of men is he who is the most pious and upright in conduct. Is it right to defame a believer just because he is black?"

Abū Dharr felt profound remorse. He went straight to Bilal's house and, putting his head on the threshold, said: "This head will not rise from here until the blessed feet of Bilal tread on the face of foolish, impolite Abū Dharr."

Bilal responded: "That face deserves to be kissed, not trodden upon," and forgave Abū Dharr.<sup>23</sup>

<sup>23</sup> This version of the *hadith* is posted at [www.whyslam.org/Forum/forum\\_posts.asp?TID=25636&PN=6](http://www.whyslam.org/Forum/forum_posts.asp?TID=25636&PN=6).

Abdullah Ibn Al Mubarak was a renowned for his scholarship and virtue, related roughly 25,000 *hadiths*, and prayed alongside *Imām* Abū Hanīfa, founder of the *Hanafi* School. Al Mubarak lived from 736-797 A.D. (118-181 A.H.). He was from Khorasan (which in *Parsi* means "the place where the sun rises"), a region spanning parts of modern-day Afghanistan, Iran, Tajikistan, Turkmenistan, and Uzbekistan. Present-day Khorasan is the largest province of Iran, in the northeast of that country, and home to the holy city of Mashhad. Abū Ishaq Al Fazzari posed questions to Al Mubarak, and called him the "*Imām* of the Muslims." Among his many wise words is his response to a query of a man who asked whether there was someone to advise them. Al Mubarak replied that the question was whether there was anyone who would accept the advice.

A slightly different version of the above-quoted *hadith*, also compiled by Ibn Al Mubarak, is as follows:

[A disagreement occurred between Abū Dharr and Bilal and Abū Dharr said to Bilal,] "You son of a black woman." The Messenger of Allāh . . . was extremely upset by Abū Dharr's comment, so he . . . rebuked him by saying, "That is too much, Abū Dharr: He who has a white mother has no advantage which makes him better than the son of a black mother." This rebuke had a profound effect on Abū Dharr, who then put his head on the ground swearing that he would not raise it until Bilal had put his foot over it. These incidents demonstrate that tribal ties have no place in Islam. Muslims are commanded to stick together and not to disassociate themselves from each other just because they come from different tribes.

This version is posted at [www.islamic-world.net/islamic-state/evidence.htm](http://www.islamic-world.net/islamic-state/evidence.htm). Essentially the same version appears in the *Al-Birr* book by Al Mubarak:

Manifestly, the gist of this *hadith* is the Prophet responded with righteous indignation, instructing his followers to cease their racist thoughts.

Nevertheless, after the death of the Prophet (632 A.D.), and during and after the era of the *Rashidun* (632-661 A.D.), Muslims resumed or continued their status hierarchies, and even took socioeconomic distinctions more seriously than ever before. Many of them appeared to do so to keep peace among families. Further, as the decades and centuries wore on, the hierarchy between Arabs, on the one hand, and non-Arabs (such as Persians and Turks), on the other hand, developed — a hierarchy that, from the Arab perspective, naturally favored Arabs.

Accordingly, by way of general guidance, a *wali* evaluates equality, or the lack thereof, in birth between a woman and her prospective husband based on the following hierarchy (in decreasing order or status):

- 1<sup>st</sup>: A member of the *Quraysh* tribe, which is the tribe of the Prophet Muhammad.
- 2<sup>nd</sup>: Other Arabs.
- 3<sup>rd</sup>: Other non-Arabs.

Thus, for example, a *wali* of a woman who is Syrian would regard marriage to a Persian or Turkish man as unequal, because Syrians are Arabs, while Persians and Turks are not. Of course, the legal right of the *wali* to object to such a marriage does not imply a legal obligation for him to do so.

Significantly, the hierarchy pertains only to Muslims. The implication is that a marriage of a Muslim woman to a non-Muslim man is inconceivable. In practice, concern about equality of birth is not unique to Muslim families.

It exists among aristocratic or snobbish-minded non-Muslim families around the world. The British Royal Family has had more than its share of controversies in this respect. Denials to the contrary by some Indian intellectuals and social commentators, and notwithstanding the fact the Constitution of India bars caste-based discrimination, decisions based on caste still are common among Hindu families. Many of them, particularly in rural areas, bar marriage to a lower-caste person. Based on Ancient Hindu scriptures such as the *Bhagavad Gita*, there are four broad Hindu castes (*jātis*, or *varnas*):

- (1) *Brahmin* (broadly, holy persons, scholars, and teachers).
- (2) *Kshatriya* (broadly, kings, warriors, administrators, and law enforcement personnel).

[When a disagreement occurred between Abū Dharr and Bilal, the former said to the latter: "You son of a black woman!" The Messenger of God — on him be blessing and peace — was displeased by Abū Dharr's comment and he rebuked him by saying: "That is too much, Abū Dharr. He who has a white mother has no advantage which makes him better than the son of a black mother." The Prophet's rebuke deeply affected Abū Dharr and he immediately threw himself to the ground, swearing that he would not raise it until Bilal had put his foot over his head.

- (3) *Vaishya* (broadly, commercial persons, such as merchants and traders, and protectors of cows).
- (4) *Shudra* (broadly, farmers, artisans, laborers, and menial workers, such as street sweepers, who serve the top three castes).

Each strata has thousands of sub-strata delineated on profession, region, language dialect, and other characteristics. Beneath the caste system, or wholly outside of it, are Untouchables (*Dalits*), whom Mahatma Gandhi lovingly referred to as "*Harijans*" (children of God). Caste depends entirely on birth. There is no way to escape it in this lifetime. Thus, a motive for conversion from Hinduism to Islam, or to Christianity, especially among poor Indians at the lower rungs, is to escape the oppressive caste system. Sadly, such conversions sometimes creates communal tension, even violence.

The concern about equality of birth also exists among non-Muslim families with avaricious motives for favoring or opposing a marriage. The aspiration for a daughter to "marry into money" is common around the world. Yet, it is important not to be cynical. Concerns about equality and finances sometimes are borne of a genuine interest in the future well-being of the daughter who is to be married. Muslim and non-Muslim families alike worry whether an adult daughter would be happy with a man who is not at a similar level of educational or professional achievement as their daughter.

## § 33.04 DIVORCE

### [A] Overview of Methods

It should not come as a surprise that divorce, at least for a husband, is relatively easy under Islamic Family Law. In that respect, the *Shari'a* is akin to American Family Law, and quite distinct from the teaching of the Catholic Church. As explained earlier, marriage is not a sacrament under the *Shari'a*, which it is according to Catholic Christianity. Rather, it is a contract, as it essentially is in American Family Law.

If marriage is a sacrament, entered into in the presence of God, then it follows that dissolving a marriage ought not to be easy. It is not, according to Catholic teaching, because it requires an annulment, not just a decree of divorce under applicable civil law.<sup>24</sup> Until an annulment is obtained, the Church regards a couple as married in the eyes of God. This precept is based on the statement of Christ recounted in *The Gospel According to Matthew*, namely, that a couple becomes one through marriage, and that as God put the couple together, no person should not separate them:

<sup>24</sup>Some Pharisees [certain ancient Jews who separated themselves in order to observe strictly the traditional, written law] approached him [Jesus], and tested him, saying, "Is it lawful for a man to divorce his wife

<sup>24</sup> Catholic Christian teaching regards divorce as an offense to the dignity of marriage. See *Catechism, supra*, ¶¶ 2382-2386 at 573-574.

for any cause whatever?"<sup>24</sup> He said in reply, "Have you not read that from the beginning the Creator 'made them male and female' and said, 'For this reason a man shall leave his father and mother and be joined to his wife, and the two shall become one flesh'?"<sup>25</sup> So they are no longer two, but one flesh. Therefore, what God has joined together, no human being must separate."<sup>26</sup> They [the Pharisees] said to him [Jesus], "Then why did Moses command that the man give the woman a bill of divorce and dismiss [her]?"<sup>27</sup> He said to them, "Because of the hardness of your hearts Moses allowed you to divorce your wives, but from the beginning it was not so. I say to you, whoever divorces his wife (unless the marriage is unlawful) and marries another commits adultery."<sup>28</sup>

In contrast, if marriage is a contract, as it is under the *Shari'a* and American Family Law, then terminating this contract ought not to be a major ordeal. The parties joined, their arrangement did not work out well, so they ought to be relatively free, as commercial parties are, to end their family deal.

Accordingly, the *Shari'a* has five methods to dissolve a marriage (*nikāh*) contract:

- (1) Repudiation (*ṭalāk*).
- (2) Oath of abstention (*ila'*).
- (3) Separation (*tafriq*).
- (4) Unchastity (*li'an*).
- (5) Apostasy (*riḍḍah*).

A scan of these methods indicates they are grounds for, or circumstances under which, a conjugal community is terminated. They are discussed in turn below.

An additional method of divorce may be based on the marriage (*nikāh*) contract. A wife — or more accurately, her guardian (*walī*) may negotiate a clause in the contract that sets out an instance, or instances, in which she can seek a divorce.

Still another method of divorce is linked to the nuptial gift (*mahr*). It is known as "*al khala'*," which means to "take away" or "pull." It occurs when a wife gives back to her husband her nuptial gift. At that point, when the husband takes back the gift, the marriage ends. The legal source for *al khala'* is a *ḥadīth*. Ibn 'Abbas reports:

The wife of Thabit ibn Qais came to the Prophet, peace and blessings of Allāh be on him, and said, "O Messenger of Allāh! I do not find fault in Thabit ibn Qais [her husband] regarding his morals of faith, but I hate disbelief in Islam." The Messenger of Allāh . . . said: "Wilt thou return to him his orchard?" She said, "Yes." So the Messenger of Allāh . . . said [to Thabit]: "accept the orchard and divorce her."<sup>29</sup>

<sup>25</sup> *The Gospel According to Matthew*, 19:3-9, in *THE CATHOLIC STUDY BIBLE* 41 (New York, New York: Oxford University Press, 1990, New American Bible trans.).

The appellation "Pharisee" is explained by James F. Driscoll, *Pharisees*, in *The Catholic Encyclopedia*, vol. 11 (New York, New York: Robert Appleton Company, 1911), posted at [www.newadvent.org/cathen/11789b.htm](http://www.newadvent.org/cathen/11789b.htm).

<sup>26</sup> [www.sacred-texts.com/isl/hadith/hadith24.html](http://www.sacred-texts.com/isl/hadith/hadith24.html).

In effect, a woman explained to Muhammad that her husband was a good man, but not a believing Muslim, hence she preferred a divorce. Muhammad told her to return the farm, which had been her nuptial gift, and said to her husband he must accept it and grant her a divorce. *Al khala'* is infrequently used, for example, in the United Arab Emirates (UAE).

## [B] Repudiation (*ṭalāk*)

The most straightforward way for divorce to occur under Islamic Law also is the best known among non-Muslims. It is for a husband (*ṣawj*) to repudiate his wife (*ṣawja*). Repudiation of her, i.e., disavowing or rejecting her as his wife, and thus of the marriage (*nikāh*) contract, is called "*ṭalāk*." Only a husband can avail himself of this option; it is not possible for a wife to repudiate her husband by pronouncing "*ṭalāk*."

However, is it possible for a wife to repudiate herself. That is, a wife has the legal power to repudiate herself to her husband (*ṣawj*), and thereby terminate a marriage (*nikāh*) contract. This power is called "*tafwīd*," as distinct from "*ṭalāk*." It must be exercised at a meeting (*majlis*) at which both the wife and husband are present. Presumably, this requirement means she could not e-mail or text message her husband that she is repudiating herself to him as his wife.

The reference to "pronouncing *ṭalāk*" is literally correct. The husband articulates his repudiation. Generally, it has been thought he is not permitted to text message or otherwise transmit his repudiation of his wife electronically. Yet, an April 2009 case from the Kingdom of Saudi Arabia suggests this prohibition may be in flux.<sup>27</sup> A Saudi man was in Iraq to participate in what he described as "*jihād*" (struggle). From Iraq, he sent her via text message a pronouncement of "*ṭalāk*." He followed up the text message with a telephone call to two of his relatives, explaining he intended that the woman no longer be his wife. A court in Jeddah, Saudi Arabia, heard the testimony of the relatives as to the intention of the man, and thereafter finalized the divorce.

There are two types of "*ṭalāk*," and they differ according to their effect or legal consequence. Repudiation may be revocable, or irrevocable. That is, when pronouncing *ṭalāk*, the result may be either of the following:

- (1) Repudiation that is revocable, or "*raj'i*." With a revocable repudiation, the marriage contract is not dissolved. Essentially, the contract is suspended. The wife remains in a waiting period, during which time the husband can withdraw the repudiation.
- (2) Repudiation that is irrevocable, or definite, i.e., "*bā'in*." With an irrevocable repudiation, the marriage contract is dissolved.

An obviously key question is when does a revocable versus irrevocable *ṭalāk* occur?

The answer is that it depends on the way in which a husband expresses the repudiation. Professor Schacht explains that if the husband uses some normal,

<sup>27</sup> See Asma Alsharif, *Court Upholds Divorce by Text Message*, AOL News, 24 April 2009, posted at <http://news.aol.com>.

regular verbal formulation, then the *ṭalāk* is revocable.<sup>28</sup> However, if the husband uses a more formal expression, or if he repudiates his wife before consummation of their marriage through intimacy (*dukhal*), then the repudiation is definite.

Considerable attention has been given in the non-Muslim western world to a scenario in which a husband repudiates his wife by pronouncing *ṭalāk* three times. That is a "formal expression," hence this scenario is of interest for good reason: a three-fold pronouncement results in a definite (*bā'in*) repudiation. It is impossible for the now ex-husband and ex-wife to live again together as husband and wife, i.e., they cannot re-marry, with one significant and odd exception. Suppose following the definite repudiation, the ex-wife marries another man, and consummates that marriage through sexual intercourse with him. Suppose further that the second marriage is irrevocably dissolved. If these events transpire, then the woman can re-marry her former husband.

Thus, the scenario of a three-fold *ṭalāk* is of interest because of the finality of this pronouncement. Professor Schacht observes that because of this legal consequence, "[t]he triple repudiation has therefore become the normal form of divorce."<sup>29</sup> According to a strict application of the *Shari'a*, to effect a triple repudiation, the husband should pronounce "*ṭalāk*" on three distinct occasions. These occasions ought to be ones in which his wife is pure, that is, she is not in the midst of her menstrual period. However, as Professor Schacht points out, it has become customary for a man to pronounce "*ṭalāk*" three times on the same occasion — that is, one declaration in which the repudiation is uttered thrice.<sup>30</sup> While this method of pronouncement of *ṭalāk* is legally valid, it is religiously forbidden (*ḥarām*).

As just indicated, under Islamic Family Law, there is an impediment to re-marriage after a triple repudiation (*ṭalāk*). The impediment is to re-marriage to the first husband. This block is lifted only if the wife marries a different man, consummates that marriage, and then that marriage is terminated. This series of events, while convoluted and unlikely, is facilitated by means of one of the *ḥiyal* devices (legal fictions) in the *Shari'a*, known as "*tahli*l." Through *tahli*l, the entire transaction is pre-packaged: the marriage to a different man is pre-arranged, as is the dissolution of that marriage after its consummation. Via this particular formalism, the impediment to re-marriage created by a three-fold *ṭalāk* is removed.

From a Catholic Christian perspective, *tahli*l makes a mockery of the sanctity of marriage. Notably, the *Hanbali* School rejects the use of *tahli*l in this manner. However, the device is permitted under the *Hanafi*, *Māliki*, and *Shāfi'i* Schools. In considering *tahli*l, it must be remembered that the theory of marriage (*nikāh*) under the *Shari'a* is based on contract, not on sacrament.

One prominent illustration of the aforementioned principles about divorce and re-marriage involving the same woman involves the Saudi Royal family. The veracity of this story is uncertain, thus it is important not to present it — nor many

of the tales surrounding the House of Saud — as fact. This particular yarn concerns the first King of Saudi Arabia, Abdul Aziz ibn Abdul Rahman Al Saud (c. 1880-1953 A.D.), who had his last child at the age of 80. (He is frequently referred to as "King Abdul Aziz (Ibn Saud)," or simply "King Abdul Aziz.") He began his conquest of most of the Arabian Peninsula in 1902, completing and unifying it under the House of Saud in 1932.

The favorite wife of King Abdul Aziz was named Hussa Al Sudari. With her, he had seven children, and they are known as the "Sudari Seven." The Sudari Seven include very prominent members of the Saudi royal family — for example, King Faisal, King Khalid, King Fahd, plus cabinet members serving in important posts such as the Minister of Interior and Minister of Defense. However, King Abdul Aziz and Hussa did not have all of the Sudari Seven children in a row. Initially, they had one child. Thereafter, allegedly the King quarreled with his wife, and he divorced her — the normal way of pronouncing "*ṭalāk*" three times. Then, Hussa Al Sudari re-married; indeed, she married the brother of King Abdul Aziz. With this brother, Hussa had one son. After the birth of that son, King Abdul Aziz allegedly convinced or compelled his brother to divorce Hussa, so that he (King Abdul Aziz) could re-marry her. (Whether the *ḥila* device of *tahli*l was used is unclear, but insofar as it is not accepted by the *Hanbali* School, which prevails in the Kingdom, it would seem not.) The divorce occurred, and King Abdul Aziz re-married Hussa. After the re-marriage, King Abdul Aziz and Hussa lived happily and had the remaining six of the Sudari Seven. The King himself sired more than 50 sons, and since 1953, all of the Saudi Kings have been brothers, and the sons of King Abdul Aziz.<sup>31</sup>

### [C] Oath of Abstention (*ilā'*)

A second method for a husband (*ṣawj*) to divorce his wife (*ṣawja*) is known as "*ilā'*." This method is available only to the husband, and is tantamount to a definitive repudiation (i.e., *ṭalāk* that is *bā'in*). "*ilā'*" refers to an oath of abstinence, which the husband takes, to abstain from sexual intercourse with his wife for four months. If he fulfills this oath, then — at the end of the four-month period — he has repudiated his wife in a definitive sense. Consequently, the marriage (*nikāh*) contract is terminated. Or, at a minimum, the wife has the right to obtain a formal divorce.

The logic behind this methodology is partly historical, which of course raises the problem of the Orientalist Fallacy. The pre-Islamic era (*jāhiliyya*) witnessed the abuse of the practice of *ilā'*, as it would freeze relationships, resulting in neither divorce nor marriage, and it did not have a defined period of time. Islam regulated the practice, by limiting its duration to only four months, after which the wife has the right to obtain a divorce, or the husband could get around his oath by fulfilling a religious expiation (*kaffāra*), such as fasting or prayer. Note, then, that while *ilā'* can be triggered only by a husband, the result is at least to empower a wife to

<sup>28</sup> See SCHACHT, *supra*, at 163.

<sup>29</sup> SCHACHT, *supra*, at 164.

<sup>30</sup> See SCHACHT, *supra*, at 164.

<sup>31</sup> See COLIN WELLS, *THE COMPLETE IDIOT'S GUIDE TO UNDERSTANDING SAUDI ARABIA II* (Alpha: New York, New York, 2003). King Abdullah, who ascended to the throne on 1 August 2005, is not one of the Sudari Seven. His mother is Fahda bint Asī Al Shuraim, who is the eighth wife of Ibn Saud.

obtain a divorce. Yet, note also that *ilā'* can be viewed as a method of disciplining a wife.

The logic behind this methodology also implicates both sexuality and procreation. The availability of a wife to her husband is traditionally considered one of her marital duties, and her failure to perform them can qualify as disobedience that jeopardizes her right of maintenance (*nafaka*). If the husband proactively decides he does not want normal conjugal relations with his wife, then he is effectively relieving her of her duty to perform them. Moreover, insofar as an important purpose of marriage is procreation, he is abrogating that purpose with respect to the wife in question.

At least one point is troubling about the invocation of *ilā'* to effect a divorce. The invocation is unilateral by the husband. To be sure, there may be cases in which he feels prompted to take the oath because of intractable difficulties he argues are caused by his wife. But, the decision ultimately is his, and in many situations there is the possibility he resorts to *ilā'* because of his own bad behavior, poor temperament, or subjective and shifting preferences. In such cases, there may be little the wife can do — she is at the mercy of her husband.

Fortunately, the *Shari'a* contains a partial bulwark against improper invocation of *ilā'*. Suppose the husband does not adhere to the oath. That is, suppose he withdraws it within the four-month period and resumes conjugal relations with his wife. He is free to do so, but he must perform a penance — a self-imposed penalty, which is a religious expiation, or *kaffāra*. After all, he took an oath, broke it, and put his wife through some degree of emotional trauma. In theory at least, the specter of having to do a *kaffāra* should give pause to a husband contemplating *ilā'*. Insofar as it does, *kaffāra* operates as a bulwark against arbitrary or capricious use of *ilā'*. However, the bulwark is partial. It does not block out arbitrary, capricious invocations in which the husband fulfills the oath.

### [D] Separation (*Tafrik*)

The literal meaning of the Arabic word "*tafrik*" is "separation," or "to separate piece by piece." In Islamic Family Law, it refers to the separation of the husband (*zawj*) and wife (*zawja*), who are the "pieces" of the marriage. The result of this separation is dissolution of the marriage (*nikāh*) contract. In other words, "*tafrik*" is separation that results in divorce. Significantly, this method of ending a marriage is available not only to the husband, but also the wife. Indeed, *tafrik* is a (if not the) principal means by which a wife divorces her husband.

An Islamic judge (*qādi*) issues a decree of *tafrik*. The judge does so upon the request of either the husband or wife. Thus, a wife has the right to go to a *qādi* and seek separation from her husband. However, in many if not most cases, she does so through her guardian (*wali*). That is, she, or her *wali* acting on her behalf, goes to a *Shari'a* court, appears in front of a *qādi*, and requests a separation. Manifestly, depending on his disposition, the *wali* may either facilitate or hinder the exercise of this right by the wife. In addition to family support, whether the theoretical right of the wife to seek separation from her husband is a practical reality depends on whether she can support herself (and possibly her children) financially. If she lacks

the support of her family to terminate her marriage, then she must be able to live on her own and earn income. She will need to be able to rent or purchase an apartment or home, and obtain a job. Traditional chauvinistic custom, not Islamic Law, may make such logistics impossibilities. In contrast, a husband faces no such difficulties. His labor market power is assured. As a mature adult, he does not have a *wali*. So, he can go directly to a court and *qādi*.

Interestingly, in limited circumstances, a *qādi* will pronounce a separation on his initiative. The most likely instance of this *sua sponte* (i.e., on his own accord, motion, or will) action would be where there is an impediment to marriage. For example, a wrongful combination, such as a man marrying two sisters, could trigger this action.<sup>32</sup>

It also is possible — but, unusual — for a *wali* to pronounce a *tafrik*. A *wali* has this option as a means of exercising his right to object to a marriage on behalf of a woman who has come of age, but is marrying a man the *wali* finds is not of equal birth. That is not to say the *wali* holds the right to invoke *tafrik* in the same, direct way that the husband and wife have this right. Rather, the *wali* has the right to object to a marriage of unequal birth. If such a marriage occurs, the *wali* can proclaim a separation as a means of enforcing his right of objection. Obviously, his doing so likely would prove highly controversial, hence the rarity of this occurrence.

American Family Law offers a number of grounds on which a wife or husband may seek separation and divorce. One of them is "irreconcilable differences," which essentially means a couple is unable or unwilling to get along and has no prospect of improving their relationship. On what grounds may a wife seek a decree of *tafrik* from a *qādi*? The answer is more limited than under American Family Law, and there appears to be no provision in the *Shari'a* akin to "irreconcilable differences." The answer also is that the Four *Sunni* Schools differ somewhat on the grounds for *tafrik*. The *Māliki*, *Shāfi'i*, *Hanbali* and Schools allow for a larger number of grounds than does the *Hanafi* School.

Across all Four Schools, there is some shared ground, i.e., all of them accept certain justifications as a basis for a wife to seek *tafrik*. These common denominators are:

- (1) The woman was married by her *wali* as a minor, but now she has come of age and seeks to exercise her right of rescission in respect of the marriage contract. (That right becomes vested when she comes of age.)
- (2) The husband is impotent. That is, the husband is unable to have normal sexual relations, and thus cannot conceive with his wife a child through natural means.

These first two grounds are considered standard by the Schools. There are two further, and somewhat controversial, grounds:

- (3) The husband is a lunatic. That is, the husband is seriously mentally deficient.

<sup>32</sup> See SCHACHT, *supra*, at 165.

- (4) The husband has a grave, chronic disease. Presumably, qualifying afflictions would include terminal cancer, but it is unclear as to whether severe paralysis (e.g., quadriplegia) would count.

There is a debate among the *ulema* (religious scholars) and *fukahā'* (legal scholars) as to whether the third and fourth grounds are sufficient to dissolve a marriage.

May a husband avail himself of the aforementioned grounds for *tafriḳ*, i.e., do they apply equally, in a mirror-image fashion, to husband and wife? The answer is "yes." For example, a husband can exercise the right to seek a decree of *tafriḳ* from a *qāḍī* by exercising his right of rescission when he comes of age.

An interesting choice is between *talāk* and *tafriḳ*. What factors influence this choice by a husband? (Effectively, only a husband would have that choice.) That is, when would a husband choose to repudiate his wife versus separation from her pronounced by a *qāḍī*? The answer depends on whether or not the marriage has been consummated through sexual intercourse (*dukhāl*). Professor Schacht posits the following situation: suppose the reason a husband seeks divorce is some problem inherent with his wife.<sup>33</sup> Such a problem could be infertility, though that is not entirely clear. If he obtains a separation before consummation, then he does not incur any financial obligations from the marriage. For instance, he might be relieved from paying the remainder of the nuptial gift (*mahr*). If he repudiates the wife, however, then he has financial obligations to her.

### [E] Unchastity (*Li'ān*)

A marriage can be dissolved as a result of unchastity. The relevant Arabic term is "*li'ān*." Technically, "unchastity" refers to unlawful sexual intercourse, and it is a matter within the ambit of Islamic Criminal Law (*Uqūbāt*). But, *li'ān* is a procedure to obtain a divorce on account of unchaste behavior that avoids recourse to the severe Penal Law regime for unlawful sexual intercourse (*zinā*). In effect, *li'ān* is akin to the justification under Family Law in the United States for a divorce based on infidelity. Unlike American Family Law, however, the *Shari'a* procedure is available only to a husband.

The essential feature of the *li'ān* procedure is that a husband swears under oath that his wife has committed an unchaste act (namely, adultery). Equivalently, he may swear under oath that she has had a child whom he did not father — an accusation concerning the legitimacy of her child. Depending on the case, the wife may offer an affirmation under oath to the contrary. If she does so, then the case could become one of "he said, she said," and must be resolved through a *Shari'a* court by a judge (*qāḍī*), or possibly through arbitration by an arbitrator (*hakam*).

Critically, dissolution of a marriage through *li'ān* is mutually exclusive with prosecution for *zinā* or *kadhf* (false accusation of *zinā*). Hence, suppose a husband initiates the procedure of *li'ān* and the marriage is dissolved. The husband cannot be liable for the crime of *kadhf*, meaning he is not liable for the *hadd* punishment associated with false accusation of unchastity (namely, 80 lashes). Likewise, dissolution through *li'ān* renders the wife free from *hadd* liability for *zinā* (namely,

death by stoning or 100 lashes). For this immunity, she must make an affirmation under oath that she did not commit an unchaste act. This mutual exclusivity is logical. If triggering the *li'ān* procedure also opened the possibility of a *hadd* punishment, then *li'ān* would be useless — no husband ever would resort to it. That would be a tragedy. The procedure allows a couple to divorce in a quiet, less contentious way, with less dire consequences, than under Islamic Penal Law. Use of *li'ān* also avoids the severe evidentiary requirements (namely, four morally upright male witnesses) required for prosecution of *zinā* or *kadhf*.

### [F] Apostasy (*Riddah*)

Arguably the most troubling method of — or, better put, ground for — divorce is apostasy (*riddah*). Under Islamic Family Law, a marriage automatically becomes invalid if either the husband (*zawg*) or wife (*zawja*) becomes an apostate (*murtadd*). That is, if either husband or wife rejects Islam, then the marriage is dissolved.

This ground is "troubling," because it is impinges on freedom of conscience or religion. Spouses are free to grow spiritually within the Islamic faith as their marriage and life progresses. But, they are not free to grow outside the boundary of Islam. To do so would be to destroy their marriage. No other major world religion or legal system regards apostasy as having the automatic consequence of termination of marriage.

### [G] Waiting Period (*'Idda*)

Islamic Law contains a number of terms, in the sense of waiting periods. For example, there are waiting periods regarding the presumption of death. These terms are called "*ajal*," and they must be certain (*ma'lām*) in respect of the length of the duration.

A practical example of an *ajal* concerns re-marriage. Suppose the marriage of a woman is terminated, and the woman wants to re-marry. There is a prescribed waiting period, called "*'idda*." Regardless of the method by which the divorce was obtained, if there is a divorce, and if the previous marriage was consummated through conjugal relations (*dukhāl*), then the ex-wife is not entirely free to re-marry. She must undergo a waiting period, the "*'idda*." Only after this term has elapsed may she marry another man.

The general rule is that the *'idda* is three menstrual cycles of the ex-wife. If she does not menstruate (e.g., if she is post-menopausal), then the waiting period is three months. However, there are two exceptions to the general three periods/three months *'idda* rule. First, for a pregnant woman, the *'idda* lasts until the end of the pregnancy. Second, for a woman who is not pregnant, but whose husband has died (i.e., she is a widow), the *'idda* is four months plus ten days. The additional time beyond the general rule of three periods/three months is for mourning over the death of her husband.

<sup>33</sup> See SCHACHT, *supra*, fn. 1 at 165.

- (4) The husband has a grave, chronic disease. Presumably, qualifying afflictions would include terminal cancer, but it is unclear as to whether severe paralysis (e.g., quadriplegia) would count.

There is a debate among the *ulema* (religious scholars) and *fukahā'* (legal scholars) as to whether the third and fourth grounds are sufficient to dissolve a marriage.

May a husband avail himself of the aforementioned grounds for *tafriḳ*, i.e., do they apply equally, in a mirror-image fashion, to husband and wife? The answer is "yes." For example, a husband can exercise the right to seek a decree of *tafriḳ* from a *qāḍī* by exercising his right of rescission when he comes of age.

An interesting choice is between *talāk* and *tafriḳ*. What factors influence this choice by a husband? (Effectively, only a husband would have that choice.) That is, when would a husband choose to repudiate his wife versus separation from her pronounced by a *qāḍī*? The answer depends on whether or not the marriage has been consummated through sexual intercourse (*dukhāl*). Professor Schacht posits the following situation: suppose the reason a husband seeks divorce is some problem inherent with his wife.<sup>33</sup> Such a problem could be infertility, though that is not entirely clear. If he obtains a separation before consummation, then he does not incur any financial obligations from the marriage. For instance, he might be relieved from paying the remainder of the nuptial gift (*mahr*). If he repudiates the wife, however, then he has financial obligations to her.

### [E] Unchastity (*Li'ān*)

A marriage can be dissolved as a result of unchastity. The relevant Arabic term is "*li'ān*." Technically, "unchastity" refers to unlawful sexual intercourse, and it is a matter within the ambit of Islamic Criminal Law (*'Uqabāt*). But, *li'ān* is a procedure to obtain a divorce on account of unchaste behavior that avoids recourse to the severe Penal Law regime for unlawful sexual intercourse (*zinā*). In effect, *li'ān* is akin to the justification under Family Law in the United States for a divorce based on infidelity. Unlike American Family Law, however, the *Sharī'a* procedure is available only to a husband.

The essential feature of the *li'ān* procedure is that a husband swears under oath that his wife has committed an unchaste act (namely, adultery). Equivalently, he may swear under oath that she has had a child whom he did not father — an accusation concerning the legitimacy of her child. Depending on the case, the wife may offer an affirmation under oath to the contrary. If she does so, then the case could become one of "he said, she said," and must be resolved through a *Sharī'a* court by a judge (*qāḍī*), or possibly through arbitration by an arbitrator (*hakam*).

Critically, dissolution of a marriage through *li'ān* is mutually exclusive with prosecution for *zinā* or *kadhf* (false accusation of *zinā*). Hence, suppose a husband initiates the procedure of *li'ān* and the marriage is dissolved. The husband cannot be liable for the crime of *kadhf*, meaning he is not liable for the *ḥadd* punishment associated with false accusation of unchastity (namely, 80 lashes). Likewise, dissolution through *li'ān* renders the wife free from *ḥadd* liability for *zinā* (namely,

death by stoning or 100 lashes). For this immunity, she must make an affirmation under oath that she did not commit an unchaste act. This mutual exclusivity is logical. If triggering the *li'ān* procedure also opened the possibility of a *ḥadd* punishment, then *li'ān* would be useless — no husband ever would resort to it. That would be a tragedy. The procedure allows a couple to divorce in a quiet, less contentious way, with less dire consequences, than under Islamic Penal Law. Use of *li'ān* also avoids the severe evidentiary requirements (namely, four morally upright male witnesses) required for prosecution of *zinā* or *kadhf*.

### [F] Apostasy (*Riddah*)

Arguably the most troubling method of — or, better put, ground for — divorce is apostasy (*riddah*). Under Islamic Family Law, a marriage automatically becomes invalid if either the husband (*ṣawg*) or wife (*ṣawja*) becomes an apostate (*murtadd*). That is, if either husband or wife rejects Islam, then the marriage is dissolved.

This ground is "troubling," because it is impinges on freedom of conscience or religion. Spouses are free to grow spiritually within the Islamic faith as their marriage and life progresses. But, they are not free to grow outside the boundary of Islam. To do so would be to destroy their marriage. No other major world religion or legal system regards apostasy as having the automatic consequence of termination of marriage.

### [G] Waiting Period (*'Idda*)

Islamic Law contains a number of terms, in the sense of waiting periods. For example, there are waiting periods regarding the presumption of death. These terms are called "*ajal*," and they must be certain (*ma'lām*) in respect of the length of the duration.

A practical example of an *ajal* concerns re-marriage. Suppose the marriage of a woman is terminated, and the woman wants to re-marry. There is a prescribed waiting period, called "*'idda*." Regardless of the method by which the divorce was obtained, if there is a divorce, and if the previous marriage was consummated through conjugal relations (*dukhāl*), then the ex-wife is not entirely free to re-marry. She must undergo a waiting period, the "*'idda*." Only after this term has elapsed may she marry another man.

The general rule is that the *'idda* is three menstrual cycles of the ex-wife. If she does not menstruate (e.g., if she is post-menopausal), then the waiting period is three months. However, there are two exceptions to the general three periods/three months *'idda* rule. First, for a pregnant woman, the *'idda* lasts until the end of the pregnancy. Second, for a woman who is not pregnant, but whose husband has died (i.e., she is a widow), the *'idda* is four months plus ten days. The additional time beyond the general rule of three periods/three months is for mourning over the death of her husband.

<sup>33</sup> See SCHACHT, *supra*, fn. 1 at 165.

### § 33.05 MODERNIST LEGISLATION ON DIVORCE

In Tunisia, because of the Modernist legislation enacted in 1956 — the *Code of Personal Status* — only a court can pronounce a divorce.<sup>34</sup> As is true on the issue of polygamy, in divorce cases in Tunisia, husbands and wives are treated as equals. Accordingly, a request for a divorce can be by mutual consent. Failing that, request can be made to a Tunisian court of competent jurisdiction by either one of the spouses — the husband or the wife. The petitioning spouse may cite as a justification for a divorce any one of the several grounds specified in the *Code*. It also is possible for either of them to request a divorce without specifying one of those grounds. However, in such a case, the court will fix a payment owed by one spouse to another.

### § 33.06 SHĪTE DISTINCTION: TEMPORARY MARRIAGE (MUT'A)

Family Law, and laws regarding personal status, would seem to be an area in which there is considerable room for divergence between *Sunnis* and *Shītes*, if for no other reason than the distinctive religious outlooks and cultural practices across the two communities. Yet, it can be complicated to gauge the extent of divergence, because in many Islamic countries, Family Law remains un-codified. Thus, Rabb observes:

In analogous Islamic constitutions, there is no correlation between the constitutional centrality of Islamic law to legislation ("a source" versus "the source") and the codification of personal status laws. Some countries that render Islamic law "the source" codify the laws of personal status (e.g., Iran, Egypt, and Yemen), while others leave personal status laws uncoded (e.g., Qatar, Saudi Arabia, Oman, and the UAE). Some countries that render Islamic law "a source" similarly codify personal status laws (e.g., Kuwait, Libya, Malaysia, Sudan, and Syria), while others leave personal status laws uncoded (e.g., Bahrain). The decision of whether to codify and the determination of the content of the codification appears to depend very little on constitutional formulations of the Islamic law incorporation and very much on domestic politics and the local history of the state's relationship with Islamic law or its exponents.<sup>35</sup>

Article 6 of the Civil Code of Iran contains a startling claim to universal jurisdiction:

The laws relating to personal status, such as marriage, divorce, capacity and inheritance, shall be observed by all Iranian subjects, even if resident abroad.<sup>36</sup>

Given the different positions of Islamic countries on Family Law codification, it is

<sup>34</sup> See SCHACHT, *supra*, at 108-109.

<sup>35</sup> Intisar A. Rabb, "We the Jurists": Islamic Constitutionalism in Iraq, 10 University of Pennsylvania Journal of Constitutional Law 527, 550-51 (March 2008).

<sup>36</sup> CIVIL CODE OF IRAN, Article 6, posted at <http://hajipour.online.fr/wp-content/civilcode.pdf>. [Hereinafter, CIVIL CODE OF IRAN.]

not easy to generalize whether Article 6 is *sui generis* or commonplace in the Muslim world.

One feature unambiguously distinguishing *Shīte* from *Sunni* Family Law concerns temporary marriage, or "*mut'a*." *Mut'a* literally means enjoyment or use.<sup>37</sup> In this context, it is a marriage for a fixed period of time and for payment to a woman.<sup>38</sup> Upon the expiry of the term, the marriage automatically dissolves.<sup>39</sup>

In a *mut'a*, the wife does not receive a dowry (*mahr*) as in *nikah*, but an *ijra*, or reward, which is essential to the contract of marriage, and if the wife abandons the husband before the expiry of the period agreed the husband may deduct a proportionate part of the *ijra*.<sup>40</sup>

Note there are seven technical legal elements for a valid temporary marriage.

First, a *mut'a* allows a *Shī'a* man to marry a *Shī'a* woman, implying both partners are *Shīte*. One partner cannot be a *Sunni*. As for non-Muslims, the general rules about mixed marriages apparently would apply (including that a Muslim woman is not to marry a non-Muslim man). Second, the union is for a specified, temporary period of time. It is not indefinitely long, nor life-long. Third, dissolution of the union is automatic when the period expires. Fourth, the couple must agree on a payment to the wife, i.e., an *ijra*. Fifth, they must not be barred from entry into a religious marriage by "being related by blood or in terms of a common foster-mother."<sup>41</sup> Sixth, any children conceived during *mut'a* are considered legitimate, and are entitled to inheritance from each parent. Seventh, at the end of a *mut'a*, there is no need for the ex-husband to pay alimony to his ex-wife.<sup>42</sup>

So, a *mut'a* marriage is legal in *Shīte* Family Law, but forbidden (*harām*) under *Sunni* *fiqh*. All Four *Sunni* Schools view temporary marriage as prostitution.<sup>43</sup> They see *nikāh* as the only valid version of marriage, which, if no divorce occurs, is life-long.<sup>44</sup>

<sup>42</sup> See SOHRABI, *supra*, at 192.

<sup>43</sup> HODKINSON, *supra*, at 9. For *hadiths* concerning temporary marriage and its prohibition in *Sunni* *fiqh*, see, e.g., SAHIB MUSLIM — BEING TRADITIONS OF THE SAYINGS AND DOINGS OF THE PROPHET MUHAMMAD AS NARRATED BY HIS COMPANIONS AND COMPILED UNDER THE TITLE AL-JAM'U-S-SAHIH BY ISAM MUSLIM, RENDERED INTO ENGLISH BY ABDEL HAMID SIDDIQI, WITH EXPLANATORY NOTES AND BRIEF BIOGRAPHICAL SKETCHES OF MAJOR NARRATORS, CORRECTED AND REVISED BY DR. HASSAN, vol. II.B, book 16 (Book of Marriage), pp. 342-346, *hadith* nos. 1404-1407R4 (Lahore, Pakistan: Sh. Muhammad Ashraf Booksellers and Exporters, 1990), and THE TRANSLATION OF THE MEANINGS OF SAHIB AL-BUKHARI, ARABIC-ENGLISH BY DR. MUHAMMAD MUHSIN KHAID, vol. VII, book LXII (The Book of *Nikāh* (Wedlock)), pp. 36-37, *hadith* nos. 50-52 (Dar Ahya Us-Sunnah, Al Nabawiya, March 1978).

<sup>44</sup> HODKINSON, *supra*, at 9.

How do *Shi'ite* scholars respond to this criticism? They offer three arguments for the legitimacy of *mut'a*. First, there is tradition, albeit not the *Sunnah* of the Prophet. During the life of Muhammad, his Companions (*Ṣaḥābah*) practiced *mut'a*.<sup>45</sup> Second, there is the Qur'ān, namely, *surah* 23, *ayat* 5-7, and *surah* 70, *ayat* 29-31. These passages concern sexual intercourse, but they do not forbid *mut'a*.<sup>46</sup> Third, there is history. All Muslim sects accepted *mut'a* until the second *Rashidun* Caliph, 'Umar, forbade it. Yet, *Shi'ites* never have recognized the teachings of 'Umar.<sup>47</sup> Thus, to the present, *Shi'a* but not *Sunni* Muslims practice temporary marriage (*mut'a*).<sup>48</sup> Notably, when Saddam Hussein (1937-2006) ruled Iraq (July 1979-April 2003), *mut'a* was banned. After he was toppled during the Second Gulf War (2003-2010), some *Shi'ite* clerics began approving temporary marriages, causing suspicion among *Sunnis*, who criticized these approvals as condoning illicit sexual relationships, especially among young persons.

<sup>45</sup> HODKINSON, *supra*, at 115.

<sup>46</sup> HODKINSON, *supra*, at 115.

<sup>47</sup> HODKINSON, *supra*, at 115. Hodkinson states an additional policy argument for allowing *mut'a* (albeit a controversial one): if a permanent union cannot satisfy the sexual desires of a man, then he should be able to satisfy such desires in a manner "which minimizes the threat to morality[.]" *Id.*

##### § 34.07 CONTRASTS WITH CATHOLIC CHRISTIANITY

## § 34.01 POLYGAMY

### [A] Up to Four Wives and Prophet's Special Rules

Polygamy is, of course, regarded as an offense against the dignity of marriage in both Catholic and Protestant Christianity. It is understood as not in accordance with the moral law.<sup>1</sup> In sharp contrast, as is quite well known among non-Muslims, the *Shari'a* permits a man to marry up to four wives, i.e., to have four wives simultaneously. What is less well understood is the passage in the Qur'an that sets out the rule on polygamy. The key (and, indeed, only) passage directly addressing the topic appears in *surah* 4, which is titled "Women," *ayah* 3:

If you fear that you will not deal fairly with *orphan girls*, you may marry whichever [other] women seem good to you, *two, three, or four*. If you fear that you cannot be *equitable* [to them], then marry only *one*, or your slave(s): that is more likely to make you *avoid bias*.<sup>2</sup>

There are, of course, impediments to marriage that circumscribe polygamy to some degree. In *surah* 4 *ayah* 23, the Qur'an prohibits marriage with two sisters simultaneously. *Ayah* 22 bars marriage with a mother and her daughter simultaneously.

*Surah* 4, *ayah* 3 (as well as *ayah* 2) was revealed shortly after the Battle of 'Uhud (625 A.D.), in which Muslims were defeated and a considerable number of husbands killed. That is why the Qur'anic passage uses the term "orphans," and why it encourages Muslims to take care of each other's families by marrying widows. In other words, at the risk of committing the Orientalist Fallacy, the passage allowing Muslim men to marry up to four wives is not designed to condone lustful behavior, but rather — as a matter of faith, Muslims say — should be understood in the historical context in which it was revealed.

While it would itself suffice, the Qur'an is not the only authority for the basic rule permitting a man may choose up to four wives. There also exists support sourced in the *Sunnah* of the Prophet. A number of *hadith* collected by *Imam* Bukhari support, or at least relate to, polygamy.<sup>3</sup> Notably, *Shari'a* scholars have elaborated on the rule.

For example, *Imam* Abū Hanifa introduced a refinement, namely, the invalidity of a single marriage (*nikāh*) contract for all four wives.<sup>4</sup> To be valid, each marriage

<sup>1</sup> For Catholic Christian teaching on polygamy, see CATECHISM OF THE CATHOLIC CHURCH § 2387 at 574 (United States Catholic Conference, Inc., Washington, D.C.: Libreria Editrice Vaticana, 2nd ed. 1997). [Hereinafter, CATECHISM.]

<sup>2</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 4:3, at 50 (Oxford, England: Oxford University Press, 2004) (emphasis added). [Hereinafter, Qur'an.] See also *id.*, 5:208, 62:2, 62:6, and 77:508.

<sup>3</sup> See, e.g., THE TRANSLATION OF THE MEANINGS OF SAHĪH AL-BUKHĀRĪ, ARABIC-ENGLISH by Dr. Muhammad Muhsin Khan, vol. VII, book LXII (The Book of Nikāh (Wedlock)), pp. 4-5, *hadith* nos. 5-7 and pp. 23-24, *hadith* no. 35 (Dar Ahyā Us-Sunnah, Al Nabawiya, March 1978).

<sup>4</sup> See JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW 41 (Oxford, England: Oxford University Press (Clarendon Paperbacks) 1982). [Hereinafter, SCHACHT.]

must be arranged for by a separate contract. This refinement amounts to a circumscription of the rule. It creates time and space between two or more marriage ceremonies. A man is supposed to use that gap wisely, namely, deliberate carefully as to his ability to treat multiple wives in an equitable, unbiased manner.

### [B] Prophet's Special Rules

As for the Prophet himself, immediately following the revelation of *surah* 4, *ayah* 3 of the Qur'an, the rule concerning four wives applied to him. Before this revelation, and following the death of Khadyja in 619 A.D., he had taken Sawda bint Zama and 'Aisha bint Abi Bakr as his wives. After this revelation, Muhammad married Hafsa bint Omar, whose husband died during the Battle of 'Uhud. Shortly thereafter, he married Zaynab bint Khuzayma, the widow of a soldier slain in the Battle of Badr (624). Zaynab died after just 8 months of marriage, whereupon Muhammad married Umm Salama Hind, another war widow from the Battle of 'Uhud, who had one son and two daughters.

But, another Qur'anic revelation, *surah* 33, *ayah* 37, launched what in Islamic legal literature is called the "Prophet's Special Rules," including marriage to more than four wives:

When you [Prophet] said to the man who had been favored by God and by you, "Keep your wife and be mindful of God," you hid in your heart what God would later reveal: you were afraid of people, but it is more fitting that you fear God. After Zayd divorced her, We gave her to you in marriage so that there might be no fault in believers marrying the wives of their adopted sons after they had divorced them. . . .<sup>5</sup>

Plainly, the passage refers to the marriage of the Prophet to his cousin, Zaynab bint Jahsh, following her divorce from Zayd, the slave of Muhammad, whom Muhammad freed and adopted as his son. Indeed, after this passage was revealed, Muhammad married the divorcee. As Professor Haleem explains, this passage "shows the marriage [of Muhammad to Zaynab] to be lawful since adoption does not create blood relations that preclude marriage."<sup>6</sup> Of course, modern science shows that marriage of first cousins is genetically unwise.

In any event, generally, the Prophet's Special Rules were aimed to alter rigid social practices deeply rooted on the Arabian Peninsula during the time of the Prophet. (Note the Orientalist Fallacy implicit in this explanation.) Significantly, these Rules are not limited to the marital status of Muhammad. They extend to his prayer life (*surah* 17, *ayah* 79), honors bestowed on him (*surah* 24, *ayah* 63), obedience to him (*surah* 48, *ayah* 10), and respect for him (*surah* 49, *ayah* 2).

<sup>5</sup> Qur'an, *supra*, 33:37 at 269.

<sup>6</sup> Qur'an, *supra*, fn. a to 33:37 at 269.

### [C] Does Qur'ān "Encourage" Polygamy?

The vast majority of Muslim marriages are not polygamous. This majority recoils at the thought of a non-monogamous relationship. Yet, can it be said the Qur'ān actively encourages polygamy? Arguably, for four reasons, the answer is "no."

First, a careful reading of the above quoted passages indicates they are not exhortations to take on more than one wife — merely a permission to do so. Indeed, the right to take up to four wives is not an absolute, unqualified one. A man must treat them equitably, avoiding bias in favor of any one of them.

Second, the key requirement for taking multiple wives in *surah* 4, *ayah* 3 of the Qur'ān (quoted above), "equitable treatment," or "avoid[ing] bias," is difficult to define precisely, and probably impossible to practice perfectly. Conceptually, what does "equitable" treatment mean? Does it mean identical — *i.e.*, completely equal — treatment? That does not seem to be the case, because of what *surah* 4, *ayah* 129 says:

You will never be able to treat your wives with equal fairness, however much you may desire to do so, but do not ignore one wife altogether, leaving her suspended [between marriage and divorce].<sup>7</sup>

If "equitable" means "equal," then the above-quoted passage effectively repeals the permission in *surah* 4, *ayah* 3, to have up to four wives. That is, under the theory of naskh (repeal), *ayah* 129 would be the "*nāsikh*" (repealing passage), and *ayah* 4 would be the "*mansūkh*" (repealed passage). Yet, Islamic practice allows polygamy. Thus, "equitable" seems to mean substantively equal treatment, with minor gradations possible. Such questions ought to provoke a man to think carefully before engaging in polygamy.

As a practical matter, is it ever possible for a man to treat simultaneously two, three, or four women equitably in a meaningful sense? The women are different, and are deserving of different, individualized treatment. Preferences inevitably arise, which lead to distinctions, and not all such distinctions can be dismissed as trivial. Moreover, the man must have the financial wherewithal to take care of his multiple wives on an equitable basis. He cannot put one in a palace, another in an apartment, and a third in a hut, feed one like a queen, one like a commoner, and one like a beggar, and give one designer jewelry, one cosmetic jewelry, and one no jewelry at all. Such treatment hardly would be "equitable" or "unbiased." It would undermine the protective function for women that, supposedly, may be achieved through polygamy.

Third, while "equitable" and "equal" are not synonyms, they often end up being considered nearly so in practice. It is not uncommon for Muslims to express the requirement of *surah* 4, *ayah* 3 of the Qur'ān as one of "equal" treatment. For example, if a husband spends one night and one day with one wife, then he must spend one night and one day with each of his other wives. Moreover, he is not supposed to visit multiple wives in the same night or day. This kind of quantitative

<sup>7</sup> Qur'AN, *supra*, 4:129 at 63.

calculus quickly becomes an issue of organization and management, worthy of an Excel spreadsheet, and for most Muslims is far more trouble than it is worth.

Because of this reality, it bears repeating that the vast majority of Muslim men are not in polygamous marriages, have no interest in them, and actually frown on them. In many countries where such marriages are legally permissible, *i.e.*, where the *Shari'a* on this topic has not been modified by modernist legislation, such as Bangladesh and Pakistan, they are looked upon socially with considerable disapproval. They are an indicator that the man is crude and unsophisticated in his thinking.

Fourth, an incumbent wife or wives of a husband have a say in the selection of an additional wife. It might be an overstatement to suggest the first wife (or if there are already two or three wives, any or all of the incumbent wives) can veto the choice of another wife. But, she has some measure of influence as to the approval of another wife. Her influence may be grounded in legislation, such as in Pakistan under Section 6 of the *Muslim Family Law of 1961*, which requires approval from the first wife for a second marriage — a point that has been affirmed by the Federal *Shari'a* Court of Pakistan, which is the apex Islamic Court in that country.<sup>8</sup> The theory is this approval is a means by which the incumbent wife can protect herself from unjust treatment. The practice depends in no small part on the receptivity of the husband to the views of his existing wife or wives.

## § 34.02 ARGUMENTS ABOUT POLYGAMY

### [A] Justifying Polygamy and Orientalist Fallacy

Reference to "orphan girls" in the first clause of *surah* 4, *ayah* 3 of the Qur'ān is noteworthy. As Professor Abdel Haleem indicates, use of this term refers to the fact that:

{i}n pre-Islamic Arabia, some guardians of orphan girls used to marry them in order to take their property.<sup>9</sup>

Later in *surah* 4, in *ayah* 127, the Qur'ān warns:

They ask you [Prophet] for a ruling about women. Say, "God Himself gives you a ruling about them. You already have what has been recited to you in the Scripture about orphan girls [in your charge] from whom you withhold the prescribed shares [of their inheritance] and whom you wish to marry, and also about helpless children — God instructs you to treat orphans fairly: He is well aware of whatever good you do."<sup>10</sup>

Taken together, *ayah* 3 and 127 are insightful, because they reveal a motivation to countenance polygamy, namely, the protection of women.

<sup>8</sup> See Khurshid Khan Associates, *Pakistan: Apex Islamic Court Recognizes Polygamy But Requires Equal Treatment* (6 January 2000), posted at [www.mondaq.com/article.asp?articleid=8132](http://www.mondaq.com/article.asp?articleid=8132).

<sup>9</sup> Qur'AN, *supra*, fn. c to 4:3 at 50.

<sup>10</sup> Qur'AN, *supra*, 4:127 at 62 (emphasis added).

In pre-Islamic times on the Arabian Peninsula, during which the line between marriage and concubinage was ambiguous, women were easily abused. In seeking to break traditional tribal affiliations, and replace them with a community of believers, the Prophet Muhammad challenged many of the customs of the tribes. Among those customs was loose sexual morality. *Ayah* 127 reminds a man that should he choose to marry an orphan, he is not free to appropriate their property and thereby maximize his own wealth. Rather, he must treat his orphan-wife fairly, and give her property that is due to her, including by inheritance. Further, a man cannot have as many wives as he chooses, and thereby create his own harem. He is restricted to a maximum of four, with the further caveat he take multiple wives only if he treats them in an equitable, unbiased manner. In these respects, the rule on polygamy may be justified as protective of women.

In other words, this protection-of-women justification reads the Qur'an in light of pre-Islamic customary law, under which women had little if any substantive protections. Of course, that justification falls into the trap of committing the Orientalist Fallacy. Moreover, justifying the polygamy rule based on such an old *status quo ante* — pre-Islamic times — is unconvincing. However much a polygamous marriage involving orphans might have helped women in the 7th or 8th centuries, few observers would regard polygamy as beneficial for women in the 20th or 21st centuries. Finally, the justification presumes that a Muslim polygamist indeed would treat four or fewer wives better than a pagan polygamist treats five or more wives. That presumption seems plausible on the numbers, but bespeaks a prejudice against non-Muslim men.

### [B] Questioning Polygamy

It is commonplace for non-Muslim westerners, and indeed many Muslims, to criticize polygamy. They do so for good reason. Query whether polygamy is defensible under any standard of law, religion, or morality.

Surely polygamy is at odds with the principle of human dignity, which is common to all legal, religious, and moral systems: namely, each person is created in the image and likeness of God, and that person is unique, unrepeatable, and of inestimable value. Polygamy debases the human dignity of women. In practice, women inevitably are less privileged than men under a regime of polygamy. That is true even though under the *Shari'a*, a wife in a monogamous or polygamous marriage does have recourse through divorce. She can seek from a *qādi* a decree of dissolution of the marriage (*tafriq*). But, her ability to do so often is more theoretical than real, because it depends on support from her family and her ability to command income in the labor market.

There are plenty of additional reasons for criticizing polygamy. For instance, there appears to be psychological evidence of the negative effects of a polygamous marriage on children, many of whom experience confusion and uncertainty as to paternal and maternal love. Tragically, children may be used as pawns in power struggles and bickering among wives (as, indeed, occurs in some situations of divorce), and between wives and their husband. Children can be emotionally damaged by the reality that one mother loves them more than another, or that their father loves a different mother more than their own biological mother.

Along with psychological concerns are biological ones. There appears to be evidence to the effect that for certain species, including humans, polygamous marriages are unnatural. Moreover, there also may be negative demographic and environmental effects. Because they spawn a large number of children, polygamous marriages lead to family sizes that are not sustainable in respect of resource consumption.

Finally, consider the conventional justification, which is subject to the Orientalist Fallacy, laid out above: polygamy "protects" women relative to the status they had in pre-Islamic times on the Arabian Peninsula. Assume this justification is correct. From what are women being "protected," other than the abusive treatment of women by men? That abuse occurs when a man sees little distinction between a wife and a prostitute, or put it more politely, objectifies women as instruments for his physical gratification. Nevertheless, polygamy victimizes women, for reasons just suggested. The regime, which supposedly assists women, injures them. Worse yet, polygamy fails to address the underlying problem: men. If women need protection from philandering behavior of men, then how can the correct remedy be to denigrate women in polygamous marriages? Surely the proper response is to educate men about women, that they are their equals, and about sexuality, that it is about mutual self-giving love and openness to new life.

### § 34.03 MODERNIST LEGISLATION ON POLYGAMY

Tunisia — renowned as a progressive Muslim country — has gone a step further than other Islamic countries that discourage polygamy via cultural and social norms. Tunisia officially bans polygamy: in 1956, Tunisia enacted modernist legislation forbidding it.<sup>11</sup> This prohibition is effected through the Tunisian *Code of Personal Status*.

The *Code* retained Islamic rules concerning the dowry (nuptial gift, or *mahr*, discussed below), and concerning the status of being a foster-parent as an impediment to marriage. But, the *Code* prohibition was based on the view that polygamy was un-Islamic, because it is impossible to obey the Qur'anic injunction of treating each wife equitably, much less equally. Inevitably, thought the Tunisian government, one wife becomes relatively better off. Stated differently, the Tunisian government argued that it was not disregarding the Qur'an. Rather, it was choosing between two competing principles (the permissibility of having up to four wives, but the requirement of treating each of them equitably), both of which were impossible to follow simultaneously. Thus, in Tunisia, polygamy is a criminal offence. Moreover, any marriage requires the consent of both the groom and the bride. The *Code* also laid out a procedure for divorce.

Even though few, if any other Muslim countries, have followed the lead of Tunisia on this issue, in most Islamic circles it is thought that the Tunisian government argument is correct: it is impossible to treat multiple wives equitably, much less equally. Interestingly, Morocco of late has been considering similar kinds of reforms. The United States and Morocco entered into a free trade agreement

<sup>11</sup> See SCHACHT, *supra*, at 108.

(FTA), which took effect on 1 January 2006. It appears the United States, perhaps as part of the FTA process, has prodded Morocco to make Family Law reforms of the kind Tunisia has implemented. The European Union (EU) maintains a number of trade agreements with Arab Muslim countries in the Mediterranean region, and includes in some of them a human rights clause. Whether this clause extends to women's rights and polygamy, and whether the EU would push that interpretation in the first place, is uncertain.

## § 34.04 MIXED MARRIAGES

### [A] Basic Rules and Challenge of Globalization

Inter-religious marriage is a controversial topic in Islamic Law.<sup>12</sup> There is a basic, broad prohibition on mixed marriages for Muslim men and women. Muslim men and women are supposed to marry within the Islamic faith. This prohibition is founded on *surah* 2, *ayah* 221 of the Qur'ān. There is an exception, which operates asymmetrically in favor of Muslim men, in *surah* 5, *ayah* 5.

For Muslim women, there is no exception to the general prohibition on mixed marriages. Muslim women are forbidden from marrying non-Muslim men. All Islamic jurists (*fukahā*) unanimously prohibit a Muslim woman from marrying a non-Muslim man, even if that man is a "*kitābi*."<sup>13</sup> The Arabic term "*ahl al-kitāb*," or simply "*kitābi*," means "People of the Book" (or "Peoples of the Book"). This term is vague, i.e., its boundaries are not entirely clear. Nonetheless, the vagueness does not work to the benefit of women. It is forbidden (*ḥarām*) for them to marry any *kitābi*, much less a non-*kitābi*.

The Islamic faith passes from one generation to another through the father. Therefore, the fact there is no exception to inter-faith marriage for Muslim women certainly serves the interest of perpetuating the faith. Indeed, that interest is a justification for it. In practice, when a Muslim woman marries a man who was not born into the Muslim faith, then it is typical that the man converts to Islam before the marriage.

As for Muslim men, the exception in *surah* 5, *ayah* 5 is not interpreted identically across all Four *Sunnite* Schools. The *Hanafi* School offers the most liberal interpretation of this exception: a Muslim man is permitted to marry a woman from amongst the People of the Book, i.e., among the *kitābi*, which particularly means a Christian or Jewish woman.<sup>14</sup> He certainly is not encouraged to do so, and the act is often looked at disapprovingly (*makrūh*). The *Māliki*, *Shāfi'i*, and *Hanbali* Schools, plus *Shi'ite* legal scholars, provide a more conservative interpretation of this exception: a Muslim man is prohibited from marrying a woman from any other faith, except for a woman who is a chaste and pious Christian or Jewish woman, who also does not attribute any partners next to God

(Allāh). That is, these three Schools allow for inter-marriage only to a *kitābi*, who also is demonstrably not a "*mushrik*." The latter term, which also is the subject of some ambiguity, generally is translated as "idolator" or "polytheist."

As intimated above, the term "*ahl al-kitāb*" or "*kitābi*" is important in understanding the rules of Islamic Family Law on inter-faith marriage. One understanding of the term is that it refers to any unbeliever — that is, any non-Muslim — who adheres to a religion that possesses a book, in the sense of a sacred scripture. After all, the word "*kitāb*" means "book." But, there seem to be three dimensions to the term. As Professor Schacht indicates, it refers to:

followers of revealed religions who believe in a prophet and possess a scripture. . . .<sup>15</sup>

Here, then, are the ambiguities. What does it mean to say a religion is "revealed"? Who is a "prophet"? What counts as a "scripture"?

Arguably, under a broad understanding, Hindus and Sikhs would be among the "People of the Book." The sacred texts of Hinduism include the *Vedas*, the most ancient of the Sanskrit and Hindu texts ("*Veda*" means "knowledge" in Sanskrit), and the *Upanishads*, which span from the first millennium B.C. to medieval times. The sacred text of Sikhism is the *Guru Granth Sahib* (also called in Punjabi the "*Adi Granth*"), which is 1,430 pages and was composed and collected between 1469-1708, the era of the Ten Sikh Gurus. Both Hinduism and Sikhism have known well the prophetic voice, and their teachings have been revealed over time.

Buddhism also would be included. The principal text is the "*Dhammapada*," (in Pali, "*dhamma*" means "doctrine" or "eternal truth," and "*pada*" means "foot," and together the title means "*path*"). It contains the verses of Buddha (*circa* 563-483 B.C.), who may be regarded as a "prophet" (depending on how that term is defined), and Buddhist teachings have been elaborated over time.

However, there is a narrower approach to the term "*ahl al-kitāb*" or "*kitābi*" common among Muslims. Typically, they understand it to refer to followers of the monotheistic religions, specifically, the Abrahamic Faiths that are older than Islam — Judaism and Christianity. This understanding is unfortunate, because there are other monotheistic faiths, with a prophet or line of prophets, which have a book — Sikhism, the Ten Sikh Gurus, and the *Adi Granth* being a prime example. As to whether Hinduism is monotheistic or polytheistic, and whether Buddhism is more appropriately classified as a philosophy rather than a religion, there is a debate. But, both pre-date Islam and have a sacred text (or texts). In other words, defining "*ahl al-kitāb*" or "*kitābi*" as referring exclusively to Jews and Christians plainly strikes out a large number of people, particularly in Asia on the Indian Subcontinent and in the Far East.

With globalization and the increasing interaction among peoples of different faiths, interfaith marriage is an increasingly prominent modern reality. That also is true in Islam, especially for Muslims living in non-Muslim western countries. Without doubt, acceptance of interfaith marriage has not occurred, and will not come easily, in Muslim countries and cultures. In fact, even marriage among

<sup>12</sup> See LYNN WELCHMAN ED., *WOMEN'S RIGHTS AND ISLAMIC FAMILY LAW: PERSPECTIVES ON REFORM 194* (London, England: Zed Books Ltd., 2004). [Hereinafter, WELCHMAN.]

<sup>13</sup> See WELCHMAN, *supra*, at 194.

<sup>14</sup> See WELCHMAN, *supra*, at 13.

<sup>15</sup> See SCHACHT, *supra*, at 131 (emphasis added).

different "types" of Muslims is not universally accepted in Islamic culture. The practice is frowned upon if both men and (especially) women, from one sect of Islam, marry someone from another sect.

The same is true as to marrying a person from another caste, in the sense of socio-economic order (as Islam, unlike Hinduism, does not have a caste system). For example, some Muslim Rajputs in Pakistan and India still believe their children should marry only from among Rajputs. (Traditionally, "Rajputs" are a martial race and ruling class of Northern India and Gujarat. Many converted to Islam during the Moghul dynasty).

This patently stubborn narrow-mindedness is ironic. Islamic history boasts many examples of Muslim interfaith couples. Even the Prophet Mohammed was married to Safiyah, who was Jewish, albeit in part for the purpose of cementing a peace treaty with a conquered Jewish tribe. Akbar the Great, the third Mogul Emperor of India, married Jodha Bai, a Hindu princess. Mohammad Ali Jinnah, the founder of Pakistan and an Islamic reformist, married a Rattanbai Petit, a Zoroastrian (who converted to Islam). Regrettably and surprisingly, Jinnah embodied the irony: he disowned his own daughter, Dina, when she married a Zoroastrian-born Christian. Modern examples of interfaith marriage in politics include the parents of an American President, Barack Hussein Obama, who had a Muslim father, Abdou Diouf, a Muslim who was the second President of Senegal, and who married a Catholic woman, and India's Hindu parliamentarian Sachin Pilot, who is married to the Muslim daughter of a former Chief Minister of Kashmir. In pop culture, there are famous Muslim interfaith marriages, not to mention well-known interfaith unmarried couples.

#### [B] Prohibition on Marriage with *Mushrik*: Interpreting *Surah 2, Ayah 221*

What is the source of the rules in the *Shari'a* on interfaith marriage? The answer is *surah 2, ayah 221*, of the Qur'an. This passage lays out a prohibition against marriage to a "*mushrik*." This term is loosely translated as "idolator" or "polytheist." But, the proper scope of this term also is the subject of controversy. Consequently, the prohibition has been the subject of elaboration and interpretation. The answer also is *surah 5, ayah 5*. This passage is treated as an exception to the general prohibition — but, the exception it grants is only to Muslim men. These passages raise a key question: why does the *Shari'a* prohibit a Muslim woman from marrying any non-Muslim man, including from the *kitabi*, i.e., a Jewish or Christian man?

The general rule on interfaith marriage is in *surah 2, ayah 221* of the Qur'an:

Do not marry idolatresses until they believe: a believing slave woman is better than an idolatress, even though she may please you. And do not marry your women into marriage to disbelieving men until they believe: a believing slave is better than an idolater, even though he may please you . . . .<sup>16</sup>

<sup>16</sup> Qur'an, *supra*, 2:221 at 25 (emphasis added).

The Arabic term used for "idolators" in this passage is "*mushrikeen*." The rule clearly articulates that marriage to the *mushrikeen* is forbidden.

However, there is conflict among Islamic jurists (*fukahā*) as to the meaning of the word "*mushrikeen*." Some scholars translate it as "idolators." This translation intimates a connection to pagans, i.e., "*mushrikeen*," as "idolators," are pagans. Under this translation, Christians and Jews generally would not be viewed as "*mushrikeen*." Some Muslims might misunderstand certain practices to be akin to idol worship, such as confusing veneration of the Cross with worship of the Cross, or veneration of the Virgin Mary with worshiping an idol (e.g., a statue) of Mary. Yet, overall, Muslim scholars who emphasize "*mushrikeen*" as "idolators" would not think of Christians and Jews as "pagans." Other Islamic scholars translate "*mushrikeen*" as "polytheists," or persons who ascribe partners next to God (Allāh). If the latter definition is accurate, then an important issue is raised concerning the status of Christians and Jews: are they "*mushrikeen*?"<sup>17</sup>

*Surah 2, ayah 221* continues by explaining the reasoning behind the prohibition:

Such people call [you] to the Fire, while God calls [you] to the garden and forgiveness by His leave.<sup>18</sup>

In Islam, a man and his wife are the two halves of humanity.<sup>19</sup> They ought to be committed to each other in a loving, balanced relationship. To that end, a spouse should be loyal to God (Allāh), and help protect and advance the religious practice of his or her family. In other words, the spouse should be a Muslim man or woman. Conversely, marrying a "*mushrik*" pulls a person and his or her family away from God, and toward "the Fire," which is an obvious metaphor for hell. That is, to marry a non-Muslim is to put oneself and one's family at serious risk of losing entry into Heaven.

Of course, every religious faith is self-interested in its preservation. Islam is no exception. Propagation of the Islamic faith through the father, and rules on

<sup>17</sup> In respect of the meaning of "Trinity" in the Christian faith, and an early belief among some Jews that Ezra was the son of God, consider *surah 5, ayah 72*:

Those who say, "God is the Messiah, son of Mary," although the Messiah himself said, "Children of Israel, worship God, my Lord and your Lord," have defiled [what he said]: if anyone associates others with God, God will forbid him from the Garden, and Hell will be his home.

Qur'an, *supra*, 5:72 at 75. See also id., 9:30 at 118-119. Of course, Christians — both Catholic and Protestant — do not regard the declaration of Christ as the Son of God as a "defilement" of what Jesus said, but rather regard Jesus as both fully human and fully Divine. They point to the overwhelming evidence, including the words and deeds of Jesus, to support the Doctrine of the Trinity, found (inter alia) in sacred scripture (namely, the Bible).

<sup>18</sup> Qur'an, *supra*, 2:221 at 25 (emphasis added).

<sup>19</sup> See, e.g., the following verses in the Qur'an:

• *Surah 2, ayah 187* —

... they [your wives] are [close] as garments to you, as you are to them.

• *Surah 2, ayah 228* —

... Wives have [rights] similar to their [obligations], according to what is recognized to be fair, and husbands have a degree [of right] over them. . . .

Qur'an, *supra*, at 21, 26, respectively.

inter-faith marriage that work to this end, serve, and may be justified by, this self-interest.

Three interpretations arise from *surah* 2, *ayah* 221, provided "*mushrikeen*" is defined as "idolaters" as well as "polytheists." The first interpretation leads to a prohibition governing all Muslim men and all Muslim women from marrying all people, including some Muslims, with any type of "polytheistic" belief or practice. Who might such Muslims be? There are many Muslims in India and Pakistan of the *Hanafi* School who pay homage at *Sufi* shrines. (*Sufism* sometimes is described as Islamic mysticism.) These practices are thought to be polytheistic by the *Hanbali* School. Because the first interpretation is the strictest of the three, it yields the broadest prohibition, ruling out the widest swathe of potential brides and grooms. It excludes even some Muslims.

The second interpretation leads to a prohibition on all Muslim men and women against marriage with those people who, like the idolaters in Mecca in pre-Islamic times, hold polytheism to be their true religion. Assuming Hinduism to be a polytheistic religion, then, Hindus would be excluded from eligibility for marriage. Conversely, all those (chaste) people who believe in monotheism are eligible spouses for a Muslim, even if they may have a "polytheistic" practice. This interpretation permits marriage between Muslims and Jews, or between Muslims and Christians, as well as between Muslims and other Muslims who would not qualify under the first interpretation. Jews and Christians, as Children of Abraham, are monotheists — even if some Muslims misunderstand the Doctrine of the Trinity in Christianity to be a borderline "polytheistic" practice.

The second interpretation may allow for marriage between Muslims and Sikhs, and Muslims and Buddhists. It also may condone marriage between Muslims and Hindus, assuming Hinduism is a monotheistic religion, albeit with "polytheistic" practices. Note, therefore, this interpretation distinguishes between a religion that is polytheistic through-and-through, and a religion that has some colorable polytheistic rituals.

The third and final interpretation is the narrowest one. It results in a prohibition of marriage with the people of *Banu Ishmael* alone. The term "*Banu Ishmael*" refers to uneducated people who are polytheists, or who rejected Islam and insisted on or lapsed back into paganism after the advent of Islam. In effect, the "*Banu Ishmael*" are Arab pagans or polytheists. The Qur'an does not describe any other group of people, except for the *Banu Ishmael*, as "*mushrik*."<sup>20</sup> Thus, they clearly ascribe to polytheism and a Muslim man or woman must not marry one of them. In other words, this interpretation relies on people the Qur'an itself identifies as "*mushrik*." Because the Qur'an names only the *Banu Ishmael* (and Arab polytheists), a person falling within these categories are the only ones a Muslim man or woman cannot marry. Jews, Christians, Sikhs, Buddhists, and Hindus are all marriageable persons.

The third interpretation of *surah* 2, *ayah* 221 is a minority one. The first two interpretations are more widely accepted among Islamic jurists. But, there is no

clear consensus. The *fukahā'* are split between the first two interpretations of the passage.

### § 34.05 EXCEPTION FOR MUSLIM MEN: *SURAH* 5, *AYAH* 5

Following *surah* 2, *ayah* 221, the Qur'an, in *surah* 5, *ayah* 5, again addresses marriage with non-Muslims. But, it does so with a critical difference: the later provision addresses Muslim men. *Surah* 5:5 reads as follows:

Today all good things have been made lawful for you. The food of the People of the Book is lawful for you as your food is lawful for them. [Note that *surah* 5, *ayah* 5 specifically excepts pork.] So are chaste, believing, women as well as chaste women of the people of who were given the scripture before you, as long as you have given them their bride-gifts and married them, not taking them as lovers or secret mistresses.<sup>21</sup>

This passage addresses men not explicitly, but implicitly. It would be entirely incompatible with the *Shari'a*, including its rules on marriage and sex crimes, to read *ayah* 5 as including women wedding other women.

*Surah* 5 is a Medinan *surah*. *Ayah* 5, along with the rest of the *surah*, was revealed when Islam already had spread throughout Medina. The cultural and social values of Islam had become the dominant values of Medinan society. Thus, *surah* 5, *ayah* 5 is only considered legal permission in a Muslim state. That is, the passage is not understood as a commandment creating an obligation for men to marry chaste, non-Muslim "women of the Book."

Rather, this passage is an exception that allows a Muslim man to inter-marry, to a limited degree, should he choose to do so. Perhaps ironically, this view crosses into the Orientalist Fallacy. It seems to examine the passage in its historical context, the logic being to the effect that in Medinan society, when the passage was revealed, some Muslim men took Christian or Jewish wives, and this passage ratifies the practice.

#### [A] *Hanafi* School Interpretation of *Surah* 5, *Ayah* 5

In any event, there is a subtle distinction among the Four Sunnite Schools as to *surah* 5, *ayah* 5. Today, the *Hanafi* School has the largest number of followers, and it happens to offer the most liberal interpretation of the passage. Jurists (*fukahā'*) from this School allow interfaith marriage with all believing women. It unequivocally prohibits marriage only with Zoroastrian women, idolatrous women, and Sabeian women. Additionally, if a woman worships the planets, and has no scripture, then the School holds it is not permissible for a Muslim man to marry her.<sup>22</sup>

Stated differently, the *Hanafi* School interpretation allows marriage with all *kitābi* women, even if those women associate partners next to God (Allāh). Jurists

<sup>21</sup> Qur'an, *supra*, 5:5 at 68 (emphasis added).

<sup>22</sup> See THE SAHEEFAH: HANAFI FIQH MANUAL, Section 3.5, posted at [www.ummah.net/AI\\_adaab/fiqh/saheefah.html](http://www.ummah.net/AI_adaab/fiqh/saheefah.html).

<sup>20</sup> See, e.g., the following *surah* and *ayah*: 2:105, 3:67, 9:1–33, and 98:1.

in this School think the "*kitābi*" always have been addressed separately from the "*mushrik*." Moreover, at the time of the Prophet Muhammad, Christians firmly believed in the Doctrine of the Trinity. If Allāh had wanted to group the *kitābi* with the *mushrik*, then He would have done so clearly in His revelation to the Prophet. (After all, as He is omniscient, he surely knew what Christians believed.) Instead, Allāh identifies them as separate groups. The inference *Ḥanafī* School jurists draw is that not all *kitābi* are idolators or polytheists. Some of them may be, but they cannot all be lumped together as such. Women among the *kitābi* who are not *mushrik* are eligible for marriage to a Muslim man.

For example, a Christian woman is "*kitābi*" by virtue of her Christianity. Her belief in the Doctrine of the Trinity does not automatically make her *mushrik*. So long as she is not "*mushrik*," a Muslim man can marry her. This interpretation suggests the *Ḥanafī* School defines "*mushrik*" more in terms of "idolatry" than "polytheism." Or, at least, the School does not regard belief in the Trinity as "polytheistic."

### [B] *Mālikī, Shāfi'ī, and Ḥanbalī School Interpretations of Surah 5, Ayah 5*

All other Schools, the *Mālikī, Shāfi'ī, and Ḥanbalī* School, as well as *Shī'ite* legal scholars, take a more conservative approach to the exception of *surah 5, ayah 5* than does the *Ḥanafī* School. The jurists (*fukahā*) of these three Schools, and of *Shī'ism* say it applies only to those *kitābi* (i.e., Christian or Jewish) women who are not *mushrikeen* (i.e., idolators or polytheists). In other words, Muslim men are prohibited from marrying women from all other faiths, except those women who are chaste and pious Christian and Jewish women, who also do not attribute any partners next to God (Allāh). These three Schools reach this conclusion in light of *surah 2, ayah 221*, and the belief that Christians and Jews may also be "*mushrik*."

Thus, under the strict interpretation by *Mālikī, Shāfi'ī, and Ḥanbalī* and *Shī'ite* jurists, *kitābi* women are not entirely prohibited for Muslim men — but nearly so. (In *Shī'ite fiqh*, the restriction on Muslim men marrying *kitābi* women applies only to standard marriage, not to *mut'a* (temporary marriage).) That there is no blanket ban on marriage to *kitābi* women is because of the permission *surah 5, ayah 5* grants. Moreover, it is because the Qur'an addresses the People of the Book favorably. For example:

- *Surah 3, ayat 110-115:*

<sup>110</sup>[Believers], you are the best community singled out for people: you order what is right, forbid what is wrong, and you believe in God. If the People of the Book had also believed, it would have been better for them. For although some of them do believe, most of them are lawbreakers — <sup>111</sup>they will not do you much harm: even if they come out to fight you, they will soon turn tail; they will get no help — <sup>112</sup>and, unless they hold fast to a lifeline from God and from mankind, they are overshadowed by vulnerability wherever they are found. They have drawn God's wrath upon themselves. They are overshadowed by weakness, too, because they have persistently disbelieved in God's revelation and killed prophets without any

right, all because of their boundless disobedience and transgression.<sup>113</sup> But they are all not alike. There are some among the People of the Book who are upright, who recite God's revelations during the night, who bow down in worship,<sup>114</sup> who believe in God and the Last Day, who order what is right and forbid what is wrong, who are quick to do good deeds. These people are among the righteous<sup>115</sup> and they will not be denied [the reward] for whatever good deeds they do: God knows exactly who is conscious of Him.<sup>23</sup>

- *Surah 3, ayah 199:*

Some of the People of the Book believe in God, in what has been sent down to you and in what was sent down to them: humbling themselves before God, they would never sell God's revelation for a small price. These people will have their rewards with their Lord: God is swift in reckoning.<sup>24</sup>

There are additional verses in the Qur'an that commend Jews,<sup>25</sup> and indicate they are offered salvation if they follow the true teachings of Moses.<sup>26</sup> That also is true of Christians, i.e., there are passages praising them, and observing they are offered salvation if they follow the true teachings of Jesus.<sup>27</sup> Thus, examining these passages, the *Mālikī, Shāfi'ī, and Ḥanbalī* Schools agree the possibility exists that certain *kitābi* women are "good" in a moral and spiritual sense. They are the type of non-Muslim women — but the only type — with whom a Muslim man may be wed.

Thus, the other three Schools, and *Shī'ite* thinkers, reject the interpretation and rationale of the *Ḥanafī* School.<sup>28</sup> Their rejection is based on the conclusion that even though the Qur'an refers to Christians and Jews as the "*kitābi*," this reference does not mean they may not also be "*mushrikeen*."<sup>29</sup> A Christian or Jew, while a "People of the Book," also could be a "polytheist" in the sense of attributing partners next to Allāh. Accordingly, it is necessary that a woman affirmatively not be a "polytheist" (and thus is not *mushrik*), and also affirm that she is a chaste, pious, Christian or Jew (and thus is *kitābi*), before a Muslim man can marry her.

Interestingly, under this strict interpretation, in terms of marriage to a Muslim man, Jewish women should be considered more eligible than Christian women. Present-day Jews do not associate any partners next to God. *Surah 9, ayah 30* of the Qur'an refers to a group of Jews, which at the time of the Prophet Muhammad, made the claim Ezra was the son of God. Few (if any) Jews currently advance that claim. In contrast, it is both standard and integral Catholic Christian teaching that

<sup>28</sup> See MOHAMMED HASHIM KAMALI, *SHARIAH LAW: AN INTRODUCTION* 90 (Oxford, England: One World Publications, 2008). [Hereinafter, KAMALI.]

<sup>29</sup> See, e.g., Qur'an, *supra*, 9:30-31 at 118-119.

there is one God, and the mystery of the Holy Trinity involves Three Persons in this one God. In particular, Jesus Christ is the Son of God. That also is true of Protestant Christianity.

In support of their argument for a narrow reading of the exception in *surah* 5, *ayah* 5, scholars of the *Mālikī*, *Shāfiʿī*, and *Hanbalī* Schools refer to a famous *ḥadīth* of the Prophet Muhammad on the issue. This *ḥadīth* is in the collections of *Imām* Bukhari and *Imām* Muslim. Abū Huraira narrated the statement of Muhammad that makes the Islamic faith of a (female) spouse a condition for marriage:

The messenger of Allāh . . . said: women are married for four reasons: for wealth, for family nobility, for beauty and for Deen: You should marry for *Deen*, otherwise may your hands be rubbed in the dirt.<sup>30</sup>

"*Deen*" is a broad term used to connote faithfulness, understanding, and observance of Islam. The scholars use this *ḥadīth* to make the point that Muhammad himself speaks of the critical criterion among prospective brides when a man contemplates marriage.

#### § 34.06 PROBING SURAH 5, AYAH 5 EXCEPTION

##### [A] Gender Asymmetry

The limited exception to the general prohibition in *surah* 2, *ayah* 221 on interfaith marriage that exists for a Muslim man in *surah* 5, *ayah* 5 to marry certain Christian or Jewish women does not extend to a Muslim woman. A Muslim woman is not free to choose a husband from among Christian or Jewish men. To the contrary, a Muslim woman must marry a Muslim man. Expressed from the perspective of a non-Muslim, a male unbeliever, even one who is from among the People of the Book ("*ahl al-kitāb*" or "*kitābī*"), i.e., a Christian or Jew, may not marry a Muslim woman according to the *Sharīʿa*. The prospective bridegroom would have to convert to Islam, which would have the further consequence of ensuring the children are Muslim (a topic discussed later).

Thus, the exception for marriage to the *kitābī* is asymmetric in respect of gender. Why? The question is especially poignant, because the Qurʾān does not specifically forbid a Muslim woman from marrying from among the People of the Book. There is no passage in it that amounts to an injunction stating: "Thou shalt not marry a non-Muslim man." However, *surah* 5, *ayah* 5 (quoted earlier) exclusively mentions the Arabic term "*muḥsanaat*," which means "chaste females" (from among the People of the Book). They are "made lawful" for Muslim men, to whom the verse is addressed. The verse does not say "*muḥsaneen*," or chaste males. Indeed, the verse is not addressed to Muslim females.

Because of this difference, the majority consensus (*ijmaʿ*) among religious and legal scholars (*ulema* and *fukahāʾ*, respectively) in all Four Schools is that under no conditions is a Muslim woman permitted to marry anyone but a Muslim man.<sup>31</sup>

<sup>30</sup> This version of the *ḥadīth* is recorded in *Sahih Muslim*, and posted at <http://hadith.al-islam.com>.

<sup>31</sup> See KARALI, *supra*, at 90.

Indeed, the *Hanafi* School, as well as the Twelver *Shīʿites* (*Jaʿfaris*) go as far as to declare that even a recent convert, i.e., a man who is first in his family to be a Muslim, is not suitable for a woman born to a Muslim father.<sup>32</sup>

This particular declaration, which stresses Islamic lineage as a criterion for marriage, is dubious. Surely marriage to a recent convert is not prohibited, given that the Prophet's own parents were not Muslims. The declaration also wrongly pre-judges converts to Islam. Converts sometimes are among the most knowledgeable and dedicated practitioners of a faith, insofar as they have carefully studied its tenets and precepts, and made a free choice to convert. In contrast, "cradle" followers, i.e., persons who were born into a faith, sometimes admit to a modicum of apathy about their faith, insofar as they may take it for granted. Indeed, in Catholic Christianity, this distinction between "convert" and "cradle" Catholics is often remarked, and there is perhaps no better example of the virtues that a convert can display than G.K. Chesterton (1874-1936), who in 1922 converted from Protestantism (Anglicanism) to Catholicism, and was one of the most intelligent, witty, and influential writers and thinkers of the 20th century.

On the larger matter, the consensus that a Muslim woman is forbidden from marrying a non-Muslim man appears to be based on a negative inference. What the Qurʾān mentions expressly as permissible for men (i.e., to take certain non-Muslim brides) is allowed. But, what it omits (namely, non-Muslim husbands for Muslim women) must be forbidden. Put differently, the implicit logic seems to be as follows: both men and women need to be given express permission to marry a Person of the Book. Only men were granted such permission. Therefore, women must be barred from marrying outside the Islamic faith.

This consensus on the topic of marriageable men for a Muslim woman is vulnerable to four counter-arguments. First, the *ijmaʿ* among Islamic scholars is a consensus largely, if not exclusively, reached among male scholars. The point is obviously not that male scholars are incompetent on the subject. That would be an unfair and prejudicial assertion with no basis in fact. Rather, the point simply is to raise the question of the diversity of views taken into account when reaching a consensus. Put directly, is not a consensus on a matter intimately involving women better informed and reasoned if it accounts for the views of women as they articulate them?

Consider the following perspective. The *ḥadīth* most often cited on the topic of Muslim women and inter-faith marriages concerns the marriage of the Muslim daughter of the Prophet Muhammad, Zainab, with Abul-ʿĀṣ bin Al Rabīʿ. Muhammad ordered Zainab to leave her husband, who remained a disbeliever after the advent of Islam.<sup>33</sup> To be sure, a consensus of the jurists (*ijmaʿ*) is generally considered binding. But, the interpretation of the *ḥadīth* (pertaining to the rights

<sup>32</sup> ASIFA QURAISHI & FRANK E. VOGEL, eds., *THE ISLAMIC MARRIAGE CONTRACT: CASE STUDIES IN ISLAMIC FAMILY LAW* 17 and fn. 125 at 36 (Cambridge, Massachusetts: Harvard University Press, 2008). [Hereinafter, QURAISHI & VOGEL.]

<sup>33</sup> See ENGLISH TRANSLATION OF JAMʿ AT-TIRMIDHĪ, COMPILED BY IMĀM HAFIZ ABU ʿĪSĀ MUHAMMAD IBN ʿĪSĀ AT-TIRMIDHĪ, TRANSLATED BY ABU KHALIL, vol. II, book 9 (The Chapters (On Narrations Reported) On Marriage from the Messenger of Allāh), pp. 512-513, *ḥadīth* no. 1143 (Riyadh, Kingdom of Saudi Arabia: Darussalam).

and position of women), as well as that of the Qur'an, is exclusively by male scholars. They belong to, and indeed are part of the core of, patriarchal societies. This *ḥadīth* could (and perhaps should) be viewed differently. It could be contended that because Zainab was married to a Quraish, the *ḥadīth* is meant as a prohibition against mixed marriages with polytheists and idolators, but not against believers from other faiths.

Second, from the silence of *surah* 5, *ayah* 5 of the Qur'an, either one of two inferences logically may be drawn:

- (1) either this silence means Muslim women are also permitted to marry such non-Muslims as are permissible (of the opposite sex) for Muslim men, or
- (2) it means Muslim women are prohibited from marrying all non-Muslims, including chaste believers.

Virtually all Muslim jurists draw the latter inference. The foundation of this inference is an interpretative approach to a text: only what a text explicitly allows is lawful, whereas silence as to a proposed act means the act is forbidden. Interestingly, in the former Union of Soviet Socialist Republics (U.S.S.R.), the same legal presumption about a text existed: that which was not explicitly permitted by the text was deemed forbidden. This approach is characteristic of communist legal systems, and is a presumption against behavioral freedom and choice. The reverse presumption, which favors freedom and choice, exists in American law: that which is not expressly forbidden in a text is permitted.

Third, there are instances in the interpretation of certain verses in the Qur'an in which a generous inference is drawn. For example, consider *surah* 4, *ayah* 11, which concerns Inheritance Law, and which reads in part:

Parents inherit sixth each if the deceased leaves children; if he leaves no children and his parents are his sole heirs, his mother has a third, unless he has brothers, in which case she has a sixth. . . .<sup>34</sup>

Manifestly, if a deceased person leaves no children, then the share of the father is not mentioned in the relevant passage. The inference could be the father gets nothing, which is a prohibition-type of interpretation akin to holding that Muslim women cannot marry Muslim men. After all, if the text does not expressly provide for the father of a childless deceased offspring, then the father gets nothing (or so the reasoning would go). But, that is not the reasoning Islamic jurists (*fukahā'*) apply. Instead, they unanimously agree his share (i.e., that of the father) is implicit, and the same as the share of the mother.

Fourth, perhaps a specific verse addressing only women is unnecessary. That is, there may be no need for *surah* 5, *ayah* 5 to deal with who women can marry. That is because of *surah* 2, *ayah* 221. Part of that passage addresses women, and only prohibits marriage to "disbelieving" men. By simple common sense, all "believing" men — not just Muslim believing men — are (or ought to be) eligible spouses for Muslim women.

To be sure, the fourth counter-argument hinges on the meaning of "disbelief," or its opposite, "belief." Does a prospective husband believe in Islam? Or, would it suffice for him to believe in a monotheistic God? Manifestly, the passage itself does not answer the question. The narrower interpretation, which imposes a greater restriction on the freedom of choice of women, is to insert implicitly an adjective or phrase to the effect that "believing Muslim men" is intended. One difficulty with reading this qualification into the text of the Qur'an is that it begs a question: what does it mean to be a "believer," whether in Islam or any other monotheistic faith? Different people can adhere to the same faith, but manifest their belief in somewhat different ways, and saints aside, no one is a perfectly devout practitioner. In other words, what level of scrutiny should be given to a prospective husband as to his "belief" in Islam (or other monotheistic faith)? Asked differently, if the idea is that he should be a "good" Muslim, then by what criteria is his "goodness" to be judged? Are they strict, formal adherence to the Five Pillars of Islam, or does the whole pattern of his life matter?

A separate and distinct question concerns the real-world impact of the exception that exists for Muslim men in *surah* 5, *ayah* 5 of the Qur'an. In practice, this exception is null, until or unless, the *kitābi* women are among those who do not commit "*shirk*." The word "*shirk*" is the sin of polytheism. That is, it refers to worshipping a god other than Allāh, associating a partner or partners with Allāh, ascribing the features of Allāh to others, or simply not believing in His characteristics. It is akin to a violation of the First Commandment in Catholic Christianity.

Thus, the practical boundaries on the exception in *surah* 5, *ayah* 5, are that a Muslim male may marry a non-Muslim female only if (1) she is a Christian or a Jew (i.e., she is *kitābi*), and (2) she does not commit *shirk*. The exception does not allow a Muslim male to marry a devotee of, say, Hinduism or Sikhism, nor of Buddhism. Likewise, a Muslim male is not free to marry a Christian or Jew who is a polytheist. Of course, from a Christian or Jewish perspective, it is incompatible with those faiths to practice polytheism, as both Christianity and Judaism are as relentlessly monotheistic as is Islam, even though from a certain Islamic view (which is both in the minority and objectively incorrect), ascribing to Jesus the position of Son of God is *shirk*. It is sometimes said in Catholic Christian circles that the relentless pursuit of money, power, prestige, or sensual pleasures amounts to a violation of the First Commandment, and is akin to polytheism in the sense of worshipping Mammon more than God. Yet, surely that observation transcends Catholic Christianity, and envelopes Islam and all other faiths.

There is an additional boundary on the exception, which literally involves geography. Jurists (*fukahā'*) of the *Hanafi*, *Māliki*, and *Shāfi'i* Schools hold that it is reprehensible (*makrūh*) for a Muslim man to marry even a *kitābi* woman, if the Muslim man lives in a country in which Muslims are a minority. Thus, for example, a Muslim man living in Lawrence, Kansas, could marry a Jewish or Christian woman. But, it is an act that such legal scholars disapprove, as Muslims are a minority in the United States. The reasoning for this rule is that taking a non-Muslim wife and living in a non-Muslim society increases the likelihood that

<sup>34</sup> Qur'an, *raḥmān*, 4:11 at 51.

children of the couple are raised as non-Muslims.<sup>35</sup> That chance is reduced if the couple raises their offspring in a Muslim-majority country.

Note, however, that some jurists say a Muslim man is prohibited from marrying a *kitābi* woman if they live in a non-Muslim country.<sup>36</sup> That is, the act is not reprehensible (*makrūh*), but forbidden (*ḥarām*). Under this view, the gentleman from Lawrence is restricted to taking a Muslim bride. This strict view arises from the *Rashidun* Era, when Muslim leaders were focused on Islamic unity. For instance, the second Rightly Guided Caliph, 'Umar, harshly threatened Muslims who sought to enter into an inter-faith marriage, even though (or perhaps because) it was common practice at that time.<sup>37</sup>

### [B] Reasons and Counter-Arguments for Prohibiting Muslim Women from Marrying Non-Muslim Men

It is sometimes argued that Islam is a religion that is liberating for women.<sup>38</sup> Of course, the plausibility of this argument is open to reasoned debate. One ground for questioning the argument is the asymmetric nature of rights concerning mixed marriages. As discussed earlier, all scholars are unanimous in the verdict that Muslim women are not allowed to marry non-Muslims, even from among the People of the Book ("*ahl al-kitāb*" or "*kitābi*"). In contrast, Muslim men have the ability, subject to restrictions, to take Jewish or Christian women as their wives. Is there a way to "square" the argument that Islam enhances the freedom of women with the strong emphasis of the *Shari'a* as to a Muslim woman marrying within Islam?

The short answer is "yes," but the basis for it is parlous. The rationale is that the rules on inter-faith marriage are not about women. Rather, they are about children and the promulgation of the faith. That is, setting aside debates about the proper interpretation of relevant passages in the Qur'an or from among the *ḥadīths*, there are two main pragmatic reasons for the strict prohibition for Muslim women.

First, in Islam a contract of marriage (*nikāh*) establishes the paternity of a man of the children conceived by his wife.<sup>39</sup> Therefore, it is assumed a Muslim woman married to a *kitābi* man will likely bear non-Muslim children. This result is unacceptable to the jurists (*fukahā*). In other words, Islam as a faith passes through the father. Consequently, as a matter of Islamic Family Law, the offspring of a union between a Muslim man and a *kitābi* woman are considered Muslim. In

<sup>38</sup> See, e.g., Dr. Sultana Afroz, *Women In Islam — Myths And Realities*, posted at [http://izenjoro.wordpress.com/2009/07/19/women-in-islam-myths-and-realities/#\\_edn13](http://izenjoro.wordpress.com/2009/07/19/women-in-islam-myths-and-realities/#_edn13).

<sup>39</sup> See QUR'ANISH & VOGL, *supra*, at 12.

contrast, the offspring of a *kitābi* man and a Muslim woman are not considered Muslim. This distinction, of course, generated considerable attention during and after the 2008 American Presidential election in respect of Barack H. Obama. As was widely reported, the father of Mr. Obama was a Muslim from Kenya. By some accounts, his father rejected Islam before the future President was born. By all accounts, he was raised not by his father as a Muslim, but by his mother, a Christian from Kansas. In any event, Mr. Obama became Christian long before becoming President. Perhaps the most important point lost amidst the controversy was that in the United States, with its history of religious freedom and tolerance, the most appropriate response to whether Mr. Obama was born a Muslim or not was "what does it matter?"

Of course, for purposes of the *Shari'a*, such controversy cannot be blithely dismissed. Every religion requires a simple enumeration of the way or ways in which a person can become an adherent. In Islam, the options are two-fold: be born to a Muslim father, or convert. A follow-on question, however, must be asked: as a practical matter, is passage of a religion through the father or mother more likely to result in a child retaining the faith and practicing it as an adult?

An interesting study on this question was done using census data from 1980, 1990, and 2000 from the Yogyakarta province of Indonesia.<sup>40</sup> The study found that on average, 70 percent of children born to inter-religious married couples became Muslim if their mother was Muslim. But, only about 50 percent of the children became Muslim if their father was Muslim. These data do not lend support to the rationale for the traditional *Shari'a* rule that a Muslim woman must not marry a non-Muslim man.

Surely, though, that study is not the end of the matter. There is a lack of evidence regarding the faith of children born to non-Muslim fathers (which is not surprising given the taboo on Muslim women marrying them). Moreover, it may be ventured that the most important determinant of whether a child retains and practices the faith into which she is born is the behavior of the parents — either or both of them — not their nominal religious affiliation. Children are perceptive. They can distinguish whether parents live their faith and radiate it in the home, with their family, friends, and colleagues, or ritualistically go through the motions on Friday at mosque, or Sundays at church.

Before considering the second rationale, a brief digression is worth entertaining. An interesting question under Islamic Family Law concerns a mixed marriage between two unbelievers (*kāfirs*) of different faiths. If the couple produces children, then to what religion do the children belong? The answer is based on a perceived hierarchy among *kāfirs*: in descending order of privilege, they are People of the Book ("*ahl al-kitāb*" or "*kitābi*"), Zoroastrians, and pagans.<sup>41</sup> Thus, the answer is

<sup>40</sup> This study is cited in Aini, *supra*, at 688.

However, these statistics may be skewed. The Yogyakarta province has been marked by Islamic development and "resurgence" as a whole. See Kim Hyung-Jun, *Reformist Muslims in a Yogyakarta Village: The Islamic Transformation of Contemporary Socio-Religious Life* (2007), posted at [eprints.anu.edu.au/islamic/reformist/pdf/reformist-whole.pdf](http://eprints.anu.edu.au/islamic/reformist/pdf/reformist-whole.pdf).

<sup>41</sup> See SCHRACHT, *supra*, at 131-132.

that the children belong to the "higher" religion.<sup>42</sup> Thus, for example, if a Catholic Christian marries a Buddhist, and if Buddhists are slotted with pagans, then the offspring of the couple would be regarded — again, according to the *Shari'a* — as Catholic. Of course, Catholicism and Buddhism propose their own teachings as to the designation of a child as a "Catholic" or "Buddhist." Evidently, Islamic Family Law places no faith in those teachings, to the extent it even is aware of them, and thus does not have anything close to a rule that would give them deference or full faith and credit.

As to the second rationale for the asymmetric exception in Islamic Family Law for men, but not women, to marry from among the People of the Book, it implicates the approach to inter-faith marriages of those other People. In the Qur'an, religious coercion is forbidden. It contains passages describing how Islam offers freedom of faith,<sup>43</sup> freedom of religion,<sup>44</sup> and freedom of thought.<sup>45</sup> In some Muslim circles, it is wrongly believed that Christians and Jews are not specifically prohibited from forcing another to accept their faiths.<sup>46</sup> In these circles, it is thought (again, wrongly) that Christian scriptures condemn inter-faith marriages,<sup>47</sup> and so does Jewish scripture.<sup>48</sup>

In truth, Christians and Jews are forbidden from compelling others to accept their faith. After all, Christians (both Catholic and Protestant) hold that God, not man (or woman), does the converting, in His time, and in His sometimes mysterious ways, and that He wants us to love Him by free choice, not by compulsion. As for Judaism, it is not a religion known to proselytize, much less entertain forcible conversions. Of course it is true non-Christian or non-Jewish women marry Christian or Jewish men, respectively, and in the process of their courtship or marriage, they may convert to Christianity or Judaism. But, as high as expectations may be among some family members for a conversion, particularly in an orthodox setting, the conversion is not to be forced.<sup>49</sup>

Nevertheless, operating on this misunderstanding about the true position of Christianity and Judaism on conversion, in some Muslim circles it is believed that a Muslim woman married to a *kitābi* man is in a more vulnerable position in her

<sup>45</sup> See, e.g., the following *sūrat* and *āyat*: 6:110, 10:11, 11:121, 15:3, 17:84, and 32:45.

<sup>46</sup> See QURASHI & VOGEL, *supra*, at 12.

<sup>47</sup> See Ontario Consultants on Religious Tolerance, 1 Corinthians 7:39, 2 Corinthians 6:14-15, *What the Bible says about Interfaith Marriages*, posted at [www.religioustolerance.org/1fm\\_bibl.htm](http://www.religioustolerance.org/1fm_bibl.htm). [Hereinafter, Ontario Consultants.]

<sup>48</sup> See Ontario Consultants, *supra*.

The Jewish Scriptures contain a few cases of inter-faith marriages that appear to be approved by God. For example, when Moses marries a non-Israelite woman from a different religion, Aaron and Miriam criticize Moses. But, God supports his decision, and punishes Miriam by making her leprosy. Other references to inter-faith marriage look askance at the practice. See, e.g., Exodus 12:1, 34:12-16, Deuteronomy 7:1-4, Ezra 10:2-3, Nehemiah 13:25-27, Malachi 2:11.

<sup>49</sup> See Ontario Consultants, 1 Corinthians 7:12-14, *supra*.

relationship to convert than is a *kitābi* woman married to a Muslim man. Further, it is observed that a Muslim woman loses her extra rights granted to women in Islam, such as the right to divorce in accordance with the *Shari'a*, should she marry a non-Muslim man.<sup>50</sup> To each point, a counter-argument exists.

First, it is chauvinistic to claim that a woman is more vulnerable to conversion than a man. No less an example than the Virgin Mary, who is respected by Muslims and Christians alike, and who was Jewish, need be recalled to show the strength of a woman as to faith. It was faith that Mary had at the Annunciation, and faith that she had at the foot of the Cross. That faith of a woman is an inspiring example to all. Second, the loss of divorce rights under Islamic Family Law may well be made up, and even enhanced, by the divorce rights provided by the legal system in which the Muslim woman in question resides. That surely would be the case in the United States.

A final counter-argument is an empirical one. There simply is a lack of evidence to support the stereotype that exists among some Muslim circles that the majority of even non-orthodox Christian or Jewish husbands force their Muslim wives to convert (any more than Christian or Jewish wives may force their Muslim husbands to convert). In sum, the reasoning for the complete bar on Muslim women marrying non-Muslims based on the Qur'an and the *hadith*, seems rather weak. In truth, this *fiqh* (jurisprudence) is based on culture, traditions, and, worst of all, misunderstanding of other faiths.

## § 34.07 CONTRASTS WITH CATHOLIC CHRISTIANITY

In Roman Catholic teaching, technically a "mixed marriage" is one between a Catholic and baptized non-Catholic, whereas a marriage between a Catholic and non-baptized person is called a "disparity of cult." The *Catechism of the Catholic Church* takes up the topic of mixed marriages, recognizing that a "[d]ifference of confession between the spouses does not constitute an insurmountable obstacle for marriage."<sup>51</sup> However, the *Catechism* also teaches:

the difficulties of mixed marriages must not be underestimated. They arise from the fact that the separation of Christians has not yet been overcome. The spouses risk experiencing the tragedy of Christian disunity even in the heart of their own home. Disparity of cult can further aggravate these difficulties. Differences about faith and the very notion of marriage, but also different religious mentalities, can become sources of tension in marriage, especially as regards the education of children. The temptation to religious indifference can then arise.<sup>52</sup>

Clearly, unlike Islamic Law, Roman Catholic doctrine does not limit mixed marriages for men, bar them for women, or put up distinctions between men and women. While both paradigms emphasize the education of children born into a mixed marriage, Catholic doctrine highlights two further areas of concern: tension

<sup>50</sup> For a discussion of the historical basis of such an argument, see Aini, *supra*, at 687.

<sup>51</sup> CATECHISM, *supra*, ¶ 1634 at 408 (emphasis added).

<sup>52</sup> CATECHISM, *supra*, ¶ 1634 at 408 (emphasis added).

in the marriage, and religious apathy. The saddest outcome is one in which the husband, wife, and children ignore the faith traditions in their family, because they would rather eschew the hard work of forging a union among themselves and God, and take the easier path of a secular life.

The *Catechism* then discusses the issue of children in a mixed marriage:

According to the law in force in the Latin Church, a mixed marriage needs for liceity the *express permission* of ecclesiastical authority. In case of disparity of cult an *express dispensation* from this impediment is required for the validity of the marriage. This permission or dispensation presupposes that *both parties know and do not exclude the essential ends and properties of marriage; and furthermore that the Catholic party confirms the obligations, which have been made known to the non-Catholic party, of preserving his or her own faith and ensuring the baptism and education of the children in the Catholic Church.*<sup>53</sup>

In effect, the permission of the relevant authority in the Catholic Church is required for a valid, sacramental marriage between a Catholic and non-Catholic party.

That permission is given on two pre-conditions. First, neither the husband nor wife excludes the "essential ends and properties of marriage." Producing children is one such "essential end and property." Second, both the husband and wife appreciate the obligation of the Catholic spouse as to the baptism and education of the children in the Catholic faith. In other words, both parents know of and do not exclude the obligation of the Catholic parent (whether it is the mother or father) to raise the children as Catholics. In respect of the second pre-condition, does the non-Catholic spouse have to pledge to raise the children Catholic? The answer is "no." The United States Conference of Catholic Bishops explains:

The non-Catholic spouse does *not* have to promise to have the children raised Catholic.<sup>54</sup>

Does the second pre-condition mean the Catholic spouse must succeed in raising the children Catholic? Again, the answer is "no," as the Conference of Bishops explains:

The Catholic spouse must promise to do *all that he or she can* to have the children *baptized and raised* in the Catholic faith.<sup>55</sup>

In other words, the non-Catholic spouse cannot be forced to raise the children Catholic. The Catholic spouse cannot be expected to guarantee that the children will "turn out" Catholic for the rest of their lives. But, the Catholic spouse must do his or her absolute best to have the children baptized and receive the other relevant sacraments, namely, first reconciliation (confession), first Holy Communion, and

<sup>53</sup> *CATECHISM, supra*, ¶ 1635 at 408 (footnotes omitted, emphases in first and second sentences original, emphasis in third sentence added).

<sup>54</sup> United States Conference of Catholic Bishops, *Laity, Marriage, Family Life, and Youth — Frequently Asked Questions About Marriage*, posted at [www.usccb.org/laity/marriage/marriagefaq.shtml](http://www.usccb.org/laity/marriage/marriagefaq.shtml) (response to Question #8, *When a Catholic marries a non-Catholic, must the non-Catholic promise to raise the children in the Catholic faith?*). [Hereinafter, Conference of Catholic Bishops.]

<sup>55</sup> Conference of Catholic Bishops, *supra*.

confirmation, and to bring the children to Mass in accordance with the normal life of the Church.

A final, key question concerns conversion of the non-Catholic spouse. The *Catechism* addresses this question clearly:

In marriages with disparity of cult the Catholic spouse has a particular task: "For the unbelieving husband is consecrated through his wife, and the unbelieving wife is consecrated through her husband [citing 1 Corinthians 7:14.]" It is a great joy for the Christian spouse and for the Church *if* this "consecration" should lead to the *free* conversion of the other spouse to the Christian faith. Sincere married love, the humble and patient practice of the family virtues, and perseverance in prayer can prepare the non-believing spouse to accept the grace of conversion.<sup>56</sup>

To "consecrate" is to "set apart as sacred," or "sanctify" — in essence, to make holy.<sup>57</sup> Thus, the non-believing spouse is drawn closer to God through the Catholic spouse — at least insofar as the Catholic spouse tries to lead a holy life. But, plainly, the Catholic spouse is not to force the non-Catholic spouse to convert. Couched in hopeful terms, the non-Catholic spouse is not required to convert, but it is a blessing if that occurs.

##### § 35.05 BIBLICAL CONTRAST

##### § 35.01 COMMUNITY VERSUS INDIVIDUAL PROPERTY

Several American states are known as “community property states.” This appellation means that under the Family Law of the state, all assets a husband or wife obtains during the marriage are jointly owned by the couple. Should the couple divorce, these assets — the property of the marriage — are split equally by the parting parties. More technically, “community property” refers to:

Assets owned in common by husband and wife as a result of its having been acquired during the marriage by means other than an inheritance or a gift to one spouse, each spouse generally holding a one-half interest in the property.<sup>1</sup>

The nine community property states (as of 2009) are Arizona, California, Idaho, Louisiana, Nevada, New Mexico, Texas, Washington, and Wisconsin. A number of

<sup>1</sup> BRYAN A. GARNER ED., *BLACK'S LAW DICTIONARY* 317 (St. Paul, Minnesota: West, 9th ed., 2009).

interesting cases arise as to what constitutes community property. For instance, is a law degree earned during the marriage by one spouse and financed through the work of the other spouse "community property?"

Islamic Family Law takes the polar opposite approach to assets and marriage (*nikāh*) from a community property regime. With respect to all assets, there is no marital community. An asset is either the property of the husband (*zawg*), or of the wife (*zawja*). Assets that a bridegroom or bride own individually on the eve of their marriage remain their personal property throughout their marriage. For example, books owned by a bride, accumulated through her school years, remain in her library (even if co-mingled with books of the bridegroom). Assets that either the husband or wife acquires during the marriage remain owned by the husband or wife, respectively. For instance, if the husband buys land for a second home in his name, then that land is his. To be sure, the husband subsequently can re-title the land, placing it in the name of his wife. Thus, more generally, the couple is free to give or trade assets between them during the marriage.

## § 35.02 NUPITAL GIFT (MAHR)

### [A] Basic Terms

An essential element of the contract of marriage (*nikāh*) is the nuptial gift. In Arabic, this nuptial gift is called "*mahr*." The wife (*zawja*) — not the husband (*zawg*) — has a right to this marital gift. This legal entitlement is consistent with the Chinese custom, in which a bridegroom-husband gives a gift to his bride-wife. But, it is at odds with the Hindu tradition of dowry, in which the bride or her family pays the bridegroom, essentially on the theory that he will have to earn money to take care of his wife.

The nuptial gift (*mahr*), once made, becomes the property of the wife (*zawja*). It is her property for as long as she is alive. That is true regardless of the status of her marriage — whether the marriage remains intact, or whether it ends in divorce. Should the marriage terminate by divorce, or should her husband predecease her, her *mahr* could prove critical to her financial security. The *mahr* may provide her with some or all of the funding she needs to defray her basic living expenses. Accordingly, the wife has the right to keep her *mahr* in a separate bank account that is her own. Should she choose to commingle her *mahr* with the assets of her husband in a joint account, the *mahr* nonetheless stays her property.

Under the *Shar'ia*, what must the minimum *mahr* be? The answer is 10 *dirhams*, but this answer is not specified in either the Qur'an or *Sunnah*. Neither of these sources prescribes a minimum nuptial gift. Instead, the source of the rule is analogical reasoning (*qiyās*), albeit a rather crude analogy at that. The *ulema* analogized *mahr* to the minimum value of stolen goods. Under Islamic Penal Law, that minimum value in relation to the crime of theft (*sarika*), as set by the Ancient Schools of Iraq in Basra and Kufa, is 10 *dirhams*. They set this amount rather arbitrarily, and the subsequent analogy to the nuptial gift is crude. Still, over time the minimum nuptial gift became 10 *dirhams*.

The basis for the analogy is that a husband ought not to be legally permitted to use the body of his wife for a sum less than the threshold that authorizes the *hadd* punishment — which is loss of a limb — for theft.<sup>2</sup> As occurred with the threshold in theft cases, there was an effort to cloak questionable analogical reasoning with sacred tradition. To lend greater authority to this 10 *dirham* threshold, the *ulema* expressed it as a tradition, namely, a doctrine that had commenced at the time of Caliph 'Ali (who reigned from 656-661 A.D., 35-40 A.H.).

Notably, the *Māliki* School accepts a different threshold — 3 *dirhams* — as the minimum *mahr*. *Imām* Malik adopted the analogical reasoning of some of the Iraqi *ulema* in the Ancient Schools, comparing a minimum value for stolen goods that would trigger the *hadd* punishment with a minimum nuptial gift.<sup>3</sup> However, Malik started the calculation with a different minimum amount — 3 *dirhams*.

In practice, the minimum value is irrelevant. Invariably, it is not what is actually paid. Rather, if no amount is fixed, what is paid is a "fair *mahr*," or "*mahr al-mithl*." Consequently, in practice the issue for the families of the bridegroom and bride is an age-old one, namely, what is a "fair" amount? The answer depends on the social position and other attributes of the bride. The higher her socioeconomic status, the higher the figure she can command. The answer does not hinge on the nature or status of the bridegroom.

The full *mahr* may be paid up-front, at the time of entry into the marriage contract. However, typically, the *mahr* is paid in installments, typically, two installments. The installments can be equal (50 percent-50 percent), or unequal (such as 30 percent first, and 70 percent later). A back-end loaded structure (i.e., one where over half of the payment comes in the second installment) is viewed as an inducement, particularly to the bride, to follow through on the contract and get married. The split across the installments is a matter for negotiation. Technically, the portion of a *mahr* that is paid immediately is known as "*mu'ajjal*," while the deferred portion is called "*mu'akhkhar*." Thus, a *mahr* may be paid entirely as a *mu'ajjal*, entirely as a *mu'akhkhar*, or a combination thereof.

When payment of the *mahr* is by installments, the bridegroom pays this first part immediately to the bride, at the time the marriage (*nikāh*) contract is entered into. Payment of the second part is deferred until no later than —

- (1) if the marriage is not repudiated (i.e., through *talāk*), the death of the husband,
- (2) if the marriage is repudiated, consummation, or
- (3) in the case of divorce, when divorce occurs.

In practice, the second installment often is paid shortly after the marriage occurs. In certain cases the *mu'akhkhar* may be paid only in the event the husband divorces his wife, or predeceases her (with the sum then coming from the estate of the decedent-husband).

<sup>2</sup> See JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW 39 (Oxford, England: Oxford University Press (Clarendon Paperbacks) 1982). [Hereinafter, SCHACHT.]

<sup>3</sup> See SCHACHT, *supra*, at 39.

Interestingly, the government of the United Arab Emirates (UAE) gives 70,000 UAE *dirhams* to bridegrooms to use as the *mahr* in their first marriage. (No funds are given for a subsequent marriage.) The government also provides land to a married couple to build its first home or apartment 2 years after their marriage. These schemes (as of 2008), which inure to the benefit only of Emirati citizens, were started in 1992-93 by Sheikh Zayed bin Sultan Al Nahyan (1918-2004), the late UAE President (1971-2004).

What if a marriage is repudiated before consummation (and the husband does not die)? That is, what effect is there on the *mahr* if there is a full repudiation before intimacy? The answer matters. If the wife has no right to the balance of the nuptial gift (*mahr*) in this scenario, then the husband is free to repudiate with no financial penalty. Fortunately, the Qur'an makes clear the wife has the right to half the stipulated *mahr*. If no amount is stipulated, then *surah 2 ayat 236-237* says she has the right to an indemnity:

<sup>296</sup>You will not be blamed if you divorce women when you have not yet consummated the marriage or fixed a dowry for them, but make fair provision for them, the rich according to his means and the poor according to his — this is a duty for those who do good.<sup>297</sup> If you divorce wives before consummating the marriage but after fixing a dowry for them, then give them half of what you had previously fixed, unless they waive [their right], or unless the one who holds the marriage tie waives [his right]. Waiving [your right] is nearer to godliness, so do not forget to be generous towards one another: God sees what you do.<sup>4</sup>

In practice, the indemnity is (at least) a set of clothing. This indemnity is called "*mut'a*," which is a distinct meaning from the same term when used to signify a temporary marriage, which is allowed for under Twelver *Shi'ite* doctrine. Thus, the husband has a strong disincentive to repudiate a marriage before consummation: he will have to pay the balance due of the nuptial gift.

### [B] Conditions and Stipulations

Could an unscrupulous bridegroom circumvent his duty to pay a fair nuptial gift (*mahr al-mithl*) by contracting out of that duty? After all, it is possible to insert conditions or stipulations in a marriage (*nikāh*) contract that impinge on the nature or amount of the nuptial gift (*mahr*). For instance, Professor Schacht posits a case in which a marriage contract says a husband (*zawj*) must not marry any other woman, i.e., an anti-polygamy clause, or that the bride must be a virgin, i.e., a specification concerning the state of one party.<sup>5</sup> As a general rule, conditions or stipulations inserted in a marriage contract are not binding. Applying the general rule to these examples, the man is free to marry another woman, and the bride need not be a virgin. In turn, even if the conditions are not fulfilled, the marriage contract still is valid — and the bride is entitled to the *mahr*.

<sup>4</sup> Qur'an, *supra*, 4:236-237 at 27 (emphasis added).

<sup>5</sup> See SCHACHT, *supra*, at 163.

But, what if the amount of the *mahr* is established in whole or in part based on a condition or stipulation in the marriage contract? Two scenarios are possible. First, payment of the correct amount of the *mahr* is tendered. This payment fulfills the express contractual term. Second, the condition or stipulation is not fulfilled, i.e., the bridegroom-husband does not pay. Is the marriage contract still valid? The answer is "yes." However, a new amount for the *mahr* is set, to replace the prior, unfulfilled condition for an exact figure. The new amount is set as the "fair" *mahr* (*mahr al-mithl*).

The general rule, then, is that conditions and stipulations in a marriage contract are legally unenforceable. In this respect, a marriage contract is not perfectly analogous to a commercial agreement. However, as a practical matter they can be enforced — one side could conditionally repudiate the marriage contract.<sup>6</sup>

### § 35.03 MAINTENANCE (NAFAKA)

Along with the right of a wife (*zawja*) to a nuptial gift (*mahr*), the most important right she has under a contract of marriage (*nikāh*) is a right to maintenance. The right to maintenance is known in Arabic as "*nafaka*." Under it, the wife has no obligation to pay for any part of her maintenance costs. Rather, her husband (*zawj*) has the duty, namely, he must contribute a portion of his income to his wife as part of her maintenance.

That is not to say a wife is forbidden from supporting herself in whole or part. She has every right to work, earn income, and provide for her own needs as well as those of her husband and children. The point is that because of *nafaka*, a wife is assured her husband has a legal obligation to take care of her. Particularly if the wife chooses not to work, or cannot work — for example, because she is fully occupied caring for children or aged parents, or is herself incapacitated — the allocation of this duty to the husband should provide her with certainty and predictability.

Notably, the mirror image of her right to *nafaka* does not exist. A wife has no obligation to support her husband. In fact, a wife has no duty to share any income she earns with her husband. She is entitled to keep all of her earnings for herself. That is true even if her earnings exceed those of her husband.

What does "maintenance" entail? The simple answer is it includes food, clothing, and shelter. "Food" need not mean dining at a five-star restaurant nightly, nor does it mean providing a subsistence diet of 1,200 calories daily. The proper maintenance amount depends on the ability of a husband to provide food. Likewise, "clothing" is defined neither in terms of Chanel apparel nor tattered rags. "What is the best I can provide, according to my means?" is the question a husband ought to ask, knowing that God (Allāh) will judge him in part on how he responds. As for "shelter," customarily it means a separate room that can be locked, or possibly an entirely separate house — again, depending on the resources of the husband. If those resources are plentiful, then "shelter" may include a personal servant for the wife.

<sup>6</sup> See SCHACHT, *supra*, at 163.

Because the wife has a right to both a *mahr* and *nafaka*, the property that comes to her via either route is hers, and hers to keep. That is, not only is the marital gift her own, but so also is the property she receives on account of her husband fulfilling his obligation to provide her with maintenance. He can no more take back her clothes, for example, than he can cash he gave her when they were married. Similarly, at no point does any such property become shared, in the sense of jointly owned by the wife and husband. Professor Schacht, therefore, concludes that this scheme of property ownership puts a wife in a "strong position as against the husband."<sup>7</sup>

This conclusion is not entirely correct. It is true in that a husband who tries to escape his duty to pay maintenance (*nafaka*), for example, by leaving the household, can be the target of a decision by a *qāḍī* (Islamic judge). A *qāḍī* can authorize the wife to obtain maintenance by pledging the credit of her husband. She could then borrow funds to obtain food, clothing, and shelter, commensurate with the creditworthiness of her husband, and the husband would be obligated to repay the indebtedness. The conclusion also is accurate in that even if the marriage is terminated, and a waiting period (*idda*) transpires, the wife has a right to maintenance during that period. As the following two passages from the Qur'an state:

- *Surah 2, ayah 241* —

Divorced women shall also have such maintenance as is considered fair: this is a duty for those who are mindful of God.<sup>8</sup>

- *Surah 4, ayat 19-21* —

<sup>19</sup>You who believe, it is not lawful for you to inherit women against their will [as occurred under the pre-Islamic Arabian custom, whereby her stepson or another man from the family of the stepson could inherit the widow], nor should you treat your wives harshly, hoping to take back some of the dowry you gave them, unless they are guilty of something clearly outrageous. Live with them in accordance with what is fair and kind: if you dislike them, it may well be that you dislike something in which God has put much good.

<sup>20</sup>If you wish to replace one wife with another, do not take any of her dowry back, even if you have given her a great amount of gold. <sup>21</sup>How could you take it when this is unjust and a blatant sin? How could you take it when you have lain with each other and they have taken a solemn pledge from you?<sup>9</sup>

There are two limited exceptions, namely, if the wife bears the fault for the dissolution through apostasy (*riddah*) or *li'an* (unchastity).<sup>10</sup> In brief, the rule

<sup>7</sup> SCHACHT, *supra*, at 167.

<sup>8</sup> QUR'AN, *supra*, 2:241 at 28.

<sup>9</sup> QUR'AN, *supra*, 4:19-21 at 52. See also *id.*, fn. b to 4:19.

<sup>10</sup> See SCHACHT, *supra*, at 167.

Some Muslim legal scholars suggest an ex-wife, and her children with her ex-husband, are entitled to maintenance (*nafaka*) if the divorce occurs via repudiation (*talāq*), oath of abstinence (*ilā'*), and even apostasy (*riddah*) or unchastity (*li'an*). They point out that some judges (*qāḍīs*) rule that the children, but

established by the above-quoted passages is a right of an ex-wife to alimony so long as she is not at fault. Note that this right also benefits children. A husband is obligated to provide maintenance (*nafaka*) to his ex-wife, and their children, after divorce.

But, the conclusion is incorrect insofar as it is overly optimistic. The right of a wife to *nafaka* is not absolute, but rather conditional, or contingent, on four key factors. If any one of these factors is present, then her right is suspended (but not cancelled) until there is an appropriate change in circumstances. The rationale for the suspension is that where a factor is present, the wife is not fulfilling her marital obligations to her husband.

First, as intimated above, a husband who is poor is not obliged to provide maintenance. This contingency is sensible enough. By definition, a penurious (in the sense of destitute) husband cannot cover all food, clothing, and shelter expenses.

Second, the right to maintenance is suspended if the wife is a minor. The right remains suspended until she comes of age. This contingency is distressing. It may allow a husband to treat his child-wife abusively. It also appears the husband is under no obligation to deposit in an account for the wife a sum of funds that aggregate to what he would have spent on her food, clothing, and maintenance had she been a mature woman from the time of their marriage.

Third, the right of a wife to maintenance is suspended if she performs the *Hajj* (pilgrimage) without her husband, is imprisoned on account of her own debt, or is abducted (in effect, the victim of usurpation, or *ghaṣb*). This contingency is vexing. It explicitly implies a wife cannot go on *Hajj* and leave her husband behind, at least not without his permission. Notwithstanding travel restrictions that might be imposed on women traveling alone by officials in Saudi Arabia, any Muslim husband in the world can threaten to withhold food, clothing, or maintenance from his wife should she seek to perform a Pillar of Islam without him. This threat amounts to control by the husband over her travel. As for suspension of *nafaka* in the event the wife is imprisoned for her debt or is abducted, arguably a loving husband with sufficient resources would set aside funds for his wife, either to pay off her debt, or any expenses — such as medical treatment, if she is harmed by her abductors, or even, possibly, ransom — in connection with her abduction.

The fourth contingency is even more concerning than the first three. The right of a wife to *nafaka* depends on her obedience to her husband. In other words, with her right to maintenance comes a correlative duty of obedience. What does "obedience" mean? The answer is two-fold.<sup>11</sup> First, refusal to have sexual intercourse with her husband is "disobedience." Second, leaving the house without the permission of her husband is "disobedience." Again, the logic behind these instances is that the right of the wife ought to be suspended, because she cannot, or refuses to, perform her marital duties — those being physical intimacy and presence.

not the wife, are entitled to maintenance after separation (*tafriq*). This pattern may be observed in the UAE. As for the infrequent use of *al khala'* (take away, pull, i.e., where the wife returns her nuptial gift (*mahr*)) in the UAE, when it occurs, the ex-wife is not entitled to *nafaka*, but her ex-husband must pay support for their children.

<sup>11</sup> See SCHACHT, *supra*, at 168.

Does the duty of obedience mean a Muslim wife owes sex on demand to her husband, and is a prisoner in the home with her husband holding the keys? That interpretation indeed is what some husbands, Muslim and non-Muslim alike, follow in practice. There is an obvious concern about rape within the context of a marriage, and other forms of domestic abuse. Prosecutions of rape in that context are all but unknown in Muslim countries, and much domestic abuse goes unreported and untreated. Still, such husbands are neither in the majority, nor are they correct in their thinking if they believe they have free reign over their wives. Consider *surah* 2, *ayah* 223:

Your women are your fields, so go into your fields whichever way you like, and send [something good] ahead for yourselves. *Be mindful of God: remember that you will meet Him.*<sup>12</sup>

The first sentence of this *ayah* metaphorically suggests a husband may sow his seed in the fields of his wife or wives. But, the second sentence reminds the husband of the Day of Judgment. Having his way with his wife without her consent — in effect, rape — is a behavior that prejudices his case for entry into Heaven. Moreover, this *ayah* must be kept in context, which (as *ayah* 222 indicates) is about the pain of menstruation and the obligation of men to keep away from women during their cycle. This *ayah* also addresses a concern that Muslims had when they migrated to Medina.<sup>13</sup> They had heard from Jews that if a man has sexual intercourse with a woman from behind, then any resulting child will be born with a squint. The above-quoted passage debunks the concern.

## § 35.04 HUSBAND'S RIGHT OF CORRECTION AND WIFE BEATING

### [A] Three Key Sentences of *Surah* 4, *Ayah* 34

A husband enjoys a right of correction as against his wife — a right that is very troubling indeed. As a general matter, *surah* 2, *ayah* 228 of the Qur'an states:

... Wives have [rights] similar to their [obligations], according to what is recognized to be fair, and *husbands have a degree [of right] over them*: [both should remember that] God is almighty and wise.<sup>14</sup>

This passage speaks of a similarity and fairness, and admonishes both spouses that God (Allāh) is watching. But, the italicized language vaguely identifies an enhanced status for a husband (though not absolute superiority in all instances), and there is no immediate counter-balancing phrase for a wife. More specifically, along with the threat of suspension of *nafaka*, there is a right of correction as a means to enforce obedience. What, exactly, is this right, and whence does it come?

At one level, the answer depends on the translation of the relevant passage from the Qur'an, which is *surah* 4, *ayah* 34:

Husbands should take full care of their wives, with [the bounties] God has given to some more than others and with what they spend out of their own money. Righteous wives are devout and guard what God would have them guard in their husbands' absence. If you *fear high-handedness* from your wives, *remind* them [of the teachings of God], then *ignore* them when you go to bed, then *hit* them. If they obey you, you have no right to act against them: God is most high and great.<sup>15</sup>

This passage is one of the most heavily examined ones in the entire Qur'an.

As translated, the first sentence should be uncontroversial. A husband has a duty to take care of his wife commensurate with his ability to do so. In effect, the first sentence is a Qur'anic textual basis for the correlative right of the wife — duty of the husband concerning maintenance (*nafaka*).

The second sentence intimates this right is not unconditional. A wife, if she is righteous, is a believer. She is a woman of integrity, in that she behaves in the absence of her husband as she would when he is present. The second sentence does not define specifically what she is to "guard," but (based in part on other passages from the Qur'an), among the candidates would be her body, particularly her private parts.

The third sentence is highly controversial. It establishes a right of correction on the part of the husband, and thus indicates the right to maintenance (*nafaka*) is conditional on obedience of the wife. The right is triggered by a "fear" of "highhandedness." Consider each word, in turn.

What is the test for "fear"? Is it an objective one, in which any man in the situation of the husband in question would have fear of high-handedness? That is, is the test one of the "reasonable husband," who in the same position would have the same emotional reaction? Or, is the test subjective — only the state of mind of the husband in question matters? Further, what evidence is required for "fear"? Is it actions by the wife, her words, or both? Are actions and words to be judged equally? May the actions or words relate to prospective future behavior — a threat — or must they pertain to an event that already has transpired?

As for "highhandedness," Professor Abdel Haleem explains:

The verb *nashaza* from which *nushuz* is derived means "to become high," "to rise." See also verse 128, where the same word is applied to husbands. It applies to a situation where one partner assumes *superiority* to the other and behaves accordingly.<sup>16</sup>

As for the use of the same verb subsequently in *surah* 4, *ayah* 128 states:

If a wife fears high-handedness or alienation from her husband, neither of them will be blamed if they come to a peaceful settlement, for peace is best. Although human souls are prone to selfishness, if you do good and are

<sup>12</sup> Qur'an, *supra*, 2:223 at 25 (emphasis added).

<sup>13</sup> See Qur'an, *supra*, fn. b to 2:223 at 25.

<sup>14</sup> Qur'an, *supra*, 2:228 at 26 (emphasis added).

<sup>15</sup> Qur'an, *supra*, 4:34 at 54 (emphasis added).

<sup>16</sup> Qur'an, *supra*, fn. a to 4:34 at 54 (emphasis added).

mindful of God, He is well aware of all that you do.<sup>17</sup>

Patently, this *ayah* does not authorize a wife to take any physical action — whether refusing sexual intercourse, gently tapping, or hitting — against her husband. In other words, *ayah* 128 is not the mirror image of *ayah* 34, because the latter verse condones physical retaliation, even if albeit slight or modest, whereas the former verse does not and instead speaks of settlement.

In any event, translating “high handedness” in terms of “superiority” of attitude, which then manifests itself in behavior, does not impose much of a barrier to physical violence against a wife. In every marriage, no matter how loving and equal, there are moments in which one spouse behaves in a superior manner relative to the other one. In part, that is because of human frailty. One side or the other is bound to be insecure about some dimension of life. For example, a husband may be jealous of the professional success, or personal popularity, of his wife. Is she to be punished for her strengths?

In other part, the inevitability of a “superior” attitude exists because the wife and husband come to the marriage with different abilities, skills, and talents. For instance, in some marriages, it is the wife who is the better financial manager than the husband. In these instances, it is sensible for her to exercise her comparative advantage, vis-à-vis her husband, and make choices about savings and investment for the household. Is this “superiority,” which becomes manifest in her dealings with commercial bankers and stock brokers, grounds for her husband to ignore her in bed, and perhaps hit her?

Suppose, then, that “high-handedness” connotes not mere superiority, but arrogance. Indeed, the *Oxford English Dictionary* lists “high-handed” as a synonym for “arrogant.”<sup>18</sup> To be “high-handed” is to disregard the feelings of another, or to be over-bearing.<sup>19</sup> It is not part of an ordinary, healthy marriage for a wife to treat her husband (or vice versa) in an egotistical way — i.e., in an aggressively assertive or presumptuous manner. Further, such supercilious behavior is morally incorrect, whether it is displayed to a spouse or stranger. With this rigorous definition of “high-handedness,” the problem still exists: is it appropriate to apply a corporal punishment on the wife?

The source of the problem, of course, is in the third sentence of *surah* 4, *ayah* 3. It creates the right of correction, a right held exclusively by the husband, and establishes a gradation of punishment. First, the husband is to “remind” his wife about Islamic teachings; never mind the possibility the wife may have a broader, deeper understanding of those precepts than the husband. It is the husband who does the “reminding.” Whether he is persuaded by the wife’s rendition of the teachings depends on the particular couple. Assuming not, then the second level of punishment is applied: the husband is instructed to ignore his wife when he goes to bed. That surely indicates he is to treat her as *persona non grata* in the marital bed, meaning he is not to have sexual relations with her, and can snub her in all other

<sup>17</sup> Qur’an, *supra*, 4:127 at 62.

<sup>18</sup> THE OXFORD AMERICAN DICTIONARY AND THESAURUS 73 (New York, New York: Oxford University Press, 2003) (entry for “arrogant”). [Hereinafter, OXFORD DICTIONARY.]

<sup>19</sup> See OXFORD DICTIONARY, *supra*, at 691-692 (entry for “high-handed”).

respects. Assuming the wife remains “highhanded,” then the third and most serious punishment is triggered: the husband may “hit” his wife.

## [B] Conventional Translations

Thus the debate is joined: does the Qur’an really authorize a husband to beat his wife? By some accounts, such as that quoted above in the translation of *surah* 4, *ayah* 34, provided by Professor Abdel Haleem, the right of correction includes “hitting” the wife. Other accounts use the verb “beat.” For example:

- From the 1955 edition of *The Koran Interpreted*, translated by Professor A.J. Arberry:

Men are the *managers* of the affairs of women for that God has preferred in bounty one of them over another, and for that they have expended of their property. Righteous women are therefore obedient, guarding the secret for God’s guarding. And those you *fear* may be *rebellious* admonish; banish them to their couches, and *beat* them. If they then obey you, look not for any way against them; God is All-high, All-great.<sup>20</sup>

The translator not only served as Head of the Department of Classics at Cairo University, Egypt, but also from 1947-1969 was the Sir Thomas Adams Professor of Arabic at Cambridge University, England.

- From the 2002 edition of *An Interpretation of the Qur’an — English Translation of the Meanings, A Bilingual Edition*, translated by Professor Majid Fakhry:

Men are *in charge* of women, because Allah has made some of them excel the others, and because they spend some of their wealth. Hence righteous women are obedient, guarding the unseen which Allah has guarded. And those of them that you *fear* might *rebel*, admonish them and abandon them in their beds and *beat* them. Should they obey you, do not seek a way of harming them; for Allah is Sublime and Great!<sup>21</sup>

The translator, born in Lebanon, is an Emeritus Professor of Philosophy at the American University of Beirut, and held an Associate Professorship at Georgetown University. The translator assures the reader of having “attempted to give as faithful an English rendering of the Arabic text as possible” and “correct[ing] the errors or lapses” of previous translations, including those by Professor Arberry (quoted above) and Marmeduke Pickthall (quoted below), such as “deliberate departure[s] from the original [Arabic text], for purposes of literary fluency or elegance.”<sup>22</sup> The translation by Professor Fakhry is officially approved by one of the most respected educational institutions in the Arab Muslim world, Al-Azhar

<sup>20</sup> THE KORAN INTERPRETED 4:34 at 105-106 (New York, New York: Simon & Schuster, 1955) (A.J. Arberry, trans.) (emphasis added). Note the numbering of *ayat* in this edition suggests the passage is from 4:38, though this enumeration appears to relate to paragraphs.

<sup>21</sup> AN INTERPRETATION OF THE QUR’AN — ENGLISH TRANSLATION OF THE MEANINGS, A BILINGUAL EDITION 4:34 at 86 (New York, New York: New York University Press, 2002) (Majid Fakhry, trans.) (emphasis added). [Hereinafter, AN INTERPRETATION OF THE QUR’AN.]

<sup>22</sup> Majid Fakhry, *Introduction*, AN INTERPRETATION OF THE QUR’AN, *supra*, at 3-4.

University in Cairo, Egypt. Notwithstanding all these points, the operative verb in the translations by Professor Fakhry and Arberry is the same: "beat."

To be sure, many Muslims understand the verb "hit" or "beat" to connote nothing more than a "tap" of the wife, say on her wrist. That understanding may resolve the debate for a couple, but it is not a systemic answer.

What, then, do other accounts indicate? Consider two further translations of *surah 4, ayah 34* of the *Qur'an*:

- From *The Meaning of the Glorious Koran*, rendered around 1919 by Marmaduke Pickthall —

Men are *in charge* of women, because Allah hath made the one of them to excel the other, and because they spend of their property (for the support of women). So good women are the obedient, guarding in secret that which Allah hath guarded. As for those from whom ye fear rebellion, admonish them and banish them to beds apart, and *scourge* them. Then if they obey you, seek not a way against them. Lo! Allah is ever High Exalted, Great.<sup>23</sup>

This translation is the first by an Englishman who also was a Muslim, and is one of the best known renditions in the English language.

Instead of "beat," the operative verb is "scourge." Yet, it is a difference with no substantive distinction. To "scourge" is to punish with a whip, and its synonyms include "lash," "flog," "beat," "belt," and "flagellate."<sup>24</sup> (The "Scourging at the Pillar" is an infamous scene in the last days of the life of Christ, and one of the Sorrowful Mysteries in the Catholic Rosary Prayer.) Its synonyms also include "chastise."<sup>25</sup>

- From the 2002 edition of *The Holy Qur'an, Arabic Text with English Translation and Commentary*, translated by Maulana Muhammad Ali —

Men are the *maintainers* of women, with what Allāh has made some of them to excel others and with what they spend out of their wealth. So the good women are *obedient*, guarding the unseen as Allāh has guarded. And (as to) those on whose part you fear *desertion*, admonish them, and leave them alone in the beds and *chastise* them. So if they obey you, seek not a way against them. Surely Allāh is ever Exalted, Great.<sup>26</sup>

The first edition of this Qur'an was published in 1917 in Great Britain, and was the first English-language version of the Qur'an to be generally available in the western world and widely accessible to western non-Muslim readers. The translator was a renowned author of several works on Islam. He died in 1951, having spent seven years (1909-1916) on the first edition, and five further years (1946-1951) on a revised edition.

<sup>23</sup> THE MEANING OF THE GLORIOUS KORAN 4:34 at 83 (New York, New York: Dorset Press, c. 1919) (Marmaduke Pickthall, trans.) (emphasis added).

<sup>24</sup> See OXFORD DICTIONARY, *supra*, at 1354 (entry for "scourge").

<sup>25</sup> See OXFORD DICTIONARY, *supra*, at 1354 (entry for "scourge").

<sup>26</sup> THE HOLY QUR'AN, ARABIC TEXT WITH ENGLISH TRANSLATION AND COMMENTARY 4:34 at 205-206 (Dublin, Ohio: Ahmadiyya Anjuman Isha'at Islam Lahore, Inc., U.S.A., new 2002 ed., Maulana Muhammad Ali, trans.) (emphasis added). (Hereinafter, THE HOLY QUR'AN.)

The operative verb is to "chastise." This verb means to "rebuke or reprimand severely," and to "punish especially by beating."<sup>27</sup> Its synonyms include "punish," "beat," "thrash," "whip," "flog," and "cane," as well as "scourge."<sup>28</sup> Manifestly, the use of this verb in the translation indicates imposition of serious corporal punishment is within the right of a husband. But, are appearances deceiving?

The translator, Maulana Muhammad Ali, elaborates, first as to what might trigger punishment — namely, "desertion," and, second, as to what kind of punishment is appropriate:

The word *nushūz*, which I have translated as *desertion*, primarily means *rising*, and as spoken of a woman in connection with her husband it means *her rising against her husband*. This is explained in a number of ways; according to one of these explanations it means *her leaving the husband's place and taking up an abode which he does not like* (AH) [i.e., *Bahr al-Muhīt* (Commentary), by *Imām* Athīr al-Dīn Abū 'Abd Allāh Abū Ḥayyān al-Undlūsī]. LL [i.e., *Arabic — English Lexicon* by Edward William Lane] quotes various authorities showing that *nushūz* on the part of the woman means that *the wife resisted her husband and hated him* (S, Q) [i.e., *Al-Sihāh Taj al-Lughah wa Sihāh al-'Arabiyyah* (Dictionary) by Ismā'īl ibn Hammād al-Jawhārī, and *Al-Qāmūs al-Muhīt* (Dictionary), by Shaikh Majd al-Dīn Muḥammad ibn Ya'qūb al-Fīrozābādī, respectively] and *deserted him* (T) [i.e., *Taj al-'Arūs* (Dictionary), by *Imām* Muḥibb al-Dīn Abū-l-Faīd Murtaḍā].

The remedy pointed out in the case of the wife's desertion is threefold. At first she is only to be admonished. If she desists, the evil is mended, but if she persists in the wrong course, her bed is to be separated. If she still persists, chastisement is permitted as a last resort (Rz) [i.e., *Al-Tafsīr al-Kabīr* (Commentary), by *Imām* Fakhr al-Dīn Rāzī]. Regarding this last remedy two things must, however, be borne in mind. Firstly, it is a mere permission, and sayings of the Prophet make it clear that, though allowed, it was discouraged in practice. Thus the Prophet is reported to have said, on the complaint of certain women as to the ill-treatment of [i.e., by or from] their husbands: "You will not find these men as the best among you" (AD 12:42) [i.e., *Kitāb al-Sunan* (Hadith), by *Abū Dawūd* Sulaimān]. According to Shāfi'ī, it is preferable not to resort to the chastisement of the wife (Rz). In fact, as the injunctions of the Qur'an are wide in their scope, the example of the Holy Prophet and his constant exhortations for kind treatment towards women, so much so that he made a man's good treatment of his wife the gauge of his goodness in general — *the best of you is he who is best to his wife* — show clearly that this permission is meant only for that type of men and women who belong to a low grade of society. Secondly, even this permission cannot be adopted indiscriminately, for sayings of the Holy Prophet make it quite evident that chastisement, when resorted to in extreme cases, must be very slight. I'Ab says it may be with

<sup>27</sup> See OXFORD DICTIONARY, *supra*, at 235 (entry for "chastise").

<sup>28</sup> See OXFORD DICTIONARY, *supra*, at 235 (entry for "chastise").

a toothbrush or something like it (AH). The Prophet is reported to have said: "You have a right in the matter of your wives that they do not allow anyone whom you do not like to come into your houses; if they do this, chastise them in such a manner that it should not leave an impression" (Tr. 10:11) [i.e., *Al-Jāmi'* (Hadith), by Abū 'Isā Muḥammad ibn 'Isā *Tirmidhī*]. Thus very slight chastisement was allowed only in extreme cases.<sup>29</sup>

This elaboration is hardly persuasive. As to the trigger event for chastisement, if a wife cannot rise up against her husband, by deserting him, then she is a prisoner at his mercy. There are unfortunate but real cases in which the best course of action — in terms of the mental and physical security of a wife — is to remove herself from the vicinity of her husband, and possibly also take her children with her. Moreover, the purported *ḥadīth* is of little comfort. It essentially informs a woman of a fact of which she already is aware: she is stuck with a lousy husband. But, it offers her no recourse against him, other than the hope the husband will come to realize he cannot be among the "best" among husbands unless he improves his behavior to his wife.

As for the remedy, the elaboration offered by Maulana Muḥammad Ali suffers from three defects. First, to say that permission to chastise a wife actually is intended only for "men and women who belong to a low grade of society" is more than snobbish. It is un-Islamic. Islam proclaims a message for all, regardless of socioeconomic status. Aside from long-antiquated provisions on slavery, and entirely understandable exhortations and rules concerning magnanimity toward the poor, Islam does not differentiate high from low class people. Further, the statement denies the equal dignity of women. Why is it permissible to chastise a woman of a lower socio-economic order, but not one from an upper-crust background? If all women (and men) are created in the image and likeness of God, then each is entitled to respect regardless of his or her position in a community.

Second, to invite "very slight" chastisement, such as a tap with a toothbrush, in "extreme" cases is to begin a dangerous journey down a slippery slope. Different husbands may interpret the key terms differently, with some versions rendering their wives susceptible to actual or threatened abusive treatment. To be sure, it is mildly comforting to hope this elaboration is correct (i.e., that if the proper translation is "chastise"), then that verb is not to be taken literally, but rather scaled back in its meaning to connote nothing more than a "very slight" rebuke that may be offered in an "extreme" case. Yet, the reality is that for all-too-many women, that hope is a faint one.

Third, might this approach be criticized on jurisprudential grounds? It uses *ḥadīths* from the Prophet Muḥammad, and scholarly opinion from Imām Shāfi'i, to restrict the meaning of a term in the Qur'ān. This sacred scripture is understood by Muslims as the Word of God (Allāh), and is to be followed scrupulously. Is it appropriate to use the non-prophetic utterances of Muḥammad, or the research of a renowned jurist, to depart from the plain meaning of a word like "chastise," and

in effect reinterpret the passage? Traditionists would argue that doing so undermines the traditional hierarchy of sources in the *uṣūl al-fiqh*, in which the Qur'ān is pre-eminent, the *Sunnah* second to it, and scholarly consensus (*ijma'*) a distant third in rank. Modernists would reply that both the verb "chastise" and the passage require interpretation through the use of independent or personal reasoning (*ijtihad*).

Note, finally, the above translation characterizes a husband as the "maintainer" of his wife. Not only does he have a duty to provide *naḥaka*, but also she is dependent on him. Consequently, he is in a superior position relative to her. Further, a wife, if she is "good," is "obedient" — but to whom? The translator declares:

Obedience here signifies obedience to Allāh. This significance of the word is made clear by a comparison with 33:31, 33:35, and 66:5.<sup>30</sup>

However, query whether this limitation — that obedience refers to Allāh, not to her husband, is correct. The entire *ayah* is about the rights and duties running between a husband and wife, not between a wife and God. Arguably, to render a harmonious interpretation, it may be that she shows her obedience to Allāh by her obedience to her husband. But, this interpretation puts a husband in an absolute position, and runs counter to the emphasis on equality found in other parts of the Qur'ān.

Manifestly, all of the above renditions are substantively equivalent. They represent the conventional wisdom in Islam about the *Shari'a* and wife beating. All of these translations are done by men. In sharp contrast, only the translation by Dr. Laleh Bakhtiar, an American female convert to *Shi'ism*, is substantively distinct.

### [C] Bakhtiar Translation

The 2009 edition of *The Sublime Quran — English Translation* is the first English language translation in history to eschew the verb "to beat" and instead use the verb "to go away from" (them), or synonymously, "to leave" (them). Translated by Dr. Bakhtiar, *surah* 4, *ayah* 34 reads:

Men are *supporters* of wives, because God has given some of them an advantage over others and because they spent of their wealth. So the ones in accord with morality are the ones who are morally obligated and the ones who guard the unseen of what God has kept safe. And those whose *resistance* you fear, then admonish them and abandon them in their sleeping places and *go away* from them. Then if they obey you, then look not for any way against them. Truly God has been *Lofty, Great*.<sup>31</sup>

<sup>29</sup> THE HOLY QUR'AN, *supra*, fn. 34b to 4:34 at 206. (emphasis added).

The translator is less certain about what it is women are "guarding." He writes:

The meaning is that their guarding the husband's rights is really a favour from Allāh as it is Allāh that guards them. Or the meaning may be, Allāh has guarded their rights.

*Id.*, fn. 34d to 4:34 at 206.

<sup>31</sup> THE SUBLIME QURAN — ENGLISH TRANSLATION, REVISED EDITION (www.sublimequran.org; Laleh Bakhtiar, trans., 6th ed., 2009) 4:34 at 94 (emphasis added). [Hereinafter, *SUBLIME QURAN*.]

<sup>29</sup> THE HOLY QUR'AN, *supra*, fn. 34e to 4:34 at 206 (emphasis original). The abbreviations of the sources, such as "AH," are explained by the translator at *id.*, 1-21-23, taken therefrom, and inserted in square brackets above.

This translation is the first by an American Muslim woman, but is explicitly not designed as a feminist translation.<sup>32</sup> To the contrary, she uses the method of formal equivalence.

As for the translator herself, Laleh Bakhtiar, holds a doctorate in Educational Psychology, has had many years of tutoring in Classical Qur'anic Arabic grammar, and has translated over 25 books.<sup>33</sup> Her father, a spiritual but not religious person, and a physician, lived in Iran. Dr. Bakhtiar was raised by a single American Christian mother, went to Catholic school, and desired at age 8 to become Catholic (to which her mother did not object). But, at age 24 she traveled to Iran with her former husband and children. She took classes at Tehran University, including in Classical Arabic, which led her to translate the Qur'an, and convert to Shī'ite Islam.

An initial and remarkable feature of this translation is the articulation of the relationship of husbands to wives — husbands "support" their wives. They do not "maintain," nor are they "in charge of," them. Moreover, Dr. Bakhtiar does not say "disobedience" by a wife is the trigger event authorizing a husband to sanction his wife. Rather, it is "resistance" by the wife. Dr. Bakhtiar explains why:

What jurists claim is that the "beating" is only given to a wife whose "*nushūz*" the husband fears. The jurists explain "*nushūz*" as "disobedience." As a matter of fact, "*nushūz*" does not mean "[dis]obedience, as that is a completely different word in the Quran, derivatively, *atā'a*. Using resistance for "*nushūz*," we see while in 4:34 the Quran says: "husbands who fear "resistance" (*nushūz*) on the part of their wives," in 4:128 the Quran says: "wives who fear "resistance" (*nushūz*) on the part of their husbands." In truly a fair and just fashion as the Quran always is, however we translate the word in regard to a wife must be translated and interpreted the same for a husband. If "*nushūz*" is interpreted as meaning "disobedient," then it must apply in both cases, a disobedient wife and/or a disobedient husband.<sup>34</sup>

In other words, previous translations of *surah* 4, *ayah* 34 and *surah* 4, *ayah* 128 are inconsistent. They translate the same Arabic verb ("*nushūz*"), which is used in both passages, to mean "disobedience" in 4:34, but not in 4:128 — despite the fact "disobedience" is an entirely separate word (stemming from "*atā'a*"). There is no evidence God (Allāh) intended for a different meaning for wives versus husbands. To the contrary, the spouses are to treat each other equally. The way in which to provide a consistent rendition of both passages, and thereby effect this equality, is to translate the term ("*nushūz*") as "resistance."

#### [D] Five Arguments in Defense of Bakhtiar Translation

What reasons exist to support the translation by Dr. Bakhtiar of *surah* 4, *ayah* 34, of the Qur'an? Asked differently, how might her interpretation be defended as preferable to the conventional translations? Dr. Bakhtiar answers the question

<sup>32</sup> See *SUBLIME QURAN*, *supra*, Preface at xiv.

<sup>33</sup> See *SUBLIME QURAN*, *supra*, Preface at ix-x, xv-xvi.

<sup>34</sup> See *SUBLIME QURAN*, *supra*, Preface at xxix.

herself. She explains her translation of this highly controversial passage as follows:

Just as I found a lack of internal consistency in previous English translations, I also found that little attention had been given to the woman's point of view. While the absence of a woman's point of view in *Quranic translation and commentary* for almost 1,500 years since the revelation began clearly needs to change, it must be acknowledged that there are many men who have been supportive of the view of women as complements to themselves, as the completion of their human unity. To them, I and other Muslim women are eternally grateful. They relate to women as the Quran and *Hadith* intended. The criticism women have is towards those men and women who are not open to this understanding, who are exclusive in opposition to the Quran and *Sunnah's* inclusiveness. Clearly the intention of the Quran is to see man and woman as complements of one another, not as superior — inferior.

Consequently, in the introduction and translation, I address a main criticism of Islam made in regard to a human rights issue, namely, that a husband can beat his wife (4:34) after two stages of trying to discipline her.<sup>35</sup>

As Dr. Bakhtiar indicates in the above-quoted passage, she offers an extended, detailed defense of her rendition of *ayah* 34 in the Introduction to *The Sublime Quran*. This defense proceeds in five key steps.

First, Dr. Bakhtiar offers a careful analysis of the Arabic verb "*idrib*," which she points out has multiple meanings:

The root letters *ḍ r b* [i.e., as in "*idrib*"] mean to propound or to strike (a parable), to smite, stamp (or stomp one's foot), beat or strike; or to cite (an example or a dispute). Other meanings without any special preposition include: To encompass; to cast, throw, or fling upon the ground; to set a barrier; to engender; to turn about; to make a sign or to point with the hand; to prohibit, prevent, or hinder from doing a thing one has begun; to seek glory; to avoid or shun or leave; to turn away oneself; to be with shame; to be in a state of commotion; to be in a state between hope and fear; and to go away.<sup>36</sup>

Thus, from a lexicographic standpoint, it is perfectly reasonable to translate the relevant Arabic verb into English not as "to beat," but as "to go away." The question then becomes why such a choice should be made — why is the latter meaning better than the former meaning? The answer lies in the second and third arguments Dr. Bakhtiar makes.

Second, Dr. Bakhtiar resorts to the *Sunnah*, highlighting the fact Muhammad did not "beat" his wives:

For the Muslim, the Prophet is the living Quran; that is, he practiced exactly whatever God revealed in the Quran. If it was a command to good:

<sup>35</sup> *SUBLIME QURAN*, *supra*, Preface at xiv-xv (emphasis added).

<sup>36</sup> *SUBLIME QURAN*, *supra*, Introduction at xxi (emphasis added).

Fasting, daily formal prayers, pilgrimage, alms, charity, he performed these commands. If it was to prevent a wrong like drinking alcohol, gambling, or eating pork, he refrained from these things. As the living Quran, the life, behavior, and sayings of the Prophet serve as a model for all Muslims.

As the Quran refers to the Prophet as a mercy to humanity and the model whose example should be followed, it is clear that he would have carried out any and all of the commands (imperative forms of the verb) in the Quran that related to his life . . . yet we find an exception in *q r b* [i.e., as in "*idrib*"] according to the interpreters over the centuries.

. . . [I]n all of the canonical works there is no reference to [the] Prophet Muhammad . . . having ever beaten women. It is the misinterpretation of the word "*idrib*" in 4:34 that this translation challenges and emphasizes that this misinterpretation must *revert back to the way the Prophet understood it through his behavior* when facing the exact same situation. Therefore, it is *not a personal interpretation, but one that calls for a return to the Sunnah*.

. . . [A]nyone who claims to follow the *Sunnah* of the Prophet must do the same thing because the *Sunnah* of the Prophet is *not* to beat, hit, hurt, spank, or chastise any woman. The word "*idrib*" is a command, an imperative form of the verb, yet a command the Prophet did *not* carry out if it means "*beat them*." However, he *did* carry it out when it means "*go away from them*."<sup>37</sup>

Why did Muhammad not "beat" his wives? Dr. Bakhtiar offers the following reasons:

Based on his character, a model for all of humanity, he [the Prophet] knew innately that it was wrong to harm another human being. He knew that according to 16:126, one is commanded to chastise with the same chastisement that that person has been given. [Surah 16, *ayah* 126, is a rule of proportionality in self-defense, instructing a person that if he or she has to respond to an attack, then the response should be calibrated equivalently to the attack.] . . .

Therefore, conceivably, if a husband harms his wife by beating her, according to 16:126, his wife would be allowed to chastise her husband in return. The Prophet would have intuitively known that if husband were to beat his wife, she would have recourse to [i.e., against] her husband. He clearly believed that it was not within his *Sunnah* to do such a thing. Therefore, he showed by his behavior that 4:34, and the use of the word "*daraba*," means "go away from them" or "leave them" and let the emotions subside.

. . . [T]he Prophet's respect for the female gender was legendary. This included not only his wives, the mothers of the believers, but his daughters as well. He had a very special relationship with his daughter, Fatima, the only one of his daughters to survive him. How could he beat his wives and not consider that someone might beat one of his beloved daughters?

. . . [T]he Prophet knew that marriage was based on mutual respect and love. The Quran often tells husbands and wives to consult on issues with each other. It would be unfair and unjust to think that God would have revealed a verse that allowed husbands to beat their wives instead of separating for a short period of time and allowing the anger to subside. Then they would be able to once again consult with one another.<sup>38</sup>

In sum, Dr. Bakhtiar offers three reasons Muhammad did not "beat" his wives: (1) the possibility of a cycle of violence, legitimized by *surah* 16, *ayah* 126; (2) his respect for women in general, and his daughter, Fātimah, in particular, whom he did not want to see beaten by her husband; and (3) his view that marriage is based on mutual love and respect, which flourishes with consultation, not violence.

Remarkably, in making this argument, Dr. Bakhtiar applies individual reasoning at two levels. She herself uses *ijtihad* to develop the three-pronged argument. Further, she imputes to Muhammad the use of individual reasoning in his own deliberation about what God (Allāh) truly meant in revealing *surah* 4, *ayah* 34 and using the verb "*daraba*."

The third argument of Dr. Bakhtiar is closely related to the second one. In the style of an empiricist, she calls for verification. She not only relies on independent reasoning (*ijtihad*), but also on a specific type of such reasoning — verification:

The misinterpretation is not in the Arabic of the Quran, the eternal Word of God revealed to [the] Prophet Muhammad . . . , but it is how commentators over the centuries have interpreted the Word of God that is at issue and whether *ijtihad*, or strenuous endeavor to reason an issue, has to be applied, or *tahqiq* [literally, verification] as I prefer, reviving the intellectual tradition of Islam, the proponent being a *muhqiq* [someone who sees an issue or thing as it is, without obfuscation, i.e., one who sees the matter clearly] — to know by verifying and realizing The Truth and Reality of something for oneself.

. . . [T]he understanding of this verse [4:34] must revert back to the interpretation given it by the Prophet Muhammad . . . through his actions. He never beat anyone, much less any of his wives. When there was any marital discord, he went away.<sup>39</sup>

The verification, or empirical analysis, Dr. Bakhtiar conducts relates to the *Sunnah*. She asks what Muhammad himself did — did he beat his wives? The answer is "no," which she explains in her second argument. As he did not do so, then the correct

<sup>37</sup> *SUBLIME QURAN, supra*, Introduction at xxi, xxiv, xxvi (emphasis added).

<sup>38</sup> *SUBLIME QURAN, supra*, Introduction at xxvi.

<sup>39</sup> *SUBLIME QURAN, supra*, Introduction at xxiv-xxv (emphasis added).

translation of the Arabic verb is "verified" by his behavior.

Fourth, Dr. Bakhtiar shows how translating the Arabic verb "*idrib*" creates a contradiction in the Qur'an that does not otherwise exist:

One can only understand the sublimity of the Quran if one begins with some standard that establishes a system based in justice and fairness in order to be able to enter the world of the spiritual and intuition. One has to begin with some criterion, that is another of the names the Quran gives itself, *al-furqan* or The Criterion: The discernment between right and wrong, good and evil, lawful and unlawful, truth and falsehood. The Quran, as The Criterion, is the standard by which to determine the correctness of a judgment or conclusion. It is the measure, the reference point against which other things may be evaluated.

*The most conclusive arguments in Islamic tradition to prove or disprove something is [sic] to use the Quran to prove another point in the Quran. This method is called tafsir al-qur'an bi-l-qur'an. This I will do. I will show how the present erroneous interpretation of 4:34 and the verb idrib creates a contradiction not [found] in the Quran itself and denies, at least in two cases, rights that the Quran clearly gives to women.<sup>40</sup>*

What precisely are the two contradictions?

Dr. Bakhtiar argues the first contradiction is between *surah* 4, *ayah* 34, if the verb *idrib* is translated as "to beat," and *surah* 2, *ayah* 231. The latter passage (as translated by Professor Abdel Haleem) states:

When you divorce women and they have reached their set time, then either keep or release them in a fair manner. *Do not hold on to them with intent to harm them and commit aggression*: anyone who does this wrongs himself. . . .<sup>41</sup>

In other words, the Qur'an tells husbands not to harm their wives who want to be set free, not to hold them back by injuring them. The word "injuring" (*dirar*) also means hurt, harm, use force, or commit aggression. Dr. Bakhtiar offers the not-so-hypothetical example of a Muslim wife who tries in vain to help her husband manage his inappropriate anger. After repeatedly enduring physical abuse at his hands, she informs him of her wish for a divorce. Enraged, he fails to remember the rule of *surah* 2, *ayah* 231, namely, that he must hold back and not injure his wife. Instead, he beats her, under the erroneous impression that beating is condoned by *surah* 4, *ayah* 34. Dr. Bakhtiar writes:

. . . We begin with two premises: Islam encourages marriage, and divorce, while allowed, is discouraged. The Prophet said: Marriage is half of faith. He also said: Divorce is deplorable.

. . .

. . . [W]e see a disconnect between 4:34 and 2:231. *Jurists have created a contradiction that is not in the Quran by encouraging divorce and discouraging marriage* so that we can conclude a Muslim woman who wants a divorce must be set free without injuring, hurting, or using force against her, but a Muslim woman who wants to remain married does so under the threat of being beaten! If Muslim wives knew their rights, which one would want to stay married under such circumstances? Is this encouraging marriage? Does this make sense? 4:34 as presently interpreted contradicts 2:231. How can we eliminate the contradiction? There is a very simple solution: Revert the interpretation back to how the blessed Prophet understood it though his behavior.<sup>42</sup>

Put differently, to translate the relevant Arabic verb as "to beat" creates a perverse incentive scheme in a marriage.

Translating the key word in *ayah* 34 as "beat" is incongruous with the support Islam seeks to give to marriage. This translation encourages divorce. That is because to stay married, and avoid divorce, and thereby comport with a basic precept of the *Shari'a*, a woman must subject herself to actual or threatened beatings — hardly what she would prefer to do. Moreover, should a woman seek divorce, then she is clearly not to be beaten, as per *surah* 2, *ayah* 231. That is her right, conferred by this passage, namely, not to be beaten. As Dr. Bakhtiar puts it:

. . . [A] wife who agrees that her husband divorce her cannot hold her back by injuring her. This protects a wife who wants to be set free. This is a right she is given in the Quran — not to be injured!<sup>43</sup>

Yet, interpreting "*idrib*" as "beat" undermines this right.

Obviously, the regime ought to be the other way round. A woman stays married in part because her husband does not beat her, but becomes interested in a divorce only if he does. That is what Islam intends: it seeks to encourage marriage, which is a moral state, and discourage divorce, which is immoral. To discourage morality, and encourage immorality, is hypocrisy — a point made in *surah* 9, *ayah* 67.<sup>44</sup> The only way to manifest the correct intention (encouraging the moral state, marriage) is to interpret 4:34 as counseling the husband to "go away," and appreciate that 2:231 obligates him to behave in a non-violent manner. In sum, there is to be no beating in any instance.

The second contradiction created by interpreting "*idrib*" as meaning "beat" is between *surah* 4, *ayah* 34, on the one hand, and *surah* 24, *ayah* 6-9, on the other hand. The latter passage concerns false accusation of unlawful sexual intercourse (*kadhif*). Suppose a husband accuses his wife of adultery. There are no other witnesses, other than the husband. *Surah* 24, *ayah* 6-9 protects the wife by allowing her to defend herself against the accusation. Her protection is with God (Allāh). Because there are no other witnesses, the husband must call Allāh to witness that he (the husband) is telling the truth, and he must do so on four occasions. Then, on

<sup>40</sup> *SUBLIME QURAN, supra*, Introduction at xc-xxi (emphasis added).

<sup>41</sup> *QUR'AN, supra*, 2:231 at 26 (emphasis added).

<sup>42</sup> *SUBLIME QURAN, supra*, Introduction at xxvii-xxviii (emphasis added).

<sup>43</sup> *SUBLIME QURAN, supra*, Introduction at xxix-xxx.

<sup>44</sup> See *SUBLIME QURAN, supra*, Introduction at xxx.

a fifth occasion, the husband must ask Allāh to reject him (the husband) if he is lying (*i.e.*, falsely accusing his wife). The wife has the right to call Allāh to her side, that is, to witness that her husband is lying. She must make this call on four separate occasions. Then, on a fifth occasion, the wife must ask Allāh to reject her if her husband indeed is telling the truth.

If *surah* 4, *ayah* 34 authorizes a husband to "beat" his wife, then her protection against a false accusation of adultery eviscerates. Why? Because the wife is not free to call Allāh on five occasions, but instead endures physically abusive treatment. That is, amidst one or more beatings, the wife hardly is in a sound physical or psychological position to have the discourse with Allāh to which the Qur'ān says she is entitled.

The fifth argument Dr. Bakhtiar offers is more of a rebuttal to critics. It concerns a point of grammar, namely, the distinction between a transitive and intransitive verb:

We are told by jurists that the word "beat" in this verse (4:34) is a transitive verb. That means it can only take a direct object. As this verb is transitive, it can only mean "beat them." If it means "to go away from them," the verb becomes intransitive, taking an indirect object ("from them"). There are two arguments against this rationalization of an immoral act.

First of all, we have to ask: When this verb was revealed to the blessed Prophet and he heard the word *idrib*, that jurists and commentators have said for almost 1,500 years means "beat them," *did he sit back and discuss within himself whether the verb that God was revealing was a transitive or intransitive one? No! By his behavior, we know that he understood it to mean "go away from them."* Otherwise, we would have to conclude, God forbid, that the Prophet did not understand the Quran as well as the later legal jurists did, those who make this distinction.

Secondly, we are talking about translation, not about the original Arabic which is the eternal Word of God. *When you translate from an original text into a target language, you have to go with the rules of the target language. There are many times when an English word requires an indirect object, whereas the Arabic word does not. Do you then distort the meaning? No. You go with the target language.* We could say in English, "leave them," and we would be following the grammar of the jurists, but perhaps implying more than what the Prophet understood.<sup>45</sup>

In sum, Dr. Bakhtiar maintains *surah* 4, *ayah* 34 has been interpreted erroneously to deny rights to women that the Qur'ān clearly gives them, and wrongly translated as "beat."

Manifestly, the thoughtful translation by Dr. Bakhtiar is a refreshing departure from the conventional wisdom. Her version does not list any form of physical action against a wife by a husband as justified. The ultimate sanction is for the husband "to go away." Even her translation is in agreement with the others as to admonishing

a wife or neglecting her in the bedroom. Yet, all other renditions countenance "hitting" — the verb used by Professor Abdel Haleem — or even worse, triggered by her disobedience and the ineffectualness of the lesser two sanctions, admonition and ostracism.

### [E] Is Translation Irrelevant?

Much of the preceding discussion implies that translation is important. How a verb from Arabic is translated into English matters. Is this implication specious? Might the real problem be not one of translation, but rather of interpretation? Evidently, what Dr. Laleh Bakhtiar does in *The Sublime Quran* is something more than "translate." She "interprets" what the permissible sanctions are for a husband against his wife. She does so in light of what American lawyers would call the "totality of the circumstances." She examines the Qur'ān in its entirety, and meditates on the intention and spirit that resonate through its passages. It is her understanding that violence by a husband against his wife is not consonant with the teachings of God (Allāh), the practice (*Sunnah*) of Muhammad, or the principles of translation. More generally, she might well say, how could there be such an overwhelming emphasis on mercy and forgiveness, on the one hand, and yet permission for violence in the home, on the other hand?

The point, then, is to consider whether translation really matters. Unless the translator is like Dr. Bakhtiar — willing to interpret and apply personal or independent reasoning (*ijtihad*) — the results are more or less the same. But, of course, the concern is how far beyond the original Arabic text it is fair to stray, in the name of a proper interpretation? There is a spectrum, or continuum, with strict literalism at the one end, and flexible liberalism at the other end. Perhaps there is no "right" point on the spectrum. Rather, different translations are welcome, and it is for the individual Muslim to choose. Such an approach is akin to what exists with respect to Bibles in the Christian world.

In a depressingly practical sense, translation is or ought to be irrelevant for another reason. Any amount of physical contact, including a "tap," may be a potentially threatening situation for a wife. A wife whose wrist has been tapped may know that what follows is a slap across the face, then a blow to the head, and then an outright beating. Sadly and inexcusably, that slippery slope is one that women are pushed down by their husbands every day, around the Muslim and non-Muslim world alike. From anecdotal stories to battered wives shelters, the evidence is ample. What appears to be unique about the Muslim world is that the preeminent source of Islamic Family Law, the Qur'ān, is read (or mis-read) by some men to justify their push.

By no means is every Muslim husband inclined to behave thusly. To suggest as much would be a grave injustice to the vast majority of gentle, loving husbands — as it would be to husbands of like demeanor in non-Muslim communities. But, as an example of the need for *ijtihad* to re-interpret the Qur'ān, surely this topic is "Exhibit A."

<sup>45</sup> *SUBLIME QURAN, supra*, Introduction at xxviii-xxix (footnote omitted, emphasis added).

Not surprisingly, then, Dr. Bakhtiar links interpretation with *jihād al-akbar*, that is, the greater struggle.<sup>46</sup> She argues that reason must overcome the heart, and moral healing must occur. The indicia of moral healing are: (1) seeking justice for others, (2) exercising humility, (3) acknowledging one's own vulnerabilities, and (4) displaying mercy, compassion, self-sacrifice, and forgiveness. When moral healing occurs, "reason succeeds in attracting the heart to itself."<sup>47</sup> Then, the self turns away from the fleeting material world to the permanent spiritual world. In brief, self-control gains mastery over anger and lust — which, means there is no inclination toward wife-beating. This struggle also reinforces the values for which the model person, the Prophet Muhammad, stood.

### § 35.05 BIBLICAL CONTRAST

It is worth commenting that there is a passage in Chapter 5 of the *Letter of Saint Paul to the Ephesians* which, like *surah* 4, *ayah* 34 of the Qur'ān, has received considerable scrutiny. This passage, addressing wives and husbands, states:

<sup>21</sup>Be subordinate to one another out of reverence for Christ. <sup>22</sup>Wives should be subordinate to their husbands as to the Lord. <sup>23</sup>For the husband is head of his wife just as Christ is head of the church, he himself the savior of the body. <sup>24</sup>As the church is subordinate to Christ, so wives should be subordinate to their husbands in everything. <sup>25</sup>Husbands, love your wives, even as Christ loved the church and handed himself over for her <sup>26</sup>to sanctify her, cleansing her by the bath of water with the word, <sup>27</sup>that he might present to himself the church in splendor, without spot or wrinkle or any such thing, that she might be holy and without blemish. <sup>28</sup>So [also] husbands should love their wives as their own bodies. He who loves his wife loves himself. <sup>29</sup>For no one hates his own flesh but rather nourishes and cherishes it, even as Christ does the church, <sup>30</sup>because we are members of his body.<sup>48</sup>

Controversy has centered in large part around the verb "subordinate."

Verses 22 and 23 could be misunderstood to suggest women are inferior to men. They are not. Catholic Christian teaching is that while women and men are inherently different as part of the way in which they are created by God, and thus play distinct roles and make singular contributions, women are by no means inferior. This teaching arises in part because verses 22-23 are interpreted in their textual context. Verse 21 is an imperative to both husbands and wives for mutual subordination to each other and to God. This mutuality undermines any claim of

exclusive domination by one party over another, and emphasizes that each is subordinate to one another under Christ.<sup>49</sup> Verses 25-26 command husbands to "love" their wives, and "sanctify" them. Verses 28-29 explain that husbands should "love" their wives as they love themselves, meaning they should nourish and cherish them.

Throughout, there is a parallel between Christ as head of the Church, who sacrificed himself on the Cross, and husbands, who as head of their households, should behave in a self-sacrificing manner. Verse 30 stresses the unity of the household and Church in relation to the mystical body of Christ. Marriage is analogous to the relationship between Christ and the Church; wives should serve their husbands the way the Church serves Christ, and husbands should care for their wives with the devotion of Christ to the Church.<sup>50</sup>

Indeed, "Ephesians is the great Pauline letter about the church."<sup>51</sup> The letter indicates that unlike "ordinary Greco-Roman society [in which] the lines of authority and of subservience were clearly drawn," and husbands had great power over wives (as did parents over children and masters over slaves), Christians are to live in a manner worthy of the call from God they have received, namely, to bear with one another through love.<sup>52</sup> That is, "[t]he ordinary hierarchical system that obtains in the world is superseded by a new way of relating to one another in Christ."<sup>53</sup>

Manifestly, then, Chapter 5, verses 21-30 of Saint Paul's *Letter to the Ephesians*, and *surah* 4, *ayah* 34 of the Qur'ān, are not analogous. Nothing in the *Letter* comes remotely near condoning any kind of physical violence — not even a mere tapping — of a wife by her husband. The verb "subordinate" is not interpreted expansively to include corporal measures. Rather, it is interpreted contextually, which requires an appreciation for the deep analogy drawn between a household and the church. In all events, "beating" a wife would be utterly incompatible with the passage.

## Chapter 36

### WOMEN AND CLOTHES

---

- Look for the woman in the dress. If there is no woman, there is no dress.
- Elegance is refusal.
- Fashion fades. Only style remains the same.

Gabrielle Bonheur (Coco) Chanel (1883-1971), French Fashion Designer, and only *Couturier* to be named on *Time Magazine's* list of 100 Most Important People of the 20th Century

#### SYNOPSIS

#### § 36.01 OBAMA VERSUS SARKOZY ON WHAT MUSLIM WOMEN SHOULD WEAR

- [A] Distinct Positions
- [B] French *Burkha* Ban
- [C] Religious Symbols and Secularism

#### § 36.02 FIVE REQUIREMENTS FOR BOTH GENDERS

#### § 36.03 SPECIAL REQUIREMENTS FOR WOMEN

- [A] Applicability
- [B] Meaning of “*Awrah*”
- [C] *Hijāb* (Veil) and “Descent of the *Hijāb*” in *Surah* 33, *Ayah* 53

#### § 36.04 FIVE PRACTICAL DRESS REQUIREMENTS SPECIFIC TO WOMEN

#### § 36.05 DIFFERENCES AMONG FOUR SCHOOLS ON ‘AWRAH (PRIVATE PARTS), *HIJĀB* (VEIL), AND *NIQĀB* (FULL-FACE VEIL)

- [A] *Hanafi* and *Māliki* Schools
- [B] *Hanbali* School
- [C] *Shāfi‘i* School

## § 36.01 OBAMA VERSUS SARKOZY ON WHAT MUSLIM WOMEN SHOULD WEAR

### [A] Distinct Positions

Aside from terrorist atrocities committed in the name of "Islam," no topic relating to Islamic Law attracts more attention, and provokes more heated debate, in the Muslim and non-Muslim world alike, than the clothes Muslim women wear. There is no better example of the attention this topic attracts than that given it by the White House and Élysée Palace. In an extraordinary speech delivered in early June 2009 at Cairo University, American President Barack H. Obama stated:

[I]t is important for Western countries to avoid impeding Muslim citizens from practicing religion as they see fit — for instance, by dictating what clothes a Muslim woman should wear. We can't disguise hostility towards any religion behind the pretence of liberalism.

... I reject the view of some in the West that a woman who chooses to cover her hair is somehow less equal, but I do believe that a woman who is denied an education is denied equality. (Applause.) And it is no coincidence that countries where women are well educated are far more likely to be prosperous.<sup>1</sup>

Speaking to a largely Islamic audience, President Obama hardly was likely to tell Muslim women what they should wear. He took what might be encapsulated as a classic American approach: he identified the underlying issue as one of freedom of choice, and argued Muslim women ought to have that freedom, not only as to apparel, but also in all other matters, including schooling and careers. He also reflected classic American optimism: if only Muslim women could obtain a good education, they would be free.

Three weeks later, French President Nicolas Sarkozy took a different line. Speaking on his territory, before the French legislature gathered at the Palace of Versailles, he said:

We must not fight the wrong battle. In the [French] Republic, the Muslim religion must be respected as much as other religions.

The problem of the *burkha* [which covers a woman from head to toe, including her face] is not a religious problem. It is a problem of liberty of women, it is a problem of dignity of women. The *burka*, it is not a religious symbol, it is a sign of subservience and debasement. I want to say solemnly, it [the *burkha*] will not be welcome on the territory of the French Republic. We cannot accept in our country women who are prisoners behind netting, cut off from all social life, deprived of identity. That is not the idea that the French Republic has of women's dignity.

<sup>1</sup> President Barack H. Obama, *On A New Beginning*, Speech at Cairo University, Cairo, Egypt, 4 June 2009.

But I tell you, we must not be ashamed of our values. We must not be afraid of defending them.<sup>2</sup>

President Sarkozy was more than happy to tell Muslim women what they should not wear — and that is a *burkha*, meaning a veil that covers all of their faces, including their eyes.

France has roughly 5 million Muslims, the largest such population in Western Europe. But, the French Interior Ministry reports approximately 2,000 Muslim women don a full-face veil. Far more common is the *niqāb*, which leaves a slit open for the eyes.<sup>3</sup>

Invoking the image of French soil, President Sarkozy spoke to the hearts of the French, conjuring up the core values of the French Republic: liberty, equality, and fraternity. To be French is to be equal and free with others. Educational and employment opportunities matter. But, clothes are a, if not the, starting point: a woman manifests her equality and dignity by what she wears. When a Muslim woman covers her face, and her entire body, in a *burkha*, she is neither free nor equal, her dignity is debased.

Not surprisingly, 70 percent of French voters support a total ban on the *burkha*.<sup>4</sup> As the Table 36-1 shows, the French are not out of step with the rest of Western Europe. Moreover, the French and their counterparts in other countries singled out the *burkha* for banning, as support for a general prohibition on wearing religious icons in public (such as a Christian Cross or Crucifix, Jewish yarmulke, or Sikh turban) is low. Is this dichotomy evidence of anti-Muslim sentiment? Or, is it based on a genuine distinction between the *burkha*, because it covers the full face (not to mention the rest of the body), and all other religious symbols, none of which involves complete coverage.

<sup>2</sup> Nicolas Sarkozy, President of France, State of the Nation Speech to Both Houses of Parliament, Château de Versailles, France, 22 June 2009 (downloaded and translated from the website of the French Presidency, Élysée Palace, [www.elysee.fr](http://www.elysee.fr), and as quoted in *Sarkozy Speaks Out Against Burkha*, BBC NEWS, 22 June 2009, posted at [bbc.co.uk](http://bbc.co.uk), and Angelique Chrisafis, *Nicolas Sarkozy Says Islamic Veils Are Not Welcome in France*, THE GUARDIAN (England), 22 June 2009, posted at [guardian.co.uk](http://guardian.co.uk)).

Percentage of Voters Supporting *Burkha* Ban  
Versus  
General Ban on Any Religious Icon  
(*Financial Times* Poll, February 2010,  
ranked from high to low on *Burkha* Ban<sup>5</sup>)

Country	Percentage of Voters Favoring a Complete Ban on the Public Wearing of a <i>Burkha</i>	Percentage of Voters Favoring a General Ban on the Public Wearing of Any Religious Icon
France	70 percent	22 percent
Spain	65	19 (approximate)
Italy	63	20 (approximate)
United Kingdom	57	9
Germany	50	10 (approximate)
United States	33	2 (approximate)
China	27 (approximate)	9 (approximate)

### [B] French *Burkha* Ban

The French National Assembly agreed with President Sarkozy. In January 2010, a Parliamentary committee issued a 200-page report proposing a ban on the *burkha* in all government offices, courts, hospitals, schools, and on public transport. The report further recommended that French residence cards and citizenship should be denied to any person demonstrating a visible sign of "radical religious practice."<sup>6</sup> The central rationale of the report was the *burkha* posed an unacceptable challenge to the French Republican principles of equality and secularism and must be condemned as such. Moreover, the ban was needed for security purposes. In presenting the report, the Speaker of the French National Assembly, Bernard Accoyer, said:

It [the *burkha*] is the symbol of the repression of women, and . . . of extremist fundamentalism. This divisive approach is a denial of the equality between men and women and a rejection of co-existence side-by-side, without which our Republic is nothing.<sup>7</sup>

Following issuance of the report, the Assembly began drafting and debating legislation to implement a *burkha* ban in all public spaces. The ban intentionally aimed to make it impossible for a woman to go about her daily business while in a full-face veil. In the draft bill, the sanction contemplated for violating the ban was denial of the otherwise available public services on offer, such as state benefits or a ride on the train. The State Council (which must issue a legal opinion before enactment of any major legislation) indicated that a general, absolute *burkha* ban

<sup>5</sup> See Blitz, *supra*. The figures marked "(approximate)" are based on a reading of the histogram published in the *Financial Times*.

<sup>6</sup> *France MPs' Report Backs Muslim Face Veil Ban*, BBC NEWS, 26 January 2010, posted at <http://news.bbc.co.uk>. [Hereinafter, *France MPs' Report*.]

<sup>7</sup> Quoted in *France MPs' Report*, *supra*.

might violate both the French Constitution and European Convention for the Protection of Human Rights and Fundamental Freedoms, but a ban limited to public spaces could pass muster.<sup>8</sup>

In May 2010, the 557-seat French National Assembly approved legislation by a vote of 335-1 banning the *burkha*, with many opposition Socialist Party members, who opposed the bill as xenophobic, agreeing to abstain after lobbying from feminist groups that supported the bill. The Minister of Justice, Michele Alliot-Marie, declared the vote a victory for French values, namely:

Values of freedom against all the oppressions which try to humiliate individuals; values of equality between men and women, against those who push for inequality and injustice.<sup>9</sup>

In September, the Senate, the other chamber of the French legislature, approved the ban nearly unanimously. Writing in *The New York Times*, Jean-François Copé, the Majority Leader of the Assembly and Mayor of Meaux, defended the legislation:

How can you establish a relationship with a person who, by hiding a smile or a glance — those universal signs of our common humanity — refuses to exist in the eyes of others?

. . . in both France and the United States, we recognize that individual liberties cannot exist without individual responsibilities. This acknowledgment is the basis of all our political rights. We are free as long as we are responsible individuals who can be held accountable for our actions before our peers. But the niqab and burqa represent a refusal to exist as a person in the eyes of others. The person who wears one is no longer identifiable; she is a shadow among others, lacking individuality, avoiding responsibility.

From this standpoint, banning the veil in the street is aimed at no particular religion and stigmatizes no particular community. Indeed, French Muslim leaders have noted that the Koran does not instruct women to cover their faces, while in Tunisia and Turkey, it is forbidden in public buildings; it is even prohibited during the pilgrimage to Mecca. Muslims are the first to suffer from the confusions engendered by this practice, which is a blow against the dignity of women.<sup>10</sup>

His point, said *The Washington Post*, was that "full participation in French culture requires face-to-face interaction."<sup>11</sup>

In October 2010, the Constitutional Council of France approved the legislation, amending it only to state the ban would not apply in a place of worship, so as to

<sup>9</sup> Quoted in *French MPs Vote to Ban Islamic Full Veil in Public*, BBC NEWS, 13 July 2010, posted at <http://news.bbc.co.uk>.

<sup>10</sup> Jean-François Copé, *Tearing Away the Veil*, THE NEW YORK TIMES, 4 May 2010, posted at [www.nytimes.com/2010/05/05/opinion/05scope.html](http://www.nytimes.com/2010/05/05/opinion/05scope.html).

<sup>11</sup> Robin Givhan, *The Burqa in France: Removing the Veil Without Facing Society's Shortcomings*, WASHINGTON POST, 3 October 2010, posted at [www.washingtonpost.com/wp-dyn/content/article/2010/09/30/AR2010093007367.html](http://www.washingtonpost.com/wp-dyn/content/article/2010/09/30/AR2010093007367.html).

comport with freedom of worship guaranteed by the French Constitution. Consequently, the legislation took effect in spring 2011. The legislation imposes two kinds of punishment:

- (1) A fine of 150 euros (approximately U.S. \$190) and/or a citizenship course for a woman who wears a *burkha* in public; and
- (2) A 1 year in prison or a fine of approximately 15,000 euros (about \$19,000) for anyone (e.g., a man) who compels a woman to do so.

Significantly, the sanctions apply to a *niqāb* and to minors, meaning that it is an offense for anyone to force a woman or child to wear either it or a *burkha*. And, both sanctions apply to tourists, as well as French residents. Police began enforcing the new law the day it took effect (on 11 April 2011), issuing a ticket to a 27-year old woman in a shopping center in Paris, thus requiring her to pay a fine or take citizenship classes.<sup>12</sup>

France may well have triggered a movement. In April 2010, the lower house of the Belgian Parliament approved a ban on any clothing that obscures the identity of the wearer, including face coverings, from all public places, with exceptions for certain festivals.<sup>13</sup> (Out of roughly 500,000 Muslims in Belgium, only about 30 women wear a full face veil.) Violators would be subject to a fine of 15–25 euros, or a 7-day jail sentence. In October 2010, the Dutch government (compelled in part by minority coalition politics) agreed to a *burkha* ban. Yet, Spain rejected such ban, as did the United Kingdom, with the British Minister of Immigration, Damian Green, declaring in July 2010 that it would be “un-British” because it would be inconsistent with the “tolerant and mutually respectful society” there.<sup>14</sup>

Significantly, some Muslim countries impose restrictions on veils. Turkey, of course, is the most renowned example. Headscarves are banned in public buildings. Syria, whose Baath Socialist government is wary of Islamist extremism, is a lesser known illustration.<sup>15</sup> In 1982 Hama, it crushed the Muslim Brotherhood, killing over 10,000 adherents. In July 2010, the Minister of Education, Ali Saad, said the *niqāb* undermines the “objective, secular methodology” in schools, and the head of the Syrian Women’s Observatory, Bassam Al Kadi, said it “is a Wahhabi way of influencing Syria and is a form of violence against women.” Accordingly, the Syrian Baath Socialist government transferred to other jobs the roughly 1,200 teachers who had been wearing the *niqāb*.

<sup>15</sup> See *Take It Off*, *The Economist*, 17 July 2010, at 53.

### [C] Religious Symbols and Secularism

Two queries are worth exploring: what defines a symbol as being “religious,” and what does “secularism” mean? First, President Sarkozy intones the *burkha* is not even a “religious” symbol. If that were literally true, then would the *burkha* be inconsistent with the French value of secularism? In other words, is there a conflict between arguing for a ban based on equality and arguing for a ban based on secularism?

Possibly, one reply is that no garment that renders a woman subservient, such as the *burkha*, could be justified as “religious.” A genuinely religious symbol would not do such a thing, so the problem it would pose would be not inequality but religiousness. Thus, arguably, the conflict between the two rationales is a false one: a symbol is incongruous with the value of equality or secularism, but not both. The problem with this reply involves delineation. If the dividing line between authentic and inauthentic symbols is the subservience of women, then what are the criteria for “subservience”? Does the requirement that Sikh men wear a turban and carry a dagger (even a small one) render women inferior? Further, how would a large, glittering cross of the type worn by some hip-hop musicians be viewed — a religious symbol, or an adornment to a gangster-type entertainment costume that conjures up images of abuse of women by men?

Second, in his speech, President Obama elides the topic as to what garments are legitimately “religious.” In doing so, President Obama manifests a characteristic common in modern-day America: moral relativism. In essence, he says “your clothes are your clothes, my clothes are my clothes, and they are all equally good. Focus on education.” President Sarkozy adopts a position of moral absolutism: “Not all garments and adornments are equal. Some clothes are better than others, and ones that demean women are worse than others.” At one level, the arguments of the two leaders are diametrically opposed. However, consider again the French Constitutional principle of secularism. On the one hand, secularism might be taken as an absolute value: no religious symbols are permitted in pursuit of separating the state and religion. If so, then the arguments of the French President are philosophically consistent. On the other hand, moral relativism might be viewed as a key feature of secularism: “secularism” judges all religions equal, and no one moral regime superior to another, and demands they be kept on the same level. If that is true, then the arguments of President Sarkozy might not be so consistent.

This fascinating debate has two negative side effects. First, it ignores an important point about Islam: there is moral, social, and legal significance to the dress — that is, the personal clothing attire — of both males and females. The debate focuses on women, but the *Shari’a* calls on men, too, to dress in an appropriate manner. Indeed, men and women are obliged to be modest in their dress, speech, and overall appearance. Second, the debate can create a misimpression, among Muslims and non-Muslims alike, that the test of fidelity to Islam is directly related to the conservativeness of dress. The specious view is that the more extensive the veil a woman wears, the more devout she must be; the more scantily clad a woman, the less devout of a Muslim she must be. The first side effect takes pressure off men. The second side effect exacerbates pressure on women.

### § 36.02 FIVE REQUIREMENTS FOR BOTH GENDERS

Both the "guide," which is the Qur'an, and the "guide to the guide," which is the *hadith*, offer assistance to Muslim men and women on appropriate clothing. There are four passages from the Qur'an that are critical:

- *Surah 24, ayah 30:*

<sup>30</sup>[Prophet], tell believing *men* to lower their gaze and guard their private parts: that is purer for them. God is well aware of everything they do.<sup>16</sup>

- *Surah 24, ayah 31:*

<sup>31</sup>And tell believing *women* that they should lower their gaze, guard their private parts, and not flaunt their charms beyond what [it is acceptable] to reveal; they should let their headscarves fall to cover their necklines and not reveal their charms except to their husbands, their fathers, their husbands' fathers, their sons, their husbands' sons, their brothers' sons, their sisters' sons, their womenfolk, their slaves, such men as attend them who have no sexual desire, or children who are not yet aware of women's nakedness; they should not stamp their feet so as to draw attention to any hidden charms. Believers, all of you, turn to God so that you may prosper.<sup>17</sup>

- *Surah 33, ayah 5:*

For *men and women* who are devoted to God — believing *men and women*, obedient *men and women*, humble *men and women*, charitable *men and women*, fasting *men and women*, chaste *men and women*, *men and women* who remember God often — God has prepared forgiveness and a rich reward.<sup>18</sup>

- *Surah 33, ayah 59:*

Prophet, tell your *wives*, your *daughters*, and *women* believers to make their outer garments hang low over them so as to be recognized and not insulted: God is most forgiving, most merciful.<sup>19</sup>

From these passages, the five basic obligations the *Shari'a* places on both genders emerge. In addition, *surah 24, ayah 31*, and *surah 33, ayah 59*, are bases for requirements particular to women.

First, in respect of obligations common to men and women, both are instructed to "lower their gaze." This instruction is not meant to be at odds with the western ideology of looking someone in the eye out of respect, nor the old-fashioned American western virtue (common in Kansas, for example) of "looking someone in the eye" in the sense of being honest, straightforward, and trustworthy. Rather, the Qur'an orders both men and women to lower their gaze if looking at the other

gender begins to elicit feelings of desire or impurity.<sup>20</sup> An initial glance at the opposite gender is permitted and is deemed innocent — and, in fact, is necessary in a practical sense of positioning people so as not to bump into them. But, subsequent gazing out of sexual desire is not permitted, as the *Shari'a* regards it as impure.<sup>21</sup> In other words, men and women are not to ogle one another. They are not to look at each other as sexual objects for their own sensual gratification. Rather, they are to regard each other with humility, and appreciate that all of them — men and women — have equal dignity that ultimately comes from God (Allāh). In that sense, the instruction in *surah 24, ayat 30-31* empowers both men and women, as it asks them to treat each other as fully human subjects, not material objects.

Moreover, "lowering their gaze" does not preclude normal observation. The overwhelming majority of scholars agree that looking without desire or temptation is permitted, just as 'Ā'isha, the favorite wife of Muhammad wife after Khadija, did. According to one *hadith*, the Prophet let 'Ā'isha watch Ethiopian men play with their spears on *Eid al-Fitr* (the celebration to signify the end of *Ramādān*) and *Eid al-Aḍha* (the celebration to mark the beginning of *Hajj*), until she felt she had watched enough.<sup>22</sup>

'Ā'isha said, "While the Ethiopians were playing with their small spears, Allāh's Apostle . . . screened me behind him and I watched (that display) and kept on watching till I left on my own." So you may estimate of what age a little girl may listen to amusement. ['Ā'isha was 15 years old at the time of the event.]<sup>23</sup>

Two inferences are possible: safety or segregation. First, the Prophet was protecting 'Ā'isha from the possibility of being hit by a spear. In turn, as per the majority view, "lowering their gaze" does not prohibit Muslim women from watching male athletes play sports, male actors in a dramatic production, or male musicians in concert. Second, the purpose of a screen is to preclude male performers from seeing them. If so, then the prohibition stands.

Context is a key qualification to the instruction to lower one's gaze, as well as to dress modestly. The dress requirements are relevant in the presence of a person of the opposite gender who is not a "*maḥram*." A "*maḥram*" (plural, "*maḥarim*") is a person who an individual is either not permitted to marry, or to whom the person already is married. Essentially, it means close family relatives of the opposite gender. Specifically, the Qur'an defines a "*maḥram*" for a female as her husband, father, father in law, son, husband's sons, brother, and nephews. Thus, the instruction is not applicable to a man or woman dealing with close family relatives, that is, with non-*maḥarim*.

[Hereinafter, BUKHARI.]

<sup>16</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 24:30 at 222 (Oxford, England: Oxford University Press, 2004) (emphasis added). [Hereinafter, QUR'AN.]

<sup>17</sup> QUR'AN, *supra*, 24:31 at 222 (emphasis added).

<sup>18</sup> QUR'AN, *supra*, 33:35 at 269 (emphasis added).

<sup>19</sup> QUR'AN, *supra*, 33:59 at 271 (emphasis added).

Second, concerning modest dress, both men and women are directed to "guard their private parts." To what does the phrase "private parts" refer? The common understanding in the non-Muslim world is that it means, for men, the genitalia and buttocks. For women, it means the genitalia, buttocks, and breasts.

If this interpretation were the one held in the Muslim world, then it would imply neither men nor women should appear in public, i.e., in front of non-*maḥarim* (non-close family relatives) with these parts of their bodies exposed. It would be forbidden (*ḥarām*), therefore, for a Muslim man or woman to go nude to a nude beach, or topless to a topless beach — though being at such a beach, in suitable bathing clothes, would be a different matter. Conversely, hands and feet, arms and legs, head and neck, face, and portions of the mid-section and back, are not normally understood to be "private parts" — at least not throughout the non-Muslim world.

However, this interpretation is not commonly held in the Muslim world. It certainly is not the one most Muslim religious and legal scholars (*ulema* and *fukahā*, respectively) traditionally advocate. Rather, the key to the meaning of "private parts" is the Arabic word "*awrah*," which often is translated as "nakedness." Scholars have discussed and debated its meaning, and (as discussed below) arrived at a definition — or, better said, one definition for women, and another definition for men.

These basic instructions in *surah* 24, *ayah* 30-31 — to lower one's gaze and guard one's private parts — apply to men and women alike. They do not apply in all circumstances, however. Obviously, in the privacy of the home, and the intimate environment between a husband and wife, they are not pertinent. *Ayah* 31 makes this clear when it refers to the "*maḥarim*." The dress obligations incumbent on women apply to them when they are in public, that is, when they are in the presence of non-*maḥarim*. By extension, the instruction to lower one's gaze and guard one's private parts apply to men and women when persons other than close family relatives are present.

Third, dressing for the sake of vanity is prohibited. A woman should avoid choosing clothes on the basis of fame and pride.<sup>24</sup> Similarly, men should not seek glory, or be vainglorious, through their attire. This requirement is based on a consistent precept of the Prophet. He preached modesty in every aspect of appearance. An excessively fancy dress that is worn as a status symbol or to gain the admiration of others is inappropriate.

Fourth, cross-dressing is forbidden. A woman must avoid male costumes. Conversely, men must eschew garb distinctive to women. In one *ḥadīth*, *Imām* Bukhari records the narration of Ibn 'Abbās that:

Allāh's Apostle . . . cursed those men who are in the similitude (assume the manners) of women and those women who are in the similitude (assume the manners) of men.<sup>25</sup>

From this, Muslim religious and legal scholars (*fukahā* and *ulema*, respectively)

<sup>24</sup> See JAMAL BADIWI, Ph.D., *WOMEN UNDER THE SHADE OF ISLAM: A DISCOURSE ON WOMAN'S ISSUES 54* (Cairo, Egypt: El Falah for Translation, Publishing, and Distribution, 1997). [Hereinafter, BADIWI.]

<sup>25</sup> *BUKHARI, supra*, vol. VII, book LXXII (The Book of Dress), p. 513, *ḥadīth* no. 773.

understand that wearing attire or acting in a fashion to imitate the opposite gender is not desired. The distinct, complimentary nature and roles of women and men, as created by God (Allāh), justifies this understanding. To cross-dress is to obfuscate the gender distinctions with which Allāh created people, and thus is an affront to the Almighty.

Fifth, *surah* 33, *ayah* 35 is a passage commonly cited by women, including Muslim feminists, in respect of the fundamental equality of men and women in the eyes of God (Allāh). The passage does not discuss personal attire in particular — it is broader than that. It speaks of belief, obedience, humility, charity, abstinence (in the form of fasting and chastity), and remembrance. These characteristics are virtues in Islam, as indeed they are in Catholic Christianity. The passage assures all persons, male and female, that Heaven awaits them, should they practice these virtues in this life. This comfort is reinforced by one *ḥadīth* of the Prophet, narrated by Abū Huraira, speaks on the issue of women's dress, linking it to entry into Heaven:

Two are the types of the *denizens of Hell* whom I did not see: people having flogs like the tails of the ox with them and they would be beating people, and the *women who would be dressed but appear to be naked*, who would be inclined (to evil) and make their husbands incline towards it. Their heads would be like the *humps of the camels* inclined to one side. They will not enter Paradise and they would not smell its odor whereas its odor would be smelt from such and such distance.<sup>26</sup>

Likewise, in Catholic Christianity, the practice of these virtues matters for salvation. The link to dress is clear enough: men and women can practice virtue by the way they dress.

## § 36.03 SPECIAL REQUIREMENTS FOR WOMEN

### [A] Applicability

It is proper to start a discussion of the Islamic dress requirements peculiar to women with *surah* 24, *ayah* 31 of the Qur'ān. This passage contains specifications about appropriate attire for women that go beyond what *ayah* 30 states for men. To understand *ayah* 31, it is helpful to start mid-way through it, with the clause beginning with the word "except." That is because the "except clause," if it may be called that, establishes the environment or context in which the specifications are particularly relevant.

The "except clause" in *surah* 24, *ayah* 31 establishes that a woman is not obligated to cover in front of her *maḥarim* (husband or other close family

<sup>26</sup> *SANĪH MUSLIM — BEING TRADITIONS OF THE SAYINGS AND DEEDS OF THE PROPHET MUHAMMAD AS NARRATED BY HIS COMPANIONS AND COMPILED UNDER THE TITLE AL-JAM' US-SANĪH BY IMAM MUSLIM, REINTERPRETED INTO ENGLISH BY ABDUL HAMID SIDDIQI, WITH EXPLANATORY NOTES AND BRIEF BIOGRAPHICAL SKETCHES OF MAJOR NARRATORS, CORRECTED AND REVISED BY DR. HASSAN VOL. III.B, book 37 (Book Pertaining to Clothes and Decoration), pp. 419-420, ḥadīth no. 2128 (Lahore, Pakistan: Sh. Muhammad Ashraf Booksellers and Exporters, 1990).*

relatives).<sup>27</sup> In addition, a woman is not required to cover up in front of other free or slave women, or male servants with no desire (eunuchs). Finally, she need not don special coverings in front of small male children who have not attained the age of puberty.

It may be inferred that the category of "*maharim*" for a man is the same as for a woman, with the appropriate change from "husband" to "wife," and reference to his father, father in law, daughter, wife's daughters, brother, and nephews. In turn, the additional group of people in front of whom a female need not cover up entirely applies to males, with substitution of "female" for "male." Of course, for both adult women and men, the display of private parts to family members other than a spouse, is inappropriate.

### [B] Meaning of "*Awrah*"

Essential to understanding the Islamic dress code for women and men is the Arabic word "*awrah*." "*Awrah*" refers to the part of the body that should be covered at all times — the "private parts" in the language of *surah* 24, *ayah* 30-31.<sup>28</sup> There are two sets of requirements for covering the '*awrah* that apply to women in the presence of non-*maharim* persons: general and specific.

The general requirements are that clothing should be loose, thick, and modest. "Loose" need not be baggy. "Thick" refers to transparency more than weight. Light-weight materials made with the benefit of high technology, synthetic fabrics (such as Nike Dri-Fit or Adidas Clima-Cool) presumably are permissible, as long as they are not transparent or translucent. Clothing never should describe (in the sense of trace out by virtue of a tight fit) or reveal in detail what lies beneath that which it covers. "Modest" does not mean un-fashionable, let alone unappealing. Rather, "modest" refers to garments that are dignified and respectful. Additionally, clothing of vanity is not permitted, nor is it allowed to dress in clothes specific to men.<sup>29</sup>

The specific requirements for women are based on the work of the *ulema* and *fukahā'*. Traditionally, most *ulema* and *fukahā'* state that the "*awrah*" for a woman in front of men includes her entire body except for hands, face, and arguably feet, while her "*awrah*" in front of other women is from her navel to her knees.<sup>30</sup> That is, in front of non-*maharim* men, a woman needs to cover her arms down to her wrists, her legs down to her ankles (at least), head, and face. In front of non-*maharim* women, a woman may be topless, and be exposed beyond her knees.

As is true for women, for men there are two sets of requirements for covering the '*awrah* that apply to men in the presence of non-*maharim* persons: general and specific. The same general requirements for covering the '*awrah* apply to men as

well as women: the clothing should be loose, thick, and modest. Dress should never describe or reveal in detail what lies beneath the covering. Additionally, clothing of vanity is not permitted, nor is it allowed to dress in clothes specific to women.<sup>31</sup>

As to specific requirements, the *ulema* and *fukahā'* do not prescribe a dress code for men in the detailed way they do for women. Or, put differently, the scholars simply allow men to expose more of their body, because they define the "*awrah*" more narrowly, than they do for women. Traditionally, most of the *ulema* and *fukahā'* agree that the "*awrah*" for men is between the navel and the knee.<sup>32</sup> Thus, it is permissible for a Muslim male to wear a sleeveless shirt, or shorts that cover the knee. To be sure, in some parts of the Gulf region, such clothes are frowned upon, even for non-Muslims.

### [C] *Hijāb* (Veil) and "Descent of the *Hijāb*" in *Surah* 33, *Ayah* 53

The *Sharī'a* does not oblige men to cover their heads or faces. Women are, and thus the topic of the "*hijāb*" is joined. "*Hijāb*" literally means "a veil, curtain, or barrier."<sup>33</sup> It is a general term for any type of veil. Typically, it connotes a headscarf, of which there is a myriad of styles and colors. In the non-Muslim world, the most common type of *hijāb* is a square- or rectangular-shaped scarf worn over the head and neck, which leaves the full face clearly exposed. Some women wear this kind of *hijāb* loosely, showing a bit of hair; others wear it tightly, scrupulously endeavoring to reveal no hair.

The passage in the Qur'ān most directly relevant to the *hijāb* is *surah* 33, *ayah* 53. This passage is as the "Descent of *Hijāb*," (or better put in English, the "Descent of the *Hijāb*"). It is widely discussed in the Four *Sunnite* Schools, and the prominent *Shī'ite* sects, and it was revealed after the Prophet Muhammad married Zaynab.<sup>34</sup>

The story behind the Descent of the *Hijāb* itself sets the context for the passage. On the occasion of the wedding of Muhammad and Zaynab, a gentleman named Anas Ibn Malik, one of the Companions of the Prophet (*Ṣahābah*), lingered with a couple of other guests at the wedding dinner party longer than everyone else. He did so to the dismay of Muhammad, who was waiting to spend time with his new bride. Because Muhammad was by nature a shy individual, he was too bashful to say anything to Anas. At this moment, a verse of the Qur'ān was revealed. *Surah* 33, *ayah* 53 states:

Believers, do not enter the Prophet's apartments for a meal unless you are given permission to do so; do not linger until [a meal] is ready. When you are invited, enter; then, when you have taken your meal, depart. Do not stay on and talk for that would offend the Prophet, though he would shrink

<sup>27</sup> Notably, under Saudi law, only a *maharim* can travel with a single woman to Mecca to perform the *Hajj*. No other man is authorized to go on *Hajj* with her.

<sup>28</sup> See BADAWI, *supra*, at 55.

<sup>29</sup> See BADAWI, *supra*, at 56.

<sup>30</sup> See BADAWI, *supra*, at 55.

<sup>31</sup> See BADAWI, *supra*, at 56.

<sup>32</sup> See BADAWI, *supra*, at 55.

<sup>33</sup> See FATIMA MERNISSI, *THE VEIL AND THE MALE ELITE* 85 (Reading, Massachusetts: Addison-Wesley Publishing Company, Inc., 1991). [Hereinafter, MERNISSI.]

<sup>34</sup> See MERNISSI, *supra*, at 85.

from asking you to leave. God does not shrink from the truth. *When you ask his wives for something, do so from behind a screen: this is purer both for your hearts and for theirs.* It is not right for you to offend God's Messenger, just as you should never marry his wives after him: that would be grievous in God's eyes.<sup>35</sup>

In effect, the verse contained not only an order to individuals dealing with a wife of Muhammad, but also an instruction to Muhammad himself, namely, to place a *hijāb*, or curtain, between his new wife and the other believing men — that is, between Zaynab and the over-staying guest, Anas Ibn Malik.<sup>36</sup>

This passage was the first of its kind Qur'ān. No previously revealed verse had introduced a *hijāb* for women, nor ordered a division in the space of Muslims between women and men. Based on this passage, two *Sunnite* Schools — the *Shāfi'i* and *Hanbali* — derived the requirement for women that they wear a "*niqāb*," A "*niqāb*," also called a "*burkha*," is a full face and hand covering.<sup>37</sup> However, a technical distinction exists between the two types of veil. A "*burkha*" covers the entire face, as well as body. It has a mesh screen through which a woman sees, or if not, the woman simply has to peer through the fabric of which her *burkha* is made. A "*niqāb*" leaves the eyes uncovered, with a narrow opening for them, and is worn with an accompanying headscarf. A separate veil, covering the eyes, may or may not be worn with the "*niqāb*."

The derivation of the apparel obligation for women by the *Shāfi'i* and *Hanbali* Schools is an extension, and appears based in part on analogical reasoning (*qiyās*). Yet, whether there is or even can or should be an analogy between the wives of the Prophet and other women is debatable. Thus, in contrast to the *Shāfi'i* and *Hanbali* Schools, the *Hanafi* and *Māliki* Schools view *surah* 33, *ayah* 53 as bounded by time and place. They regard the passage as a unique command to the wives of the Prophet to conceal themselves visually from the eyes of the men at the time. The *Hanafi* and *Māliki* School draw no analogy from the passage to women other than the wives of the Prophet.

There is an obvious comment that may be made in respect of the interpretations of the Descent of the *Hijāb* offered by all Four of the Schools. All Four Schools examine the italicized language above and identify the pertinent issue as what covering, if any, should be placed on women. But, a straightforward reading of this language alone, without recourse to any other text or to *hadith*, clearly indicates all it demands is that a "screen" exist between men and the wives of the Prophet (or by extension, all women), and that men speak to the wives (or any woman) from behind it. Taking this passage at its plain meaning, there are three ways to satisfy what it requires:

- (1) Put a veil over the wives of the Prophet (or all women);
- (2) Put a veil over men; or

<sup>35</sup> Qur'AN, *supra*, 33:53 at 270 (emphasis added).

<sup>36</sup> See MORRIS, *supra*, at 85.

<sup>37</sup> See NABEEL, *supra*, at 109.

- (3) Put a veil in between the two groups (*e.g.*, attaching it to a ceiling or wall, or using a portable screen).

Why, then, do the *ulema* and *fukahā'* focus only on the first method?

One answer is the scholars are largely, if not exclusively, men. They have no interest in veiling themselves and other men. Insofar as the custom and practice on the Arabian Peninsula at the time of the Prophet was for women to adorn a head covering, it was easy for the scholars at that time and in the subsequent decades and centuries to maintain continuity with traditional dress behavior. Consequently, it may be speculated that the scholars never regarded the second method as a serious option. The third option, perhaps, was judged by them to be cumbersome and inconvenient.

There is a second answer, which on occasion some Muslim men admit in private. Men may be prone to look at women in a sexual manner — to "check them out," in common American parlance. A veil protects women from the wandering eyes of men. To protect women in this manner is to respect, and even exalt, them. This answer is seriously flawed and easily rebutted. Assuming the problem is the greater propensity of men to cast impure glances at women than *vice versa*, then why penalize women for the weakness of men by requiring them to veil? Why not, instead, endeavor to change the hearts of men, to strengthen them through education and prayer as to the proper ways in which they ought to relate to women? Why not allow for freedom of choice for both men and women as to all three options, and create space for creativity to develop yet more options?

## § 36.04 FIVE PRACTICAL DRESS REQUIREMENTS SPECIFIC TO WOMEN

What, in a practical sense, must or ought Muslim women wear in public? There is no easy answer to this question, which of course demands a workable, everyday response. The passages in the Qur'ān quoted earlier, particularly *surah* 24, *ayah* 31, speak to the adornment of Muslim women, specifically the permissibility of revealing what "is acceptable to reveal," and veiling the rest. Professor Abdel Haleem offers the following observation about what this phrase means:

Literally, ["beyond what is acceptable to reveal"] means "beyond what [ordinarily] shows." *This phrase is ambiguous in Arabic.* Recourse is commonly made to the *hadith* (Prophetic tradition), which uses the same verb *dahara* in the sense of it being permissible for a woman to show only her face and her hands in front of strangers.<sup>38</sup>

Simply put, in the face of ambiguity, Islamic scholars logically looked to the *hadith*, wherein they found an appropriate verb. They defined that verb in terms of the custom and practice on women's dress on the Arabian Peninsula during the life of Muhammad. Yet, even in that era, it was permissible for a woman to show her face and hands.

<sup>38</sup> Qur'AN, *supra*, fn. a to 24:31 at 222 (emphasis added).

What are the practical requirements today? Many Muslim women follow the strictest of interpretations, covering their entire bodies and faces. Others follow the interpretation just mentioned, showing only their faces and hands. Still others dress in a manner indistinguishable from non-Muslim women. In other words, Muslim women are hardly monolithic in how they answer the question. Many cosmopolitan Muslim cities readily reveal the wide continuum: in places such as Cairo, Istanbul, Jakarta, Lahore, and Kuala Lumpur, Muslim women at all points on the continuum can be seen.

Dr. Jamal Badawi, an Egyptian-American scholar, summarizes the opinions of the Four *Sunni* Schools on *surah* 24, *ayah* 31 of the Qur'ān. He concludes over the centuries a consensus (*ijma'*) has emerged across them. In particular, most *ulema* and *fukahā'*, respectively, derive and agree upon three main rulings from *ayah* 31:<sup>39</sup>

1. A Muslim woman should not display her beauty and adornment (*zeenah*), except for "that which must ordinarily appear of it" (in Arabic, "*ma thahara minhā*"), or "that which is apparent"<sup>40</sup> —

The word "*zeenah*" is a broad one. It can express natural or bodily beauty. It also can express an acquired adornment, such as rings, bracelets, or even clothes themselves. It can be translated as "charms," as it is in the above rendition of *surah* 24, *ayah* 31. In yet other parts of the Qur'ān, "*zeenah*" refers to children, wealth, and natural beauty.<sup>41</sup>

According to the *ijma'* of the scholars, including the *Hanafi*, *Māliki*, *Shāfi'i*, plus some scholars in the *Hanbali* School, "*zeenah*" in the context of *ayah* 31 comprises all of the body of a woman, except for the following portions:

- Face and hands —

It is generally understood that "hands" start at the wrist, thus covering should extend to the wrist. Apparently, then, normally a wristwatch would be hidden. As for the "face," evidently from the diversity of veils in the Islamic world, there is debate as to whether certain features — such as the forehead, eyes, nose, mouth, cheeks, and chin — count as part of the "face" and thus need not be covered. Notably, scholars exempt the "face" (and hands) by referring to the dress requirements for women during the *Hajj*. During the Pilgrimage, a Muslim woman is not allowed to cover her face and hands, but is required to cover everything else. Similarly, during prayer, a Muslim woman is to cover all but her face and hands (and her feet, depending on which scholar is followed).

- That which appears naturally or during an uncontrollable situation —

For example, wedding rings, jewelry, and what may appear when the wind blows. Note, however, that hand jewelry is not a liberalization in terms what women can display, as they are permitted to display their hands.

Accordingly, face, hands, and features or adornments that appear naturally, or in an

uncontrollable environment, are exempt from the command in *ayah* 31 that women "not flaunt their charms."

What about the feet of a woman, and adornments on it — must they be covered? The scholars differ on whether the feet of a woman are considered "*zeenah*." Some urge that feet, and adornments on it such as anklets or toe rings, are not to be displayed.

It may be observed not all men agree, in a subjective sense, to a broad definition of "*zeenah*." That also is true in respect of women in respect of men. Quite obviously, in real life, different features of a person of the opposite gender attract different people. Some may indeed be captivated by hands, while others by eyes or legs, and so forth.

2. Women are to draw their head covering over their neck to cover their breasts —

The word "*khumūr*" is the plural of the Arabic word "*khimār*," which means "head cover," or "veil covering the head." Additionally, the word "*juyūb*" is the plural of the Arabic word "*jāyib*," the primary meaning of which is the neck slit of a dress. "*Juyūb*" also has a secondary meaning, which is connected logically to the first meaning, and that is the bosom or bust of a woman.

Scholars opine that the wording of *ayah* 31 indicates "*khumūr*" were not introduced as an article of clothing for women by that verse. In other words, the scholars agree *ayah* 31 implies cloaks already existed at the time of the revelation of this passage. Consequently, *ayah* 31 demands that the scholars render an interpretation that alters a familiar article of clothing — or, more specifically, the way and purpose for which it is used.

The resulting interpretation is that *ayah* 31 calls on women to draw their "*khimār*" (head covering) over the area of their neck and below (the neck line). The purpose for doing so is that their bosoms are covered in front of all males, with the exception of their *maḥarim* (husband or other close family relatives).

3. Women are prohibited from "stamp[ing] their feet so as to draw attention to any hidden ornaments"<sup>42</sup> —

The verse concerns a woman wearing hidden anklets that make noise when she stamps her feet.<sup>43</sup> The practice aims to entice the sexual curiosity of men as to what is covered beneath the dress of the woman. *Ayah* 31 states women "should" not engage in this practice, though Muslim scholars have interpreted the verb as "shall" — a prohibition.

Many scholars extend this prohibition to other items, such as perfume, because such items are a "hidden ornament" they argue are intended to arouse the sexual curiosity of men. That is, scholars group "hidden ornaments" together and apply *qiyās*, analogizing them to feet-stomping with concealed anklets, and ban all such articles.

<sup>39</sup> See BADAWI, *supra*, at 49-54.

<sup>40</sup> See BADAWI, *supra*, at 49.

<sup>41</sup> See, e.g., the following *surat* and *ayat*: 3:14, 16:8, 17:47, and 37:6.

<sup>42</sup> QUR'AN, *supra*, fn. a to 24:31 at 222.

<sup>43</sup> See NASEEF, *supra*, at 111.

In addition to these three rules, there are two requirements. They do not have the degree of widespread acceptance among the scholars of the Four Schools as do the three rules. Still, they are important and attract considerable support among scholars.

#### 4. Looseness and thickness —

The fourth requirement as to dress appropriate for a Muslim woman is based on a *ḥadīth* narrated by Abū Huraira (quoted above). That *ḥadīth* mentions women who are dressed, but whose dress seduces men, because the wearer appears almost naked, as the garment is tight, thin, or both.<sup>44</sup> The clothing of a Muslim woman must be loose and thick enough so as not to describe the shape of her body or skin, specifically, her bust line, waist, buttocks, and thighs. As for the metaphor of camel humps in the *ḥadīth*, scholars urge they signify hairstyles that are so elaborate and obvious that they reveal to men what lies beneath the *khimār*. Such hairstyles undermine the purpose of the *khimār*. Thus, while *surah* 24, *ayat* 30-31 focus on the extent of covering, the *ḥadīth* narrated by Abū Huraira speaks to the kind of covering permitted: one that is loose, not too thin, and does not explicitly reveal the body shape of the wearer.

According to another *ḥadīth*, related in Musnad Ahmad, the Prophet once received a thick garment as a gift, which he in turn gave to Osama bin Zayd. Osama then gave the garment to his wife. When Osama told Muhammad he had given the garment to his wife, Muhammad said to Osama:

Ask her to use a *gholalah* under it (the garment) for I fear that it may describe the size of her bones.<sup>45</sup>

A "*gholalah*" is an under-garment, worn under clothing, such as a dress, and is akin to a ladies slip under dresses or skirts in modern times.<sup>46</sup> By wearing a *gholalah*, which is made of thick fabric, the body shape of a woman is not delineated by her outer garment. Here, again, is a *ḥadīth* focusing on the looseness of women's clothes: the initial gift was a thick garment, but it was not loose enough to prevent men from capturing the contours of the body of the wife of Osama.

What about outer—rather than under-garments, that is, cloaks of a sort? What rules apply to them? *Surah* 33, *ayah* 59 (quoted earlier) asks all believing women, as well as the wives and daughters of the Prophet, to draw cloaks over their bodies, so that they may be recognized as Muslims and not molested. But, some Muslim scholars, including Dr. Badawi, argue as long as an outer dress satisfies the rules above — it covers everything but the hands and face, and it is loose and thick — then no additional cloak is necessary.<sup>47</sup>

*Surah* 33, *ayah* 59 mentions two purposes for a cloak: not being insulted (e.g., avoiding molestation), and being recognized. The second purpose is about identification as a Muslim woman. Scholars regard a cloak as an indicator of modesty.

<sup>44</sup> See BADAWI, *supra*, at 51-52.

<sup>45</sup> See BADAWI, *supra*, at 51.

<sup>46</sup> See BADAWI, *supra*, at 51.

<sup>47</sup> See BADAWI, *supra*, at 52.

Modest clothing rightly identifies a woman in public as a Muslim. Conversely, scant, thin, tight clothing ought not to be the hallmark of her dress. If attention comes to a Muslim woman because of her clothing, then it should be to ward off harassment and men who look lustfully at her body. Thus, a *ḥijāb* is meant to broadcast that its wearer is a Muslim who does not want to be subject to harassment or concupiscence.

Of course, the same comment offered earlier may be repeated here: insofar as the problem is the weakness and disordered behavior of some men, why attempt to remedy the problem by imposing onerous sartorial requirements on women, instead of educating men in virtue? The answer to this point implicates the Qur'an itself and whether it is interpreted and susceptible to independent reasoning (*ijtihad*). If it is accepted as the literal and invariant word of God (Allāh), then there is little room for maneuver.

#### 5. Alluring Garments —

There is yet a fifth requirement as to dress that is specific to women. The overall appearance of a woman should not be one that attracts the attention of men to her beauty.<sup>48</sup> After all, the purpose of the female dress requirements is to conceal the *zeenah* (beauty, adornments, or charms). The Qur'an asked the Prophet's wives to "bedizen [i.e., ornament] not yourselves with the bedizenment of the Time of Ignorance."<sup>49</sup> Many Muslim women look to the wives of the Prophet as an example in dress. In turn, Muslim scholars agree that women must abstain from dress that is attractive and draws the attention of men who are not their *maharim* (husband or other close family relatives).

Two observations are pertinent. First, scholars ground this rule on aspiration. Based on role models of dress by some Muslim women, some male scholars fashion an obligation for women. The fact these women believe the proper guidance on dress for them is the attire of wives of Muhammad does not, by itself, mean all women must dress like those wives. Yet, some scholars turn an "ought" of some into a "shall" for all.

Second, the entire paradigm as to covering beauty stands in stark contrast to most of the non-Muslim world. Asked directly, query whether in the Islamic paradigm, coverage of beauty is mandated because beauty and sexuality are confused. Is it always the case that to see the outlines of the body of a woman, or certain of her features, is to desire her in a carnal manner? Or, is it possible those contours and features are appreciated as intrinsically beautiful, and admired with humility as evidence of the creative genius of God? Artists throughout the non-Muslim world answer this question in different ways through their depictions of women on canvases, as well as through the dances they choreograph and music they perform. Even in Muslim history, there are periods in which art exalts the beauty of the female form, full stop. One example is the Mogul Empire, specifically, depictions in Rajasthani paintings of Mogul court scenes. Women are routinely depicted in attire that does not satisfy all five rules.

<sup>48</sup> See BADAWI, *supra*, at 54.

<sup>49</sup> See BADAWI, *supra*, at 53.

§ 36.05 DIFFERENCES AMONG FOUR SCHOOLS ON  
‘AWRAH (PRIVATE PARTS), HĪJĀB (VEIL), AND  
NIQĀB (FULL-FACE VEIL)

The five requirements for women are common to all Four *Sunni* Schools. However, among and even within the Schools, there are debates about what women must, or at least should, wear. The starting point for these debates is the Arabic word “*awrah*.” “*Awrah*” refers to the parts of the body to be covered at all times in public — the “private parts” in the language of *surah* 24, *ayah* 30-31. The *Hanafi* and *Mālikis* Schools take the most liberal approach to women’s dress, the *Hanbali* School takes the most conservative path, and the *Shāfi’i* School is split. Table 36-2 summarizes the differences.

[A] *Hanafi* and *Mālikis* Schools

The *Hanafi* and *Mālikis* Schools hold the opinion the “*awrah*” consists of everything except for the face, hands, and sometimes the feet.<sup>50</sup> Thus, these Schools regard the *hijāb* (veil or curtain) — that is, a legitimate *hijāb* that conforms to Islamic dress requirements — as clothing that covers everything except those three areas. The *hijāb* also must adhere to the requirements of looseness, thickness, and overall modesty.

The *Hanafi* School does not require a *niqāb* (or a *burkha*) for believing women other than the wives of the Prophet, with one exception. *Hanafi* scholars encourage a very beautiful woman, or a woman with makeup, to cover her face in front of men to avoid attracting men who may look at her in a lustful manner.<sup>51</sup> This view immediately conjures up the adage “beauty is in the eye of the beholder,” because it begs the question of who is a “very beautiful” woman. Generally, however, *Hanafis* and *Mālikis* explain *surah* 24, *ayah* 31 regarding the *hijāb*, and *niqāb* specifically, as a special *sui generis* command for the wives of Muhammad. It is designed to keep them only visibly, but not intellectually or socially, absent from the eyes of the men at the time. (Ironically, this explanation is an instance of commission by Islamic scholars of the Orientalist Fallacy.)

The *Hanafi* and *Mālikis* Schools rely on three pieces of evidence to support their opinion a woman is not required to cover her face and hands. First, they point to a Qur’anic passage: “[Prophet], tell believing men to lower their gaze. . . .”<sup>52</sup> The scholars remark that if women were to cover completely their entire bodies, including their face, then there would be no need for men to lower their gaze. There would be nothing for men to look at in the first place, as the entirety of the woman would be cloaked.<sup>53</sup>

Table 36-2:  
Summary of Differences on Apparel Requirements for Women among the Four  
*Sunni* Schools

School	Definition of “ <i>Awrah</i> ” (i.e., parts of the body of a woman that must be cov- ered at all times)	Specifications for a <i>Hijāb</i> (Veil)	Is a Face Veil ( <i>Burkha</i> or <i>Niqāb</i> ) Required for Women Other Than the Wives of the Prophet Muhammad?
<i>Hanafi</i>	All parts, except the face, hands, and feet.	Covers all parts, except the face, hands, and feet. Must be loose, thick, and modest.	No, except for a very beauti- ful woman, or a woman who wears make up.
<i>Mālikis</i>	All parts, except the face, hands, and feet.	Covers all parts, except the face, hands, and feet. Must be loose, thick, and modest.	No, except for a very beauti- ful woman, or a woman who wears make up.
<i>Hanbali</i>	The entire body.	Covers the entire body. Must be loose, thick, and modest.	Yes.
<i>Shāfi’i</i>	Majority View: The entire body.  Minority View: All parts, except the face, hands, and feet.	Majority View: Covers the entire body.  Minority View: Covers all parts, except the face, hands, and feet.  Both Majority and Minority Views:  Must be loose, thick, and modest.	Majority View: Yes, except for business transactions, giving testi- mony, medical purposes, and meeting a suitor for marriage.  Minority View: No, except for a very beauti- ful woman, or a woman who wears make up.

Second, the *Hanafi* and *Mālikis* School scholars cite a *ḥadīth* found in *Imām* Malik’s famous book, *Al Muwaṭṭa’*. (This work, which took *Imām* Malik roughly 40 years to complete, not only compiles and discusses the *Sharī’a*, but also collects 1,720 *ḥadīths*.) In that *ḥadīth*, it is recorded that during the *Hajj*, Muslim women used to walk by Asma’a, the sister in law of the Prophet. Asma’a would not order the other women to take off their *niqāb*, even though she herself did not wear the *niqāb* during the *Hajj*.<sup>54</sup> From this account, *Imām* Malik deduces that women were not obligated to cover their faces, even though some chose to wear the *niqāb* independently in emulation of the wives of Muhammad.<sup>55</sup> *Hanafi* and *Mālikis* School

<sup>50</sup> See ABDULRAHMAN AL JAZAIRI, *FIRH OF THE FOUR SCHOOLS* vol. 5 at 1015 (Beirut, Lebanon: Dar Al-Kutub Al-Ilmiyah, 2003). [Hereinafter, AL JAZAIRI.] Sheikh Al Jazairi lived from 1299 to 1360 A.H.

<sup>51</sup> See AL JAZAIRI, *supra*, vol. 5 at 1015.

<sup>52</sup> QUR’AN, *supra*, fl. a to 24:30 at 222.

<sup>53</sup> See AL JAZAIRI, *supra*, vol. 5 at 1015.

<sup>54</sup> See AL JAZAIRI, *supra*, vol. 5 at 1015.

<sup>55</sup> See AL JAZAIRI, *supra*, vol. 5 at 1015.

scholars accept this logic.

Third, there is a *ḥadīth* that *Hanafi* and *Mālikis* School scholars use to support the proposition that women were unidentifiable upon going to the mosque during the time of the Prophet. They were unidentifiable not because they covered their faces, but because of the darkness of the night. 'Ā'isha narrated the relevant *ḥadīth*:

Allah's Apostle . . . used to offer *Fajr* [dawn] prayer and some believing women covered with their veiling sheets used to attend the *Fajr* prayer with him and then they would return to their homes unrecognized.<sup>56</sup>

Some scholars interpret this *ḥadīth* to mean that women were not necessarily fully covered, including their faces, at the *fajr* prayer. Because it was the dawn prayer, it was still too dark to identify anyone, including men versus women.

### [B] *Ḥanbalī* School

The *Ḥanbalī* School regards the entire body of the woman as "*awrah*." They base this holding on the passage in the Qur'ānic that instructs men to speak to the wives of the Prophet only from behind a curtain.<sup>57</sup> Because the wives of Muhammad are highly esteemed in Islamic tradition, this School regards the emulation of their actions as necessary for all believing women.<sup>58</sup> Put differently, *Ḥanbalī* scholars transform this high regard into a mandate: all women must don a *niqāb*.

In addition, *Ḥanbalī* School scholars also cite a *ḥadīth* narrated by 'Ā'isha:

The riders would pass by us while we were with the Messenger of Allah. . . . When they got close to use, we would draw our outer cloak from our heads and cover our faces. When they passed by, we would uncover our faces.<sup>59</sup>

This verse, the *Hanbalis* claim, concerns the *niqāb* and its prevalence among believing women during the time of the Prophet. Yet, read literally, it speaks of coverage only when "riders" passed close to women when they accompanied Muhammad. Evidently, the women otherwise were not covering their faces — a fact the last sentence confirms.

### [C] *Shāfi'i* School

The *Shāfi'i* School does not have a single opinion on special requirements for the personal attire of women. Rather, the scholars in this School are split. The minority of *Shāfi'i* scholars endorses the same opinion held by the *Hanafis* and *Mālikis* as to the meaning of "*awrah*" — it excludes face, hand, and feet — and the applicability of the *niqāb* to women other than the wives of Muhammad. Like the *Hanafi* and *Mālikī* School opinions, the *Shāfi'i* School recommends that a woman wear a *niqāb*

if she is extremely attractive, or is wearing makeup, so as to avoid the covetous looks of men.<sup>60</sup>

However, the majority of *Shāfi'i* scholars agree with the *Ḥanbalī* view that the entire body of a woman is "*awrah*," including the face and hands.<sup>61</sup> The *Shāfi'i* majority allows for a few exceptions, wherein a woman can expose her face and hands. Examples include during business transactions, giving testimony, medical purposes, and when sitting with a suitor a woman is considering marrying.<sup>62</sup>

<sup>56</sup> BUKHARI, *supra*, vol. I, book VIII (The Book of *Ṣalāt* (Prayer)), p. 225, *ḥadīth* no. 368.

<sup>58</sup> See AL-JAZAIRI, *supra*, vol. 5 at 1015.

<sup>59</sup> This *ḥadīth* is recounted in IMAM AHMAD, *ABU DAWUD*, and *IBN MAJAH*.

<sup>60</sup> See NASEEF, *supra*, at 114.

<sup>61</sup> See AL-JAZAIRI, *supra*, vol. 5 at 1015.

<sup>62</sup> See AL-JAZAIRI, *supra*, vol. 5 at 1015.

## Chapter 37

### WOMEN AND WORK

---

Now, let me be clear: Issues of women's equality are by no means simply an issue for Islam. In Turkey, Pakistan, Bangladesh, Indonesia, we've seen Muslim-majority countries elect a woman to lead. Meanwhile, the struggle for women's equality continues in many aspects of American life, and in countries around the world.

I am convinced that our daughters can contribute just as much to society as our sons. (Applause.) Our common prosperity will be advanced by allowing all humanity — men and women — to reach their full potential. I do not believe that women must make the same choices as men in order to be equal, and I respect those women who choose to live their lives in traditional roles. But it should be their choice. And that is why the United States will partner with any Muslim-majority country to support expanded literacy for girls, and to help young women pursue employment through micro-financing that helps people live their dreams. (Applause.)

President Barack H. Obama,  
*On A New Beginning*, Speech at Cairo University,  
Cairo, Egypt, 4 June 2009

#### SYNOPSIS

##### § 37.01 BASIC EQUALITY

##### § 37.02 TRADITIONAL ROLES

##### § 37.03 EMPLOYMENT OUTSIDE HOME

- [A] Issue At Stake
- [B] No Prohibition
- [C] Three Criteria
- [D] Trend toward Reform

##### § 37.04 WOMEN AS HEADS OF STATE

- [A] Arguments Based on Qur'ān and *Hadith*
- [B] Other Arguments
- [C] Apprehension

##### § 37.05 MUSLIM FEMINISM

- [A] Not Monolithic
- [B] Controversial Thesis of Irshad Manji

### § 37.01 BASIC EQUALITY

Consider the following facts about women, work, pay, and poverty:<sup>1</sup>

- Around the world, one in every four households is headed by a woman.
- In the developing world, women are responsible for between 60 and 80 percent of crop production.
- In most countries, women work approximately twice the unpaid time that men work.
- Of the 1.3 billion poor people in the world, nearly 70 percent are women.

Is religion "to blame" for these stark, depressing facts? Put precisely, among Islamic nations and Muslim communities in non-Muslim countries, is the *Shari'a* to blame?

This question ought not to be, and indeed cannot properly be, answered in the aggregate. Each fact must be assessed in terms of its peculiar causal factors and context. Thus, a broadside attack on Islam, faulting it for the plight of women, would be unfair and erroneous. However, a more focused inquiry, which does bear directly on the status and empowerment of women, may be pursued: does the *Shari'a* permit women to work outside the home, in the public sphere?

The answer is a resounding "yes." There is a general consensus (*ijma'*) among Islamic religious and legal scholars (*ulema* and, respectively, *fukahā'*) that no evidence exists to prohibit a Muslim woman from working outside the home, that is, in the public sphere. Certainly, traditional Islamic teachings place utmost emphasis on the roles of a woman as a mother and a wife.<sup>2</sup> To be a mother and wife is to have a near sacred status, because these roles embrace the femininity of a woman. Accordingly, Muslim scholars tend to view these roles as defining the primary priorities in the life of a woman.

They are not alone in this regard. There are parallels in traditional Catholic Christian culture, and in traditional American society. However, two points are of critical importance across all religions and legal systems. First, a woman ought not be excluded from the labor force (for example, on the excuse that she "must" attend to the home and hearth). Second, the choice of priorities (for example, to focus on her education and career during part of all of her child-bearing years) ultimately ought to be up to her. These points have at times been forgotten, in Muslim and non-Muslim contexts alike.

On what is the consensus (*ijma'*) of Islamic scholars concerning the permissibility of women to work in the public sphere based? The most important source is the Qur'an itself. The Qur'an advocates equality of women and men in *surah* 3, *ayah* 194-195:

<sup>1</sup> See Catholic Relief Services, *A Mother's Love — Letter from CRS President Ken Hackett*, CRS Briefing, May 2010, posted at [http://donate.crs.org/site/MessageViewer?em\\_id=19281.0&printer-friendly=1](http://donate.crs.org/site/MessageViewer?em_id=19281.0&printer-friendly=1). The statistics are as of May 2010.

<sup>2</sup> See JAMAL BADAWI, Ph.D., *GENDER EQUITY IN ISLAMIC BASIC PRINCIPLES* 18 (Soltan Publishing Co. IMC, USA: Egypt, 1995). [Hereinafter, *GENDER EQUITY*.]

<sup>194</sup>Our Lord! Bestow upon us all that You have promised us through Your messengers — do not humiliate us on the Day of Resurrection [*i.e.*, Day of Judgment] — You never break Your promise." <sup>195</sup>Their Lord has answered them: "I will not allow the deeds of any one of you to be lost, *whether you are male or female, each is like the other* [in rewards]."<sup>3</sup>

As to the phrase "each is like the other," Professor Abdel Haleem observes the literal Arabic wording is:

"you come from each other," *i.e.*, you are *equal*.<sup>4</sup>

Another verse, *surah* 16, *ayah* 97, states:

To whoever, *male or female*, does good deeds and has faith, We shall give a good life and reward them according to the best of their actions.<sup>5</sup>

In brief, the Qur'an establishes equality between the sexes, notes the inherent similarities between them, and promises an equal reward for both in return for good works.

From these general passages, the permissibility of Muslim women working in the public sphere follows logically by deduction. Men can and do work outside the home. Men and women enjoy equality with God (Allāh), who sees the deeds of each person and promises to each one a just reward not tethered to gender. Hence, women can work, too.

That is not to say women are equal in all respects in the labor force. True Islamic feminism is not aimed at granting females the identical rights of males. This observation also holds for non-Muslim feminism. In both contexts, women need distinctive rights, such as generous maternity leave with pay, or reasonable accommodations and flexibility for childcare. Rather, Islamic feminism centers on the right of women to engage in society with dignity, honor, and respect, while taking into consideration any differences that may exist between the male and female biological makeup.

Like non-Muslim men and women, Muslim men and women are encouraged to take lawful and respectful jobs. The Qur'an states in *surah* 9, *ayah* 105:

Say [Prophet], "Take action! *God will see your actions* — as will His Messenger and the believers — and then you will be returned to Him who knows what is seen and unseen and He will tell you what you have been doing."<sup>6</sup>

This *ayah* does not exempt women. God (Allāh) is omniscient. He knows whether a person — man or woman — is engaged in illegal activities or disreputable work. The encouragement for Muslims is based on the religious law of Islam, the *Shari'a*, and thereafter reinforced by any additional secular or modernist legislation in the

<sup>3</sup> THE QUR'AN — *A New Translation* by M.A.S. Abdel Haleem 3:194-195 at 49 (Oxford, England: Oxford University Press, 2004) (emphasis added). [Hereinafter, QUR'AN.]

<sup>4</sup> QUR'AN, *supra*, fn. a at 49 (emphasis added).

<sup>5</sup> QUR'AN, *supra*, 16:97 at 172 (emphasis added).

<sup>6</sup> QUR'AN, *supra*, 9:105 at 125 (emphasis added).

jurisdiction in which they reside. For non-Muslims, the encouragement to take up employment that is legal and reputable also has sacred and secular backing. The religious tradition, such as Judaism or Christianity, as well as the relevant legal regime, such as United States federal or state law, would provide that backing. Which justification — the commandment of God, or the requirements of the legal system — are of primary importance to steer a person from illicit, disreputable jobs? The answer, for Muslims and non-Muslims, and men and women, depends on the disposition of the individual toward religion.

In addition to Qur'anic passages, there is a pragmatic justification in favor of women working in the public sphere. Dr. Yusuf Al Qaradawi (1926-), a prominent and controversial Egyptian Islamic scholar, rationalizes that because women comprise 50 percent of a population, one cannot expect 50 percent of a population to abstain from activity and contribution to society.<sup>7</sup> It is unjust for a society to expect a woman to contribute to it by birthing and raising children, but then require her to abstain from intellectual and social benefits society offers, including benefits obtained through work.

### § 37.02 TRADITIONAL ROLES

Across all time and religious tradition, scholars uphold the role of a mother in the upbringing and education of her children. Typically, they place special emphasis on that role during the early years of the life of a child, when the special bonding process between mother and child occurs. But, throughout the life of the child, to use common American expressions, "Mom is Mom," and "there is no substitute for Mom."

In Islam and Catholic Christianity, the role of mother is an esteemed one, and the exemplary role model for motherhood is the Virgin Mary, the Mother of Jesus. Catholic Christians regard Our Lady as the Mother of us all. She is the Mother of the Son of God, who in turn is part of the Trinity with God the Father and God the Holy Spirit, and God the Father is the Father of us all. Muslims do not think of Mary in quite these terms, which is unsurprising as they regard Jesus as a Prophet (albeit the greatest of pre-Muhammadan Prophets). Still, Muslims have great respect for Mary, and like Catholic Christians, not only appreciate her trials and tribulations as a mother, but also accept the Doctrine of the Immaculate Conception (i.e., that Mary was conceived without sin) and the Virginity of Mary (i.e., that Jesus was conceived through supernatural means). Notably, Mary is mentioned more often in the Qur'an than she is in the New Testament.

Accordingly, both Muslims and Catholic Christians agree motherhood is anything but an "idle" activity. Mary herself hardly lived an idle life, and shortly after giving birth to Jesus, fled with him and her husband, Joseph, to escape the sinister plot by King Herod (circa 73-4 B.C.) to eradicate threats he misperceived to his throne from a newborn king. Adherents to both faiths regard motherhood not only as a vital position, in the sense of propagation of the human species, but also a noble

one. As Dr. Al Qaradawi puts it, motherhood "largely shapes the future of nations." Muhammad Hafiz Ibrahim (1872-1932), a famous Egyptian poet known as the Poet of the Nile (*Shā'ir al-Nīl*), writes:

A mother is like a school that if endowed and prepared well, prepares an entire society well.<sup>8</sup>

According to Al Qaradawi, the most sacred responsibility a woman has is to raise her children so as to be positive, contributing members of society. Note that the duty is "sacred," because children are a gift from God (Allāh), and how a mother handles this gift is a key way in which she serves Allāh. Consequently, this duty should not be cast aside for short-term or opportunistic financial or educational concerns. On all these points, Catholic Christianity and Islam are in full accord.

To be sure, no faith, least of all Islam or Catholic Christianity, disregards the importance of the father in child rearing. Joseph, the step-father of Jesus, is a Saint for Catholic Christians, and Muslims have respect for Joseph as a model father and husband. Accordingly, under the *Shari'a*, a husband and wife are to play complementary roles in the household. Both parents ultimately are responsible for instilling in them Islamic teachings and morals, just as Catholic priests are fond of saying that the primary religious educators of children are the parents.

Additionally, the Qur'an codifies the role allocated to men as husbands. *Surah 4, ayah 34* states:

Husbands should take full care of their wives, with [the bounties] God has given to some more than others and with what they spend out of their own money.<sup>9</sup>

This passage indicates men are the protectors and maintainers of women, according to the resources and talents Allāh has given men. Arguably, it further suggests men have this role because have greater strength (in some sense) than women.

Through the ages, most Islamic religious and legal scholars (*ulema* and, respectively, *fukahā'*) hold this passage is the default position on the role of a man: he is normally obligated to financially provide for his family.<sup>10</sup> A woman, in many circumstances, is not obligated to work, nor spend on her family, and any assets she accumulates are hers to invest as she wishes. Some scholars argue that if a woman becomes the primary financial supporter for her family, then she can become "the one entrusted with the burden of guardianship."<sup>11</sup> Similarly, if financial responsibility is shared between both the wife and husband, then they are regarded as the guardians of one another.<sup>12</sup> Significantly, hardly any of the scholars employ the

word "guardian" to entail a relationship of superiority or inferiority; rather, wives and husbands are to be compassionate companions of one another.<sup>14</sup>

### § 37.03 EMPLOYMENT OUTSIDE HOME

#### [A] Issue At Stake

In all non-Muslim western societies, and most non-western ones as well, female participation in the labor force *per se* is an issue of diminishing controversy. As *The Economist* reported in January 2010:

[W]ithin the next few months [of 2010], women will cross the 50% threshold and become the majority of the American workforce. Women already make up the majority of university graduates in the OECD [Organization for Economic Cooperation and Development] countries, and the majority of professional workers in several rich countries, including the United States. Women run many of the world's great companies, from PepsiCo [along with Archer Daniels Midland and W.L. Gore] in America to Areva in France.

*Women's economic empowerment is arguably the biggest social change of our times.* Just a generation ago, women were largely confined to repetitive, menial jobs. They were routinely subjected to casual sexism and were expected to abandon their careers when they married and had children. Today they are running some of the organizations that once treated them as second-class citizens. Millions of women have been given more control over their own lives. And millions of brains have been put to more productive use. *Societies that try to resist this trend — most notably, the Arab countries, but also Japan and some southern European countries — will pay a heavy price in the form of wasted talent and frustrated citizens.*<sup>15</sup>

Accordingly, in most of the non-Muslim world, the debate has shifted from "whether women can or even ought to work?" to the conditions under which they work. Those conditions remain far from perfect.<sup>16</sup> Women remain under-represented in senior positions: they account for just 2 percent of the bosses of the Fortune 500 companies in the United States, and 5 percent of the bosses of the FTSE 100 stock market index companies in Britain, and less than 13 percent of the corporate board members in America are women. Women full-time workers average only 80 percent of the earnings of their male counterparts. And, women routinely and rightly complain they are forced into a Hobson's choice between career and child-rearing, because (aside from Scandinavian nations), few countries provide generous, paid maternity leave, and few companies are willing to re-engineer their high-pressure, "up or out" promotion systems.

<sup>14</sup> *EL FAH*, *supra*, at 211.

<sup>15</sup> *We Did It*, *THE ECONOMIST*, 2 January 2010, at 7 (emphasis added). [Hereinafter, *We Did It*].

<sup>16</sup> *See We Did It*, *supra*, at 49. The statistics presented are as of January 2010.

In contrast, if judged by the relatively low female participation rates in the labor force, then it appears the debate in most of the Islamic World, especially Arab Muslim countries, is stuck on the first issue: can and ought women to work outside the home? Put differently, does the emphasis in Islamic Law on the roles of a woman as a mother and wife mean that women are not to work outside the home? The resolute answer, which comes as a surprise to some Muslims and non-Muslims alike, is "no."

#### [B] No Prohibition

The *Shari'a* neither discourages nor prohibits women from active participation in the labor force. Indeed, the Qur'an consistently stresses "ordaining the good and forbidding the evil"<sup>17</sup> in a way that captures the strengths of each individual, whether male or female. More specifically, there exists no single passage in the Qur'an forbidding women from engaging in any type of employment outside of the home, with the possible exception of the position of head of state (a controversial topic discussed below).<sup>18</sup>

Across many generations and countries, including modern-day America, meeting the expenses of a family can require paid employment by a Muslim wife and mother. This need is even more compelling if a woman is divorced, widowed, or supporting extended family or elderly parents. There are three broad pieces of evidence supporting the proposition that Muslim women are permitted to be employed outside the home:

- (1) The Qur'an condones, albeit implicitly, work by women outside the home. One supporting passage lies in *Surah* 28, which is a Meccan *surah* focusing on the life of Moses. This *Surah* recounts a story of two daughters, who used to take care of the sheep owned by their family.<sup>19</sup> The fact that they work is not commented on in either positive or negative terms, but simply seems to be taken as normal.
- (2) The example of Asma'a bint Abū Bakr, the sister in law of Muhammad, who Muhammad does not rebuke for working. Asma'a used to work in the fields with her husband, raising horses, planting and harvesting crops, and carrying the crops in the traditional manner in containers on her head. On one occasion, Muhammad happened to meet her while she was working. He did not discourage Asma'a from continuing her work.
- (3) Muslim women are encouraged to seek out other women to address female specific needs. Indeed, Muslim women are required to seek out female doctors and nurses to address their needs unless a female doctor is unavailable. Obviously, it would be impossible for Muslim women in Muslim countries to consult female health care professionals if women were not allowed to work.

Thus, the issue under the *Shari'a* is not whether women can work outside the home, but rather what parameters exist for them to do so.

### [C] Three Criteria

Dr. Al Qaradawi articulates three criteria to which Muslim women must adhere when they choose outside employment. First, the work must not involve forbidden (*haram*) actions. Second, a woman must follow Islamic precepts on modesty. Third, she cannot abandon her responsibilities at home if she is the main caretaker of the family.<sup>20</sup>

The first criterion prohibits both men and women from engaging in any activity that ordinarily would be forbidden (*haram*).<sup>21</sup> Examples of *haram* jobs that specifically pertain to women include being a dancer and performing for the enjoyment of men, serving as a personal maid for an unmarried man whereby they are often left alone in the house, or working as a personal secretary to a man where it is inevitable the two of them would spend extended hours together alone. Other examples are working as a waitress or bartender, if that job requires frequent service and delivery of alcoholic beverages, or working as a flight attendant, if doing so obligates her to serve alcohol, and travel frequently for long periods of time, thus leaving her children and husband alone.<sup>22</sup> Without doubt, some Muslim men are cited for hypocrisy in that they employ non-Muslim women in these jobs — and, worse yet, sexually abuse such women. To this sad reality, which exists in some Gulf countries, it may be added that hypocrisy of this sort exists in many, non-Muslim countries. That is, women are exploited, and even trafficked for that very purpose, by men of a different religion, race, or ethnicity, and put into jobs by them for which they would not dare hire women of their own kind.

The second criterion also is universal, in that it applies to both Muslim men and women. Adhering to Islamic dress, behavior, and mannerisms is incumbent upon all Muslims, whether they work or not.<sup>23</sup> Consequently, for a woman, she must guard her modesty as commanded in the Qur'an in all aspects of her life, including during her interaction between colleagues. Note that Islamic dress requirements are not incumbent on non-Muslim women in the workplace. Yet, in Malaysia, some government offices have required non-Muslim Chinese and Indian women to wear a *hijab* (veil), and to cover their arms down to their wrists and legs down to their ankles. (Such a practice is an unwarranted extension of the *Shari'a* to these women.

The third criterion is that family consensus is required.<sup>24</sup> For a single woman with no obligations to a husband or children, the decision to work is left to her and perhaps her immediate family. But, if a woman is married, then her employment is a familial issue, and the family must be consulted. This criterion sounds like a potentially serious constraint on the freedom of Muslim women to work.

<sup>20</sup> *See* AL QARADAWI, *supra*, vol. 2 at 302-306.

<sup>21</sup> *See* AL QARADAWI, *supra*, vol. 2 at 302-306.

<sup>22</sup> *See* AL QARADAWI, *supra*, vol. 2 at 302-306.

<sup>23</sup> *See* AL QARADAWI, *supra*, vol. 2 at 302-306.

<sup>24</sup> *See* AL QARADAWI, *supra*, vol. 2 at 302-306.

Depending on the nature of her family, that indeed may be true. Some husbands and children may unreasonably demand that a woman stay at home. They may fear she will neglect their wants. They may be insecure about their own labor market value, and fret she will be highly-regarded by her colleagues and peers. Such dysfunctions are not unique to Muslim families. And, they may arise not because of religion, but because of male ego. (However, in an October 2009 Rockefeller Foundation/*Time* magazine poll, 9 out of 10 American men said they were comfortable with women earning a greater sum than them.<sup>25</sup>)

Such problems aside, however, the idea that a mother — as well as a father — ought to discuss her employment is common to many non-Muslim cultures. That is because, in non-Muslim as well as Muslim societies, the roles of a woman as a wife and mother are of utmost importance, regardless of whether she is the primary caregiver in her family. She is not to abandon these roles merely for employment that is not essential to the upkeep of her family. Conversely, so long as she is able to meet her obligations towards her husband and children, there is no prohibition in the *Shari'a* on her employment.<sup>26</sup> Manifestly, the challenge facing women cuts across religious boundaries: how can they best balance their roles as wives and mothers with their human need for creativity, self-expression, intellectual challenge, and contribution to society through jobs and careers?

### [D] Trend toward Reform

Progress in respect of the employment of women has been slow in the Muslim World, particularly the Arab Muslim World. The Kingdom of Saudi Arabia, which is among the most socially conservative Muslim countries in the world, is a case in point.<sup>27</sup> It is the only country with a ban on female driving. Yet even in the Kingdom, there are hopeful signs. In 2009, King Abdullah appointed the first female minister in the history of the Kingdom, Norah al-Fayez, who serves as Deputy Education Minister.<sup>28</sup> Ms. Al-Fayez is a veteran educational professional, and has worked closely with many of the elite females in the Kingdom promoting human and educational rights. The leading force in Saudi education reform is Prince Faisal, the Minister of Education, who is married to Princess Adila, a well-known human rights advocate.<sup>29</sup> Princess Adila is a leading force for women's rights and opportunities in Saudi, and also presses for modern education and health services, and the protection of children.<sup>30</sup>

Significantly, oil wealth may be one impediment to accelerating reforms concerning female participation in labor markets. A country not in possession of vast natural resources cannot afford to confine half of its labor force to the home. Labor, along with land, physical capital, human capital, and technology, is a key

<sup>25</sup> *See* Female Power, *THE ECONOMIST*, 2 January 2010, at 49-50.

factor of production. Its efficient employment is an essential source for economic growth. As long as a country can live off natural resource endowments, it does not face the same degree of pressure to maximize the productive use of its labor pool as do resource-poor countries. (Of course, in some resource-rich non-Muslim countries, such as Canada and Russia, women play a major role in the labor force.) Leaders in Gulf countries are well aware their supply of oil is not infinite, and know oil-consuming countries seek to curtail demand for fossil fuel energy sources. In turn, these leaders appreciate the prospective role women can — and, indeed, will need to — play in the long-term economic growth of their countries.

## § 37.04 WOMEN AS HEADS OF STATE

### [A] Arguments Based on Qur'ān and Ḥadīth

Can a Muslim woman serve as leader of a country? Table 37-1 reveals many women — including Muslim women — around the world have served as heads of state. Similarly, women occupy a range of political offices below the level of head of state. For example (as of January 2010), roughly 40 percent of legislators in Norway are women.<sup>31</sup> In November 2008, the New Hampshire State Senate became the first legislative body in America to have a majority of women (13 out of 24 State Senators).<sup>32</sup> There appears to be no pattern of religious discrimination against women holding the senior-most political office. Rather, differences reflect cultural and social mores across countries.

The first and most important point in addressing the issue is that no Qur'ānic passage or ḥadīth text prohibits a woman from any position of leadership, except as a leader of mixed, congregational prayer.<sup>33</sup> Even in respect of serving as an *imām*, that is, as a leader of prayer, women have on occasion played this role, albeit in cosmopolitan venues like New York, and to the horror of some traditionally-minded adherents to Islam.

As to leading a country, religious and legal scholars (*ulema* and *fukahā'*, respectively) who argue women cannot serve in this capacity typically cite *surah* 4, *ayah* 34 of the Qur'ān, specifically the passage to the effect that “men are protectors and maintainers of women.” They argue that this passage prohibits women from leading a country. After all, if men protect and maintain women, then surely the top governmental post to execute this role is the chief of a country.

This argument is unpersuasive. First, the inference drawn from it is overly broad. Even if the text is taken at face value (and not in the vein Dr. Laleh Bakhtiar advocates in her translation, *The Sublime Qur'ān*), it does not preclude women from playing a complementary role. They, too, can protect and maintain men. The reality is they do so, everyday, all around the world, in a variety of ways. Moreover, many *ulema* and *fukahā'* find the analogical reasoning (*qiyās*) on which

the prohibition is based to be inconclusive.

In particular, Muslim scholars who argue against any prohibition on women serving as heads of state examine the reasoning for the revelation of *surah* 4, *ayah* 34.<sup>34</sup> They focus on the Arabic word “*qiwamah*,” which the Qur'ān uses and means “protector” or “maintainer.” That is, “*qiwamah*” refers to responsibility for being the overall head or leader of a household. Traditionally, this superior position is assigned to a man (*e.g.*, the husband and father). Scholars contend “*qiwamah*” concerns the particulars of family life and role differentiation between females and males such that a husband and wife have complimentary roles in maintaining their family.<sup>35</sup> The question is whether some differences in roles can be translated beyond the household? Some scholars say “yes.” But, how far beyond the household is it reasonable to draw an analogy? Some scholars argue role differentiation based on “*qiwamah*” extends from the household to a country. On this basis, they leap to the conclusion women are not to serve as heads of state.

This analogical reasoning (*qiyās*) is parlous at best. Indeed, the further from the household an analogy is drawn, the more parlous it is. Even if the analogy is accepted, the fact remains there is no Qur'ānic text specifically speaking to the question of, and excluding women from, headship of state.<sup>36</sup> With no sound textual basis, what other sources of the *Sharī'a* exist for a ban on women from the top governmental post?

There is one *ḥadīth* from which some *ulema* and *fukahā'* deduce a prohibition on Muslim women leading a country. As compiled by *Imām* Bukhari, Abū Bakra narrates:

During the battle of Al-Jamal, Allāh benefitted me with a Word (I heard from the Prophet . . .): When the Prophet . . . heard the news that the people of Persia had made the daughter of Khosrau their Queen (ruler), he said, “*Never will succeed such a nation as makes a woman their ruler.*”<sup>37</sup>

The final quotation from Muhammad is the specific basis some scholars use for the exclusion. However, the infirmity of that argument is readily apparent.

First, consider the literal meaning of the statement. The Prophet is not forbidding a woman from being a ruler. To view the statement otherwise is to over-generalize its plain meaning. Rather, he is making a prognostication. He is asserting that a country that does make a woman a leader will not succeed. Moreover, the context of his prediction is battle. Thus, he may well mean to exclude only success in battle, but not success in other realms, such as economic growth or cultural development.

Second, looking at the nuances of the key passage, there are scholars who disagree with the common interpretation of this *ḥadīth*. They argue the specificity

<sup>33</sup> See GENDER EQUITY, *supra*, at 38.

of the occasion is the motivating factor behind the statement of Muhammad.<sup>38</sup> At the time this *hadith* was spoken, the Persian rulers were enemies of the Prophet. Accordingly, some scholars regard this statement as recognition of the "impending doom of [the] unjust empire,"<sup>39</sup> not a generic utterance on the permissibility of women to serve as heads of state. Even if this *hadith* were to be taken generally, it would not invoke automatically a ban on women as leaders in every instance. Again, the context is battle. Thus, as with the Qur'ān, there exists no *hadith* that provides conclusive evidence to support an exclusion of women from the position of head of state.

### [B] Other Arguments

What, then, is the next line of support for a prohibition from headship of state? Some scholars respond by justifying it on the basis that women cannot lead a mixed congregational prayer.<sup>40</sup> That is, some scholars hold that because of the

format of the Muslim prayer and its nature, it is not suitable for women to lead a mixed congregation.<sup>41</sup>

However, for three reasons, this argument lacks cogency.

First, leading prayer is a purely religious act. Leading the state is political act. There is no obvious analogy between the two tasks.<sup>42</sup> Even if women are excluded from leading prayer, it does not simultaneously exclude them from engaging in leading a country. Moreover, women are excluded from prayer during their menstrual periods. Does that mean a woman head of state would be forbidden from leading a mixed congregation approximately one week every month? In other words, is the underlying concern of some scholars an old-fashioned male stereotype that the monthly cycle of a woman renders her at least temporarily incapable of responsibilities? If so, then surely the positive evidence everyday in the public sphere around the globe puts paid that concern.

Second, the general rule as to whether a woman may lead prayer is not a prophylactic ban. In a one *hadith*, it was related that the Prophet asked a woman, Um Waraqah, to lead her household in prayer.<sup>43</sup> Her household consisted of a young girl, a young boy, and a *muezzin* (caller to prayer, who is always a male).<sup>44</sup>

Third, looking to Islamic history, there are two prominent examples of women in high positions in a Muslim state. Um Salamah, one of the wives of the Prophet, served as the equivalent of "Chief Advisor" to the head of state.<sup>45</sup> Under the Caliphate of 'Umar (634-644 A.D.), the second of the *Rashidun*, Um Al-Shifaa' bint

<sup>44</sup> See GENDER EQUITY, *supra*, at 40.

<sup>45</sup> See GENDER EQUITY, *supra*, at 40.

Abdullah served as the marketplace advisor, or what would be called in modern times the Director for Consumer Protection. Moreover, without hesitation, *Imām* Abū Hanifa and Al-Tabarī derived from Islamic texts that a woman may be appointed to the position of *qāḍī* (Islamic judge).<sup>46</sup>

To be sure, these examples are of positions below that of head of state. Yet, consider Abū Ya'la' ibn Al-Farrā' (990-1065/1066), a prominent Islamic jurist and *qāḍī*, and a *Ḥanbalite* scholar from Baghdad who authored an authoritative work on forbidding wrong in Islamic thought.<sup>47</sup> He compiled a list of qualifications for head of state based on the *Sunnah* of the Prophet, specifically, the *ḥadīths*. Being male was not on his list.<sup>48</sup>

### [C] Apprehension

Despite the dubious justifications for claiming the *Shar'ia* forbids women from serving as head of state, the claim still is made. Why? The short answer seems to be "apprehension." In Islamic tradition, the office of head of state is not simply a ceremonial post.<sup>49</sup> The head of state sometimes leads public prayers, including the Friday (*Jum'a*) prayer, and travels to negotiate with officials of other states, most of whom are men.<sup>50</sup> Women cannot lead public mixed congregational prayers. And, foreign diplomacy entails confidential meetings, which means a female head of state could be alone with another man for an extended period of time.<sup>51</sup> There is apprehension, then, that traditional Islamic guidelines on interaction between the genders may be compromised.

Insofar as apprehension on this matter is a concern, surely it is a paternalistic and patriarchal one. It amounts to little more than saying "an adult woman who is the leader of a country cannot be trusted to be in a room alone with a man from another country." The statement is not even specious, in the sense of being superficially plausible but actually erroneous. It is flat wrong. Moreover, were the statement true, then the slippery slope would be obvious: the "justification" could be used to keep women entirely out of the public sphere when men are or could be present. Finally, it may well be that retaining a male monopoly on political power is the real, underlying apprehension concerning women serving as heads of state. Certainly, there are *bona fide* considerations of Islamic culture to respect if and when a Muslim female head of state meets with her male counterparts. But, none of them justifies barring women from appointment to the top political office. As long as a Muslim woman can perform her head-of-state functions in accordance with the *Sunnah*, and not compromise her familial responsibilities, there appears to be no credible reason to prevent her from doing so.

Dilma Rousseff	Brazil	President	1/1/2011 — incumbent	Roman Catholic (former Atheist)

## § 37.05 MUSLIM FEMINISM

### [A] Not Monolithic

There are feminists in the Muslim world. Indeed, there is not one feminist movement, but several, among Muslims. Indeed, the feminist movement in the non-Muslim world hardly is monolithic. Many Muslim feminists understandably are not content to let western, non-Muslim feminists speak for them, and they do not all define feminism in the same way as their non-Islamic counterparts.

For example, some of them take traditional views on the rights of women in the private and public spheres, and seek a good accommodation between women and men. Pointing to *surah* 33, *ayah* 5 of the Qur'an, they emphasize that equality between men and women is inherent in Islam as a religion and the *Shari'a* as a legal system. In that verse, God (Allāh) addresses both women and men, and makes clear that when they are judged upon their death, they are judged equally, by the same criteria. Women do not stand in a diminished position vis-à-vis men, in this life or the next one.

Certainly, Muslim feminists acknowledge there are passages in the Qur'an that outline different obligations and spheres of responsibility here on earth for men and women, ones that generally suggest men are to care for the public sphere and support the household, and women are to be supported and care for the household. Even still, Muslim feminists say that these differences in spheres of responsibility do not mean they are unequal in the eyes of Allāh or under the *Shari'a*. Moreover, they argue that the differences in spheres do not restrict their freedoms. The various passages simply mean their responsibilities, as women, are different. Non-Muslim feminists might not agree with this interpretation, but it is prudent to bear in mind Muslim feminists are annoyed, even insulted, if a non-Muslim feminist asserts Islam is an innately chauvinistic faith.

### [B] Controversial Thesis of Irshad Manji

One Muslim feminist — Irshad Manji — has provoked considerable controversy. Hers is a strong, contrasting example to more traditional strains of feminism. Her key work, published in 2003, is *The Trouble with Islam Today: A Muslim's Call for*

*Reform in Her Faith*.<sup>53</sup> Ms. Manji is both openly lesbian and devoutly Muslim, and takes her personal relationship with God (Allāh) seriously.

She migrated as a 4 year old from Uganda, and grew up in Vancouver, Canada. Her childhood was shaped by a strict, abusive father and his "commitment" to Islam. While her family was Muslim, initially they put her in the babysitting program at a local Baptist church, because it was free. In that program, her teachers encouraged her to ask questions and explore stories. She did so, and the program gave her the award of "Most Promising Christian of the Year." The award angered her father, who snatched her out of that environment and plunked her in a *madrasa* (Islamic religious school) as a pre-teen. The new school mandated head-coverings for girls and screens to separate them from boys, and conceded little space for questions. Gone were the colorful books and creative environment. She was rewarded for reciting from memory the Qur'ān, not discussing it. Eventually, she left the *madrasa*, becoming a journalist in Canada for Queer Television.

While Ms. Manji addresses many issues in her book, the most provocative questions she asks of her fellow Muslims, and of non-Muslims, are:

- (1) Why has mainstream Islamic doctrine stagnated in medieval, tribal interpretations of the faith?
- (2) Why has this stagnation been accepted, or deemed acceptable?

To Ms. Manji, the problem with Islam today is it has become ossified, and this rigid, unprogressive *status quo* actually is revered to the point that questioning any precept is tantamount to religious betrayal and political treason. She asks these questions in three contexts: People of the Book (*ahl al kitāb*), women and homosexuals, and *ijtihād*. Manifestly, these two questions and three contexts are controversial. They have provoked both support and opprobrium from Muslim and non-Muslims alike.

#### • The People of the Book

The Qur'ān says there can be no inconsistencies in it (*surah 4, ayat 82*). Hence, it must supersede other — inconsistent, errant — religious texts. Ms. Manji argues there are contradictions in the Qur'ān. One contradiction, she says, is between

- (1) The assertion of Islam as the only one, true faith (*surah 3, ayah 19*), and
- (2) The declaration that People of the Book can be saved (*surah 2, ayah 62*, and *surah 5, ayah 69*), and that there should be more than one religion so that human beings feel an incentive to compete in good works.<sup>54</sup>

Significantly, the "Pact of 'Umar" which dealt with non-Muslim conquered peoples, was not part of advanced, Islamic Golden Age thought whereby Muslims and Jews interacted well, or even tolerantly. 'Umar was the second of the *Rashidun* Caliphs, and the Arab-Islamic Empire expanded greatly under his Caliphate to include a large number of *dhimmis* — non-Muslims.

<sup>53</sup> See IRSHAD MANJI, *THE TROUBLE WITH ISLAM TODAY: A MUSLIM'S CALL FOR REFORM IN HER FAITH* (New York, New York: St. Martin's Griffin, 2003). [Hereinafter, MANJI.]

<sup>54</sup> MANJI, *supra*, at 39.

The terms of the Pact of 'Umar, included:

- (1) A duty to differentiate yourself.
- (2) A duty to wear a girdle over your garments
- (3) Your headgear had to be specifically marked.

Thus, Ms. Manji entitles the Chapter in which she describes the Pact of Umar, "When Did We Stop Thinking?"<sup>55</sup> She does so because it was at this time in Islamic history that it became dangerous, from a political standpoint, to disagree with the leadership.

#### • Women and Homosexuals

Ms. Manji reminds readers that Khadija, the wife of the Prophet, was a businesswoman who employed Muhammad, then proposed to him and married him, and then became the first convert to Islam. Ms. Manji also points out that Israel is the only place in the Middle East in which there is an annual gay pride parade. Yet, she argues, the Pact of Umar still is in effect in Muslim areas of Israel, like around the Dome of the Rock. When she tried to go to visit the Dome of the Rock without a male escort, she argued with a fellow Muslim about getting in. She needed an Israeli police officer escort, and had to wear a girdle over her clothing, to get in.

#### • Operation *Ijtihād*

Because the Qur'ān is the latest and greatest revelation from Allāh, and because Muhammad is his most important Prophet, Islam from within is seen as the perfected religion. This superiority has translated into the calcification of interpretation. Anything that may potentially conflict with the Qur'ān or *hadith*, even on matters subject to historical verification or proof by the scientific method, is viewed as heretical by an established religious authority. This kind of reasoning has deleterious consequences. Notably, it has led to poor educational standards and achievement levels, which in turn contribute to egregious human rights abuses in most of the Muslim world.

Ms. Manji argues it is time for Muslims and non-Muslims everywhere to challenge this *status quo*. By indulging power structures that condone violence against women and institutionalize discrimination (with leading examples being Northern Nigeria, Saudi Arabia, and Sudan), the non-Muslim western world accepts these practices as legitimate exercises of faith. The acceptance may not be overt, and indeed be covered with condemnatory rhetoric. But, it is at least a *de facto* acquiescence. Ms. Manji cites several cases in which positive steps have been made, including an outpouring of support for Muslims in North America after the 11 September 2001 terrorist attacks, and micro-loan initiatives like the Grameen Bank. Regrettably, they do not address the policies that injure the people within Muslim countries.

In respect of all three contexts, it may be asked whether Ms. Manji ultimately is writing to reconcile her faith with the atrocities committed in its name in the

<sup>55</sup> See MANJI, *supra*, at 48-70.

modern era. Is Islam the reason women are treated as perpetual minors or chattel in Muslim societies? "Yes and no," she concludes. The Fundamentalist approach to the *Shari'a*, which she contends is based on tribal traditions of the Arabian desert where Islam was born, is the seed for saying "yes." But, Fundamentalism is not the only alternative. Muslims can invoke Islam, if they choose to do so, to demand human rights, because God says so, in that He is the source of those rights. Moreover, non-Muslims have the responsibility to support and hold recalcitrant Islamic leaders accountable for their human rights violations, whether or not they are done in the name of faith.

The long-term solution is a simple one: get people in the Muslim world to think, to question, and to debate. Better education, coupled with the will to break out of the tribal-leader-is-always-right mentality, is essential. This solution requires a re-opening of the Gate to *Ijtihad*, a move Ms. Manji strongly advocates. Manji would agree with scholars like Professor Wael B. Hallaq (1955-), who argue the Gate to *Ijtihad* never was closed, or if it was, then it should be reopened. That is because *ijtihad* is needed to deal with subjects like the empowerment of women, free speech and free media, and liberalizing rules on the *Hajj*. More generally, she asks, without *ijtihad*, how can common people and intellectuals alike be liberated from the endless imitation of the past?

The establishment Ms. Manji challenges will not cede religious or secular power easily. The June 2009 response of the Iranian government to elections — in effect, a *coup d'état* — is a case in point. The reality is that like the *madrasa* of Ms. Manji's childhood, most Muslim societies are closed, segregated, and allow little room for dissent.

## PART TEN

### FAMILY LAW AND CHILDREN

## Chapter 38

### REARING CHILDREN

---

Peace will come when the Arabs will love their children more than they hate us.

Golda Meir (1898-1978),  
4th Prime Minister of Israel (1969-1974),  
Statement at National Press Club, Washington, D.C., 1957

#### SYNOPSIS

§ 38.01 ACKNOWLEDGEMENT OF PARENTHOOD

§ 38.02 FATHER'S DUTY TO PROVIDE MAINTENANCE

§ 38.03 MOTHER'S RIGHT TO CARE (ḤAḌĀ NA)

§ 38.04 FOUNDLING (LAḲĪṬ) AND ADOPTION

#### § 38.01 ACKNOWLEDGEMENT OF PARENTHOOD

In respect of children, Islamic Family Law contains the doctrine that "the child belongs to the marriage bed."<sup>1</sup> In Arabic, this doctrine is known as "*al-walad lil-firāsh*." Professor Schacht explains this doctrine corresponds to, and entered the *Shar'ā* from, the same Roman Law maxim: *pater est quem nuptiae demonstrant*. This expression means "*the father is who the marriage shows*."<sup>2</sup> Here, then, is an illustration of transmission into Islamic Law of a Roman Legal concept through educated non-Arab converts to Islam who were schooled in the liberal Hellenistic tradition, which including training in law and oratory. Essentially, the doctrine creates a presumption that a child is legitimately born to a properly married couple.

---

<sup>1</sup> See JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW 21 (Oxford, England: Oxford University Press (Clarendon Paperbacks) 1982). [Hereinafter, SCHACHT.]

<sup>2</sup> Literally, "*pater*" is the masculine, singular, nominative (subject) case, and means "father." "*Est*" is the third person, singular, present tense verb for "to be" (i.e., he/she/it is). "*Quem*" is the masculine or feminine, singular, accusative (direct object) case, and means "which," "who," or "whereby." "*Nuptiae*" is the feminine, plural, nominative (subject) case, and translates as "marriage," "wedding," or "nuptials." "*Demonstrant*" is the third person, plural, present verb for "indicate" or "show."

The complete phrase is: "*Mater semper certa; pater est nuptiae demonstrant*," which means "*The mother is always certain; the father is who the marriage vows indicate*." The phrase embodied an important principle in Roman Law. Children, specifically sons, were entitled to inherit the wealth of their father. Medically speaking, the mother was seen as a vessel for the seed of the father. The father was viewed as the necessary or important actor in engendering children. Conversely, women in the Roman Empire often were confined to the shadows of society, not allowed out for fear another man might seduce them, and they subsequently might bear the children of an imposter.

Related to this doctrine is a rule about acknowledgement of paternity. According to the *Shari'a*, the duration of pregnancy is said to be from six months to two years.<sup>3</sup> Obviously, the duration does not refer narrowly to the time a child grows and develops in the womb of the mother. Rather, the duration is relevant to the acknowledgment of paternity. In turn, paternity, or more generally, the question of whether a child is legitimate or not, has implications for inheritance. Professor Hussain explains:

[C]hildren have a right to know their parents and to be cared for and maintained during infancy and to inherit from parents after their death. Only the natural mother and father of a child can be acknowledged as his or her parents, since adoption is recognized [as explained below]. The status of legitimate children is different from that of illegitimate children, who have no claim upon their natural father. As illegitimacy has severe consequences in the Islamic world, some latitude has been allowed by the jurists in calculating the term of pregnancy. *The minimum term of pregnancy, according to most of the scholars, is six months, and the maximum term allowed by them has varied from nine lunar months according to some of the Shias to five years according to others. Some count the term of pregnancy from the time of the marriage contract rather than the date of consummation of the marriage.*<sup>4</sup>

This account indicates the range for duration of a pregnancy is wider than Professor Schaacht reports.

In the event his marriage is dissolved, a husband must acknowledge as his own child a son or daughter born to his ex-wife within two years from that dissolution. Suppose the husband refuses to recognize as his own a child born to his ex-wife during the six months-to-two year period. He might be guilty of *kadhif* (falsely accusing his wife of unchastity). Thus, the period functions not only as a paternity recognition rule, but also protects the mother, and by extension, the child.

### § 38.02 FATHER'S DUTY TO PROVIDE MAINTENANCE

As Professor Hussain states:

[i]t is the parents' duty to care for children and to bring them up to be responsible and God-fearing.<sup>5</sup>

This statement illustrates a universal point: upbringing of a child, including religious education, is a responsibility of the mother and father. In no family, Muslim or non-Muslim, is it shared exactly equally. Each parent contributes unique strengths to child-rearing. As a child grows, the nature of the respective contributions changes.

<sup>3</sup> See SCHAACHT, *supra*, at 166.

<sup>4</sup> JAMILA HUSSAIN, *ISLAMIC LAW AND SOCIETY — AN INTRODUCTION* 81 (Annandale, New South Wales, Australia: The Federation Press, 1999) (emphasis added). [Hereinafter, HUSSAIN.]

<sup>5</sup> HUSSAIN, *supra*, at 79.

According to Islamic Family Law, it is the father who has a general duty to provide for the maintenance of his child.<sup>6</sup> He must do so until the child becomes an adult, or in the case of a daughter, until she is married. The paternal grandfather must step in and assume this duty of maintenance if the father is unable to fulfill the duty. Only if the child has no male relatives does the duty of maintenance switch to the mother.

What does "maintenance" entail? The answer is not limited to food (*i.e.*, adequate nutrition), clothing (*i.e.*, appropriate garments), and shelter (*i.e.*, a dwelling place). It includes education, kind treatment, and love. The parents, particularly the father, must provide maintenance to the best of his ability. In Muslim and non-Muslim cultures alike, truly engaged fathers sacrifice personal goals and desires to advance the interests of their child. For such fathers, the existence of an independent legal obligation to maintain their child is superfluous. They would think it unthinkable not to do so.

Of critical importance is that the duty of maintenance is owed equally to all children. Professor Hussain observes:

Children should be treated equally by their parents. According to [a] *hadith*, a man of the Ansar proposed to accede to his wife's request to give a garden or a slave to one of his sons and asked the Prophet to be a witness to the transfer. The Prophet inquired whether such gifts were being made to the other sons, and on being informed that they were not, refused to be a witness saying that he would not be a witness to injustice.<sup>7</sup>

Equal treatment as to maintenance applies to daughters as well as sons. A father is not to discriminate between or among multiple daughters, nor is he to prefer a son to a daughter.

For example, it would be incongruous with his duty to provide maintenance to his children to allocate high-protein foods to his son, but not his daughter, and to sponsor the son, but not the daughter, for a tertiary education, when he has the means to provide excellent nutrition and schooling for both kids. The excuse, then, sometimes heard in the Muslim world that providing a daughter with an advanced education makes little sense because she will get married is nothing more than old-fashioned male chauvinism, which constrains the progress of women, but which has no basis in the *Shari'a*.

Is there any exception by which a child may be favored in respect of maintenance? Other than differences owing directly to gender (*e.g.*, different clothes for boys and girls, or enlisting services of different health care specialists for boys versus girls), there is one exception. It concerns disability.<sup>8</sup> *Imām* Hanbal argued a child with a handicap or other unique circumstance may be afforded special treatment.

<sup>6</sup> See HUSSAIN, *supra*, at 79-80.

<sup>7</sup> See HUSSAIN, *supra*, at 79-80.

<sup>8</sup> HUSSAIN, *supra*, at 79 (citing Yusuf Al-Qaradawi, *The Lawful and Prohibited in Islam* 230-231 (1989)).

<sup>9</sup> See HUSSAIN, *supra*, at 80.

Is the right of a child to maintenance absolute or conditional? A child has a claim to maintenance only if he or she is poor, and such a claim would be against the father.<sup>10</sup> Thus, the right is contingent. It would seem, then, that an impoverished child could bring a legal action against his or her father for maintenance, and the action would be brought by the mother. Conversely, neither parent has any right of ownership or usufruct (i.e., use or enjoyment short of destruction) in the property of their child. Thus, for example, even though a father (or grandfather) can act on behalf of his child, he cannot enter on the child's behalf into a transaction that is disadvantageous to the child. Lending the property of the child, or abandoning a legal claim held by the child, would be illustrations of disadvantageous transactions. However, a son or daughter who is of the age of majority, and who is not poor, is obliged to provide for the maintenance of his or her parents.<sup>11</sup> This obligation lies equally on sons and daughters.

From the perspective of a child, then, the child has a right to maintenance. It is the correlative of the duty of the father to provide that maintenance. What is the correlative right of the father, given that it is his duty to provide maintenance? The answer is he is entitled to respect, as Table 38-1 indicates.

Table 38-1:  
Correlative Rights and Duties of Father and Child

Duty—Right Set	Duty to Provide Maintenance	Right to Respect (Obedience)
Party	Duty of Father	Duty of Child
	Correlative right of Child	Correlative right of Father

"Respect" entails obedience of children to parents. Of course, the breadth and depth of this obedience varies from family to family, and culture to culture. Traditionally among families in Saudi Arabia, parents guide the selection of, and even arrange, partners for the marriage of their children, and make decisions about the educational and professional specialties of them.<sup>12</sup> However, in other Muslim countries, and among Muslim communities in non-Muslim countries, obedience to that degree would be regarded as overly officious parental behavior. Indeed, the trend may well be turning even in the Kingdom. That said, the father (and mother) is entitled to expect help in their old age from their child. In other words, part of the right of respect owed to the father in return for maintaining his child is to receive assistance later in life. That is true, also, of the mother in return for the care she provides to her child in her old age.

Can a father (or, for that matter, mother) force respect by violence? Put directly, is it permissible under the *Shari'a* for a parent to beat his child? Professor Hussain answers:

There is a *hadith* to the effect that children should not be struck with a cane before they have reached the age of 10, but reason and guidance are

<sup>10</sup> See SCHACHT, *supra*, at 168.

<sup>11</sup> See SCHACHT, *supra*, at 168.

<sup>12</sup> See SORAYA AL-UTHAYBI, *WOMEN IN SAUDI ARABIA: IDEOLOGY AND BEHAVIOR AMONG THE ELITE* 72 (New York, New York: Columbia University Press, 1986).

preferable means of discipline.<sup>13</sup>

The first clause gives little protection against child abuse. It implicitly authorizes corporal punishment, and regulates only the means in relation to age. The second clause is heartening, and reflects the approach of most Muslim and non-Muslim families alike.

### § 38.03 MOTHER'S RIGHT TO CARE (HADĀNA)

Distinct from the duty of a father to maintain his children until they are adults (or until a daughter is married) is the right of a mother to care for her children in their early years. Professor Schacht reports that, as a general principle in the *Shari'a*, parental rights of the mother of a young child are stronger than those of the father.<sup>14</sup> He further observes this principle holds until a boy is 7 years old, or in some instances, 9 years old, and until a girl comes of age (i.e., has her first menstrual period).<sup>15</sup> There is less uniformity as to the cut-off ages than Professor Schacht implies. Professor Hussain states:

There is a presumption in Islamic Law that it is for the benefit of a small child to remain with its mother. This is called *hadhanah*. The age at which *hadhanah* ceases varies between [sic] the [Four Sunnite] Schools, and also with the sex of the child, but the very minimum age is two years, and according to the Maliki School the right of *hadhanah* in relation to a daughter lasts until she is married. Once a child has reached the age of discretion, he or she may choose which parent he or she wishes to live with.<sup>16</sup>

In practice, then, the mother holds the right to care for a child, which in Arabic is known as "*hadāna*." Observe that "*hadāna*" actually entails two specific rights: the right of custody of a child, and the right to rear (in the sense of actual care of) a child.

Note, too, the *hadāna* right of the mother does not affect the guardianship of the father.<sup>17</sup> Guardianship (*wilāyah*) and custody (under *hadāna*) are distinct legal concepts and rights.<sup>18</sup> Throughout the childhood period, the father remains the legal guardian of the child. (If there are no prospective legal guardians available, then a *qādi* (Islamic judge) will appoint one to protect both the child and his or her property.<sup>19</sup>) That is true regardless of which parent, in fact, has custody of the child. Consequently, the father has control over the property of the child. He can enter

into contractual transactions involving that property of the child, and even incur debts, on behalf of that child.

As to rearing a child, what does "care" entail? Muslim religious and legal scholars (*ulema* and *fukahā*, respectively) have focused their attention on breast-feeding. Professor Hussain explains:

According to the scholars, it is the mother's *religious duty* to suckle her baby in accordance with the Quranic rule that "the mothers shall suckle their offspring for two whole years . . . [quoting *surah* 2, *ayah* 233]." The *Hanafis* and *Malikis* agree that a woman can be compelled to feed her baby, unless of course, she is physically unable to do so, and the *Shia* also agree with this position, with the exception that a woman may hire a wet nurse as a substitute if she wishes. The *Hanbalis* say that it is the duty of the father alone to provide for feeding the baby.<sup>20</sup>

Of course, as part of his duty of maintenance of his children, the father must provide the necessary support for his wife to breast-feed, or the funds to hire a wet nurse. Beyond nursing a child, "care" would entail all of the support, within the ability of the mother, necessary for the child to be healthy in the broad sense of the term.

Viewing breast-feeding as a religious obligation is an example of a general theme in the *Shari'a*, namely, the inseparability of law and religion. Children are a gift from God (Allāh). It is only logical a mother would take care of this precious gift by nursing if she is physically able to do so. Many non-Muslims, including Catholic Christians, would accept this logic. But, they would not write that logic into law. That is, a duty to breastfeed is not part of Family Law in the United States, because that law is secular in its basis. Grounded on Islam itself, Islamic Law contains that duty.

What happens to the right of *hadāna* if, tragically, the mother dies before the relevant cut-off age of her child, or otherwise is unable to care for the child before that age because of a physical or mental infirmity? Then, *hadāna* would not pass to the father. Rather, that right would pass to the nearest female relative of the mother, and if none, then the nearest female relative of the father. The specific hierarchy of custodians following the mother, as set out by *Imām* Ibn Juzayy Al Kalbi (1321-1357 A.D.), is:<sup>21</sup>

- Maternal grandmother
- Maternal aunt
- Paternal grandmother

<sup>20</sup> HUSSAIN, *supra*, at 80 (emphasis added).

<sup>21</sup> See Doi, *supra*, at 331-332 (quoting Juzayy Al Kalbi).

Juzayy Al Kalbi (1321-1357 A.D.), whose full name was "Abū 'Abdallāh Muḥammad ibn Muḥammad ibn Ahmad ibn Juzayy Al Kalbi," was a scholar of law and history, and a poet. He is renowned for his book on the comparative jurisprudence of the Sunni Schools, *Qawānīn al-Fiqhiyyah* (The Laws of Jurisprudence), his *tafsir* (interpretation) of the Qur'ān, his book on Islamic legal theory, *Aqrab al-Wasool 'ilā 'Ilm al-Usool* (The Nearest of Paths to the Knowledge of the Fundamentals of Islamic Jurisprudence), plus a treatise on Sufism called *The Refinement of the Hearts*. See [http://en.wikipedia.org/wiki/Ibn\\_Juzayy](http://en.wikipedia.org/wiki/Ibn_Juzayy).

- Great grandmother (however remote she is)
- Sister
- Paternal aunt
- Brother's daughter
- The best of the relatives of the parents on either side.

Any person in this order may be skipped if they are unfit for custody. Custodial rights remain with the relative in question until the child passed the requisite age. After the cut-off age, the *hadāna* right switches to the father of the child.

However, at anytime before these cut-off points, there are four grounds on which the mother loses her *hadāna* right. First, abjuring Islam, that is, apostasy, is one basis. Juzayy Al Kalbi describes this ground as a "paucity of *dīn*. . . ."<sup>22</sup> Obviously, this basis is a significant infringement on the freedom of religion of the mother.

Second, if the mother enters into a marriage with another man, other than a *mahram* of the child, i.e., a close relative of the child who is within the forbidden degrees of marriage with respect to that child, then she forfeits her *hadāna* right. Juzayy Al Kalbi further explains that if the mother re-marries, but then divorces, she does not regain her *hadāna* right in respect of her child from the prior marriage.<sup>23</sup> Professor Hussain articulates why marrying someone who is not related to the child causes forfeiture, and how Malaysian courts handle such cases:

This . . . reason appears to have been based on fears that a step-father might abuse the child, but the approach of the courts, in Malaysia at least, is to decide whether the welfare of the child is best served by leaving him or her with the mother regardless of her remarriage.<sup>24</sup>

Nonetheless, the possibility of forfeiture is a strong incentive against divorce and re-marriage. Yet, it can have the regrettable consequence of imposing on a woman a dilemma between staying in an abusive marriage yet retaining her right to care for a child she loves, or extricating herself from the abuse by losing that right.

Suppose, however, that divorce is initiated by the husband, who irrevocably divorces her (through a three-fold pronouncement of *talāk*). The wife retains custody over and the duty to care of the child.<sup>25</sup> If she is unable to fulfill her responsibilities, then custody moves to other female relatives. Moreover, the wife has a right to payment from him for breastfeeding her child for a period of up to two years.<sup>26</sup>

The other two grounds for forfeiting the *hadāna* right are clearly aimed at protecting the best interests of the child. The third basis is ill treatment by the mother of the child. If she is abusive, then it is proper to deprive her of her custodial

<sup>22</sup> See Doi, *supra*, at 332 (quoting Juzayy Al Kalbi).

<sup>23</sup> See Doi, *supra*, at 332 (quoting Juzayy al-Kalbi).

<sup>24</sup> HUSSAIN, *supra*, at 81.

<sup>25</sup> See Doi, *supra*, at 331.

<sup>26</sup> HUSSAIN, *supra*, at 80.

and care rights. The fourth basis is absconding with the child. That is, if the mother moves far away from the father without his permission, so that the father cannot contact the child, then she loses her right to care for that child. The exact distance considered "too far" is uncertain. Juzayy Al Kalbi identifies three possibilities: one postal stage (*i.e.*, about 12 miles), six postal stages (*i.e.*, 72 miles), or one day's journey.<sup>27</sup> But, as he wrote in the 14th century, these benchmarks may be inappropriate in today's world.

Suppose the father moves away, perhaps for a better job than he currently has, but the mother prefers to stay put? Juzayy Al Kalbi also sets out the following ruling:

If the father or another of the guardians of the child takes up residence in a city which is not the mother's city, then he has the custody of his children and not her, and he will move them with him *if he is trusted with them*, unless he is contented with the person who has custody to take them with him [or her] wherever he goes.<sup>28</sup>

At first glance, this ruling is puzzling. It seems to create a presumption that if the father moves and mother seeks to stay put, the presumption of custody switches to the father. However, the key phrase (*italicized*), suggests that custody stays with the mother.

What about an illegitimate child, one born out of wedlock, *i.e.*, to parents not married to each other? Likewise, what happens to a child whose paternity is contested by the purported father (the lawful husband of the mother), who claims *li'ān* (unchastity) by the mother as a ground for dissolution of the marriage? Do such occurrences provide yet another ground for forfeiture? The answer is "no." The mother retains her right to provide care (*ḥaḍāna*). That is, maintenance of the child remains the responsibility of the mother.

Given that a mother potentially could forfeit her right to give care (*ḥaḍāna*) were she to enter into a subsequent marriage with a *mahram* (nearby relative) of the child, Professor Schacht observes that this right is not also a duty.<sup>29</sup> His observation reflects a point made by Juzayy Al Kalbi, namely:

There is a difference of opinion as to whether custody is a right of the custodian, which is the well known position, or those being cared for, and on the basis of that whether if the one whose right it is drops it then it is dropped.<sup>30</sup>

As a legal matter, classification of *ḥaḍāna* as a forfeitable right may be accurate. But, as a practical matter there is a correlative right — duty set. That is, there is a duty that is correlative with the right of the mother to give care. She has a duty to give that care.

<sup>27</sup> See Doi, *supra*, at 332 (quoting Juzayy Al Kalbi).

<sup>28</sup> See Doi, *supra*, at 332 (quoting Juzayy al-Kalbi) (emphasis added).

<sup>29</sup> See Schacht, *supra*, at 167.

<sup>30</sup> See Doi, *supra*, at 332 (quoting Juzayy Al Kalbi).

## § 38.04 FOUNDLING (LAḲĪṬ) AND ADOPTION

How does Islamic Family Law treat a tragic, all-too-common occurrence, namely, a foundling (*laḳīṭ*), that is, a child who has been abandoned and whose parentage is unknown? The *Sharī'a* does not recognize adoption as such. Professor Hussain explains:

adoption was common in pre-Islamic Arabia, and Muhammad himself, before the time of his Prophethood, had adopted a child named Zaid, who had been captured in a tribal raid and presented to him as a slave. Muhammad freed him and adopted him and he was known as Zaid ibn Muhammad. Later he married the Prophet's cousin Zainab, but when that marriage failed, the Prophet married her after the divorce in accordance with the now revealed Islamic rule that adoption created no family relationship.<sup>31</sup>

The Qur'ān is the origin of the rule that Islamic Family law does not recognize adoption. *Surah* 33, *ayah* 4 states:

God does not put two hearts within a man's breast. He does not turn the wives you reject and compare to your mothers' backs into your real mothers; *nor does He make your adopted sons into real sons.*<sup>32</sup>

Read literally, this passage is not an express rejection of taking care of the child of another. It states merely that a son who is adopted does not become the biological child of the adopting parents by virtue of the adoption.

Not surprisingly, then, adoption exists in a *de facto*, but not *de jure*, sense. Professor Hussain notes:

The prohibition of adoption does not mean that there is any objection to a person bringing up someone else's child and caring for it if the child is an orphan or other circumstances exist which justify this happening.<sup>33</sup>

Consequently, a man may claim a foundling by acknowledging the child as his offspring.

Indeed, any man may make such a claim, and becomes a foster parent. Until that claim is made and proven false, the child is regarded as both free and a Muslim, unless the child was found in a non-Muslim area. Thus, a man may adopt a child by claiming him as his own, and unless contested, a father — child relationship is established. Suppose no one claims the child? Then, the person who found the child

<sup>31</sup> HUSSAIN, *supra*, at 81.

<sup>32</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 33:4 at 266 (Oxford, England: Oxford University Press, 2004) (emphasis added).

The reference to "your mothers' backs" is explained by Professor Abdel Haleem as follows:

In pre-Islamic Arabia the husband sometimes said to his wife, "From now on, you are to me like my mother's back," by which he meant that he refused to have further conjugal relations with her, yet he did not divorce her and so give her the freedom to remarry (see 58:1-4).

*Id.*, fn. a to 33:4.

<sup>33</sup> HUSSAIN, *supra*, at 82.

has limited parental authority over the child. The child may be placed in an orphanage, with maintenance being the responsibility of the government or a charitable organization (*waqf*).

Significantly, a child raised by a foster parent does not have the same inheritance rights as a biological child of that parent.<sup>34</sup> Only the blood-related son or daughter inherits as an heir of the parent. To take care of the foster child upon the death of the foster parent, that parent may exercise either or both of two options. First, the foster parent may make gifts to the foster child during the life of the parent. Second, the foster parent may make a bequest in a will. However, as per the rule in Islamic Inheritance Law, that bequest is restricted to no more than one-third of the estate of the testator.

<sup>34</sup> See HUSSEIN, *supra*, at 82.

## Chapter 39

### CONTRACEPTION

Life is the sum of all your choices.

Albert Camus (1913-1960),  
French Novelist, Essayist, and Playwright, and winner of the 1957 Nobel  
Prize for Literature

#### SYNOPSIS

##### § 39.01 BASIC RULES

- [A] Irreversible Methods Forbidden (*Harām*)

- [E] Compassion

## § 39.01 BASIC RULES

[A] Irreversible Methods Forbidden (*Ḥarām*)

Few if any issues concerning interactions between men and women are as sensitive or controversial as contraception. (Abortion is the obvious competitor.) For all couples, Muslim and non-Muslim alike, contraception is about one question: is the couple open to the creation of new life? The issue hardly is a simple one. Whether to take recourse to contraception, and if so, what contraceptive method to use, are religious matters. But, they also involve a complex admixture of economic, psychological, and scientific concerns. In making these decisions, each couple, and indeed each man and woman, and their circumstances, are unique and deserving of careful, personal attention. The issue is rendered more confusing in certain parts of the Muslim World, where it is not discussed or debated openly.<sup>1</sup> In that vacuum, some conservative *mullahs* (religiously educated men) simply, and simple minded, intone against contraception.

The *Sharī'a* does provide Muslim couples with considerable guidance as to their choices about contraception. This guidance, while of course grounded in religion, implicates the economic, psychological, and medical factors at stake. This guidance is not from the Qur'ān itself. Like the New Testament of the Bible, and the United States Constitution, the Qur'ān is silent on contraception.<sup>2</sup> None of these documents expressly and unequivocally permits or forbids either permanent or temporary contraception. (To be sure, there are passages in these Sacred Texts to which some observers point for indirect support of a particular position.) Instead, then, under Islamic jurisprudence (*fiqh*), guidance to married couples is based on the other three sources of Islamic Law: *hadith*, analogical reasoning (*qiyās*), and consensus (*ijma*).

To begin, Islamic jurisprudence (*fiqh*) does not treat all methods of contraception equally. Hence, it is necessary to distinguish among methods. The key distinction in Islamic *fiqh* is between irreversible and reversible methods of contraception.

The *Sharī'a* regards castration as forbidden (*ḥarām*). That is because it destroys the power of reproduction. The ability to reproduce is a precious gift from God (Allāh). Destroying it is a kind of sacrilegious self-mutilation. Abdullah 'ibn Mas'ud, a Companion of the Prophet (*Sahābiy*), relates a *hadith* on the topic of castration:

We used to be engaged in *jihād* with the Messenger of Allāh and we had no one (with whom we could fulfill our desires). So we asked if we could get ourselves castrated. The Messenger of Allāh forbade us from doing so.<sup>3</sup>

<sup>1</sup> See JAMILA HUSSAIN, *ISLAMIC LAW AND SOCIETY — AN INTRODUCTION* 122. [Hereinafter, HUSSAIN.]

<sup>2</sup> See HUSSAIN, *supra*, at 117.

<sup>3</sup> This *hadith* appears in MUHAMMAD IBN ADAM AL-KAWTHARI, *BIRTH CONTROL AND ABORTION IN ISLAM* 23 (Santa Barbara, California: White Thread Press, 2006) [Hereinafter, AL KAWTHARI.] T his source states that the *hadith* is recounted in SAHIH BUKHARI, as *hadith* number 4787, in the Book of *Tafsīr*. Indeed, this *hadith* does appear in one or more Arabic-language versions of the compilation of *hadiths* by Imām Bukhari. Oddly, it is missing from the Book of *Tafsīr* in the English translation of the compilation by

Imām Badr Al Din Al Ayni comments on this *hadith*, concluding that:

Castration is to cut the organs of the body that are the basis for offspring . . . It is considered *ḥarām* by the consensus of all of the scholars.<sup>4</sup>

Modern *Sharī'a* scholars draw an analogy (*qiyās*) between castration and sterilization, conclude that the *fiqh* on each issue is the same: both are prohibited.<sup>5</sup>

That is, by recourse to *qiyās*, specifically, analogical reasoning based on the above-quoted *hadith*, male sterilization (vasectomy) and female sterilization (tubal ligation or tubectomy) are *ḥarām*. Like castration, these surgical procedures permanently inhibit a couple from reproduction.<sup>6</sup> The modern medical possibility that certain vasectomies or tubal ligations may be reversed by subsequent surgical procedures does not alter the stance of the Islamic *fiqh*. However, it may be anticipated that a male or female, having undergone sterilization, would be encouraged by some religious or legal scholars (*ulema* and *fukahā*), respectively) to make best efforts to obtain medical help to reverse that sterilization.

In this regard, some Muslim scholars do not liken a tubal ligation or vasectomy to castration, categorizing only the latter as unequivocally irreversible.<sup>7</sup> Such scholars, who appear to be a minority, thus do not forbid tubal ligation or vasectomy. Rather, they treat these procedures like a reversible method of contraception.

There is a clear parallel with Catholic Christianity: it contains the same precepts. Sterilization is regarded as sinful, as it rejects a God-given ability to reproduce. However, there is an unambiguous difference with American law, under which a person is free to choose to be sterilized, and to seek a reversal of a prior procedure.

As with many situations, however, the *Sharī'a* is flexible and provides exceptions. In a situation in which the life of a mother is in danger, as attested to by an unbiased medical opinion, it is permissible for her to undergo a tubal ligation.<sup>8</sup> Typically, this situation arises where a mother cannot have a natural birth. Having several children through Caesarean birth could endanger greatly the life of the mother.<sup>9</sup>

## [B] Historical Practice of 'Azl (Withdrawal)

"Azl" occurs during sexual intercourse when a "man withdraws his sexual organ from his spouse's genitals just before ejaculation."<sup>10</sup> It is a temporary contraceptive method, and (as explained below) for this reason often provides the standard of permissibility for other reversible contraceptive methods. Of course, medically, in

Imām Bukhari, and does not seem to appear elsewhere in that translation. Ms. Jomana Qaddour tracked down an Arabic version of the *hadith*, translated it, and checked the English translation of the Imām Bukhari compilation.

<sup>4</sup> See AL KAWTHARI, *supra*, at 23 (quoting 'UMAYYAT AL-QARI' 14:14).

<sup>5</sup> See AL KAWTHARI, *supra*, at 24.

<sup>6</sup> See AL KAWTHARI, *supra*, at 22.

<sup>7</sup> See HUSSAIN, *supra*, at 121-122.

<sup>8</sup> See AL KAWTHARI, *supra*, at 22.

<sup>9</sup> See AL KAWTHARI, *supra*, at 25.

<sup>10</sup> See AL KAWTHARI, *supra*, at 25.

terms of efficacy, 'azl is highly uncertain.

The *sirah* (way of life) of Muslims during the time of the Prophet Muhammad reveals that Muslims practiced *coitus interruptus* ('azl). Jābir, one of the Companions of the Prophet (*ṣaḥābah*), narrates unambiguously:

We used to practice *coitus interruptus* during the lifetime of Allāh's Apostle. . . .<sup>11</sup>

Another *ḥadīth*, narrated by Abū Sa'īd Al-Khudri, concerns an instance in which he was asked about the views of Muhammad on 'azl:

Yes, (I heard) Allāh's Apostle . . . saying: There is no harm if you do not practice it, for it (the birth of the child) is fate.<sup>12</sup>

Al-Khudri also testifies:

[T]he Jews say that 'azl is minor infanticide, so the Prophet . . . said, "The Jews are wrong: for if Allāh wanted to create something, no one can divert Him."<sup>13</sup>

From these *ḥadīths*, three inferences may be drawn: that 'azl was practiced in the era of the Prophet, that the Prophet neither required nor forbade its practice, and that the Prophet believed that a child is a gift from God (Allāh).

By no means was 'azl the only method of temporary contraception employed by Muslims. Professor Hussain writes:

Nawal El Saadawi mentions [in *The Hidden Face of Eve: Women in the Arab World* 67 (London, England: Zed Books, 1980)] that contraception was practiced in the Muslim world in the Middle Ages. A famous physician, Abou Bakr al Razi, in the 9th century, described various methods of contraception, other than *coitus interruptus*. Some of these were the placing of medicaments at the opening of the uterus before sexual intercourse. These were intended either to close up the opening or expel the semen. Some substances used were tablets of cabbage, wax secreted by

<sup>11</sup> THE TRANSLATION OF THE MEANINGS OF SAHIH AL-BUKHARI, ARABIC-ENGLISH BY DR. MUHAMMAD MUHSIN KHAN, vol. VII, book LXII (The Book of Nikāh (Wedlock)), p. 102, *ḥadīth* no. 135 (Dar Ahyā Us-Sunnah, Al Nabawiya, March 1978). See also *id.*, *ḥadīth* no. 136 ("We used to practice *coitus interruptus* while the Qur'ān was being revealed"); HUSSAIN, *supra*, at 118 (quoting this *ḥadīth*).

Regarding this *ḥadīth*, Professor Hussein observes:

There is also a *ḥadīth* in which the Prophet is reported to have himself likened 'azl to minor infanticide. This is considered by some scholars to be a weak *ḥadīth*, but Imām al Ghazālī explained the apparent contradiction as being that the "minor" infanticide lies in the intention not to produce a child and as such it may be likened to the Prophet's remarks about "minor disbelief" as being something *undesirable but not forbidden*.

*Id.* at 119 (emphasis added).

<sup>12</sup> SAHIH MUSLIM — BEING TRADITIONS OF THE SAYINGS AND DOINGS OF THE PROPHET MUHAMMAD AS NARRATED BY HIS COMPANIONS AND COMPILED UNDER THE TITLE AL-JAM' US-SAHIH BY IMAM MUSLIM, RENDERED INTO ENGLISH BY ABDEL HAMID SIDDIQI, WITH EXPLANATORY NOTES AND BRIEF BIOGRAPHICAL SKETCHES OF MAJOR NARRATORS, CORRECTED AND REVISED BY DR. <sup>13</sup> Quoted in HUSSAIN, *supra*, at 118.

animal's ears, the droppings of elephants, and calcium water. It is not stated how effective these methods were or whether there were any side effects!

Another famous Muslim physician was Ibn Sina, known in Europe as Avicenna, who died in A.D. 1037. He wrote *Al Kanoun fil Tib* (*The Laws of Medicine*) in which he described 20 different methods of contraception in a way which Nawal El Saadawi describes as "remarkably accurate and detailed considering the relatively early stage of scientific development at which he was writing." Imām al Ghazali, writing in the 11th century, mentioned the use of a condom made out of gut as a means of contraception.<sup>14</sup>

Of course, methods of temporary contraception have evolved since the early days of Islam. Nevertheless, the religious and moral debate about such methods continues.

### [C] Most Reversible Methods Generally Permitted (*Ḥalal*)

Since the 9th century A.D., a variety of reversible contraceptive techniques have been recognized and commented on by Islamic scholars.<sup>15</sup> Ibn Sinā (*circa* 980-1037, known in the West as Avicenna) in his *Qanun*, listed 20 birth control substances, while Abū Bakr al-Razi, in *Hawi*, listed 176 birth control substances.<sup>16</sup> Both contributed to the Islamic medical legacy, and both recognized the use of the variety of contraceptive methods available in their time.

Contemporary *ulema* and *fukahā'* recognize the existence and widespread use of a variety of reversible contraceptive means. Listed alphabetically, these contraceptive methods include the following:

- 'Azl, or *coitus interruptus*, which in English is commonly known as withdrawal.
- Condoms, for males or females.
- Diaphragms and caps.
- Injections, particularly of progesterone.
- Intra-Uterine Devices (IUD), which is often described as the "loop," "coil," or "curl" because of its shape.
- Locally acting spermicidal jellies.
- Oral contraceptive pills, commonly known as "the pill."<sup>17</sup>

<sup>14</sup> HUSSAIN, *supra*, at 120-121.

<sup>15</sup> See AL KAWTEARI, *supra*, at 33.

<sup>16</sup> See SA'DIYYA SHAHID, SACRED RIGHTS: THE CASE FOR CONTRACEPTION AND ABORTION IN WORLD RELIGIONS 105, 115 (New York, New York: Oxford University Press, Daniel C. Maguire ed., 2003).

<sup>17</sup> Early versions of the Pill contained a large amount of estrogen, the primary effect of which was to block ovulation. Thus, these versions operated as a contraceptive. However, such high doses of estrogen posed serious health risks to women. Consequently, the pharmaceutical companies that made the Pill altered the ingredients by reducing the levels of estrogen, and added another hormone, progestin. Progestin changes the lining of the uterus, which makes it difficult for a new embryo to implant in that lining during the second week of a pregnancy. The newer versions of the Pill, therefore, have more of an

- Rhythm method, that is, the practice of abstinence during the fertile periods in the normal menstrual cycle of a woman.

Muslim scholars have not dwelled extensively on each of these individual methods. Rather, they have ruled the first of the eight methods, 'azl, is permissible (*halal*). In turn, by use of analogical reasoning (*qiyās*), the scholars generally consider the latter seven methods to be equivalent to 'azl. Their logic essentially is that withdrawal is acceptable, the other methods are functionally akin to withdrawal, so they, too, are acceptable. That is, they analogize the range of modern methods to the ancient method of 'azl.<sup>18</sup>

Thus, the general rule in the *Shari'a* is most, indeed nearly all, of the methods of reversible contraception are permissible (*halal*). However, this view is not unanimous. There are differences (discussed below) among the Four Sunni Schools on the particulars of permissibility, namely, the prerequisites for use of reversible contraception. Moreover, the *Māliki* School holds a slightly different opinion on oral contraceptive pills, and do not regard them as subject to the same ruling as 'azl.

Significantly, there are two reversible contraception methods that are not regularly put into the category of "permissible." They are birth control patches and the morning-after pill. Both are debated amongst the scholars as to whether they are *halal*.<sup>19</sup>

Why do some Muslim scholars regard the birth control patch as offensive? They argue the patch conflicts with Islamic requirements of purification, or *ghusl*.<sup>20</sup> Uninterrupted attachment of the patch to the body of a woman is necessary for the patch to be effective. Yet, continuous attachment hinders the ability of a woman to wash every part of her body. She cannot, therefore, become ritually clean in preparation for prayers. Some scholars, then, opine the birth control patch is permissible (*halal*) only if no other contraceptive means are available, and only if a woman using the patch wipes over it with water so that she can still meet the requirements of *ghusl*.<sup>21</sup>

As for the morning-after pill, the debate among Muslim scholars concerns its operation. Does this pill destroy an already fertilized egg? Or, does this pill prevent attachment of an embryo to the lining of the womb?<sup>22</sup> If the pill operates in the first manner, then certain scholars categorize it as an abortifacient drug (i.e., one that induces an abortion), and subject it to the Islamic rulings on abortion.<sup>23</sup> These scholars permit use of the pill only in extreme medical circumstances. However, other Muslim scholars regard the morning-after pill as yet another permissible

abortifacient than a contraceptive effect. See Joe Bollig, "The Pill" Leaves a Legacy of Pain, THE LEAVEN (Newspaper of the Archdiocese of Kansas City, Kansas), 30 July 2010, at 5. [Hereinafter, Bollig.]

<sup>18</sup> See Al Kawthari, *supra*, at 28.

<sup>19</sup> See Al Kawthari, *supra*, at 43-45.

<sup>20</sup> See Al Kawthari, *supra*, at 45.

<sup>21</sup> See Al Kawthari, *supra*, at 45.

<sup>23</sup> See Al Kawthari, *supra*, at 43-44.

method of reversible contraception.<sup>24</sup> Note that the distinction between destruction of a fertilized egg and prevention of attachment of an embryo to the lining of the womb is one without a difference. Both result in the end of life, which (according to Catholic Christian, and indeed most if not all other religious teachings) began at conception.

The general permissibility of reversible contraceptive methods under the *Shari'a* is analogous to the *status quo* in American law. Once approved by Federal authorities, specifically the Food and Drug Administration (FDA), a reversible method is produced and sold en masse. It is up to the individual consumer to decide whether to use the method, and if so, which method to use. Most methods are marketed over-the-counter (OTC), though considerable controversy exists as to whether and how abortifacient drugs ought to be distributed. The *Shari'a* rules contrast with Catholic Christian teaching, which holds that artificial contraceptive methods other than Natural Family Planning (NFP) are objectively morally wrong.

## § 39.02 DIVERSITY OF ISLAMIC OPINIONS

### [A] Overview and Three Themes

Professor Hussain provides the following characterization of the opinions of Muslim religious and legal scholars (*ulema* and *fukahā'*, respectively) on and other methods of reversible (temporary) contraception:

There is general agreement among the scholars of all the major schools of Islamic jurisprudence that contraception is acceptable, providing that the wife consents. Some consider it within the category of actions classed as *makrah* (undesirable) since it deprives women of sexual fulfillment and the benefit of having children. However, if there is some genuine need, as may result from a threat to the life or health of the mother or genuine financial difficulties, there is no objection to it.

...

... It is generally agreed that the reversible methods are permissible, though some consider them undesirable. ...<sup>25</sup>

This summary is accurate. Indeed, in the opinion of some scholars, a threat to the mother indubitably is the soundest basis for the use of contraception.<sup>26</sup> Yet, the summary also is incomplete. For example, is a threat defined narrowly, to include only the possible bearing and delivery of one child, or one more child? Or, is "threat" defined broadly to include frequent childbearing and delivery, and caring for a large family? The scholars do not offer a uniform consensus (*ijma'*) on these questions.

<sup>24</sup> See Al Kawthari, *supra*, at 44.

<sup>25</sup> Hussain, *supra*, at 119, 121.

<sup>26</sup> See Hussain, *supra*, at 119 (Annandale, New South Wales, Australia: The Federation Press, 1999) (discussing the argument of Abul Fadl Mohsin Ibrahim in *Abortion, Birth Control, and Surrogate Parenting* 27 (Burr Ridge, Illinois: American Trust Publications, 1991)).

Such questions call for a survey of Islamic *fiqh* on contraception. Three overarching themes emerge. First, the overwhelming majority of *ulema* and *fukahā* in all Four Schools regard 'azl (withdrawal) as permissible (*halal*).<sup>27</sup> Second, except for some *Hanafi* School opinions, the Four Schools regard the express consent of the wife as a necessary pre-condition for the permissibility of 'azl. That is, a husband is not to interrupt sexual intercourse unilaterally without clear, prior agreement from his wife.

Third, despite the general permissibility in respect of reversible methods, there is a degree of dislike or reprehensibility (*makrāh*) attached to the practice of contraception.<sup>28</sup> This degree of dislike is lowered if 'azl is practiced for a legitimate religious reason. Aside from coping with a threat to the life or health of the mother, which all *ulema* and *fukahā* agree is a "legitimate" reason from a religious perspective, what other justifications pass muster? There is some debate on this question. One scholar, Dr. 'Abdur Rahman i Doi in his 1992 book, *Women in Shari'ah*, says contraception is permissible in only the following instances:

- if there is any fear of special financial, educational, or other problems in respect of children which would stop a man from fulfilling his religious duties;
- if it forces a man to accept unlawful things or unlawful food just for the sake of his children;
- if there is a problem of ruining the health of the children. If the father or mother is suffering from a contagious disease which can be transmitted to the children, but this does not apply to hereditary diseases like diabetes and such other diseases;
- if there is a danger that the parents would not be in a position to give proper training (*tarbiyyah*) to the children as required by Islam.<sup>29</sup>

In all other instances, Professor Doi says, the use of contraception is tantamount to a loss of trust in God (Allāh). The above list, however, is by no means universally accepted by Muslim scholars. Generally, there is agreement among the *ulema* and *fukahā* that religiously "legitimate" reasons include the following circumstances in which a married couple may find itself:<sup>30</sup>

- The couple lives in the land of the enemy (*dār al-ḥarb*).
- The couple plans on divorcing.
- The couple fears their child will be raised in an environment of moral and religious decline.

<sup>27</sup> See Al Kawthari, *supra*, at 38.

<sup>28</sup> See Al Kawthari, *supra*, at 38.

<sup>29</sup> HUSSAIN, *supra*, at 129 (Annandale, New South Wales, Australia: The Federation Press, 1999) (summarizing Dr. 'Abdur Rahman i Doi, *Women in Shari'ah* 129-130 (London, England: Ta-Ha Publishers, Ltd., 1992)).

<sup>30</sup> See Al Kawthari, *supra*, at 38.

The key point, then, is that even if they do not agree on every item on the list of reasons, most scholars are less than enthusiastic about the use of even reversible birth control methods. By articulating legitimate religious reasons for their use, it may be surmised that scholars at least encourage a couple to consider its motives for contraception.

'Azl is the only contraceptive means mentioned in any of the reliable *hadiths*. As per the intrinsic nature of 'azl, its practice depends on an affirmative act by the husband. For this reason, the *hadiths* are generally silent on the permission of the husband to practice 'azl, i.e., they presume consent of the husband. Instead, they focus on the permission of the wife as a necessary prerequisite for this practice. In light of modern medical advancements, contemporary Muslim scholars are aware of the availability of several temporary contraceptive methods, many of which (such as insertion of a diaphragm or taking of birth control pills) depend on an affirmative act of the wife. Therefore, the majority of scholars in all Four Schools now regard previously endorsed opinions that emphasize express consent of the wife as interchangeably requiring express consent of the husband.<sup>31</sup>

That is, all Four *Sunni* Schools recognize that explicit spousal consent is necessary from the spouse who is not undertaking the affirmative act of reducing the chances of reproduction. This "prior consent" requirement — affirmative temporary contraceptive action by one spouse should be agreed upon by the other spouse — is a product of analogical reasoning (*qiyās*): because the *hadiths* required prior consent of the non-acting spouse (the wife) with respect to 'azl, by extension the prior consent of the non-acting spouse (the husband or wife) is needed with respect to a modern temporary contraceptive method. The specific nuances among the Schools are set out as follows.

## [B] *Hanafi* School

The *Hanafi* School permits 'azl and other temporary contraceptive methods, although this School stresses that all such practice is disliked and discouraged. The School identifies two distinct issues:

- (1) Under what circumstances is the use of reversible contraception acceptable, in the sense of not being reprehensible (*makrāh*)?
- (2) Under what circumstances is prior consent by a spouse to the use of reversible contraception not required?

On the first issue, most recently, Imām Muhammad Shafī 'Uthmani of Deoband, India, summarized the grounds for religiously legitimate use of temporary contraception:

it is acceptable to practice reversible contraception in cases where: (1) a woman is too weak or ill to sustain pregnancy; (2) when she is in an area where there is no stability or security; (3) when the couple is on a prolonged

<sup>31</sup> See Al Kawthari, *supra*, at 38.

and difficult journey, in which pregnancy may cause difficulty; (4) when the wife's relationship with the husband is strained and divorce is likely.<sup>32</sup>

Other contemporary *Hanafi* scholars have added another religious justification for reversible contraception: spacing. They state it is permissible to practice reversible methods of contraception if a couple wishes to space out children. Spacing allows the couple to provide more adequately for the family. It also accommodates the reality of distressed circumstances in which a woman may be compelled to work to earn income for her family, and therefore is not in a position to give birth to more children and provide adequately for them.<sup>33</sup>

On the second issue, the general consensus (*ijma*) of the *Hanafi* School is that to practice 'azl, consent of both spouses, husband and wife, is necessary. In respect of express consent of the wife, the majority of *Hanafi* scholars emphasize the importance of her agreement. That is because 'azl simultaneously affects both her right to have children and her level of sexual pleasure.<sup>34</sup> In contrast, it is that right, but less so the level of physical satisfaction, which is implicated.

The *Hanafi* School *ijma* holds that explicit spousal consent may be overlooked in particular circumstances. These circumstances amount to compelling religious reasons.<sup>35</sup> One such reason is the couple lives in the land of the enemy (*dār al-ḥarb*). In effect, this means they are in a non-Muslim country with which there is no peace agreement. The underlying logic appears to be that having a child in such circumstances could prove treacherous, although certainly the birth of children during wartime has occurred throughout human history. A second reason is that one or both spouses are planning on divorce. This reason is odd, in that conjugal relations would not be expected in this case.

Religious corruption is a third justification for waiving the prerequisite of spousal consent before 'azl. In particular, a husband maybe concerned that any child would be born into an environment of moral and spiritual decay. Some *Hanafi* School scholars explain that having a child is conditional on being able to raise that child as a practicing, God-fearing Muslim. If that condition cannot be met owing to an adverse milieu, then contraception by means of withdrawal without prior consent of the wife is permissible (*halal*). For example, the classical *Hanafi* jurist, Imām Haskafi states in his book, *Al-Durr al-Mukhtar*, which is a major reference of *Hanafi* School *fiqh*:

[I]t is permissible to practice 'azl with a woman with her consent, although . . . it is permissible even without the wife's consent in our times due to religious decline.<sup>36</sup>

<sup>32</sup> See AL KAWTHARI, *supra*, at 35 (quoting Mufti Muhammad Shafi 'Uthmani, *Dab-e Wiladat* at 19). Mufti 'Uthmani died in 1976.

<sup>33</sup> See AL KAWTHARI, *supra*, at 35.

<sup>34</sup> See AL KAWTHARI, *supra*, at 33-35.

<sup>35</sup> See AL KAWTHARI, *supra*, at 34.

<sup>36</sup> See AL KAWTHARI, *supra*, at 33 (emphasis added).

Imām Haskafi wrote *Al-Durr al-Mukhtar* in 1070 A.D., and died in 1077 A.D.

Imām ibn 'Abidin, a later *Hanafi* authority, states in his commentary on the above quotation from Imām Haskafi, that:

If there is fear of begetting delinquent and mischievous children, it will be permitted to practice 'azl with a woman even without her consent.<sup>37</sup>

Imām Kasani, another prominent *Hanafi* jurist, states that:

It is prohibitively disliked (*makrah*) to practice 'azl without one's wife without her consent [*sic*], for sexual intercourse with ejaculation is [the] cause of begetting children, and she has a right to have children. . . . However, if 'azl is practiced with her consent, it will not be disliked, for she has agreed to relinquish her right.<sup>38</sup>

A careful examination of the above-mentioned religious grounds for (1) the use of 'azl or other temporary contraceptive methods, and (2) waiving the requirement of prior spousal consent, indicates that the justifications are not widely different. They seem to be nearly co-extensive as to residing in enemy territory and contemplating divorce, and possibly the concern about religious corruption. Consequently, the potential to conflate the issue of the permissibility of contraception with the issue of prior consent exists, with the follow-on possibility that one spouse (quite likely the wife) will not be fully respected.

### [C] *Mālikī* School

The *Mālikī* School permits the practice of 'azl, on the condition that the husband has the express permission of his wife to practice it.<sup>39</sup> Imām Ibn Juzayy, a prominent *Mālikī* authority who followed Imām Mālik, states clearly that:

*Coitus interruptus* will not be permissible with one's wife except with her consent.<sup>40</sup>

Notably, the *Mālikī* School consensus (*ijma*) traditionally departs from the other Four Schools on medicinal means of contraception. This School has issued rulings against such means. For example, Shaykh Muhammad 'Illish in *Fath al-'Aliyy al-Malik* writes:

It is not permissible to use medicine to prevent pregnancy. . . . Once the semen has entered the womb, it is prohibited to take any measure to remove it.<sup>41</sup>

<sup>37</sup> See AL KAWTHARI, *supra*, at 33 (quoting RAḌD AL-MUḤTAR 'ALA 'L-DURR AL-MUKHTAR 3:175-176).

The full name of Imām ibn 'Abidin was Muhammad Amin ibn 'Abidin, and on the Indian Subcontinent he is known as Imām Shami. He was born in Damascus, and lived between 1198-1252 A.H.

<sup>38</sup> See AL KAWTHARI, *supra*, at 34 (quoting BADA' AL-SANA' 2:334).

<sup>39</sup> See AL KAWTHARI, *supra*, at 35.

<sup>40</sup> See AL KAWTHARI, *supra*, at 35 (quoting AL-QAWANIN AL-FIḤḤA 160).

The full name of Imām Ibn Juzayy was Abū 'Abdallāh Muhammad ibn Muhammad ibn Ahmad ibn Juzayy al-Kalbi. He lived between 1321-1357 A.D., and died in Fez, Morocco. He dictated the travels of Ibn Batutta (1304-1368/1369), a Moroccan Berber Muslim scholar and traveler.

<sup>41</sup> See AL KAWTHARI, *supra*, at 44 (quoting 'ILLISH IN FATH AL-'ALIYY 'L-MALIK FI'Y-FATAWA 'ALA MADHḤAB AL-IMAM MALIK 1:399).

Thus, under traditional *Māliki* opinion, the modern-day pill and injections are prohibited.<sup>42</sup> Condoms and other such reversible methods appear to be permissible.

Possibly, this opinion is based on the rationale that acceptance of suffering, in the sense of "dealing with God's Will," is a more respected gesture than turning to medicine or doctors when one is sick or in need of help. (Such a rationale implicitly categorizes child-bearing and child-rearing as suffering, a categorization that is both true and false.) However, the *Sunnah* of the Prophet does not support this rationale. Muhammad encouraged Muslims to do what they could to protect the body God (Allāh) gave them, because the body is an *amanah*, or trust, from Him. Thus, recent *Māliki* jurists, such as Shaykh 'Abd al-Rahman al-Ghiryani, permit the use of medicines to prevent pregnancy.<sup>43</sup>

### [D] *Shāfi'i* School

The *Shāfi'i* School follows reasoning similar to that of the *Hanafi* School. Consequently, the consensus (*ijma*) of the *Shāfi'i* School permits 'azl, while simultaneously maintaining that it is reprehensible (*makrūh*). The majority of *Shāfi'i* scholars also regard advance permission of a wife as a necessary condition for the permissibility of 'azl.<sup>44</sup>

Several prominent *Shāfi'i* scholars have commented on temporary contraception, specifically 'azl, and its permissibility. *Imām* Nawawi studied the distinction of the practice of 'azl with a free versus a slave woman, because of the *ḥadīth* narrated by the Caliph 'Umar. This *ḥadīth* states:

The Messenger of Allāh forbade the practice of 'azl with a free woman except with her permission.<sup>45</sup>

*Imām* Nawawi concluded the practice of 'azl is *makrūh* in both instances. That is because it eventually "leads to a reduction in reproduction" in both circumstances.<sup>46</sup> In his commentary on the *ḥadīths* compiled by *Imām* Saḥīḥ Muslim, *Imām* Nawawi asserts:

'Azl . . . is a practice that is *makrūh* according to *Shāfi'i*s at all times, and with all types of women, irrespective of whether she is willing or otherwise, for it leads to a reduction in reproduction. . . . The narrations in this regard have been reconciled with one another, such that the narration

signifying the impermissibility of this practice is interpreted to indicate that it is *makrūh tanẓīhan* and the narrations indicating its permissibility show that it is not *ḥarām*.<sup>47</sup>

*Imām* Abū Ḥamid Al Ghāzālī agreed with the opinions of the *Shāfi'i* jurists, also finding its practice to be permissible, yet *makrūh*.<sup>48</sup>

There were *Shāfi'i* scholars who disputed the degree of religious offensiveness of the act. Consequently, Al Ghazālī delved into the reasoning why *Shāfi'i* scholars ruled 'azl as *makrūh*. Al Ghazālī concluded:

As for offensiveness, or *karaha*, it is a term applied to things that are closer to the unlawful and *ḥarām* acts than things that are somewhat disliked (and closer to the lawful), and things that merely entail leaving out the superior. 'Azl is considered *makrūh* in the third sense in that it entails leaving out a meritorious act. The meaning of offensiveness, or *karaha*, here is merely foregoing a commendable act — that is, to have a child.<sup>49</sup>

Al Ghazālī was a proponent of contraception for a variety of purposes, including:

- Protecting the life of the wife.
- The need for the wife to preserve her beauty for the enjoyment of the marriage.
- Limiting family size if a large number of dependents would impose a great financial and psychological hardship on the family.<sup>50</sup>

These reasons appear to be fairly widely appreciated in the *Shāfi'i* School.

### [E] *Ḥanbali* School

The *Ḥanbali* School follows the reasoning and conclusions of the majorities of the other three Schools. Thus, under the *Ḥanbali* School consensus (*ijma*), the practice of 'azl, and by analogical extension modern reversible contraceptive methods, is reprehensible (*makrūh*). The majority of *Ḥanbali* scholars allow the use of 'azl as long as the husband has express prior consent from his wife. Again by extension, it appears the majority of *Ḥanbali* scholars agree permission from the

<sup>47</sup> See AL KAWTHARI, *supra*, at 36 (quoting AL-MINHAJ SHARH SAḤĪḤ MUSLIM *ḥadīth* no. 1085).

<sup>48</sup> See AL KAWTHARI, *supra*, at 36.

The full name of *Imām* Al Ghāzālī was Abū Ḥamid Muḥammad ibn Muḥammad Al Ghazālī. A Persian jurist, philosopher, and theologian, he lived from 1058-1111 A.D., dying in Tus, which is in the Khorasan province in the north-east of modern-day Iran. He is one of the most important figures in the history of Islamic thought. Among his achievements are his use of doubt and skepticism, and his book, *The Incoherence of the Philosophers*, which moved Islamic metaphysics away from ancient Greek philosophy, putting it on an Islamic foundation in which God (Allāh), sometimes through angels, determines cause-and-effect. This foundation is known as "Occasionalism," meaning that God causes all events.

<sup>49</sup> See AL KAWTHARI, *supra*, at 37 (quoting IRYA 'ULUM AL-DIN 2:45).

<sup>50</sup> See Marion Holmes Katz, *The Problem of Abortion in Classical Sunni Fiqh*, in ISLAMIC ETHICS OF LIFE: ABORTION, WAR, AND EUTHANASIA 24, 43 (Columbia, South Carolina: University of South Carolina Press, Jonathan E. Brockopp ed., 2003).

This Shaykh lived from 1802-1881 A.D. (1196-1275 A.H.).

<sup>42</sup> See AL KAWTHARI, *supra*, at 44.

<sup>43</sup> See AL KAWTHARI, *supra*, at 44.

<sup>44</sup> See AL KAWTHARI, *supra*, at 36.

<sup>45</sup> See AL KAWTHARI, *supra*, at 36 (quoting IRN MAJA *ḥadīth* no. 2003).

The full name of *Imām* Nawawi was Yahya ibn Sharaf Al Nawā. He was born in Nawa, a village in Southern Syria, and spent most of his life in Damascus. He died in 1277 A.D. (676 A.H.). He is highly regarded as an intellectual heir to *Imām* Shāfi'i, and known for his works on the *ḥadīth*. See also JAMILA HUSSAIN, ISLAMIC LAW AND SOCIETY — AN INTRODUCTION 118 (Annandale, New South Wales, Australia: The Federation Press, 1999) (quoting this *ḥadīth*).

<sup>46</sup> See AL KAWTHARI, *supra*, at 36.

appropriate (non-acting) spouse is needed for the other (acting) spouse to employ an alternative temporary method.

As for the reason express, prior permission of the wife is needed before her husband practices *ʿazl*, the *Ḥanbali* authority *Imām* Ibn Qudamah provides two.<sup>51</sup> First, contraception interferes with the right of the wife to have children.<sup>52</sup> Second, reversible contraception methods may physically harm the wife, and it would be wrong to impose such harm on her. Accordingly, Ibn Qudamah reasons in a fashion similar to *Imām* Nawawi, and bases his opinion on the *ḥadīth* narrated by Caliph 'Umar (quoted earlier) with an emphasis on the rights of women. Indeed, for Ibn Qudamah, the rights of women are the central concern, because *'azl* subsequently results in

reducing offspring and . . . lessen[ing] the pleasure [of sex] for a woman.<sup>53</sup>

Analogous to the reasoning of the *Ḥanafi* School, Ibn Qudamah condones practicing *'azl* in times of need, such as living in the *dār al-ḥarb* or fighting in enemy lands.<sup>54</sup>

Finally, it may be asked whether any one of the Four Schools permit contraception to avoid birth defects? The answer to this question is not clear. Professor Hussain writes that a:

modern scholar, Shaykh Ahmad al Sharabassi from Egypt, has approved the use of contraception to prevent the transmission of genetic defects which can now be established by genetic screening.<sup>55</sup>

Thus, it seems to be the case that Islamic scholars, like their counterparts in some other faiths, are considering the matter, but have not adopted a uniform position.

### [F] Three Instances in which Contraception (Including 'Azl) is Impermissible

While the Four Schools accept *'azl* as permissible (*ḥalāl*) so long as certain requirements are satisfied, they acknowledge that *'azl* is impermissible if practiced in certain situations. By extension, the same view applies to reversible contraceptive methods that otherwise would be permissible. Specifically, the Four Schools agree that temporary contraception is impermissible if practiced: (1) out of fear of poverty; (2) out of shame of conceiving a girl; or (3) to impose population control measures.<sup>56</sup>

<sup>51</sup> Ibn Qudamah was born in 1147 A.D. (541 A.H.) in Palestine, memorized the Qur'an while young, undertook a military expedition with the legendary Saladin in 1187 A.D. (573 A.H.) including the recapture of Jerusalem, and died 1223 A.D. (620 A.H.). His full name was Muwaffaq ad-Deen Abu Muhammad 'Abd Allaah Ibn Ahmad Ibn Muhammad Ibn Qudamah Ibn Muqdaam Ibn Naasr Ibn 'Abdillaah al-Maqdisi. He is the author of *Al-Mughni* (sometimes transliterated as "Al-Mughnee" or "Al-Mughani"), which is the most widely known treatise on *Ḥanbali* School *fiqh*.

<sup>52</sup> See AL KANTHARI, *supra*, at 37 (quoting *IMAM IBN QUDAMA, AL-MUGHNI* 7:23).

<sup>53</sup> See AL KANTHARI, *supra*, at 37.

<sup>54</sup> See AL KANTHARI, *supra*, at 37.

<sup>55</sup> HUSSAIN, *supra*, at 119 (quoting ABEL FAIZ, MORRIS EBERHART, ABORTION, BIRTH CONTROL AND SUBROGATE PARENTING 26 (Burr Ridge, Illinois: American Trust Publications 1991)).

<sup>56</sup> See AL KANTHARI, *supra*, at 38-41.

First, concerning fear of poverty, the Qur'an states in *surah* 11, *ayah* 6:

There is not a creature that moves on earth whose provision is not His concern. He knows where it lives and its [final] resting place: it is all [there] in a clear record.<sup>57</sup>

*Surah* 6, *ayah* 151 proclaims:

Say [Prophet], "Come! I will tell you what your Lord has really forbidden you! . . . [D]o not kill your children in fear of poverty" — We will provide for you and for them. . . .<sup>58</sup>

Similarly, *surah* 17, *ayah* 31 says:

Do not kill your children for fear of poverty — We shall provide for them and for you — killing them is a great sin.<sup>59</sup>

Additionally, the Caliph 'Umar narrates the following *ḥadīth*:

I heard the Messenger of Allāh say, "If you were to trust Allāh as he ought to be trusted, you would be given sustenance as birds are given it. They go out hungry in the morning and return full in the evening."<sup>60</sup>

Based on these Qur'anic passages and the *ḥadīth*, traditional scholars from all Four Schools find it unacceptable to practice contraception out of fear of poverty.

After all, the *Shari'a* teaches one to depend on God (Allāh) for sustenance. While an individual has free will, no one is ultimately in control of his or her own life. Practicing contraception out of fear of poverty shows a lack of faith in the Almighty. Trust in Allāh is supposed to be an article of faith, and not doing so may lead an individual to trust him or herself more than Allāh, a kind of narcissistic self-reliance. Thus, Muslim scholars argued that reducing one's chances of reproduction because of fear of poverty, in spite of specific reassurance from Allāh that He will provide in those circumstances, is viewed as directly conflicting with the *Shari'a*.<sup>61</sup>

In theory, the state treasury (*bayt al māl*) of an Islamic country ought to contain funds to assist families that are poor. This government assistance should be available for large families to meet their educational, health, housing, and nutritional needs. However, in practice, funding typically is tight, if it even exists. Where the *bayt al māl* does contain the requisite monies, there is no guarantee that distributions are made in an efficient, uncorrupt manner. Thus, Professor Hussain argues that in certain Muslim countries, including Bangladesh and Egypt, with a large number of poor people and serious environmental pressures, some effort to limit population size is needed.<sup>62</sup>

<sup>57</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 11:6 at 136 (Oxford, England: Oxford University Press, 2004). [Hereinafter, QUR'AN.]

<sup>58</sup> QUR'AN, *supra*, 6:151 at 92.

<sup>59</sup> QUR'AN, *supra*, 17:31 at 136.

<sup>60</sup> See AL KANTHARI, *supra*, at 39 (quoting *TERMINIḤ ḥadīth* no. 2344, *IBN MAJA ḥadīth* no. 4164).

<sup>61</sup> See AL KANTHARI, *supra*, at 39.

<sup>62</sup> See HUSSAIN, *supra*, at 119.

Moreover, this position is not always as pious as it appears. International relations are at play. More often than not, Muslim scholars regard family planning as a western conspiracy, aimed at limiting the growth of the Muslim community (*ummah*). The thrust of the conspiracy assertion is that non-Muslim nations, particularly the United States and in the European Union (EU), prefer to retain their dominant global economic, political, and military positions. They are challenged enough by the rise of China and India. An ever-growing *ummah* is a threat to the *status quo* they seek to preserve. A related assertion is that Islam competes with other faiths, particularly Christianity, and family planning as practiced by Muslims, but not by Christians, is adverse to Islamic interests.

Both versions of the conspiracy theory are erroneous. There is no need to "push" artificial contraceptive techniques on Muslim countries. That is because fertility rates fall in any country, Muslim, or non-Muslim, as the country develops, and particularly as women become better educated, participate in the labor market, and marry at later ages. (Indeed, the availability of contraceptive technologies *per se* is not the sole determinant of fertility rates.) In other words, the development process itself is a natural and uncontroversial contraceptive. Moreover, like all conspiracy theories, the ones concerning family planning tend to over-estimate the competence and secrecy of the conspirators. It is scarcely imaginable that the United States, EU, or both, acting with sinister motives, could sustain a credible family planning program without any "leaks."

Not surprisingly, therefore, modern opinions tend to reject conspiracy theories about family planning.<sup>63</sup> They point out that most Muslim countries are growing at a rate unequal to that of non-Muslim ones. Whereas traditional scholars regard family planning as way to weaken the strength of Islam, modern scholars blame the lack of family planning for the weakness of Muslim society. Better growth performance might result from more prudent choices about family size, they suggest. Further, they appreciate that multiple strains on parents directly affect the quality of life of all the family members in many ways, including spiritually, emotionally, psychologically, and financially.

Accordingly, many Muslim countries not only permit contraception, but also have family planning programs. Egypt was among the first to have such a program, following a 1937 ruling by the *Mufti* of that country approving of contraception for medical or social reasons.<sup>64</sup> Malaysia, Indonesia, Pakistan, Tunisia, and Turkey also have such programs.<sup>65</sup> In respect of Malaysia, a 1965 *fatwā* from the state of Kelantan stated that while government family planning schemes were attempts to restrict freedom in Islamic family life, and contrary to Natural Law, contraception was permissible if the health of the mother was in danger, either or both parents suffered from an infectious disease, or the family was in extreme poverty. Also from

individual Malaysian states, in 1976 a *fatwā* from Trengganu, and a 1979 *fatwā* from Selangor, permitted contraception for health reasons, though they forbid both sterilization and abortion (with the 1979 *fatwā* forbidding abortion absolutely after 4 months). The National Council for Religious Affairs in Malaysia issued a decree along the same lines as the 1978 and 1979 *fatwās*.

The second circumstance under which practice of 'azl or other reversible contraceptive methods is unacceptable concerns shame about conceiving a girl. Before the advent of Islam, the practice killing of newborn girls (female infanticide) was widespread on the Arabian Peninsula and beyond.<sup>66</sup> (Tragically, it still is in some parts of the world.) Often times, a new born girl would be buried alive in the sand immediately after birth. Couples resorted to contraceptive methods to avoid conceiving female infants.<sup>67</sup> Pagan Arabs feared their daughters would dishonor the family if the daughter was raped during war, or if she chose to engage in sexual activities that were not authorized by her family. Why not use contraception to avoid these negative possibilities, and further avoid the temptation to commit female infanticide? That was the logic, at any rate, behind the pre-Islamic custom of endeavoring to prevent female births all together.

With Islam, thankfully, the rules changed. In *Surah* 16, the Qur'an speaks of the inhumanity of female infanticide, and prohibits it:

<sup>67</sup>They [the pagan Arabs] assign daughters to God — may He be exalted! — and prefer [sons] for themselves. <sup>68</sup>When one of them is given news of the birth of a baby girl, his face darkens, and he is filled with gloom. <sup>69</sup>In his shame he hides himself away from his people because of the bad news he has been given. Should he keep her and suffer contempt, or bury her in the dust? *How ill they judge!*<sup>70</sup>

This prohibition is absolute and without exception. Based on it, all Muslim scholars agree any hesitancy to have a child because of the gender of that child is forbidden (*haram*).

Observe that the reasoning is somewhat by analogy (*qiyās*): because it is forbidden to kill a female child after birth, it must also be forbidden to preclude the conception of a child for fear the child will be a girl. That is, the post-birth child is analogized to the embryonic child, and the theme linking the two is fear by either or both parents. Yet, not all scholars accept this reasoning. Professor Hussain writes:

Some scholars, such as Maulana Maududi, in India, have drawn an analogy between the prohibition of killing children for fear of want mentioned in these [Qur'anic] verses [6:151 and 17:31, quoted earlier], and limiting the birth of children through contraception for economic reasons. *There does*

<sup>63</sup> See Donna Lee Bowen, *Contemporary Muslim Ethics of Abortion*, in ISLAMIC ETHICS OF LIFE: ABORTION, WAR, AND EUTHANASIA 51, 69 (Columbia, South Carolina: University of South Carolina Press, Jonathan E. Brockopp ed., 2003).

<sup>64</sup> See HUSSAIN, *supra*, at 120-121. In this ruling, the *Mufti* also approved of abortions conducted before 16 weeks, which is by no means universally agreed.

<sup>65</sup> The summary of the Malaysian rulings is drawn from Hussain, *supra*, at 121, who in turn cites M.B. Hooker, *Fatwa in Malaysia 1960-1985*, 8 ARAB LAW QUARTERLY 93 (June 1993).

<sup>66</sup> See HUSSAIN, *supra*, at 117.

<sup>67</sup> See AL-KAWTHARI at 39.

<sup>68</sup> Qur'an, *supra*, 16:57-59 at 169 (emphasis added). As Professor Haleem explains, the pagan Arabs committed a double blasphemy. First, they called angels the daughters of God, thus likening angels to God. Second, they held daughters in contempt because of their warrior culture. See *id.*, fn. b and c to 16:57, 60, respectively, at 169.

*not seem to be a sound basis for this reasoning since contraception does not involve any killing, and at the time contraception is used, no child has yet come into existence.*<sup>69</sup>

In this respect, Professor Hussain observes that *surah* 2, *ayah* 233, encourages breastfeeding for up to two years, and Muhammad did not forbid a husband from having sexual intercourse with his wife during her breastfeeding period, because there was no such prohibition among other communities with whom Muslims interacted, nor any damage to a child being breastfed. Breastfeeding typically reduces the likelihood of conception. Therefore, Professor Hussain argues, spacing births via breastfeeding is a kind of contraception that always has been permissible.

The third circumstance in which 'azl or other temporary contraceptive methods are not permissible is if they are used as population control devices. That is, while reversible contraception generally is permissible for individuals based on their circumstances, it is impermissible for a government to impose contraceptive means, whether reversible or permanent, on the population as a whole.<sup>70</sup> The overwhelming number of Islamic scholars, past and present, reject population control as a national policy, because procreation is to be encouraged as a natural result of an Islamic marriage. Here, too, fear of poverty cannot be used as a justification for mandating national population control policies.

#### [G] Unacceptability of "One Child Policy" of Chinese Communist Party

As regards population control, the infamous "One Child Policy" of the Chinese Communist Party (CCP) is completely unacceptable from the vantage point of Islamic Law (and, indeed, on many other grounds).<sup>71</sup> From the perspective of the *Shari'a*, there are five main goals for which any legitimate Islamic government is responsible for preserving, protecting, and defending:

- Faith
- Life
- Intellect
- Posterity
- Wealth

Traditionally, Islamic religious and legal scholars have understood the fourth goal — posterity — as meaning that no government has a right to control the size of a Muslim family. Sadly, the CCP is hardly the first governmental regime in human

<sup>69</sup> HUSSAIN, *supra*, at 117-118 (Annandale, New South Wales, Australia: The Federation Press, 1999) (quoting ABUL FADL MOHSEN ENBAH, *ABORTION, BIRTH CONTROL AND SURROGATE PARENTING* 21 (Burr Ridge, Illinois: American Trust Publications 1991)) (emphasis added).

<sup>70</sup> See AL-KAWTHARI, *supra*, at 40.

<sup>71</sup> See generally Sarah J. Conroy, *Birth Control and the Citizen-Catholic in One-Child China*, 25 *CONNECTICUT JOURNAL OF INTERNATIONAL LAW* 431-458 (2010) (discussing the conflict between the one-child policy and Catholic precepts on artificial contraception, and its ramifications for the loyalties of Chinese Catholics and Sino-Vatican relations).

history to attempt to manage demography. In the 20th century, other infamous attempts at eugenics of one sort or another, using one means or another, occurred in Germany under Adolf Hitler and Singapore under Lee Kuan Yew.

Unsurprisingly, given the aforementioned Islamic legal perspective, the CCP was unable to enforce its One Child Policy on the large Uyghur Muslim population in Xinjiang. The CCP also could not impose it on the Tibetan Buddhist population of the Tibet Autonomous Region (TAR). For these groups, respectively, the *Shari'a* and Buddhism exert a far stronger appeal to hearts, minds, and souls than the crass economic materialism of CCP ideology ever will.

Consequently, the CCP resorted to inflicting its One Child Policy predominantly on the majority Han Chinese in urban areas, and with ill effects. Not only have widespread female infanticide and forced abortions occurred, but also the CCP miscalculated and manufactured a shortage of young people. With couples reproducing the natural replacement rate of 2.1, and with fewer girls to marry, a long-term deficit of people resulted. China faces a future with an insufficient number of young workers to support its aging population, and as China transforms itself into a more market-oriented economy, many people lack guaranteed, state-sponsored pensions and health care.<sup>72</sup> Pope Paul VI warned of the dangers of government family planning programs in his 1968 Encyclical Letter, *Humane Vitae* (*Of Human Life*):

[C]areful consideration should be given to the danger of this power [over artificial methods of contraception] passing into the hands of those public authorities who care little for the precepts of the moral law. Who will blame a government which in its attempt to resolve the problems affecting an entire country resorts to the same measures as are regarded as lawful by married people in the solution of a particular family difficulty? [The Encyclical argues against the lawfulness of artificial measures.] Who will prevent public authorities from favoring those contraceptive methods which they consider more effective? Should they regard this as necessary, they may even impose their use on everyone. It could well happen, therefore, that when people, either individually or in family or social life, experience the inherent difficulties of the Divine law and are determined to avoid them, they may give into the hands of public authorities the power to intervene in the most personal and intimate responsibility of husband and wife.

Consequently, unless we are willing that the responsibility of procreating life should be left to the arbitrary decision of men, we must accept that there are certain limits, beyond which it is wrong to go, to the power of man over his own body and its natural functions — limits, let it be said, which no one, whether as a private individual or as a public authority, can lawfully

<sup>72</sup> See generally Tom Mitchell, *China's "Workshop of the World" Suffers Acute Labour Shortages*, *FINANCIAL TIMES*, 26 February 2010, at 1 (discussing manpower constraints on Chinese exports, particularly in Guangdong Province and the manufacturing heartland of the Pearl River Delta).

exceed. These limits are expressly imposed because of the reverence due to the whole human organism and its natural functions. . . .<sup>73</sup>

To be sure, Muslims and Catholic Christians agree that a government is within its right to engage in certain kinds of demographic activities. As the *Catechism of the Catholic Church* explains:

The state has a responsibility for its citizens' well-being. In this capacity it is legitimate for it to intervene to orient the demography of the population. This can be done by means of objective and respectful information, but certainly not by authoritarian, coercive measures. The state may not legitimately usurp the initiative of spouses, who have the primary responsibility for the procreation and education of their children. In this area, it is not authorized to employ means contrary to the moral law.<sup>74</sup>

However, the One Child Policy of the CCP far exceeded the line between objective, respectful information and authoritarian, coercive measures. In so doing, the Policy condemned itself as a morally hideous and practically disastrous effort at social engineering.

### § 39.03 BALANCING RELIGIOUS FACTORS

Notwithstanding stereotypes to the contrary, Islam is not a sexually puritanical religion (nor, for that matter, is Catholic Christianity). In his commentary on the compilation of the *hadith* by *Imām* Muslim, Dr. Hasan writes:

Islam does not believe in the absolute suppression of the sensual side of human nature. The conception of the saintly life in Islam is not, therefore, the extermination of all carnal impulses, but to control them and keep them within proper limits. Islam does not make the life of an individual completely dark and dreary, devoid of all enjoyments of life. Islam encourages healthy enjoyments and one out of these is the satisfaction of the sexual desire. Islam does not associate the idea of sexual pleasure with that of sin and vice. Pleasure gives strength to the moral side of a man provided one does not transgress the limits of ethical codes.<sup>75</sup>

As for contraception, the issue for a Muslim couple involves more than economic, psychological, and scientific concerns. Indeed, from an Islamic perspective, such concerns are less significant than a careful, reverential contemplation of religious factors.

The religious factors include procreation and fulfilling the purpose of an Islamic marriage. The combination of these two factors yields a third one: procreating children that are pious and righteous, who become a source of reward for their

parents after their parents pass away.<sup>76</sup> Professor Hussain suggests there is a balancing among factors:

[I]n Islam, while procreation of children is one of the purposes of the marriage relationship, it is not the sole or dominant purpose, mutual love and support between the parties and prevention of illicit sex also being of importance.<sup>77</sup>

The Prophet emphasized the importance of marriage in its various dimensions. Marriage is not only meant to create permissible (*halal*) companionships. It also is the foundational structure for the development of the family and, through the growth of the Muslim community (*ummah*), a method of evangelization. 'Ā'isha, the favorite wife of Muhammad after Khadyja, related this *hadith*:

Marriage is from my way (*Sunnah*), thus whosoever does not practice my way [out of rejection] is not from me. And marry [and procreate], for indeed I will outnumber the other nations by you.<sup>78</sup>

In sum, through a lawful, loving marriage, normal conjugal relations, procreation, and rearing pious children, Muhammad encouraged Muslims to lead fulfilling religious lives and expand the *ummah*.

The ability to have children is looked upon extremely favorably in Islam — again, a gift from God (Allāh).<sup>79</sup> The Qur'an acknowledges that some couples are granted the ability to have children, while others are left barren. However, infertility is not to be regarded as a punishment. Rather, it is solely due to the will of Allāh and His Knowledge, as *Surah* 42 indicates.

<sup>49</sup>God has control of the heavens and the earth; He creates whatever He will — He grants female offspring to whoever He will, <sup>50</sup>male to whoever He will, or both male and female, and He makes whoever He will barren; He is all knowing and all powerful.<sup>80</sup>

Couples who are able to conceive children are thereby handed a tremendous responsibility, namely, to rear them as responsible citizens and devout Muslims. But, they also are promised an incredible reward as a result of raising upright Muslim children.

Death halts the actions of an individual. However, if that individual was a parent, and taught his or her children appropriate Islamic behavior, then that parent, after death, receives a good deed each time the child behaves well.<sup>81</sup> For example, if the parent taught the child to pray, then the parent receives a good deed each time the son or daughter supplicates and asks Allāh to have mercy on his or her parent. One of the Companions of the Prophet (*Ṣaḥābah*), Abū Hurayra, affirms the point through this *hadith*:

<sup>76</sup> See AL KANTHARI, *supra*, at 13.

<sup>74</sup> CATECHISM OF THE CATHOLIC CHURCH ¶ 2372 at 570 (United States Catholic Conference, Inc., Washington, D.C.: Libreria Editrice Vaticana, 2nd ed. 1997) (emphasis added). [Hereinafter, CATECHISM.]

<sup>75</sup> MUSLIM, *supra*, vol. II.B, book 16 (Book of Marriage), p. 339, fn. 2 to *hadith* no. 1400.

When a man dies, his acts come to an end, but [for] three, recurring charity, or knowledge (by which people) benefit, or a pious son, who prays for him (for the deceased).<sup>82</sup>

In effect, raising children properly is tantamount to storing one's treasure in Heaven.

In making choices about contraception, many Muslim couples rely on Qur'anic verses emphasizing trust in Allāh. In doing so, they do not (or should not) discount the notion of responsibility and moral agency in planning their life and employing methods of family planning. Additionally, they can and do look to the story of a man who was told by the Prophet to tie up his camel and then trust in God, or to the account of the Caliph 'Umar, who advised that one should plant the seeds and then trust in God for a good harvest. Indeed, Islam does not require one to glide passively through life. Rather, the religion and law require that each individual employ active means to bring about positive results and exercise his or her full human capacity.

Dr. Yusuf Al Qaradawi, a prominent contemporary Sunni scholar, identifies three main reasons Muslim couples typically acknowledge for employing reversible contraceptive methods.<sup>83</sup> The first is the fear that the pregnancy or delivery might endanger the life or health of the mother. In this respect, the Qur'an says:

- In *surah 2, ayah 195*:  
Spend in God's cause: do not contribute to your destruction with your own hands, but do good for God loves those who do good.<sup>84</sup>
- And, in *surah 4, ayah 29*:  
... Do not kill each other, for God is merciful to you.<sup>85</sup>

Dr. Al Qaradawi points out that the criterion to determining the gravity of this possibility is experience or the opinion of a reliable physician. This reason is consistent with the precepts of the *Shari'a*.

The second reason is the burden of children may hamper the circumstances of the family. The Qur'an states:

- In *surah 2, ayah 185*:  
... God wants ease for you, not hardship.<sup>86</sup>
- And, in *surah 5, ayah 6*:  
... God does not wish to place any burden on you: He only wishes to cleanse

<sup>82</sup> MUSLIM, *supra*, vol. IIIA, book 25 (Book of Will), p. 83, *hadith* no. 1631.

<sup>83</sup> See YUSUF AL-QARADAWI, *THE LAWFUL AND PROHIBITED IN ISLAM* 263-265 (Cairo, Egypt: El Falaḥ for Translation, Publishing & Distribution, 1997). (Hereinafter, AL QARADAWI.)

<sup>84</sup> QUR'AN, *supra*, 2:195 at 22 (emphasis added).

<sup>85</sup> QUR'AN, *supra*, 4:29 at 53 (emphasis added).

<sup>86</sup> QUR'AN, *supra*, 2:185 at 20 (emphasis added).

you and perfect His blessing on you, so that you may be thankful. . . .<sup>87</sup>

Yet, this reason is not consistent with the precepts of the *Shari'a*. Couples should not choose contraception out of fear of poverty. They are called to trust in God that He will not impose hardship on them by blessing them with multiple children that will impoverish them. That is, these Qur'anic passages are to be read consistently with the *surah 11, ayah 6, surah 17, ayah 31*, and the *hadith* narrated by the Caliph 'Umar. *Surah 2, ayah 185* and *surah 5, ayah 6* are redolent of Biblical passages to the effect that God plans for our welfare, not our woe. In Catholic Christian terms, all of the aforementioned passages might be said they sum up to the oft-repeated exhortation from Christ: *Noli Timere* (Fear Not, i.e., Do Not Be Afraid).

The third reason Muslim couples typically cite for use of contraception, is a medical one, as Dr. Al Qaradawi highlights. A new pregnancy, or a new baby, might harm a suckling infant by polluting breast milk and thereby causing harm to the baby.<sup>88</sup> Muhammad did not prohibit sexual intercourse with a suckling woman. However, he did demonstrate concern for a suckling child. For this reason, the Prophet discouraged — but did not prohibit — intercourse leading to pregnancy while a mother is nursing.

#### § 39.04 CONTRASTING OPINIONS: AMERICAN LAW AND 1965 SUPREME COURT DECISION IN *GRISWOLD v. CONNECTICUT*

Muslim societies are increasingly embracing scientific advancements in the area of contraception. While there is evidence of a particular method of contraception that stretches back to the time of the Prophet Muhammad, namely 'azl (withdrawal), modern Muslim couples tend to accept a variety of new methods to limit family size or space children apart. As a practical matter, the primary reasons for their acceptance of contraception methods vary from fear of poverty, to physical weakness of the mother, to health concerns of future children, and to the inadequacy of the parents to providing quality of life for subsequent children. As explained earlier, some — but not all — of these motivations are regarded as religiously acceptable bases for contraception.

The majority of modern day scholars do not discount the importance of family planning in Muslim societies. Islamic scholars do not discuss contraception in terms "marital privacy." But, they do all agree that contraception, if used, should be within the confines of marriage:

... Muslim scholars have pointed out that contraception should be practiced *only within marriage*, and they strongly disapprove of making contraceptives freely available, especially to minors and unmarried persons as is the practice in Western countries. Contraception when practiced for the purpose of enjoying illicit sex without risk is clearly *ḥarām*

<sup>87</sup> QUR'AN, *supra*, 5:6 at 68.

<sup>88</sup> See AL QARADAWI, *supra*, at 263-265.

(prohibited) [and gives rise to the possibility of criminal liability].<sup>89</sup>

In contrast, "privacy," and not necessarily "marital privacy," is the paradigm for contraception in American law, following the landmark 1965 United States Supreme Court decision in *Griswold v. Connecticut*.<sup>90</sup> Indeed, the widespread availability of artificial contraceptive devices in the United States is traceable directly to this case.

In *Griswold*, the Supreme Court held state prohibition of contraception contradictory to the "concept of liberty,"<sup>91</sup> and to inherent rights of privacy, found in the 14th Amendment to the United States Constitution. Section 1 of this Amendment states:

All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.<sup>92</sup>

The Supreme Court decided that contraception was protected from "all invasions on the part of the government . . . of the sanctity of a man's home and privacies of life."<sup>93</sup> Of course, the decision to use contraception remains with an individual American couple — the key point is that from a legal perspective, neither the Federal nor any State government can abridge that right to decide.

As under American law, under the *Shari'a* contraception is a matter left to the family unit.<sup>94</sup> But, Islamic scholars do not accord contraception legal status or protection in the American sense: it is not a right of privacy. Moreover, whereas the Supreme Court does not opine on the religious or other merits (or lack thereof) of contraception, nor should it, Islamic scholars do. This difference is to be expected when contrasting a secular with a sacred legal system. The *ulema* and *fukahā'* incline toward the same "bottom line" conclusion. Temporary contraception, while permissible (*halal*), should not be encouraged. It is even is reprehensible (*makrāh*), and becomes forbidden (*harām*) under certain circumstances. But, it is a decision left to believing couples to make after they consider their circumstances.

## § 39.05 CONTRASTING OPINIONS: CATHOLIC CHRISTIAN TEACHING AND 1968 ENCYCLICAL *HUMANAE VITAE*

### [A] Choice of Family Size

Juxtaposing Islamic Family Law precepts on contraception with the teaching of the Catholic Christianity on the topic is not easy for a number of reasons, due in part to misconceptions about the position of the Church. Moreover, in recent decades, few if any issues have generated greater controversy — other than possibly abortion — among Catholic and non-Catholic communities alike. Thus, to find parallels and distinctions between Catholic Christian and Islamic approaches to contraception, it is necessary to explain the basic points the Church does and does not make.

There are at least four misunderstandings about the teaching of the Catholic Church on contraception. They are fairly widespread, in both Catholic and non-Catholic circles. The reasons for them are varied, but certainly bad faith or willful blindness is not to be ascribed to any individual, community, or group. The teachings are profound, and not susceptible to a short "sound bite" in a mainstream news media program. Rather, they require careful study and meditation to appreciate.

The first misunderstanding is that the Catholic Church exhorts the faithful to have large families, or even that large family sizes are in some way religiously required. That is patently false, and is based in part on a narrow view of the passage in the Old Testament *Book of Genesis*, chapter 1, verse 28, concerning being fruitful and multiplying. To be sure, both Sacred Scripture (i.e., the Bible) and Sacred Tradition (i.e., the two millennia of Christian practice) indicate that a large family is a sign of the blessing of God and the generosity of parents, while sterile couples endure great suffering from not having a child or children (though by no means is sterility an evil).<sup>95</sup> After all, as Pope Paul VI stated in his 1968 Encyclical, *Humanae Vitae* (Of Human Life), married love is marked by three features:

- (1) Totality, meaning that husband and wife in their special friendship "generously share everything,"
- (2) Fidelity, meaning that husband and wife are faithfully exclusive to each other, and
- (3) Fecundity, meaning that husband and wife do not confine their loving interchange to each other, but also transcend themselves "to bring new life into being."<sup>96</sup>

<sup>95</sup> See Catechism, *supra*, §§ 2373-2374, 2379 at 571-572. As the *Catechism* indicates, the examples of such suffering include Abraham, in *Genesis* 15:2, and Rachel and Jacob, in *Genesis* 30:1. See *id.* § 2374. On the question of fertility treatment, such as in vitro fertilization (IVF), see *id.*, §§ 2375-2378 at 571-572.

<sup>96</sup> *Humanae Vitae*, *supra*, § 9. See also Catechism, *supra*, §§ 2390-2392 at 567-570 (discussing the love of a husband and wife, conjugal fidelity, and fecundity).

Nevertheless, Catholic Christianity, like Islam, leaves the decision of family size entirely up to a married couple.

Thus, like Muslim couples, Catholic Christian couples must evaluate their circumstances, not the least of which are economic and medical, in considering whether they can and should have a child, or more children. In both faiths, parenthood is a major responsibility, and not all couples are in a position at every point in their marriage to provide the necessary loving environment and educational support needed to raise productive citizens and pious persons. Father Leo J. Trese (1902-1970) writes:

In recent times there has been discussion on the topic of "responsible parenthood." This discussion has been inspired by two factors. One is the presumed danger, exaggerated out of all proportion to reality by some demographers, of overpopulating the earth to the point where there is not enough food for all. Another factor is the spiraling cost of providing children with all the medical, educational, and cultural advantages which they need for a normally successful and happy life in today's world.

Responsible parenthood would mean, then, that parents exercise Christian prudence in begetting children. Unselfishly but realistically they would appraise their present and probable resources, and would space their children accordingly.

There is nothing essentially unchristian about such a procedure. God has endowed us with intelligence and He expects us to use that intelligence as we cooperate with him in continuing his work of creation.<sup>97</sup>

Accordingly, Catholic Christian teaching encourages couples to consider their unique circumstances. If they have a serious reason not to have a child, or additional reasons, then they may choose not to do so. Simply put, neither the Church nor the Mosque regulates family size. Both faiths call upon their adherents to give careful consideration to a decision not to have children.

Should a couple make that choice, then the issue under either the *Shar'ia* or Catholic Christian teaching is one of contraceptive method. As Father Trese explains:

The crucial question which arises with respect to responsible parenthood concerns the means which are used to achieve it. To abstain from marital intercourse by mutual and free consent, whether periodically or for an extended period, is certainly the legitimate right of spouses.<sup>98</sup>

In other words, a couple may practice periodic continence to regulate whether they have children, the number of children they have, and the spacing between children. If they do so, then not only must they agree, but also they must act based on weighty reasons — in the language of various Church documents, "serious and

proportionate motives," or "serious personal reasons."<sup>99</sup> Such reasons would include the financial ability of a couple to raise a child properly, and medical concerns about the ability of the mother to bear a child. In this respect, Catholic Christianity, like Islam, teaches that having children is a natural purpose and end of marriage, hence an upright intention and moral motives should exist for electing to regulate births.<sup>100</sup>

## [B] Distinctions among Methods

The second misunderstanding is that the Catholic Church holds against all forms of contraception. That is an over-statement. Like Islamic religious and legal scholars (the *ulema* and *fukahā'*, respectively), Catholic theologians distinguish among methods of contraception. Like their Muslim counterparts, Catholic thinkers agree that certain methods are gravely sinful. In 1968, Pope Paul VI issued an Encyclical entitled *Humanae Vitae* (*Of Human Life*).<sup>101</sup> Paragraphs 13 and 14 state:

13. Men rightly observe that a conjugal act imposed on one's partner without regard to his or her condition or personal and reasonable wishes in the matter, is no true act of love, and therefore offends the moral order in its particular application to the intimate relationship of husband and wife. If they further reflect, they must also recognize that an act of mutual love which impairs the capacity to transmit life which God the Creator, through specific laws, has built into it, frustrates His design which constitutes the norm of marriage, and contradicts the will of the Author of life. Hence to use this Divine gift while depriving it, even if only partially, of its meaning and purpose, is equally repugnant to the nature of man and of woman, and is consequently in opposition to the plan of God and His holy will. But to experience the gift of married love while respecting the laws of conception is to acknowledge that one is not the master of the sources of life but rather the minister of the design established by the Creator. Just as man does not have unlimited dominion over his body in general, so also, and with more particular reason, he has no such dominion over his specifically sexual faculties, for these are concerned by their very nature with the generation of life, of which God is the source. "Human life is sacred — all men must recognize this fact," Our predecessor Pope John XXIII recalled. "From its very inception it reveals the creating hand of God." [Quoting *Mater et Magistra*, Encyclical Letter of Pope John XXIII on Christianity and Social Progress, ¶ 194, 15 May 1961, posted at [www.vatican.va](http://www.vatican.va).]

14. Therefore We base Our words on the first principles of a human and Christian doctrine of marriage when We are obliged once more to declare that the direct interruption of the generative process already begun and, above all, all direct abortion, even for therapeutic reasons, are to be

<sup>97</sup> LEO J. TRESE, *THE FAITH EXPLAINED* 433 (Manda, Philippines: Sinag-Tala Publishers, Inc. 1965, 6th Philippine printing, 1991, updated by Father Robert Bucciarelli). [Hereinafter, TRESE.] See also *Humanae Vitae*, *supra*, ¶ 10 (defining "responsible parenthood").

<sup>98</sup> TRESE, *supra*, at 433.

<sup>99</sup> Quoted in TRESE, *supra*, at 433.

<sup>100</sup> See Pope Pius XII, *Address to Obstetricians*, 29 October 1961, quoted in TRESE, *supra*, at 433. See also CATECHISM, *supra*, ¶¶ 2366-2367 at 569.

<sup>101</sup> See *Humanae Vitae*, *supra*.

*absolutely excluded as lawful means of regulating the number of children. Equally to be condemned, as the Magisterium of the Church has affirmed on many occasions, is direct sterilization, whether of the man or of the woman, whether permanent or temporary.* . . .<sup>102</sup>

Accordingly, abortion (including abortifacient medicines) and sterilization are morally unacceptable means of birth control. Note that *Humanae Vitae* explicitly mentions permanent and temporary means of sterilization. Thus, it does not matter whether a vasectomy, castration, tubal ligation, or other surgical procedures is or might be temporary: all are forbidden. At the same time, a therapeutic measure that is necessary to cure a bodily disease, which may pose a foreseeable impediment to procreation, is permitted, as that impediment is not the motive for using that measure.<sup>103</sup> In other words, a husband or wife can and should get a necessary medical treatment to remedy an ailment even if there is a risk the treatment will adversely affect their fertility.

As the Paragraph 13 of *Humanae Vitae* suggests, the basis for Catholic Christian teaching resembles that underlying the *Shari'a* rules on contraception. In both paradigms, the foundational point is that ability to procreate is a gift from God, as are children. To have a child is to share in the creative power of God, cooperate with the love of God, and interpret that love in raising the child.<sup>104</sup> The following statement from *Gaudium et Spes* (*Joy and Hope*), a document of the Second Vatican Council (1962-1965), is one with which Muslims would agree:

All should be persuaded that human life and the task of transmitting it are not realities bound up with this world alone. Hence, they cannot be measured or perceived only in terms of it, but always have a bearing on the eternal destiny of men.<sup>105</sup>

Consequently, deliberately destroying this ability is a rejection of this gift. It is a sin under the 5th of the 10 Commandments that proscribes killing, because sterilization is a kind of self-mutilation that kills the ability to reproduce.

Unlike the rules of Islamic Family Law, Catholic teaching does not regard all forms of reversible (temporary) contraception as permissible. Rather, this teaching accepts natural methods, specifically, NFP or other techniques that respect the fertility cycles of a woman. But, it rejects artificial methods. Paragraph 16 of *Humanae Vitae* addresses recourse to infertile periods:

. . . [S]ome people today raise the objection against this particular doctrine of the Church concerning the moral laws governing marriage, that human intelligence has both the right and responsibility to control those forces of irrational nature which come within its ambit and to direct them toward ends beneficial to man. Others ask on the same point whether it is

<sup>102</sup> *Humanae Vitae*, *supra*, ¶¶ 13-14 (emphasis added).

<sup>103</sup> See *Humanae Vitae*, *supra*, ¶ 15, 25.

<sup>104</sup> See *Catechism*, *supra*, ¶ 2367 at 569.

<sup>105</sup> Pastoral Constitution on the Church in the Modern World, *Gaudium et Spes* (*Joy and Hope*), Pt. II, Ch. I, ¶ 51, 7 December 1965, posted at [www.vatican.va](http://www.vatican.va) (emphasis added). See also *Catechism*, *supra*, ¶ 2371 at 570 (quoting *Gaudium et Spes*).

not reasonable in so many cases to use artificial birth control if by so doing the harmony and peace of a family are better served and more suitable conditions are provided for the education of children already born. To this question We must give a clear reply. *The Church is the first to praise and commend the application of human intelligence to an activity in which a rational creature such as man is so closely associated with his Creator. But she affirms that this must be done within the limits of the order of reality established by God.*

*If therefore there are well-grounded reasons for spacing births, arising from the physical or psychological condition of a husband or wife, or from external circumstances, the Church teaches that married people may then take advantage of the natural cycles immanent in the reproductive system and engage in marital intercourse only during those times that are infertile, thus controlling birth in a way which does not in the least offend the moral principles which We have just explained.*

*Neither the Church nor her doctrine is inconsistent when she considers it lawful for married people to take advantage of the infertile period but condemns as always unlawful the use of means which directly prevent conception, even when the reasons given for the later practice may appear to be upright and serious. In reality, these two cases are completely different. In the former the married couple rightly use a faculty provided them by nature. In the later they obstruct the natural development of the generative process. It cannot be denied that in each case the married couple, for acceptable reasons, are both perfectly clear in their intention to avoid children and wish to make sure that none will result. But it is equally true that it is exclusively in the former case that husband and wife are ready to abstain from intercourse during the fertile period as often as for reasonable motives the birth of another child is not desirable. And when the infertile period recurs, they use their married intimacy to express their mutual love and safeguard their fidelity toward one another. In doing this they certainly give proof of a true and authentic love.*<sup>106</sup>

In brief, natural methods are licit, as they rely on monitoring fertility cycles of a woman.

Considerable medical advancements have been made in recent decades so that such monitoring is far more accurate than the old-fashioned rhythm (or calendar) method.<sup>107</sup> That method presumed the time of the next ovulation could be forecast

<sup>106</sup> *Humanae Vitae*, *supra*, ¶ 16 (emphasis added).

<sup>107</sup> Indeed, such advancements were encouraged by Paul VI in *Humanae Vitae*. See *Humanae Vitae*, *supra*, ¶ 24.

It is worth underscoring the point that NFP is distinct from the rhythm method, despite occasional media and even medical references that conflate the two. See DAVID BOHR, CATHOLIC MORAL TRADITION 260 (Huntington, Indiana: Our Sunday Visitor, rev'd ed., 1999). [Hereinafter, BOHR.] Monsignor Bohr is Rector of Pius X Seminary in Dalton, Pennsylvania.

It also is worth noting that no less than the World Health Organization (WHO) has declared that: Because it requires constant motivation, NFP is more difficult for many people to utilize than

by monitoring previous menstrual cycles. It proved inaccurate, particularly if the cycles did not follow a regular pattern. In contrast, "NFP" is an umbrella term for various methods to space or limit pregnancy by observing the signs and symptoms that naturally occur with the fertile and infertile phases of the menstrual cycle.<sup>108</sup> Because a couple focuses on those signs and symptoms of a particular cycle, the regularity of the pattern of cycles is irrelevant. Accordingly, couples can and do use NFP both to get pregnant, and to avoid an unplanned pregnancy. They engage in conjugal relations during the days of a month when the wife is fertile, if they seek a child, or abstain from those relations on such days, if they seek to space or limit births. On all other days of the month, the wife is not fertile, hence the couple can engage in sexual intercourse knowing pregnancy is not possible. Applied properly, NFP methods are up to 99 percent successful.<sup>109</sup> They are inexpensive, pose no health risks to women, and engender respect for women as a total person. They hold out the prospects of enriching marriage, helping couples accept moral responsibility for their intimate relations, and encouraging greater appreciation for children.

### [C] Rationale

Why does Catholic teaching distinguish among temporary contraceptive methods not found in the *Shari'a*, namely, between natural methods like NFP, on the one hand, and artificial methods like condoms, diaphragms, and "the pill," on the other hand?<sup>110</sup> The answer relates to the third misunderstanding about

contraceptive pills. However, NFP remains the most problem-free method of family limitation from a medical perspective.

*Id.* at 260 (quoting Kevin O'Rourke, O.P., *Humanae Vitae, A 25-Year Retrospective*, 60 *LINACRE QUARTERLY* 77 (November 1993), in turn quoting the WHO).

<sup>108</sup> See *Natural Family Planning*, THE LEAVEN (Newspaper of the Archdiocese of Kansas City, Kansas), 30 July 2010, at 5. (Hereinafter, *Natural Family Planning*.) On NFP generally, see, e.g., United States Conference of Catholic Bishops, [www.usccb.org](http://www.usccb.org) ("Life Issues") and NFP Outreach, [www.nfpoutreach.org](http://www.nfpoutreach.org). Concerning a specific methodology, see, e.g., the Creighton Model FertilityCare System, [www.creightonmodel.com](http://www.creightonmodel.com), and the scientific peer reviews of this System referenced at [www.creightonmodel.com/references.htm](http://www.creightonmodel.com/references.htm).

<sup>109</sup> *Natural Family Planning*, *supra*.

<sup>110</sup> A related and hotly debated issue is whether the convenient availability of temporary contraceptives causally contributes to an increase in promiscuous sexual behavior. The question, which was posed by *Time* magazine in a 1967 cover story on the pill, is of concern not only to Catholics and Muslims, but also to persons regardless of their faith. The *Time* story stated:

Does the convenient contraceptive promote promiscuity? In some cases, no doubt it does—as did the automobile, the drive-in movie, and the motel. But the consensus among both physicians and sociologists is that a girl who is promiscuous on the pill would have been promiscuous without it.

Quoted in Rita Rubin, *The Pill Turns 50*, USA TODAY, 7-9 May 2010, at 1A-2A.

The *Time* answer is a poor one. First, the automobile, drive-in movie, and motel do not exist with the specific purpose of sexual intercourse among unmarried (or, for that matter, married) couples. In considering causal factors, there are important distinctions to be made between directly contributing independent variables, and indirect factors that may facilitate an outcome without existing to do so. Second, whether the "consensus" still holds (if, indeed, it ever held), particularly given what is now known about the risks from promiscuous behavior (including sexually transmitted diseases (STDs)), is dubious. Third, there is a general concern about whether widespread access to temporary contraceptives contributes to sexual objectification of women, a disordered attitude toward intimacy among women and men, and a general decline in moral standards.

Catholic precepts, which is that they are based on little else than the thinking of some male clergy who do not have the interests of women in mind. In truth, the rationale has deep historical roots, reflects a sincere concern to empower women in an authentic manner and to objectify them as sexual instruments, and has profound moral and theological foundations.

Until 1930, all Christian denominations — Protestant and Catholic — agreed artificial methods of contraception were morally unacceptable. That position was not based on the New Testament of the Bible, which is silent on contraception. Rather, it was based in part on Natural Law (discussed below), and in part on the story of Onan in the Old Testament. This story, which appears in the first book of the Bible, *The Book of Genesis*, chapter 38, verses 6-10:

<sup>6</sup>Judah got a wife named Tamar for his first-born [son], Er. <sup>7</sup>But Er, Judah's first-born, greatly offended the Lord; so the Lord took his life. <sup>8</sup>Then Judah said to Onan [who was the second son of Judah and the daughter of a Canaanite named Shua, Er being the first of their sons], "Unite with your brother's widow [Tamar], in fulfillment of your duty as brother in law, and thus preserve your brother's line."<sup>9</sup>Onan, however, knew that the descendants would not be counted as his; so whenever he had relations with his brother's widow, he wasted his seed on the ground, to avoid contributing offspring for his brother. <sup>10</sup>What he did greatly offended the LORD, and the LORD took his life too.<sup>11</sup>

However, this story is a weak basis on which to fashion a rule about withdrawal (*coitus interruptus*), much less about all artificial contraception. To appreciate why, consider the footnote in the *Catholic Study Bible* pertaining to it:

Preserve your brother's line: literally, "raise up seed for your brother." The ancient Israelites regarded as very important their law of levirate, or "brother-in-law" marriage. . . . In the present story, it is *primarily* Onan's violation of this law, rather than the means he used to circumvent it, that brought on him God's displeasure. . . .<sup>112</sup>

In other words, in the terms of chapter 38, verse 10, the key issue is what precisely was that Onan "did" that "greatly offended" God?

The *Book of Genesis* does not answer this question. There are four possibilities:

#### (1) Disrespect of the Father?

Was it that Onan disobeyed his father, Judah, by not impregnating the widow of his brother, Tamar? Onan simply refused to follow direct instructions, and from his father no less. Yet, while certainly not commendable behavior, respect for parents hardly seems to be the point of the story, particularly in view of the legal dimensions (explained below).

<sup>111</sup> *The Book of Genesis*, 38:8-10, in THE CATHOLIC STUDY BIBLE 47 (New York, New York: Oxford University Press, 1990, New American Bible trans.) (emphasis added). [Hereinafter, BIBLE.]

<sup>112</sup> *The Book of Genesis*, in BIBLE, *supra*, fn. 38, 8 at 47 (emphasis added).

## (2) Temporary Contraception?

Was it the intentional act of withdrawal, and thereby spilling semen and using sex for a purpose other than procreation, which angered God and caused Him to punish Onan with death? In 191 A.D., Clement of Alexandria (c. 150-c.215 A.D.), a Christian theologian and teacher of Origen (185-254 A.D.), one of the Fathers of the Church, wrote as follows:

- Because of its Divine institution for the propagation of man, the seed is not to be vainly ejaculated, nor is it to be damaged, nor is it to be wasted.<sup>113</sup>
- To have *coitus [interruptus]* other than to procreate children is to do injury to nature.<sup>114</sup>

However, these statements do not refer explicitly to the story of Onan, hence it is difficult to draw an inference about why God was angry with Onan from them. They do, of course, speak not only to the act of withdrawal, but also to masturbation. Later, in 393 A.D., Saint Jerome (c. 347-420 A.D.), who translated the Bible into Latin (the *Vulgate*) and is a Doctor of the Church, does refer to Onan, asking rhetorically:

But I wonder why he the heretic Jovinianus set Judah and Tamar before us for an example, unless perchance even harlots give him pleasure; or Onan, who was slain because he begrudged his brother his seed. Does he imagine that we approve of any sexual intercourse except for the procreation of children?<sup>115</sup>

Yet, as the above-quoted footnote suggests, modern scholars tend to discount the possible inference that God punished Onan for spilling his seed. The act of withdrawal was the means by which Onan acted, but not the end or intention of his action. In other words, the goal Onan sought, and why he sought it, seem to be particularly condemnable.

## (3) Disobedience of the Law?

Was it that Onan violated the Israelite law of continuing lineage, under which the second brother (Onan) was supposed to maintain the family line by bearing a son with the (Tamar) of the eldest brother (Er)? Under that law, when relatives of the same clan held their property in common, even though they were married, how could property of a deceased man stay in the same clan?<sup>116</sup> The law of "levirate marriage" stated that if the widow of the deceased married her brother-in-law, and they had children, then the property would stay within the clan.

<sup>113</sup> CLEMENT OF ALEXANDRIA, THE INSTRUCTOR OF CHILDREN, 2:10:91-2 (191 A.D.), posted at Onan, WIKIPEDIA, <http://en.wikipedia.org/wiki/Onan>. [Hereinafter, CLEMENT.]

<sup>114</sup> CLEMENT, *supra*, 2:10:95:3 (191 A.D.).

<sup>115</sup> SAINT JEROME, AGAINST JOVINIAN 1:19 (393 A.D.), posted at Onan, WIKIPEDIA, <http://en.wikipedia.org/wiki/Onan>.

<sup>116</sup> See *The Book of Deuteronomy*, in BIBLE, *supra*, fn. 25, 5 at 25. "Levirate" is derived from the Latin word "*levir*," which means "a husband's brother." See *id.*

Selfishly, however, Onan disregarded his family obligations, because he did not want to have any descendants who he could not claim as his own. Hence, he practiced *coitus interruptus*.

The above-quoted footnote indicates the third possibility is the correct inference to draw from the story. Indeed, *The Book of Deuteronomy*, chapter 25, verses 5-10, state:

<sup>5</sup>"When brothers live together [such as Er and Onan] and one of them dies without a son [as did Er], the widow [such as Tamar] of the deceased [Er] shall not marry anyone outside the family; but her husband's brother [Onan] shall go to her and perform the duty of a brother-in-law by marrying her. <sup>6</sup>The first-born son she bears shall continue the line of the deceased brother, that his name may not be blotted out from Israel. <sup>7</sup>If, however, a man does not care to marry his brother's wife, she shall go up to the elders at the gate and declare, 'My brother-in-law does not intend to perform his duty toward me and refuses to perpetuate his brother's name in Israel.' <sup>8</sup>Thereupon the elders of his city shall summon him and admonish him. If he persists in saying 'I am not willing to marry her,' <sup>9</sup>his sister-in-law, in the presence of the elders, shall go up to him and strip his sandal from his foot and spit in his face, saying publicly, 'This is how one should be treated who will not build up his brother's family!' <sup>10</sup>And his lineage shall be spoken of in Israel as 'the family of the man stripped of his sandal.' "<sup>11</sup>

Clearly, not adhering to one's responsibilities had adverse legal ramifications, in terms of property ownership, for a family, and tarnished severely the reputation of that family.

## (4) Lying?

Was it deceit the got Onan into trouble with God? The above-quoted passage from Deuteronomy intimates this possibility. In the passage, a hypothetical brother-in-law openly proclaims his unwillingness to marry the wife of his dead brother. Onan, however, did not make such a proclamation. Rather, he engaged in conjugal relations with Tamar, but then withdrew before she could conceive. Whereas the hypothetical brother-in-law stubbornly refused to follow the law, Onan acted as if he was following it, but in fact did not. Arguably, that deceit was what most offended God, and explains why Onan suffered death, while the hypothetical brother-in-law suffered the less severe penalty of shame.

Honesty and humility call for recognition that not even the finest of theologians can know for sure what Onan "did" to "greatly offend" God. To know that answer would be to know the mind of God, a manifest impossibility for any human. Nevertheless,

<sup>117</sup> *The Book of Deuteronomy*, in BIBLE, *supra*, 25:5-10 at 25-26. Note that Moses is the speaker, presenting to his people the law proclaimed by God to him on Mount Sinai. See *id.*, Introductory Note at 187. See also *id.*, *The Book of Ruth* 2:20 at 280, and fn. 2, 20 at 280 (concerning the right and duty of a near relative of the same clan to marry the widow of a relative who died with no male heirs so as to continue the lineage of that relative); ALAN DEBROWITZ, THE GENESIS OF JUSTICE 169-170 (Grand Central Publishing, 2000) (suggesting the disobedience of Onan, not his sexual behavior; angered Yahweh (God)).

the means Onan used to effect his plan hardly seem appropriate, or to put it differently, he used such means in pursuit of an objectionable plan.

Based in part on this perspective, but also on additional grounds (namely, Natural Law and the Theology of the Body, discussed below), Catholic Christian teaching holds that withdrawal is morally unacceptable. Pope Paul VI writes in Paragraph 14 of *Humanae Vitae*:

Similarly excluded [from licit birth control methods] is *any action which either before, at the moment of, or after sexual intercourse, is specifically intended to prevent procreation* — whether as an end or as a means.<sup>118</sup>

By both explicit reference to “any action,” and by analogy, other temporary methods are regarded in the same manner as withdrawal, namely, impermissible. Note the difference in Islam: withdrawal (*ʿazl*) was practiced historically, and countenanced in the *ḥadīth*, so applying analogical reasoning (*qiyās*), a consensus (*ijmaʿ*) emerged that artificial methods are permissible. In Christianity, the starting point was the opposite: withdrawal had been punished by God, so it cannot be permissible, and thus by analogy other temporary methods also are wrong.

The 6th and 9th Commandments (also set out in the Old Testament, in *Exodus* 20:2-17 and *Deuteronomy* 5:6-21) provide additional bases for the traditional teaching against artificial contraceptive methods. These Commandments, respectively, enjoin adultery and the coveting of a woman other than one's own wife. To be sure, they do not expressly forbid artificial contraception. However, that prohibition has been regarded as an extension of what they do enjoin.

Nevertheless, in 1930, when the Church of England (Anglican Communion) held its decennial conference at Lambeth, it essentially changed its long-standing position. It authorized the use of artificial contraception under certain circumstances.<sup>119</sup> On a vote of 193 to 67, the Anglican bishops approved Resolution 15, which states:

Where there is clearly felt moral obligation to limit or avoid parenthood, the method must be decided on Christian principles. The primary and obvious method is complete abstinence from intercourse (as far as may be necessary) in a life of discipline and self-control lived in the power of the Holy Spirit. Nevertheless in those cases where there is such a clearly felt moral obligation to limit or avoid parenthood, and where there is a morally sound reason for avoiding complete abstinence, the Conference agrees that other methods may be used, provided that this is done in the light of the same Christian principles. The Conference records its strong condemna-

tion of the use of any methods of conception control from motives of selfishness, luxury, or mere convenience.<sup>120</sup>

(Resolution 16 recorded “abhorrence of the sinful practice of abortion,” and Resolution 17 condemned propaganda that treats the use of artificial birth control, rather than changing Christian opinion, as a means of resolving unsatisfactory economic and social conditions.<sup>121</sup>) Later on, the Anglican Church permitted them in all instances. Thereafter, most other Protestant denominations followed suit.

With the 1965 United States Supreme Court decision in *Griswold v. Connecticut* (discussed above), artificial contraceptives became widely available in the United States. Moreover, in the late 1960s and 1970s, social movements in the United States and other western, non-Muslim countries ushered in greater sexual freedom, meaning in particular a change in culture. It became more acceptable for individuals to engage in intercourse outside of marriage. Sex itself became viewed less as about having children and more about personal physical gratification. And, artificial contraceptives were seen as giving individuals the ability to express themselves sexually, when and with whom they wanted, and in particular liberating women so that they could have greater control over their own bodies. Not surprisingly, today a vast array of artificial contraceptives are available over-the-counter in pharmacies, groceries, and convenience stores.

Ironically, many of the promises of artificial contraception, and the birth control pill in specific, remain unfulfilled. In May 1960, when the United States Food and Drug Administration (FDA) gave approval to the pharmaceutical giant, Searle, for a pill that combines the hormones estrogen and progesterone, it was argued this pill would:<sup>122</sup>

- Liberate women from male domination, and free women from being “essentially slaves to their biology,” as Professor Helen Alvare of George Mason University School of Law in Washington, D.C., puts it.<sup>123</sup>
- Lead to fewer divorces.
- Sharply decrease the number of unwanted pregnancies.
- Drastically reduce the number of women seeking abortions, and the actual number of abortions (with the caveat that abortion did not become legal until 1973 with the *Roe v. Wade* decision rendering unconstitutional state criminalization of abortion).
- Increase the well-being of children, because only wanted children would be born.

<sup>123</sup> Quoted in O'Brien, *supra*. Professor Alvare served as the Chief Pro-Life Spokeswoman for the United States Conference of Catholic Bishops (USCCB).

<sup>118</sup> *Humanae Vitae*, *supra*, ¶ 14 (emphasis added). See also CATECHISM, *supra*, ¶ 2370 at 570 (quoting *Humanae Vitae* ¶ 14).

<sup>119</sup> See *Birth Control*, posted at [www.catholic.com/library/Birth\\_Control.asp](http://www.catholic.com/library/Birth_Control.asp).

The 1930 meeting was the Seventh such Conference, the first one of which was in 1867, and all of which are convened by the Archbishop of Canterbury. Resolutions passed at such Conferences technically have no legal effect, but are highly influential.

As Catholic moral theologian, Janet Smith, the Father Michael J. McGivney Professor at Sacred Heart Major Seminary in Detroit, Michigan says, none of these expectations was "stupid."<sup>124</sup> It honestly and reasonably was believed "that contraceptives would make for better marriages, fewer unwanted pregnancies, [and] fewer abortions."<sup>125</sup>

Without doubt, the pill "coincided with, and arguably caused, the greatest paradigm shift in relations between the sexes in all of human history," as Barbara Kay, a writer for the National Post in Ontario, Canada, puts it.<sup>126</sup> Yet, mounting medical evidence indicates the pill has adverse side effects: loss of bone mineral density, and increased rates of breast cancer, blood clots, diabetes, depression, and anxiety.<sup>127</sup> Moreover, over the last half-century, statistical evidence in the United States shows the opposite of what was heralded has occurred:<sup>128</sup>

- The divorce rate has doubled from 25 to 50 percent of all marriages, between 1965 and 1975, respectively, precisely as the pill became more widespread. It leveled off at roughly half of all marriages, when (as Professor Smith contends) all women who wanted access to the pill got it.
- In 1960, the percentage of unintended pregnancies (i.e., children born out of wedlock) was 6 percent of white children and 22 percent of black children. By the mid-2000s, the figures skyrocketed: one-third of white births, 70 percent of black births, and half of Hispanic births were to unwed mothers. Overall (according to the National Campaign to Prevent Teen and Unplanned Pregnancy), over 3 million of the 6.4 million pregnancies annually are not planned, and about 1.2 million of them result in an abortion.
- Between 1973, when the Supreme Court legalized abortion, and 2005, there were over 45 million abortions. From 1973 through roughly 2010, the number of abortions has been approximately 50 million. While the number of abortions annually decreased each year in the 2000s, the pill is unlikely to be the reason. About 54 percent of women who have an abortion use a contraceptive method during the month they become pregnant (according to the Guttmacher Institute).
- Children are better off now than in 1960 in a number of respects, but (according to the Federal Interagency Forum on Child and Family Statistics) there are alarming ways in which they are worse off: greater instances of depression, poorer diets leading to increased obesity, more living in poverty, and a higher incidences of child abuse and neglect.
- As for equality with men and women's liberation, Professor Alvare observes it is true that women now have "access to places and positions that once

belonged to men."<sup>129</sup> But, this gain has "nothing to do with the chemicals they've swallowed," and "isn't a full measure of women's equality and dignity." She opines that women "are now in all the places where men were, but they have never been seen more as sex objects than they are now."

Of course, to this day perceptions of the pill vary considerably.<sup>130</sup> Does it improve the lives of women? Overall, 56 percent of Americans think so, with a modest difference by gender: 59 percent of men say "yes," while 54 percent of women agree. Does the pill improve American family life? The answer depends in part on religion. Among mainstream Protestants, 52 percent say "yes." But, only 41 percent of white Evangelical Protestants, and 38 percent of Catholics, think so.

In any event, amidst the "Sexual Revolution" of the 1960s and 1970s, Catholic thinkers devoted considerable attention and debate to the traditional teaching of the Church. By no means did they all agree.<sup>131</sup> The Papal *Encyclical* that emerged in 1968, in the midst of that tumultuous era, reaffirmed traditional Church teaching on licit versus illicit methods of regulating births. To the present day, it would be disingenuous to suggest all Catholic thinkers, including laity, are of one mind on the topic. Indeed, *Humanae Vitae* itself acknowledges in Paragraph 18:

*It is to be anticipated that perhaps not everyone will easily accept this particular teaching. There is too much clamorous outcry against the voice of the Church, and this is intensified by modern means of communication. But it comes as no surprise to the Church that she, no less than her Divine Founder, is destined to be a "sign of contradiction." [Quoting The Gospel According to Luke, 2:34.] She does not, because of this, evade the duty imposed on her of proclaiming humbly but firmly the entire moral law, both natural and evangelical.*

*Since the Church did not make either of these laws, she cannot be their arbiter — only their guardian and interpreter. It could never be right for her to declare lawful what is in fact unlawful, since that, by its very nature, is always opposed to the true good of man.*

In preserving intact the whole moral law of marriage, the Church is convinced that she is contributing to the creation of a *truly human civilization*. She urges man not to betray his personal responsibilities by putting all his faith in technical expedients. In this way she defends the dignity of husband and wife.<sup>132</sup>

<sup>129</sup> Quoted in O'Brien, *supra*.

<sup>130</sup> The statistics on perception are recounted in O'Brien, *supra*, based on a May 2010 CBS News poll, which has a margin of error of  $\pm 4$  percentage points.

<sup>131</sup> See, e.g., BOHR, *supra*, at 251-260 (analyzing *Humanae Vitae* and the developing theology of Christian marriage in the Catholic Church during the 20th century); LESLIE WOODOCK TENTLER, CATHOLICS AND CONTRACEPTION — AN AMERICAN HISTORY ch. 6 and Epilogue (Ithaca, New York: Cornell University Press, 2004) (discussing the events of 1962-1968, *Humanae Vitae*, and its aftermath). <sup>128</sup> See O'Brien, *supra*.

*Humanae Vitae* remains the key document embodying the precepts of the Church on artificial methods of contraception, and is worthy of continued study and meditation.

The teaching of *Humanae Vitae* is based not only on the Old Testament sources, but also on Natural Law, that is, rules that are written into the human heart and discernible through the use of reason. Paragraphs 11 and 12 of that Encyclical explain:

11. The sexual activity, in which husband and wife are intimately and chastely united with one another, through which human life is transmitted, is, as the recent [Second Vatican] Council recalled "noble and worthy." [Quoting *Pastoral Constitution on the Church in the World of Today*, no. 49, 1966.] It does not, moreover, cease to be legitimate even when, for reasons independent of their will, it is foreseen to be infertile. For its natural adaptation to the expression and strengthening of the union of husband and wife is not thereby suppressed. The fact is, as experience shows, that new life is not the result of each and every act of sexual intercourse. God has wisely ordered laws of nature and the incidence of fertility in such a way that successive births are already naturally spaced through the inherent operation of these laws. The Church, nevertheless, in urging men to the observance of the precepts of the natural law, which it interprets by its constant doctrine, teaches that each and every marital act must of necessity retain its intrinsic relationship to the procreation of human life.

12. *This particular doctrine, often expounded by the Magisterium of the Church, is based on the inseparable connection, established by God, which man on his own initiative may not break, between the unitive significance and the procreative significance which are both inherent to the marriage act.*

*The reason is that the fundamental nature of the marriage act, while uniting husband and wife in the closest intimacy, also renders them capable of generating new life — and this as a result of laws written into the actual nature of man and of woman. And if each of these essential qualities, the unitive and procreative, is preserved, the use of marriage fully retains its sense of true mutual love and its ordination to the supreme responsibility of parenthood to which man is called. We believe our contemporaries are particularly capable of seeing that this teaching is in harmony with human reason.*<sup>133</sup>

Notably, Church teaching on matters of contraception, and more generally on sexual morality has been synthesized and advanced in recent decades by what has come to be known as the "Theology of the Body."<sup>134</sup>

<sup>133</sup> *Humanae Vitae*, *supra*, ¶ 14 (emphasis added). See also Catechism, *supra*, ¶ 2366 at 569 (quoting *Humanae Vitae*, ¶ 12).

<sup>134</sup> For excellent explanations of this Theology, see Pope John Paul II, *Theology of the Body in Simple Language* (Scotts Valley, California: CreateSpace (Amazon), 2009); Pope John Paul II, *Man and Woman He Created Them: A Theology of the Body* (Pauline Books, 2006); Christopher West, *Theology*

The catalyst for the Theology of the Body was a seminal book by Karol Wojtyła, *Love and Responsibility*, published in 1960 before he became Pope John Paul II.<sup>135</sup> Because of their profundity, this book, and subsequent publications and pronouncements, still are being digested by Catholic clergy and laity alike. Indeed, the original version of *Love and Responsibility* appeared in Polish, and the first English translation was not published until 1981. The gist, however, is clear enough, and builds on the above-discussed Biblical and Natural Law sources. In brief, the Theology of the Body proposes that sexual intimacy is an act of unconditional and complete mutual self-giving, the husband to the wife, and *vice versa*. Each spouse offers all that he or she has to the other. This mutual self-giving has two meanings: life-giving and love-giving, or the procreative and unitive aspects of intimacy, respectively.

Through their coming together as one, they may give new life, and they do share love in the most personal physical sense possible. When a couple mutually self-gives without recourse to artificial contraception, they hold back nothing from each other, nor do they hold back anything from God. They treat each other as a subject, *i.e.*, as a fully human person endowed by God with dignity. Through their own free will to be open to new life, they allow God to enter their union. Their uninhibited act of sharing helps ensure that neither regards the other as an object for his or her of sexual gratification.

In contrast, artificial contraception de-couples the life-giving from the love-giving dimensions of human sexuality, and easily leads to an inauthentic, materialistic view of intimacy. Love is not viewed as a whole package in which God plays a role. Rather, love is disaggregated and compartmentalized: unprotected sex produces babies, who also can be produced with the assistance of technology; whereas protected sex often is an assertion of the self. Thus, Pope John Paul II writes in his 1981 Encyclical Letter, *Familiaris Consortio* (Of Family Partnership):

When couples, by means of recourse to contraception, separate these two meanings that God the Creator has inscribed in the being of man and woman and in the dynamism of their sexual communion, they act as "arbiters" of the Divine plan and they "manipulate" and degrade human sexuality — and with it themselves and their married partner — by altering its value of "total" self-giving. *Thus the innate language that expresses the total reciprocal self-giving of husband and wife is overlaid, through contraception, by an objectively contradictory language, namely, that of not giving oneself totally to the other. This leads not only to a positive refusal to be open to life but also to a falsification of the inner truth of conjugal love, which is called upon to give itself in personal totality.*

*When, instead, by means of recourse to periods of infertility, the couple respect the inseparable connection between the unitive and procreative meanings of human sexuality, they are acting as "ministers" of God's plan*

of the Body for Beginners — A Basic Introduction to Pope John Paul II's Sexual Revolution (West Chester, Pennsylvania: Ascension Press, 2004).

<sup>135</sup> See KAROL WOJTYŁA (POPE JOHN PAUL II), *LOVE AND RESPONSIBILITY* (1960), FL. Collins, Colorado: Ignatius Press, rev'd ed., 1963).

and they "benefit from" their sexuality according to the original dynamism of "total" self-giving, without manipulation or alteration.

In the light of the experience of many couples and of the data provided by the different human sciences, theological reflection is able to perceive and is called to study further the difference, both anthropological and moral, between contraception and recourse to the rhythm of the cycle: it is a difference which is much wider and deeper than is usually thought, one which involves in the final analysis two irreconcilable concepts of the human person and of human sexuality. The choice of the natural rhythms involves accepting the cycle of the person, that is the woman, and thereby accepting dialogue, reciprocal respect, shared responsibility and self-control. To accept the cycle and to enter into dialogue means to recognize both the spiritual and corporal character of conjugal communion and to live personal love with its requirement of fidelity. In this context the couple comes to experience how conjugal communion is enriched with those values of tenderness and affection which constitute the inner soul of human sexuality, in its physical dimension also. In this way sexuality is respected and promoted in its truly and fully human dimension, and is never "used" as an "object" that, by breaking the personal unity of soul and body, strikes at God's creation itself at the level of the deepest interaction of nature and person.<sup>136</sup>

Moreover, a materialistic view of intimacy has particularly negative consequences for women: rather than being liberated, they become objectified, which is to say demeaned and degraded, by men, who regard them as instruments for their own enjoyment. Thus, in Paragraph 17 of *Humanae Vitae*, Pope Paul VI writes:

Responsible men can become more deeply convinced of the truth of the doctrine laid down by the Church on this issue if they reflect on the consequences of methods and plans for artificial birth control. Let them first consider how easily this course of action could open wide the way for marital infidelity and a general lowering of moral standards. Not much experience is needed to be fully aware of human weakness and to understand that human beings — especially the young, who are so exposed to temptation — need incentives to keep the moral law, and it is an evil thing to make it easy for them to break that law. Another effect that gives cause for alarm is that a man who grows accustomed to the use of contraceptive methods may forget the reverence due to a woman, and, disregarding her physical and emotional equilibrium, reduce her to being a mere instrument of the satisfaction of his own desires, no longer considering her as his partner whom he should surround with care and affection.<sup>137</sup>

In this regard, it may be observed that (as of February 2010), over 40 percent of all children in the United States are born out of wedlock, which is an increase in less than 50 years in the out-of-wedlock birth rate from under 5 percent.<sup>138</sup> Additionally, some contraceptive methods — the pill in particular — have dubious or adverse long-term consequences on the health of women. Herein, then, lies yet another justification for Catholic Christian teaching on artificial contraception: a consequential argument that Pope Paul VI was farsighted in making in 1968.

#### [D] Gravity

Significantly, the above-quoted language in *Humanae Vitae* does not expressly state that use of artificial contraceptive methods is "gravely" or "mortally" sinful. Nevertheless, it is widely seen as such by many in the Church. Paragraph 14 of *Humanae Vitae* not only dubs such methods "intrinsically wrong," but also casts the debate about such methods in the broader and deeper context of good and evil:

Neither is it valid to argue, as a justification for sexual intercourse which is deliberately contraceptive, that a lesser evil is to be preferred to a greater one, or that such intercourse would merge with procreative acts of past and future to form a single entity, and so be qualified exactly by exactly the same moral goodness as these. *Though it is true that sometimes it is lawful to tolerate a lesser moral evil in order to avoid a greater evil or in order to promote a greater good, it is never lawful, even for the gravest reasons, to "do evil that good may come of it" (quoting The Letter of Saint Paul to the Romans 3:8) — in other words, to intend directly something which of its very nature contradicts the moral order, and which must therefore be judged unworthy of man, even though the intention is to protect or promote the welfare of an individual, of a family or of society in general. Consequently, it is a serious error to think that a whole married life of otherwise normal relations can justify sexual intercourse which is deliberately contraceptive and so intrinsically wrong.*<sup>139</sup>

Accordingly, Father Trese states:

... to have marital intercourse and to directly prevent conception by mechanical or chemical means employed by either spouse has always been held by the Church to be contrary to natural law and therefore *gravely* sinful.<sup>140</sup>

Moreover, in quoting from *Humanae Vitae*, the *Catechism of the Catholic Church* uses the term "intrinsically evil" in respect of any action that proposes, as an end or means, to vitiate procreation.<sup>141</sup>

All this said, it is worth quoting Peter Hebblethwaite (1930-1994), a prominent journalist, writer, and teacher who began covering Vatican affairs in 1965, and

<sup>136</sup> Apostolic Exhortation, *Familiaris Consortio*, of Pope John Paul II, § 32, 22 November 1981, posted at [www.vatican.va](http://www.vatican.va) (emphasis added). See also *Catechism*, *supra*, § 2366 at 569 (quoting *Familiaris Consortio*, § 32).

<sup>137</sup> *Humanae Vitae*, *supra*, § 17 (emphasis added).

<sup>138</sup> See Archbishop Joseph F. Naumann, *Readers Urged to Sign Manhattan Declaration Online*, *THE LEAVEN* (Newspaper of the Archdiocese of Kansas City, Kansas), 19 February 2010, at 2.

<sup>139</sup> *Humanae Vitae*, *supra*, § 14 (emphasis added).

<sup>140</sup> Trese, *supra*, at 433 (emphasis added).

<sup>141</sup> *Catechism*, *supra*, § 2370 at 570 (quoting *Humanae Vitae* § 14) (emphasis added).

attended the Fourth and final session of the Second Vatican Council. In his monumental biography, *Paul VI*, Hebblethwaite observes:

... Paul [i.e., Pope Paul VI] himself had modified the final text [of *Humanae Vitae*], making the following changes: he cut out any reference to "mortal sin;" he always refused to qualify the encyclical as "infallible;" and he inserted a passage on "compassion for sinners" [Paragraph 29]:

It is an outstanding manifestation of charity . . . to omit nothing from Christ's saving doctrine, yet this must always be accompanied by tolerance and charity. For when he came, not to judge but to save the world, was he not severe towards sin, but patient and abounding in mercy towards all sinners?

Husbands and wives, therefore, when deeply distressed by reason of the difficulties of their life, must find stamped in the heart and voice of their priest the likeness of the voice and love of our Redeemer.<sup>142</sup>

This observation bears no supporting citation. Possibly, the Holy Father rendered final edits sometime in the summer of 1965, before 29 July when the *Encyclical* was published. Hebblethwaite also observes:

The end of the paragraph [29] urges married couples "to approach more often with great faith the sacraments of the Eucharist and Penance [i.e., Confession]. Nor must they ever despair because of weakness." It would seem that "refusing absolution" and similar high-handed methods are not what is intended here.<sup>143</sup>

As lawyers and judges well understand, final edits to an important document can be highly relevant in interpreting the text. Moreover, the above-quoted observations embody a proposition appreciated by many in the Church, namely: careful moral evaluation is appropriate in assessing the gravity of moral culpability in the use of an artificial contraceptive method, i.e., an invariable rule that this use always and everywhere is a grave sin, as distinct from a venial one, might not be intended by *Humanae Vitae*.

Thus, a variety of publications and pamphlets that provide guidance as to the Examination of Conscience before seeking the Sacrament of Reconciliation (Confession) list use of an artificial contraceptive method as a behavior that a penitent should confess, preferably before receipt of Holy Communion. In this regard, it is worth recalling that there are three elements to the gravity of a sin, all of which must be present for commission of a sin to be deemed "grave" or "mortal:"

- (1) The act is objectively gravely wrong.
- (2) The actor knows the act is objectively gravely wrong.
- (3) The actor fully and freely intended to commit the act.

<sup>142</sup> PETER HEBBLETHWAITE — THE FIRST MODERN POPE 517 (New York, New York: Paulist Press, 1993) (quoting *Humanae Vitae* ¶ 29) (emphasis added). [Hereinafter, Hebblethwaite.]

<sup>143</sup> HEBBLETHWAITE, *supra*, fn. 1 at 518 (quoting *Humanae Vitae* ¶ 29) (emphasis added).

Moreover, commission of even a grave sin, no matter what it is, is forgivable through Reconciliation.

### [E] Compassion

The fourth misunderstanding about Catholic Christian teaching on contraception is that the Church itself is rather harsh or insensitive about it. Quite the opposite is true. Paragraphs 19, 20, and 25 of *Humanae Vitae* explain:

19. Our words would not be an adequate expression of the thought and solicitude of the Church, Mother and Teacher of all peoples, if, after having recalled men to the observance and respect of the Divine law regarding matrimony, they did not also support mankind in the honest regulation of birth amid the difficult conditions which today afflict families and peoples. The Church, in fact, cannot act differently toward men than did the Redeemer [Jesus Christ]. She knows their weaknesses, she has compassion on the multitude, she welcomes sinners. But at the same time she cannot do otherwise than teach the law. For it is in fact the law of human life resorted to its native truth and guided by the Spirit of God.

20. The teaching of the Church regarding the proper regulation of birth is a promulgation of the law of God Himself. And yet there is no doubt that to many it will appear not merely difficult but even impossible to observe. Now it is true that like all good things which are outstanding for their nobility and for the benefits which they confer on men, so this law demands from individual men and women, from families and from human society, a resolute purpose and great endurance. Indeed it cannot be observed unless God comes to their help with the grace by which the goodwill of men is sustained and strengthened. But to those who consider this matter diligently it will indeed be evident that this endurance enhances man's dignity and confers benefits on human society.

25. . . . We have no wish at all to pass over in silence the difficulties, at times very great, which beset the lives of Christian married couples. For them, as indeed for everyone of us, "the gate is narrow and the way is hard, that leads to life." [Quoting *The Gospel According to Matthew* 7:14.] Nevertheless it is precisely the hope of that life which, like a brightly burning torch, lights up their journey, as, strong in spirit, they strive to live "sober, upright and godly lives in this world," knowing for sure that "the form of this world is passing away." [Quoting, respectively, *Timothy* 2:12, 1 *Corinthians* 7:31.]<sup>144</sup>

The Pope who authored *Humane Vitae* expressed the difficulties of conscience associated with Catholic teaching on artificial contraception shortly after he wrote it:

<sup>144</sup> *Humanae Vitae*, *supra*, §§ 19-20, 25 (emphasis added).

How many times we have trembled before the alternatives of an easy condescension to current opinions.<sup>145</sup>

Setting aside the reality that not all Catholic laity agree with the traditional teaching, the fact is that the teaching is to a degree, counter-cultural — a “sign of contraction,” as *Humane Vitae* (Paragraph 18) puts it, borrowing from *The Gospel According to Luke* (chapter 2, verse 34). That is true for other Catholic Christian teachings, and indeed the example of the life of Christ Himself. It also is true in respect of Islam and the example of the Prophet Muhammad. Both faiths propose certain ways of life that are not congruous with moral relativism and secularism, and neither faith seeks to be perfectly “in tune” with contemporary culture. To do so would be to invert the hierarchy of priorities that both faiths propound.

Nevertheless, clergy in both faiths are sensitive and sympathetic to the trials people face in everyday life. They appreciate that Muslims and Catholic Christians live in a “contraceptive culture,” i.e., as Jesuit Father John Hardon (1914-2000) defines, a:

society in which contraception is the accepted way of preventing the conception of unwanted offspring.<sup>146</sup>

Each couple is unique in its circumstances. For some couples, one spouse or the other may be more accepting of Church teaching, which is to say that the husband and wife are at different points in their spiritual journey. Other couples might come from different faiths, i.e., the marriage might be a mixed one. It is hardly consistent with Catholic (or Islamic) teaching to seek to impose a method of contraception on another spouse. Still other couples may be poor and illiterate. They are lucky to break away from back-breaking work to eke out a living and spend even a bit of time in a Church, much less to obtain the education and means needed to practice NFP. They live on garbage heaps in Third World slums like Tondo in Manila, Philippines. For some of them, their brutal reality, as they lack both electricity and a television set to watch in the evening, is that sex may devolve into their only form of entertainment. If so, then children may become acclimatized to their parents' behavior, thereby their accelerating their loss of innocence, and eventually one day following what they witnessed.

In all such cases, both Islam and Catholic Christianity call for love, compassion, and prayer to work through difficulties. Indeed, both faiths proclaim that easy recourse to artificial contraceptive methods is not a long-term solution to disagreements or limitations a couple might have about these methods. It is no panacea for poverty. Such use not only might put one or both spouses in some moral jeopardy, and degrade both of them, but also might inhibit a genuine dialogue between the spouses. Thus, honest efforts to adhere to Catholic Christian teaching, like genuine striving (*jihād*) to discern and submit to the Will of God, are what matter. Paragraph 25 of *Humane Vitae* exhorts couples as follows:

<sup>145</sup> Pope Paul VI, quoted in FATHER JOHN A. HARDON, S.J., MODERN CATHOLIC DICTIONARY 129 (Garden City, New York: Doubleday & Company, 1980) (entry for “contraception”). (Hereinafter, MODERN CATHOLIC DICTIONARY.)

<sup>146</sup> MODERN CATHOLIC DICTIONARY, *supra*, at 130 (entry for “contraceptive culture”) (emphasis added).

... [H]usbands and wives should take up the burden appointed to them, willingly, in the strength of faith and of that hope which “does not disappoint us, because God’s love has been poured into our hearts through the Holy Spirit who has been given to us.” [Quoting *The Letter of Saint Paul to the Romans*, 5:5.] Then let them implore the help of God with unrelenting prayer and, most of all, let them draw grace and charity from that unfailing fount which is the Eucharist [Holy Communion]. If, however, sin still exercises its hold over them, they are not to lose heart. Rather, must they, humble and persevering, have recourse to the mercy of God, abundantly bestowed in the Sacrament of Penance [i.e., Reconciliation, Confession].<sup>147</sup>

Simply put, people of all faiths are not expected to succeed invariably, but rather are called to try sincerely.

As a post-script, in November 2010 the comments of Pope Benedict XVI on the use of condoms to prevent the spread of HIV/AIDS were published in a book, *The Light of the World: The Pope, The Church and the Signs of the Times*. The book is a series of interviews with the Holy Father by German Catholic journalist Peter Seewald. The extensive comments are set in the context of the unparalleled contribution of the Catholic Church in treating HIV/AIDS victims in poor countries. Indubitably, these and other remarks will be studied by moral theologians, clergy, and laity, both Catholic and non-Catholic, for years to come.

For now, four points are worth observing. First, Pope Benedict was not speaking *ex cathedra*. That is, he did not officially propound a new dogma of the Church. He offered his theological opinion, which of course is a considered one.

Second, the Pope repeats the truism that condoms are not a long-term solution to the AIDS epidemic:

As a matter of fact, . . . , people can get condoms when they want them anyway. But this just goes to show that condoms alone do not resolve the question itself. More needs to happen. Meanwhile, the secular realm itself has developed the so-called ABC Theory: Abstinence-Be Faithful-Condom, where the condom is understood only as a last resort, when the other two points fail to work. This means that the sheer fixation on the condom implies a banalization of sexuality, which, after all, is precisely the dangerous source of the attitude of no longer seeing sexuality as the expression of love, but only a sort of drug that people administer to themselves.<sup>148</sup>

In brief, condoms are widely available. Yet, infection rates have not declined dramatically. More generally, sexual intimacy is at risk of becoming self-gratification. The most reliable anti-AIDS strategy is two-pronged — abstinence

<sup>147</sup> *Humane Vitae*, *supra*, § 25. See also *id.*, § 29 (stating “Let them never lose heart because of their weakness”).

<sup>148</sup> BENEDICT XVI, *THE LIGHT OF THE WORLD: THE POPE, THE CHURCH AND THE SIGNS OF THE TIMES* — A CONVERSATION WITH PETER SEEWALD 118–119 (San Francisco, California: Ignatius Press, 2010). (Hereinafter, *THE LIGHT OF THE WORLD*.)

and fidelity. This strategy, in turn, supports authentic mutual self-giving through sexuality.

Third, the observations of Pope Benedict bespeak neither a fundamental change nor radical shift in Church teaching on the use of artificial devices for the purpose of preventing conception. Rather, they elaborate on a long-standing tradition in moral theology about the importance of intention. Here, the intention for use of a condom is critical. If it is to prevent the spread of AIDS, then it may be acceptable:

There may be a basis in the case of some individuals, as perhaps when a male prostitute uses a condom, where this can be a first step in the direction of a moralization, a first assumption of responsibility, on the way toward recovering an awareness that not everything is allowed and that one cannot do whatever one wants. But it is not really the way to deal with the evil of the HIV infection. That can really lie only in a humanization of sexuality.<sup>149</sup>

In the example of a male prostitute, conceiving a child is not possible, because the sexual act at issue is a homosexual one. Might this example be non-exclusive? Perhaps. But, this example alone does not support an inference that condom use is permissible for the express purpose of preventing conception. To suggest it does would be to confuse an evil with a good. Sexual intimacy is not supposed to be death-dealing, but rather should anticipate life-giving. Condom use to prevent the spread of a deadly disease is not on the same moral plane as to block conception of a child.

Finally, and arguably most importantly, as Pope Benedict indicates in the preceding quote, in the context at issue, condoms could be a "first step" toward conversion:

She [the Roman Catholic Church] of course does not regard it [condom use] as a real or moral solution, but in this or that case, there can be nonetheless, in the intention of reducing the risk of infection, a first step in a movement toward a different way, a more human way, of living sexuality.<sup>150</sup>

In sum, conversion is the real issue: a male prostitute who pauses to think he ought to use a condom does so because he is concerned about doing harm to his client. That concern is a moral awakening. This awakening may lead him to consider whether the sexual encounter in which he is about to engage is or is not moral. His answer to that question may, in turn, lead to spiritual conversion.

#### § 40.01 RANGE OF OPINIONS IN SACRED AND SECULAR LEGAL SYSTEMS

Islamic religious and legal scholars (*ulema* and *fukahā'*, respectively) do not speak with one voice about abortion. The Four *Sunni* Schools — *Hanafi*, *Māliki*, *Shāfi'i*, and *Hanbali* — hold varying opinions. Within some Schools, there exist differences. Across and within the Schools, opinion on the permissibility of abortion ranges from absolute prohibition to limited permissibility until 120 days into the pregnancy.<sup>1</sup>

Even within a particular *Sunni* School, and within the same country and institution, there can be a diversity of opinions on abortion. Consider the most prominent mosque in Egypt, Al Azhar in Cairo, and the related Al Azhar University, which is renowned throughout the Islamic world.<sup>2</sup> The views emanating from Al Azhar differ from time to time, depending on the opinion of the Grand *Imām* of that Mosque. In the late 1980s, the Grand *Imām* was Sheikh Gad El Haq. He considered abortion in two contexts: genetic abnormality, and rape. In both of them, he refused to declare that abortion was permissible. His opinion was heavily cited in 1994, as abortion was a prominent controversy at the International Conference on Population and Development, which Cairo hosted that year. Succeeding Sheikh Gad El Haq as Grand *Imām* was Sheikh Mohamed Tantawi, who had a different opinion on abortion. In 2009, he issued a *fatwā* (religious order) that allows post-rape abortion on the condition that the woman is found to be chaste. The successor to Sheikh Tantawi, is Sheikh Ahmed Tayyib, who became Grand *Imām* in 2010. His views on abortion have yet to be publicized widely.

The range of views in the Muslim world on abortion roughly mimics the diversity in Christianity. It has always been the teaching of the Roman Catholic Church that abortion is intrinsically evil and its commission (or the assistance of one in its procurement) is a grave sin. That life begins at conception has been a constant

<sup>1</sup> See Donna Lee Bowen, *Contemporary Muslim Ethics of Abortion*, in *ISLAMIC ETHICS OF LIFE: ABORTION, WAR, AND EUTHANASIA* 51, 56 (Columbia, South Carolina: University of South Carolina Press, Jonathan E. Brockopp ed., 2003). (Hereinafter, Bowen.)

<sup>2</sup> Technically, "Al Azhar" is a generic term that refers to the three main Islamic institutions in Egypt: the Mosque, University, and Islamic Research Council. Historically, the Mosque was the first of the institutions, and spawned the University. All three are part of the body politic of that country. The three institutions are under one umbrella, the Supreme Council of Al Azhar, which is headed by the Grand *Imām*.

Al Azhar University was founded around 970-972 A.D., making it older than Oxford University, at which teaching began in 1096, and which developed after 1167, when King Henry II banned English students from attending the University of Paris.

precept. Across Protestant Christianity, there is a range of opinion on abortion. Some Protestant denominations adopt an essentially Catholic position, thus prohibiting abortion or assistance in its procurement. Other denominations agree abortion may occur under reasonably strict limits, such as within the first or possibly second trimester of pregnancy.

The range of opinions among *Shari'a* scholars also mirrors the diversity of rules in secular legal systems. Some countries ban abortions in all but the rarest of cases, such as to save the life of the mother. Other countries allow for abortion on demand, or nearly so. The United States occupies a middle position on the legal spectrum: abortion is constitutionally permissible, but so too are certain restrictions on it, and they vary from state-to-state. The key American Supreme Court case — the highly controversial 1973 *Roe v. Wade* decision — which led to this legal position is discussed below.

#### § 40.02 RESPECT FOR LIFE

Despite the diversity, one point is common to all sacred and secular legal systems: none of them is premised on the proposition that taking a human life, specifically a baby in the womb, is a morally good act. To the contrary, they all accept, and some even champion, the proposition that life must be protected from conception to natural death. Thus, it would be unfair to characterize Muslims (or Christians, or Americans) as generally "in favor of" abortion. The diversity of opinion tends to occur not on whether abortion is morally acceptable, but on who ought to have the power to decide if and when an abortion may occur, and on the circumstances, if any, under which it may occur.

Thus, it may be said resolutely that Islam places extreme emphasis on the value of human life. That is evident, for example, in the following four passages from the *Qur'ān*:

- *Surah 5, ayah 32*:  
 . . . We decreed to the Children of Israel that *if anyone kills a person — unless in retribution for murder or spreading corruption in the land — it is as if he kills all mankind*, while *if any saves a life it is as if he saves the lives of all mankind*.<sup>3</sup>
- *Surah 6, ayah 151*:

Say, "Come, I will tell you what your Lord has really forbidden you! Do not ascribe anything as a partner to Him; be good to your parents; *do not kill your children in fear of poverty*." — We will provide for you and for them — stay well away from committing indecent deeds whether openly or in secret; do not take the life God has made sacred, except by right. This is what He commands you to do so that you may use your reason.<sup>4</sup>

<sup>3</sup> THE *QUR'AN* — *A New Translation* by M.A.S. Abdel Haleem 5:32 at 71 (Oxford, England: Oxford University Press, 2004) (emphasis added). (Hereinafter, *QUR'AN*.)

<sup>4</sup> *QUR'AN*, *supra*, 6:151 at 92 (emphasis added).

- *Surah 17, ayah 31:*

*Do not kill your children for fear of poverty — We shall provide for them and for you — killing them is a great sin.*<sup>5</sup>

- *Surah 60, ayah 12:*

Prophet, when believing women come and pledge to you that they will not ascribe any partner to God, nor steal, nor commit adultery, *nor kill their children*, nor lie about who has fathered their children, nor disobey you in any righteous thing, then you should accept their pledge of allegiance and pray to God to forgive them: God is most forgiving and merciful.<sup>6</sup>

These passages highlight the importance of preservation of life, even in the face of poverty and unfortunate circumstances. It is easy to infer from them a general, strong inclination against abortion. If one is not to kill one's "children," then the inference is direct, if "children" include persons in the womb. Or, it is by analogical reasoning (*qiyās*), if "children" are post-birth beings and persons in the womb are pre-birth beings.

### [A] Embryonic Development

In two remarkable passages, the Qur'an chronicles the stages of embryology. All Four Schools rely on these passages to guide their opinions on abortion. In particular, Islamic religious and legal scholars (*ulema* and *fukahā'*, respectively) cite these verses to predict at what stage a fetus is regarded as a human being, separate from the mother:

- *Surah 22, ayah 5:*

People, remember, if you doubt the Resurrection, that We created you from dust, then a drop of fluid, then a clinging form, then a lump of flesh, both shaped and unshaped: We mean to make our power clean to you whatever we chose we cause to remain in the womb for an appointed time, then we bring you forth as infants, and then you grow and reach maturity. Some die young and some are left to live on to such an age that they forget all they once knew. You sometimes see the earth lifeless, yet when we send down water it stirs and swells and produces every kind of growth.<sup>7</sup>

- *Surah 23, ayah 12-14:*

We created man from an essence of clay, then We placed him as a drop of fluid in a safe place, then We developed that drop into a clinging form, and We developed that form into a lump of flesh, and We developed that lump into bones, and We clothed those bones with flesh, and later We developed him into other forms — glory be to God, the best of creators!<sup>8</sup>

<sup>5</sup> QUR'AN, *supra*, 17:31 at 177 (emphasis added).

<sup>6</sup> QUR'AN, *supra*, 60:12 at 369 (emphasis added).

<sup>7</sup> QUR'AN, *supra*, 22:5 at 209.

<sup>8</sup> QUR'AN, *supra*, 23:12-14 at 215.

From these verses and *hadiths*, *ulema* and *fukahā'* deduce that there are four continuous stages in the pre-natal development of a human being.<sup>9</sup>

- (1) The first stage takes place in the fallopian tube where the fertilized ovum remains for approximately three days. Cell division is initiated at this stage.
- (2) The next stage involves implantation in the uterus, where cell division continues.
- (3) Two weeks after conception, the embryonic stage begins. It is during the embryo stage that organ differentiation occurs and all organs are present, in at least an elementary form by the end of six weeks.
- (4) Lastly, the fetal stage is defined as the time between eight weeks and birth. No new organs appear, only continuous growth of the fetus occurs.

Therefore, for purposes of the *Shari'a*, a "fetus" is defined as the pre-natal stage during which all necessary human characteristics are present.

### [B] When Does Life Begin and Ensoulment Occur?

Based on the above considerations, the *ulema* and *fukahā'* generally agree life begins at the moment of conception. This question — when does human life begin? — is essential to the discussion of abortion. Patently, the earlier in time a "life" is said to commence, in a physical or biological sense, then the stronger the injunction against abortion is likely to be. That is because the injunctions will be applicable earlier, rather than later. The earliest possible biological moment, of course, is conception. Accordingly, the general impulse of the *ulema* and *fukahā'* is to view abortion with great suspicion, and indeed, to consider it at a minimum reprehensible (*makrūh*).

However, when human life begins is not the only relevant question. The second, and closely related, issue is when ensoulment occurs. That is, at what moment does God (Allāh) put a soul into a human life? Within Catholic Christianity, and indeed among Greek philosophers, there has been a robust and fascinating debate as to when ensoulment occurs. Aristotle, and some theologians in the first few centuries of the history of the Catholic Church, proposed that ensoulment occurs after conception, such as during the third month, when the fetus takes on a recognizable human form. Saint Thomas Aquinas theorized that ensoulment occurs at some time after fertilization of an egg by a sperm, a position taken in the Roman Catechism used around the time of the Council of Trent (1545-1563 A.D.). Subsequent study has not led to a resolution of the debate in favor of the teaching that ensoulment occurs at conception. Accordingly, God creates life, and places a soul in that life, but exactly when He does so is uncertain. Notably, in the 1974 *Declaration on Procured Abortion*, the Congregation for the Doctrine of the Faith states:

<sup>9</sup> See MOHAMMAD HASHIM KAMALI, *THE RIGHT TO LIFE, SECURITY, PRIVACY, AND OWNERSHIP IN ISLAM* 37 (Cambridge, England: Islamic Texts Society, 2008) (discussing the four stages of pre-natal development). [Hereinafter, KAMALI.]

19. *This declaration expressly leaves aside the question of the moment when the spiritual soul is infused. There is not a unanimous tradition on this point and authors are as yet in disagreement.* For some it dates from the first instant; for others it could not at least precede nidation [i.e., implantation of the early embryo in the uterus]. It is not within the competence of science to decide between these views, because the existence of an immortal soul is not a question in its field. It is a philosophical problem from which our moral affirmation remains independent for two reasons: (1) supposing a belated animation [i.e., delayed implantation of the soul in an embryo], there is still nothing less than a human life, preparing for and calling for a soul in which the nature received from parents is completed, (2) on the other hand, it suffices that this presence of the soul be probable (and one can never prove the contrary) in order that the taking of life involve accepting the risk of killing a man, not only waiting for, but already in possession of his soul.<sup>10</sup>

In other words, there is not an official or definitive declaration from the Catholic Church on the precise moment when ensoulment occurs.<sup>11</sup> Nevertheless, the

<sup>10</sup> Sacred Congregation for the Doctrine of the Faith, *Declaration on Procured Abortion*, ¶ 13 endnote 19 (18 November 1974), posted at [www.vatican.va/roman\\_curia/congregations/cfaith/documents/rc\\_con\\_cfaith\\_doc\\_19741118\\_declaration-abortion\\_en.html](http://www.vatican.va/roman_curia/congregations/cfaith/documents/rc_con_cfaith_doc_19741118_declaration-abortion_en.html) (emphasis added).

<sup>11</sup> For instance, the 1987 document from the Congregation of the Doctrine of the Faith, *Donum Vitae*, states:

This Congregation [for the Doctrine of the Faith] is aware of the current debates concerning the beginning of human life, concerning the individuality of the human being and concerning the identity of the human person. The Congregation recalls the teachings found in the Declaration on Procured Abortion: "From the time that the ovum is fertilized, a new life is begun which is neither that of the father nor of the mother; it is rather the life of a new human being with his own growth. It would never be made human if it were not human already. To this perpetual evidence . . . modern genetic science brings valuable confirmation. It has demonstrated that, from the first instant, the program is fixed as to what this living being will be: a man, this individual-man with his characteristic aspects already well determined. Right from fertilization is begun the adventure of a human life, and each of its great capacities requires time . . . to find its place and to be in a position to act" [citing the 1974 *Declaration on Procured Abortion*, ¶¶ 12-13]. This teaching remains valid and is further confirmed, if confirmation were needed, by recent findings of human biological science which recognize that in the zygote resulting from fertilization the biological identity of a new human individual is already constituted.

Certainly no experimental datum can be in itself sufficient to bring us to the recognition of a spiritual soul; nevertheless, the conclusions of science regarding the human embryo provide a valuable indication for discerning by the use of reason a personal presence at the moment of this first appearance of a human life: how could a human individual not be a human person? *The Magisterium has not expressly committed itself to an affirmation of a philosophical nature*, but it constantly reaffirms the moral condemnation of any kind of procured abortion. This teaching has not been changed and is unchangeable (citing Pope Paul VI, *Discourse to Participants in the Twenty-third National Congress of Italian Catholic Jurists*, 9 December 1972).

Thus the fruit of human generation, from the first moment of its existence, that is to say from the moment the zygote has formed, demands the unconditional respect that is morally due to the human being in his bodily and spiritual totality. The human being is to be respected and treated as a person from the moment of conception; and therefore from that same moment his rights as a person must be recognized, among which in the first place is the inviolable right of every innocent human being to life.

Congregation for the Doctrine of the Faith, *Instruction on Respect for Human Life in Its Origin and on the Dignity of Procreation Replies to Certain Questions of the Day* (*Donum Vitae* — The Gift of Life),

general and practical understanding is that a fully human person, with a soul, exists at conception. In turn, aborting this person is considered wrong, and seriously so. Yet, the wrongness of abortion from a Catholic perspective does neither solely nor ultimately depends on the question of when an embryo is infused with a soul, or when an embryo becomes a person.

Among the *ulema* and *fukahā*, the issue of when ensoulment occurs has not been definitively answered. There are two *hadīths* on this topic, and each attributes the date of ensoulment differently. The *hadīth* related in *Sahih Bukhari*, as narrated by Abdullah ibn Mas'ud, dates ensoulment at 120 days after pregnancy commences:

*(The matter of the Creation of) a human being is put together in the womb of the mother in forty days, and then he becomes a clot of thick blood for a similar period, and then a piece of flesh for a similar period. Then Allāh sends an angel who is ordered to write four things. He is ordered to write down his (i.e. the new creature's) deeds, his livelihood, his (date of) death, and whether he will be blessed or wretched (in religion). Then the soul is breathed into him. So, a man amongst you may do (good deeds till there is only a cubit between him and Paradise and then what has been written for him decides his behavior and he starts doing (evil) deeds characteristic of the people of the (Hell) fire. And similarly a man amongst you may do (evil) deeds till there is only a cubit between him and the (Hell) fire, and then what has been written for him decides his behavior, and he starts doing deeds characteristic of the people of Paradise.)*<sup>12</sup>

Yet, *Imām* Muslim relates a *hadīth* of Hudhayfa bin Usaid, who narrates that ensoulment occurs at 42 nights after pregnancy commences:

When the drop of (semen) remains in the womb for *forty or fifty (days) or forty nights*, the angel comes and says: My Lord, will he be good or evil? Then both these things would be written. Then the angel says: My Lord, would he be male or female? So both these things are written. And his deeds and actions, his death, his livelihood; these are also recorded. Then his document of destiny is rolled and there is no addition to nor subtraction from it.<sup>13</sup>

The precise figure of 42 days appears to come from the so-called "organogenesis *hadīth*" of Muhammad, which *Imām* Muslim narrates from Hudhayfa ibn Asad as follows:

§ 1, ¶ 1 (February 1987), posted at [http://www.vatican.va/roman\\_curia/congregations/cfaith/documents/rc\\_con\\_cfaith\\_doc\\_19870222\\_respect-for-human-life\\_en.html](http://www.vatican.va/roman_curia/congregations/cfaith/documents/rc_con_cfaith_doc_19870222_respect-for-human-life_en.html) (emphasis added).

<sup>12</sup> THE TRANSLATION OF THE MEANINGS OF SAHIH AL-BUKHARI, ARABIC-ENGLISH by Dr. Muhammad Muhsin Khari, vol. IV, book LIV (The Book of the Beginning of Creation), p. 290, *hadīth* no. 430 (Dar Ahyā Us-Sunnah, Al Nabawiya, March 1978). [Hereinafter, *BUKHARI*.]

<sup>13</sup> SAHIH MUSLIM — BEING TRADITIONS OF THE SAYINGS AND DEEDS OF THE PROPHET MUHAMMAD AS NARRATED BY HIS COMPANIONS AND COMPILED UNDER THE TITLE AL-JAM'U-S-SAHIH BY IMAM MUSLIM, RENDERED INTO ENGLISH BY ABDUL HAMID SIDDIQI, WITH EXPLANATORY NOTES AND BRIEF BIOGRAPHICAL SKETCHES OF MAJOR NARRATORS, CORRECTED AND REVISED BY DR. HASSAN VOL. IVB, book 46 (Book of Fate), p. 209, *hadīth* no. 2644 (Lahore, Pakistan: Sh. Muhammad Ashraf Booksellers and Exporters, 1990). [Hereinafter, *MUSLIM*.]

After the sperm-and-ovum drop (*nutfā*) has been [in the uterus] *forty-two days*, Allāh sends it an angel that gives it form and fashions its hearing, sight, skin, flesh, and skeleton.<sup>14</sup>

One contemporary *Sunni* scholar, Sheikh G.F. Haddad, explains the rationale for this figure:

The time frame given cited [in the organogenesis *ḥadīth*] above is in conformity with embryological observation. The embryo reaches the sixth week without showing the semblance of human form but by the seventh week of its life — about three centimeters in size and beginning to move — that semblance becomes visible in the formation of the essential organs including the sensory organs and grown bone tissue. The arms and legs have lengthened. The foot and hand areas are distinguishable and they have digits. The first recordable brain wave activity occurs.<sup>15</sup>

In brief, organogenesis — the establishment of all organs — reaches its peak at 42 days.

Accordingly, differences of opinion among the *ulema* and *fukahā'* on ensoulment stem from differences narrated in these *ḥadīths*. While the *ḥadīths* do not provide a single answer, they play a vital role in the *Shar'ī'a*. They are Prophetic inspiration, which along with revelation are foundational sources for rulings on abortion.<sup>16</sup>

## § 40.03 BASIC RULES

### [A] Forbidden (*Ḥarām*) After 120 Days, Except to Save Mother

Indubitably, all Muslim scholars register an increasing dislike of abortion as pregnancy approaches 120 days, unless there is compelling justification.<sup>17</sup> The clear consensus (*ijma*) of all Four Schools is that after 120 days, abortion is *ḥarām* unless it is performed to save the life of the mother of the child. In fact, after 120 days the consensus is that "abortion is tantamount to murder."<sup>18</sup>

There is some debate about the exception to save the life of the mother. A minority of scholars from some Schools prohibit abortion even if it is necessary to save the life of the mother.<sup>19</sup> That said, the principal debate among the *ulema* and *fukahā'* is not over the necessity exception for the life of the mother.

<sup>14</sup> Posted at [www.livingislam.org/h/hfhl\\_e.html](http://www.livingislam.org/h/hfhl_e.html) (emphasis added).

<sup>15</sup> Sheikh G.F. Haddad, *Hadiths on the Formation of Human Life — What Modern Science Confirms Today Was Known to Islamic Science 1,400 Years Ago*, posted at [www.livingislam.org/h/hfhl\\_e.html](http://www.livingislam.org/h/hfhl_e.html) (April 2003).

<sup>16</sup> See SA'DIYYA SHAJER, *SACRED RIGHTS: THE CASE FOR CONTRACEPTION AND ABORTION IN WORLD RELIGIONS* 105, 121 (New York, New York: Oxford University Press, Daniel C. Maguire ed., 2003).

<sup>17</sup> See Bowen at 56.

<sup>18</sup> MUHAMMAD IBN ADAM AL-KAWTHARI, *BIRTH CONTROL AND ABORTION IN ISLAM* 53 (Santa Barbara, California: White Thread Press, 2006). (Hereinafter, AL KAWTHARI).

<sup>19</sup> AL KAWTHARI, *supra*, at 56.

Rather, the key debate concerns abortion in the first 120 days of pregnancy. Is it permissible in this period, and if so, under what circumstances? This question splits scholars, leading to a variety of opinions.

### [B] Cases of Necessity

A general principle of Islamic jurisprudence (*fiqh*) is that God (Allāh) does not burden a soul with more than it can bear. *Surah* 2, *ayah* 286, which is the last verse in the longest Chapter of the Qur'an, states:

God does not burden any soul with more than it can bear; each gains whatever good it has done, and suffers its bad — [The faithful say:] "Lord, do not take us to task if we forget or make mistakes. Lord, do not burden us as You burdened those before us. Lord, do not burden us with more than we have strength to bear. Pardon us, forgive us, and have mercy on us. You are our Protector, so help us against the disbelievers."<sup>20</sup>

In respect of abortion, the *ulema* and *fukahā'* invoke this principle when ruling on the permissibility of abortion before 120 days of a pregnancy have elapsed.

There are scholars who argue abortion is permitted (*halal*) in a case in which the life of an already existing child will be in direct danger if another child is born. An example is when breastfeeding milk is the only sustenance for the existing child, and no alternative affordable nutrition exists. In such an instance, writes *Imām* ibn 'Abidin, a *Hanafi* School scholar, there is a compelling justification for abortion:

Abortion will be permissible for a valid reason, such as when the milk of a pregnant woman ceases and the father of the child is not in a position financially to hire a wet nurse, and there is a fear of the child perishing, they (the jurists) state that it will be permissible to terminate the pregnancy . . . provided that the period of 120 days has not elapsed. This is permissible because the fetus has not yet developed into a human, and by aborting it we are saving a human life.<sup>21</sup>

Note the two implicit assumptions underpinning this reasoning of *Imām* ibn 'Abidin.

First, until 120 days, the fetus is not yet "human," and thus may be referred to as "it." Second, killing "it" is outweighed by saving a fully human person, namely, the extant child. If, however, the fetus is regarded as a human person from the moment of conception (not 120 days later), then the calculus changes: abort the baby to save the child, or let the child live and hope that the circumstances of the family change. The second option would be the better one, as there is hope both children might survive, whereas the first option results in the certain death of one child.

<sup>20</sup> QUR'AN, *supra*, 2:286 at 33.

<sup>21</sup> See AL KAWTHARI, *supra*, at 61 (quoting RADD AL-MUKHTAR 'ALA 'L-DURR AL-MUKHTAR 6:429).

The full name of *Imām* ibn 'Abidin was Muhammad Amin ibn 'Abidin, and on the Indian Subcontinent he is known as *Imām* Shami. He was born in Damascus, and lived between 1198-1252 A.H.

Generally, Muslim scholars permit abortion before 120 days of a pregnancy have elapsed if reasons are adduced that directly affect the mother. Not all reasons are persuasive. The justifications the *ulema* and *fukahā'* regard as religiously acceptable are:

- (1) The pregnancy constitutes danger to the physical health of the mother.
- (2) The pregnancy constitutes danger to the psychological health of the mother.
- (3) The pregnancy is caused by rape.
- (4) The pregnant woman is severely crippled or suffers from serious psychological illness and is thereby unable to take care of herself, and putting the child up for adoption is not a viable option.<sup>22</sup>

In these circumstances, the overwhelming majority of Muslim scholars permit abortion. It must be stressed they do not do so with enthusiasm. They well recognize the difficulty, indeed tragedy, of such cases, and fashion such exceptions narrowly.

Is abortion permissible (*halal*) if a medical examination is conducted and reveals serious disabilities or genetic diseases in the fetus that will cause undue burden for both the parents and the child? Many contemporary scholars respond "yes," again assuming 120 days have not elapsed.<sup>23</sup> For example, the Islamic Fiqh Academy of India opined on a case in which a woman suffering from HIV-AIDS became pregnant:

[If a qualified doctor] "confirms that in all likelihood, the fetus will also develop AIDS, in that case, prior to the life coming in the embryo during the period which the Muslim jurists have fixed at 120 days, permission for abortion can be given."<sup>24</sup>

Again, the exception is a narrow one.

Once a pregnancy crosses the 120 threshold, the clear majority of *ulema* and *fukahā'* agree that there is only one necessity justification for abortion: to save the life of the mother. As mentioned earlier, a minority of scholars do not allow even for this justification, holding that abortion is forbidden (*harām*) in all instances after 120 days, including when the life of the mother is in extreme danger.

### [C] Role of Medical Practitioner

Assuming an abortion is justified under Islamic *fiqh* (jurisprudence), a Muslim physician is permitted to perform the procedure.<sup>25</sup> Whether a non-Muslim physician could do so in accordance with the *fiqh* is unclear. There appears to be no requirement in the *Sharī'a* that the doctor be a Muslim. What is clear is certain

non-Muslim physicians, including Catholic Christian doctors, refuse to do so. For them, the teachings of their faith, not justification under the *fiqh*, is dispositive.

Suppose there is no compelling justification under the *fiqh* for an abortion. Then, a Muslim doctor cannot conduct the abortion. Doing so, and indeed assisting in an abortion, when there is no compelling justification under the *fiqh*, is *harām*.<sup>26</sup>

### [D] Blood Money (*Ghurra* and *Diyyah*)

Pertinent to abortion is *ghurra* (blood money) to be paid for an aborted fetus. The term "*ghurra*" connotes blood money, but it is a specific kind of such payment. It is an indemnity payment (i.e., compensation for loss incurred) made for causing the death of an unborn child through an abortion or miscarriage. For example, the traditional amount of *ghurra* is 500 *dirhams* if an abortion occurs without the consent of the father.

A concept related to *ghurra* is "*diyyah*." "*Diyyah*" is a generic term for "blood money." *Diyyah* is paid if the mother dies in connection with an abortion. The two payments are linked. The amount of *ghurra* is 5 percent of the total figure for *diyyah*.<sup>27</sup>

Both *ghurra* and *diyyah* are concepts with a punitive dimension to them. As abortion is hardly championed in the *Sharī'a*, when one is performed under a necessity justification, some kind of sanction is to be imposed — namely, blood money. The punishment is triggered by the induced detachment of a fetus from the womb of the mother, regardless of whether or not the fetus emerges alive or dead.<sup>28</sup> Any act, violent or otherwise, which induces an abortion, is enough to invoke the offense of abortion.

Muslim scholars differentiate among three specific situations in respect of the payment of *ghurra* and *diyyah*.<sup>29</sup>

#### • Case #1: Baby Lives, Mother Dies

First, suppose a fetus is detached from the mother and born alive as a result of an act of violence inflicted on the mother, but the mother subsequently dies. This act might involve hitting or kicking the mother, or pushing her down a set of stairs. The perpetrator of the crime must pay a full *diyyah* to the family of the victim, i.e., the family of the mother. If this offender acted intentionally, i.e., intentionally killed the mother, then the killer must pay the *diyyah*. If the killing was unintentional, then the relatives and associates of the killer can pay the *diyyah* to the family of the victim. What happens if the fetus, born alive, subsequently dies? Then, the *diyyah* must be paid on behalf of the dead infant, as well as on behalf of the dead mother.

<sup>26</sup> AL KAWTHARI, *supra*, at 67.

<sup>27</sup> KAMALI, *supra*, at 42.

<sup>28</sup> See Marion Holmes Katz, *The Problem of Abortion in Classical Sunni Fiqh*, in ISLAMIC ETHICS OF LIFE: ABORTION, WAR, AND EUTHANASIA 27-29 (Columbia, South Carolina: University of South Carolina Press, Jonathan E. Brockopp ed., 2003). (Hereinafter, Katz.)

<sup>29</sup> See KAMALI, *supra*, 44-46 (discussing *ghurra* and *diyyah*).

<sup>22</sup> See AL KAWTHARI, *supra*, at 62.

<sup>23</sup> AL KAWTHARI, *supra*, at 63.

<sup>24</sup> Quoted in KAMALI, *supra*, at 40.

<sup>25</sup> AL KAWTHARI, *supra*, at 67.

These *diyyah* payment rules governing this first scenario are based on a *hadith*. During the time of the Prophet, there was a case of wrongful miscarriage brought to Muhammad in which he ordered *diyyah* to be paid. *Imām* Bukhari records that Abū Hurairah narrated the following:

Two women from Hudhail [a tribe] fought with each other and one of them hit the other with a stone that killed her and what was in her womb. The relatives of the killer and the relatives of the victim submitted their case to the Prophet . . . who judged that the *diyyah* for the fetus was a male or female slave, and the *diyyah* for the killed woman was to be paid by the 'Aṣaba (near relatives) of the killer.<sup>30</sup>

*Imām* Muslim relates the same incident, highlighting the objectionable reaction of the relatives of the killer, who did not see the wisdom of paying *diyyah* for the unborn child:

Abū Hurairah reported that two women of the tribe of Hudhail fought with each other and one of them flung a stone at the other. Killing her and what was in her womb. [sic] The case was brought to Allāh's Messenger. . . . He judged that the *diyat* (indemnity) of her unborn child is a male or female slave of the best quality, and that the *diyat* of the woman is to be paid by her relatives, and he (the Holy Prophet) made her sons and those who were her heirs [eligible to receive it]. Hamal b. Al-Nābigha Al-Huthali [her male relative] said: Messenger of Allāh, why should I pay blood-money for one who neither drank, nor ate, nor spoke, nor made any noise; it is like a nonentity (it is, therefore, not justifiable to demand blood-money for it). Thereupon Allāh's Messenger . . . said: *He seems to be one of the brothers of soothsayers on account of the rhymed speech which he has composed.*<sup>31</sup>

The reference by the Prophet to "rhymed speech" is a clear indication that Muhammad was displeased with the argument of Al-Huthali.<sup>32</sup> That argument confused the issue, and did so with an artificial style of expression that Muhammad compared to fortune tellers, who use rhymed phrases. It may be inferred that Muhammad was specifically unhappy with the proposition that a fetus was essentially a non-entity, unworthy of compensation.

There also are two *hadiths* concerning a case in which two co-wives came to the Prophet after one of the co-wives had struck the other co-wife with a tent pole, killing both the woman and her fetus.<sup>33</sup> The Prophet required the guilty co-wife to pay *diyyah* for the deceased woman and *ghurra* for the fetus. The *ghurra* was set

at one-twentieth of the amount of the *diyyah*, and was to be paid for the lost life of the fetus. The *diyyah*, set at twenty times the amount of *ghurra*, was to be paid for the lost life of the mother. Moreover, the relative of the killer and his comments were rejected by the Muhammad as words of a soothsayer, i.e., merely empty words, and thus untruthful. Thus, this emphasizes the importance of both the born and unborn life under Islamic law.

#### • Case #2: Baby Dies, Mother Lives

Second, suppose a mother suffers an assault and the fetus is detached from the womb of the mother, emerging stillborn, but the mother survives. In this case, the punishment is *ghurra*.<sup>34</sup> The amount to be paid for *ghurra* is the same for males and females, and it is the same for both intentional and unintentional inducement of the detachment of the fetus. This money belongs to the child. Because the child is stillborn, the funds are transferable to the heirs of the dead infant. However, not every heir is eligible. For example, if the offender is the father of the child, then he may not inherit the *ghurra*.<sup>35</sup> What if the mother herself induces the abortion after the permissible time period under the *fiqh* for an abortion, by taking a drug to induce the abortion? Then, she is liable to pay a *ghurra*, as long as fetus has a distinguishable human form.<sup>36</sup>

#### • Case #3: Baby Dies, Mother Dies

Third, suppose a fetus emerges alive, but then dies. A *diyyah* is to be paid to the male relatives of the child.<sup>37</sup> Suppose further that an injury is inflicted on the mother, and the fetus is lost first, followed by the subsequent death of the mother. In this scenario, a full *diyyah* is paid for the mother, and a *ghurra* is paid for the fetus. These rules would apply when the mother is given medicine to induce abortion, and the mother dies after the abortion of the fetus. Suppose a living fetus is aborted, following which the mother also dies. Then, two separate *diyyahs* should be paid by the offender.

Still another scenario is where a perpetrator stabs a woman who is pregnant with twins. In consequence, the mother dies. One of the twins emerges dead with a clear injury marking, while the other twin is born alive, and then dies after two days. In this case, the offender must pay three separate penalties:

- (1) *qisās* (legal retribution) for the death of the mother;
- (2) *diyyah* for the fetus born alive, and
- (3) *ghurra* for the fetus that emerged dead.

In addition, there is a special *kaffāra* (atonement) the offender must perform because of the abortion of the fetus caused by the offender, regardless of whether the fetus is born dead or alive. (It also must be performed in the event of a

<sup>37</sup> See KAMALI, *supra*, at 44-46 (discussing *ghurra* and *diyyah*).

self-inflicted abortion.) For example, a mother who seeks an abortion before the prohibited period for a valid reason often will be ordered to make a *kaffāra* as retribution for carrying out a discouraged act.

However, not all schools require *ghurra* or *kaffāra* to be paid in the case of abortion or miscarriage. On the one hand, the *Shāfi'i* and *Ḥanbalī* Schools hold *kaffāra* as obligatory for an aborted or miscarried fetus. On the other hand, the *Ḥanafī* and *Mālikī* Schools call for only an optional act of devotion (*taqarrub*), because the fetus is not unqualifiedly a human life.

#### § 40.04 DIVERSITY OF ISLAMIC OPINIONS

##### [A] *Ḥanafī* School

On abortion, the *Ḥanafī* School is the most liberal of the Four Schools. The majority opinion is abortion is permissible, yet prohibitively disliked (*makrūh*) at anytime before ensoulment, which this School sets at 120 days.<sup>38</sup> Disagreement exists about the particular circumstances under which abortion is allowed. But, the overwhelming consensus is that abortion requires a compelling justification, or "*udhr*."<sup>39</sup>

For *Ḥanafī* scholars, development of discernibly human features, or *al-takhalluq*, is a crucial factor in determining whether an abortion is *makrūh*, or whether it is *ḥarām* (forbidden).<sup>40</sup> Ibn Abidin, a prominent *Ḥanafī* jurist, highlights that:

It is permissible for the woman to undergo a treatment to expel the blood to terminate pregnancy as long as the fetus is a clump of flesh or clot of blood and none of its limbs have been formed.<sup>41</sup>

In sum, before 120 days of a pregnancy have expired, the *Ḥanafī* School permits — though does not affirmatively encourage — an abortion. This permission rests on two premises: during this period, a fetus has neither prominent physical human characteristics nor a soul. Of course, after 120 days of a pregnancy, abortion is not permitted.

##### [B] *Mālikī* School

Of the Four Schools, on abortion the *Mālikī* School is regarded as the most restrictive. The majority view in the *Mālikī* School regards abortion as strongly disapproved (*makrūh*). However, the *Mālikī* School has a modest range of

opinions.<sup>42</sup>

Some opinions forbid abortion anytime after implantation, that is, after a fertilized egg is implanted in the womb of the mother. Other opinions permit abortion only until the end of the *nutfa* stage. Literally, "*nutfa*" refers to a drop or few drops of water, but the term is used in the Qur'an to connote a gamete.<sup>43</sup> A "gamete" is the scientific term for a reproductive cell, which may be a male sperm or female ovum (egg). Through sexual intercourse, the mature reproductive cell of one sex unites with another mature cell of the opposite sex to form a "*nutfa amshaj*," or zygote. Thus, to say that abortion is permitted until the end of the *nutfa* stage seems to mean it is allowed only until conception. Following the common contemporary understanding of what an abortion is, namely, the destruction of a fertilized ovum, such opinions essentially prohibit all abortion.

Significantly, recent *Mālikī* scholars follow the famous classical *Mālikī* jurist *Imām* Al Qurtubī.<sup>44</sup> They regard the fetus in the *nutfa* stage as not yet coalesced in the womb. Consequently, they attach no legal consequences to its expulsion. This view is based in part on the remark of Al Qurtubī that "at this stage it is as though it [the fetus in the *nutfa* stage] were still part of the man in his loins."<sup>45</sup>

##### [C] *Shāfi'i* School

With four variants, the range of opinion in the *Shāfi'i* School is considerable. One group of *Shāfi'i* legal scholars (*fukahā*), like their *Ḥanafī* counterparts, regard abortion as prohibitively disliked (*makrūh*) before 120 days.<sup>46</sup> The second group of *Shāfi'i fukahā* permit abortion until a fetus begins to take on the first signs of human form. They define this threshold as 40 days after conception.<sup>47</sup> The third group prohibits abortion after 80 or 90 days from conception.<sup>48</sup> The fourth group of *Shāfi'i* jurists hold that expelling semen anytime after it is implanted in the womb is forbidden (*ḥarām*).<sup>49</sup> This last opinion is redolent of one of the views in the *Mālikī* School.

<sup>42</sup> See Katz, *supra*, at 31.

<sup>43</sup> See *surah* 53, *ayat* 45-46, *surah* 80, *ayat* 17-19.

<sup>44</sup> The full name of Al Qurtubī is Abū 'Abdullah Al-Qurtubī, or Abū 'Abdullah Muhammad ibn Ahmad ibn Abū Bakr al-Ansari Al Qurtubī. Born in Cordoba, Spain, he lived from 1214-1273 A.D., and is renowned for his 10-volume commentary (*tafsīr*) on the Qur'ānic passages dealing with legal topics, known as "*Tafsīr Al-Qurtubī*," or *Al-Jamī' li Akhām al Qur'ān*.

<sup>45</sup> Quoted in Bowen, *supra*, at 60.

<sup>46</sup> See Bowen, *supra*, at 56.

<sup>47</sup> See Bowen, *supra*, at 56.

<sup>48</sup> See Bowen, *supra*, at 56.

<sup>49</sup> See Bowen, *supra*, at 56.

<sup>38</sup> See KAMALI, *supra*, at 57.

<sup>39</sup> See Katz, *supra*, at 24, 31.

<sup>40</sup> See Katz, *supra*, at 32.

<sup>41</sup> Quoted in Katz, *supra*, at 36.

Born in Damascus, the full name of Ibn Abidin (1198-1252 A.H.) is Muhammad Amin Ibn Abidin. On the Indian Subcontinent, he is renowned as *Imām* Shami.

### [D] *Ḥanbalī* School

Some *Ḥanbalī fukahā'* (jurists) permitted drinking medicine to abort a *nutfā* with compelling justification ("udhr).<sup>50</sup> Note again the question of precisely what point in a pregnancy to which a *nutfā* corresponds. Other *Ḥanbalī* jurists rule that this act — aborting a *nutfā* — is *ḥarām*. These scholars require a woman who engages in it to pay *ghurra*.<sup>51</sup> Still other *Ḥanbalī* jurists agree with their *Ḥanafī* counterparts, who regard abortion as prohibitively disliked (*makrāh*), yet permit it with a compelling justification.<sup>52</sup> Thus, as with the *Shāfi'i* School, there is a diversity of views in the *Ḥanbalī* School on abortion.

### [E] *Shī'ite* Schools

Classical *Ibādī* and Twelver (*Jafarī* or *Imāmī*) *Shī'ite* legal scholars share the opinions of the classical *Mālikī* School.<sup>53</sup> However, contemporary Twelver *Shī'ites* in Iran prohibit abortion after 120 days of a pregnancy have elapsed.<sup>54</sup> During the first 120 days, permission of two doctors is required before an abortion may be performed.<sup>55</sup> The doctors must attest to the need of the mother based on a valid physical or psychological reason, otherwise an abortion is forbidden (*ḥarām*).

### [F] 1984 Synthesis Opinion of Sheikh Al Qaradawi

The opinion on abortion of the Muslim scholar Sheikh Yusuf Al Qaradawi, which was issued in 1984 by the *Fatwā* Committee of Kuwait, is accepted by many mainstream Muslims around the world.<sup>56</sup> Born in 1926 in Egypt, the Sheikh is highly influential, being not only a leading intellectual in the Muslim Brotherhood, but also a trustee of the Oxford University Centre for Islamic Studies. He has been described as "the most influential living Sunni Muslim scholar."<sup>57</sup>

While the overall philosophy of the Sheikh appears to be centrist (*wasatiyyah*), a few of his arguments are highly controversial (including endorsing suicide bombings under specific conditions, and adopting certain homophobic views).<sup>58</sup> Sheikh Al Qaradawi hosts a popular talk-show on the internationally-renowned, Qatari-based television network, Al Jazeera, called "*Sharī'a and Life*." The mission of the program is "the *jihād* of our era," he says, namely, to guide Muslims.<sup>59</sup> He plays a prominent role in the website IslamOnline, which commenced in 1997 as a

project by students at the University of Qatar, with funds from Sheikh Moza (wife of the Emir of Qatar), and approbation from Sheikh Al Qaradawi.<sup>60</sup> This website provides religious advice on contemporary topics, including sexuality, from a straightforward, rather conservative, but not dogmatic perspective. Notably, the Sheikh is barred from entry into the United Kingdom and United States.<sup>61</sup>

The opinion of Sheikh Al Qaradawi on abortion is a synthesis in two senses. It combines the jurisprudence of all Four Schools. Further, it integrates scientific evidence with the guidelines of *Sharī'a*.<sup>62</sup> There are four key points to his opinion.

First, it is prohibited for a physician to attempt abortion on a pregnant woman after the expiration of 120 days from the date of '*uluq* (seed, i.e., conception) or when the *janīn* (i.e., fetus) turns into a blood clot, unless an abortion is needed to save the life of the mother. In other words, an abortion is forbidden (*ḥarām*) after 120 days into a pregnancy, with the only exception being necessity to save the life of the mother.

Second, an abortion is permissible with the agreement of the spouses before the completion of 40 days of '*uluq*. That is, within the first 40 days following conception, there is no bar to abortion, as long as both father and mother agree. Notably, the rights of a father are acknowledged via this second point.

Third, an abortion is not permissible between 40 and 120 days of pregnancy except in two situations: (1) when continued pregnancy would substantially harm the health of the mother; or (2) when it is established that the fetus would be invalid or permanently deficient and the deficiency is incurable. The first exception surely includes saving the life of the mother. The second exception is not limited to instances in which a fetus is dead, but rather covers cases of irreversible disability. Thus, the period between 40 and 120 days after conception is a sort of "grey zone." Abortion is not strictly *ḥarām*, but there are only two justifications for it. Neither exception is clear cut. Substantial harm to a mother, or deficiency of the fetus, is a matter that calls for expert medical judgment.

Fourth, except in circumstances of urgency, an abortion must be carried out by a committee of specialist physicians. Moreover, it must be approved by two Muslim physicians of upright moral character (unless they are absolutely not available).

## § 40.05 CONTRASTING OPINIONS: AMERICAN LAW AND 1973 SUPREME COURT DECISION IN *ROE v. WADE*

### [A] What *Roe* Says

*Roe v. Wade* was the first case on abortion decided by the United States Supreme Court.<sup>63</sup> The case arose from a Texas law that made it a crime to procure or perform an abortion. Thus, the statute could be directed against individuals seeking an abortion, as well as doctors providing abortion services. In other words, the statute made abortion a crime at any stage of pregnancy, except to save the life of the mother. One Texan woman, a single mother, who sought an abortion, challenged the statute. She claimed the law violated her right of privacy as protected by the Due Process Clause of the 14th Amendment to the United States Constitution.<sup>64</sup> In its 1973 opinion, the Supreme Court held that the Texas criminal law prohibiting abortion was unconstitutional.

The case evokes strong emotions. Many of its features are relatively unknown, such as the fact the woman at the center of the case, Norma McCorvey, later spoke out against abortion and converted to Catholicism. Further, the basic legal points of the case often are lost, as the two sides in the abortion debate rush into a heated emotional exchange. The champions of *Roe* hail it as a great decision like *Marbury v. Madison*<sup>65</sup> and *Brown v. Board of Education*.<sup>66</sup> The critics of *Roe* decry it as a horrible decision akin to *Dred Scott v. Sandford*,<sup>67</sup> *Plessy v. Ferguson*,<sup>68</sup> and *Korematsu v. United States*.<sup>69</sup> Arguably, the Supreme Court in *Roe* tried to find a middle ground. But, query whether there is a middle ground — is this issue an all-or-nothing one?

Both sides in the debate tend to accept a common public perception that Supreme Court justices vote on abortion questions based on whether they personally, morally, and religiously favor or disapprove of abortion. In truth, whether they do so, and which ones do, is uncertain. No one knows the inside of the mind of a Justice. Each Justice wrestles with laws that have some direct or indirect underlying moral basis. It also is sometimes thought that it is unconstitutional to legislate from the bench on purely moral grounds. Yet, this point also is an uncertain one. In reality, depending on the moral interests at stake, Justices and lower-court judges sometimes render legislative-like, morally-based decisions. For example, they uphold, apply, and interpret bans on polygamy and incest.

What is certain is that as a legal matter, there are principled reasons to disagree about *Roe*. Thus, a crucial question is: from a strictly legal perspective, what did

the Supreme Court actually decide, and not decide, in *Roe v. Wade*? The key points are:<sup>70</sup>

#### • Three Key Issues —

The Supreme Court identified three controversial issues in *Roe*:

- (1) *Individual rights*: Is there a right to an abortion? To be sure, the Court did not opine on the Bill of Rights (the first 10 Amendments to the Constitution), but rather focused on the 14th Amendment. More generally, are there rights that are not explicit in the Constitution, but that should be protected?
- (2) *Federalism*: In deciding questions of abortion, what power should States in a Federal system have vis-à-vis the federal government? More generally, are individual rights best decided at the Federal level, or by the individual 50 States?<sup>71</sup>
- (3) *Separation of powers*: Abortion is partly a political issue, thus what role should the judiciary play in comparison with a democratically-elected Federal legislature, or State legislature, in regulating it? More generally, are individual rights best decided by an unelected judiciary, or by a democratically elected legislature?

While the abortion context was new, the questions raised by *Roe* hardly were. They date back to 1787, yet in the abortion context they are particularly dramatic.

<sup>70</sup> This SYNOPSIS is drawn in part from a lecture by Professor Steve McAllister, University of Kansas School of Law, 22 January 2010, entitled “*Roe v. Wade*: What Did the Supreme Court Do in *Roe*?” *Doe v. Bolton*, the companion case to *Roe*, was decided the same day as *Roe*. See 410 U.S. 179 (1973). For this reason, the Court in *Doe* refers to the ensoulment analysis found in *Roe*. *Doe* involved a psychologically impaired woman. Her physician recommended that she not have any more children. She already had authorized the adoption of her older child, because of her significant emotional and mental impairment, and the poverty in which she lived. The primary distinction between the *Doe* and *Roe* cases, however, is the nature of the State laws involved. At issue in *Doe* were Georgia requirements of the (1) approval of two medical practitioners before an abortion, (2) approval of a hospital abortion committee of the abortion, and (3) freedom of the hospital to reject performance of the abortion for moral and religious reasons. In *Doe*, the Supreme Court held all three requirements were “unduly restrictive of the patient’s rights and needs that, at this point, have already been medically delineated and substantiated by her personal physician.” *Id.* at 198-99.

The only other relevant connection between the two cases lies in the brief mention of paternal rights, because in *Doe* the woman was married, while in *Roe* she was not. The Supreme Court grouped the discussion from both cases in *Roe*. The Court observed that no father attempted to assert a right, and the State statutes at issue were devoid of discussion regarding the father’s right. The Court thus declared that its holdings on abortion, without mention of the father’s right — were “consistent with the relative weights of the respective interests involved” as those interests were presented to it. 410 U.S. at 165. Had either case involved a minor female under 18 years of age, the Court may well have treated the situation differently by the Court.

<sup>71</sup> As an interesting illustration of the interplay of the first two issues, consider a Missouri tort law that declares life begins at conception. Under this law it is punishable to cause the death of an unborn. This statute is not unconstitutional, because it does not impact on the Federal Constitutional right to an abortion that *Roe* created. Rather, the statute covers a matter regulated by states, namely, torts. In contrast, because of the Supremacy Clause in the Constitution, whereby Federal law trumps State law, Missouri cannot declare an unborn is a “person” and make it illegal to procure or perform an abortion.

<sup>63</sup> See *Roe v. Wade*, 410 U.S. 113 (1973), 93 S.Ct. 705. [Hereinafter, *Roe*.]

<sup>64</sup> See *Roe*, *supra*, at 410 U.S. at 129.

<sup>65</sup> See 1 Cranch 137 (1803).

<sup>66</sup> See 347 U.S. 483 (1954), 74 S.Ct. 686.

<sup>67</sup> See 60 U.S. 393 (1857), 19 Howard 393.

<sup>68</sup> See 163 U.S. 537 (1896), 16 S.Ct. 1138.

<sup>69</sup> See 323 U.S. 214 (1944), 65 S.Ct. 193.

Note that Islamic Law does not deal with the latter two issues. They are matters left to each individual Muslim country and its system of governance. Rather, the *Shari'a* looks at abortion entirely as an individual rights issue, and examines it from a religious and moral perspective.

• *Individual Rights —*

On the issue of individual rights, *Roe* established there is no basis, in the sense of an express reference, in the United States Constitution for a right to have an abortion. However, *Roe* also established there are two indirect, or general, bases for such a right. First, the 14th Amendment to the Constitution protects liberty interests. Second, the 9th Amendment states that not every right protected by the Constitution appears explicitly in the Constitution. By identifying these two Amendments, the Court announced where it looks in the Constitution to decide questions of abortion.

• *"Liberty" and Holding on Individual Rights Issue —*

As between the 9th and 14th Amendments, the Court focused especially on the 14th Amendment, specifically on the reference in the Due Process Clause to "liberty." The Court in *Roe* thus viewed abortion as very much a 14th Amendment "liberty" issue.

Stressing the 14th Amendment "liberty" interest at stake, the Supreme Court in *Roe* legalized abortion.

• *Limitation of Holding: No Absolute Right —*

Arguably, the Court went so far as to make abortion a fundamental Constitutional right. However, *Roe* did not create an absolute right to terminate a pregnancy.

Neither *Roe* nor any subsequent Supreme Court ruling on abortion declares abortion to be an absolute right. To the contrary, the Court has consistently stated abortion is not an absolute right. Indeed, under its 14th Amendment jurisprudence, the Supreme Court generally declares that individual liberty interests are not absolute, and in some instances may be over-ridden by governmental interests.

That there is no absolute right to an abortion under *Roe* is clear from the three-stage policy the Supreme Court declared in *Roe* to regulate State abortion law:

- (1) During the first trimester, abortion decisions are solely left up to the mother and her attending physician.
- (2) During the second trimester, a State may promote its interest in the health of the mother and regulate the abortion procedure in ways reasonably related to maternal health.
- (3) During the third trimester, a State may choose to regulate, and even proscribe, abortion when necessary so long as it is consistent with sound medical judgment and protects the life and health of the mother.<sup>72</sup>

<sup>72</sup> See *Roe, supra*, 410 U.S. at 165.

• *Rationale —*

Examining the Texas criminal statute at issue in *Roe*, the Supreme Court recognized two of the justifications cited in support of that law: the interest of the State in the protection of women from unsafe abortion techniques, and in the protection of pre-natal life.<sup>73</sup>

Yet, as part of its rationale to support its holding on the individual rights issue, the Supreme Court in *Roe* decided that the unborn are not "persons" whom the United States Constitution protects. That is, for the purposes of the Constitution, the unborn are not "persons." When the Constitution uses the word "persons," said the Court, the meaning of this word has been understood "post-natally," i.e., the word is interpreted as a post-natal reference. The Court asserted that this interpretation reflects the Common Law, wherein the dividing line between a "person" and "non-person" is birth. Notably, since the *Roe* case, the Supreme Court has shown no interest in revisiting the question of whether the unborn are "persons."

• *When Does Life Begin? —*

Before reaching its holdings, the Supreme Court examined the historical significance of the prohibition of abortion. The Court contrasted modern day "trimesters" with the ancient life stages articulated by Aristotle: the vegetable, animal, and rational stages.<sup>74</sup> The vegetable stage is marked at conception, the animal stage at "animation," and the rational stage after birth. Specifically, the animal stage is 40 days after conception for a male, and 80-90 days after conception for a female.<sup>75</sup> These dates subsequently became marked by Christian theologians as the ensoulment dates, and were developed by Saint Augustine, who distinguished the *embryo inanimatus* (the thing grown inside, having not been quickened) from the *embryo animatus* (the thing grown inside, having been quickened).<sup>76</sup> The Court also reviewed the Common Law on abortion. Under it, prior to the "quickening," or first recognizable movement of a fetus *in utero* (in the womb) before the 16th or 18th week of pregnancy, abortion was an indictable offense.<sup>77</sup>

Unable to find a clear answer to clarify when ensoulment occurs, or shed light on quickening, Justice Blackmun stated:

We do not need to resolve the difficult question of when life begins. When those trained in . . . medicine, philosophy, and theology are unable to

<sup>73</sup> See *Roe, supra*, 410 U.S. at 150.

<sup>74</sup> *Roe, supra*, 410 U.S. at 134.

<sup>75</sup> See *Roe, supra*, 410 U.S. at 165.

<sup>76</sup> See *Roe, supra*, 410 U.S. at 165.

"Embryo" is Greek in origin, and in Latin is the nominative, neuter, singular case for "swelled inside" or "grown inside." "Inanimatus" is the perfect passive participle verb meaning "not having been quickened, enlivened, or animated." "Animatus" is the perfect passive participle of the very meaning "having been quickened, enlivened, or animated."

<sup>77</sup> *Roe, supra*, 410 U.S. at 132.

"In" is the Latin preposition meaning "in" or "into." "In/tero" is the dative, masculine, singular case for "womb."

arrive at any consensus, the judiciary . . . is not in a position to speculate as to the answer.<sup>78</sup>

With these words, the Court eschewed what it saw as speculation that had fueled the abortion debate for centuries. In turn (as explained earlier), the Court went on to focus on the legality of State abortion laws, and whether or not they respected the rights of Due Process as guaranteed by the 14th Amendment.

#### • Legal Implications —

An obvious outcome of the holding in *Roe* is that any outright ban on abortion is forbidden. However, another clear outcome is that limits on abortion are permissible. That is, while an outright ban on abortion is unconstitutional, regulations that permit abortions in narrow instances — in particular, to save the life or health of the mother — are constitutionally permissible. Exactly how “narrow” a restriction is allowed continues to be a matter of debate and litigation. For example, on the one hand, an exception to save the life or health of the mother could be unconstitutionally narrow depending on the definition of “health.” On the other hand, if the exception included “mental health,” then it would be so broad as to swallow the general rule against abortion, as any proposed abortion could go forward.

The aforementioned points are legal ones to be understood before their merits and demerits are debated. Both criticism and defense of *Roe* should follow, not precede, an understanding of what *Roe* actually says.

### [B] Aftermath

By no means did *Roe* settle the abortion debate in America. As a political matter, the Supreme Court in *Roe* inflamed the abortion debate. The Court likely made the debate infinitely more difficult to resolve. That is because, for the time being, only the Court — not the 50 State legislatures — can do so. As a matter of Constitutional Law, the Supreme Court has had to revisit the topic, such as in its 1993 *Planned Parenthood v. Casey* decision,<sup>79</sup> and in dealing with a legislative ban on partial-birth abortions. Notably, in the *Casey* decision, the Supreme Court held that the core decision in *Roe* was correct, but the Court allowed more significant State restrictions on abortion than *Roe* did. That is because the *Casey* Court redefined the point of viability from 28 weeks to 22 weeks in a pregnancy. The *Casey* Court looked back at *Roe* and said the earlier decision undervalued state interests in regulation, and also under-valued the interest of potential life. In the partial-birth abortion case, the Court essentially upheld a prohibition on this technique.

What might happen if the Supreme Court overturns its decision in *Roe*? The abortion debate would revert to the 50 states. Three different outcomes could occur:

- (1) Some state legislatures could outlaw the procurement or performance of an abortion, and also decide whether the penalties are civil or criminal.

<sup>78</sup> *Roe*, *supra*, 410 U.S. at 159.

<sup>79</sup> See *Planned Parenthood of Southeastern Pennsylvania v. Casey*, 505 U.S. 833 (1992), 112 S.Ct. 2791.

- (2) Some state legislatures could elect to do nothing. That is, they would have no laws on abortion, leaving the procurement or performance open and unregulated.
- (3) Still other state legislatures could recognize abortion as a state right, and even a fundamental right under their state constitutions.

Clearly, then, over-ruling *Roe* would not mean that abortion automatically become illegal throughout the United States. Rather, each State would be faced with deciding who is a “person,” whether a woman has a right to choose and abortion, and a doctor to perform one, and whether the State itself ought to have any say on these questions.

### [C] Critique

Criticism of *Roe* has come from (*inter alia*) American legal scholars such as Professor John Hart Ely (1938-2003, who taught at the law schools of Yale, Harvard, Stanford, and Miami), who finds no guaranteed right to privacy inferable from the Constitution. Professor Ely studied the thinking of the Framers in regards to contraception, values derived from the provisions the Framers did include in the Constitution, and the governmental structure of the United States.<sup>80</sup> The right to privacy was a battle previously fought in *Griswold v. Connecticut*,<sup>81</sup> when the Supreme Court found a right to “marital privacy” inherent in the concept of “liberty” in the 14th Amendment. The holdings of both *Roe* and *Griswold* emphasized the right of a woman to privacy, up to some level, as part of the liberties guaranteed in the 14th Amendment.

This right of privacy, which the Supreme Court sources in the 14th Amendment, is the dominant basis for the critique by anti-*Griswold* and anti-*Roe* scholars. Critics find that the “right to privacy” is not a right articulated or alluded to in the Constitution. Ultimately, critics like Professor Ely find that the holdings of the Court in both *Griswold* and *Roe* are unconstitutional:

But if it [i.e., a neutral, durable principle grounded in the Constitution] lacks connection with any value the Constitution marks as special, it is not a constitutional principle and the Court has no business imposing it.<sup>82</sup>

Professor Ely argues both decisions lack this key connection. Indeed, the decision in *Roe* protecting abortion rights is wrong, urges Ely, because it is neither Constitutional Law nor even shows an obligation to try to be constitutional law. In other words, interpreting the 14th Amendment “liberty” interest to encompass abortion is legally dubious at best. It may be added that the Supreme Court holding that the unborn are not “persons” is morally repugnant, legally wrong-headed, and contrary to science.

<sup>80</sup> John Hart Ely, *The Wages of Crying Wolf: A Comment on Roe v. Wade*, 82 YALE LAW JOURNAL 920, 936 (1973). [Hereinafter, Ely.]

<sup>81</sup> *Griswold v. Connecticut*, 381 U.S. 479, 485 (1965).

<sup>82</sup> Ely, *supra*, at 949.

A close examination of *Roe* shows the Supreme Court does not endorse an unrestrained concept of privacy. Indeed, *Roe* also holds that while a woman is entitled to a certain level of privacy, she "cannot be isolated in her privacy."<sup>83</sup> The Court states:

[a] pregnant woman cannot be isolated in her privacy. She carries an embryo, and later, a fetus. . . . It is reasonable and appropriate for a State to decide that at some point in time another interest, that of health of the mother or that of potential human life, becomes significantly involved. The woman's privacy is no longer sole and any right of privacy she possesses must be measured accordingly.<sup>84</sup>

Still, critics like Professor Ely find that the value of privacy given by the Court in *Roe* is unaccounted for by any of the Founding Fathers in the text of the Constitution.

### [D] Islamic Law and *Roe*

How does the United States Supreme Court decision in *Roe v. Wade* compare with Islamic legal thinking? In one sense, the question is easy to answer: the two approaches are entirely different. One is grounded in a secular legal system, albeit with underlying moral and religious foundations, while the other is squarely in a sacred legal context in which decisions are made expressly on the basis of morality and religion. In another sense, the question is not an easy one to address, because Islamic jurisprudence on the topic is not monolithic. There is a range of opinion in the *Shari'a*. Either way, however, comparing the way in which the American and Islamic legal systems approach this highly charged debate is edifying. Table 40-1 highlights the key points.

Table 40-1:  
Summary of Comparisons on Abortion between Islamic Law and *Roe v. Wade*

Issue	Shari'a on Abortion	Roe v. Wade
Is there an explicit right to privacy?	No, not in the Qur'an. Arguably, may be inferred from the spirit of the Qur'an.	No, not in the Constitution. Arguably, may be inferred from 14 <sup>th</sup> Amendment Due Process Clause, specifically, liberty interest.
Is there an absolute right to an abortion?	No.	No.
Is there a restricted right to an abortion, i.e., is abortion permissible under certain circumstances?	Yes. Continuing debate about the circumstances.	Yes. Continuing, and heated, debate about the circumstances.
Is abortion viewed with disapproval?	Yes, it is explicitly reprehensible ( <i>makrah</i> ).	Arguable.

<sup>83</sup> *Roe, supra*, 410 U.S. at 159.

<sup>84</sup> *Roe, supra*, 410 U.S. at 159.

Issue	Shari'a on Abortion	Roe v. Wade
Is there a period during which abortion is permissible?	Yes, up to 40 or 120 days into a pregnancy, depending on the School of Law.	Yes, based on trimester system.
To whom is the decision about abortion left?	Principally, the mother, father, physician.	Principally, the mother, father, physician.
Are the individual rights of the mother the focus of attention?	No, not exclusively. The relationship of the mother to God (Allāh), fetus to Allāh, parents to Allāh, fetus to parents, and fetus to mankind matter, too.	Yes.

Under Islamic Law, up to a certain point in a pregnancy (which varies depending on the *hadith* that is followed), the decision as to whether to have an abortion is left to the mother, father, and physician. Much religious contemplation often is involved. Under *Roe*, these same parties are the key decision-makers, and much soul-searching also is typical. Neither the *Shari'a* nor *Roe* encourages abortion, and it is openly considered to be reprehensible (*makrah*) by Islamic religious and legal scholars (*ulema* and *fukahā'*, respectively). However, the *Shari'a* and *Roe* differ as to the allowable time, i.e., the time period during which an abortion may take place. *Roe* relies on the trimester method, as amended by *Casey*, whereas Islamic Law identifies the 40 or 120 day time period.

None of the Four Schools endorses unconditional abortion, just as *Roe* does not create an absolute right to an abortion. Abortion is permissible under the *Shari'a* in instances other than saving the life of the mother, as in cases of pregnancy as a result of rape or if the mother is psychologically incapable of raising a child, which was true in the companion case to *Roe*, *Doe v. Bolton*.<sup>85</sup> Communication between the physician and the mother is crucial and necessary under Islamic Law. Similarly, *Roe* encourages, or at least does not gainsay the importance of, this communication. Like the American Constitution, the Qur'an is devoid of any direct statement guaranteeing the privacy right of a woman. Arguably this right may be inferred from the general spirit of the Qur'an. Indeed, it may be said that it is from this spirit that scholars hold matters of abortion to be decisions confined to the family and physician until a certain time in the development of a fetus.

Islamic legal reasoning generally favors examination of specific instances, rather than comprehensive rulings. Abortion is no exception. In the United States, following the 1973 *Roe* decision, the debate about abortion is a polarizing one. Perhaps that is ineluctable, because (as indicated earlier) abortion is an issue on which there is no obvious middle way. Yet, Beth Conklin and Lynn Morgon, two scholars of anthropology, argue in favor of shifting to a more relational understanding of personhood, removing the need for an "all or nothing nature of American

<sup>85</sup> See 410 U.S. 179 (1973).

debates."<sup>86</sup> Comprehensive rulings, devoid of exceptions, tend to divide the legal and political landscape into two territories. Courts and activists on each side search for universal laws and principles to apply in every case. It is "their insistence on framing those principles in unqualified and universal terms . . . that] has done much to make the whole debate irresoluble."<sup>87</sup> Interestingly, the writings of Saint Thomas Aquinas may reveal some concurrence of opinion with the Islamic legal approach to abortion. Scholars Albert Jonsen and Stephen Toulmin cite Saint Thomas, finding that casuistic argumentation orients the debate in a more useful direction:

Aquinas acknowledges that the balance of moral considerations necessarily tilts in different directions at different stages in a woman's pregnancy, with crucial changes beginning around the time of quickening.<sup>88</sup>

To be sure, a careful examination of the work of Saint Thomas is required, and this work cannot be taken in isolation. It must be viewed in the light of the whole teaching of the Catholic Church on abortion.

In the meantime, it is fair to say that at the heart of complying with Islamic Law on abortion (or on any other topic) is the concept of the created pleasing the Creator. American discussions of abortion in the paradigm of *Roe* tend to revolve around an individualist model of personhood, and place the interest of one individual at odds with the interest of another individual. Islamic opinions on abortion are founded on a relational, socio-centric view. Deciding to abort a fetus or not does not revolve solely around the rights of the mother. Instead, the relation of the fetus to God (Allāh) is highly significant, as are the relations between the parents and Allāh, the fetus and parents, and even the fetus and mankind.

Islam, like many religious teachings, views fetal life as sacred. But, Islam has promoted the view that fetal life is one interest among others, including the life of the mother and the good of the community at large.<sup>89</sup> The fact that relationships change is what shapes the Islamic framework towards abortion. For example, consider a hypothetical example of Salma and Omar, two married adults who decide to have a child.

Salma becomes pregnant. Prior to ensoulment (again depending on which *hadith* is followed, either 40 or 120 days), scholars regard the fetus as inherently part of Salma. As time passes, the fetus develops into its own being — with its own heart, brain, and organs. After birth, the new baby, named Saleem, is considered to be his own independent being. Salma and Omar nurture Saleem, teach him Islamic guidelines so that they fulfill their responsibility as servants of God (Allāh) to raise a healthy, observant Muslim. Saleem soon grows up and fulfils his sacred duty as the son to care for Salma and Omar as they age. After Salma and Omar pass away, Saleem prays to Allāh to forgive them for any of their shortcomings. As their child,

<sup>86</sup> Katz, *supra*, at 47.

<sup>87</sup> Katz, *supra*, at 47.

<sup>88</sup> Katz, *supra*, at 47 (quoting ALBERT R. JONSEN AND STEPHEN TOULMIN, *THE ABUSE OF CASUISTY: A HISTORY OF MORAL REASONING* (Berkeley, California: University of California Press, 1988)).

<sup>89</sup> See JONATHAN E. BRICKOFF, *ISLAMIC ETHICS OF LIFE: ABORTION, WAR, AND EUTHANASIA* 24 (Columbia, South Carolina: University of South Carolina Press, 2003).

the supplication of Saleem is encouraged by the Prophet in his *Sunnah*. Whereas Salma and Omar prayed for protection during the childhood of Saleem, it is now Saleem who prays for mercy to be shown to his deceased parents. Indeed, there is always a connection between Saleem, Salma, Omar, and the Divine. Undoubtedly, Saleem is to improve and serve his community, much like his parents did he was a baby. This natural cycle of life helps explain why abortion is regarded as reprehensible (*makrūh*) under the *Sharī'a*. Had Saleem been aborted, this cycle never would have started.

In sum, the Islamic approach to abortion bears some resemblance to the articulation of the United States Supreme Court in *Roe v. Wade*. Critically, though, Islam differs in its religiously-grounded framework to the abortion debate. To Muslims, abortion is not about pitting one interest against another, but rather about balancing several relationships that all lead back to pleasing the Creator.

## § 40.06 CONTRASTING OPINIONS: CATHOLIC CHRISTIAN TEACHING

### [A] Two Misconceptions

Obviously, as with the *Sharī'a*, Catholic Christianity proposes a religiously-based framework on abortion. As on the topic of contraception, there is considerable misunderstanding about Catholic Christian teaching on abortion. Both topics evoke strong, passionate debate, but abortion has been much more of a public discussion in recent decades in the United States than contraception. At times, the debate has become uncivil, which of course it should not be, but which mirrors an endemic problem concerning respectful discussion in the American public realm.

Despite all the disagreement, there are two points on which persons of differing opinions can (or ought to be able to) agree. First, the majority of Americans, regardless of their religious affiliation, do not favor abortion. This majority sees it as the taking of a human life in the womb. To be sure, Americans in this majority hardly are of one mind as to whether abortion ought to be legally permissible under certain circumstances, and if so, what those exceptions should be. The range of opinion varies from moderate discomfort to vocal opposition. How a pollster words a question can affect the response given. But, trends in public polling clearly indicate that the beliefs of average Americans are more accurately characterized as a "pro-life" than a "pro-abortion" country.

Second, there has been very little sharing of information across faiths as to religious perspectives on abortion. That is, while Catholic and Protestant Christian views are put forth in the public debate, the perspectives of Islam, or for that matter, Eastern religions and philosophies, including Buddhism, are not widely presented or understood. As a corollary to the second point, there seems to be little information as to the different secular legal regimes on abortion. One exception is the Guttmacher Institute, which inclines toward a pro-abortion position.<sup>90</sup> Thus,

<sup>90</sup> See [www.guttmacher.org/about/mission.html](http://www.guttmacher.org/about/mission.html). The Mission Statement of this Institute states it is:

while Americans know what they think about abortion, and why, they tend not to know much about what persons of other faiths, or who live in other non-Christian countries, think.

In respect of Catholic Christian teaching on abortion, it is sometimes thought — erroneously — that the precepts sum up to a harsh “no” that insensitively suppresses the rights of women, abortion being one such supposed right. This characterization is conveyed, directly or indirectly, by some mainstream media outlets, pro-abortion action groups such as the National Abortion Rights Action League (NARAL) and the National Organization of Women (NOW), and purveyors of abortion services, such as Planned Parenthood, which view the issue from a different perspective. (To be sure, it is important that neither side of the debate demonize the other.) In truth, Catholic Christian teaching on abortion can be summarized in one simple word, uttered with enthusiasm: “Yes.” That is, the teaching is a hearty “yes” to life, a response that in word and deed embraces both mother and child, and indeed considers also the interests of the father.

A second misconception about Catholic Christian teaching on abortion is that it has evolved, and even changed, over two millennia. The *Catechism of the Catholic Church* makes plain this error:

Since the first century [A.D.] the Church has affirmed the moral evil of every procured abortion. This teaching has not changed and remains unchangeable. Direct abortion, that is to say, abortion willed either as an end or a means, is gravely contrary to the moral law:

You shall not kill the embryo by abortion and shall not cause the newborn to perish. [*Didache (Teaching of the Twelve Apostles)* 2, 2, written before 80 A.D.]

God, the Lord of life, has entrusted to men the noble mission of safeguarding life, and men must carry it out in a manner worthy of themselves. Life must be protected with the utmost care from the moment of conception: abortion and infanticide are abominable crimes. [Second Vatican Council, *Gaudium et Spes*, Pastoral Constitution on the Church in the Modern World, 51 § 3, promulgated by His Holiness Pope Paul VI, 7 December 1965.]<sup>91</sup>

dedicated to the advancement of women's reproductive health, which includes public education as one of its main goals in order to stimulate enlightened public debate, informed public policy and, ultimately, informed individual decision-making.

However, the Institute also states under its “Guiding Principles” that:

The Institute regards sexual and reproductive health as encompassing a wide range of people's needs from adolescence onward. The Institute works to protect, expand and equalize access to information, services and rights that will enable women and men to

- avoid unplanned pregnancies;
- prevent and treat sexually transmitted infections, including HIV;
- exercise the right to choose abortion; . . .

*Id.* (emphasis added).

<sup>91</sup> CATECHISM OF THE CATHOLIC CHURCH ¶ 2271 at 548 (United States Catholic Conference, Inc., Washington, D.C.: Libreria Editrice Vaticana, 2nd ed. 1997) (emphasis added). [Hereinafter, CATECHISM.]

Despite the plain language of the *Catechism*, this misconception has been encouraged, intentionally or not, by certain American politicians, notably, Speaker of the House of Representatives Nancy Pelosi (Democrat — California) during the 2008 Presidential Election.<sup>92</sup> In fact, since the earliest days of the Church, the teaching has not wavered. Jesuit Father John Hardon (1914-2000) explains:

The Roman Empire into which Christianity was born practiced abortion and infanticide on a wide scale. Chronologically, the exposure of unwanted infants came earlier, and was sanctioned by Roman law. By the first century B.C., Romans were gradually getting away from exposure, while abortions were on the increase. The distinction they made between infanticide and abortion was due to the difference between the emotional reactions to what they must see and what they could avoid seeing.

From the outset, therefore, the Christian religion was confronted with a society in which abortion was the rule rather than the exception. The Church reacted immediately and vigorously. The *Didache* (composed before A.D. 80) told the faithful what they must not do: “You shall not procure abortion. You shall not destroy a newborn child.”

Before the year A.D. 138, the epistle of Barnabas was equally explicit, placing the crime of abortion among the actions of those who walk the Way of Darkness. “There are two Ways of instruction,” Christians were told, “as there are two powers, that of Light and that of Darkness. And there is a great difference between the Two Ways. The one is controlled by God's light-bearing angels, the other by the angels of Satan. And as the latter is

<sup>92</sup> The comments of the Speaker were made during a television interview in August 2008, as follows:

REP. PELOSI: I would say that as an ardent, practicing Catholic, this is an issue that I have studied for a long time. And what I know is, over the centuries, the doctors of the church have not been able to make that definition. And Senator — St. Augustine said at three months. We don't know. The point is, is that it shouldn't have an impact on the woman's right to choose. *Roe v. Wade* talks about very clear definitions of when the child — first trimester, certain considerations; second trimester; not so third trimester. There's very clear distinctions [*sic*]. This isn't about abortion on demand, it's about a careful, careful consideration of all factors and — too — that a woman has to make with her doctor and her god. And so I don't think anybody can tell you when life begins, human life begins. As I say, the Catholic Church for centuries has been discussing this, and there are those who've decided . . .

MR. BROKAW [INTERVIEWER]: The Catholic Church at the moment feels very strongly that it . . .

REP. PELOSI: I understand that.

MR. BROKAW: . . . begins at the point of conception.

REP. PELOSI: I understand. And this is like maybe 50 years or something like that. So again, over the history of the church, this is an issue of controversy. But it is, it is also true that God has given us, each of us, a free will and a responsibility to answer for our actions. And we want abortions to be safe, rare, and reduce the number of abortions. That's why we have this fight in Congress over contraception. My Republican colleagues do not support contraception. If you want to reduce the number of abortions, and we all do, we must — it would behoove you to support family planning and, and contraception, you would think. But that is not the case. So we have to take — you know, we have to handle this as respectfully — this is sacred ground. We have to handle it very respectfully and not politicize it, as it has been — and I'm not saying [American Evangelical Christian Minister] Rick Warren (1954-) did, because I don't think he did, but others will try to.

the Ruler of the present era of lawlessness, so the former is Lord from eternity to eternity." Among the precepts of the Way of Light is this: "Do not murder a child by abortion, or commit infanticide." Significantly, the two operative words in the prohibition are explicitly "murder" (Greek *phoneuō*, bloody slaughter) and "child" (*teknon*).

As the Christian attitude toward abortion began to penetrate Roman society, Christian believers were challenged by the prevalent [Greek] Stoic theory of human life beginning only at actual birth of the fully developed infant. This would mean that there could be no destruction of a child by abortion. The faithful were therefore reminded that this was not true; rather that the life begun at conception continued essentially unchanged during its whole period of development. Induced abortion at any stage was a homicide.

*On the level of morality, Roman Catholicism has always held that the direct attack on an unborn fetus, at any time after conception, is a grave sin. The history of this teaching has been consistent and continuous, beginning with earliest times and up to the present.*

The Church's teaching on abortion is just that; it is doctrine the Church proclaims on the prior assumption that the Magisterium is empowered by Christ to proscribe and prescribe in any area of human conduct that touches on the commandments of God, whether derived from nature or supernatural revelation.<sup>93</sup>

Additionally, as Father Hardon summarizes:

Hundreds of ecclesiastical documents from the first century through the present testify to the same moral doctrine, with such nuances as time, place, and circumstances indicated. The Second Vatican Council declared: "Life must be protected with the utmost care from the moment of conception," so that "abortion and infanticide are abominable crimes" (*Constitution on the Church in the Modern World*, IV, 51). Pope Paul VI confirmed this teaching in 1974. "Respect for human life," he wrote, "is called for from the time that the process of generation begins. From the time that the ovum is fertilized, a life is begun which is neither that of the father nor of the mother. It is rather the life of a new human being with its own growth. It would never be made human if it were not human already." Consequently, "divine law and natural reason exclude all right to the direct killing of an innocent human being" (*Declaration on Procured Abortion*, III, 12).<sup>94</sup>

<sup>93</sup> JOHN A. HARDON, S.J., *THE CATHOLIC CATECHISM — A CONTEMPORARY CATECHISM OF THE TEACHINGS OF THE CATHOLIC CHURCH* 334-335 (New York, New York: Doubleday, 1981). [Hereinafter, HARDON, CATHOLIC CATECHISM.]

<sup>94</sup> JOHN A. HARDON, S.J., *MODERN CATHOLIC DICTIONARY* 5 (Doubleday: Garden City, New York, 1980) (entry for "abortion"). [Hereinafter, MODERN CATHOLIC DICTIONARY.] For a brief historical review of the hundreds of Church documents dating from the 1st century A.D. to modern times on abortion, see HARDON, CATHOLIC CATECHISM, *supra*, 339-341.

Simply put, the basic precepts have remained unchanged, and if anything, have been reinforced by developments in science, philosophy, and theology.

Not surprisingly, the Church mourns the consequences of abortion, not only for the mother and father (discussed below), but also — and foremost — in terms of the loss of life. Since the 1973 *Roe v. Wade* decision, there have been approximately 50 million abortions in the United States. Specifically, in 2005, 1.21 million abortions were performed, down from 1.31 million in 2000.<sup>95</sup> From 1973 through 2005, more than 45 million legal abortions occurred.<sup>96</sup> Catholic teaching not only counsels for an end to abortion, but also the Social Justice teaching of the Church urges an improvement of the conditions, including poverty, in which many women, especially minorities, find themselves and thereby regrettably view abortion as an appropriate choice.

The statistics relating to this teaching are stark and sobering. In the United States, abortions disproportionately happen to minority women. In 2000-2001, the abortion rates among Black (African-American) and Hispanic women were 49 per 1,000 and 33 per 1,000, respectively, as compared with 13 per 1,000 among non-Hispanic White women. Moreover, 40 percent of pregnancies among White women are unintended, while among Blacks the figure is 69 percent, and among Hispanics it is 54 percent. Of all abortions, 37 percent occur to Black women, 34 percent to non-Hispanic white women, 22 percent to Hispanic women, and 8 percent to women of other races. These figures are out-of-proportion with the percentage of minorities in the American population: Blacks make up 12.8 percent of the American population, and Hispanics and Latinos another 15.4 percent.<sup>97</sup> (Non-Hispanic Whites account for 65.6 percent.) Thus, the number of abortions of Black babies exceeds the percentage of Blacks in the American population.<sup>98</sup>

## [B] "Yes" to Life

Evidently, in contrast not only to the 1973 United States Supreme Court decision in *Roe v. Wade*, but also to Islamic legal precepts, Catholic Christian teaching holds that a direct, deliberate abortion cannot under any circumstances be condoned. That is true even if the reasons seem compelling. Father Leo J. Trese (1902-1970) distinguishes self-defense from abortion:

[T]he principle of self-defense applies only when we are the victim of an unjust attack. It never is permissible directly to take the life of an innocent person in order to save one's own. If I am shipwrecked with

<sup>95</sup> See R.K. Jones et al., *Abortion in the United States: Incidence and Access to Services, 2005*, 40 PERSPECTIVES ON SEXUAL AND REPRODUCTIVE HEALTH issue 1, 6-16 (2008). [Hereinafter, Jones et al.] Note that the numbers reported are voluntary and do not include data on abortions performed before *Roe v. Wade* that would have been done in private to avoid legal consequences. Moreover, because reporting of abortions is not mandatory, statistics are of varying reliability. The Centers for Disease Control (CDC) endeavors to keep statistics on abortion.

<sup>96</sup> See Jones et al., *supra*.

<sup>97</sup> See <http://quickfacts.census.gov/qft/states/00000.html>. These data are based on 2000 estimates.

<sup>98</sup> The distributions are published by the Centers for Disease Control and Prevention, adjusted for year-to-year changes in the reporting states, and applied to the total number of abortions in Jones et al., *supra*. See [www.guttmacher.org/pubs/ab\\_induced\\_abortion.html#fn1](http://www.guttmacher.org/pubs/ab_induced_abortion.html#fn1).

another person and there is only food enough for one, I may not kill the other person in order to save my own life. Neither may an unborn infant be directly killed in order to save the life of the mother. The unborn child is *not* an unjust aggressor against the mother and has a right to life as long as God permits him to live. To destroy the life of an unborn child directly and deliberately is a most grave sin; murder made more vicious by sending into eternity a soul with no opportunity for baptism. This is another sin which the Church has tried to check by imposing excommunication on all who have any willing part in it; not only the mother but also the cooperating father and any doctor or nurse involved.<sup>99</sup>

Here, then, is the enthusiastic "yes" to life: newly created life is to be respected in all instances. The *Catechism of the Catholic Church* (quoted above) sets out this precept.

### [C] "Direct" Abortion, Conception, and Intention

As is evident from the foregoing discussion, Catholic Christian teaching distinguishes between a "direct" and an "indirect" abortion. Technically, it is the former that is strictly forbidden. The *Catechism of the Catholic Church* defines "abortion" with this distinction in mind: Abortion is the:

*Deliberate termination of pregnancy by killing the unborn child. Such direct abortion, willed either as an end or means, is gravely contrary to the moral law. The Church attaches the canonical penalty of excommunication to this crime against life.<sup>100</sup>*

Father Hardon elaborates on the meaning of "abortion":

The term "abortion" as understood in Catholic morality means expelling an immature fetus from the mother's womb. The fetus must, first of all, be living; if it is certainly dead, its removal is not only permissible but ordinarily necessary. Moreover, the fetus must be immature or nonviable, by which is meant that it cannot live outside the womb even with the most extraordinary medical care. In ordinary circumstances a fetus is considered viable by the end of the twenty-eighth week of pregnancy, allowing for two or so weeks earlier if the child is to have special medical assistance like an incubator.

<sup>99</sup> LEO J. THEIS, *THE FAITH EXPLAINED* 211 (Manila, Philippines: Sinag-Tala Publishers, Inc. 1965, 6th Philippine printing, 1991, updated by Father Robert Bucciarelli) (emphasis original).

On the legitimate invocation of self-defense, see *CATECHISM*, *supra*, ¶¶ 2263-2266 at 545-546, ¶¶ 2302-2317 at 554-558.

Note that traditionally, the Church — without ever affirmatively favoring or advocating capital punishment — viewed the death penalty as an extension of the self-defense principle, justified as concomitant with the duty of a lawfully constituted government to protect the common good of citizens against an unjust attack. See *id.* at 211-212. However, because of the availability in many countries of an alternative, non-lethal sanction that has an equivalent protective effect, namely, life imprisonment without parole, many clergy and laity within the Church now oppose capital punishment as both unnecessary and unjustified.

<sup>100</sup> *CATECHISM*, *supra*, at 564 (definition of "abortion") (emphasis added).

Since the modern legalization of abortion, however, the same term is used medically to describe what is more properly a form of feticide, where the living fetus is *directly* killed by a variety of now sophisticated physical or chemical means. In moral language, this too is abortion, but with the added malice of a *direct* assault on human life within the womb.<sup>101</sup>

As with the *Catechism* definition, note from the above elaboration the question of whether an "abortion" or "feticide" is "direct."

Indeed, vitally important to Catholic teaching on "abortion" is a distinction between "direct" and "indirect" abortion. Father Hardon explains:

In Catholic morality, abortion is either direct (induced) or indirect. *Direct* abortion is any destruction of the product of human conception, whether before or after implantation in the womb. A direct abortion is one that is *intended either as an end in itself or as a means to an end*. As a willful attack on unborn human life, no matter what the motive, direct abortion is always a grave objective evil.

*Indirect* abortion is the foreseen but merely permitted evacuation of a fetus which cannot survive outside the womb. The evacuation is *not the intended or directly willed result, but the side effect, of some legitimate procedure*. As such it is morally allowable.<sup>102</sup>

In other words, an abortion is "direct" if the intended aim is to kill the child. In no circumstance, including saving the life of the mother, rape, or incest, does Catholic teaching condone a direct abortion. Again, there is a "yes" to life in all instances. The rationale is that life is sacred, and taking it, even to save another life, or under unfortunate circumstances surrounding the pregnancy, cannot be justified. From a common sense perspective, would be to compound one tragedy with another, or to commit another grave moral evil following the first one. The victim, of course, would be the most innocent, vulnerable, and defenseless — the child in the womb.

Why, exactly, is a direct abortion always a grave, objective evil? That is, what is the justification for Catholic Christian teaching on abortion? It certainly is true that Catholic Christianity holds that life begins at conception, a precept now widely accepted by science, and one that appears in some medical school textbooks.<sup>103</sup> Thus, it is often thought that abortion is wrong because it involves killing a human

<sup>101</sup> HARDON, *CATHOLIC CATECHISM*, *supra*, at 336 (emphasis added).

<sup>102</sup> MODERN CATHOLIC DICTIONARY, *supra*, at 5 (emphasis added).

<sup>103</sup> For example, Dr. Keith L. Moore, University of Toronto School of Medicine Professor Emeritus of Anatomy and former Associate Dean for Basic Medical Sciences writes:

Human development begins after the union of male and female gametes or germ cells during a process known as fertilization (conception). Fertilization is a sequence of events that begins with the contact of a sperm (spermatozoon) with a secondary oocyte (ovum) and ends with the fusion of their pronuclei (the haploid nuclei of the sperm and ovum) and the mingling of their chromosomes to form a new cell. This fertilized ovum, known as a zygote, is a large diploid cell that is the beginning, or primordium, of a human being.

KEITH L. MOORE, *ESSENTIALS OF HUMAN EMBRYOLOGY* 2 (St. Louis, Missouri: Elsevier (Mosby-Year Book), 1988) (emphasis original).

life inside the womb, *i.e.*, it is murder. This rationale is not erroneous. After all, the *Catechism* states:

2274 Since it must be treated from *conception* as a person, the embryo must be defended in its integrity, cared for, and healed, as far as possible, like any other human being.

...

2322 From its *conception*, the child has the right to life. . . .

2323 Because it should be treated as a person from *conception*, the embryo must be defended in its integrity, cared for, and healed like every other human being.<sup>104</sup>

On the issue of when life begins, the 1973 United States Supreme Court decision in *Roe v. Wade* is inconsistent with Catholic teaching.

Indeed, contrary to what defenders of *Roe* believe, that decision is out of step with legal precedent about when a "person" exists and acquires legal rights. The Supreme Court based its arguments narrowly on the work of a law professor (Cyril Chesnut Means, Jr. (1919-1992) of New York Law School) and historian (James C. Mohr of the University of Oregon). However, as Professor Joseph W. Dellapenna of Villanova Law School argues in *Dispelling the Myths of Abortion History* (2006), Anglo-American law always has treated abortion as a serious crime.<sup>105</sup> Prosecutions (and even executions) date back 800 years in England, thereby establishing a legal regime that carried into Colonial America. Regrettably, from a Catholic perspective, the majority in *Roe* was unwilling to follow this long legal tradition, and instead eschewed endowing a fetus with the title "person." Once the Court made this choice, the dye was cast — a fetus had no right to life.

There is yet more to the rationale for Catholic teaching on abortion. Its gravely sinful nature lies in what at law is called "*mens rea*," *i.e.*, culpable intent. Father Hardon states:

The essential sinfulness of direct abortion consists in the *homicidal intent to kill innocent life*. This factor places the controverted question as to precisely when human life begins, outside the ambit of the moral issue; as it also makes the now commonly held Catholic position that human life begins at conception equally outside the heart of the Church's teaching about the grave sinfulness of direct abortion.<sup>106</sup>

Father Hardon explains further:

<sup>104</sup> CATECHISM, *supra*, §§ 2274, 2322-2323 at 549, 558 (emphasis added).

Concerning pre-natal diagnosis, this procedure is "morally licit" as long as it is not done with a view to an abortion depending on the results, as "a diagnosis must not be the equivalent of a death sentence." See *id.*, § 2274 (quoting Congregation for the Doctrine of the Faith, *Donum Vitae* I, 2). On the topic of procedures carried out on a human embryo, see *id.*, § 2275.

<sup>105</sup> See JOSEPH W. DELLAPENNA, *DISPELLING THE MYTHS OF ABORTION HISTORY* (Durham, North Carolina: Carolina Academic Press, 2006).

<sup>106</sup> MODERN CATHOLIC DICTIONARY, *supra*, at 5 (emphasis added).

More important, though, from the moral standpoint [than the use of the term "abortion" to describe what medically is "feticide"] is the *intention that motivates an abortion*. Although the same word "abortion" is used, it has a totally different moral meaning — depending on whether the motive is to directly attack the fetus, no matter what purpose is alleged to excuse the attack; or whether the motive is to save the life of a pregnant mother and, in the process, the unborn child is reluctantly permitted to die.

...

Wherein lies the essential sinfulness of abortion? It consists in the *homicidal intent to kill innocent life*.<sup>107</sup>

Accordingly, because it is the intent to kill that makes abortion a grave, objective evil, it does not matter exactly when life begins, nor when ensoulment occurs.<sup>108</sup> That is, even if it is thought that life does not begin at conception, the religious and moral outcome does not change. As Father Hardon states:

The exact time when the fetus becomes "animated" has *no practical significance* as far as the morality of abortion is concerned. By any theory of "animation," abortion is gravely wrong. Why so? Because *every direct abortion is a sin of murder by intent*. It is, to say the least, probably that every developing fetus is a human being. To deliberately kill what is probably human is murder.<sup>109</sup>

Succinctly put, if the goal procuring or performing an abortion is to kill, then act itself is wrong by virtue of that goal.

## [D] Further Rationales Against Direct Abortion

Beyond considerations of intention, it may be asked what are the theological and philosophical bases for the precept that a direct abortion is gravely sinful? There are five such bases. The first three of them are distinctly theological. They reflect the three sources of Catholic Christianity: Sacred Tradition, Sacred Scripture, and the Magisterium of the Church. The fourth basis also is theological in nature, but not tied to Catholicism. The fifth basis is largely philosophical in nature. Taken individually or together, they serve as further rationales, in addition to that concerning intent, for the Catholic precept.

First, consider Sacred Tradition. As the *Didache* and *Epistle of Barnabas* (quoted earlier) make clear, it always has been Catholic Christian practice to regard a deliberate abortion as seriously morally wrong. This practice pre-dates even the New Testament, as the *Didache* and *Epistle* predate agreement on a

<sup>107</sup> HARDON, CATHOLIC CATECHISM, *supra*, at 336-337 (emphasis added).

<sup>108</sup> In effect, when a sperm fertilizes an egg, life begins. All of the material needed for a full human being exists from that moment onward. Consequently, the moment of ensoulment is not directly relevant to the issue of abortion. No one can see when God places a soul in an embryo — it is not a phenomenon visible under even the most powerful of imaging technologies. It may well be at the moment of conception, not thereafter. But, for purposes of the issue, it does not matter. What matters — according to Catholic teaching — is that a life exists at that moment.

<sup>109</sup> HARDON, CATHOLIC CATECHISM, *supra*, at 338 (emphasis added).

canonical text of the New Testament (which occurred in 393 A.D. at the African Synod of Hippo, and was reaffirmed by the Councils of Carthage in 397 and 419 A.D., both of which occurred under the authority of Saint Augustine).<sup>110</sup>

Second, in respect of Sacred Scripture, the Bible, specifically, the 5th Commandment — “You shall not kill” — set out in the Old Testament Books of *Exodus* (20:13) and *Deuteronomy* (5:17) is not restricted to the taking of post-natal life. Furthermore, as recorded in the Chapter 5 of the New Testament *Gospel According to Matthew*, in the Sermon on the Mount Jesus states:<sup>111</sup>

“<sup>21</sup>You have heard that it was said to your ancestors, ‘You shall not kill; and whoever kills will be liable to judgment.’ <sup>22</sup>But I say to you, whoever is angry with his brother will be liable to judgment. . . .”<sup>112</sup>

That is, Jesus reiterates and supplements the 5th Commandment to include anger, hatred, and vengeance.

Third, the teaching of the Church — the Magisterium — on the subject has been consistent through the ages. It has been reiterated on many occasions, including at the 1962-1965 Second Vatican Council in *Gaudium et Spes* (quoted earlier).

The fourth basis is theological in nature, but asserts a principle accepted by all religions: the sanctity of human life and, consequently, the imperative of respecting human dignity. Each and every human being, regardless of his or her religious affiliation, is a creature of God, whether or not he or she recognizes or accepts this Divine origin. As such, each person is endowed by the Creator with dignity. If human life is sacrosanct, then it follows that it must be respected as such, i.e., its dignity must be upheld. The *Catechism* explains:

2258 “*Human life is sacred* because from its beginning it involves the creative action of God and it remains for ever in a special relationship with the Creator, who is its sole end. God alone is the Lord of life from its beginning until its end: no one can under any circumstance claim for himself the right to destroy an innocent human being.” [Congregation for the Doctrine of the Faith, Instruction, *Donum Vitae*, intro. 5.]

2270 Human life must be respected and protected absolutely from the moment of conception. From this first moment of his existence, a human being must be recognized as having the *rights of a person* — among which is the inviolable right of every innocent being to life.

<sup>110</sup> The decision to commission the Latin Vulgate edition of the Bible was made by Pope Damasus I around 383 A.D., following the 382 A.D. Council of Rome, and implying that by the 4th century A.D., the Church was unified as to what constituted the canonical text of the Bible. The 1546 A.D. Council of Trent issued a full, dogmatic articulation of the complete Bible as used in Roman Catholicism. See *Bible Canon*, Wikipedia, [http://en.wikipedia.org/wiki/Biblical\\_canon](http://en.wikipedia.org/wiki/Biblical_canon).

<sup>111</sup> See *Catechism*, *supra*, § 2262 at 545. Notably, Christ himself, when arrested though innocent, did not resort to violence to defend himself, and rebuked Peter for his use of the sword, telling him to leave it in his sheath. See *id.*

<sup>112</sup> *The Gospel According to Matthew*, 5:21-22, in *THE CATHOLIC STUDY BIBLE 14* (Oxford: Oxford University Press, 1990), also quoted in part in *Catechism*, *supra*, § 2262 at 544.

Before I formed you in the womb I knew you, and before you were born I consecrated you. [*The Book of Jericho*, 1:5.]

My frame was not hidden from you, when I was being made in secret, intricately wrought in the depths of the earth. [*The Book of Psalms*, 139:15.]<sup>113</sup>

In brief, the right to life (and physical integrity) is a fundamental and inalienable human right.<sup>114</sup> It is not conceded by a political or judicial authority, nor does it spring from civil society. It does not depend on a particular individual or parent. Rather, this right inheres in a human being, because of the human nature of that being, which is inherent in that being by virtue of the creative act from which the being originated.<sup>115</sup> Significantly, not only is this right consistent with Muslim teachings about the relationship between God (Allāh) and man, but also the way in which it is articulated is familiar to Islam.

Natural Law provides a fifth basis for declaring direct abortion to be gravely sinful. Essentially, Natural Law is written into the human heart, and discernible by reason. It is innate in us, or (to use a computer term), hard-wired into us, as human beings. Even if a person rejects the first four bases for the teaching that abortion is a serious moral wrong, it is difficult to reject the fourth basis. The human heart, when searched carefully with an open mind using the faculty of rationale thinking, comes to know the wrongness of intentionally taking a life in the womb.

## [E] “Indirect” Abortion and Principle of the Double Effect

An abortion is “indirect” if the purpose of a surgical procedure is not to kill the child, but the death of the child is a result of the procedure. Father Hardon explains:

[E]ven though pregnancy is involved, it is lawful to extract from the mother a womb that is dangerously diseased (e.g., cancerous). This is not the same as direct abortion, and Catholic morality allows this kind of increasingly rare surgery according to what has come to be known as the principle of the double effect. To be licitly applied, the principle must observe four limiting norms:

1. The action (removal of the diseased womb) is good; it consists in excising an infected part of the human body.
2. The good effect (saving the mother's life) is not obtained by means of the evil effect (death of the fetus). It would be just the opposite, e.g., if the fetus were killed in order to save the reputation of an unwed mother.

<sup>113</sup> *Catechism*, *supra*, § 2262 at 545 (emphasis in § 2258 original, emphasis in § 2270 added).

<sup>114</sup> See *Catechism*, *supra*, § 2273 at 548.

<sup>115</sup> See Congregation for the Doctrine of the Faith, *Donum Vitae* III, quoted in *Catechism*, *supra*, § 2273 at 548. Consequently, when a state deprives a category of its people the protection of the right to life, and thereby does not use its power to serve the interests of all of its people, including the most vulnerable, the state behaves inconsistently with the principle of equality before the law, and undermines its foundation as a state based on the rule of law. See *id.*

3. There is sufficient reason for permitting the unsought evil effect that unavoidably follows. Here the Church's guidance is essential in judging that there is a sufficient reason.
4. The evil effect is not intended in itself, but is merely allowed as a necessary consequence of the good effect.

Summarily, then, the womb belongs to the mother just as completely after a pregnancy as before. If she were not pregnant, she would clearly be justified to save her life by removing a diseased organ that was threatening her life. The presence of the fetus does not deprive her of this fundamental right.<sup>116</sup>

In sum, the Principle of the Double Effect allows for the commission of an action that has a good effect, as long as the good effect is not obtained by means of the evil effect, that evil effect is nothing more than an ineluctable result of the good effect, and a sufficient justification exists to permit the unwanted evil effect.

Regrettably, from a Catholic perspective, the number of abortions that occur in practice for purported therapeutic reasons is far larger than the number of *bona fide* therapeutic cases.<sup>117</sup> Father Hardon states:

With the development of modern science, these so-called therapeutic abortions, where the mother's life is in immediate danger, are becoming increasingly rare. The point has now been reached that more and more doctors come to reject the idea of therapeutic abortion entirely.<sup>118</sup>

Why does this asymmetry between claimed and actual therapeutic cases exist? The reason lies in part because of language permitting abortion in secular legal systems for reasons such as grave impairment of the physical or mental health of the mother, or a grave physical or mental defect in the child. Such expansive language is characterized as "equivalent to abortion on demand," and permission for an abortion because of the "mental" health of the mother encompasses any instance, including anxiety of having a child, in which termination of an unwanted pregnancy is sought.<sup>119</sup>

A point related to the principle of the double effect is a "sophism that the Church prefers the life of the child over that of the mother." In 1951, Pope Pius XII spoke directly to this fallacious argument:

Never and in no case has the Church taught that the life of the child must be preferred to that of the mother. It is erroneous to put the question with this alternative: either the life of the child or that of the mother. No, neither

the life of the mother nor that of the child can be subjected to an act of direct suppression. In the one case as in the other, there can be but one obligation: to make every effort to save the lives of both, of the mother and the child.<sup>120</sup>

In brief, both lives are sacred. They are unique, unrepeatable, and of inestimable value.<sup>121</sup>

## [F] Compassion

Catholic Christian teaching holds that it is not compassionate to deny a pregnant woman full information about the possible short- and long-term physical and psychological consequences of abortion. That also is true in respect of alternatives to the procedure, particularly adoption. Likewise, to deny her support if she chooses to carry through with her pregnancy is uncompassionate.

On the first point, therefore, in a secular legal regime in which abortion is legal under some circumstances, the Catholic Church encourages that pregnant women inquiring about abortion be presented with what lawyers would call all "material" information, that is, information significant to making an informed choice. Examples of such information include medical studies (or synopses thereof) that demonstrate links between abortion and breast cancer, and abortion and depression. It also includes witnessing a sonogram. Pro-abortion advocates sometimes characterize presentation of material information as a "restriction" on the right of a woman to choose. In truth, from a Catholic vantage point, offering such data is consistent with treating a mother as a fully human, intelligent being competent to weigh evidence and make a decision. As a practical legal matter, whether a mother has access to such information differs from one American state to another. Under cases following *Roe*, such as *Planned Parenthood v. Casey*, the United States Supreme Court is willing to give states some latitude in deciding what is, and what is not, an unconstitutional "restriction."<sup>122</sup> Not surprisingly, therefore, a considerable volume of litigation occurs on a state-by-state basis as to what regulations are appropriate under *Roe* and its progeny cases.

On the second point, social services to support a mother who chooses to give birth to her child are essential. These services include adoption. But, they also

<sup>120</sup> Pius XII, *Allocution to the Association of Large Families, Acta Apostolicae Sedis* (1951), XLIII, at 855, quoted in HARDON, *CATHOLIC CATECHISM*, *supra*, at 341.

<sup>121</sup> A related and difficult issue concerns the treatment of rape victims. Catholic teaching concerning their treatment is that they must be accorded compassion, respect, and understanding, and further that:

it is morally permissible to prescribe medication and other treatments that can prevent fertilization from occurring, but nothing may be done to stop the implantation of a fertilized egg in the uterine wall. . . . Unlike the sperm from a conjugal act [which is freely and deliberately entered into by a husband and wife], the rapist's sperm is unjustly deposited in the woman's vagina, and the woman has the right to treat the sperm accordingly. Once fertilization has taken place, however, even the rape-conceived human possesses all the rights and dignity of any other human being. The embryo is completely innocent of the evil involved in the rape act.

DAVID BOHR, *CATHOLIC MORAL TRADITION* 300-301 (Huntington, Indiana: Our Sunday Visitor, rev'd ed., 1999).

<sup>122</sup> See *Planned Parenthood of Southeastern Pennsylvania v. Casey*, 505 U.S. 833 (1992).

<sup>116</sup> HARDON, *CATHOLIC CATECHISM*, *supra*, at 337.

<sup>117</sup> See generally Martha F. Davis, *Abortion Access in the Global Marketplace*, 88 NORTH CAROLINA LAW REVIEW 1657-1685 (2010) (arguing that in most countries with an official health care system, and in which some abortions are legal, a "therapeutic" abortion — one performed to protect the life or health of the mother — is regarded as part of a fundamental right to health care, and public funding is available for therapeutic abortions for low-income women).

<sup>118</sup> HARDON, *CATHOLIC CATECHISM*, *supra*, at 337 (emphasis added).

<sup>119</sup> HARDON, *CATHOLIC CATECHISM*, *supra*, at 337.

must include help for the mother to continue with her educational and career aspirations following her pregnancy, whether or not she elects to give her child up for adoption. Catholic Christian teaching thus supports efforts to provide greater funding for such services. This encouragement is redolent of *Shari'a* precepts in favor of charitable trusts (*waqf*).

A final point concerns the position of a mother who intentionally chooses to undergo a direct abortion. Strictly speaking, and assuming all pertinent conditions (explained below) are met, the result for the mother, and anyone who materially assisted her in procuring an abortion, is excommunication from the Catholic Church. The *Catechism* states:

2272 Formal cooperation in an abortion constitutes a grave offense. The Church attaches the canonical penalty of excommunication to this crime against human life. "A person who procures a completed abortion incurs excommunication *latae sententiae*" [under the Code of Canon Law § 1398], "by the very commission of the offense" [see Code of Canon Law § 1314], and subject to the conditions provided by Canon Law [see §§ 1323-1324]. The Church does not thereby intend to restrict the scope of mercy. Rather, she makes clear the gravity of the crime committed, the irreparable harm done to the innocent who is put to death, as well as to the parents and the whole of society.<sup>123</sup>

However, it is important to appreciate what "excommunication" means. It is a:

severe ecclesiastical penalty, resulting from grave crimes against the Catholic religion, imposed by ecclesiastical authority or incurred as a direct result of the commission of an offense. Excommunication excludes the offender from taking part in the Eucharist or other sacraments and from the exercise of any ecclesiastical office, ministry, or function.<sup>124</sup>

To be clear, it is not the case that Church authorities aggressively scout for persons to excommunicate.

Quite the contrary, it is an unusual sanction imposed with reluctances only in egregious cases. Excommunication cannot be imposed on a person who has not reached the age of majority (which is 16 years), nor can it be imposed on a person who did not know that it was the penalty for procuring or performing and abortion.<sup>125</sup> Critically, then, excommunication results when a person willfully has separated himself or herself from the most essential Catholic principles, fully aware of the consequences of that decision. By making the choice of abortion, a mother and anyone who abets her have cut themselves off from the Church, its unequivocal teaching, and indeed what it means to be "Catholic." The key point, then, is that the Church does not condemn the mother or others involved — as a general matter, people condemn themselves.

<sup>123</sup> *Catechism, supra*, ¶ 2272 at 548.

<sup>124</sup> *Catechism, supra*, at 878 (definition of "excommunication").

<sup>125</sup> See Code of Canon Law §§ 1314, 1323-1324.

Moreover, mercy always triumphs over judgment. The remedy — that is, the means for lifting an excommunication — is clear and readily available: an honest, sincere confession by those involved will reconcile them to the Church. As the *Catechism* states:

1463 Certain particularly grave sins incur excommunication, the most severe ecclesiastical penalty, which impedes the reception of the sacraments and the exercise of certain ecclesiastical acts, and for which absolution consequently cannot be granted, according to canon law, *except by the Pope, the bishop of the place or priests authorized by them* [see Code of Canon Law §§ 1331, 1354-1357]. *In danger of death any priest, even if deprived of faculties for hearing confessions, can absolve from every sin and excommunication* [see Code of Canon Law § 976].<sup>126</sup>

Thus, the Church offers a Sacramental means to restore a broken relationship with God. There is considerable anecdotal evidence that many mothers who have suffered the tragedy of an abortion take advantage of the Sacrament of Reconciliation, sometimes after carrying the guilt of an abortion they had 20, 30, 40, 50, and even 60 years earlier, and feel a deep sense of peace in doing so.

## [G] Synopsis of Contrasts

There are crucial distinctions on abortion between Catholic teaching and the *Shari'a*. First, Islamic precepts on abortion have evolved and continue to be debated. Catholic Christian teaching on the subject is invariant and invariable.

Second, Catholic morality emphasizes the intent to destroy innocent human life, making the precise moment at which life begins or ensoulment occurs immaterial. Islamic rules are based in part on when life begins and ensoulment occurs, hence the debate among the Four Schools as to the number of days into a pregnancy (*e.g.*, 40, 42, 120) when abortion is permissible.

Third, Islamic Law by no means champions abortion, it does admit a narrow necessity exception, such as to save the life of the mother. In part, the *Shari'a* does so because of the different starting points and reasoning processes of scholars in the two faiths. Islamic scholars are not resolute about defining these moments, and generally identify 120 days into a pregnancy, not conception, as the critical threshold. Consequently, when they examine Qur'anic passages to the effect that Muslims should not kill their "children," they interpret the word "child" differently from Catholic scholars. During the period when there arguably is no "child," abortion to them becomes less unacceptable than otherwise is true. In contrast, Catholic teaching starts with culpable intent. Aiming to kill an innocent life never can be justified.

Despite these distinctions, Catholic Christian teaching and the *Shari'a* are broadly similar on perhaps the most important point of all: the dislike of abortion.

<sup>126</sup> *Catechism, supra*, ¶ 1463 at 368 (emphasis added).

As a pastoral matter, often a priest can give absolution to a penitent who confesses to procuring or performing an abortion without first needing to send the penitent away, obtaining approval of the local bishop to give absolution, and then having the penitent return to the confessional to receive absolution.

In Islamic legal terms, Catholic Christianity regards direct abortion as *ḥarām* (forbidden), not merely *makrūh* (reprehensible). Yet, in Catholic terms, calling abortion "*makrūh*" understates the gravity of the sin as viewed from the hearts and minds of many Muslims.

## § 41.01 OVERVIEW

### [A] SYNOPSIS of Islamic Inheritance Law

Among sacred legal systems, Islamic Law contains the most particular and technical scheme of inheritance rules. Indeed, one *Shari'a* scholar opines that Islamic Inheritance Law is the most detailed system of succession known to man.<sup>1</sup> The Qur'an, especially in *Surah Al Nisa* (*Surah* 4), lays down the main components of Inheritance Law. The key passage is in *ayat* 11-12:

<sup>11</sup>Concerning your children, God commands you that a son should have the equivalent share of two daughters.

If there are only daughters, two or more should share two-thirds of the inheritance, if one, she should have half.

Parents inherit sixth each if the deceased leaves children; if he leaves no children and his parents are his sole heirs, his mother has a third, unless he has brothers, in which case she has a sixth. [In all cases, the distribution comes] after payment of any bequests or debts.

You cannot know which of your parents or your children is more beneficial for you: this is a law from God, and He is all knowing, all wise.

<sup>12</sup>You inherit half of what your wives leave, if they have no children; if they have children, you inherit a quarter. [In all cases, the distribution comes] after payment of any bequests or debts. If you have no children, your wives' share is a quarter; if you have children, your wives get an eighth. [In all cases, the distribution comes] after payment of any bequests or debts.

If a man or a woman dies leaving no children or parents, but a single brother or sister, he or she should take one-sixth of the inheritance; if there are more siblings, they share one-third between them. [In all cases, the distribution comes] after payment of any bequests or debts, with no harm to anyone: this is a commandment from God: God is all knowing and benign to all.<sup>2</sup>

Further details are sourced in the *Sunnah* (tradition) and *ijma'* (consensus) of scholars.<sup>3</sup>

Presently, only the Iran, Saudi Arabia, and Sudan fully recognize the *Shari'a*, including its inheritance rules, as the official law of the land. To a lesser degree than these countries, Bahrain, Kuwait, Qatar, and Yemen acknowledge *Shari'a* principles.

The rest of the Muslim world follows a hybrid system of Islamic and European law.<sup>4</sup> Nevertheless, among many Muslims in Islamic and non-Islamic countries, there is greater interest in exploring the possibility of applying the *Shari'a* principles to their estates. Further, and not surprisingly in an age of globalization, many Muslims have assets in multiple jurisdictions, some of which are Islamic countries. Thus, lawyers specializing in trusts and estates in Tallahassee, Florida, or Topeka, Kansas are presented with questions about a "*Shari'a* will" or multi-jurisdictional asset dispositions.

In general, when making a will, a Muslim has the freedom to bequest up to one-third of her estate to an outsider and even to a legal (*i.e.*, Qur'anic) heir (under both *Sunni* and *Shiite* law).<sup>5</sup> The rest of the estate, the remaining two-thirds, is strictly meant for legal heirs, after payment of funeral expenses and debts.<sup>6</sup> Statutory law in Muslim countries, such as Egypt and Tunisia, may allocate an obligatory bequest for predictable situations, even if a bequest has not been made.<sup>7</sup> A Muslim is not restricted to distribute her estate among specific individuals as a gift, or *hibah*, to specific heirs, and cannot do so through a fictitious sale to them. (For example, under Egyptian law, a fictitious sale is a voidable contract if its only reason was to violate inheritance rules.) Muslims also may convert parts of the entirety of estates into charitable endowments, or *waqfs*, and instruct only specific individuals as managers of benefactors of these endowments.

In a radical contrast to pre-Islamic times, a Muslim woman can inherit, own, and manage, her own property. Because the proportion of allotment between men and women is generally two to one, Islamic Inheritance Law is censured for gender discrimination. One response to this charge is it is overly simplistic. Women are granted religious and spiritual equality in Islam.<sup>8</sup> The proposition Inheritance Law is innately unfair to women contradicts that general principle of equality. Rather than gender itself, the difference in distribution between men and women is the consequence of their respective roles in the Islamic society. For example, unequal distribution between a man and woman does not hold true in a case in which they belong to the same class (such as siblings or parents).

### [B] Four Key Features and Evaluation Using Scale of Five Qualifications (*Al Ahkam Al Khamsa*)

There are four key features of Islamic Inheritance Law:

<sup>4</sup> IRSHAD ABDUL-HAQQ, *Islamic Law: An Overview of its Origins and Elements*, 7 JOURNAL OF ISLAMIC LAW & CULTURE ISSUE 27, 68-69 (2002). [Hereinafter, Abdul-Haqq.]

<sup>5</sup> See MOHAMMAD HASHIM KAMALI, *SHARIAH LAW: AN INTRODUCTION* 274 (London, England: One World Publications, 2008). [Hereinafter, SHARIAH LAW.] Under *Sunni* Law, with the consent of all surviving heirs, a bequest to a legal heir is made if he or she is suffering from a disability. See *id.*

<sup>6</sup> See Qur'an, *supra*, 4:11-12 at 51.

<sup>7</sup> See SHARIAH LAW, *supra*. The example used by the author (of a predictable situation) is one of an orphaned grandchildren precluded from an uncle who also may be a son.

<sup>8</sup> Regarding the equality of men and women in creation, see, e.g., Qur'an, *supra*, 4:1, 7:189, 16:72, 42:11, and 49:13. Regarding spiritual equality, see, e.g., *id.*, 4:24, 6:97, 33:35, 74:38.

<sup>1</sup> See HAMID KHAN, *ISLAMIC LAW OF INHERITANCE: A COMPARATIVE STUDY WITH EMPHASIS ON CONTEMPORARY PROBLEMS* 1 (Lahore, Pakistan: Lahore Law Times Publications, (1989)). [Hereinafter, HAMID KHAN.]

<sup>2</sup> M.A.S. ABDEL HALEEM, *THE QUR'AN: A NEW TRANSLATION* 4:11-12 at 51 (Oxford, England: Oxford University Press (2004)). [Hereinafter, Qur'an.] Spacing between the rules has been inserted to facilitate comprehension of the passage.

<sup>3</sup> MOHAMMED ZAID ABDULAZIZ, *THE ISLAMIC LAW OF BEQUEST* 9 (London, England: Scorpion Publishing Ltd., (1986)). [Hereinafter, ABDULAZIZ.] Professor Abdulaziz is a prominent Saudi scholar and member of the *Hanbali* School, and his book is widely cited on Islamic Inheritance Law.

- (1) The *Sharī'a* provides fixed percentage shares for chosen beneficiaries (from two-thirds of the estate of a Muslim), which subsequently reach an array of other family members. A share is known in Arabic as a "*fard*." The *fards* are set out in *surah* 4, *ayat* 11-12 (quoted above). The chosen beneficiaries are the legal, or Qurānic, heirs.
- (2) A Muslim may only bequeath one-third of his estate.
- (3) Inheritance is a guaranteed right governed by the *Sharī'a*.
- (4) Inheritance rules are based upon the concept of Islam as a "*deen*," i.e., a system of life based upon complete surrender to God (*Allāh*).<sup>9</sup> Accordingly, an Islamic will, the *waṣiyya*, is divided into two parts. The first permits the fulfillment of binding obligations that satisfy the rights of God, such as *zakāt* and *Hajj*, and the rights of people.<sup>10</sup> These are called *wājib* (obligatory) rights. The second contains *mustahab* or praiseworthy acts, and concern discretionary bequests.<sup>11</sup>

Relevant to each of these four elements are the Scale of Five Religious and Legal Qualifications, or "*Al Ahkām Al Khamsa*."

Briefly, in respect of the Scales, in Islamic jurisprudence (*fiqh*), all actions fall into various categories of sanctions or *ahkām*. Thus, any potential act (or omission) is evaluated — from a religious and a legal perspective — according to whether it is:

- *ḥarām* (forbidden)
- *makrūh* (reprehensible)
- *mubāh* (neutral, or permissible)
- *mandub* or *mustahabb* (recommended), or
- *wājib* (obligatory).

*Ḥarām* acts are completely forbidden in Islam and Islamic Law.

It is *ḥarām* to bequeath to a legal heir (under *Sunni* Law) if the bequest is not approved by other heirs.<sup>12</sup> It also is *ḥarām* to bequeath more than one-third of the estate (regardless of whether the beneficiaries are legal heirs or in some other category), again unless the heirs approve crossing above that one-third threshold. And, it is *ḥarām* to bequeath something that promotes religious disobedience (such as a brothel or pub).<sup>13</sup> There are variations among Islamic countries. The

<sup>9</sup> Property rights stem from the belief that people are mere trustees for God, since everything in this world belongs to *Allāh*. For example, *surah* 5, *ayah* 120 states:

Control of the heavens and earth and everything in them belongs to God: He has power over all things.

Qur'ān, *supra*, 5:120 at 79.

<sup>10</sup> See ABDULAZIZ, *supra*, at 9.

<sup>11</sup> See ABDULAZIZ, *supra*, at 9.

<sup>12</sup> See ABDULAZIZ, *supra*, at 9.

<sup>13</sup> See ABDULAZIZ, *supra*, at 9.

forementioned rules hold in Saudi Arabia. But, in Egypt it is unnecessary to obtain the approval of other heirs to bequeath to a legal heir, unless the amount bequeathed exceeds one-third of the estate.

As for *makrūh* acts are those that are reprehensible, but not forbidden. It is *makrūh* for a poor Muslim to make bequests.<sup>14</sup> *Mubāh* acts are considered neutral, in other words, they are neither liked nor disliked. They are simply permissible. It is *mubāh* to bequest to a legal heir if the other heirs approve the bequest. Likewise, it is *mubāh* to bequest more than one-third of the estate, if the heirs approve. And, it is *mubāh* to make a bequest to someone who is already rich.<sup>15</sup> Finally, *mandub* (*mustahabb*) acts are those that are recommended and praiseworthy, but not obligatory (*wājib*). It is *mandub* to bequeath to a poor relative, a poor non-relative, or a pious person.<sup>16</sup>

## § 41.02 FORM OF WILL (WAṢIYYA)

### [A] Oral or Written

The Arabic term for a "will," which also is used for a "legacy," is "*waṣiyya*." (The plural is "*waṣāyā*.".) If the will is in writing, then it is called a "*waṣiyya nama*." Under the *Sharī'a*, a will does not have to be in any particular written or verbal form. However, for an oral bequest, it is necessary to have two men, or one man and two women, testify as witnesses to the validity of the bequest.<sup>17</sup> Further, the testimony of two men is necessary for the appointment of guardians for the minor heirs of the testator.<sup>18</sup>

In the event witnesses are needed, they should be respectable persons, i.e., of good moral character (*ʿadl*), who have not violated Islamic Law.<sup>19</sup> The testimony of heirs (even one) also is considered sufficient to certify a written or oral bequest, provided they are trustworthy and can support their testimony under oath.<sup>20</sup> Another method of confirming a bequest is by a declaration of the testator (*muai*) of her wishes in front of a judge, the contents of which are then recorded in a registry.<sup>21</sup>

<sup>14</sup> See ABDULAZIZ, *supra*, at 14.

<sup>15</sup> See ABDULAZIZ, *supra*, at 15.

<sup>16</sup> See ABDULAZIZ, *supra*, at 13.

<sup>17</sup> See ABDULAZIZ, *supra*, at 39.

<sup>18</sup> See ABDULAZIZ, *supra*, at 39.

<sup>19</sup> See ABDULAZIZ, *supra*, 39.

<sup>20</sup> See ABDULAZIZ, *supra*, at 41.

In some Muslim countries, retraction by an heir is not permitted. In one Saudi case, an heir who testified to a bequest subsequently retracted it by telling the court that he was mistaken, when the co-heirs rejected his testimony. The court, however, held him responsible for his acknowledgement and ordered that his share in the bequest be taken over by the trustee of the public *waqf* (trust). See *id.* However, in Egypt, retraction is permitted.

<sup>21</sup> See ABDULAZIZ, *supra*, at 47.

## [B] Holographic or Bequest-Under-Seal

There are two types of written wills (*wasfiyyat nama*): a holographic will, and a bequest-under-seal. A holographic will is one that is entirely prepared, dated, and signed, by the testator (*musi*) himself or herself. Although a holographic will requires no attestation, it is only permitted if the hand writing of the *musi* is distinct and recognizable.<sup>22</sup> A signature is not necessary to confirm a will, as long as it can be confirmed through handwriting analysis that the bequest was made by the decedent.<sup>23</sup> But, a signature of the *musi* is important to certify a will that has been typed or has been drawn by someone other than the testator. Holographic wills are common and are often created in emergency situations, such as when the testator is alone, trapped, or gravely ill.

A bequest-under-seal is a *wasfiyyat nama* that is prepared and written by a lawyer, lawyers, or witnesses. In effect, it is a will prepared by professionals, or at least witnesses to the desires of the testator. Jurists require that witnesses in both types of *wasfiyyat namas* should be aware of the contents of the document that the *musi* signs.<sup>24</sup> A formal attestation clause, such as, "We, the undersigned witnesses, affirm the correctness of this document. . ." is not necessary, but is regarded as desirable.<sup>25</sup>

## [C] Sample

A sample, standard form written Islamic will is presented below.

### Sample:

#### A Standard Form Islamic Will<sup>26</sup>

### LAST WILL AND TESTAMENT

OF \_\_\_\_\_ SS# \_\_\_\_\_

#### ARTICLE I: PREAMBLE

All praise is for Allah (swt) the creator of the heavens. I praise Him, I seek His help and His forgiveness. I believe in Him and put my trust entirely in Him. I seek refuge with Allah (swt) from the evils of myself and my deeds. Whom Allah (swt) guides no one can mislead, and whom Allah (swt) misleads no one can guide. I testify that there is no deity except Allah, He is One and has no partners, and I further testify that Muhammed (peace and blessings of Allah be upon him) is Allah's servant and Last Messenger.

I, \_\_\_\_\_, a Muslim, presently resident of \_\_\_\_\_, being of sound mind and memory declare the following is my will (waseeat). I do

<sup>22</sup> See ABDULAZIZ, *supra*, at 43.

<sup>23</sup> See ABDULAZIZ, *supra*, at 45.

<sup>24</sup> See ABDULAZIZ, *supra*, at 46.

<sup>25</sup> See ABDULAZIZ, *supra*, at 46.

<sup>26</sup> Posted at <http://muttaqun.com/pc/will.doc>. Other sample Islamic wills may be found online. Generally, they are freely available and downloadable.

hereby revoke any and all former wills and codicils that I have previously made. I ask all my relatives, friends, and others, whether they be Muslims or non-Muslims, to honor my right to be a Muslim. I ask them to honor the spirit and letter of this document and not to try to obstruct or change it in any way. Let them see to it that I am buried as a Muslim should be, and my properties are divided as I wanted them to be divided according to the Sunni (Orthodox) Muslim laws of inheritance. I ordain that under no circumstances should the contents of this will be changed voluntarily.

#### ARTICLE II: MY IMMEDIATE FAMILY

1. I am married to \_\_\_\_\_ and all references in this will to my husband/wife are to him/her.
2. I am the father/mother of the following children whose names and dates of birth are:
  1. \_\_\_\_\_
  2. \_\_\_\_\_
  3. \_\_\_\_\_
  4. \_\_\_\_\_
  5. \_\_\_\_\_
  6. \_\_\_\_\_

#### ARTICLE III: EXECUTOR AND BENEFICIARY

1. I hereby give all my estate: cash, bank accounts, real property, shares in any business, and any other property not mentioned in this will, to the person named below, who shall act also as an executor to serve without bond, to distribute it according to Sunni (Orthodox) Muslim Shariah.

My husband/wife \_\_\_\_\_, or, if he/she fails to survive me by 45 days,

\_\_\_\_\_, or, if he/she fails to survive me by 45 days,

\_\_\_\_\_, or, if he/she fails to survive me by 45 days,

\_\_\_\_\_, or, if he/she fails to survive me by 45 days,

\_\_\_\_\_ the Imam of the local Sunni (Orthodox) Muslim community.

2. I ordain that the executor of this will be a Muslim.
3. I direct that the executor take all actions legally permissible to have the probate of my estate done as simply and as expeditiously as possible.
4. I give my executor named above power to sell any property, real, personal or mixed, in which I have interest, without a court order and without bond.
5. I give my executor power to settle any claim for or against my estate.

#### ARTICLE IV: BURIAL ARRANGEMENTS

I ordain that:

1. My body be prepared for burial in keeping with the Sunni (Orthodox) Muslim Law (Shariah),

2. Under no circumstances my body be voluntarily turned over for an autopsy, or embalming or for organ donation.
3. My body be prepared for burial by Sunni (Orthodox) Muslims according to the dictate of Shariah (Sunni Islamic Law). Once the body is prepared for burial there is to be no viewing of my remains.
4. Absolutely no non-Islamic religious service or observance shall be conducted upon my death, or on my body or at the grave site. No pictures, crescents and stars, decorations, crosses, flags, flowers, plants, any symbols or music be involved at any stage of my burial.
5. My body may not be transported over any unreasonable distance from the locality of death unless necessitated by the circumstances or consensus of my Muslim family members.
6. My grave me dug in complete accordance with the Islamic practice. It should face in the direction of the Qiblah (towards the Ka'aba at Makkah, Saudi Arabia).
7. My body be buried without casket or any other encasement that separates the shroud from the surrounding soil.
8. My grave be covered with dirt only. The marking, if necessary, should be a simple rock. There should be no inscriptions or symbols.
9. My burial should take place as soon as possible, preferable before sunset on the day of my death or the following day. Under no circumstances should the burial be unduly delayed.
10. In the event that the local laws require casket encasement, I command that such encasement be of the simplest, most modest, and least expensive type possible, and I furthermore command that the encasement be left open during burial and filled with dirt unless prohibited by law.
11. No one is permitted to cry out, moan or wail. I demand that such a person leave the burial site. Only what comes from the eye is acceptable (tears). Muslims should say a dua'a for me and that there be a moment of silence when they pray that my grave is made spacious and comfortable. No recitation of the Qur'an is permitted over my grave.

#### ARTICLE V: CUSTODY OF MINOR CHILDREN AND GUARDIAN

If at my death any of my children are minors, I recommend that my husband/wife \_\_\_\_\_ be appointed guardian of the person(s) of my minor children, provided he/she is a Muslim. If he/she is unable or unwilling to serve as personal guardian, I recommend that \_\_\_\_\_ be appointed guardian of the person(s) of my minor children. If he/she is unable or unwilling to serve as personal guardian, I recommend that \_\_\_\_\_ be appointed guardian of the person(s) of my minor children. In all cases I urge that all my minor children be raised to be practicing Muslims and not in any way be indoctrinated into any other faith or religion. I direct that no bond be required of any personal guardian. Any property or other inheritance that this will gives to any of my minor children shall be administered by their personal guardian in the best interest of the children.

#### ARTICLE VI: DEBTS AND EXPENSES

I direct my executor:

1. To return to the rightful owners all trust and properties that are in my care

at the time of my death.

2. To first apply the assets of my estate to the payment of all my legal debts, including such expenses incurred by my last illness and burial as well as the expenses of the administration of my estate.
3. To pay any outstanding "obligation due to Allah (swt)" (*huquq Allah*) which are binding on me including unpaid zakat, *kaffaraat* of unperformed pilgrimage (Hajj), etc.

#### ARTICLE VII: BEQUESTS

I direct my executor to:

1. Pay the following amount from the remainder of my estate after paying all the expenses mentioned above, to the person/s or organization/s named below. The total must not exceed 33 percent (one third) of the remainder of my estate.
  1. \_\_\_\_\_ % of the total remainder
  2. \_\_\_\_\_ % of the total remainder
  3. \_\_\_\_\_ % of the total remainder
  4. \_\_\_\_\_ % of the total remainder
  5. \_\_\_\_\_ % of the total remainder

TOTAL BEQUESTS (must not be more than 33%) \_\_\_\_\_ % of the total remainder

#### ARTICLE VIII: DISTRIBUTION OF THE REMAINDER OF MY ESTATE

I direct my executor to:

1. Distribute the residue and remainder of my estate strictly in accordance with the tenets of Sunni (Orthodox) Muslim law of inheritance.
2. Ensure that no part of the remainder of my estate shall be inherited by any non-Muslim, no matter how he/she is related to me.
3. Ensure that should I die as a result of murder, no part of the remainder of my estate shall be inherited by my adjured murderer responsible for direct unlawful killing (actionable homicide), no matter how he/she is related to me.
4. Ensure that no part of the remainder of my estate shall be inherited by a person whose claimed relationship to me, ascending or descending, is the result of a non-Islamic or unlawful marriage, or through adoption, except if this relationship to me is through his/her mother who is biologically (through blood) related to me or if he/she is specifically mentioned in bequests above.
5. Regard a fetus, conceived before my death, whose relationship to me qualifies it to be an heir according to this article if it is born alive within the limit of time specified by Shariah. If such a fetus exists at the time of my death, the executor may delay the distribution of the residue and remainder of my estate after the execution of Articles I to VII, until after the birth of the fetus. If he/she chooses to distribute the estate prior to the birth of the fetus then he must withhold a portion of the estate equal to the share of the fetus for distribution until after the birth of the fetus.
6. That in case of any difficulty in distributing my estate according to this will, the matter should be referred to a Muslim knowledgeable in Islamic Inheritance Law for advice and guidance.
7. That the residue and remainder of my estate after the execution of Articles

I to VII and Article VIII sections 1 to 6 above be donated to the following person/s or organization/s for the establishment of Islamic communities and Masajid.

8. That any portion of my estate disclaimed or refused to be received by any of the legatees names or referred to in this document be donated to the following person/s or organization/s for the establishment of Islamic communities and Masajid.

#### ARTICLE IX: SEPARABILITY

I direct that no part of this will be invalidated by a court unless competent in Sunni (Orthodox) Muslim Law. If any part of this will is determined invalid by a court the other parts shall remain valid and enforceable.

I subscribe my name to this will this day \_\_\_\_\_ at \_\_\_\_\_ and do hereby declare that I sign and execute this instrument as my list will and that I sign it willingly, that I execute it as my free and voluntary act for the purposes therein expressed, and that I am of the age of majority or otherwise legally empowered to make a will, and under no constraint or undue influence.

Name \_\_\_\_\_ Signature \_\_\_\_\_ Date \_\_\_\_\_

#### WITNESSES

On this \_\_\_\_\_ day of \_\_\_\_\_,

\_\_\_\_\_ declared to us, the undersigned, that this instrument was his/her will and requested us to act as witnesses to it. He/She thereupon signed this will in our presence, all of us being present at the same time. We now, at his/her request, in his/her presence, and in the presence of each other, subscribe our names as witness and declare that we understand this to be his/her last will, and that to be the best of our knowledge the testator is of the age of majority, or is otherwise legally empowered to make a will, and under no constraint or undue influence.

We declare under penalty of perjury that the foregoing is true and correct.

#### § 41.03 FOUR ELEMENTS OF WILL (WAṢIYYA)

Regarding the elements of a will, some *Hanafi* School jurists return to their liberal roots and consider just the offer (of a bequest) enough to constitute a valid will.<sup>27</sup> The majority of *Hanafi* scholars require just two elements for a legal will:

<sup>27</sup> Attique Tahir, *The Requisites Of A Valid Will — A Comparative Study Of Shariah & Law*, Al. Awwa 35 (Lahore, Pakistan: Al-Adwa, Sheikh Zayed Islamic Centre, University of the Punjab, 2009), posted at [www.pu.edu.pk/szic/journal/currentissue\\_pdf/E-2%20Atiq%20Tahir.pdf](http://www.pu.edu.pk/szic/journal/currentissue_pdf/E-2%20Atiq%20Tahir.pdf). (Hereinafter, Tahir.) The author is a Lecturer, Faculty of Shariah & Law, International Islamic University, Islamabad,

offer and acceptance.<sup>28</sup> The *Māliki*, *Shāfi'i*, and *Hanbali* Schools demand the existence of all four elements for a legitimate will:<sup>29</sup>

- (1) *Sighah*, i.e., the offer and acceptance, or declaration.
- (2) *Musi* (Testator).
- (3) *Musa Lahu* (Legatee).
- (4) *Waṣi* (Executor).

Implicit is a fifth element: existence of bequeathed property, called "*musa bihi*."

#### [A] *Al Sighah* (The Offer and Acceptance, or Declaration)

The term "*sighah*" in Islamic jurisprudence (*fiqh*) refers to both an offer (*ijāb*) and acceptance (*kabūl*), i.e., two of the constituent elements of a contract taken together. In the context of Islamic Inheritance Law, the term refers to the offer of a gift, i.e., the making of a bequest, by a testator (*musi*) to a legatee (*musa lahu*), and an acceptance of that gift by the legatee. In effect, a "*sighah*" in this context is a declaration.

All jurists agree that a specific method of obtaining *sighah* is not required. Therefore, an offer and acceptance may be express or implied, i.e., by words or conduct.<sup>30</sup> However, a valid acceptance is one that is both unequivocal and unconditional.<sup>31</sup> The acceptance should not vary from the offer, i.e., the binding contract contemplated by the will occurs only when the acceptance matches the offer. Whether there is a distinction between material and non-material variations, so that mirror-image matching is not required, is unclear. Note, however, acceptance is not required if a bequest is made to an entire tribe, or to a charity (e.g., a *waqf*).<sup>32</sup>

The result of a valid acceptance is that ownership of the legatee over the property of the testator as bequeathed by her to the legatee is established. That is true regardless of whether the legatee takes possession of the property. Depending on the nature of the property, actual (physical) possession may not occur. Suppose uncertificated financial instruments, such as United States Treasury securities, are at issue. They would be held in an electronic account over which the legatee has constructive possession.

When must acceptance occur? An acceptance by a *musa lahu* is valid only after the death of the *musi*.<sup>33</sup> Acceptance or rejection by a legatee has no effect if it is made during the lifetime of the testator. What happens, then, in the usual case in which a testator dies before the legatee accepts or rejects the bequest? The gift is

Pakistan. The journal *Al Adwa* is unnumbered and undated.

<sup>28</sup> Tahir, *supra*. Hence, the rights of a legatee are not legitimate without acceptance. *Id.*

<sup>29</sup> Tahir, *supra*.

<sup>30</sup> Tahir, *supra*, at 36.

<sup>31</sup> Tahir, *supra*, at 37.

<sup>32</sup> See ABDULAZIZ, *supra*, at 84.

<sup>33</sup> Tahir, *supra*, at 36-37.

not transferred immediately or automatically to the legatee. Rather, the gift is considered property of the legal heirs of the decedent.<sup>34</sup> However, the *musa lahu* has discretion to accept or reject the bequest right after the death of the testator. The *musa lahu* also has discretion to delay acceptance or rejection, and the delay could be protracted, as there is no prescribed maximum period.<sup>35</sup> The *Shāfi'i* School maintains the legal heirs have a right to demand a decision from the legatee,<sup>36</sup> and the *Hanbali* School agrees with this position. Both Schools agree anything less than a clear acceptance of the bequest is considered a rejection.<sup>37</sup> In effect, once a testator dies, the onus is on the legatee to accept or reject the gift, and the sooner the better, as the legal heirs can press the legatee for a decision.

Is an acceptance, whether expressed as an express or implied decision of a legatee, irrevocable?<sup>38</sup> Consider the odd case in which a legatee subsequently rejects a bequest after having accepted it initially. The *Hanafi* School considers the rejection valid. The *Shāfi'i* and *Hanbali* Schools regard rejection after acceptance to be ineffective. They give pre-eminent importance to the proof of ownership established by the initial acceptance, which is reinforced if the legatee takes possession of the property.

Suppose a legatee rejects a bequest. What happens to the gifted property (*musa bihi*)? The share the legatee has rejected reverts back to the legal heirs.<sup>39</sup> What happens if a legatee dies before accepting or rejecting the will? Then, the right to the bequest is passed on to the legal heirs of the legatee.<sup>40</sup> In effect, the untimely death of the *musa lahu* is treated as a rejection of the *musa bihi*.

What happens if the legatee dies after the death of testator, but before an acceptance or rejection by the legatee? According to the *Hanafi* School, such a bequest is enforceable. The death of the legatee is deemed to be an implied acceptance by the legatee.<sup>41</sup> However, the rest of the Schools do not hold this view. They state that the bequest should be distributed among the legal heirs of the legatee.<sup>42</sup>

Must a bequest be accepted in its entirety? The answer is "no." It is possible that a legatee might accept certain property (such as a house), but reject other property (such as a parcel of land). In such a case, the will is enforced as to the accepted property, but declared void as to the rejected property.<sup>43</sup> Similarly, if a testator wills property to a group of people, and some accept it while others reject it, then the will is enforced in favor of the persons who accepted, and considered

void as to the persons who rejected. In other words, rejection by some persons does not taint the entire group. There is an exception, namely, when the will stipulates that the property is indivisible.

### [B] *Al Musī* (The Testator)

A testator is one who can make a bequest with resolution and certainty. Consequently, to make a valid will, a *musī* must be competent. That is, he or she must have the capacity to make the will. Psychological or physical ailments, namely, insanity or weakness, respectively, indicate incapacity. The *Hanafi* School takes a conservative approach to the loss of capacity. Insanity or weakness lasting six months prior to the death of a *musī* constitutes incapacity, and is sufficient reason for the nullification of an otherwise valid bequest.<sup>44</sup> This conservative position is rejected by the rest of the *Sunni* Schools, and also by the *Shī'ites*.<sup>45</sup> Their criteria for incapacity are less restrictive than that of the *Hanafi* School. The *Hanafi* School also considers the possibility that a competent testator might revoke her bequest at the last minute, before death.<sup>46</sup> Therefore, this School reasons that the possibility of the now incompetent testator creates an uncertainty, which is best resolved by nullifying the will.

To elaborate on how "competence" is defined in Islamic Inheritance Law, it is necessary for a person — in order to qualify as a testator — to be free, in the sense of being unaffected by duress, menace, fraud, mistake, or other undue influence. It also is necessary for the person to be in a mental state that allows her to appreciate the consequences of her actions. The Arabic term for this state is "*ʿāqil*," which literally means "knowledgeable," connoting full mental competence, or simply put, sanity.<sup>47</sup>

There is disagreement between jurists as to when a person should be considered '*ʿāqil*. The *Hanbali* School agrees a child of 7 years generally is capable of making a bequest.<sup>48</sup> This position is based on analogical reasoning (*qiyās*): children should start observing prayer by age 7.<sup>49</sup> Additionally, psychologists such as C.I. Sandstrom have conducted studies demonstrating that by age 7, children have the capacity to make logical decisions.<sup>50</sup> The *Hanafi* School states children are '*ʿāqil* by the start of adolescence.<sup>51</sup> Scientific studies indicate an adolescent, starting from age 14, is as capable of rational decision-making as an adult.<sup>52</sup> The *Māliki* jurists

<sup>52</sup> See T.P. Bartholomew, *Challenging Assumptions About Young People's Competence: Clearing the*

do not regard a will made by a minor as valid.<sup>53</sup> However, they grant an exception: where a minor is capable of making logical decisions, and decides to make a bequest for a pious purpose (e.g., building a mosque). The *Shāfi'i* School, and *Shī'ites*, adhere to the same view as the *Mālikī* School.<sup>54</sup>

### [C] *Al Musa Lahu* (The Legatee)

A bequest is considered valid at the time of the death of the testator (*musi*). Thus, determination of the status of legatees and legal heirs must be postponed until after this death.<sup>55</sup> As suggested earlier, a legatee who can answer to her description in the will must show acceptance of the bequest by actions or words.<sup>56</sup>

All jurists accept the proposition, which hardly is controversial, that there can be no bequest to a non-existent legatee.<sup>57</sup> Notably, a will in favor of a child in the womb of the mother is valid.<sup>58</sup> The key in all instances is that the identity of a legatee must be clearly stated. If upon the death of a testator, the description of the legatee creates confusion, then the bequest is considered invalid.<sup>59</sup>

A bequest also may be made to an institution, such as a mosque or university.<sup>60</sup> No special formulation is required, according to the majority of jurists. However, the *Hanafi* School considers a bequest to an institution void if it does not contain a phrase such as "to be spent thereupon," which indicates the purpose and method of disposal of the gifted property.<sup>61</sup> Interestingly, the social and religious status of a legatee is important when a bequest is made for a benevolent purpose. Consequently, a bequest is invalid if made to a person who will use it against the well being of society.<sup>62</sup>

Significantly, being a Muslim is not a condition to become a legatee. That is because the Prophet, permitted transactions with and donation of gifts to unbelievers.<sup>63</sup> This flexibility allows a Muslim husband to bequest shares of his property to his non-Muslim wife or wives. Non-Muslim spouses, because of their religious status, are not entitled to any share of the estate of their husbands under succession rules.<sup>64</sup>

### [D] *Al Waṣī* (The Executor)

The usual practice in Islamic Inheritance Law is that through a testament (*i.e.*, a will) a testator makes a legacy, and appoints an executor, and possibly also a guardian. An executor, or *waṣī*, is responsible for carrying out the wishes of the testator (*musi*) as the manager of the estate of the decedent, and as an agent of heirs who are minor or absent.<sup>65</sup> The term "*waṣī*" also can mean "guardian." Accordingly, a *waṣī* is a legal guardian appointed by testament (*i.e.*, in a will) as executor of an estate.

Note that a *waṣī* is a specific type of agency relationship, as the person appointed to this position is serving as agent (*wakil*) on behalf of multiple principles: the testator, upon the death of the testator, and any minor or absent heirs. This fact illustrates a more general point about the *Shari'a*, namely, the widespread use of agents. In principle, there appears to be no barrier to a woman serving as a *waṣī*, though in practice the role seems to be filled by men.

The *waṣī* formally accepts the appointment as such, either before or after the death of the testator. Under *Hanafi fiqh*, a *waṣī* cannot reject the responsibility following the death of the *musi*. However, according to *Hanbali fiqh*, a *waṣī* may accept or reject the charge, even after the death of the *musi*.<sup>66</sup> If rejection occurs, it is not allowed to, and does not, disrupt, prevent, or otherwise affect the relevant duties to be carried out by a *waṣī*. Thus, to assure continuity in the event of rejection, the power to appoint an executor or guardian rests with a *Shari'a* court.<sup>67</sup> It is unusual for a *waṣī* to be remunerated services the *waṣī* provides, although a testator may set apart a sum of money for the *waṣī*.<sup>68</sup>

The essential job of any *waṣī* is to divide up the inheritance. Exactly what are the duties of a *waṣī*? First, the *waṣī* must collect the assets of the testator. Depending on the extent of the estate, it may be as simple as gathering a few items in a poor dwelling to as complicated as marshalling real and personal property in multiple jurisdictions. Second, the *waṣī* must discharge the debts of the decedent. Similarly, he or she also must cover any funeral expenses. Third, the *waṣī* must pay the legacies to the legatees in accordance with the will. Fourth, the *waṣī* must distribute the estate among the legal heirs.<sup>69</sup> In doing so, the *waṣī* applies the Qur'anic shares (*fard*s).

In dividing up an inheritance, a *waṣī* not only is an executor for the estate of a decedent. The *waṣī* also serves as an agent (*wakil*) for any heirs who are minor or absent. As an agent of minor or absent heirs, a *waṣī* must administer their inherited shares on their behalf. As an agent for minors, a *waṣī* has the powers of a guardian who is not the father or grandfather. As an agent for an heir who has

<sup>65</sup> See JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW 120, 173 (Oxford, England: Oxford University Press (Clarendon Paperbooks) 1982). [Hereinafter, Schacht.]

<sup>66</sup> See ABDULAZIZ, *supra*, at 116.

<sup>67</sup> See ABDULAZIZ, *supra*, at 116.

<sup>68</sup> See ABDULAZIZ, *supra*, at 145.

<sup>69</sup> See ASAF A.A. FYEE, OUTLINES OF MUHAMMADAN LAW 380 (Mumbai, India: Oxford University Press, 4th ed., 1999). [Hereinafter, FYEE.]

come of age, a *waṣī* is not quite as powerful. The *waṣī* cannot sell real property on behalf of an heir who has come of age.

Given the dual responsibilities of being both a guardian and agent, it necessarily is the case that not anyone can become a *waṣī*. Competence, or *ʿadala*, is a required qualification.<sup>70</sup> The standard is not "world class." It is sufficient for a *waṣī* to have a modest but proven standard of competence.<sup>71</sup> Nevertheless, the weighty responsibilities suggest that, ideally, the executor had better be quite skilled, not to mention honest.

A *waṣī* has "legal cover." The remove the *waṣī* is supervised by an Islamic judge (*qāḍī*). Indeed, in all instances, a *waṣī* operates under supervision of a *qāḍī*. Obviously, voluntary removal of a *waṣī*, i.e., termination of the duties of the *waṣī*, occurs when the *waṣī* fulfills the obligations of the *waṣī*.<sup>72</sup> The *qāḍī* can appoint himself (or herself) as *waṣī*, or remove an unscrupulous or incompetent *waṣī*. More specifically, the *qāḍī* may remove the *waṣī* if the *waṣī* is:<sup>73</sup>

- (1) Incompetent, that is, a poor manager or negligent about the duties assigned by the testator.
- (2) Defiant of the *Shari'a*.
- (3) Dishonest.
- (4) Medically incapacitated.

Note that dismissal from the role of a *waṣī* is the lowest level of punishment for poor management or negligence, or defiance of the *Shari'a*.<sup>74</sup> Additional sanctions are available in these instances and, presumably, in cases of corruption as well.

What liability does a *waṣī* bear in performing his tasks? The answer is it is restricted. For actions of the *waṣī* that are not malicious, but which detrimentally affect the heirs, most losses are borne by the estate.<sup>75</sup> Conversely, the *waṣī* is liable for willfully bad acts committed by him.

Suppose a testator fails to appoint a *waṣī*, and thereafter the courts also fail to make the appointment. Then, the legal heirs themselves become the legal representatives and administrators of the estate.<sup>76</sup> The estate devolves upon the heirs in specific shares at the time of the death of the testator, subject to the payment of debts, in proportion to the portion prescribed in the Qur'an for each heir, and to the payment of legacies.<sup>77</sup>

<sup>70</sup> ABDULAZIZ, *supra*, at 115.

<sup>71</sup> ABDULAZIZ, *supra*, at 115.

<sup>72</sup> See ABDULAZIZ, *supra*, at 128.

<sup>73</sup> See SCHACHT, *supra*, at 173; ABDULAZIZ, *supra*, at 129.

<sup>74</sup> See ABDULAZIZ, *supra*, at 139.

<sup>75</sup> See SCHACHT, *supra*, at 173.

<sup>76</sup> See SCHACHT, *supra*, at 120, 173; ABDULAZIZ, *supra*, at 114-131.

<sup>77</sup> See SCHACHT, *supra*, at 120, 173; ABDULAZIZ, *supra*, at 114-131.

A testator is not limited to one executor. A testator could appoint more than one *waṣī* (the Arabic plural is "*awṣiā*"), in which case they would act jointly and severally. Indeed, there is no restriction on the number of *awṣiā* a testator can assign. Similarly, *Shari'a* courts may appoint a temporary or replacement *waṣī*. They are likely to do so in a case in which a minor is left with no one to take care of her.<sup>78</sup>

## § 41.04 PAYMENT OF COSTS AND DEBTS

Under Islamic Inheritance Law, a prospective heir has an incentive to want as many prospective asset dispositions from the estate of a decedent as possible to be considered legacies, as distinct from debts to creditors of the decedent. Why? Because all debts must be paid off — there is no cap — before heirs take their prescribed shares. (Of course, a legacy is subject to the one-third cap.) Put bluntly, payment of debts from the gross estate reduces the size of the net estate available for distribution to heirs.

Islamic Inheritance Law is concerned directly with granting individual rights, namely, claims to portions of the estate of a decedent. Before any payment out of an estate is made to an heir, two items must be paid. First, the costs of the funeral of the decedent are due immediately at death. The size of these costs varies across families, places, and socio-economic contexts. While Islam forbids cremation of a decedent, and requires burial with the face of the decedent facing Mecca, it does not require surviving relatives to spend a fortune on a funeral, nor does it dictate an elaborate funeral.<sup>79</sup>

Second, any debts of the decedent must be paid. These, too, are due at death. What if the debts consume the entire estate, or worse yet, are larger than the estate? Then, the assets of the decedent are distributed to creditors *pari passu* (in proportion to the claims of the creditors). To what extent do the rights and obligations of a person continue past her death — for example, those associated with a contract? In general, they do not survive the death of the person. Most contracts are terminated by the death of a contracting party. Likewise, death of a partner can be a termination event in a partnership agreement. The surviving relatives of a decedent are not saddled with obligations of the decedent from her participation in a contract or business association.

Is there ever a case in which the debts of a decedent are not fully paid? The answer is "yes." In practice, surviving relatives may be impecunious and, therefore, simply cannot afford to pay off her debts. There is no requirement they bankrupt themselves, or do the impossible, to pay them off. Moreover, it is technically misleading to assert that the debts of the decedent "must" be paid by the heirs. It is not obligatory (*wājib*) for them to do so, in the sense of the Scale of Five Religious and Legal Qualifications. Rather, it is recommended (*mandub* or *mustahabb*) that the heirs cover those debts. In practice, the heirs may feel they are "required" to

<sup>78</sup> See ABDULAZIZ, *supra*, at 119, 126.

<sup>79</sup> A rather grim inference from the fact Muslims are buried facing Mecca is that in investigations about crimes, including war crimes and genocide, it is possible to identify the religion of victims (unless their bodies are callously tossed into mass graves).

do so not because of Islamic Law but rather to preserve their good name, and that of their family, in the community, and do pay due respect to the memory of the decedent.

#### § 41.05 LEGACIES AND ONE-THIRD LIMIT

After (1) costs of the funeral of a decedent, and (2) debts of the decedent are covered, the next item to be paid out of the gross estate of the decedent is a legacy. Under American rules on inheritance, there is no limit on the freedom of a testator to direct the disposition by will of his estate. A testator may direct all, some, or none of her estate to any one, or more, of the beneficiaries she chooses. That is not true under the *Shari'a*. The one-third restriction on the disposal by a testator (*musi*) of her property, plus the related matter of fixed inheritance shares, are poignant differences between the two legal regimes. To be sure, Islamic Inheritance Law does not presume to undermine the general support for freedom of ownership in Islamic Property Law. Rather, while taking that freedom as a starting point, it seeks to protect the interests of legal heirs in a family from possible disadvantage, even impoverishment.

The Arabic term for an "estate" is "*tarikah*." A *tarikah* consists of all the assets of a decedent. The assets are not just monetary, nor just capable of being reduced to money. For example, legal claims are considered assets. A claim to retaliate for a previous wrong, like a claim to blood money, also is part of an estate, and thus can be inherited.

The one-third limit, as the phrase suggests, is a straightforward rule. It applies to a "legacy," which is a disposition of assets through a will. The testator (the person who makes the will) decides how she wants her assets to be distributed upon her death. Subject to the one-third cap rule, a testator is free to direct this distribution through her will. A "legacy" is a particular type of "bequest." In turn, a "bequest" refers to the giving of property by a will, or to the property that is disposed of in a will.<sup>80</sup> The property typically is personal property. In sum, a "legacy" is a "bequest" via a will, and the "bequest" is the act of gifting the property through the will. In common parlance, however, the terms occasionally are used interchangeably.

Succinctly put, the *Shari'a* rule is a legacy cannot exceed one-third the total size of an estate. A testator (*musi*) can direct the disposition upon her death of no more than one-third of her estate (*tarikah*) during her lifetime by way of bequest. As just explained, a "bequest" is a gift, typically made through a will. Thus, of the total assets in an estate, the *musi* is free to direct their disposition, after her death, of up to one-third of them, to a beneficiary, or beneficiaries, he or she chooses.

Note that a distribution by legacy becomes void if the legatee (beneficiary) dies before the legator (testator). That is because the legatee must accept the legacy after the death of the legator. What if the legatee does not pre-decease the legator, but he or she passes away before accepting the legacy? Then, the right in the legacy

<sup>80</sup> See BLACK'S LAW DICTIONARY 179 (St. Paul, Minnesota: West, 9th ed., 2006), Bryan A. Garner, ed.) (entry for "bequest").

transfers automatically, without acceptance, to the heirs of the legatee.

Significantly, not anyone can be a beneficiary of a legacy. There are two notable exclusions from that status. First, a person who causes the death of the testator cannot profit from wrongdoing by being a beneficiary. Second, the class of potential beneficiaries excludes legal heirs. "Legal heirs" refers to close family relatives, both ascendants and descendants. That is, a "legal heir" is one who has a fixed share (*fard*) as designated by the Qur'an, otherwise known as "Qur'anic Heirs." Non-legal heirs essentially are outsiders, i.e., outside of a restricted family circle, such as Agnatic and Uterine Heirs. However, there is an exception: a Qur'anic Heir can be a beneficiary of a legacy if the other heirs consent. The logic here appears to be that the Qur'an already takes care of certain heirs, and unless they agree otherwise, and a testator should not alter their relative shares. Put differently, a testator should not be permitted to contract out of the *surah* 4, *ayat* 11-12 of the Qur'an, unless her affected relatives agree.

The prohibition on designating a legal heir for a bequest of up to one-third of an estate comes from the *Sunnah* of the Prophet. In particular, there is a *hadith* that states:

[T]here shall be no bequest to a legal heir.<sup>81</sup>

Arguably, this *hadith* is incongruous with *surah* 2, *ayat* 179-180 of the Qur'an:

...<sup>179</sup>When death approaches one of you and he leaves wealth,<sup>180</sup>it is prescribed that he should make a proper bequest to parents and close relatives — a duty incumbent on those who are mindful of God.<sup>82</sup>

This Qur'anic passage is an exhortation to a testator (*musi*), near death, to take care of her parents and close relatives. A scholar from the 11th century A.D., Ibn Hazm, goes so far as to read this passage as a mandate.<sup>83</sup> This reading (in effect, a literal interpretation of the word "bequest") is implemented in the 1946 inheritance law of Egypt.<sup>84</sup>

However, the widely accepted understanding of this Qur'anic passage is to the contrary. The duty of a testator (*musi*) is fulfilled by two events. First, she does not squander her estate while living, so there are meaningful assets left for parents and close relatives. Second, two-thirds of her estate is transferred to them upon her death.

<sup>81</sup> MOHAMMAD HASHIM KAMALI, THE RIGHT TO LIFE, SECURITY, PRIVACY AND OWNERSHIP IN ISLAM 293 (Cambridge, England: Islamic Texts Society, 2008). [Hereinafter, RIGHT TO LIFE.] While this *hadith* is widely accepted as authentic, unfortunately Professor Kamali does not provide a citation to any particular compiler.

<sup>82</sup> QUR'AN, *supra*, 2:179-180, at 20.

<sup>83</sup> The full name of Ibn Hazm is Abū Muhammad 'Alī ibn Ahmad ibn Sa'īd ibn Hazm. A jurist, historian, philosopher, and theologian, he was born in 994 A.D. in Córdoba, in Andalusia, in present-day Spain, and died in 1064 (456 A.H.). A leader of the Zāhiri School, he authored roughly 400 works, of which 400 survive. See Ibn Hazm, WIKIPEDIA, posted at [http://en.wikipedia.org/wiki/Ibn\\_Hazm](http://en.wikipedia.org/wiki/Ibn_Hazm).

<sup>84</sup> See RIGHT TO LIFE, *supra*, at 293 (referring to Law Number 71 of 1946). Professor Kamali lists in his bibliography the following work of Ibn Hazm: Muhammad bin 'Alī bin Ahmad bin Sa'īd al-Zāhiri, *Al-Muhallā* (Cairo, Egypt: Matba'ah al-Nahda, 1347 A.H., Ahmad M. Shākir, ed.).

Consequently, the above-quoted *hadith* is understood to mean that, as a corollary to the one-third limitation, a *musi* is not permitted to bequest one-third of her property to a legal heir, unless all heirs agree to that disposition. Note the exception — that the heirs could reach an accord that one of them should receive a special bequest — fits within the general respect of the *Sharī'a* for freedom of contract, ownership, and alienation of property. In brief, the only case in which a *musi* lawfully may direct the disposition of more than one-third of her estate to persons who are not her heirs is when the heirs (both the potential special beneficiary and all others) agree.

Significantly, in *Shī'ite* Islam, the corollary is different than this formulation. A testator can bequest up to one-third of her estate to a legal heir, regardless of the agreement of the other heirs, under either of the conditions. First, if there is "good cause," then a legal heir may be a beneficiary. That phrase, to an American trained lawyer, opens a potentially large loophole. Second, a legal heir may receive a bequest "to overcome a possible rigidity that may result from strict application of the rules of inheritance."

What happens to the remaining two-thirds of the estate? The answer is those assets must go to legal heirs of the decedent. Moreover, the amount each heir receives is strictly fixed according to shares (*farḍ*), which are set out in the Qur'ān (in *surah* 4, *ayah* 11-12). Who are the legal heirs? They are the family, specifically, close relatives, of the testator. Once the testator (*musi*) dies, of course, she is known as the "decedent." Thus, the legal heirs are the surviving close family members of the decedent. They include sons and daughters, the husband, the wife or wives, sisters, parents, and grandparents. They also include some descendants of these relatives. Each person is entitled to inherit a share of the estate of the decedent, the share being fixed in accordance with her status.

That entitlement is realized independently, and regardless of the wishes of, the decedent. It does not matter whether the decedent loved or despised a particular heir. Indeed, the decedent (when alive as testator) is expected not to interfere with the inheritance rights of the heirs, and cannot alter their shares, as the Qur'ān sets them out.

What is the purpose of the one-third limit on legacies? Professor Schacht argues that Inheritance Law is the area of the *Sharī'a* "farthest removed from the action of moral principles."<sup>85</sup>

He uses as his illustration the limitation on legacies to one-third the size of the estate of a decedent. What motivates the rule is a fiscal purpose — garnering revenues if there is no kin to claim the other two-thirds of the assets. This purpose became evident during the *Umayyad* Caliphate (661-750 A.D.), when the *Sharī'a* began to take shape into a more complete and mature legal system, in terms of both jurisprudence and administration.

The argument is that the *Umayyad* Caliphs, hungry for revenue to fund their rapidly expanding empire, did not want decedents to direct the entirety of their estate (*tarika*) to named beneficiaries. Therefore, they were eager to institutionalize

the practice of the one-third limit. By restricting a *musi* to a one-third bequest, the Caliphs could be assured the other two-thirds would be distributed to the legal heirs of the decedent as per the Qur'ānic shares. This distribution would lessen the risk that the heirs would become destitute, and turn to the *Umayyad* government for some kind of public assistance. Put in accounting terms, the heirs would not be a contingent liability on the state. And, what if the decedent did not have any legal heirs? Then, the remainder two-thirds of her estate would go to the public treasury (*bayt al-māl*), conveniently located in the courtyard of the *Umayyad* Mosque in Damascus. (It still can be viewed.) If there is no bequest, then the full estate goes to the treasury ultimately controlled by the *Umayyad* Caliphs.

This argument is perhaps a bit cynical. To be sure, the fact two-thirds of every estate (*tarika*) must be distributed to legal heirs helps prevent those heirs from falling into poverty and dependence on social services provided at government expense. Moreover, government coffers are helped by the one-third limit. Similarly, the public treasury gains from a decedent with no family, or whose family members are unknown. Yet, Islamic Inheritance Law is not motivated simply to safeguard or enrich the official treasury (*bayt al-māl*), nor is it limited to the details of how to disseminate assets of a decedent.

The Qur'ān puts Inheritance Law on a religious footing with two specific goals:

- (1) Protection of the family.
- (2) Diffusion of wealth.

As to the first aim, the share distribution scheme for two-thirds of the estate (*tarika*) envisions a broad number of persons (albeit all in one family) related to the decedent. *Surah* 16, *ayah* 90 of the Qur'ān says:

God commands justice, doing good, and generosity towards relatives and He forbids what is shameful, blameworthy, and oppressive.<sup>86</sup>

Indeed, the Qur'ān allots shares in the estate of a decedent to many family members, some of whom are people whose status entitled them to nothing under pre-Islamic customary law.<sup>87</sup> These legal heirs are guaranteed a share of at least two-thirds of the estate, and cannot be disinherited on the whim of the testator. Their inheritance share is a safety net, however partial, against economic hardship. That is not to say legal heirs all become "trust babies" with no need to generate their own income. The value of their inheritance, and how much of a cushion it is against difficulty, depends from family to family, and on general economic conditions. But, at least the share is something.

Second, the one-third limitation on legacies is a check against excessive concentration of wealth. The Qur'ān, in *surah* 59, *ayah* 7, explains:

Whatever gains God has turned over to His Messenger [the Prophet Muhammad] from the inhabitants of the villages belong to God, the Messenger, kinsfolk, orphans, the needy, the traveler in need — *this is so*

<sup>86</sup> Qur'ān, *supra*, 16:90 at 172.

<sup>87</sup> See Schacht, *supra*, at 14.

<sup>85</sup> Schacht, *supra*, at 14.

*that they do not just circulate among those of you who are rich — so accept whatever the Messenger gives you, and abstain from whatever he forbids you.*<sup>88</sup>

Certainly, this passage is an accreditation of Muhammad, and is not set in the particular context of inheritance (unlike *surah* 4, *ayat* 11-12). Moreover, the one-third restriction hardly is a perfect check against sclerotic circulation, as the monstrous income inequities in many Muslim countries make all too obvious. Still, the passage articulates a concern animating throughout the Qur'an about fairness, and the legal fact is that a rich testator in even the most powerful of families cannot keep the final one-third of her assets in the family. The well-off *musi* may pass them on to other well-to-do interests, which only reinforces an asymmetric *status quo*. But, that choice runs counter to the concern articulated in *surah* 59, *ayah* 7. If she selects the poor or needy for one-third of her estate, possibly by designating an appropriate charitable foundation (*waqf*), then she will have advanced the cause of social justice, which the Qur'an champions.

A follow-up question is whether Islamic Inheritance Law is inefficient in its effects. In particular, does the two-thirds share distribution scheme result in "excessive dismemberment of property," as Professor Kamali puts it?<sup>89</sup> Does the scheme break up plots of arable land and robust family enterprises, when from an efficiency standpoint these ventures could continue to realize economies of scale (namely, declining long-run average costs) if they held together? The answer is "yes and no." It is "yes," in that sub-division of efficient agricultural, manufacturing, and services units occurs, depending on the family in question. But, it is "no" in that it is not the scheme *per se* to blame. It is the family members themselves who prevent continuation of the business successes of the decedent. Islamic Inheritance Law does not bar them from operating their shares as joint owners, and working together as partners. Their human frailties — ennu, incompetence, ego, greed, or some combination thereof — yield inefficient outcomes.

As a final consideration: what would happen if a testator (*musi*) were to flout the one-third restriction and establish a legacy that exceeded one-third of the estate? Simply, the legacy would be reduced to one-third. How would this reduction occur? The obvious means would be to cut the amounts directed to each beneficiary *pro passu*, i.e., in proportion to the size of the amount vis-à-vis the total legacy. (For example, a beneficiary getting 50 percent of the legacy would have his share cut in half, and a beneficiary getting 25 percent of the legacy would have his share cut in one-quarter.) However, that is not the means chosen. Unless the heirs approve of a different methodology, a complicated system is used that is based on the priorities of the beneficiaries.<sup>90</sup>

<sup>88</sup> Qur'an, *supra*, 59:7 at 366 (emphasis added).

## § 41.06 CHARITABLE TRUSTS (WAQFS)

### [A] Origins and Definition of "Waqf"

Frankly put, it is an ignorance or arrogance of American legal scholarship to claim that certain institutions are unique to the non-Muslim western world. One illustration is the declaration by Professor Frederic W. Maitland (1850-1906), a leading British jurist and legal historian. He famously declared:

[The institution of the trust] perhaps forms the most distinctive achievement of English lawyers. It seems to us essential to civilization and yet there is nothing quite like it in foreign law.<sup>91</sup>

This declaration actually is erroneous. Islamic Law invented a nearly identical institution roughly 500 years before the trust appeared in English Law. That invention is the "*waqf*." It may well be that the first treatise ever devoted to the topic, and possibly to any single legal subject, is that of Al-Khaṣṣāf. In the 9th century A.D., he wrote *Ahkām al-Waqf*, which in modern American parlance is about the law of trusts. At a minimum, this treatise shows that the *waqf* long pre-dates the English trust, and more generally that the *Shari'a* was well advanced when English law hardly was not yet in its infancy.<sup>92</sup> Nowadays, the two instruments — the Islamic *waqf* and the English (and by extension, American) trust — are in many respects identical. Both serve as an efficient mechanism to convey property to charitable institutions and surviving family members.

It is a fact recognized in the Qur'an that not all persons are competent to manage assets in prudent manner. To such weak-minded individuals, called "*safahā*," who are prone to profligacy or otherwise cannot be entrusted with property, a property owner ought not to give money. Rather, *surah* 4, *ayah* 5 states:

Do not entrust *your* property to the feeble-minded [*al-safahā*]. God has made it a means of support for *you*: make provision for them from it, clothe them, and address them kindly.<sup>93</sup>

It is important to abjure a pejorative connotation to the adjective "feeble-minded," and rather think in terms of the helpless, or the weak of understanding.

That is, the *Shari'a* envisions smart wealth management on behalf of people who cannot help themselves, either now or ever. *Surah* 4, *ayah* 6 explains:

Test orphans until they reach marriageable age; then, if you find they have sound judgment, hand over their property to them. Do not consume it wastefully before they come of age: if the guardian is well off he should abstain from the orphan's property, and if he is poor he should use only

<sup>91</sup> F.W. Maitland, *Uses and Trusts*, in *EQUITY: A COURSE OF LECTURES* (rev'd. by J. Brunyate) (Cambridge, England: Cambridge University Press, 1996).

<sup>92</sup> See AL-KHAṢṢĀF, *AHKĀM AL-WAQF* (Bloomington, Indiana: Xlibris, 2008) (Gilbert Paul Verbit, trans.).

<sup>93</sup> Emphasis added.

what is fair. When you give them their property, call witnesses in; God takes full account of everything you do.<sup>94</sup>

Manifestly, persons in need of help "now" include orphans, and *surah* 4, *ayah* 10 emphatically defends their interests:

Those who consume the property of orphans unjustly are actually swallowing fire into their own bellies: they will burn in the blazing Flame.<sup>95</sup>

Similarly, widows need help "now," and depending on the circumstance, possibly for the remainder of their lives. Similarly, the New Testament of the Bible exhorts the faithful to defend widows and orphans, stating in *The Letter of James*:

Religion that is pure and undefiled before God and the Father is this: to care for orphans and widows in their affliction and to keep oneself unstained by the world.<sup>96</sup>

In a different (but not always mutually exclusive) category are the mentally incompetent, who need long-term, if not permanent, prudent asset management on their behalf.

Accordingly, legal and even judicial interdiction (*al-hajr*) is permissible to ensure the prudent management of assets. To be sure, those assets are private property, hence the use of the second person possessive ("your") and second person pronoun ("you") in *surah* 4 *ayah* 5 of the Qur'an. But, there are public interests at stake, too, and private ownership must heed to them. First, the feeble need help, so that they are not put out on the streets begging. Second, the community (or society at large) ought not to become ever-more stratified by income inequality.

The quintessential vehicle for prudent management to protect these community interests is a charitable trust, pious foundation, or *mortmain* (from the French, literally, "dead hand," known in Arabic as "*waqf*"). That legal entity can manage donated property wisely, and thereby take care of persons who otherwise would be penurious owing to their fiscal irresponsibility, mental incompetency, or other unfortunate station in life. In the post-9/11 environment, *waqfs* have attracted considerable attention as vehicles for financing terrorism and laundering money. Some charitable trusts have been abused by their sponsors for evil purposes, and any involvement or transactions with such *waqfs* can trigger serious penalties under United States Criminal Law. Yet, the majority of *waqfs* are established and run for good-hearted reasons.

Accordingly, a "*waqf*" is a form of property, or a property law institution, which typically is translated as a "charitable trust." Professor Hussein synthesizes the

<sup>94</sup> Qur'an, *supra*, 4:6 at 50-51.

<sup>95</sup> Qur'an, *supra*, 4:10 at 51.

<sup>96</sup> *The Letter of James*, 1:27, in *THE CATHOLIC STUDY BIBLE* 371 (New York, New York: Oxford University Press, 1990, New American Bible trans.). Likewise, as the commentary on this passage observes:

In the Old Testament, orphans and widows are classical examples of the defenseless and oppressed.

*Id.*, fn. 1, 27, at 371.

definition of the term rendered by Muslim scholars thusly:

[a] *waqf* is the permanent dedication by a Muslim of any property for religious or charitable purposes, or for the benefit of the founder and his descendants, in such a way that the owner's right is extinguished, and the property is considered to belong to God.<sup>97</sup>

However, the rendition into English of "*waqf*" as "trust," when it occurs, is inaccurate. As Professor Hussain observes, there are six key differences between a *waqf* and a trust:

1. A *waqf* should be created for a religious and/or charitable purpose recognized by *Shariah*. A trust may be created for any lawful purpose.
2. The founder of a *waqf* cannot take any benefit for himself (except to some extent according to the *Hanafi* School). The founder of a trust may be a beneficiary.
3. Property in a *waqf* vests in God. Property of a trust vests in the trustee.
4. The *mutawalli* [i.e., administrator of the *waqf*] acts essentially as a supervisor and has fewer powers than a trustee.
5. A *waqf* must be perpetual, irrevocable, and unalienable. It is not essential for a trust to have these characteristics.
6. A *waqf*, unlike a trust, does not result for the benefit of its founder, when its objects are exhausted. It is applied for some purpose which is similar to its original objects.<sup>98</sup>

The third distinction is particularly striking, and easily illustrates the different spirit animating a Sacred versus Secular legal system.

The founder of a *waqf* is called the "*waqif*," and the act of creating one is entirely voluntary. In American legal parlance, the "*waqif*" is the "settlor." As long as the founder is a mentally competent Muslim adult, the founder may be a man or woman. Interestingly, in keeping with the one-third limit on legacies, the size of a *waqf* made by a founder on her deathbed cannot exceed one-third of the gross estate, unless the heirs of the founder consent otherwise.<sup>99</sup>

A *waqif* sets up a *waqf* orally or in writing, and transfers assets to it:

The settlor, or *wakif*, typically transfers property to the analogue of the trustee, the *mutawalli*. Not uncommonly, the *waqf* instrument will name the *mutawalli* and provide for successors, just as in the case of a trust.<sup>100</sup>

<sup>98</sup> HUSSAIN, *supra*, at 115.

<sup>99</sup> See HUSSAIN, *supra*, at 115.

<sup>100</sup> Jeffrey Schoenblum, *The Role of Legal Doctrine in the Decline of the Islamic Waqf: A Comparison with the Trust*, 32 *VANDERBILT JOURNAL OF TRANSNATIONAL LAW* 1191, 1194-97 (October 1999). [Hereinafter, Schoenblum.]

The *waqf* can create a *waqf* for any purpose, as long as that purpose is not incompatible with Islam. For example, that the *Haram al-Sharif* in Jerusalem, commonly known as the Dome of the Rock, is administered by a *waqf*.<sup>101</sup> There, the *Al Aqsa* Mosque is located. The compound is called the "Noble Sanctuary." Of course, East Jerusalem was annexed by Israel after the June 1967 War. However, Israel allows a *waqf* to run the Mosque.

The term "*mortmain*" refers to a form of ownership or possession of land or buildings by an ecclesiastical (i.e., church, mosque, or other religious assembly or congregation) corporation.<sup>102</sup> The corporation is not permitted to alienate (sell or transfer) the property. Thus, if property is "*in mortmain*," then it means it is unalienable in respect of ownership or possession. That is true of assets put into a *waqf*. The typical sorts of assets that are placed in a *waqf* are immovable property, such as real estate. However, movable property also can be placed in a *waqf*, such as cash or a school bus. The key requirement simply is that the property exists and is owned by the founder (*waqif*) at the time the *waqf* is established.<sup>103</sup> Note that an undivided share of jointly owned property cannot be turned into a *waqf* if that property is designated for a mosque or cemetery, though it may be valid to do so for other purposes.<sup>104</sup>

The concept of a *waqf* arose from four roots.<sup>105</sup> First, the Prophet Muhammad called upon his followers in Medina for contributions to a holy war (*jihād*) in which they were engaged (e.g., against non-believers). Second, early Muslims established charities and other public benefactions. Third, the successors to the First Islamic Community had a practical need to offset some of the distributional effects of the application of the *Shari'a* rules on succession. Finally, pious foundations, known in Latin as *piae causae*, existed among Eastern (Byzantine) Christian Churches.<sup>106</sup>

Because the *Shari'a* does not contain the concept of a "legal person," a *waqf* is not considered to be such. Rather, a *waqf* is viewed as a foundation through which the property (the "substance," or "*res*" in Latin, or "*ayn*" in Arabic) owned by the founder of the *waqf* is withdrawn from circulation, and the proceeds are spent for a charitable purpose. Exactly who owns the owner of the assets — the "*res*" or "*ayn*" — is a matter of debate among the Four *Sunni* Schools of Law. The proceeds of a *waqf*, that is, funds generated by assets in the charitable trust, are called "*manāfi*" (singular, "*manfa'a*").

<sup>101</sup> See *Palestinians, Jews Clash at Holy Sites*, WASHINGTON TIMES, 30 July 2001, at A1.

<sup>102</sup> The adjective "ecclesiastical" comes from the Greek noun "*ekklesia*" (*ekklesia*), which was the legislative assembly of Ancient Athens.

<sup>103</sup> See HUSSAIN, *supra*, at 114.

<sup>104</sup> See HUSSAIN, *supra*, at 115.

<sup>105</sup> See SCHACHT, *supra*, at 19.

<sup>106</sup> "*Piae causae*" literally means "pious causes," or "devout causes." "*Piae*" is the feminine plural nominative case word meaning "pious," "devout," or "religious." "*Causae*" is the feminine plural nominative case word meaning "cause," "reason," "motive," or "occasion."

## [B] Three Conditions about Purpose

Under *Hanafi* School jurisprudence, an essential feature of any *waqf* concerns its purpose.<sup>107</sup> There are three key conditions. First, a *waqf* must have a purpose. Second, the purpose must be permanent. Third, the purpose must not be incompatible with Islam.

To say that a *waqf* must have a "purpose" means there always must be an identifiable beneficiary. In particular, the original beneficiaries, to whom the proceeds are to be distributed, must exist. In the event the original beneficiaries all die out, there must be subsidiary beneficiaries. Moreover, the purpose must exist before the death of the founder (*waqif*), or at least be capable of being identified with reasonable certainty.<sup>108</sup>

To say the purpose must be "permanent" means what it suggests: once property is put in the *waqf* for the designated purpose, that property cannot be directed to other aims. That is, the purpose is perpetual and absolute. In *Shi'ite* jurisprudence, it is unconditional as well.<sup>109</sup>

Finally, to say the purpose must not be "incompatible with Islam" means the *waqf* cannot be used to fund activities that would be contrary to the *Shari'a*. For example, a charitable trust could not be set up to brew and distribute beer, or raise pigs for pork. It might, therefore, be ventured that a *waqf* set up to funnel support for violent activities, purportedly in the name of a "holy war," but the effect of which is to kill and maim innocent civilians, is antithetical to the *Shari'a*.

To ensure these purposes are satisfied, a *waqf* is administered by a "*mutawali*." The *mutawali* often is the founder (settlor) of the *waqf*, who then may appoint a successor.<sup>110</sup> If no successor is appointed, then an Islamic judge (*qādi*) can appoint the successor. Both women and non-Muslims can serve as a *mutawali*, and the *mutawali* may be compensated for services rendered, presumably from the funds of the *waqf*.

## [C] Types of Waqf

A *waqf* may be public or private. Professor Hussain summarizes the differences between the two types:

- *Waqf al Ahli* — family *waqf*. This kind is created for the benefit of the founder and his relatives to provide for their needs during their lifetime, and after their death, to be used for charitable purposes.
- *Waqf al Khayri*. This kind of *waqf* is created for religious and/or charitable purposes from the outset. It may be for the welfare of poor people or for the establishment and/or upkeep of a mosque, hospital, cemetery, or other

<sup>107</sup> See SCHACHT, *supra*, at 96, 205.

<sup>108</sup> See HUSSAIN, *supra*, at 114-115.

<sup>109</sup> See HUSSAIN, *supra*, at 114.

<sup>110</sup> See HUSSAIN, *supra*, at 114.

public facility.<sup>111</sup>

Accordingly, a public *waqf* also is called a "charitable" *waqf*. In Arabic, the term is "*waqf khayri*," or "*waqf al khayri*." (Thus, transliteration of "*waqfs*" as "charitable trusts" can be ambiguous. The reference may be to public and private *waqfs*, or specifically to public *waqfs*.) The purpose of a public or charitable *waqf* is, as its name suggests, an eleemosynary one involving more than just the family members of the founder.

In contrast, a private *waqf* also is called a "family *waqf*." In Arabic, a family *waqf* is a "*waqf ahli*," "*waqf al ahli*," or "*dhurri*." Even though beneficiaries are not the public at large (except, possibly, as subsidiary beneficiaries), a family *waqf* still is considered in the *Shari'a* to be a charity. So, the same rules apply to public or private *waqfs*.<sup>112</sup>

According to *Hanafi* School jurisprudence, the condition that a family *waqf* have a permanent purpose means there always must be beneficiaries in the family line connected with the founder of the *waqf* (i.e., descendants of the founder). What happens if the family line ends? To safeguard against this possibility, some other permanent purpose must be designated.<sup>113</sup> For example, the poor may be appointed as subsidiary beneficiaries. That is, in the absence of clear beneficiaries not related to the founder, the *waqf* would revert to the poor. The designation of subsidiary beneficiaries may occur in the legal instrument establishing the family *waqf*.

Interestingly, during the days of the British Raj in India, the Privy Council held in a famous 1894 case, *Abul Fata v. Russomay*, that this reversionary interest of the poor was illusory.<sup>114</sup> It further held that Islamic Law forbids a family *waqf* with the poor as subsidiary beneficiaries. The Privy Council reasoned that this family *waqf* was a gift of inalienable life-interests to remote unborn generations of descendants, and the *Shari'a* does not permit such gifts. The Privy Council decision raised howls from the Muslim community in India, because it struck down an Islamic property law institution — the family *waqf* — that was both significant and practical. The decision was reversed through two legislative acts. The first one, the *Mussalman Wakf Validating Act of 1913*, reinstated Islamic jurisprudence on family *waqfs*. But, it was not retroactive, thus in 1922 the Privy Council held that family *waqfs* pre-dating the Act were invalid. The second law, the *Mussalman Wakf Validating Act of 1930*, rendered the first one retroactive.

Today, not every Muslim country has the property law institution of the "public *wakf*." In 1956, Tunisia enacted modernist legislation abolishing public *waqfs*. The assets of all public *waqfs* were transferred to the ownership of the state.<sup>115</sup> Also that year, Tunisia did away with private *waqfs*. Syria in 1949, and Egypt in 1952,

<sup>111</sup> HUBBAIN, *supra*, at 114.

<sup>112</sup> See SCHRAGT, *supra*, fn. 1 at 126.

<sup>115</sup> See SCHRAGT, *supra*, 108.

abolished private *waqfs*, but not taken the more dramatic step that Tunisia did to terminate public *waqfs*.<sup>116</sup>

## [D] *Shi'ite Distinctions*

There is a distinction between *Sunni* and *Shi'ite* Inheritance Law, relevant to estate planning.<sup>117</sup> This distinction appears to be relevant to a family *waqf* (*waqf ahli*, *waqf al ahli*, or *dhurri*). What happens when no *mutawali* was originally appointed? *Sunni* jurists often view this omission as a fatal defect, undercutting the validity of a *waqf* altogether. *Shi'ite* jurists often consider the beneficiary to be the *mutawali* (presumably, one named subsequently to the creation of the *waqf*).

The *mutawali* generally has power to administer the property held in *waqf*, although only upon the express approval of the court or the creating instrument may he actually sell the property. If sold, the proceeds may have to be reinvested in like-kind property.<sup>118</sup>

That is, it appears the status of a *mutawali* as beneficiary may be linked to the powers of a *mutawali* over the assets.

A second noteworthy distinction between *Sunni* and *Shi'ite* Inheritance Law concerns intestate succession. The difference is not on religious grounds, but stems from historical circumstances relating to the *Sunni* — *Shi'a* schism. One expert explains:

Sunni law is much more generous to the pre-Islamic agnatic [i.e., male line of relatives] tribal heirs than Shi'i law; and intestate succession, where, for example, in Sunni law there may be no bequest in favour of an heir entitled on intestacy, and no bequest in excess of one-third of the net estate to anyone, without the consent of the heirs after the death of the testator — but where in Shi'i law a bequest may be made in favour of an heir, and bequests in excess of one-third may be consented to before or after the testator's death.<sup>119</sup>

The issue is this: suppose a decedent dies intestate and leaves an heir. Is it permissible to give that heir a specific bequest from the net estate? Under *Sunni* law, the answer is no, unless all other heirs consent after the testator dies. Under *Shi'ite* law, the answer is yes. Moreover, consent may be given before or after the death of the testator, and the bequest may exceed the one-third limit.

<sup>116</sup> See SCHRAGT, *supra*, 103, 108.

<sup>117</sup> See Schoenbaum, *supra*, at 1191, 1194-97. This article gives considerable credit to FYZEE, *supra*, 387-467 as the authoritative source on *waqfs*, especially their technicalities and difference between *Sunni* and *Shi'a* rules.

## § 41.07 EUTHANASIA

## [A] Definitions and Categories

"Euthanasia" is originally an Ancient Greek word meaning "a good and honorable death," resulting from the combination of "*eu*" (goodly or well) and "*thanatos*" (death).<sup>120</sup> Modern medical dictionaries tend to alter that meaning, taking out "goodness" and "honor," and refer to "euthanasia" in terms such as "mercy killing" or a "quiet, painless death,"<sup>121</sup> typically induced deliberately by a doctor following persistent requests from a patient who suffers from an incurable, tortuous ailment.<sup>122</sup> Father Hardon elaborates on the evolution in the meaning:

[Euthanasia] [literally] [means] "easy death," the act or practice of putting people to death because they or others decide that continued life would be burdensome. Originally, the term was used for "mercy killing," which meant administration of an easy, painless death to one who was suffering from an incurable and perhaps agonizing disability or disease. Then, as mass genocide was legalized under Communism and Nazism, the term came to be applied to all forms of inflicting death on persons who are, by legal standards, permitted to take their own lives or others are allowed to do so with the full protection of the civil law.<sup>123</sup>

Evidently, the Ancient Greeks thought a good, honorable death would be voluntary (in effect, suicide). Never would such a death be inflicted by another person, for if it were it would not be "good." Thus, what occurred in the 20th century in the worst excesses of Fascism, in Hitler's Germany, and of Communism, in Stalin's Russia and Mao's China, was not just "bad," but evil: the deaths of tens of millions of people, including not only through forced abortions, but also through killing persons deemed of no value to society.

In contemporary times, euthanasia is divided into two types: voluntary or involuntary. "Voluntary" euthanasia occurs when a patient actively expresses her wish to die. Death is brought about by the administration of lethal drugs, in which case the termination of life is called "active euthanasia." Alternatively, death may be caused by the withdrawal of life support treatment, a process known as "passive euthanasia." With active euthanasia, a medical professional is involved in ending the life of the patient. That is, but for the act of the doctor, the patient might not have died. With passive euthanasia, the doctor is aware of the condition of the patient. But, neither the doctor nor any actions by the doctor or other medical professionals are the immediate cause of death. Categorizing an instance of euthanasia as "voluntary," whether it is "active" or "passive," hinges on two key questions. First, is the patient capable of making a sound decision? This question concerns both law and science. Second, is the right to live accompanied by the right to die? This

<sup>120</sup> See SHARIAH LAW, *supra*, at 47-52.

<sup>121</sup> See, e.g., <http://medical-dictionary.thefreedictionary.com/euthanasia> (definition of "euthanasia").

<sup>122</sup> See, e.g., [www.medterms.com/script/main/art.asp?articlekey=7365](http://www.medterms.com/script/main/art.asp?articlekey=7365) (definition of "euthanasia").

<sup>123</sup> JOHN A. HARDON, S.J., MODERN CATHOLIC DICTIONARY 196-197 (Doubleday: Garden City, New York, 1980) (entry for "euthanasia"). [Hereinafter, CATHOLIC DICTIONARY.]

question involves law, religion, and morality. Opposition to voluntary euthanasia revolves around these two questions.

"Involuntary" euthanasia is an act that accelerates death and originates from the wishes of the legal guardian of the patient. Typically, the patient is comatose or in a vegetative state. Opposition to involuntary euthanasia is based on the proposition that neither a legal guardian nor doctor may interfere with the inalienable right to life to which any patient is entitled. Opponents argue by analogy to a right to property. A right to property is incomplete unless the owner has full control over property, and thereby can destroy it. Likewise, the right to life is incomplete unless a person has full control over her life, including the right to die. This rationale supports organ donation: the right of ownership over one's body justifies the ability to donate organs from one's body.

These arguments are not invulnerable. First, the property analogy can be questioned: there are limits to the right to ownership. Legally, a property owner may be restricted from using her property in a manner that adversely affects others. Religiously and morally, it would be wrong for a factory owner to burn down her plant if the result is to render unemployed all of the workers. Second, asserting an inalienable right to life omits a salient point for religious adherents: God is the author of life, which means that as only He can create life, only He has — or should have — the power to destroy it. For a legal guardian or doctor to cause the death of a patient is to trespass on the province of God. This point holds equally true for voluntary euthanasia.

[B] View of *Shari'a*

The Qur'an clearly opposes the infliction of harm to another or death to oneself. *Surah* 4, *ayah* 29 states:

. . . Do not kill each other, for God is merciful to you.<sup>124</sup>

Similarly, *surah* 2, *ayah* 195 provides:

Spend in God's cause: do not contribute to your destruction with your own hands, but do good, for God loves those who do good.<sup>125</sup>

This opposition is reinforced by the *Sunnah* of the Prophet. Sahih Bukhari narrates a *hadith* regarding suicide, as transmitted by Abū Hurairah:

The Prophet . . . said, "He who commits suicide by throttling shall keep on throttling himself in the Hell-Fire and he who commits suicide by stabbing himself shall keep on stabbing himself in the Hell-fire."<sup>126</sup>

Based on the Qur'an and *hadith*, the rule, as it were, is unambiguous: the *Shari'a* forbids suicide or self-inflicted harm, and the killing of another. Hardship is never a legitimate justification for losing faith or hope in the mercy of Allāh to alleviate

<sup>124</sup> Qur'an, *supra*, 4:29 at 53.

<sup>125</sup> Qur'an, *supra*, 2:195 at 22.

<sup>126</sup> THE TRANSLATION OF THE MEANINGS OF SAHIH AL-BUKHARI, ARABIC-ENGLISH by Dr. Muhammad Muhsin Khan, vol. II, p. 253, *hadith* no. 446 (Dar Ahya Us-Sunnah, Al Nabawiya, March 1978).

pain. Indeed, the Islamic theme of performing good deeds until the last breath is heavily emphasized, as is patience with hardship. Put succinctly, euthanasia is not simply *makrūh* (reprehensible), it is very nearly always *ḥarām* (forbidden).

Does the same rule apply to passive euthanasia? Sheikh Yusuf Al-Qaradawi speaks of passive euthanasia in an example in which he attempts to examine what would occur in their natural course.<sup>127</sup> Omar, a hypothetical terminal cancer patient, will die if his treatment is discontinued, although there is no hope for cure of his condition. Discontinuing his treatment only will speed up his death, but which would thereby end his suffering. Without continuing the treatment, the natural course of events continues, and the law of causation, *i.e.*, natural cause-and-effect, operates.

Is it, then, religiously and morally correct for a person to seek treatment for her illness? Conversely, is discontinuation of medical treatment appropriate from the perspective of the *Sharī'a*? Among Islamic legal scholars, the following positions exist:

- (1) Some scholars argue that treatment is only *mubāh* (permissible), but not required.
- (2) Other scholars, in the *Shāfi'i* and *Ḥanbalī* Schools, regard treatment as *mustahabb* (recommended).
- (3) Still other scholars weigh whether the desires of a patient, or treatment of sickness, is more important under the *Sharī'a*. However, Al-Ghazali, in his chapter on *tawakkul* (trust in God (Allāh)), refutes the idea of balancing these two interests. That is, he disagrees with the proposition that rejection of medication is recommended. To the contrary, administering treatment is recommended.
- (4) Still another group of scholars regard seeking treatment as *wājib* (obligatory).
- (5) Sheikh Al-Qaradawi concludes that seeking treatment is either *wājib* or *mustahabb*, with possible exceptions in individual circumstances.

There is yet another, and primary, source for discerning what is religiously and morally acceptable in respect of euthanasia: the *Sunnah* of the Prophet.

From that *sirah* (way of life), there is evidence of Muhammad encouraging treatment for illness, but only in hopeful cases where an ill person is likely to survive. In instances of no hope for recovery, apparently he considered treatment of the patient neither *wājib* nor *mustahabb*. In other words, the attitude of "letting nature take its course" is neither *ḥarām* nor *makrūh*. Why? The rationale seems to be pragmatic. By keeping a terminally ill patient in a vegetative condition, running on life support, the consequences are adverse: depletion of the financial resources of the family; inflicting pain on the family if not the patient, too; and prolonging an inevitable outcome. However, suppose a doctor takes affirmative steps, such as injecting poison or a drug with the intention of killing the patient, while the possibility of improvement exists for the patient. Such an action clearly is *ḥarām*. It

<sup>127</sup> See discussion on euthanasia found in *SHARIAH LAW*, *supra*, at 47-52.

constitutes murder, even if the physician acted with the intention of ceasing the pain of the patient.

In sum, while there is debate as to active intervention via medical treatment, euthanasia almost always is *ḥarām* under the *Sharī'a*. It runs counter to the general (albeit not invariable) bar against destruction of life, whether self-inflicted or inflicted by a third party, and whether voluntary or involuntary. Only in rare cases, in which there is no chance of survival, may euthanasia (mostly in a passive form) be allowed. Those cases typically involve a patient who is brain dead or in a permanent vegetative form.

### [C] SYNOPSIS of American Law and Catholic Christian Teaching

In 1976, the United States Supreme Court confronted the question of euthanasia in the celebrated case of *In re Quinlan*.<sup>128</sup> The Supreme Court held that it was permissible for doctors to remove a comatose patient from life support, a judgment that favored the parents of a woman (Karen Ann Quinlan) who had been kept alive via artificial ventilation and who petitioned for removal of this support. The patient, 21-year old Karen Ann Quinlan, passed out and stopped breathing for two periods of 15 minutes each after ingesting alcohol and tranquilizers. Doctors determined she was in a persistent vegetative state, but her primary physician and the hospital at which she was treated refused the request of her father to remove her from an artificial ventilator. The New Jersey Supreme Court agreed that the father could order the cessation of ventilation,<sup>129</sup> as did the United States Supreme Court, which he did. Yet, Karen continued to breathe on her own for several years, ultimately succumbing to pneumonia. An autopsy revealed she had suffered extensive brain damage (specifically to the bilateral thalamus).

In another case, a California court held that any assistance to die is limited to passive euthanasia.<sup>130</sup> Thus far, case law in the United States articulates that a terminally ill patient in a vegetative state, who is unlikely to return to normal life, may claim a right to death.<sup>131</sup> Conversely, a competent patient cannot compel an unwilling doctor to remove the life support systems for the patient. Further, the American Medical Association (AMA) condemns active participation by a doctor in ending the life of any patient, and holds such action as synonymous with intentional killing.<sup>132</sup>

For the time being, there is greater consistency between Catholic Christian teaching and American law in respect of euthanasia than in the matters of abortion or contraception. This teaching begins with the proposition that any person whose life is diminished or weakened deserves special respect, and a sick or handicapped

<sup>128</sup> See 422 U.S. 922 (1976).

<sup>129</sup> See 70 N.J. 10, 355 A.2d 647 (N.J. 1976).

<sup>130</sup> See *SHARIAH LAW*, *supra*, at 49.

<sup>131</sup> See *id.*

<sup>132</sup> See *id.*

person ought to be assisted to lead as normal a life as possible.<sup>133</sup> The *Catechism of the Catholic Church* identifies "direct" euthanasia (redolent of "direct" abortion) as:

putting an end to the lives of handicapped, sick, or dying persons.<sup>134</sup>

Regardless of "its motives or means," direct euthanasia "is morally unacceptable."

It follows that no utilitarian calculation as to the value of a person, or her inability to contribute productively, to a society, is entertained:

The Holy See was asked, "Is it permissible upon the mandate of public authority, directly to kill those who, although they have committed no crime deserving of death, are yet, because of psychic or physical defects, unable to be useful to the nation, but rather are considered a burden to its vigor and strength?" The reply was No, and the reason given was that "it is contrary to the natural and the Divine positive law."<sup>135</sup>

Notably, Pope Pius XII issued this Decree in December 1940, when Hitler ruled Nazi Germany, Stalin reigned in the Soviet Union, and Mao led a Communist insurgency in China.

Simply put, direct euthanasia is "murder," which as the above-quoted Decree indicates, is an affront to human dignity and the Creator.

[A]n act or omission which, of itself or by intention, causes death in order to eliminate suffering constitutes a murder gravely contrary to the dignity of the human persons and to the respect due to the living God, his Creator. The error of judgment into which one can fall in good faith does not change the nature of this murderous act, which must always be forbidden and excluded.<sup>136</sup>

Father Hardon explains further:

The Catholic Church reprobates euthanasia because it is a usurpation of God's lordship over human life. As creatures of God, to whom human beings owe every element of their existence, they are entrusted only with the stewardship of their earthly lives. They are bound to accept the life that God gave them, with its limitations and powers; to preserve this life as the first condition of their dependence on the Creator; and not deliberately

curtail their time of probation on earth, during which they are to work out and thereby merit the happiness of their final destiny.<sup>137</sup>

Is the reprobation prophylactic? That is, does this rule and rationale mean that termination of medical procedures is wrong in all cases?

Certainly not, is the answer provided by the *Catechism*:

Discontinuing medical procedures that are burdensome, dangerous, extraordinary, or disproportionate to the expected outcome can be legitimate; it is the refusal of "over-zealous" treatment. Here one does not will to cause death; one's inability to impede it is merely accepted.<sup>138</sup>

In other words, intervention that is excessive relative to the likely outcome is unnecessary. There is no religious or moral duty to provide every kind of treatment known to medical science in every case. In deciding against some, or any, treatment, the question is intent: is there a will to kill, or is there an acceptance of the reality of death?

Conversely, "ordinary care" that is owed to a sick person "cannot be legitimately interrupted."<sup>139</sup> That is true "[e]ven if death is thought imminent."<sup>140</sup> "Ordinary care" is undefined, but surely includes standard medical treatment (e.g., basic food, water, and respiration) that does not place excessive physical, psychological, spiritual, or financial burdens on the patient or her family.<sup>141</sup> As for painkillers:

to alleviate the sufferings of the dying, even at the risk of shortening their days, can be morally in conformity with human dignity if death is not willed as either an end or means, but only foreseen and tolerated as inevitable.<sup>142</sup>

Accordingly, palliative care — that is, painkillers — "should be encouraged" as "a special form of disinterested charity."<sup>143</sup> Again, the principle of human dignity provides the fundamental rationale for the teaching.

Who should make those decisions? Ideally, the patient should make the choice, assuming she has the competence and ability to do so. Otherwise, a person legally authorized to act for the patient becomes the decision-maker, but must act in accordance with the "reasonable will and legitimate interests" of the patient.<sup>144</sup> Perhaps there is no better example of putting end-of-life principles into practice than the behavior and decisions of Pope John Paul II, in the last weeks of his earthly life. By one account:

<sup>133</sup> See *CATECHISM OF THE CATHOLIC CHURCH* § 2276 at 549 (United States Catholic Conference, Inc., Washington, D.C.: Libreria Editrice Vaticana, 2th ed. 1997). [Hereinafter, *CATECHISM*.]

<sup>134</sup> *CATECHISM*, *supra*, § 2277 at 549.

Conscious and alert the day before his death, he was able to concelebrate Mass in his papal apartment, the Vatican said. The pope began slipping in and out of consciousness the morning of April 2, [2005] and died that night, it said.

The 84-year-old Polish pontiff had been hospitalized twice in recent weeks for spasms of the larynx, and in late February he underwent a tracheotomy to make breathing less difficult. Doctors inserted a nasogastric feeding tube to aid nutrition March 30. The evening of March 31, the pope's infection caused a high fever and septic shock, which brought on heart failure. He was treated immediately with antibiotics and respiratory equipment that had been installed in the papal apartment, and his condition stabilized temporarily. But in his statement early April 1, [Vatican spokesman Joaquin] Navarro-Valls made it clear the pope's condition was deteriorating.

On the evening of March 31, the pope received the "holy viaticum," a reference to the Eucharist given when a person is approaching death, the Vatican said. It was the pope himself who decided to be treated at the Vatican instead of being taken to the hospital, said . . . Navarro-Valls. Cardinal Mario Francesco Pompedda, who visited the dying pope, described the scene in the pope's bedroom: Assisted by several doctors and his personal staff, the pontiff lay serenely on a bed in the middle of his room, comforted by cushions, occasionally opening his eyes in greeting to the handful of visitors allowed inside.

At his last, poignant public appearance at his apartment window March 30, the pope greeted pilgrims in St. Peter's Square and tried in vain to speak to them. After four minutes, he was wheeled from view, and the curtains of his apartment window were drawn for the last time.

For more than a decade, the pope suffered from a neurological disorder believed to be Parkinson's disease. As the pope's health failed in recent months, many of his close aides said his physical decline, never hidden from public view, offered a remarkable Christian witness of suffering.<sup>145</sup>

Thus ended a 26-year pontificate (1978-2005), the second-longest in Church history (following Pius IX, who was Pope from 1846-1878).<sup>146</sup>

<sup>145</sup> Pope John Paul II's Final Days, American Catholic Org., posted at [www.americancatholic.org/news/pope/popehospitalized/](http://www.americancatholic.org/news/pope/popehospitalized/).

<sup>146</sup> If Saint Peter is considered "Pope" from the time when Jesus bestowed the office of leading the Church upon him, then he is the longest-serving Pope (approximately 34 years, from roughly 30 A.D. to Saint Peter's death, which occurred in 64 or 67). If the criterion for measurement is his time in Rome, then he is the fourth-longest serving Pontiff, at 25 years.

## Chapter 42

### LAW OF SUCCESSION

What! did my brother Henry spend his youth,  
His valor, coin and people, in the wars?  
Did he so often lodge in open field,  
In winter's cold and summer's parching heat,  
To conquer France, his true inheritance?

William Shakespeare (1564-1616),  
*Henry VI, Part Two* (1596-98), Act I, Scene I (Gloucester)

##### [A] Three Principle Classes of Heirs

Islamic Inheritance Law lays out in comprehensive detail how property in the estate (*tarika*) of a Muslim must be distributed. Three conditions define whether property qualifies for inclusion in an estate:<sup>1</sup>

<sup>1</sup> Attique Tahir, *The Requisites Of A Valid Will — A Comparative Study Of Shariah & Law*, At. Aowa 35, 42 (Lahore, Pakistan: Al-Adwa, Sheikh Zayed Islamic Centre, University of the Punjab, 2009), posted at [www.pu.edu.pk/szic/journal/currentissue\\_pdf/E-2%20Atiq%20Tahir.pdf](http://www.pu.edu.pk/szic/journal/currentissue_pdf/E-2%20Atiq%20Tahir.pdf). [Hereinafter, Tahir.] The au-

- (1) The property must be capable of being transferred.
- (2) The testator must be the owner of the property.
- (3) The property must be in existence at the time of the death of the testator.

Notably, intangible property, including intellectual property (IP), is eligible for inclusion, and thus can be the subject of a will. Ownership of assets in the estate of a decedent is transferred automatically from the decedent to each heir, as appropriate, at the moment of death of the decedent.

The details about distribution are voluminous, and are the subject of entire courses in Faculties of *Shari'a* and Law in Islamic countries. The discussion below draws mainly on *Hanafi* School jurisprudence. This *fiqh* is the majority view accepted in the Muslim world. Yet, depending on the specific issue, there may be pertinent variations among the *Māliki*, *Shāfi'i*, and *Hanbali* Schools. The rules on succession establish the rights of various heirs with mathematical precision. In itself, this precision is a major technical achievement of Muslim legal scholarship.<sup>2</sup>

As a general principle, in the Islamic Law of Succession, the universe of heirs is based on the following categories of relationship to the decedent:

- (1) Blood tie (consanguinity).
- (2) Marriage.
- (3) Clientship.

As a practical matter, the first two categories are the most important.

The Arabic term for "heir" is "*warith*." The *Hanafi* School jurists divide heirs into three principal classes:<sup>3</sup>

• **Qur'anic heirs (*Dhawū'l furāḍ*):<sup>4</sup>**

With a few notable exceptions, Qur'anic heirs consist mainly of females. The adjective "Qur'anic" bespeaks the fact that these heirs are identified in the Qur'an.

• **Agnatic heirs (*Aṣabāt*):<sup>5</sup>**

The noun "agnate," and its adjectival form, "agnatic," refer to:

descended [especially] by male line from the same male ancestor, . . . descended from the same forefather; of the same clan or nation, [or] one who is descended, [especially] by male line, from the same male ancestor.<sup>6</sup>

In other words, an "agnate" is a male in a line of relatives, which includes ascendants (father, grandfather, and so on backward in time) and descendants (son, grandson, and so on forward in time). So, in Islamic Law of Succession, an "Agnate heir" is a near male relative, such as the son, father, brother, paternal uncle, or nephew of a testator. More technically, an Agnatic heir is one whose "relation to the deceased is traced without intervention of female links."<sup>7</sup>

• **Uterine heirs (*Dhawū'l arḥām*):<sup>8</sup>**

The adjective "uterine" means:

of or relating to the uterus . . . born of the same mother but not the same father.<sup>9</sup>

As used in the Islamic succession rules, a "uterine heir" refers to distant kindred person, and includes every relation who is neither a Qur'anic heir nor an Agnatic heir. Observe, therefore, that there is not the same degree of similarity of meaning between "uterine" and "uterine heirs" as there is between "agnatic" and "agnatic heirs."

There are further classes, beyond these three. However, in most cases, the full amount of an estate is distributed before reaching any of the additional classes.

Also as a general principle, the share of a nearer relative to a decedent excludes any inheritance right of a more remote relative. That is, the closer the tie of a relative to the decedent, the stronger the inheritance claim of that relative. The *Shari'a* rules focus especially on closeness of a consanguine relationship to the decedent. In contrast, no one can claim a share of the net estate of the decedent as a result of a relationship to the decedent that is through an heir. The relationship must be directly with the decedent, not indirectly through an heir. For instance, a male descendant or ascendant of the decedent can claim a share. But, a claim of a brother or sister of an heir is excluded.

<sup>6</sup> THE OXFORD AMERICAN DICTIONARY AND THESAURUS 30 (New York, New York: Oxford University Press, 2003) (entry for "agnate"). [Hereinafter, OXFORD AMERICAN DICTIONARY.] Likewise, *Black's Law Dictionary* defines "agnate" as:

[r]elated or akin through male descent or on the father's side.

And as:

[a] blood relative whose connection is through the male line. . . . [or] a relative on the father's side, whether or not traced exclusively through the male line.

BRYAN A. GARNER, ED., *BLACK'S LAW DICTIONARY* 77 (St. Paul, Minnesota: West, 9th ed., 2009) (entries for "agnate").

<sup>5</sup> See FYEKE, *supra*, at 399.

### [B] Four Key Rules

Islamic Law of Succession is replete with rules, but four of them are particularly salient. First, in the absence of Qur'anic and/or Agnatic heirs of a decedent, property in the estate of the decedent is distributed to the Uterine heirs.<sup>10</sup> However, distribution to Uterine heirs is subject to the Qur'anic rights of husbands and wives, *i.e.*, to the right of the surviving spouse (husband or wife) of the decedent.<sup>11</sup> Consequently, Uterine heirs receive any property in the estate of the decedent left over after distribution to the first two classes. Succinctly put, the interest of Uterine heirs is truly a residual one.

What if there are no persons in these three principal classes of heirs, *i.e.*, a decedent has no Qur'anic, Agnatic, or Uterine heirs? This situation occurs if no such heirs survive, or none can be found. In such a case, the succession rules look to subsidiary classes of heirs, including successors by contract or the state.

A second basic rule is that not all possible heirs always inherit. For instance, the estate size simply may not be large enough for each heir to receive a portion. As a corollary to this rule, some heirs within a class may exclude others within the same class.<sup>12</sup> However, a key restriction is the surviving spouse, parents, and children of the decedent cannot be excluded.<sup>13</sup>

The third basic rule is that Qur'anic heirs are allotted a specific fractional share, or "*fard*," of the estate of the decedent. There are 12 Qur'anic heirs as follows:

- Husband
- Wife
- Father
- True grandfather
- Mother

<sup>10</sup> Under the *Shari'a*, there is no institution of an heir, nor any universal succession. In Roman Law on Inheritance, both concepts existed: *heredis institutio*, and *successio in universum ius*. See JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW 169 (Oxford, England: Oxford University Press (Clarendon Paperbooks) 1982). (Hereinafter, Schacht.)

"*Heredis institutio*" refers to an arrangement of an heir or heiress, *i.e.*, a will or last testament decreeing who an inheritor should be. "*Heredis*" is the feminine, singular, genitive (possessive) case word for "heir or heiress." "*Institutio*" is the feminine, singular, nominative case word for "arrangement." In essence, this phrase refers to a general will, probably in written form, which specifies who gets what.

"*Successio in universum ius*" means "the succession of the whole in law," or more generally refers to conveyance of property as a whole entity, without mention of specific things. "*Successio*" is the feminine, singular, nominative case word for "taking the place of another," or "a succession." "*In*" is a preposition meaning "in" or "on." "*Universum*" is the neutral, singular, genitive (possessive) case word for "combined in one, whole, entire." "*Ius*" is the neutral, singular, nominative case word meaning "law." In essence, this phrase is the root of universal succession, where one or two inheritors receive everything in an estate, and the estate is not otherwise broken into different pieces.

<sup>11</sup> See FYEE, *supra*, at 401.

<sup>12</sup> See Chaudhry, *supra*, at 529.

<sup>13</sup> See Chaudhry, *supra*, at 530.

- True grandmother
- Daughter
- Son's daughter
- Full sister
- Half sister (*i.e.*, born of the same father but a different mother).
- Uterine brother (*i.e.*, brother born of the same mother but a different father).
- Uterine sister (*i.e.*, sister born of the same mother but a different father).<sup>14</sup>

The *fard* for each Qur'anic heir cannot be changed, precisely because the figure is set in *surah* 4, *ayat* 11-12 of the Qur'an.<sup>15</sup> There are certain cases in which a particular share may be increased or decreased. But, as a general proposition, the shares are invariable.

The fourth basic rule on succession is Qur'anic heirs are first in line, before any other class of heirs. That is, the class of Qur'anic heirs takes precedence over all others classes, and is the first to take its share. Once Qur'anic heirs receive their shares, the next right is of Agnatic heirs. Following Agnatic heirs are Uterine heirs. Thus, some Islamic legal texts refer to Qur'anic, Agnatic, and Uterine heirs as "Class I," "Class II," and "Class III" heirs, respectively.<sup>16</sup>

Thus, the fixed Qur'anic shares (*fards*) must be honored. Islamic Inheritance Law, like all of the *Shari'a*, is concerned with subjective rights and duties of individuals based on the will of God (Allāh). This body of law is not a grass-roots inspired set of commands aimed at social reform, such as inhibiting the development or perpetuation of an aristocracy (a goal of estate taxes in some countries). The *fards* take priority over all other claims, including those by the next of kin to the residue of an estate, except for:

- (1) costs of the funeral of the testator — decedent,
- (2) debts of the testator — decedent, and
- (3) legacy (of up to one-third of the estate) created by the testator — decedent, *i.e.*, dispositions by will.

Given these three significant exceptions, it is technically precise to refer to the distribution of the "net" estate of a decedent. The "gross" estate includes all assets, before paying funeral costs, debts, and the legacy (if any). Following those disbursements, what is left is the net estate.

In turn, if the allocation of fixed shares as dictated by the Qur'an to Qur'anic beneficiaries exhausts a net estate, so there is no residue, then the next of kin of the decedent get nothing. (To be sure, many fixed shares are for next of kin.) If

<sup>14</sup> See Chaudhry, *supra*, at 530.

<sup>15</sup> See Chaudhry, *supra*, at 530.

<sup>16</sup> See, e.g., FYEE, *supra*, at 397-401. Subsidiary heirs thus are enumerated in *seriatim*, following Class III. See *id.*, 401-402.

there are no assets in an estate after paying out the first two claims, then neither the legacy is paid nor is any distribution made to heirs of any class. Also, if a person dies intestate, there is no legacy, so any remaining assets in the net estate are paid directly to heirs in proportion with their fixed shares.

Interestingly, most Islamic texts and internet sources that treat Inheritance Law explain the distribution to Agnatic heirs first, before they discuss the Qur'anic heir *fards*. That is because Agnatic heirs tend to end up with the bulk of the estate of the decedent. It also so happens that most Agnatic heirs are male. However, in actual practice, distribution occurs to the Qur'anic heirs first, before distribution to the Agnatic heirs. Most Qur'anic heirs are women. It should be cautioned that these texts and sources are not uniform in their approach. Indeed, there are considerable variations, and even inconsistencies, among them. What is presented below is a simplified synthesis of what are the most salient rules accepted by the largest number of texts and sources.

#### § 42.02 PRINCIPLES OF 'AWL (INCREASE) AND RADD (RETURN)

What happens if the aggregation of the fractional shares (*fards*) for distribution to Qur'anic heirs of the net estate of a decedent does not sum to unity (1)? Note the technical precision in speaking of a "net" estate: any distribution occurs after payment of debts and funeral costs of the decedent. This question is an important practical one.

It also is a threshold question. Before any distribution can be made, it is essential to identify all surviving heirs of the decedent, and organize them into appropriate classes (Qur'anic, Agnatic, or Uterine). That way, it is possible to see if the respective fractional claims of each heir sum up to unity, or a number greater or less than one. Assuming they do not sum to one, then the principles of '*awl* (increase) and *radd* (return) are applied, whereby the fractional shares are adjusted so that they do add up to unity. In brief, the threshold matter in any Islamic Inheritance Law problem is not about priority of claims, but rather about making sure the extant claims add up to unity. Only then is it assured that the entirety of the net estate will be consumed, with no overage or deficiency.

To be sure, the easy case occurs when the *fards* do aggregate to unity (1). Professor Fysee offers the two examples, using the shares allotted by the Qur'an:

The surviving relations are father, mother, and 2 daughters. Therefore, f. [father] = 1/6, m. [mother] = 1/6, 2d [two daughters] = 2/3, and these fractions amount exactly to unity. . . . Or, to take another example, father, father's father, mother, mother's mother, 2 daughters, son's daughter. Here —

f.	=	1/6 (as Koranic Heir, because there are two daughters)
ff. [father's father]	—	excluded by f.
m.	=	1/6 (as there are daughters)
mm. [mother's mother]	—	excluded by m.

2d	=	2/3 (as Koranic Heirs)
Sd. [son's daughter]	=	excluded by two daughters . . . <sup>17</sup>

So, if the net estate of the decedent is worth U.S. \$1 million, then under either scenario, the father and mother each obtain property worth \$166,666.67. The two daughters together receive \$666,666.67. That is, the parents of the decedent get \$333,333.33, and the two daughters of the decedent the balance, thus consuming the full net estate.

However, there are two other possible scenarios, which are more common than the easy case: the shares exceed unity (1), or are less than one. Suppose the total sum of the *fards* exceeds unity (1). Then, the already allotted shares are readjusted through a procedure whereby all shares are reduced proportionately. This readjustment is called the principle of '*awl*, which literally means "increase." Professor Fysee offers this example:

A real anomaly arises . . . when the factions allotted to the Koranic Heirs amount to more than unity. To take a simple example, husband = 1/2; 2 full sisters = 2/3. The total of these fractions, reducing them to a common denominator, [is] 3/6 + 4/6 = 7/6. This is an anomaly and has to be resolved. The solution is (a) *increase* the denominator to make it equal to the sum of the numerators, and (b) allow the individual numerators to remain, thus proportionately decreasing the share of each heir. The artificial inflation of the denominator is called '*awl*, literally, "increase," but its real effect is the *proportionate reduction of the share*.

Applying this rule we have — h. = 1/2 = 3/6; and 2s. [sisters] = 2/3 = 4/6. Therefore, reduce [these shares] to 3/7 and 4/7, respectively.<sup>18</sup>

That is, converted to common denominators, the respective shares of the husband and sister are 3/6 and 4/6, which sums to 7/6. The numerator in this sum, 7, is used as the denominator in each converted fractional shares. Hence, those shares are cut from 3/6 to 3/7, and from 4/6 to 4/7. The husband gets 3/7, and the two sisters split equally 4/7. All told, the net estate is exhausted, as the distribution sums to 7/7, or 1.

Continuing this example, suppose the net estate of the decedent is worth U.S. \$1 million. Without applying '*awl*, no outcome is possible. It is mathematically impossible for the husband of the decedent to take one-half (1/2) a share (\$500,000), and also for the two full sisters of the decedent to take two-thirds (2/3), of the net estate (\$666,666.67). The sum of the fractions (and the property value) exceeds one (and \$1 million). Applying '*awl*, however, distribution to the Qur'anic heirs is possible. The share of the husband is reduced from one-half (1/2) to three-sevenths (3/7), which yields him \$428,571.43. The share of the two full sisters is cut from two-thirds (2/3) to four-sevenths (4/7), which amounts to \$571,428.57. The entirety of the \$1 million corpus is distributed. Note in most cases, the need for readjustment

<sup>17</sup> FYSEE, *supra*, at 416. The Qur'anic shares of the father, mother, and two daughters are explained in *id.* at 406-407, 409.

<sup>18</sup> FYSEE, *supra*, at 416-417 (emphasis original). The Qur'anic shares of the husband and two sisters are explained in *id.* at 410-411.

using 'awl arises only when daughters or sisters exist.<sup>19</sup>

Conversely, suppose the total sum of the fractional shares allotted to the Qur'anic heirs is less than unity (1), and there are no Agnatic heirs to receive the residue of the net estate. In such a case, the *fards* are readjusted in proportion to the shares already allocated to the Qur'anic heirs. This readjustment is called the principle of *radd*, which means "return." Professor Fysee explains:

The three rules of the doctrine of *radd* are:

- (1) The residue returns in proportion to the share.
- (2) The husband or the wife is not entitled to the return so long as there is a Koranic Heir (Class I) or a Uterine Heir (Class III).
- (3) If there is no other surviving heir, the residue returns to the husband or the wife in India; this rule is, however, contrary to the strict letter of the *Shari'at*, whereby the residue would escheat [revert] to the State, the spouse being entitled only to the Koranic Share. . . .<sup>20</sup>

He offers an illustration of each of these rules:

As to [rule] (1), mother and daughter.

m. [mother] = 1/6, d. [daughter] = 1/2; 1/6 + 3/6 = 2/3; there remains 1/3 which "returns."

The rule in such a case is to reduce the fractional shares to a common denominator, and to decrease the denominator of these shares to make it equal to the sum of the numerators. In the present illustration the original shares, reduced to a common denominator, are 1/6 and 3/6. The total of the numerators is 1 + 3 = 4. The ultimate shares will therefore be 1/4 and 3/4, respectively.<sup>21</sup>

<sup>19</sup> Professor Schacht identifies a case in which the nearest male relative (full brother) of a woman who dies is excluded, where the decedent woman is survived by a husband, mother, and half-brothers on her mother's side. In this case, the Qur'anic shares of the heirs add up to unity (1): the husband gets one-half (1/2), which is an increase from his usual share of one-quarter (1/4), because the decedent leaves no children; the mother gets one-sixth (1/6); and the half-brothers, as Uterine brothers, get one-third (1/3). See SCHACHT, *supra*, at 172. In this example, note that arguably the share of the mother should be increased to one-third (1/3), for the same reason the share of the father is increased — the decedent leaves no children. If that were to occur, then the shares would sum to more than one, and the principle of 'awl would be applied.

In any event, it is possible the sum total of the shares exceeds 1. If so, then using 'awl, the shares are reduced in proportion to the inheritance claims of the heirs. Professor Schacht gives the same hypothetical case as Professor Fysee above, i.e., a woman passes away, leaving behind her husband plus two full sisters. The husband is entitled to a one-half (1/2) share. The two consanguine sisters are entitled to split equally a share of two-thirds (2/3). The total is seven-sixths (7/6). Thus, 'awl must be used, whereby the shares of the husband and the sisters are reduced by sevenths. See SCHACHT, *supra*, at 172.

<sup>20</sup> FYZEE, *supra*, at 417. Professor Fysee points out in a footnote that in a case in which the husband is the sole surviving heir, and also is a Uterine Heir, then the husband would take the property of the wife in both capacities, i.e., as the sole surviving heir and as a Uterine Heir. See *id.*, fn. (yy) at 417.

<sup>21</sup> FYZEE, *supra*, at 418. The Qur'anic shares of the mother and daughter are explained in *id.* at 407-409.

Consequently, if the net estate in question were worth \$1 million, then before *radd* is applied, the mother would receive \$166,666.67 (one-sixth (1/6) of \$1 million), and the daughter would get \$500,000 (one-half (1/2) of one million). But, this distribution would leave \$333,333.33, with no Agnatic heir claimants. When *radd* is applied, the share of the mother rises to one-quarter (1/4), and that of the daughter to three-quarters (3/4), yielding them \$250,000 and \$750,000, respectively, and consuming the net estate.

Professor Fysee illustrates the second *radd* rule as follows:

As to [rule] (2),

husband	=	1/4
daughter	=	3/4 (1/2 as sharer, 1/4 by return)

Or

sister (f. [full] or c. [consanguine])	=	3/4 (1/2 as sharer, 1/4 by return).
--	---	-------------------------------------

In these cases, the husband or the wife does not take the return.

Similarly, husband	=	1/2
daughter's son	=	1/2

The daughter's son belongs to Class III, Uterine Heir, and yet prevents the husband from taking the return.<sup>22</sup>

To elaborate, focusing on the case of a surviving husband and daughter, i.e., the wife — mother is the decedent, the Qur'anic shares of the husband and daughter are one-quarter (1/4) and one-half (1/2), respectively.<sup>23</sup> If the second rule of *radd* did not exist, then the normal application of the *radd* principle would mean the following:

- (1) Convert the 1/4 and 1/2 Qur'anic shares to a common denominator, which would be 1/4 and 2/4.
- (2) Calculate the residue to be returned, which would be 1/4, because 1/4 goes to the husband, and 2/4 goes to the daughter (i.e., 1 - (1/4 + 2/4) = 1/4).
- (3) Add the numerators of the Qur'anic shares with common denominators, which is 3 (because 1 + 2 = 3).
- (4) Substitute the sum of the numerators, 3, in place of the existing common denominators, 4, and thereby adjust the Qur'anic from 1/4 to 1/3 for the husband, and from 2/4 to 2/3 for the daughter.

While the above steps are technically correct, they are conceptually misapplied in this case. They ignore operation of rule (2) of the *radd* principle. The daughter is a Qur'anic heir. This key fact means the husband cannot receive any of the residual amount. Rather, the entire residue, the full one-quarter (1/4) of the estate, is returned to the daughter. Thus, the daughter takes one-half (1/2) as a Qur'anic heir, and one-quarter (1/4) by return. Observe how rule (2) operates to protect the daughter, a female relative of the decedent.

<sup>22</sup> FYZEE, *supra*, at 418.

<sup>23</sup> See FYZEE, *supra*, at 405, 409.

Similarly, in the alternative case Professor Fyzee constructs, in which the husband is the decedent and the wife survives, her *fard* is one-quarter ( $\frac{1}{4}$ ) of the net estate (a fraction that assumes there are no surviving children).<sup>24</sup> Also surviving is a sister of the husband (either a full sister or a consanguine sister). Like the wife, she is a Qur'anic heir, and her share is one-half ( $\frac{1}{2}$ ) of the net estate.<sup>25</sup> As a Qur'anic heir, she negates the possibility of the surviving wife sharing in any residue. With the wife getting  $\frac{1}{4}$ , and sister getting one-half ( $\frac{1}{2}$ ), the residue is one-quarter ( $\frac{1}{4}$ ) of the net estate. This residue goes to the sister, who thereby garners a three-quarters ( $\frac{3}{4}$ ) share. Note how rule (2) in this instance operates to protect the female relatives (namely, the sister) of the decedent.

What about the case of a decedent wife-mother survived by her husband, where a daughter's son exists, which Professor Fyzee mentions? The wife has died leaving no children, but a grandson survives. (Presumably, the daughter passed away.) Here, the Qur'anic share of the husband rises from one-quarter ( $\frac{1}{4}$ ) to one-half ( $\frac{1}{2}$ ).<sup>26</sup> The grandson, i.e., the son of the daughter, is a Uterine heir, which is a key fact. As a Uterine heir, he negates the entitlement of the husband to any return under rule (2). Why is the share of the daughter's son one-half ( $\frac{1}{2}$ ) of the estate? Professor Fyzee answers:

The rules [concerning Uterine heirs] may be briefly stated as follows: (i) where there are no Koranic or Agnatic Heirs, the estate is divided among Uterine Heirs; (ii) where there is a husband or wife and Uterine Heirs, the surviving spouse will take his or her Koranic share, and the residue of the estate will be divided among Uterine Heirs.<sup>27</sup>

In this hypothetical example, rule (i) is inapplicable, as there is a Qur'anic heir, namely, the surviving husband. Rule (ii) is relevant. Under it, the husband takes his *fard*, which is one-half ( $\frac{1}{2}$ ) of the estate. The remainder is divided among the Uterine heirs, of which there is just one — the daughter's son. So, he gets the remaining one-half ( $\frac{1}{2}$ ).

Thus, for example, again assume a \$1 million net estate. The husband receives a one-quarter ( $\frac{1}{4}$ ) share in the \$1 million (\$250,000), and the daughter receives a one-half ( $\frac{1}{2}$ ) share (\$500,000), according to the Qur'an. That leaves a residue of one-quarter ( $\frac{1}{4}$ ) of the net estate (\$250,000). The wife cannot get the residue, as she is the decedent. But for the presence of the daughter's son, the husband would get it. Instead, the daughter's son is the ultimate beneficiary of the one-quarter ( $\frac{1}{4}$ ) share. Apparently, he receives it not directly, but through his mother (the daughter), who obtains the one-quarter ( $\frac{1}{4}$ ) by return, as Professor Fyzee states above. Note from this example how application of *radd* operates to protect relatives through the mother's side, i.e., women and their offspring.

Concerning the third rule of *radd*, Professor Fyzee explains:

<sup>24</sup> See FYZEE, *supra*, at 405.

<sup>25</sup> See FYZEE, *supra*, at 411.

<sup>26</sup> See FYZEE, *supra*, at 405.

<sup>27</sup> FYZEE, *supra*, at 429. For more information on how the residue would be distributed in the event of multiple Uterine heirs, see *id.* at 429-438.

As to [rule] (3), a Muslim dies leaving a widow as his sole heir. She takes  $\frac{1}{4}$  as her Koranic share and the residue  $\frac{3}{4}$  by return; the residue does not escheat to the State in India. *A fortiori*, the husband would be similarly entitled.<sup>28</sup>

Manifestly, the fact the widow, and not the Indian government, gets the residue, is of benefit to her. Finally, note again that the use of *radd* typically arises in the absence of Agnatic heirs. If Agnatic heirs are present, then following the distribution to Qur'anic heirs, the payout to the Agnatic heirs often consumes the net estate, leaving no residue.

## § 42.03 DISTRIBUTION OF NET ESTATE

### [A] Agnatic Heirs ('Aṣabāt)

The *Shari'a* contains clear rules about distribution to Agnatic heirs ('*aṣabāt*), the male ascendant and descendant relatives of a decedent. Three such rules are significant. First, Agnatic heirs receive a share of the net estate of a decedent only if there are no Qur'anic heirs, or if after assigning the prescribed shares to Qur'anic heirs, there is a residue (i.e., a remainder of the net estate). That is, Agnatic heirs are paid only if, after all claims are paid regarding (1) costs of the funeral, (2) debts of the decedent, (3) legacy, and (4) Qur'anic succession chain, there are still assets left over in the net estate.

Second, there is an order of priority among Agnatic heirs.<sup>29</sup> The order of right of Agnatic heirs to a portion of the net estate of a decedent, i.e., the sequence in which they would be paid part of any residue, is as follows:

- 1<sup>st</sup>: Son of the decedent and his male descendants (e.g., grandson or grandsons of the decedent).<sup>30</sup> In other words, male descendants of the decedent.
- 2<sup>nd</sup>: Father of the decedent and his male ascendants (e.g., grandfather and great grandfather of the decedent), provided that the father inherits before an uncle or uncles (i.e., a brother or brothers of the father) of the decedent. In other words, male ascendants of the decedent.
- 3<sup>rd</sup>: Other male descendants of the father of the decedent, including another son of the father (i.e., a brother or half-brother of the decedent), and his respective descendants (e.g., a nephew of the decedent).
- 4<sup>th</sup>: Still other male descendants of the father of the decedent, namely, a half brother of the father and his respective descendants.

<sup>28</sup> FYZEE, *supra*, at 418.

<sup>29</sup> FYZEE, *supra*, at 421-428; SCHACHT, *supra*, at 170-172.

<sup>30</sup> Like Family Law, Inheritance Law also contains conditions that must be realized in order for a legal right to ripen. Until the condition occurs, the legal right is in suspense, or abeyance ("*uṣūl*"). An example suggested is the share of a child in an inheritance from a deceased person, where the child is not yet born. That share is set aside until the child is born. See SCHACHT, *supra*, at 119.

5<sup>th</sup>: Descendants of the paternal grandfather of the decedent, specifically, the full son of the paternal grandfather and his male descendants. That is, male descendants of the grandfather of the decedent on the father's side (the father's father), such as a son of the grandfather who is not the father of the decedent (*i.e.*, an uncle of the decedent).

6<sup>th</sup>: Descendants of the paternal great grandfather of the decedent, specifically, the half-son of the paternal grandfather and his male descendants.

Interestingly, regarding this order of Agnatic succession, Professor Fyze says the son(s), grandson(s), father, and grandfather have "a limitless number of blood relations who are *all male agnates*," and "in reality, these are the *tribal heirs of pre-Islamic Arabia*."<sup>31</sup>

Third, there are specific rules about distribution to Agnatic heirs. The so-called "Rule of Al Jabari" summarizes these rules by stating that preference is given first to the order, second to the degree, and lastly to the strength of the blood tie.<sup>32</sup> Accordingly, a group of higher priority Agnatic heirs excludes one of lower priority, with one exception. The exception is that the brother(s) of the decedent is (are) not excluded by a grandfather. Also, among the same priority group, the nearest in degree excludes the more remote. For instance, a son is excluded the grandson of the decedent.<sup>33</sup>

In particular cases, there may be a concurrence of several shares, *i.e.*, entitlement through the status of being both a Qur'anic and Agnatic heir. Would that ever lead to the exclusion of male relatives near to the decedent? "No," says Professor Schacht, not with respect to the male descendants and ascendants of the decedent.<sup>34</sup> These heirs receive something, assuming there is something left in the net estate after funeral costs, debts, and any legacy. But, exclusion could happen to horizontal male relatives of the decedent — the full brother (or full brothers, if more than one).

Under *Hanafi* School doctrine, it is possible for the full brother (or brothers) of the decedent to receive nothing. Professor Schacht gives the following illustration of such a case.<sup>35</sup> Suppose a woman is the decedent, and leaves behind her husband, mother, and two half-brothers on her mother's side. She also leaves full brothers. The share her surviving husband takes is one-half ( $\frac{1}{2}$ ). Her surviving mother gets one-sixth ( $\frac{1}{6}$ ). The decedent's half-brothers on her mother's side, who are her Uterine brothers, get one-third ( $\frac{1}{3}$ ). The sum total is unity (1). There is nothing left in the net estate for the decedent's full brothers. However, the *Māliki* and *Shāfi'i* Schools modify this result. They ensure the full brothers get something. Under the

doctrines of those Schools, the full brothers divide the one-third share ( $\frac{1}{3}$ ) of the half brothers in equal portions.<sup>36</sup>

An obvious question about Agnatic succession order is: what about women? Simply put, they are not explicitly protected in this order. However, of critical importance is the legal fact the *Shari'a* expands the definition of "agnate" ("*asabah*") to include any female relative who is entitled to a share of one-half ( $\frac{1}{2}$ ) under the rules concerning Qur'anic heirs. Such a woman is deemed to become an agnate through her brother (or brothers). There are three such women: the daughter, full sister, and consanguine sister of the decedent. The daughter of the decedent is entitled to one-half ( $\frac{1}{2}$ ) of the portion to which her brother is entitled. In addition, the full sister or half-sister on the father's side is entitled to a share in the net estate as an Agnate. Here, then, is an example of where ignorance of Islamic Law of Succession can lead to an unfocused criticism that this Law is unfair to women. On the one hand, certain women, who are Qur'anic heirs and close relatives to the decedent, are protected by their being deemed to be Agnatic heirs. On the other hand, their share is 50 percent that of their counterpart male.

Suppose after payment of costs, debts, and legacy, and distribution to Qur'anic heirs and Agnatic heirs, there still is property in the net estate of the decedent. Then, under the principle of *rudd* (discussed below) the heirs in the Qur'anic line of succession have their shares increased in proportion so as to cover the net estate. Depending on the facts of the case, disbursements may be made to:

- (1) Cognates (*i.e.*, certain relatives of the decedent).
- (2) The patron of a client-decedent, where the decedent is a convert to Islam, chosen by the decedent upon conversion (*i.e.*, a client relationship).
- (3) An adopted relative, *i.e.*, a relative acknowledged as such by the decedent without evidence of consanguinity.
- (4) Beneficiaries of a legacy, without regard to the one-third cap.

If, after all such persons have received their appropriate payment there still is a positive balance in the net estate, the remainder goes to the public treasury.

## [B] Shares (*Farḍs*) to Qur'anic Heirs (*Aṣḥāb Al-Farā'id*)

There are 12 types of *farḍs*, in the sense of there being 12 persons related to a decedent identified by the Qur'an in *surah* 4, *ayat* 11-12 as recipients of a share in the net estate of the decedent:

- (1) Husband
- (2) Wife
- (3) Father
- (4) True Grandfather
- (5) Mother

<sup>31</sup> FYZEE, *supra*, at 420 (emphasis added).

<sup>32</sup> For a detailed explanation with illustrations of this rule, see FYZEE, *supra*, at 423-428.

<sup>33</sup> Bogue A. Ergene & Ali Berker, *Inheritance and Intergenerational Wealth Transmission in the Ottoman Kastaḥna: An Empirical Investigation*, 34 JOURNAL OF FAMILY HISTORY 27 (2009), posted at <http://jfh.sagepub.com/cgi/content/abstract/34/1/25>. [Hereinafter, Ergene & Berker.]

<sup>34</sup> See SCHACHT, *supra*, at 172.

<sup>35</sup> See SCHACHT, *supra*, at 172.

<sup>36</sup> See SCHACHT, *supra*, fn. 1 at 172.

- (6) True Grandmother
- (7) Daughter
- (8) Son's Daughter
- (9) Full Sister
- (10) Consanguine Sister
- (11) Uterine Brother
- (12) Uterine Sister

These persons are, of course, in relation to the testator — decedent. Of these 12 relations, 8 are women.<sup>37</sup> The obvious implication is the Qur'ān explicitly singles out them for inheritance protection. It should be remembered if there are no Agnates and the Qur'ānic heirs do not exhaust the estate, then the remainder of a net estate is proportionately distributed among Qur'ānic heirs under the principle of reversion or *radd*.<sup>38</sup>

Given that there are 12 Qur'ānic heirs, the distribution of a net estate to Qur'ānic heirs is calculated according to the following 12 rules, or sets of rules.<sup>39</sup> They are summarized in Table 42-1.<sup>40</sup> Note again these rules are from the *Hanafi* School. Observe that of the 12 relations, 5 of them are primary Qur'ānic heirs — the husband, wife, father, mother, and daughter of the decedent. Their shares cannot be excluded or reduced by the presence of other claimants. Further, of these 5 primary heirs, 3 of them are women, again bespeaking the extent of favor from the Qur'ān.

<sup>37</sup> See Fysee, *supra*, at 403.

<sup>38</sup> For example, if the deceased is survived by his mother and a daughter, their respective shares are one-sixth (1/6) and one-half (1/2) of the estate.

<sup>39</sup> Fysee, *supra*, at 404-413; Ergene & Berker, *supra*, at 27-28; Schacht, *supra*, at 170-173.

<sup>40</sup> This Table is an adapted, simplified version of the *Table of Koranic Heirs, Class I, Sunni* (Hanafi) Law in Fysee, *supra*, at 404-405.

Table 42-1:  
Summary of Qur'ānic Heirs and Shares (*Fard*s)

Heir (in Relation to Decedent)	Qur'ānic Share ( <i>Fard</i> s) Of Net Estate of Decedent		Relatives who Entirely Exclude Inheritance of Heir	Exceptions: Any Scenario Affecting Inheritance of Heir?	Way in Which Inheritance is Affected?
	Share If There is One Such Heir	Collective Share If There Are Two or More Such Heirs			
(1) Husband	1/4	Not possible	None, primary heir	Decedent leaves no Children, and no Grandchildren (through Son)	<i>Fard</i> increased to 1/2
(2) Wife	1/8	1/8	None, primary heir	Decedent leaves no Children, and no Grandchildren (through Son)	<i>Fard</i> increased to 1/4
(3) Father	1/6	Not possible	None, primary heir	Decedent leaves no Children, and no Grandchildren (through Son)	Becomes Agnatic Heir
(4) True Grandfather	1/6	Not possible	Father	Decedent leaves no Children, and no Grandchildren (through Son)	Becomes Agnatic Heir
(5) Mother	1/6	Not possible	None, primary heir	4 Scenarios — #1: Decedent leaves no Children	<i>Fard</i> increased to 1/2 in Scenarios #1, #2, and #3.

Heir (in Relation to Decedent)	Qur'anic Share (Fards) Of Net Estate of Decedent		Relatives who Entirely Exclude Inheritance of Heir	Exceptions: Any Scenario Affecting Inheritance of Heir?	Way in Which Inheritance is Affected?
	Share If There is One Such Heir	Collective Share If There Are Two or More Such Heirs			
				#2: Decedent leaves no Grandchildren (through Son) #3: Decedent leaves one Brother or Sister #4: Husband or Wife of the decedent co-exist with the Father of the decedent	In scenario #4, <i>fard</i> changed to 1/5 of residue after share of husband or wife is deducted.
(6) Grandmother (Maternal or Paternal)	1/6	Not possible	Mother	No	
(7) Daughter	1/2	1/3	None, primary heir	Decedent leaves a Son	Becomes Agnatic heir
(8) Son's Daughter (i.e., Granddaughter through Son)	1/2	2/3	Son, More than One Daughter	Decedent leaves one Daughter	<i>Fard</i> reduced to 1/6
(9) Full Sister	1/2	2/3	Son, Father, True Grandfather	Decedent leaves one or more Full Brothers	Becomes Agnatic heir

Heir (in Relation to Decedent)	Qur'anic Share (Fards) Of Net Estate of Decedent		Relatives who Entirely Exclude Inheritance of Heir	Exceptions: Any Scenario Affecting Inheritance of Heir?	Way in Which Inheritance is Affected?
	Share If There is One Such Heir	Collective Share If There Are Two or More Such Heirs			
(10) Consanguine Sister	1/2	2/3	Son, Father, True Grandfather, Full Brother, More than One Sister	2 Scenarios: #1: Decedent leaves one Full Sister #2: Decedent leaves Consanguine Brother	<i>Fard</i> reduced to 1/6 in Scenario #1  Becomes Agnatic heir in Scenario #2
(11) Uterine Brother	1/6	1/3	Child, Child of Son, Father, True Grandfather	No	
(12)	Uterine Sister	1/6	1/3	Child, Child of Son, Father, True Grandfather	No

#### (1) Husband:

The surviving spouse of the decedent invariably inherits a portion of the net estate. Accordingly, as a primary heir, no relation of the decedent ever can exclude the husband from his Qur'anic *fard*. Thus, the Qur'an never leaves a widower without a share. Professor Fyzee observes:

The surviving spouse *always* inherits, and the husband or wife is the only heir by affinity [as distinct from blood] which is made a primary heir by the Koran. In pre-Islamic times, they were entirely excluded.<sup>41</sup>

In particular, if the decedent has left a descendent (e.g., a son or daughter), then the husband receives one-quarter (1/4) of the net estate. Otherwise, if there is no such descendent, then the husband gets one-half (1/2) of the estate.

<sup>41</sup> FYZEE, *supra*, at 420 (emphasis original).

(2) **Wife:**

Here again, no relation of the decedent ever can exclude the wife from her Qur'anic *fard*. She is a primary heir. Thus, the Qur'an never leaves a widow without a share. Specifically, the wife inherits one-half ( $\frac{1}{2}$ ) of what the husband would receive under the same circumstances as above. Thus, if there are children, then the wife would receive  $\frac{1}{4}$  of the net estate, and would get  $\frac{1}{4}$  if there are no children.

The fact she gets half of what the husband would obtain is the subject of considerable criticism, namely, that Islamic Inheritance Law is unfair to women because of their one-half portion in relation to men. The point offered by Professor Fyzee — that in pre-Islamic times, widows had no entitlement — is sometimes made in defense of the rule. Yet, this defense falls into the trap of the Orientalist fallacy, and judging the rights of contemporary women according to a standard set before the advent of Islam on the Arabian Peninsula hardly is satisfying.

A better defense of the rule is that the accuracy of this criticism hinges on the details of a particular case. For example, if the wife of the decedent is the only surviving heir, then she receives the entirety of the net estate, just as the husband of the decedent would if he were the only surviving heir. In other words, where the only heir is the surviving spouse — wife or husband — that spouse is entitled to 100 percent of the net estate. As another example, suppose the wife survives, and there are children. The wife receives  $\frac{1}{4}$  of the net estate, but the remaining  $\frac{3}{4}$  of it goes to the children as Agnatic heirs. Thus, the rules of distribution to Qur'anic and Agnatic heirs are intertwined. They can operate to ensure a widow is not left with a tiny share to support multiple children.

(3) **Father:**

The father always inherits a fraction of the net estate. As a primary heir, no relation of the decedent ever can exclude the father from receiving his Qur'anic *fard*. There are four possible scenarios, with his share depending on which scenario is in play.

1<sup>st</sup>: *Decedent leaves a child or children —*

Assuming the decedent is survived by a child or children, then the fractional share of the father is one-sixth ( $\frac{1}{6}$ ) of the net estate. The remaining five-sixths ( $\frac{5}{6}$ ) goes to the children, with sons taking a share that is double that given to daughters.<sup>42</sup> The full amount of the net estate is thereby consumed.

2<sup>nd</sup>: *Decedent leaves no child —*

What happens if the decedent leaves no children (and there are no Agnatic descendants)? Then, the father is treated as an Agnatic heir.

3<sup>rd</sup>: *Only the father and mother survive the decedent —*

If both the father and mother of the decedent survive, then they consume

the full amount of the net estate. The mother receives a one-third ( $\frac{1}{3}$ ) share, and the father receives double that share, namely, two-thirds ( $\frac{2}{3}$ ).

4<sup>th</sup>: *Father and daughter survive the decedent —*

When the father and daughter of the decedent remain, they are entitled to the full amount of the net estate. The daughter receives a one-half ( $\frac{1}{2}$ ) share, as a Qur'anic heir. The father receives a one-sixth ( $\frac{1}{6}$ ) *fard*, as a Qur'anic heir, plus an additional one-third ( $\frac{1}{3}$ ) share as an Agnatic heir. Because he inherits simultaneously in two different capacities, as both a Qur'anic and Agnatic heir, the father gets the other one-half ( $\frac{1}{2}$ ) of the net estate. Note that a daughter (or a sister) cannot inherit in more than one capacity simultaneously: she takes either as a Qur'anic heir, or an Agnatic heir. Note also the same result would occur if the decedent left behind only his father and a daughter or daughters of his son.

Observe that the father of the decedent (or, indeed, any nearer male ascendant in the male line) excludes all female ascendants on the father's side from any inheritance.<sup>43</sup> This point is a manifestation of the general principle of the Islamic Law of Succession that a nearer relative excludes a more remote relative.

(4) **True (i.e., Full) Grandfather:**

An implication of the preceding rule is that whenever the decedent is survived by his or her father, the full father inherits a portion of the net estate, and thereby excludes the grandfather of the decedent. Suppose the father is dead, but the grandfather remains? In this case, the grandfather inherits as would the father: the grandfather receives the share the father would have, had the father been alive. In effect, the grandfather steps into the shoes of his son, who is the father of the decedent. Thus, for example, the grandfather receives one-sixth ( $\frac{1}{6}$ ) of the net estate if his son is not alive.

There is one exception to this rule, namely, if the mother of the decedent is alive. Rather, he is treated as co-existing with her, and in consequence does not reduce the share of the mother from one-third of the net estate to a lesser amount (namely, one-third ( $\frac{1}{3}$ ) of the residue left after the share of the husband or wife of the decedent is deducted).

(5) **Mother**

If the mother of the decedent survives her child, then she invariably inherits a portion of the net estate. The mother of the decedent is a primary heir under the Qur'an, hence no one can exclude her from an inheritance. There are six possible scenarios:

1<sup>st</sup>: *Decedent leaves a child or children —*

If the decedent passes away but leaves behind a child or children, then the *fard* of the mother is one-sixth ( $\frac{1}{6}$ ) of the net estate. The child or children consume the remaining five-sixths ( $\frac{5}{6}$ ) as Agnatic heirs. For example, if

<sup>42</sup> Unless the child has male descendants, a father also receives any residuum of the estate after distribution to the Qur'anic heirs.

<sup>43</sup> See SCHACHT, *supra*, at 173.

there are two sons and one daughter surviving, then the sons each would receive two-thirds ( $2/6$ , i.e.,  $1/3$ ) of the estate and the daughter would receive one-sixth ( $1/6$ ) of it.

2<sup>nd</sup>: *Decedent leaves no child —*

With no surviving children, the share of the mother rises to one-third ( $1/3$ ) of the net estate. Note that if the decedent is survived by a brother, then the share of the mother still is one-third ( $1/3$ ) of the net estate, which she takes as a Qur'anic heir, but the share of the brother, as an Agnatic heir, would be two-thirds ( $2/3$ ).

3<sup>rd</sup>: *Only the father and mother survive the decedent —*

This scenario is the same one as the third scenario discussed above in respect of the father. The mother takes a one-third ( $1/3$ ) share in the net estate, and the father a two-thirds ( $2/3$ ) share.

4<sup>th</sup>: *Mother and two or more brothers or sisters survive the decedent —*

Suppose not only the mother remains, but also siblings of the decedent survive. In particular, assume there are two or more brothers, or two or more sisters. In these cases, the share of the mother in the net estate is one-sixth ( $1/6$ ). The remaining five-sixths ( $5/6$ ) of the estate are divided among the brothers and sisters as Agnatic heirs, with brothers getting twice the portion as sisters.

5<sup>th</sup>: *Mother, one brother, and one sister survive the decedent —*

If the decedent is survived by his or her mother, and by one brother and one sister, then the share of the mother is one-third ( $1/3$ ). The remaining two-thirds ( $2/3$ ) of the net estate is divided among the brother and sister, with the brother getting an allotment double to that of the sister (i.e.,  $4/9$  and  $2/9$ , respectively).

6<sup>th</sup>: *Mother, father, and husband or wife survive the decedent —*

Suppose the decedent leaves behind both his or her mother and father, and his or her spouse. There are no surviving children of the decedent. Then, there are four possible permutations.

- First, consider the case in which the surviving spouse is a husband (i.e., the decedent is the wife), the husband obtains a one-half ( $1/2$ ) share of the net estate. The mother receives a one-sixth ( $1/6$ ), and the father receives double that, as an Agnatic heir, which is a one-third ( $1/3$ ) share.

This permutation is interesting because the decedent leaves behind no children, which (as per the second scenario above) would mean the mother ought to receive a one-third ( $1/3$ ) share. But, if she did, then her portion would be greater than that of the father. Professor Fysee explains:

The father is both a Koranic as well as a tribal heir; his rights have to be respected. He is also a male. Therefore, the Koranic ordinance of the  $1/2$  share is applied to the *residue*, after deducting the husband's share, and not to the whole estate.<sup>44</sup>

The residue, after deducting the husband's one-half ( $1/2$ ) share, is one-half ( $1/2$ ) of the net estate. Applying the mother's Qur'anic *fard* to that remaining one-half ( $1/2$ ) means multiplying one-half ( $1/2$ ) by one-third ( $1/3$ ), which yields one-sixth ( $1/6$ ) of the net estate. Notably, this resolution was decided upon by the second of the Four Rightly Guided Caliphs (*Rashidun*), Omar, and the *Shi'ites* have not accepted it.

- A second permutation also was resolved by the Caliph Omar. The case is where the surviving spouse is a wife (i.e., the decedent is the husband). The wife obtains a one-quarter ( $1/4$ ) share of the net estate, which is one-half ( $1/2$ ) that of the one-half ( $1/2$ ) share to which a surviving husband is entitled under the first permutation. The father again receives double of what the mother receives, namely, the father gets a one-half ( $1/2$ ) share as an Agnatic heir, and the mother gets a one-quarter ( $1/4$ ) share. The fraction of one-quarter ( $1/4$ ) is calculated using the same resolution as that in the first scenario: the residue of the net estate, after deducting the wife's portion, is three-quarters ( $3/4$ ); the mother's Qur'anic *fard* of one-third ( $1/3$ ) is applied to the residue of three-quarters ( $3/4$ ), and the result is one-quarter ( $1/4$ ) of the net estate.
- A third permutation is where the decedent is survived by her husband, mother, and father's father (i.e., her grandfather). The husband takes one-half ( $1/2$ ) of the net estate, and the mother one-third ( $1/3$ ) of it. The grandfather of the decedent takes one-sixth ( $1/6$ ) as an Agnatic heir, and his share does not cause any reduction in the share of the mother.
- The fourth permutation is similar to the third one, the only difference being that the husband, not the wife, is the decedent. That is, the decedent is survived by his wife, now a widow, and his mother and father's father (i.e., his grandfather). The widow receives a one-quarter ( $1/4$ ) share of the net estate, which is one-half of the allotment the widower received in the previous permutation. The mother still gets a one-third ( $1/3$ ) share, which remains unaffected by the presence of the grandfather. The grandfather gets a five-twelfths ( $5/12$ ) as an Agnatic heir, which is different and larger than in the previous permutation, apparently because he is an Agnatic ascendant on the male side.

In sum, in all instances the mother of a decedent has a right to no less than one-sixth ( $1/6$ ) of the net estate. That is her Qur'anic *fard* if the decedent leaves children (or, for that matter, if the son of the decedent leaves children), leaves two

<sup>44</sup> FYSEE, *supra*, at 420 (emphasis original).

or more brothers or sisters, or leaves behind a father and husband. Otherwise, where there are no children, or no more than one brother and one sister of the deceased, the mother is entitled to a one-third ( $\frac{1}{3}$ ) share of the net estate.<sup>45</sup> Depending on the exact circumstances, the mother gets one-sixth ( $\frac{1}{6}$ ) or one-third ( $\frac{1}{3}$ ), where she survives along with the father of the decedent and a surviving spouse. The bottom-line point is that the Qur'anic *fard* assists in protecting the mother of the decedent in her old age. Finally, note that the mother of the decedent excludes all female ascendants from any inheritance.<sup>46</sup> This point is another manifestation of the general principle of that a nearer relative excludes a more remote relative.

#### (6) True (i.e., Full) Grandmother:

If the grandmother of the decedent remains, then whether she inherits a portion of the net estate depends on the circumstances. If the mother of the decedent survives, then the maternal true grandmother does not receive anything, i.e., the mother excludes her from an inheritance. Likewise, if the father of the decedent survives, then he excludes the paternal true grandmother. Otherwise, the Qur'anic *fard* of the grandmother is one-sixth ( $\frac{1}{6}$ ) of the net estate.

#### (7) Daughter:

The daughter always inherits a fraction of the net estate. No relation of the decedent ever can exclude the daughter from receiving her Qur'anic *fard*. She not only is a primary heir under the Qur'an, but also she can inherit as an Agnatic heir, depending on circumstances. That is, a single daughter (or multiple daughters) inherits as a Qur'anic heir, assuming she (or they) does not have a son or sons. If the daughter (or daughters) survive and have one or more sons, then she (or they) inherits as an Agnatic heir.

The general rule is a single daughter takes one-half ( $\frac{1}{2}$ ) of a net estate. If there are two or more daughters, then they take two-thirds ( $\frac{2}{3}$ ). Thus, suppose a decedent is survived by his father, mother, and two daughters. Their respective Qur'anic *fards* are one-sixth ( $\frac{1}{6}$ ), one-sixth ( $\frac{1}{6}$ ), and two-thirds ( $\frac{2}{3}$ ), which the daughters split, one-third ( $\frac{1}{3}$ ) each.

What happens if a decedent leaves not only a daughter (or daughters), but also a son (or sons)? Then the daughter (or daughters) is treated as an Agnatic heir. For instance, if there are two sons and three daughters, then the sons would get a four-sevenths share ( $\frac{4}{7}$ ) of the net estate, splitting that fraction between them, two-sevenths ( $\frac{2}{7}$ ) each. The daughters would receive the remaining three-sevenths ( $\frac{3}{7}$ ), and split it equally, one-seventh ( $\frac{1}{7}$ ) each. This example again illustrates how women, while protected, receive one-half ( $\frac{1}{2}$ ) the allotment of men.

Another possibility is where a decedent is survived by one daughter and one sister. The daughter has precedence. That is, the daughter would get her Qur'anic *fard* of one-half ( $\frac{1}{2}$ ) of the net estate. The sister would take the other one-half ( $\frac{1}{2}$ )

<sup>45</sup> See Chaudhry, *supra*, at 533.

<sup>46</sup> See Schacht, *supra*, at 173.

as an Agnatic heir. If two daughters and one sister survive, then the daughters would take two-thirds ( $\frac{2}{3}$ ), one-third ( $\frac{1}{3}$ ) each. The sister would get the remaining one-half ( $\frac{1}{2}$ ).<sup>47</sup>

Still another variation is where the daughter and father of the decedent survive. The daughter again receives her Qur'anic *fard* of one-half ( $\frac{1}{2}$ ) of the net estate. The father receives one-sixth ( $\frac{1}{6}$ ) as a Qur'anic heir, plus one-third ( $\frac{1}{3}$ ) as an Agnatic heir, for a total of one-half ( $\frac{1}{2}$ ) of the net estate. In this instance, the woman receives the same portion as the man, though they are at unequal levels, i.e., a daughter *vis-à-vis* a father.

Note the basic implication of the rule for one or more daughters: far from being left out of an inheritance, the Qur'an entitles them to a sizeable chunk, one-half ( $\frac{1}{2}$ ) for a single daughter and two-thirds ( $\frac{2}{3}$ ) for two or more daughters. But, these allotments are affected if the daughter or daughters have to compete with a male sibling or siblings.

#### (8) Son's daughter (Granddaughter):

The daughter of the son of the decedent, i.e., the granddaughter, is entitled to a portion of the net estate. However, that entitlement only materializes if there is no daughter in the picture.

For example, the son's daughter receives a one-half ( $\frac{1}{2}$ ) share in the net estate, assuming there is no surviving son or daughter of the decedent. If the son of the decedent has more than one daughter surviving, i.e., multiple granddaughters, and the son himself is dead, and the decedent has no surviving daughter, then the granddaughters receive a two-thirds ( $\frac{2}{3}$ ) share in the net estate. In effect, a granddaughter steps into the shoes of a daughter, as the Qur'anic *fard* is one-half ( $\frac{1}{2}$ ), and two or more granddaughters step into the shoes of two or more daughters, as the portion they split equally is two-thirds ( $\frac{2}{3}$ ). Manifestly, these fractional shares serve to protect female children and grandchildren.<sup>48</sup>

To illustrate how the Qur'anic *fard* rule operates for a daughter and granddaughter, consider the following cases:

- Decedent is survived by father, mother, and 3 son's daughters (3 granddaughters):

The father receives his one-sixth ( $\frac{1}{6}$ ) Qur'anic *fard*, and the mother gets her one-sixth Qur'anic *fard*. The remainder of the net estate is two-thirds ( $\frac{2}{3}$ ), all of which goes to the three granddaughters, who split it equally, two-ninths

<sup>47</sup> Put differently, suppose the decedent is survived only by his or her daughter and his or her sister. Then, the aunt (the sister of the decedent) and her niece (the daughter of the decedent) consume the net estate. The niece gets her Qur'anic share of one-half ( $\frac{1}{2}$ ), and the aunt getting the other one-half ( $\frac{1}{2}$ ) share as an Agnatic heir. If there are two or more daughters, i.e., two or more nieces, then they take a two-thirds ( $\frac{2}{3}$ ) share as Qur'anic heirs, split equally among them, and the remainder goes to the sister. Note that if the decedent leaves more than one granddaughter, then none of them has a right to the share of the aunt in the net estate. See FYSEE, *supra*, at 408-409.

<sup>48</sup> Indeed, even great granddaughters are protected. If the decedent is survived by a son's daughter (granddaughter) and son's son's daughter (great granddaughter), then the former gets her one-half ( $\frac{1}{2}$ ) Qur'anic share, and the latter gets a one-sixth ( $\frac{1}{6}$ ) share. See FYSEE, *supra*, at 409 (Case 560).

( $\frac{3}{4}$ )  
wo

sis  
fa

(2/3) each. In this instance, the father does not get any portion as an Agnatic heir.

- Decedent is survived by father, mother, daughter, and 4 son's daughters (4 granddaughters):

Once again, the father and mother each take a one-sixth ( $\frac{1}{6}$ ) share of the net estate as Qur'anic heirs. The daughter receives her Qur'anic *fard* of one-half ( $\frac{1}{2}$ ). The father, mother, and daughter thus consume five-sixths ( $\frac{5}{6}$ ) of the estate, and the remaining one-sixth ( $\frac{1}{6}$ ) is split equally among the 4 granddaughters, with each one taking a one-twenty-fourth ( $\frac{1}{24}$ ) share.

- Decedent is survived by father, mother, 2 son's daughters (2 granddaughters), and a son's son's daughter (great granddaughter)

Here, too, the father and mother each take a one-sixth ( $\frac{1}{6}$ ) share of the net estate as Qur'anic heirs. The remaining two-thirds ( $\frac{2}{3}$ ) is consumed entirely by the 2 granddaughters. Interestingly, two granddaughters exclude the great granddaughter. However, if there is only one grand daughter, then she would not exclude the great granddaughters.

- Decedent is survived by father, mother, son's daughter (granddaughter), and son's son's daughter (great grand daughter)

The father and mother each take a one-sixth ( $\frac{1}{6}$ ) share of the net estate as Qur'anic heirs. The remaining two-thirds ( $\frac{2}{3}$ ) is consumed by the grand daughter and great granddaughter, with their respective Qur'anic *fards* being one-half ( $\frac{1}{2}$ ) and one-sixth ( $\frac{1}{6}$ ). The granddaughter and great granddaughter are treated like a case in which the decedent is survived by two or more daughters. As explained earlier, two or more daughters are entitled to a two-thirds ( $\frac{2}{3}$ ) share. However, there is a slight difference: two or more daughters would split the two-thirds ( $\frac{2}{3}$ ) equally, whereas a grand daughter takes a larger portion ( $\frac{1}{2}$ ) than the great granddaughter ( $\frac{1}{6}$ ).

A generic inference from these illustrations is that the Qur'anic *fards* help protect female descendants of the decedent, but the precise extent to which the do so depends on their distance in the lineage, and whether competing claimants exist.

#### (9) Full Sister:

Because a full sister of the decedent is not a primary Qur'anic heir, the presence of certain surviving relatives excludes the *fard* otherwise due to her. Specifically, if the son, son's son (i.e., grandson), father, or true grandfather of a decedent survives, then the sister of the decedent does not receive a share in the net estate. Professor Fyzee observes:

[M]ale agnates in the descending and ascending lines exclude her [the full sister of the decedent] as a collateral. With the full brother, and, in certain cases, with the daughter, she becomes a residuary.<sup>49</sup>

<sup>49</sup> FYZEE, *supra*, at 411. Likewise, a half-sister on the father's side receives the same share as a full sister, but both are excluded from inheritance in the presence of a son, a son's son, father, or grandfather of the decedent.

Put differently, before a full sibling can inherit, the decedent should not be survived by any male children or grandchildren, or by his or her father or grandfather. The son(s), grandson(s), father, and grandfather of the decedent are preferred over the siblings of that decedent. This exclusionary rule, in the sense of certain male relatives excluding a sister from inheritance, is one reason for the criticism Islamic Inheritance Law sometimes works to the disadvantage of women.

Assuming none of the excluding relatives exists, the normal Qur'anic share of a full sister is one-half ( $\frac{1}{2}$ ) of the net estate. If there are two or more full sisters, then the share is two-thirds ( $\frac{2}{3}$ ). Note that these fractions are the same as those for one or more daughters. These figures assume the decedent is not survived by any brother.

For example, if the decedent is the wife, and is survived by her husband and sister, then the husband takes a one-half ( $\frac{1}{2}$ ) share in the net estate, and the sister gets the other one-half share, both as Qur'anic heirs. Thereby, they would consume the estate. If the decedent is survived by her husband and two sisters, then the Qur'anic shares are one-half ( $\frac{1}{2}$ ) for the husband and two-thirds ( $\frac{2}{3}$ ) for the two sisters. Of course, these shares sum to greater than unity (1). Hence, the principle of *'aul* must be applied. Here, the result would be to reduce the husband's share to  $\frac{3}{7}$ , and the sisters' share to  $\frac{4}{7}$ .

What happens to the inheritance of a sister if the decedent is survived not only by her, but also by one or more brothers? Simply put, the sister of the decedent inherits one-half ( $\frac{1}{2}$ ) of what is allotted to the brother of the decedent. That is, if there is a full brother, then the sister inherits one-half ( $\frac{1}{2}$ ) of what is allotted to their brother.<sup>50</sup> If there are multiple sisters, then they would split equally the share apportioned to them. The fact that in the presence of a full brother of a decedent the sister of that decedent receives a share that is one-half ( $\frac{1}{2}$ ) the portion of the brother is another basis for the above-mentioned criticism about the effect of Islamic Inheritance Law on women.

As another possible case, suppose the decedent is survived by one full sister and one daughter. The daughter takes precedence over the sister. She inherits as a Qur'anic heir, and the sister as an Agnatic heir. Yet, each gets a one-half ( $\frac{1}{2}$ ) portion of the net estate. If there are two surviving daughters, and one full sister, then the two daughters would take two-thirds ( $\frac{2}{3}$ ) of the net estate, and the sister's Agnatic share would be reduced to one-third ( $\frac{1}{3}$ ). If there is one daughter, and two sisters, then the daughter again gets a one-half ( $\frac{1}{2}$ ) Qur'anic *fard*. The two sisters split the Agnatic portion of one-half ( $\frac{1}{2}$ ), thereby getting one-quarter ( $\frac{1}{4}$ ) each.

#### (10) Consanguine Sister:

The inheritance share of a consanguine sister (e.g., one who shares one parent with the decedent) is excluded by a full brother or two full sisters of the decedent. It also is excluded by the same four relatives that exclude the share of a full sister, namely, the son, grandson, father, or true grandfather of the decedent. Assuming none of the excluding relatives exists, the normal Qur'anic share of a consanguine sister is one-half ( $\frac{1}{2}$ ) of the net estate. If there are two or more consanguine sisters,

<sup>50</sup> FYZEE, *supra*, at 411.

then the share is two-thirds ( $\frac{2}{3}$ ). Note these fractions are the same as those for one or more daughters, and for one or more full sisters. Setting aside the possibility of exclusion, the fractions provide some protection to full and consanguine sisters of a decedent.

Suppose, then, the decedent is survived by one full sister and one consanguine sister. The Qur'anic *fard* of the full sister is one-half ( $\frac{1}{2}$ ) of the net estate, and that of the consanguine sister is one-sixth ( $\frac{1}{6}$ ). The latter figure means the two Qur'anic heirs consume two-thirds ( $\frac{2}{3}$ ) of the net estate, which also is the case if the decedent were survived by a son's daughter (granddaughter) and son's son's daughter (great granddaughter).<sup>51</sup> Note, however, two full sisters exclude the consanguine sister from any inheritance.

#### (11) Uterine Brother:

A uterine brother of a decedent is not a primary heir. The adjective "uterine" connotes the brother and decedent were born to the same mother, but had different fathers. This situation can arise when one father dies or is divorced from the mother. A uterine brother is excluded from an inheritance if the decedent leaves behind a child (male or female) or a child of a son (i.e., a grandson or granddaughter through a son). Likewise, a uterine brother is excluded if a decedent leaves behind his or her father, or true grandfather. Yet, neither the full brother nor full sister of the decedent excludes the uterine brother.

Assuming none of these excluding persons exists, then the uterine brother takes a one-sixth ( $\frac{1}{6}$ ) Qur'anic share. Note that this is the same fraction as that for a uterine sister, suggesting a modicum of gender neutrality. Suppose there are two uterine brothers, or a uterine brother and a uterine sister. Then, they split a one-third ( $\frac{1}{3}$ ) *fard*. They do so equally, further suggesting some equality between females and males in this context.

#### (12) Uterine Sister:

The Qur'anic inheritance share rules for a uterine sister closely resemble those for a uterine brother. A uterine sister of a decedent is not a primary heir. The adjective "uterine" connotes the sister and decedent were born to the same mother, but had different fathers. This situation can arise when one father dies or is divorced from the mother. Like a uterine brother, a uterine sister is excluded from an inheritance if the decedent leaves behind a child (male or female) or a child of a son (i.e., a grandson or granddaughter through a son). Also like a uterine brother, a uterine sister is excluded if the decedent leaves behind his or her father, or true grandfather. Yet, neither the full brother nor full sister of the decedent excludes a uterine sister, just as they do not exclude a uterine brother.

Assuming no excluding persons exists, then the uterine sister takes a one-sixth ( $\frac{1}{6}$ ) Qur'anic share. That is the same fraction as for a uterine sister. If there are two uterine sisters (just like two uterine brothers), or a uterine brother and a

<sup>51</sup> In contrast, suppose the decedent leaves behind one full sister and one consanguine sister, but also is survived by a full brother and his consanguine sister. Then, all of them inherit as Agnatic heirs, and the brother gets a share that is twice that of the sisters. See FYZES, *supra*, at 411 Case 3.

uterine sister, then they split a one-third ( $\frac{1}{3}$ ) *fard*, and they do so equally. To sum up in different terms, a maternal half brother (i.e., a uterine brother) and maternal half sister (i.e., a uterine sister) each receive one-sixth ( $\frac{1}{6}$ ). Two or more maternal half-siblings share thirds among them, however, they are then excluded by descendants and male ascendants.

By way of illustration, suppose a decedent is survived by two full sisters and two uterine sisters. The two full sisters are entitled to their *fard* of two-thirds ( $\frac{2}{3}$ ) of the net estate, which they split equally, one-third ( $\frac{1}{3}$ ) each. The two uterine sisters get their share of one-third ( $\frac{1}{3}$ ), which they divide equally between them, one-sixth ( $\frac{1}{6}$ ) each. Note the same result occurs if the decedent is survived by two consanguine, rather than two full, sisters. And, the same result occurs if the decedent leaves behind two uterine brothers instead of two uterine sisters. Thus, the presence of full or consanguine sisters does not affect the share owed to uterine sisters or uterine brothers.

As another case, suppose a decedent has a full sister, two consanguine sisters, plus one uterine brother and one uterine sister. The full sister gets her Qur'anic *fard* of one-half ( $\frac{1}{2}$ ) of the net estate. The two consanguine sisters get their share of one-sixth ( $\frac{1}{6}$ ), which they split equally, one-twelfth ( $\frac{1}{12}$ ) each. The uterine brother and uterine sister get their one-third ( $\frac{1}{3}$ ) *fard*, which they divide equally, one-sixth ( $\frac{1}{6}$ ) each. Here, too, the presence of full and consanguine sisters does not affect the share for uterine siblings.

Would the Qur'anic *fard* to a uterine sibling of the decedent be affected if the decedent pre-deceases his or her mother? The answer is "no." Suppose the decedent leaves behind two full sisters, a consanguine sister, a uterine sister or brother — plus the mother of the decedent. The two full sisters get their share of two-thirds ( $\frac{2}{3}$ ), splitting it one-third ( $\frac{1}{3}$ ) each. The two full sisters exclude the consanguine sister from getting any share. The uterine sister or brother receives the usual share of one-sixth ( $\frac{1}{6}$ ). And, the mother of the decedent gets her normal share of one-sixth ( $\frac{1}{6}$ ) of the net estate.

This last example nicely illustrates the fundamental point that Qur'anic *fards* indeed are fixed shares. After all, they are set by God (Allāh). It also illustrates the practical point that in any Islamic Inheritance Law problem, not only is it necessary at the outset to identify classes of heirs (Qur'anic, Agnatic, and Uterine), but also it is essential to see if there are any excluding persons. In the above case, the two full sisters entirely exclude the consanguine sister.

Evidently, the above-listed rules are complex. Consequently, calculations of inheritance under the *Shari'a* can be complex. Therefore, it is common practice to use inheritance calculators to divide the estate.<sup>52</sup> That is, as there are inheritance lawyers in the United States, there are *Shari'a* lawyers who specialize in understanding, interpreting, and applying these 12 rules to actual cases.

<sup>52</sup> There also are a variety of software programs, many of which are web-based, available to calculate inheritance shares under the *Shari'a*. To try out various scenarios, see Islamic Inheritance Programs, available at [www.islamicsoftware.org/irth/irth.html](http://www.islamicsoftware.org/irth/irth.html).

### [C] Examples

The examples below illustrate the application of some of the above-mentioned Islamic rules of succession, particularly the distribution of Qur'anic shares (*fard*s). The examples assume funeral costs and debts of the decedent have been paid, and thus focus on distribution of a net, not gross, estate. The examples also assume issues of valuation of assets in the net estate are resolved. That is, all assets have a market value that can be expressed as a sum in U.S. dollars. Finally, the first three examples also assume it is not necessary to apply the principles of *'awl* (increase) or *radd* (return), because the Qur'anic shares either sum to unity (1), or there is a sole Agnatic heir entitled to the residue.

#### Example #1:<sup>53</sup>

Ayesha dies, leaving no children or Agnatic grandchildren. Her only survivors are her husband, and one full sister. Both of them are Qur'anic heirs, with her husband being a primary heir. In the distribution of Ayesha's net estate, which is worth \$1,000,000, is as follows:

- Husband takes a one-half ( $\frac{1}{2}$ ), worth \$500,000. Normally, his *fard* is one-quarter ( $\frac{1}{4}$ ), but because Ayesha leaves no children or Agnatic grandchildren, the figure is raised to one-half ( $\frac{1}{2}$ ).
- Full sister also takes a one-half ( $\frac{1}{2}$ ) share, worth \$500,000. That is the normal *fard* for one full sister.

The Qur'anic shares aggregate to unity (1). Observe that in this Example, the net estate of the decedent is divided equally between a man and a woman.

#### Example #2:<sup>54</sup>

Fatima dies leaving only her husband, one daughter, and one full brother. In parceling out her \$1,000,000 net estate, her husband and daughter are primary Qur'anic heirs, entitled to shares of one-quarter ( $\frac{1}{4}$ ) and one-half ( $\frac{1}{2}$ ), respectively. The full brother (the uncle of the daughter) is the only Agnatic heir, who may receive a distribution of any remainder. Therefore:

- Husband,  $\frac{1}{4}$  Qur'anic share = \$250,000
- Daughter,  $\frac{1}{2}$  Qur'anic share = \$500,000
- Full Brother, as the only Agnatic heir, the full amount of the residue = \$250,000

Here, while the Qur'anic shares do not sum up to unity (1), there is an Agnatic heir who is entitled to the residue. Note that in this case, a woman receives twice the share of both her father and her uncle.

#### Example #3:<sup>55</sup>

A decedent, Ali, passes away, leaving behind his wife and mother, plus one male child. The net estate is worth \$1,000,000. The wife and mother are primary Qur'anic heirs, with *fard*s of  $\frac{1}{4}$  and  $\frac{1}{6}$ , respectively. The son is an Agnatic heir. Accordingly, the \$1 million is divided as follows:

- Wife,  $\frac{1}{4}$  Qur'anic share = \$125,000
- Mother,  $\frac{1}{6}$  Qur'anic share = \$166,667.67
- Son, as the only Agnatic heir, the full amount of the residue = \$708,333.33

Conceptually, the net estate is divided into 24 parts, with 3 parts ( $\frac{3}{24}$ , or  $\frac{1}{8}$ ) distributed to the wife, 4 parts ( $\frac{4}{24}$ , or  $\frac{1}{6}$ ) to the mother, and 17 parts ( $\frac{17}{24}$ ) to the son.

A variation on this example is if Ali passes away leaving behind a wife, one son, and one daughter (but no mother). The daughter is a primary Qur'anic heir entitled to a one-half ( $\frac{1}{2}$ ) share. But, the existence of the son makes her an Agnatic heir, and she receives one-half ( $\frac{1}{2}$ ) of what the son gets. Consequently, the net estate is divided as follows:

- Wife,  $\frac{1}{4}$  Qur'anic share = \$125,000
- Son, as Agnatic heir = \$583,333
- Daughter, who becomes an Agnatic heir with a claim equal to one-half ( $\frac{1}{2}$ ) that of the son = \$291,667

Observe the calculation of the amounts owed to the son and daughter is made by subtracting the wife's entitlement of \$125,000 from the amount of the net estate, \$1 million, which leaves \$875,000. This balance then is divided between the son and daughter so that the son receives double the amount of the daughter. The result is, as under the first scenario, that the estate is divided into 24 parts, with  $\frac{3}{24}$  (i.e.,  $\frac{1}{8}$ ) going to the mother,  $\frac{14}{24}$  to the son, and  $\frac{7}{24}$  to the daughter.

In each scenario, while the Qur'anic *fard*s do not sum up to unity (1), there is an Agnatic heir entitled to the residue. Also, both scenarios illustrate the utility of converting the Qur'anic shares to a common denominator that reflects the number of claimants.

#### Example #4:<sup>56</sup>

Mariam dies. She is survived by her husband, father, and mother, plus one daughter. All four of these relatives are primary Qur'anic heirs. The net estate Mariam leaves is worth \$1,000,000. The distribution based on the normal Qur'anic *fard*s would be one-quarter ( $\frac{1}{4}$ ) for the husband, one-sixth ( $\frac{1}{6}$ ) for the father, one-sixth ( $\frac{1}{6}$ ) for the mother, and one-half ( $\frac{1}{2}$ ) for the daughter. However, if distribution occurred on this basis, then more than the net estate would be consumed: The shares sum to unity (1). Thus:

- Husband,  $\frac{1}{4}$  Qur'anic share = \$250,000
- Father,  $\frac{1}{6}$  Qur'anic share = \$166,667.67
- Mother,  $\frac{1}{6}$  Qur'anic share = \$166,667.67

<sup>53</sup> See Chaudhry, *supra*, at 535.

<sup>54</sup> See Chaudhry, *supra*, at 536.

<sup>55</sup> See Chaudhry, *supra*, at 535.

<sup>56</sup> See Chaudhry, *supra*, at 536.

• Daughter, $\frac{1}{2}$ Qur'anic share	=	\$500,000
		<hr/>
		\$1,083,335.34

In other words, the Qur'anic shares sum to a figure greater than unity (1), thus more than \$1 million is accounted for.

Consequently, it is necessary to apply the principle of *'aue*l (increase). Recall that this principle requires setting the normal Qur'anic *fard*s to a common denominator, increasing the denominator in those *fard*s to make it equal to the sum of the numerators (that results with a common denominator), and retaining the individual numerators (that results with a common denominator). Thus:

*Step 1 —*

The respective Qur'anic shares of the husband, father, mother, and daughter are  $\frac{1}{4}$ ,  $\frac{1}{6}$ ,  $\frac{1}{6}$ , and  $\frac{1}{2}$ . The lowest common denominator among these fractions is 12.

*Step 2 —*

The Qur'anic shares are translated into a common denominator and become  $\frac{3}{12}$ ,  $\frac{2}{12}$ ,  $\frac{2}{12}$ , and  $\frac{6}{12}$  of the husband, father, mother, and daughter, respectively.

*Step 3 —*

The sum of the numerators of the translated shares is 13 ( $3+2+2+6$ ).

*Step 4 —*

The sum of the numerators of the translated shares, 13, becomes the denominator of the translated shares, but the numerators remain the same. Consequently, the shares of the husband, father, mother, and daughter, respectively, become  $\frac{3}{13}$ ,  $\frac{2}{13}$ ,  $\frac{2}{13}$ , and  $\frac{6}{13}$ .

*Step 5 —*

Using the readjusted shares, the distribution is made as follows:

• Husband, share decreased from $\frac{1}{4}$ ( $\frac{3}{12}$ ) to $\frac{3}{13}$	=	\$230,769.23
• Father, share decreased from $\frac{1}{6}$ ( $\frac{2}{12}$ ) to $\frac{2}{13}$	=	\$153,846.15
• Mother, share decreased from $\frac{1}{6}$ ( $\frac{2}{12}$ ) to $\frac{2}{13}$	=	\$153,846.15
• Daughter, share decreased from $\frac{1}{2}$ ( $\frac{6}{12}$ ) to $\frac{6}{13}$	=	\$461,538.46

The total funds distributed are worth \$1 million, the amount of the net estate. Here, a woman receives twice the share of her father, i.e., the husband of the decedent and father of the daughter gets \$230,769.23, but the daughter gets \$461,538.46. And, a woman receives thrice the share of her grandfather, i.e., the father of the decedent and grandfather of the daughter get \$153,846.15, yet the daughter gets three times that figure.

**Example #5:<sup>57</sup>**

Omar dies leaving his wife and one daughter, no male Agnate heirs, and a net estate valued at \$1 million. The wife and daughter are primary Qur'anic heirs, and their respective *fard*s are one-eighth ( $\frac{1}{8}$ ) and one-half ( $\frac{1}{2}$ ). If the distribution were made based on these shares, it would be as follows:

• Wife, $\frac{1}{8}$ Qur'anic share	=	\$125,000
• Daughter, $\frac{1}{2}$ Qur'anic share	=	\$500,000
		<hr/>
		\$625,000

Manifestly, the entirety of the net estate is not consumed. There are no Agnatic heirs to take up the residue of \$375,000. Therefore, it is necessary to apply the principle of *radd* (return) and thereby increase the allotments to the wife and daughter.

In particular, the first rule of *radd* is relevant, namely, that the residue returns in proportion to the Qur'anic shares. Applying this rule means converting the usual Qur'anic shares to a common denominator, computing the sum of the numerators (that results with a common denominator), using that sum of the numerators as the denominator of the shares, and retaining the same numerators of the shares (that results with a common denominator). Accordingly:

*Step 1 —*

The respective Qur'anic shares of the wife and daughter are  $\frac{1}{8}$  and  $\frac{1}{2}$ . The lowest common denominator among these fractions is 16.

*Step 2 —*

The Qur'anic shares are translated into a common denominator and become  $\frac{2}{16}$  and  $\frac{8}{16}$  of the wife and daughter, respectively.

*Step 3 —*

The sum of the numerators of the translated shares is 10 ( $2+8$ ).

*Step 4 —*

The sum of the numerators of the translated shares, 10, becomes the denominator of the translated shares, but the numerators remain the same. Consequently, the shares of the wife and daughter respectively, become  $\frac{2}{10}$  and  $\frac{8}{10}$ .

<sup>57</sup> See Chaudhry, *supra*, at 536.

## Step 5 —

Using the readjusted shares, the distribution is made as follows:

- Wife, share increased from 1/8 = \$200,000  
(2/16) to 2/10
- Daughter, share increased from 1/2 = \$800,000  
(8/16) to 8/10

\$1,000,000

The above calculation is technically correct. However, it does not produce the right answer in this particular case.

That is because the calculation ignores a key point: the second rule of *radd* is relevant. Under the second rule, the wife of the decedent is not entitled to a return if there is a Qur'anic heir present. There is such an heir, the daughter. (The third rule of *radd* is inapplicable, given the presence of a surviving heir, the daughter.) Therefore, the entire amount of the residue, \$375,000, which would result from a distribution based on usual Qur'anic *fards*, goes to the daughter. The correct answer is thus:

- Wife, 1/4 Qur'anic share = \$125,000
- Daughter, 1/2 Qur'anic share = \$875,000  
(\$500,000), plus 1/4 share as residue  
(\$375,000)

\$1,000,000

In this example, females take the entire net estate, and applying *radd* clearly assists the daughter of the decedent.

## § 42.04 DISINHERITANCE

Islamic Law of Succession contains rules not only on inheritance entitlements and shares, but also on disinheritance. Among them, three are particularly salient. First, it is not possible for a husband to disinherit his wife by repudiating the marriage contract on his deathbed. Suppose a husband, near death, were to repudiate the marriage. The *Shari'a* protects the ex-wife by ensuring her right to inherit continues through the *'idda* (the mandatory waiting period for re-marriage after the termination of a marriage). In other words, if the husband dies during the *'idda*, then the wife still has a right to inherit. Of course, he can disinherit her through divorce while he is in a normal, healthy state, as is possible under American law. Under the *Shari'a*, the converse also is true.<sup>59</sup> Suppose a wife causes the dissolution of the marriage during an illness that results in her death. Suppose further that she dies during the *'idda*. Then, the husband has the inheritance right, which she cannot affect despite a near-death effort to do so.

The second disinheritance rule actually is a cluster of circumstances under which disinheritance occurs. It is possible to be disinherited by any of the following conditions:

<sup>59</sup> See SCHACHT, *supra*, at 168.

- (1) Difference of religion, *i.e.*, the prospective heir is not Muslim. This condition is particularly grievous, and the subject of criticism. Essentially, it means that a prospective non-Muslim heir lacks inheritance rights in respect of the net estate of a decedent Muslim, for no reason other than his or her religious affiliation. The heinous effects of this rule include discouraging inter-faith marriages, and drumming up communal resentment by overtly discriminating against non-Muslims.
- (2) Difference of domicile, *i.e.*, the prospective heir lives in a non-Muslim country. This condition also is unfortunate, particularly in the modern age of globalization. It discourages Muslims from exercising opportunities to migrate to places of their choice, based on factors such as educational and job opportunities, without regard to religion.
- (3) Causing the death of the decedent. This condition is sensible enough. It is founded on a general principle not only of Islamic Law, but also in any system of justice: one should not profit from one's wrongful act. However, no one who otherwise would be an heir is excluded merely because of his relationship to a wrongdoer. Thus, for instance, the sons of a person who killed the decedent would not be excluded.<sup>60</sup> In effect, the sin of the wrongdoer is not visited on his or her offspring.
- (4) Being a slave. This condition is of little contemporary relevance.

These conditions, while not necessarily exhaustive, are the most common grounds for disinheritance (particularly the first three).

The third rule concerns the relative timing of death of an heir and the testator-decedent. If a prospective heir dies before the decedent, and thereby becomes what is called a "pre-deceased heir," then the inheritance right dies to. The descendants of the pre-deceased heir do not inherit the claim.

## § 42.05 SHĪTE VARIATIONS

In many legal subject areas, *Sunni* and *Shīte* rules tend to be similar, if not the same. However, to some degree, *Sunni* Inheritance Law differs from that of Twelver *Shīte* Inheritance Law. The variances are necessitated by the different doctrines of the *Sunni* and *Shīte* communities. *Sunnis* take a literal view of *Surah Al-Nisa'* (*Surah* 4). *Shītes* do not take as restrictive a view as *Sunnis* of the key verses, *ayat* 11-12, of this *surah*. Instead, *Shītes* have developed general rules, which they say underlie the principles laid out in the Qur'an. The biggest difference between the *Sunni* and the *Shīte* approach is that in the latter instance, the principle of Agnatic heirs is destroyed, and Cognates and Agnates are placed on the same footing as each other.<sup>60</sup>

Consequently, in the *Shīte* Law of Succession, heirs appear in three categories:

<sup>59</sup> See SCHACHT, *supra*, at 173.

<sup>60</sup> See MUHAMMAD MUSTAFA KHAN, *ISLAMIC LAW OF INHERITANCE: A NEW APPROACH*, 143 (New Delhi, India: Kitab Bhavan, 1989). [Hereinafter, MUHAMMAD KHAN]. Blood relations include: parents and lineal descendants; ascendants and siblings and their children; uncles and aunts and their descendants.

- (1) The first category includes the parents and lineal descendants of the decedent.
- (2) The second includes descendants and siblings and siblings' issue in relation to the decedent.
- (3) The third category includes uncles and aunts, and their descendants, of the decedent.<sup>61</sup>

Manifestly, these heirs encompass the father, mother, daughter, daughter's descendants, sisters and their descendants, and brothers by the same mother and their descendants. Each of these heirs has a set share. All other heirs are residuary.<sup>62</sup>

If there are survivors in the first category, then they share the net estate to the exclusion of those in the second and third categories.<sup>63</sup> Likewise, survivors in the second category preempt the takers in the third category. Within each category, the closer relative excludes the more distant one.<sup>64</sup>

Also, significantly, within each category, there is little or no distinction between males and females.<sup>65</sup> Further, the survival of an agnatic descendant or ancestor has no effect on the prescribed share of a named taker. Thus, in the *Shī'a* system, females may end up inheriting a greater amount than their male counterparts.<sup>66</sup> For example, suppose a decedent is survived by a paternal grandfather, his wife, and his daughter. *Sunni* Law of Succession divides the net estate as follows:

- Three-eighths (3/8) to the grandfather
- One-eighth (1/8) to the wife
- One-half (1/2) to the daughter.

But, under the *Shī'a* system, the wife and daughter, as the closer relatives to the decedent, would share the net estate equally, one-half (1/2) each, to the exclusion of the grandfather.<sup>67</sup>

Notably, in June 2004, Iran passed an amendment to its inheritance laws. Under the change, a wife of a decedent may receive the entirety of the net estate. Before the change, a wife could receive as a maximum only her share, one-quarter (1/4), as provided in the Qur'an when her husband has no other children or grandchildren, with the rest going to the state treasury.

## § 42.06 WOMEN AND INHERITANCE

### [A] Differential Treatment in Two of Four Basic Classes

A recurrent criticism of the *Shari'a* is encapsulated in the phrase "women inherit half as much as men." As seen through the above examples, the criticism Islamic Inheritance Law operates in an unjust manner toward women is itself unfair. It is too broad an opprobrium, and based on misunderstanding if not prejudice. A more accurate, lawyer-like assessment is captured by the simple phrase with which lawyers are familiar: "it depends." Sometimes women get half as much as men. But, this inequality does not occur in every case. In any event, there is a colorable conventional Islamic legal defense for differential treatment in certain instances.

Whether women are discriminated against *vis-à-vis* men in a *Shari'a* inheritance case depends on the facts of that case. Often overlooked by critics is a key issue: which relatives survive the decedent? There are four basic classes of relations to a decedent:

- Children
- Siblings
- Parents
- Grandparents

When women and men survive and are in the same class, women inherit equally with men of that class in two of the four classes. The cases in which a woman inherits unequally, taking one-half (1/2) the share of her male counterpart, are that of a decedent survived by a son and daughter, and a decedent survived by a full brother and sister.<sup>68</sup> In respect of the other two basic classes of relations to a decedent, women get as much as men. The father and mother of a decedent, who obviously are in the same class of relatives, take an equal Qur'anic *farḍ*: one-sixth (1/6). Likewise, the grandfather and grandmother of the decedent take a one-sixth (1/6) share.

To be sure, in practice, the scenarios for inheritance cases are infinite. In each scenario, the fair treatment of women also depends on honest, transparent dealings by all parties, especially persons in possession of assets in the net estate, accountants responsible for asset valuation, and lawyers charged with the task of calculating shares. It is all too easy in poor, unsophisticated, male-dominated environments to ride roughshod over the inheritance rights of women, who may not even be aware of their rights.

This risk is particularly acute in contemporary times. From an historical vantage point, the rights of Muslim women under the Islamic Law of Succession foreshadow the rights of modern non-Muslim western women to inherit property or demand support from the net estate of a decedent.<sup>69</sup> Non-Muslim western

<sup>68</sup> See Chaudhry, *supra*, at 536.

<sup>69</sup> See Radford, *supra*, at 187.

- (1) The first category includes the parents and lineal descendants of the decedent.
- (2) The second includes descendants and siblings and siblings' issue in relation to the decedent.
- (3) The third category includes uncles and aunts, and their descendants, of the decedent.<sup>61</sup>

Manifestly, these heirs encompass the father, mother, daughter, daughter's descendants, sisters and their descendants, and brothers by the same mother and their descendants. Each of these heirs has a set share. All other heirs are residuary.<sup>62</sup>

If there are survivors in the first category, then they share the net estate to the exclusion of those in the second and third categories.<sup>63</sup> Likewise, survivors in the second category preempt the takers in the third category. Within each category, the closer relative excludes the more distant one.<sup>64</sup>

Also, significantly, within each category, there is little or no distinction between males and females.<sup>65</sup> Further, the survival of an agnatic descendant or ancestor has no effect on the prescribed share of a named taker. Thus, in the *Shī'a* system, females may end up inheriting a greater amount than their male counterparts.<sup>66</sup> For example, suppose a decedent is survived by a paternal grandfather, his wife, and his daughter. *Sunni* Law of Succession divides the net estate as follows:

- Three-eighths (3/8) to the grandfather
- One-eighth (1/8) to the wife
- One-half (1/2) to the daughter.

But, under the *Shī'a* system, the wife and daughter, as the closer relatives to the decedent, would share the net estate equally, one-half (1/2) each, to the exclusion of the grandfather.<sup>67</sup>

Notably, in June 2004, Iran passed an amendment to its inheritance laws. Under the change, a wife of a decedent may receive the entirety of the net estate. Before the change, a wife could receive as a maximum only her share, one-quarter (1/4), as provided in the *Qur'ān* when her husband has no other children or grandchildren, with the rest going to the state treasury.

## § 42.06 WOMEN AND INHERITANCE

### [A] Differential Treatment in Two of Four Basic Classes

A recurrent criticism of the *Shari'a* is encapsulated in the phrase "women inherit half as much as men." As seen through the above examples, the criticism Islamic Inheritance Law operates in an unjust manner toward women is itself unfair. It is too broad an opprobrium, and based on misunderstanding if not prejudice. A more accurate, lawyer-like assessment is captured by the simple phrase with which lawyers are familiar: "it depends." Sometimes women get half as much as men. But, this inequality does not occur in every case. In any event, there is a colorable conventional Islamic legal defense for differential treatment in certain instances.

Whether women are discriminated against *vis-à-vis* men in a *Shari'a* inheritance case depends on the facts of that case. Often overlooked by critics is a key issue: which relatives survive the decedent? There are four basic classes of relations to a decedent:

- Children
- Siblings
- Parents
- Grandparents

When women and men survive and are in the same class, women inherit equally with men of that class in two of the four classes. The cases in which a woman inherits unequally, taking one-half (1/2) the share of her male counterpart, are that of a decedent survived by a son and daughter, and a decedent survived by a full brother and sister.<sup>68</sup> In respect of the other two basic classes of relations to a decedent, women get as much as men. The father and mother of a decedent, who obviously are in the same class of relatives, take an equal *Qur'ānic farḍ*: one-sixth (1/6). Likewise, the grandfather and grandmother of the decedent take a one-sixth (1/6) share.

To be sure, in practice, the scenarios for inheritance cases are infinite. In each scenario, the fair treatment of women also depends on honest, transparent dealings by all parties, especially persons in possession of assets in the net estate, accountants responsible for asset valuation, and lawyers charged with the task of calculating shares. It is all too easy in poor, unsophisticated, male-dominated environments to ride roughshod over the inheritance rights of women, who may not even be aware of their rights.

This risk is particularly acute in contemporary times. From an historical vantage point, the rights of Muslim women under the Islamic Law of Succession foreshadow the rights of modern non-Muslim western women to inherit property or demand support from the net estate of a decedent.<sup>69</sup> Non-Muslim western

<sup>68</sup> See Chaudhry, *supra*, at 536.

<sup>69</sup> See Radford, *supra*, at 187.

cultures that, in the past, abused the inheritance rights of women now are coming closer to achieving gender equality in their legal systems. In contrast, Islamic law is encountering a resurgence of religious extremism. Consequently, a challenge for Muslim women today is to ensure that the equality granted to them by Islam, and their inheritance rights under the Law of Succession, are manifest in the law and practice of Islamic countries.<sup>70</sup>

### [B] Three-Pronged Conventional Defense

What is the conventional defense, from an Islamic legal perspective, of differential and lesser inheritance distribution to a woman? The defense is three-pronged. First, the differences that arise are in cases where the role of a man is that of a bread-winner, provider, and protector. Traditionally, men are given duties not just in regard to their own families, but also towards society.<sup>71</sup> In contrast, women are excused from duties such as service to a holy war (*jihad*), maintenance and support of relations, payment of expiatory fines, and the like.<sup>72</sup> Thus, the principle of double share, whereby a man receives twice the inheritance share of a woman, is based on based on an equitable consideration, rather than gender discrimination. That is, the inequality of the women in inheritance is matched by the corresponding increase in the economic burden of men.<sup>73</sup> In turn, the two sexes are said to be equal in regards to their overall economic position.

Perhaps this rationale ought to be dubbed "pragmatic," as well as "equitable." More generally, it is argued that this kind of balance, or imbalance, is necessary. One of the most fundamental pillars of Islamic legal theory is that the *Shari'a* serve the well-being of humanity,<sup>74</sup> or what in Catholic Christianity is stylized as the "common good." Distributing inheritance shares differentially to reflect the dissimilar but complimentary responsibilities serves the common good. Yet, what about a modern society, in which women are the primary bread-winners in some families? (This inquiry begs another question: are not women playing that role in certain traditional societies?) Arguably, rules on succession that favor men may not, or should not be, applied.

The second prong of the traditional defense is the repetition of the quotidian contention that although God (Allāh) creates men and women equally, their substantively equal importance does not substantiate perfectly identical treatment in all respects.<sup>75</sup> An Islamic society is a "dual-sex" one. Each gender maintains certain distinct but inter-dependent duties and responsibilities in order to yield a harmonious family and society.<sup>76</sup> Unfortunately, the second sentence of *surah 2, ayah 228* sometimes is cited to support the proposition that endemic to Islam is the superiority of men to women. This passage says:

<sup>70</sup> See Radford, *supra*, at 187.

<sup>71</sup> See MOHAMMED KHAN, *supra*, at 143.

<sup>72</sup> See MOHAMMED KHAN, *supra*, at 143.

<sup>73</sup> See MOHAMMED KHAN, *supra*, at 143.

<sup>74</sup> See Chaudhry, *supra*, at 539.

<sup>75</sup> See Chaudhry, *supra*, at 539.

<sup>76</sup> See Chaudhry, *supra*, at 541.

... Wives have [rights] similar to their [obligations], according to what is recognized to be fair, and *husbands have a degree [of right] over them: [both should remember that] God is almighty and wise.*<sup>77</sup>

Yet, that proposition is too broad an inference to draw from this verse. The verse must be set in the context of other provisions of the *Shari'a*. The number of verses in the Qur'an stressing the equality of women in creation and spirituality is not inconsiderable.<sup>78</sup>

Moreover, the second sentence of *surah 2, ayah 228* must be appreciated in the context of the practical realities of daily life. It is argued that men are allotted the economic burden of supporting the family, and by extension society. By doing so, says Professor Chaudhry, Islamic law is not "legislating the superiority of men over women, or some inherent excellence of men."<sup>79</sup> Rather, she states, "the distribution of authority and responsibility is a dimension of the division of labor," not an affirmation of gender discrimination.<sup>80</sup> In sum, distribution of inheritance shares in a two-to-one ratio, which is limited to two classes of relatives of a decedent, reflects the role of the two sexes in Muslim society, and is designed to ensure fairness.<sup>81</sup>

#### § 43.01 UNDERLYING THEORY

##### [A] Prohibitions Matter More Than Sanctions

If there are three unflattering impressions — or, perhaps more accurately, incomplete or wrong-headed impressions — about Islam common in the non-Muslim World, then surely cruel punishments for criminal law violators is one of them, the other two being the oppressively conservative dress imposed on women, and the association with terrorism. The first topic is fueled by a considerable degree of mainstream media attention in the United States and Western Europe on episodic cases in which the harshest of punishments are applied by a rather zealous lot. Never mind that the number of such instances is fairly small, although tragically when they arise women are often the ones hideously punished. Never mind, also, that these instances tend to occur in a handful of countries — most notoriously, Iran, Saudi Arabia, Northern Nigeria, Somalia, and Sudan — not in most of the other 52 countries that make up the 57-nation Organization of Islamic Conference (OIC).<sup>1</sup> Never mind, too, that little if any media coverage is given to the many instances in which a convict is pardoned by an authority or forgiven by a victim.

The stereotype, then, is that Islamic Criminal Law, traditionally known as “Penal Law,” is a system long on revenge and short on compassion. As a matter of terminology, which provides some insight, it is important to pause and consider the rubric “Penal Law.” The analogous term in Arabic is “*uqūbāt*.” This refers to both kinds of wrongs — crimes, and civil wrongs, or torts. That is, “*uqūbāt*” covers what American Law distinguishes as Criminal Law and Tort Law. Criminal Law proper, and Tort Law, both in the American sense, fall under the rubric of Islamic Penal Law, or “*uqūbāt*.”

Essential to deconstructing any stereotype is to separate fact from fiction, which in respect of the *Sharīʿa* requires appreciation of the theory underlying Islamic Penal Law. It is impossible to deny that by modern-day standards — those standards being set not only in secular legal systems like American and Civil Law, but also through International Human Rights Law — the conventional punishments in the *Sharīʿa* are harsh, even inhumane. Yet, from an Islamic perspective, those punishments do not bespeak a concept of a God that emphasizes brutal judgment over loving mercy. In Criminal Law, as in other fields, the *Sharīʿa* contains moral norms for behavior. Once again, religion and law are inextricably intertwined. Qurʾānic sanctions for criminal transgressions are based on a moral

construct. Yes, they are punitive, or in American terms the justifications for them are revenge, specific deterrence, and general deterrence. (Rehabilitation is a minor or non-existent motive.) But, there is a fundamental distinction in Islamic Criminal Law between claims of Allāh and claims of man. The harshest of punishments may be imposed only for a transgression against Allāh. This fact does not exclude private claims, for which the punishments involve discretion and lesser severity.

The theoretical point, then, is that from the vantage of Islamic Criminal Law, what is even more important than the sanction for a transgression is the prohibition itself that has been violated. What is prohibited is prohibited because Allāh, speaking through the Archangels to the Prophet Muhammad, has revealed His Will. Consequently, the punishment is important for the officials of an Islamic state, especially if they are maintain their self-proclaimed legitimacy as faithful adherents to the *Sharīʿa*, and for the victim and his or her kin if the transgression calls for retaliatory justice. What matters is trying to improve one’s understanding and ability to follow the Will of God.

The elevation in the Islamic Penal Law to primacy of the prohibition contrasts with American legal thought, where a great deal of emphasis is placed on (and whole courses developed around the subject of) remedies. The adage “a right without a remedy is no right at all” is well known to lawyers trained in American jurisprudence. Perhaps that adage makes better sense in a system of law that makes no pretense to being sacred. The violations in that system are not against God, but against the state (or, the state acting on behalf of the people). Hence, it is the state that does the punishing. To the Islamic legal mind, the offense taken by the state, the victim, or the victim’s kin is secondary. What matters is failure to adhere to the Will of God on an important obligation.

##### [B] “Missing” Features

The Qurʾān is quite specific in the area of Criminal Law. It contains many technical, almost “black letter,” legal statements about what a Muslim should or should not do. Moreover, unlike Contract Law and Family Law, the Qurʾān also attaches legal consequences for failure to conform to the prescribed behavior. That is, on many acts (or omissions) covered by the Penal Law, the Qurʾān spells out the legal consequences.

At the same time, the Qurʾān is not a Penal Code. There are dimensions of criminal jurisprudence familiar to American Common Law, which are not found in the Qurʾān. For example, the *Qurʾān* does not discuss:

- Attempts.
- Complicity.
- Mitigating circumstances (though necessity, or *ḍarūrāh*, is a defense).

Moreover, the theory underlying responsibility for criminal behavior, and for guilt, is not well-developed in the Qurʾān itself.

These points are not intended as criticisms of the Qurʾān. Rather, they are reminders of what the Qurʾān is and is not. It is the word of Allāh. It is not a Model

<sup>1</sup> See Organization of The Islamic Conference, [www.oic-oci.org](http://www.oic-oci.org).

Penal Code produced by a group of law professors, nor is it a criminal law debated and enacted by a modern, democratically elected, legislature.

### [C] Proportionality and Orientalist Fallacy

At the risk of committing the Orientalist Fallacy, an historical point is worth adding about the theory of Islamic Criminal Law. Qur'anic legislation on penal matters — as a Muslim would view the rules and punishments — are an improvement from pre-Islamic Arabian times. In those times, under the customary law of the Bedouins, private vengeance and retaliation would spiral into blood feuds between tribes, and gambling, drinking, taking interest (*ribā*), and lax sexual behavior — resulting in weak marital ties, with a foggy distinction between marriage and concubinage — were accepted. In contrast, the Qur'ān clearly lays out a rule of proportionality.

Consider *surah* 2, *ayat* 178-179 of the Qur'ān, followed by the explanation of the translator, Professor Abdel Haleem:

<sup>178</sup>You who believe, *fair retribution* is prescribed for you in cases of murder: *the free man for the free man, the slave for the slave, the female for the female*. [Translator's footnote omitted, and reproduced below.] But if the guilty is pardoned by his aggrieved brother, this shall be adhered to fairly, and the culprit shall pay what is due in a good way. This is an alleviation from your Lord and an act of mercy. If anyone then exceeds these limits, grievous suffering awaits him. <sup>179</sup>Fair retribution saves life for you, people of understanding, so that you may guard yourselves against what is wrong.<sup>2</sup>

This passage is nothing short of a key limitation on criminal liability. It bars excessive punishment and over-retaliation. In the lingo of American Law, it is the Proportionality Principle. The translator elaborates:

*Before Islam*, the Arabs did not observe equality in retribution, but a stronger tribe would demand more, e.g., a man for a woman, a free man for a slave, or several men for one man, likewise for financial compensation. The intention of this verse is to insist on equality.<sup>3</sup>

In brief, the Qur'ān specifically, as well as other sources of the *Shari'a*, do more than demarcate morally acceptable behavior (e.g., no gambling, no drinking, no *ribā*, and no unchaste relations). They also circumscribe, via the Proportionality (or Fair Retribution) Principle, the punishments that can be imposed for transgressions, and thus are a check against arbitrary and capricious punishment, not to mention blood feuds.

There is an irony in the above-quoted elaboration. On the one hand, some Muslim observers criticize non-Muslim scholars for committing the Orientalist fallacy. As the word of God (Allāh), the Qur'ān does not need extrinsic justifications, such as to

<sup>2</sup> THE QUR'AN — *A New Translation* by M.A.S. Abdel Haleem 2:178-179, at 20 (Oxford, England: Oxford University Press, 2004) (emphasis added). [Hereinafter, QUR'AN.]

<sup>3</sup> QUR'AN, *supra*, fn. a at 20.

cultural, economic, legal, political, or social circumstances before Islam. On the other hand, to rationalize certain passages in the Qur'ān, some Muslim interpreters indeed fall into the same trap — perhaps, depending on the scholar, deliberately so.

Note another feature of the elaboration. The italicized first sentence of *surah* 2, *ayah* 178, read in isolation, appears to condone eye-for-an-eye justice, the kind of justice that Mahatma Gandhi warned makes the whole world blind. The justification amounts to saying “as brutal as some aspects of Islamic Penal Law may be, they are better than the *status quo ante*, i.e., the state of affairs on the Arabian Peninsula as of 609 A.D., the year before the Prophet Muhammad began receiving revelations.” This reasoning is easily rebutted with a simple, irrefutable point: “that was roughly 1,500 years ago.”

In the intervening centuries, remarkable progress has been made in virtually all other legal systems as to the theory and practice of Criminal Law. Justifying a Penal Law prohibition or punishment in the *Shari'a* using such an outdated historical point of reference is little else than a rationalization for *stasis*. As long as that reference point is used, how can the *Shari'a* import modern developments — including standards about cruel and unusual punishment — without losing its central features? This question is a central challenge facing not just Islamic Penal Law, but the entire *Shari'a*.

## § 43.02 FOUNDATIONAL DISTINCTION

### [A] Claims of God (*Haqq Allāh*) and *Mālikī* School Treatment of Rebellion (*Baghī*)

Table 43-1 summarizes key concepts, offenses, and sanctions in Islamic Penal Law. All aspects of Islamic Criminal Law are based, directly or indirectly, on a fundamental threshold distinction. That distinction is between:

#### (1) *Haqq Allāh* —

A crime against religion, i.e., against Islam, which is to say an act that is forbidden, or sanctioned by a punishment set forth in the Qur'ān.

#### (2) *Haqq Ādami* —

A private claim of vengeance.

The first category concerns acts forbidden because God said so. The words of *Allāh* as revealed in the Qur'ān spell out the transgression. In almost all such instances, God also prescribes in the Qur'ān a specific punishment for committing the transgression. Therefore, the first category is known as “*haqq Allāh*,” which means “claims of God.” (“*Haqq*” is the Arabic term for “claim,” hence a claim of *Allāh* is “*haqq Allāh*.”)

The associated punishments are known as “*ḥadd*” punishments, with the term “*ḥadd*” meaning “limit.” The “limit” is one set by God in the Qur'ān, that is, the transgression that He admonished Muslims not to commit. A Muslim who nevertheless does so has crossed a limit set by the Almighty. On that account alone, a transgressor is deserving of the severest of sanctions — the *ḥadd* punishments,

Penal Code produced by a group of law professors, nor is it a criminal law debated and enacted by a modern, democratically elected, legislature.

### [C] Proportionality and Orientalist Fallacy

At the risk of committing the Orientalist Fallacy, an historical point is worth adding about the theory of Islamic Criminal Law. Qur'anic legislation on penal matters — as a Muslim would view the rules and punishments — are an improvement from pre-Islamic Arabian times. In those times, under the customary law of the Bedouins, private vengeance and retaliation would spiral into blood feuds between tribes, and gambling, drinking, taking interest (*ribā*), and lax sexual behavior — resulting in weak marital ties, with a foggy distinction between marriage and concubinage — were accepted. In contrast, the Qur'ān clearly lays out a rule of proportionality.

Consider *surah* 2, *ayat* 178-179 of the Qur'ān, followed by the explanation of the translator, Professor Abdel Haleem:

<sup>178</sup>You who believe, *fair retribution* is prescribed for you in cases of murder: *the free man for the free man, the slave for the slave, the female for the female*. [Translator's footnote omitted, and reproduced below.] But if the guilty is pardoned by his aggrieved brother, this shall be adhered to fairly, and the culprit shall pay what is due in a good way. This is an alleviation from your Lord and an act of mercy. If anyone then exceeds these limits, grievous suffering awaits him. <sup>179</sup>Fair retribution saves life for you, people of understanding, so that you may guard yourselves against what is wrong.<sup>2</sup>

This passage is nothing short of a key limitation on criminal liability. It bars excessive punishment and over-retaliation. In the lingo of American Law, it is the Proportionality Principle. The translator elaborates:

*Before Islam*, the Arabs did not observe equality in retribution, but a stronger tribe would demand more, e.g., a man for a woman, a free man for a slave, or several men for one man, likewise for financial compensation. The intention of this verse is to insist on equality.<sup>3</sup>

In brief, the Qur'ān specifically, as well as other sources of the *Shari'a*, do more than demarcate morally acceptable behavior (e.g., no gambling, no drinking, no *ribā*, and no unchaste relations). They also circumscribe, via the Proportionality (or Fair Retribution) Principle, the punishments that can be imposed for transgressions, and thus are a check against arbitrary and capricious punishment, not to mention blood feuds.

There is an irony in the above-quoted elaboration. On the one hand, some Muslim observers criticize non-Muslim scholars for committing the Orientalist fallacy. As the word of God (Allāh), the Qur'ān does not need extrinsic justifications, such as to

As long as that reference point is used, how can the *Shari'a* import modern developments — including standards about cruel and unusual punishment — without losing its central features? This question is a central challenge facing not just Islamic Penal Law, but the entire *Shari'a*.

## § 43.02 FOUNDATIONAL DISTINCTION

### [A] Claims of God (*Ḥaqq Allāh*) and *Mālikī* School Treatment of Rebellion (*Baghī*)

Table 43-1 summarizes key concepts, offenses, and sanctions in Islamic Penal Law. All aspects of Islamic Criminal Law are based, directly or indirectly, on a fundamental threshold distinction. That distinction is between:

#### (1) *Ḥaqq Allāh* —

A crime against religion, i.e., against Islam, which is to say an act that is forbidden, or sanctioned by a punishment set forth in the Qur'ān.

#### (2) *Ḥaqq Ādami* —

A private claim of vengeance.

The first category concerns acts forbidden because God said so. The words of *Allāh* as revealed in the Qur'ān spell out the transgression. In almost all such instances, God also prescribes in the Qur'ān a specific punishment for committing the transgression. Therefore, the first category is known as “*ḥaqq Allāh*,” which means “claims of God.” (“*Ḥaqq*” is the Arabic term for “claim,” hence a claim of *Allāh* is “*ḥaqq Allāh*.”)

The associated punishments are known as “*ḥadd*” punishments, with the term “*ḥadd*” meaning “limit.” The “limit” is one set by God in the Qur'ān, that is, the transgression that He admonished Muslims not to commit. A Muslim who nevertheless does so has crossed a limit set by the Almighty. On that account alone, a transgressor is deserving of the severest of sanctions — the *ḥadd* punishments,

which for the most part also are in the Qur'an. The superlative adjective "severest" is not hyperbole. The *ḥadd* punishments include death or the amputation of a limb, depending on the crime, both of which are irreversible. They also include flogging (i.e., whipping), which (depending on how the method of administration) can be permanently scarring.

Significantly, three of the Four Schools agree on the offenses in the categories.<sup>4</sup> That is, the *Hanafi*, *Shāfi'i*, and *Hanbali* Schools agree there are six *ḥaqq Allāh* crimes, and agree on the identity of those six offenses. Note that some *Hanafi* School texts identify drunkenness (*sukr*) that is caused by drinking any intoxicant as a separate offense from drinking itself (*shurb al khamr*).

The *Māliki* School agrees as to the standard six offenses. But, the *Māliki* School adds a seventh offense, which is rebellion against a government, or a transgression by one group of a population against another (which covers civil war) — in Arabic, "*baghi*."<sup>5</sup> Indeed, the *Māliki* School lists *baghi* as the first of the *ḥaqq Allāh* crimes, on the theory that it is the most grievous, and potentially causes the greatest loss of life and property. In some *Shāfi'i* School texts, the word "*ḥadd*" is used in relation to *baghi*. However, that School does not explicitly list rebellion or civil insurrection as a *ḥaqq Allāh* crime, but rather treats it as a distinct matter. Likewise, the *Hanafi* and *Hanbali* Schools devote separate attention to *baghi*. All three of the Schools — *Hanafi*, *Shāfi'i*, and *Hanbali* Schools — discuss the kind of war to launch against rebels, or "*bughāt*."<sup>6</sup>

Conceptually, it makes sense to treat *baghi* as a separate topic from the conventionally-listed six *ḥaqq Allāh* crimes.<sup>7</sup> Those crimes each can (and typically are) committed by one wrongdoer (or two in the case of unlawful sexual intercourse aside from rape). Rebellion or civil unrest — while often lead by a ringleader or a small group of confederates — is the action of a collective group. That is, *baghi* involves a sizeable group going against the government, or one significant group fighting against another one.

<sup>4</sup> See MUHAMMAD 'ATA ALSID SIDAHMAD, THE HUBUD — THE HUBUD ARE THE SEVEN SPECIFIC CRIMES IN ISLAMIC CRIMINAL LAW AND THEIR MANDATORY PUNISHMENTS ch. 2, 36-40 (Petaling Jaya, Malaysia: Muhammad 'Ata Al Sid Sid Ahmad 1996). (Hereinafter, SIDAHMAD.)

Interestingly, one renowned scholar, Ibn Hazm al Zahiri, includes the standard six crimes, plus a seventh — not *baghi* (rebellion), but *ghad al 'ariyyah*, which refers to malicious denial of borrowed property — as a *ḥaqq Allāh* offense subject to a *ḥadd* punishment. He does so in his treatise, *Al Muhalla'* (volume 8, p. 358), because:

Ibn Hazm relied on a version of the famous *ḥadith* about a woman from Bani Makhzum [one of the three leading clans of the Quraish tribe during the time of the Caliph Abū Bakr (632-634 A.D.), along with the Bani Abdullāh and Bani Hashim, and the clan that was primarily responsible for matters of war] whose hand was cut in the time of the Prophet. In that version, it was narrated that she was in the habit of borrowing valuables and intentionally denying having them. It was due to this that her hand was cut.

SIDAHMAD, ch. 2 fn. 60 at 40. However, none of the Four Schools includes *ghad al 'ariyyah* as a *ḥaqq Allāh* crime. See *id.* at 40. An alternative explanation is that the case referenced in the above quote essentially is one of theft (*sarika*), which already is listed as a *ḥaqq Allāh* offense.

<sup>5</sup> See SIDAHMAD, *supra*, ch. 2 at 37.

<sup>6</sup> See SIDAHMAD, *supra*, ch. 2 at 40.

<sup>7</sup> See SIDAHMAD, *supra*, ch. 2 at 39.

Table 43-1:  
Summary of Key Concepts, Offenses, and Sanctions in Islamic Criminal Law

Transgression	<i>Ḥaqq Allāh</i> Offense?  <i>Ḥadd</i> Punishment?	<i>Ḥaqq Ādami</i> Offense i.e., <i>Jinayā</i> (Tort)?  <i>Ta'zīr</i> (Discretionary) Punishment?
Unlawful Sexual Intercourse ( <i>Zinā</i> )	Yes, a <i>ḥaqq Allāh</i> offense. Death by stoning for adultery. 100 lashes for fornication between two unmarried persons. Death by stoning or 100 lashes for rape (imposed only on rapist). 100 lashes (possibly fewer) for homosexuality.	No, not a <i>ḥaqq ādami</i> offense.  Possible <i>ta'zīr</i> punishment, for rape or homosexuality.
False Accusation of Unlawful Sexual Intercourse ( <i>Kadhif</i> )	Yes, a <i>ḥaqq Allāh</i> offense.  80 lashes.	No, not a <i>ḥaqq ādami</i> offense.
Consuming Alcohol ( <i>Shurb Al-Khamr</i> )	Yes, a <i>ḥaqq Allāh</i> offense.  80 lashes.	No, not a <i>ḥaqq ādami</i> offense.
Theft ( <i>Sarika</i> )	Yes, a <i>ḥaqq Allāh</i> offense. Amputation of hand (1 <sup>st</sup> offense), and foot (2 <sup>nd</sup> offense). Thereafter, imprisonment.	No, not a <i>ḥaqq ādami</i> offense.
Highway Robbery ( <i>Kat' Al-Tarīk</i> or <i>Hirabah</i> )	Yes, a <i>ḥaqq Allāh</i> offense. Death (if the robber has killed but has not got away with the stolen property). Crucifixion (where the robber has killed and got away with stolen property). Cutting off the hand and foot on opposite sides (for robbery with violence where the robber does not kill the victim). Exile (where the robber frightens the victim but does not kill or get away with the stolen property).	No, not a <i>ḥaqq ādami</i> offense.

Transgression	<i>Haqq Allāh</i> Offense? <i>Hadd</i> Punishment?	<i>Haqq Ādami</i> Offense i.e., <i>Jinayā</i> (Tort)? <i>Ta'zīr</i> (Discretionary) Punishment?
Apostasy ( <i>Riddah</i> )	Yes, a <i>haqq Allāh</i> offense. Death by crucifixion (or beheading) for a male apostate. Imprisonment coupled with beatings every 3 days for a female apostate until she recants her apostasy.	No, not a <i>haqq ādami</i> offense.
Rebellion ( <i>Baghī</i> )	Only according to the <i>Mālikī</i> School is <i>baghī</i> a <i>haqq Allāh</i> offense.	For the <i>Hanafi</i> , <i>Shāfi'i</i> , and <i>Hanbali</i> Schools, a distinct offense, and possibly a <i>haqq ādami</i> offense.
Homicide ( <i>Katl</i> ) with Deliberate Intent (' <i>Amd</i> )	No, not a <i>haqq Allāh</i> offense.	Yes, a <i>haqq ādami</i> offense. Retaliation. If waived, blood money.
Homicide ( <i>Katl</i> ) with Quasi-Deliberate Intent ( <i>Shibh al-'Amd</i> )	No, not a <i>haqq Allāh</i> offense.	Yes, a <i>haqq ādami</i> offense. Retaliation. If waived, blood money.
Homicide ( <i>Katl</i> ) by Mistake ( <i>Khata'</i> )	No, not a <i>haqq Allāh</i> offense.	Yes, a <i>haqq ādami</i> offense. No retaliation. Blood money.
Indirect Homicide ( <i>Katl bi-Sabab</i> )	No, not a <i>haqq Allāh</i> offense.	Yes, a <i>haqq ādami</i> offense. No retaliation. Blood money.
Suicide	No, not a <i>haqq Allāh</i> offense.	No.
Bodily Harm Not Involving Death	No, not a <i>haqq Allāh</i> offense.	Yes, a <i>haqq ādami</i> offense. Retaliation in the form of eye-for-an-eye. Or, blood money.
Property Damage	No, not a <i>haqq Allāh</i> offense.	Yes, a <i>haqq ādami</i> offense. <i>Ta'zīr</i> punishment based on facts of case.
Perjury	No, not a <i>haqq Allāh</i> offense.	Yes, a <i>haqq ādami</i> offense. Public exposure ("ta'rīf") of the perjured testimony (or other false evidence). Liability for any damage resulting from judgment based on perjury. Possible imprisonment and beating of the perjurer.

## [B] Meaning of "Hadd"

Sanctions laid out in the Qur'ān are called "*ḥadd*" punishments. Some of these sanctions are specified not in the Qur'ān, but rather developed through the *Sunna* of the Prophet Muhammad. They, too, fall within the ambit of "*ḥadd*" punishments. In other words, a "*ḥadd*" punishment is a fixed punishment for a crime, namely, fixed by the Qur'ān, or in a few instances via the *Sunna*. All "*ḥadd*" punishments are distinct from, and indeed mutually exclusive with, civil law sanctions (including "*ta'zīr*" punishments).

The term "*ḥadd*" literally means "limit," and connotes a God-ordained "limit" referenced in the Qur'ān. (The plural, "limits," is "*ḥudūd*.".) Clearly, the concept of a claim of God (*haqq Allāh*) is integrally linked to the harshness of punishment. It is not a matter of severity for the sake of severity. It is a matter of administering a God-ordained sanction for violating a God-ordained prohibition. A severe sanction is called for because a guilty party has crossed a limit Allāh set in His Revelation, or by the authoritative guide to that Revelation, the lifestyle of the Prophet. As Professor Schacht says:

*ḥadd* is a right or claim of Allāh (*haqq Allāh*), therefore no pardon or amicable settlement is possible.\*

Likewise, Dr. El-Awa writes:

In the penal context, a punishment which is classified as *haqq Allāh* embodies three main aspects. The first is that this punishment is prescribed in the public interest; the second is that it cannot be lightened nor made heavier; and the third is that, after being reported to the judge, it is not to be pardoned either by him, by the political authority, or by the victim of the offense. The unchangeability of the *ḥadd* punishment is supported by the interpretation of the Qur'ānic verse, "These are the limits of Allāh. Do not transgress them." [Surah 2, *ayah* 229.] The third feature of the *ḥadd* punishment is based on a *ḥadīth* reported by [Imāms] Bukhari and Muslim. . . .

The punishment for theft is prescribed in the Qur'ānic verse, "As for thieves, both male and female, cut off their hands. It is the recompense of their own deeds, an exemplary punishment from Allāh. . . ." [Surah 5, *ayah* 38.]

As reported in [the *ḥadīth* compilations by Imāms] Bukhari and Muslim, this punishment was practiced by the Prophet himself. He cut off the thief's hand and also ordered the amputation of a female thief's hand. [Dr. El-Awa cites to Bukhari, vol. 12, p. 90, and Muslim, vol. 5, pp. 114-115.] In the same tradition, the Prophet prohibited any mediation in executing the *ḥudūd* [i.e., the plural of *ḥadd*. Dr. El-Awa cites to the work of Ibn Taymiyya.]. From this latter report jurists have deduced the rule that no *ḥadd*

\* JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW 176 (Oxford, England: Oxford University Press (Clarendon Paperbacks) 1982). [Hereinafter, SCHACHT.]

punishment is remissible, a rule which characterizes this category of punishment and distinguishes it from both *ta'zir* or discretionary punishments, for both *ta'zir* and *qisās* [retribution authorized by law] may be remitted even after being reported to the judge.<sup>9</sup>

Yet, as Professor Schacht also says, the "religious character" of *hadd* punishments also includes "active repentance," known as "*tawba*."<sup>10</sup> Timely and *bona fide* repentance can result in the cancellation of a *hadd* punishment.

Anecdotally, there are plenty of stories — for example from the United Arab Emirates (UAE) — of persons who have been convicted of a *haqq Allāh* crime wanting to have the *hadd* punishments administered on them. That is because of an overwhelming sense of guilt, in Catholic Christian terms, of committing a grave sin, and sincerely seeking with a penitent heart a cleansing of their soul, as far as that is possible on this plane of existence. To be sure, corporal punishment — which is the essence of every *hadd* sanction — has long since ceased to be a penance for the commission of sin in the Christian world. But, from an Islamic perspective, it is thought by some Muslims found guilty of a *haqq Allāh* crime that they would fare better in the eyes of God on the Day of Judgment if they willingly accepted their *hadd* punishment while on earth.

What exactly are the *hadd* punishments? The answer depends on the crime, however, the categories of such punishments are:

- Death by stoning, for unlawful sexual intercourse.
- Death by sword (*i.e.*, beheading), for highway robbery where a killing occurs, and for apostasy committed by a man.
- Flogging (*i.e.*, whipping), with both the number and the intensity of the lashes being set depending on the crime and circumstances, for false accusation of unlawful intercourse, and for drinking alcohol.
- Cutting off of a hand and/or foot, for theft, and for highway robbery where there is no killing.
- Beating and imprisonment, for apostasy committed by a woman.

This list is a simplification of a more complex reality.

First, for some crimes, the *hadd* punishment is death by crucifixion. But, that is no longer applied. Beheading may be used instead. Second, not all of these punishments are specified in the Qur'ān. For example, stoning to death for adultery actually is a punishment borrowed from the Law of Moses. Indeed, during the lifetime of the Prophet, and in the era of the Four Rightly Guided Caliphs

<sup>9</sup> MUHAMMAD SALIM EL-AWA, *PUNISHMENT IN ISLAMIC LAW: A COMPARATIVE STUDY* 1-2 (Indianapolis, Indiana: American Trust Publications, 1981).

Dr. El-Awa served as Legal Advisor, Arab Bureau of Education for the Gulf States, and as Associate Professor of Law, University of Riyadh, Kingdom of Saudi Arabia. His book originally was his doctoral thesis at the University of London supervised by the renowned Professor N.J. Coulson.

<sup>10</sup> SCHACHT, *supra*, at 176.

(*Rashidun*), borrowing from Jewish Law became established.<sup>11</sup> As another instance, the sanctions for apostasy are said to be based on *hadiths*, which themselves are controversial. Third, and most importantly, every effort is made to minimize the scope of applicability of the *hadd* punishments.

### [C] Claims of Man (*Haqq Ādamī*)

As for the foundational distinction in Islamic Penal Law, what about the second category, private claims of vengeance? This category is called "*haqq ādamī*," meaning "claims of man." No transgression in this category is explicitly forbidden by Allāh in the Qur'ān. But, that does not mean the behavior is morally or religiously acceptable, or even unobjectionable. Commission of these offenses certainly is unacceptable, and the Qur'ān suggests punishments for certain of them, notably, murder.<sup>12</sup> To the contrary, many of the offenses are serious — murder, manslaughter, and perjury among them. It is wrongly thought by some non-Muslims the *Shari'a* does not take such offenses seriously, because there is no prescribed *hadd* punishment for them. (Ironically, some of the same critics castigate the *Shari'a* for the barbarity of *hadd* sanctions.)

In fact, the offenses represent objectionable behavior. They are incompatible with the norms of the Islamic community (*umma*), or to put it differently, the behaviors are not how God wants Muslims to live together with one another. Note, however, that a substantively different criticism is that some Muslim countries do not enforce vigorously the rules on *haqq ādamī* crimes if the claimant is a non-Muslim, or regardless of religious affiliation, if the claimant is a woman. This critique does have some basis in fact, as the reports of many human rights organizations attest.

In any event, sanctions for commission of *haqq ādamī* crimes are discretionary. Depending on the specific offense, this enforcement discretion lies with one of two parties. In turn, depending on the enforcer, the nature of the punishment differs:

- (1) With an Islamic Judge (*Qāḍī*):

#### *Ta'zir* Punishments —

The Arabic term for "discretionary" is "*ta'zir*." Hence, punishments attendant to these crimes are called "*ta'zir* punishments." For this group of *haqq ādamī* crimes, discretion lies with a judicial authority, namely, the Islamic judge (*qāḍī*) who hears the case. Conceivably, the judge can order imposition of a *hadd* punishment, though doing so does not turn the offense into a *haqq Allāh* crime. In most cases, the *ta'zir* punishment ordered by a *qāḍī* is imprisonment, a fine, or a combination thereof.

- (2) With the Victim or Family of the Victim:

#### Legal Retaliation (*Qisās*) and Blood Money (*Diya*) Punishments —

For certain *haqq ādamī* crimes, enforcement depends on the discretion of

<sup>11</sup> See SCHACHT, *supra*, at 15-16.

<sup>12</sup> See QUR'AN, *supra*, 2:178-179 (concerning murder, fair retribution, proportionality, and mercy), and 4:92 (also concerning fair retribution).

the victim or the family of the victim. Such crimes would properly be called "Torts" (civil wrongs) in the American legal system. However, the remedies are rather different in the two paradigms. Under American Tort Law, the remedy typically is a monetary judgment for damages, which may cover not only actual and other damages, but also punitive damages. Under the *Shari'a*, the remedy may take the form of authorized retribution, known as "*qisās*," or blood money, called "*diya*."

In no Muslim country does the discretion rest with a jury of peers. Jury trials are not used in any case, criminal or civil, under the *Shari'a*.<sup>13</sup> This fact should be contrasted with the trend in Japan and Korea to make use of juries in criminal cases.

Notably, women are permitted to serve as *qādis* in all cases, criminal or civil, except ones involving the possibility of a *ḥadd* punishment. Thus, discretion to impose a *ta'zīr* sanction can rest with a woman judge. In some Muslim countries, including Egypt since at least 2005, there is a government-led effort to increase the number of women judges.

As for the nature of a *ta'zīr* sanction, it may take one of three forms. It can involve imprisonment, corporal punishment, or monetary fine. A combination of forms also is possible. As in any legal system, under Islamic Law, a *qādi* weighs the facts and circumstances of a case in deciding what *ta'zīr* punishment is appropriate. The discretion can vary from one Muslim country to another, and one *qādi* to another. However, there are some general parameters for certain kinds of *haqq ādamī* cases that a *qādi* is supposed to follow. They can be reasonably detailed, perhaps loosely akin to the United States Federal Sentencing Guidelines.

In sum, in the *Shari'a* there is a distinction between the rights of *Allāh*, and the rights of a human being. Only the former — the rights of *Allāh* — are enforced by a penal sanction, in the narrow, technical sense of the term. The core of Islamic Penal Law is about these claims, and how they are enforced. Because the *Shari'a* is Sacred Law, it is not surprising these claims are the core of the Penal Law. The latter claims — rights of a human — are enforced through what in the American Common Law context would be considered a tort mechanism (though the exact remedies in the two systems are quite different). Indeed, it is sometimes said that *haqq ādamī* crimes, and the attendant *ta'zīr* punishments, are at least loosely akin to Tort Law.

Specifically, *haqq ādamī* are claims enforced by private rights of action, such as retaliation and blood money. There are links to the Qur'ān, which contains Criminal Law provisions on retaliation and blood money. A critical link is the Principle of Fair Retribution, or Proportionality, explicit in *surah* 2, *ayat* 178-179. Another illustration is *surah* 4, *ayah* 92:

<sup>12</sup>Never should a believer kill another believer, except by mistake. If anyone kills a believer by mistake, he must free one Muslim slave and pay compensation to the victim's relatives, unless they charitably forgo it; if the

victim belonged to a people at war with you but is a believer, then the compensation is only to free a believing slave; if he belonged to a people with whom you have a treaty, then compensation should be handed over to his relatives, and a believing slave set free. Anyone who lacks the means to do this must fast for two consecutive months by way of repentance to God: God is all knowing, all wise.<sup>14</sup>

By way of comment, this passage is intriguing for two reasons beyond its service as an example of the Proportionality Principle that disciplines the enforcement of *haqq ādamī* claims. First, the prohibition is against killing another Muslim. But for rules (elsewhere in the Qur'ān) about taking the lives of non-Muslims, it could be (wrongly) inferred from this passage that such killing is blithely unobjectionable. Second, even read in isolation, the passage plainly forbids the commission of terrorist acts that cost the lives of Muslims.

In any event, when retaliation is the sanction, who is the target? The answer is, of course, the perpetrator. If the perpetrator is dead, then the next of kin of the perpetrator may be the target. Who holds the right of retaliation? The answer is the victim. If the victim is dead, then the right to undertake retaliation is with the next of kin of the victim. As for blood money, who is liable for its payment? The answer generally is not the perpetrator. Rather, it is his patrons. Broadly defined, they are the male members of his tribe, his fellow workers, or similar group. So, liability is sort of a communal one, with the community defined in terms of a clear relationship to the perpetrator.

The Arabic term for this group of liable persons is "*ākila*." The concept of communal liability pre-dates Islam. On the Arabian Peninsula in pre-Islamic times, Bedouin Customary Law sought to prevent a wrongdoer from suffering retaliation by coughing up blood money on his behalf. The *Shari'a* incorporated this concept, but modified it. The group no longer refers to members of the tribe of the guilty party, or related tribes if the numbers are insufficient (the pre-Islamic meaning). It covers persons on the *dhicān* (Islamic court records), those persons being workers associated with a person liable for a *haqq ādamī* offense. Such persons could be held liable for payment of blood money. But, urbanization in Islamic countries rendered this adaptation ineffectual.

It is worth pausing to consider how different this way of thinking is from the American Criminal Law. In the *Shari'a* rules on Penal Law, the link to God is direct, and the support for private vengeance (which pre-dates Islam) is open. In the American tradition, bitter experience has led to concern about vigilante justice. Accordingly, it is the state that has a monopoly on the use of force against an individual wrongdoer.

## [D] Orientalist Fallacy Again

Beyond the Qur'ān, as complemented and supplemented by the *Sunnah*, is there a further explanation as to why certain claims fall into one category, and others into the other category? The answer, which again strides the Orientalist

<sup>13</sup> See generally John Makdisi, *The Islamic Origins of the Common Law*, 77 NORTH CAROLINA LAW REVIEW 1635-1739 (1999) (discussing, *inter alia*, the *Shari'a* and jury system).

<sup>14</sup> QUR'AN, *supra*, 4:92 at 59 (emphasis added).

fallacy, is "yes," namely, to some degree pre-Islamic Customary Law in Arabia may be a factor. That Law was oriented to private rights and wrongs and their enforcement. There was little in the way of institutional development, much less a formalized system for public prosecution. Consequently, there was at best an ill-developed theory of criminal behavior and justice.

It may be ventured that Islamic Law inherited, or willingly embraced, the demarcation of private rights and wrongs from pre-Islamic times on the Arabian Peninsula. That is not to say that *haqq ādami* crimes, and attendant *ta'zīr* punishments, are direct importations. They are not. But, it is to suggest a linkage, or continuity.

#### § 43.03 RESTRICTIONS ON IMPOSING *HADD* PUNISHMENTS

Except for the most heartless of beings or evil of sadists, no one likes seeing imposed, or having to impose, a *hadd* punishment. In both theory and practice, the *Shari'a* tries to minimize the scope of applicability of these severe sanctions. One obvious method is these sanctions, with rare and indeed odd cases, apply only to Muslims who commit a *haqq Allāh* offense, typically against another or other Muslims.

That is, a *hadd* punishment is not usually — or at least not automatically — applied to a non-Muslim perpetrator. For example, a non-Muslim would not be prosecuted in Malaysia or the UAE for drinking alcohol in an area, such as a hotel or restaurant, in which alcohol is lawfully served. But, egregious behavior by a non-Muslim drinker, such as public drunkenness coupled with sexually immodest acts, or with disorderly conduct such as fighting, might trigger a prosecution, and the penalty might involve flogging. To be sure, change the hypothetical example a bit, by changing the country, and the result may differ. In Saudi Arabia, it is unwise for a non-Muslim to drink with impunity, as the risk of prosecution and punishment is real.

A related point is that *hadd* punishments tend not to be administered if the victim of the crime at issue is a non-Muslim. That is likely to be true if the perpetrator is a non-Muslim, as the *Shari'a* does not (or should not) ordinarily apply to a case involving two non-Muslims — except, perhaps, in the most extreme jurisdictions under Taliban-like influence. It also is likely to be true even if the perpetrator is a Muslim. This fact, of course, raises the charge by some critics of hypocrisy, or more poignantly, of providing less defense to non-Muslim than Muslim populations.

How else does the *Shari'a* restrict the scope of application of *hadd* punishments? Nine further methods are noteworthy. Each one is a traditional limitation on this scope. There are yet other limits, concerning repentance, which (like the nine) are found in the *Shari'a* and mixed legal systems.

#### [A] Narrow Definitions

First, Islamic Penal Law insists on narrow definitions. The elements of a crime that triggers a *hadd* punishment are defined in narrow terms. Each element must exist.<sup>15</sup> Consequently, it is not easy to bring and prove a case alleging a *haqq Allāh* crime.

#### [B] Strict Evidentiary Requirements

Second, evidentiary requirements (particularly as to the number and nature of eyewitness testimony) are demanding. It is not easy to prove a *haqq Allāh* offense has been committed. Generally, two male witnesses are required. The testimony of one male witness and two females may be acceptable, reflecting a general rule of Islamic Evidence Law that the testimonial value of a woman is half that of a man, except on matters with which women are presumed to have special expertise, namely, pregnancy, birth, and menstrual cycles.

This dichotomy of probative value based on gender is obviously a controversial point (to put the matter politely). Women are no more mendacious than men, and perhaps even less so, and the dichotomy seems as much rooted in ignorant chauvinism as based on anything else. But, as a practical matter, insistence on a male witness or two female witnesses can be an impediment to successful prosecution and conviction. Note, further, that in a case of unlawful sexual intercourse, specifically, adultery, four male witnesses are needed. Indubitably, that doubling of the number and restriction to males serves to limit prosecutions, both across Muslim countries and through the ages. Moreover, it is not just the number of witnesses that is relevant. It also is their qualifications, and the substance of what they say, that matters.

Related to evidentiary requirements is the reality that even if a confession is offered to a *haqq Allāh* crime, it may be withdrawn. Withdrawal is called "*rujū*," as it is when in the context of Contract Law. Other than in cases of false accusation of unlawful intercourse, says Professor Schacht, some *ulema* urge that a *qādi* suggest the possibility of withdrawing a confession to a person who previously made a confession to a *haqq Allāh* crime (except for false accusation of unlawful sexual intercourse). Generally, one confession is enough for a *hadd* punishment offense. But, four confessions are needed for adultery, a deliberate symmetry with the number of witnesses needed for this crime.

#### [C] Resemblance (*Shubha*)

A third device in the *Shari'a* to minimize the range of use of *hadd* punishments is known as "*shubha*," which means "resemblance." As Professor Schacht writes:

Important, too, is the part assigned to *shubha*, the "resemblance" of the act which has been committed to another, lawful one, and therefore, subjectively speaking, the presumption of *bona fides* in the accused.<sup>16</sup>

<sup>15</sup> See SCHACHT, *supra*, at 176.

<sup>16</sup> SCHACHT, *supra*, at 176.

That is, if one unlawful act is similar to another act that is lawful, then the accused may be let off, on the presumption the accused did the lawful act (or, at least, meant to do so).

Note that the scope of operation of *shubha* is broad. Suppose a new convert to Islam is caught drinking alcohol, but claims he did not know that this behavior is punishable as a *ḥaqq Allāh* offense. That is an instance in which *shubha* may be invoked. Other cases embraced by *shubha* include necessity (*ḍarūrāh*), duress (*ikrāh*), and age of minority. In brief, any context that would give an Islamic judge reasonable doubt as to whether a serious crime was committed may lead the *qāḍī* to find that no crime occurred. Put colloquially, "*shubha*" connotes giving a defendant "the benefit of the doubt."

#### [D] No Cumulation

A fourth way the *Shari'a* restricts the imposition of *ḥadd* punishments is via a simple rule against cumulation. Only one punishment is imposed for all offenses of the same kind. For instance, suppose a perpetrator is drunk while committing another offense that carries a stricter *ḥadd* punishment than does drinking alcohol (such as unlawful sexual intercourse, or *zinā*). The offender will be prosecuted for drinking alcohol, and the lesser punishment associated with drinking imposed on him. There is an exception, namely, if the offender intentionally got drunk so as to be charged for the lesser offense. In that case, the mental state of the offender works against the offender, and the more severe of the two potentially applicable punishments may be inflicted.

As another example, a person convicted of multiple counts of theft, all of which are linked in one event, such as where the person stole a luxury wallet and shoes from a designer store, will not have his or her hand and foot amputated. Rather, he or she will lose his hand for having stolen both the wallet and shoes. Of course, the party is liable for another *ḥadd* punishment later on, through commission of a separate and distinct act of theft. Obviously, not cumulating the punishments does more than minimize their egregiousness. It also serves the practical function of graduation, *i.e.*, of graded threat. The punished party is on clear notice from the first application that another offense will trigger another *ḥadd* sanction. The result may be to the likelihood the punished party will be specifically deterred from further misdeeds.

#### [E] Limitations Period

In any legal system, a statute of limitation period is a potential barrier to prosecution, conviction, and punishment. The longer the period, the lower the barrier, and *vice versa*. In the *Shari'a*, the statute of limitations for *ḥaqq Allāh* offenses is quite short. This brevity is a fifth method for circumscribing the application of *ḥadd* punishments.

The typical period is 1 month.<sup>17</sup> For the crime of drinking alcohol, at least according to the prevailing opinion among Islamic legal scholars (*fukahā'*), the

period is shorter: it is only as long as the smell of alcohol or drunkenness persists.<sup>18</sup> That is a matter of hours. Theoretically, the crime remains punishable thereafter, but an Islamic judge (*qāḍī*) will not accept evidence of the crime. But, in all instances, the statute of limitations is tolled if there is a good justification for delay in bringing the case. One such reason is geographic distance with respect to gathering parties, witnesses, or evidence.

#### [F] Incapacity: Age and Mental Deficiency

The *Shari'a* recognizes two types of incapacity — age and mental deficiency — which constitute the sixth and seventh ways to circumscribe application of the severest punishments. A *ḥadd* punishment cannot be administered to a minor. Only an adult can be subject to a *ḥadd* punishment. By definition, a minor is too young to be held criminally liable for his or her behavior. "Too young" generally is defined in terms of puberty, *i.e.*, the age of majority tends to be the age at which an adolescent reaches sexual maturity and is capable of reproduction.

However, this age is fairly young. Indeed, because of demographic and health trends in certain countries, it may be increasingly young. It can be as young as 12 to 14 years of age. Thus, query whether the limitation is efficacious in precluding the severe punishment of persons aged 16 or 17, who would under American law generally not be subject to the adult criminal justice system.

As with age, mental deficiency is a restriction on punishment not unlike that in American Criminal Law. A person cannot be held criminally liable for a behavior if that person is insane or otherwise mentally incompetent. The *Shari'a* does not call for application of *ḥadd* punishments to an insane person, or to one who otherwise is incapable of understanding the nature of one's act, and differentiating right from wrong.

After all, each *ḥaqq Allāh* offense has an intent requirement — a *mens rea* element, known in Arabic as "*niyya*," which means "intent" or "intention." (In contrast to "*mens rea*," the term "*niyya*" can refer to an intention in general, and not necessarily a criminal intention in specific.) The perpetrator must have had the requisite criminal intent, and that is not possible if he or she is mentally incompetent. Where American and Islamic Penal Law may or may not be similar is on the test for insanity. That test has evolved through the ages in English and American Law. It may be a potentially fruitful area of comparative legal research to compare and contrast that evolution with the development of tests for mental competency used in Islamic Penal Law. What is apparent is that in *Shari'a* courts, like American ones, expert testimony by court-appointed psychiatrists and psychologists is taken to ascertain the mental competence of defendants.

Accordingly, for example, suppose a person who is mentally incompetent (or not of age) kills another person. That homicide (*katl*) would be considered a mistake (*khata'*). Like the typical case of mistake, no retaliation could be carried out against the perpetrator. But, unlike the typical mistake case, no blood money (*diya*) would be called for. Instead, traditionally, a circle of people connected to the perpetrator

<sup>17</sup> See SCHACHT, *supra*, at 176.

<sup>18</sup> See SCHACHT, *supra*, at 176.

(known as "*ākila*") would perform a religious expiation (*kaffāra*) on behalf of the perpetrator, and the perpetrator would not be disqualified from any inheritance from the victim.

### [G] Necessity (*Ḍarūrāh*)

A general doctrine applying throughout the *Sharī'a* is that of necessity. The Arabic term for "necessity" is "*ḍarūrāh*," sometimes transliterated as "*darūrāt*." Necessity serves as an exception to every rule of Islamic Law, whether the matter at hand is a personal, private obligation, such as any of the other Five Pillars, or a public right, such as free enjoyment of property. As Professor Kamali writes:

Necessities make the unlawful lawful — *al-ḍarūrāt tubīḥ al-maḥzūrāt*.<sup>19</sup>

For instance, in respect of dietary practices, *surah* 2 *ayah* 173 of the Qur'ān states:

<sup>172</sup>You who believe, eat the good things We have provided for you and be grateful to God, if it is Him that you worship. <sup>173</sup>He has only forbidden you carrion, blood, pig's meat, and animals over which any name other than God's has been invoked. *But if anyone is forced to eat such things by hunger, rather than desire or excess, he commits no sin*; God is most merciful and forgiving.<sup>20</sup>

This example indicates that necessity can arise in urgent circumstances and demand an immediate decision. Likewise, an owner of a large supply of food, which he intends for ordinary use in his home, is not entitled to withhold it from another person, and hoard it, when that person requests a portion of the food supply to prevent certain or probable death by starvation.<sup>21</sup> Preventing this misery clearly is more necessary than safeguarding the right of the owner to his food. As another illustration, which does not involve a crisis, a Muslim is relieved of the obligation to pray at the requisite five daily times if she is a surgeon and is in the middle of performing an operation on a patient. Most instances of takings (expropriation of nationalization) of private property on behalf of the public interest (*maṣlaḥah*), justified as necessary, do not involve urgency.

Technically, necessity (*ḍarūrāh*) is a defense to a criminal charge. It may be invoked when all of the elements of a *ḥaqq Allāh* offense may exist, but the defendant argues he or she had no choice but to commit the crime. For example, theft was necessary because the defendant or his or her family was starving, and no food was otherwise available. Or, drinking alcohol was necessary because the defendant was parched, and no alternative non-alcoholic beverage was readily available. The *Sharī'a* recognizes the validity of this defense, which if successful, alleviates a *ḥadd* punishment.

<sup>19</sup> MURAMMAD HASHIM KAMALI, *THE RIGHT TO LIFE, SECURITY, PRIVACY AND OWNERSHIP IN ISLAM* 282 (Cambridge, England: Islamic Texts Society, 2008). [Hereinafter, KAMALI.]

<sup>20</sup> Qur'an, *supra*, 2:172-173 at 19 (emphasis added).

<sup>21</sup> See KAMALI, *supra*, at 281.

### [H] Duress (*Ikrāh*)

Like necessity (*ḍarūrāh*), duress (*ikrāh*), is a defense to a criminal charge. Thus, *ikrāh* is a concept that is intra-disciplinary within the *Sharī'a*: it is relevant to Contract and Penal Law. Again, all of the elements of a *ḥaqq Allāh* offense exist. Yet, the defendant argues the defendant was compelled to commit the crime. If true, then duress invalidates a declaration of intent (*niyya*), and eliminates culpability. Thus, duress (*ikrāh*) renders an otherwise illegal act permissible, and erases the prospect of a sanction, including a *ḥadd* punishment.

For example, suppose a person drinks alcohol (*shurb al-khamr*) under threat of death or mutilation.<sup>22</sup> With either of these threats present, drinking is permissible. Another interesting example is feigning apostasy (*riddah*) — the case of *takiyya*, a topic also mentioned in *Shī'ite* law. Like drinking (*shurb al-khamr*), apostasy is forbidden. Indeed, apostasy is a sin (whereas martyrdom is meritorious). But, suppose a Muslim fakes apostasy while under duress? The behavior is excused. Conversely, if the element of duress (*ikrāh*) does not exist, or is not recognized by the adjudicator, then the appropriate penalty is applied in full.

Professor Schacht elaborates on the nature and effect of *ikrāh*:

What is envisaged in the first place is the threat (*tahdīd*); it is recognized only if the one party is in a position to carry it out and the other party fears that this may actually happen. The effects of duress in civil and those in criminal law, how far it invalidates a declaration and how far it diminishes responsibility, are not distinguished. The effect in civil law is that the threat of death, severe beating, and long imprisonment makes the declaration voidable (by *khiyār, optio*); exceptions, however, are made mainly in favour of desirable transactions, such as manumission of slaves and adoption of Islam. The effects in criminal law are discussed casuistically; the effect of duress, whenever it is recognized, is not only to remove the penal sanction, but to make the act itself allowed; if it is not recognized, the penalty (*ḥadd*) is applied in full. For instance, drinking wine under the threat of death or mutilation is permissible, and the refusal to do so would be sinful. Conversely, apostasy from Islam is a sin and martyrdom meritorious, but it is allowable to feign apostasy under duress. (This simulation, *takiyya*, plays an important part in *Shī'ite* religious law.)<sup>23</sup>

The idea, then, is a threat of grave harm coupled with the ability to carry it out. When both prongs of the test for *ikrāh* are met, then the result not only is to eliminate the prospect of a *ḥadd* punishment, but also to transform the illicit act into a licit one.

Three comments are worth adding. First, it is unclear whether the test for *ikrāh* is subjective or objective. Clearly, under the first prong, to constitute "*ikrāh*," there must be a threat, which is called "*tahdīd*." How is an adjudicator to know if a threat exists? The adjudicator must pursue two inquiries:

<sup>22</sup> See SCHACHT, *supra*, at 118.

<sup>23</sup> SCHACHT, *supra*, at 117-118 (emphasis added).

- (1) Was the party making the threat in a position to carry out the threat?
- (2) Did the party to whom the threat was made fear that the threat actually might be carried out?

But, in investigating these matters, what is the specific test? Is it objective: whether a reasonable person in the situation of the defendant would have believed that there was a threat, and the party making the threat could carry it out? Or, is it subjective: whether the defendant as is reasonably believed there was a threat that could be carried out? The answer is not entirely clear. In some instances, the two-pronged test is interpreted charitably in favor of the accused. For example, in cases of unlawful intercourse (*zinā*) or drinking wine (*shurb al-khamr*), it is necessary to prove the accused behaved voluntarily.

Second, exactly how far *ikrah* is a defense to a criminal charge may depend on the facts and circumstances. In other words, not all situations of duress are equal. Suppose the threat is of death, a severe beating, or long imprisonment. These extreme threats give rise to sufficient duress to render a declaration made by the afflicted party voidable. The concept of voidability is the same as that in Islamic Contract Law — namely, *khiyār*, which is a right of rescission. In effect, the afflicted party can rescind his or her otherwise unlawful act or statement. Other situations of less severe stress, however, may not lead to complete exoneration. Interestingly, even in cases of extreme duress, there are exceptions for transactions the *Shari'a* regards as desirable. Examples include conversion to Islam or freeing of slaves.<sup>24</sup> The first of these examples appears to imply that a conversion to Islam made under duress — in effect, a forced conversion — need not be rescinded if, upon later reflection, the new Muslim embraces the change.

If true, however, by no means is forcible conversion encouraged or justified. This point leads to a third comment. There is an obvious corollary principle that emerges from the existence of the defense of *ikrah*. Human rights violations — in particular, confessions or testimony secured under torture or threat thereof — are unreliable and inadmissible. At least, every Islamic jurisdiction does or should recognize them as such, in both theory and practice. It is blatantly inconsistent to recognize duress as a defense to a crime, and thereby free a defendant, but to penalize a defendant on the basis of coerced evidence.

## § 43.04 CONFESSION AND REPENTANCE

### [A] Schacht's Illustrations

Appreciating the importance of repentance, and giving it legal effect, ought to be an indispensable feature of any Sacred Legal System. After all, if a — or the — goal of such a System is to bring the Law of God and the law of this world into closer union, and thereby draw people closer to the Divine, then encouraging genuine expression of sorrow, and heart-felt apology, by a wrong doer helps achieve that goal. This expression and apology shows a penitent heart, one opened to, and indeed seeking, a better path than trodden before, a path leading to

reconciliation with the Creator. Exemplifying this path is the Catholic Christian Sacrament of Reconciliation: a priest, acting *in persona Christi* (in the person of Christ) hears confessions, gives advice and penances, and — following a good act of contrition by the penitent — offers absolution from sins committed.

Islamic Law, specifically the Penal Law, also gives a prominent place to repentance. That should not be surprising, given the attributes of Allāh understood by Muslims around the globe. Among the Ninety Nine Names of God, surely one of the most commonly used in the Qur'an, Islamic religious literature, and everyday life, is that of Allāh the "Most Merciful, the Most Compassionate." The *Bismallah*, the opening of *surah* 1 uses the term "mercy" four times:

<sup>1</sup>In the name of God, the Lord of Mercy, the Giver of Mercy! <sup>2</sup>Praise belongs to God, Lord of the Worlds, <sup>3</sup>the Lord of Mercy, the Giver of Mercy, <sup>4</sup>Master of the Day of Judgment.<sup>25</sup>

The Arabic term for "mercy" is "*rahman*." God (*Allāh*) is a giver of mercy. Doing so is "inherent in God's nature."<sup>26</sup> Lest there be any doubt about the importance of mercy in the *Shari'a*, the *Bismallah* starts every *surah* save one, though only in *surah* 1 is it counted as the first *ayah*.<sup>27</sup>

Mercy, of course, is the consequence of authentic repentance, and repentance makes possible reconciliation. That is true at two levels: the relationship between a wrongdoer and God, and between a wrongdoer and the victim of the wrongful act. A wrongdoer expresses genuine contrition for the wrongful act through prayer or other pious action to God, and through a heart-felt statement of sorrow to the victim (or victim's kin, if the victim is dead) of that act. God, in His mercy, shows compassion to the wrongdoer in a way that others, and even the wrongdoer, may not recognize immediately, or in this lifetime. The victim (or victim's kin) may — depending on their disposition — act mercifully toward the wrongdoer. For example, they may forego a right of retaliation, or a right to collect monetary compensation. Interestingly, in Human Rights Law, lawyers and scholars sometimes remark (particularly in the context of Truth and Reconciliation Commissions, as in South Africa) that victims of torture often have as their highest priority not vengeance, but rather a face-to-face meeting with their torturer to hear why the torturer perpetrated the torture, and to hear the words "I am sorry."

As for the *Shari'a*, *hadd* punishments have a religious character to them, because the crimes to which they are associated are *haqq Allāh* (claims of Allāh). That linkage is clear enough. But, as just intimated, there is another reason, that is, another way in which *hadd* punishments are religious in character. Repentance — called "*tawba*" — may cause a *hadd* punishment not to be applied. In certain cases, genuine and clear repentance may result in the lifting of a *hadd* punishment.

For example, Professor Schacht identifies two cases:<sup>28</sup>

<sup>25</sup> Qur'an, *supra*, 1:1-4 at 3 (emphasis added) (footnotes omitted).

<sup>26</sup> See Qur'an, *supra*, fn. b at 3.

<sup>27</sup> See Qur'an, *supra*, fn. c at 3.

<sup>28</sup> See Schacht, *supra*, at 176.

<sup>24</sup> See Schacht, *supra*, at 118.

- A thief returns the object he or she stole before anyone applies for prosecution of the case.
- A highway robber repents before he or she is arrested.

Suppose the wrongdoer expresses *tauba*. The result is the *hadd* punishment lapses, or better put, is not applied. Islamic Penal Law treats the wrong as an ordinary civil wrong (i.e., a tort), or “*jināya*.” (The plural, “civil wrongs” or “torts,” is “*jināyāt*.”) Essentially, repentance downgrades the offense from a *haqq Allāh* to *haqq ādami* matter. The victim or next of kin is entitled to retaliation, or possibly financial compensation (blood money). But, the victim or next of kin can choose mercy, and pardon the perpetrator.

As these examples show, the timing of repentance is relevant. A *post hoc* attempt by a perpetrator at repentance makes no difference as to culpability. It is not a defense to a crime that the perpetrator already has completed. Additionally, even if an expression of *tauba* is timely, the perpetrator is likely to have to perform religious expiation — a penance, to use the Christian term — of sorts, such as fasting. This expiation is known as “*kaffāra*,” and is part of the liability for commencing criminal conduct. It is another instance of the sacred character of the *Shari’a*, in contrast with secular legal regimes.

### [B] Opinions of the Four Sunnite Schools

The illustrations provided by Professor Schacht do not provide a complete picture of the views on repentance among Islamic religious and legal scholars (the *ulema* and *fukahā*, respectively). At issue is the effect of repentance on imposition of a *hadd* punishment. The issue assumes a confession, i.e., the perpetrator admits to commission of a *haqq Allāh* offense, and further, expresses genuine remorse. Confession has the effect of triggering the *hadd* punishment, so the issue is whether repentance alleviates this sanction, even in an instance in which there is a witness (or multiple witnesses) to the crime. Manifestly, then, “confession” and “repentance” are distinct, because a wrongdoer can acknowledge his or her illegal behavior, but not be sorry for it. But, without repentance, a confession will not remove liability for a *hadd* punishment.

What, then, is the effect of a confession coupled with repentance? All Four Sunnite Schools — *Hanafī*, *Mālikī*, *Shāfi’i*, and *Hanbalī* — agree that confession and repentance by a perpetrator of highway robbery (*hirabah*, or *ka’ al-tariq*) before arrest affects the claim of Allāh, but not the rights of victims. That is, pre-arrest repentance eliminates the prospect of a *hadd* punishment, and indeed does reduce the offence from a *haqq Allāh* crime to a *haqq ādami* crime. Consequently, the wrongdoer is not liable for the severest of sanctions, but does not entirely get “off the hook.”

As to the other *haqq Allāh* offenses, the Four Schools are divided as to the effect of repentance:<sup>29</sup>

<sup>29</sup> See SHAHEED ABDUL QADIR OUDAH, CRIMINAL LAW OF ISLAM (India: International Islamic Publishers, 2002). [Hereinafter, OUDAH.]

- Opinion #1, Held by Some *Shāfi’i* and *Hanbalī* Scholars —

Repentance affects all other *haqq Allāh* offenses. That is because it affects the most serious of them, highway robbery. Thus, if a perpetrator acknowledges and repents for commission of *zinā* (unlawful sexual intercourse), *kadhif* (false accusation of unlawful sexual intercourse), *shurb al-khamr* (consuming alcohol), *sariqa* (theft), or *riddah* (apostasy), then the attendant *hadd* punishments are not imposed. Note that *kadhif*, unlike the other *haqq Allāh* offenses, is prosecuted upon the request of a plaintiff (namely, the target of the false accusation). Therefore, repentance might have no effect, depending on the disposition of the plaintiff.

- Opinion #2, Held by the *Hanafī* and *Mālikī* Schools, and by Other *Shāfi’i* and *Hanbalī* Scholars —

Repentance has no effect on the right of Allāh in respect of *hudūd* crimes. The *hadd* punishments are imposed. However, because the Qur’an excludes highway robbery, repentance is effective in such a case.

- Opinion #3, Held by a Minority of Scholars in Each of the Four Schools —

Repentance affects all *hudūd* crimes, and the punishment need not be imposed in any of them. But, the transgressor can choose to have the sanction applied. He or she may do so in preference to a more fearsome sanction imposed by Allāh upon the Day of Judgment. Put colloquially, the transgressor may opt to “take his or her medicine now,” rather than take the road to perdition later.

In all instances, if repentance coupled with or subsequent to a confession is to have the legal effect of eliminating the prospect of a *hadd* punishment, it must be honest and sincere, respectively. And, it must occur before arrest and commencement of prosecution.

### [C] Retraction of Confession

A topic related to confession and repentance is retraction of a confession. What is the legal effect of denial of a confession, after a confession is made, but where there is no witness to that crime (i.e., the crime is proved only by the confession)? Is the retraction accepted? Does the denial of the confession have any implication for imposition of a *hadd* punishment for a *haqq Allāh* offense?

As with the issue of confession and repentance, on this subject the Four Sunnite Schools evince different opinions:<sup>30</sup>

- Opinion #1: Held by Some *Hanbalī* Scholars —

Retraction of the confession is not accepted. The confession stands, which means — even if there is repentance — a *hadd* punishment is imposed. That is, going forward with this punishment is the result of not accepting the retraction of the confession.

<sup>30</sup> See OUDAH, *supra*.

- Opinion #2: Held by Some Scholars in All Four Schools —

Retraction of a confession is accepted for *haqq Allāh* offenses. The confession does not stand. In turn, a *hadd* punishment may be imposed, if the perpetrator is convicted of the crime at issue.

- Opinion #3: Held by the Majority of the *Māliki* School —

Retraction of a confession is accepted for *haqq Allāh* offenses. The confession does not stand, and under *Māliki* School precepts, a *hadd* punishment may be imposed, regardless of repentance.

However, this School does not accept retraction of a confession from a perpetrator who is a notorious person, namely, one who is infamous for having committed crimes. In practice, that means a retraction by a person with a criminal record is ineffective. In such instances, the applicable *hadd* punishment may be imposed.

- Opinion #4: Held by Some *Shāfi'i* Scholars and the Minority of the *Māliki* School —

Retraction of a confession is accepted for all *haqq Allāh* offenses, but only if *shubha* exists. That is, the retraction is effective if the illegal act at issue resembles a lawful act. In such instances, a *hadd* punishment is not imposed.

In sum, there is considerable variation across and within the Schools as to the legal implications of offering and then retracting a confession.

## § 43.05 ADDITIONAL CONSIDERATIONS ABOUT IMPOSING *HADD* PUNISHMENTS

### [A] Good Faith?

Noteworthy is what is not on the list of restrictions on imposing *hadd* punishments. There is no “good faith” (or *bona fide*) exception in Islamic Penal Law to relieve a perpetrator of liability. At best, the perpetrator may have recourse to the theory of culpability that distinguishes among deliberate intent (*amd*), quasi-deliberate intent (*shibh al-amd*), mistake (*khata'*), and indirect causation (*katl bi-sabab*).<sup>31</sup>

### [B] Self-Defense?

Likewise, the *Shari'a* does not have a general theoretical doctrine of self-defense. That is an important contrast with American Criminal Law. Rather, a claim of self-defense by a perpetrator is accepted — or not — on an *ad hoc*, case-by-case basis.

<sup>31</sup> See SCHACHT, *supra*, at 178.

To be successful in this defense, either or both of two elements must exist: the initial attack must be dangerous, a great deal must be at stake, or both.<sup>32</sup> Circumstances can add to, or subtract from, these elements. For example, a nighttime setting enhances the danger of an initial attack. In a case of forcibly obtaining access to water after permission is denied, the defense is more credible if there is extreme need for water (e.g., a person is dying of thirst) than if the water source is merely convenient.

### [C] Mixed Legal Systems

Above and beyond the conventional limitations on the scope of application of *hadd* punishments, there is a further one. It is perhaps the greatest restriction on this scope, but it is not a conventional one, i.e., it is not part of the Classical Theory of the *Shari'a*. It concerns the structure of the legal system in a particular Islamic country. A large number of Muslim countries have elected not to implement Islamic Penal Law, but rather rely on a modern criminal code, with typical punishments being imprisonment and fines. Examples include Algeria, Bangladesh, Jordan, Indonesia, Lebanon, Morocco, Palestine, Syria, and Tunisia. The vast majority of their Muslim populations would be horrified by an introduction of *hadd* punishments. Such countries have mixed legal systems, the admixture consisting of elements of the *Shari'a*, but also of a continental European Civil Code, American Common Law, and/or indigenous legal concepts.

A considerable number of Islamic countries do not have a legal system that is entirely based on the *Shari'a*. These countries tend to have a mixed legal system. Some subject areas are based on Islam. But, other areas are governed by rules left over from colonial influences, or intentionally imported from overseas. Malaysia and the Sultanate of Brunei are cases in point. Both are Islamic countries, with majority Muslim populations. Both use Islamic Family Law for Muslims. Yet, both were British Crown Colonies, Malaysia until 31 August 1957, and Brunei until 1 January 1984. As such, the legal systems of both rely on English Law, including the Common Law, and appeal to the Privy Council in London still exists. Thus, both use English Law for the field of Criminal Law, though Brunei applies a harsher interpretation than does England as to punishments. Likewise, their Contract and Property Law are based on that of England.

## § 43.06 PRACTICAL POINTS

### [A] Prosecution and *Muhtasib*

Who brings a criminal case in which a *haqq Allāh* offense is alleged? Likewise, who is responsible for prosecuting a *haqq ādami* charge? The general answer in most Islamic countries is the public prosecutor.

Interestingly, the *Shari'a* itself does not create the institution of a prosecutor who brings criminal charges on behalf of the public. That is, neither the *Qur'ān* nor *Sunnah* of the Prophet gives rise to an institution that is an office of public

<sup>32</sup> See SCHACHT, *supra*, at 184.

prosecutions, which would be directly akin to England's Crown Prosecution, or to America's federal United States Attorney's Office, state Attorney General's Office, or local District Attorney's Office. Rather, this administrative apparatus developed in Islamic countries over the centuries, under various Caliphates, and exists in modern legislation.

As it appears today in Muslim countries, the office of the public prosecutor is derived, directly or indirectly, from an older office, namely, that of the "*hisba*." This term refers to the Office of the Inspector of the Market. The person holding the Office, i.e., the Inspector, is known as the "*muhtasib*." This term refers to the Inspector of the Market (or Marketplace). As Professor Schacht explains:

... the office of the *muhtasib*, who [*sic*] in theory is the representative of the community in fulfilling the duty of "encouraging good and discouraging evil," has in practice become an office of public prosecutions.<sup>33</sup>

Indeed, the term "*muhtasib*" refers to someone, who through zeal for the *Sharī'a*, seeks to earn religious merit.<sup>34</sup> Ironically, in that sense the *muhtasib* — public prosecutor is not entirely unlike a handful of prosecutors in some non-Muslim jurisdictions.

### [B] Applying *Hadd* Punishments and *Imām*

If a *hadd* punishment is applicable, then who is responsible for administering it — or, given its severity, perhaps better said, inflicting it? There is no question of agency in carrying out the punishment. That is, it is forbidden to appoint an agent (*wakil*) for the purpose of exacting a corporal punishment. A principal cannot appoint a deputy to inflict a *hadd* punishment. That also is true for a retaliation (*kiṣāṣ*) punishment.

The answer is the *imām* is charged with the administration. That is logical, insofar as a *hadd* punishment is triggered by a *ḥaqq Allāh* offense. The *imām*, as a leader of prayers, is a religious figure. As such, the *imām* is not acting in the person of God — that would be blasphemous to assert. Rather, it is that the duty of ensuring the claims of *Allāh* are properly administered is in the same ambit as the other responsibilities of the *imām*.

Three points should be noted about this answer. First, the distinction between the *Sunni* and *Shī'ite* conception of an "*imām*" should be kept in mind. Second, the *imām* almost invariably is a man. Only in rare cases has a woman led prayers at a mosque.<sup>35</sup> (Time will tell whether they are exceptional or harbingers of a trend.) Despite them, it would be a male *imām* responsible for administration of a *hadd* punishment.

Third, and of greatest theoretical and practical interest, is the fact the *imām* may delegate this responsibility to another party. That ability appears to cut against the rule against appointment of a *wakil* to carry out the punishment. How

it is squared with the rule is not entirely clear, except to say the delegation is not made on an agency theory. Practically speaking, this ability may allow for an *imām* to appoint a woman to enforce a *hadd* punishment on another woman. Such an appointment would be appropriate, given the normal expectation that a male punisher would be physically stronger than a woman, and thus could inflict more injury, than either intended or should be permitted. However, the frequency of such appointments is uncertain.

As to the grisly details of how a *hadd* punishment is applied, they vary across Islamic countries. The following anecdotes and episodes give a sense of the range:

- In Iran, death by stoning for a woman convicted of adultery is said to have been carried out by the casting of a first, almost symbolic, stone, but followed by a dump truck offloading its container of stones on the woman.
- In Kismayo, a southern port city in Somalia, in October 2008, a 23-year old woman, Ms. Aisha Ibrahim Duhulow, was stoned to death for allegedly committing adultery. She is said to have confessed to a *Sharī'a* court, though Amnesty International said she was 13, and that her father stated she was raped by three men. When her family complained to the authorities, she was detained and accused of adultery. The court authorities said she insisted on application of the *hadd* punishment, saying that was what she deserved, even though she had several opportunities to review her confession. As for the punishment:

Numerous eyewitnesses say she was forced into a hole, buried up to her neck, [and] then pelted with stones until she died in front of more than 1,000 people. . . .

. . .

. . . [S]he had been crying and had to be forced into a hole before the stoning, reported to have taken place in a football stadium.

. . .

[A witness said] "[a]fter two hours, the Islamic administration in Kismayo brought the lady to the place and when she came out she said: 'What do you want from me?'"

"They said: 'We will do what Allāh has instructed us.' She said 'I'm not going, I'm not going. Don't kill me, don't kill me.'"

"A few minutes later more than 50 men tried to stone her."

The witness said people crowding round to see the execution said it was "awful."

"People were saying this was not good for *Sharī'a* law, this was not good for human rights, this was not good for anything."

But no one tried to stop the Islamist officials, who were armed, the witness said. He said one boy was shot in the confusion.

<sup>33</sup> SCHACHT, *supra*, at 190.

<sup>34</sup> See SCHACHT, *supra*, at 207.

<sup>35</sup> See *Women As Imams*, WIKIPEDIA, posted at [http://en.wikipedia.org/wiki/Women\\_as\\_imams](http://en.wikipedia.org/wiki/Women_as_imams).

According to Amnesty International, nurses were sent to check during the stoning whether the victim was still alive. They removed her from the ground and declared that she was, before she was replaced so the stoning could continue.<sup>36</sup>

Notably, in August 2009, a few months before the stoning, Kismayo was seized by the Al Shabab organization, a radical Islamist insurgency listed by the United States as a terrorist organization, and headed by Hassan Turki, whom the United States lists as a financier of terrorism.

- In Somalia, in January 2009, the Al Shabab Islamist militia, in control of much of Somalia, executed Mr. Abdirahman Ahmed, a prominent politician, for apostasy.<sup>37</sup> He also was accused of spying for Ethiopian forces that had tried to oust the Islamists from the capital, Mogadishu, and other parts of the country. The execution occurred in the port city of Kismayo by shooting Mr. Ahmed following afternoon prayers on a Thursday.
- In Somalia, in June 2009, Al-Shabab convicted four young men of theft.<sup>38</sup> They had stolen three mobile phones and two assault rifles. Each was sentenced to have a hand and leg cut off. The sentences were carried out publicly by hacking off one hand and one leg of each person. The sentences had to be postponed because of extreme heat, which would have caused the men to bleed to death. The four men then were taken by ambulance for medical treatment.
- In the UAE, the punishment of flogging (lashing) is administered for the offense of drinking, but not publicly. Eighty lashes are administered, with the prosecution in attendance. The flogger must hold a book under his armpit so that he cannot fully extend his arm and take a full swing at the convict. All 80 lashes are administered on one occasion, 40 on the left side, and 40 on the right side, of the body, from the neck down to the side or upper legs. The administration is quick, taking a few minutes. A doctor is present to ensure the convict does not die. The instrument used for the flogging is a cane, akin to a walking stick.
- In certain other *Shari'a* jurisdictions, flogging is administered in a broadly similar manner as in the UAE, but in smaller lots of 3 or 4 lashes. A doctor may be present to ensure there is no permanent damage done to the kidneys of the victim.

The public nature of many of these punishments is (in theory) designed to set an example for observers, and thus serve as general deterrence. Indeed, non-Muslim westerners occasionally will find themselves invited to be present at the punishments, such as in the central square of Riyadh, where they are episodically administered after Friday prayers are completed. It goes nearly without mentioning that the public nature of the sanction, as well as the punishment itself and

procedures used for their administration, violate International Human Rights Law, and indeed basic concepts rooted not only in all other religions, but also in Natural Law, of human decency and dignity.

## Chapter 44

### CLAIMS OF GOD (HAQQ ALLĀH): SEX CRIMES

As witnesses not of our intentions but of our conduct, we can be true or false, and the hypocrite's crime is that he bears false witness against himself. What makes it so plausible to assume that hypocrisy is the vice of vices is that integrity can indeed exist under the cover of all other vices except this one. Only crime and the criminal, it is true, confront us with the perplexity of radical evil; but only the hypocrite is really rotten to the core.

Hannah Arendt (1906-1975)

Historian and Philosopher, *On Revolution* (1963)

## § 44.01 UNLAWFUL SEXUAL INTERCOURSE (ZINĀ)

### [A] Biblical Comparisons: 6th and 9th Commandments

In no major religion of the world, nor in many legal systems, is unbridled sexual intercourse an acceptable behavior. That is, throughout the ages, it has not been deemed a religiously or legally acceptable practice for a man to be free to have intimate relations with any woman he chooses, regardless of her wishes, or *vice versa*. Adultery — sexual relations outside the bonds of marriage — is a particular target of religious and ethical norms. Professor Hussain writes:

The Romans used to parade an unfaithful wife naked on a donkey, allowing the crowds to insult her and spit upon her. The Babylonians drowned an adulterous wife and the Hebrews stoned her to death. Up until about the 16th century in England, adultery was an offense punishable by the ecclesiastical courts. The punishments varied from a fine to mutilation — one penalty was cutting off the nose. Until the middle of the present century, adultery and, indeed, all sex outside of marriage was regarded as reprehensible. Adultery was a matrimonial offense leading to divorce, and women, found guilty of adultery usually lost custody of their children and were deprived of their property. Women were treated more severely than men.<sup>1</sup>

In the United States, one of the most renowned tales of adultery is told by the celebrated novelist, Nathaniel Hawthorne. *The Scarlet Letter*, published in 1850, is a book widely read in American high school and college English courses as a masterpiece of American literature and a compelling moral study.<sup>2</sup> The title refers to the letter "A," for adultery, which the protagonist, Hester Prynne — who lives in a village in Puritan New England and bore an illegitimate child — was compelled to wear on the bosom of her dress.

To be sure, among states in the United States, few criminal statutes retain adultery, and the offense is unprosecuted. Significant attention in American (and English) Criminal Law is given to sex crimes, but they tend to be crimes of violence — namely, rape and attempted rape. The *Uniform Code of Military Justice (UCMJ)*, applicable to American military personnel, still includes (in Article 134) adultery as an offense. Yet, it appears the allegation of adultery, if made at all, is one likely to be associated with prosecution for a charge of conduct unbecoming an officer. Nevertheless, most Americans, whether uniformed or not, hardly consider adultery as morally acceptable.

<sup>1</sup> JAMILA HUSSAIN, *ISLAMIC LAW AND SOCIETY — AN INTRODUCTION* 136 (Annandale, New South Wales, Australis: The Federation Press, 1999). [Hereinafter, HUSSAIN.]

<sup>2</sup> See NATHANIEL HAWTHORNE, *THE SCARLET LETTER AND OTHER WRITINGS* (1850, New York, New York: W.W. Norton & Co., 4th rev'd ed., 2004). [Hereinafter, *SCARLET LETTER*.]

Perhaps the most famous injunction against adultery is in the 10 Commandments. They are a Covenant God made with Moses and his people, the Israelites, during their journey from slavery in Egypt under the Pharaoh (probably Ramses II, who reigned from 1290-1223 B.C.) to the Promised Land.<sup>3</sup> The 10 Commandments given by God to Moses on Mount Sinai, and set out in *Exodus* in the Old Testament of the Bible, state:

<sup>1</sup>Then God delivered all these commandments.

<sup>2</sup>"I, the LORD, am your God, who brought you out of the land of Egypt, that place of slavery. <sup>3</sup>You shall not have other gods besides me. [1st Commandment.] <sup>4</sup>You shall not carve idols for yourselves in the shape of anything in the sky above or on the earth below or in the waters beneath the earth; <sup>5</sup>you shall not bow down before them or worship them. For I, the LORD, your God, am a jealous God, inflicting punishment for their fathers' wickedness on the children of those who hate me, down to the third and fourth generation; <sup>6</sup>but bestowing mercy to the thousandth generation, on the children of those who love me and keep my commandments.

<sup>7</sup>"You shall not take the name of the LORD, your God, in vain. [2nd Commandment.] For the LORD will not leave unpunished him who takes his name in vain.

<sup>8</sup>"Remember to keep holy the Sabbath day. [3rd Commandment.] <sup>9</sup>Six days you may labor and do all your work, <sup>10</sup>but the seventh day is the Sabbath of the LORD, your God. No work may be done then either by you, or your son or daughter, or your male or female slave, or your beast, or by the alien who lives with you. <sup>11</sup>In six days the LORD made the heavens and the earth, the sea and all that is in them; but on the seventh day he rested. That is why the LORD has blessed the Sabbath day and made it holy.

<sup>12</sup>"Honor your father and your mother, that you may have a long life in the land which the LORD, your God, is giving you. [4th Commandment.]

<sup>13</sup>"You shall not kill. [5th Commandment.]

<sup>14</sup>"You shall not commit adultery. [6th Commandment.]

<sup>15</sup>"You shall not steal. [7th Commandment.]

<sup>16</sup>"You shall not bear false witness against your neighbor. [8th Commandment.]

<sup>17</sup>"You shall not covet your neighbor's house. [9th Commandment.] *You shall not covet your neighbor's wife, nor his male or female slave, nor his ox or ass, nor anything else that belongs to him.*" [10th Commandment.]<sup>4</sup>

<sup>3</sup> See also CATECHISM OF THE CATHOLIC CHURCH ¶¶ 2380-2381 at 572 (United States Catholic Conference, Inc., Washington, D.C.: Libreria Editrice Vaticana, 2nd ed. 1997) (discussing adultery as an offense against the dignity of marriage). [Hereinafter, CATECHISM.] For Catholic Christian teaching on the 6th and 9th Commandments, see *id.*, ¶¶ 2331-2331 at 560-576, ¶¶ 2514-2527 at 601-605, respectively.

Two Commandments deal with adultery. The 6th Commandment is an outright prohibition. The 10th Commandment (sometimes numbered as the 9th Commandment) deals with a sin that can give rise to adultery, namely, "covetousness," or excessive desire.<sup>3</sup> Covetousness is one of the "7 Deadly Sins," which also are called the "Capital" or "Cardinal" Sins in Catholic Christianity. These Sins may be recalled by the acronym "PLACES + G," which stands for "Pride," "Lust," "Anger," "Covetousness," "Envy," "Sloth," and "Gluttony." Seven virtues are their opposites: Humility; Chastity; Patience; Charity; Kindness; Diligence; and Temperance, respectively.

## [B] Key Qur'anic Passages

The 10 Commandments are widely appreciated as a moral basis for Judaism, Christianity, and Islam. Unsurprisingly, then, the *Sharī'a* proscribes adultery, or more generally, unlawful sexual intercourse. The Qur'ān contains the following key passages:

- *Surah 17, ayah 32* —

And do not go anywhere near *adultery*: it is an outrage, and an *evil* path.<sup>4</sup>

Manifestly, this passage is most closely akin to the 6th Commandment.

- *Surah 24, ayat 1-3* —

<sup>1</sup>This is a *surah* We have sent down and made obligatory: We have sent down clear revelations in it, so that you may take heed.<sup>2</sup>Strike the adulteress and the adulterer one hundred times. Do not let compassion for them keep you from carrying out God's law — if you believe in God and the Last Day — and ensure that a group of believers witnesses the punishment. <sup>3</sup>The adulterer is only [fit] to marry an adulteress or an idolatress,

the 9th and 10th Commandments the injunctions in verse 17. See *id.*, fn. 20.1-17 at 88.

Interestingly, in respect of inter-generational punishment, referenced in *Exodus* 25-6 and *Deuteronomy* 5:9-10:

God does not punish us for another's sins, but because of the solidarity of human society, the good or evil deeds of one generation may make their effects felt even in later generations. Yet note how God's mercy allows the good effects of virtue to last much longer than the bad effects of vice: a thousand generations compared to one.

*Id.*, fn. 5, 9f at 198.

<sup>5</sup> The 10 Commandments also are set forth in another Book of the Old Testament, *Deuteronomy*, and the place they are given by God to Moses is referred to as "Mount Horeb." See *id.* at *The Book of Deuteronomy*, 5:1-2, 6-21. That version is quoted in connection with the discussion of theft.

The Commandments against adultery and theft are worded identically in the two versions. *Id.*, 5:18-19. There are minor differences in the two versions in the punctuation or wording of the 1st, 3rd, 4th, and 8th Commandments. There are minor differences in the two versions of the 9th and 10th Commandments, and in *Deuteronomy* the order of these two Commandments is the inverse of that in *Exodus*. In Catholic Christianity, the 6th and 9th Commandment sometimes are paired together, based on the order in *Deuteronomy*.

<sup>6</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 17:32 at 177 (Oxford, England: Oxford University Press, 2004) (emphasis added). [Hereinafter, QUR'AN.]

and the adulteress is only [fit] to marry an adulterer or an idolater: *such behavior is forbidden to believers.*<sup>7</sup>

There is a notable substantive difference between *surah* 24, *ayah* 2 and the 6th Commandment. The 6th Commandment establishes adultery as a sin, but itself does not address the question of punishment. *Surah* 24, *ayah* 2 presumes adultery is a sin, or put in Islamic terms, a *haqq Allāh* offense, and immediately focuses on punishment.

- *Surah* 24, *ayah* 33 —

*Those who are unable to marry should keep chaste* until God gives to them enough out of His bounty.<sup>8</sup>

This passage is a clear injunction against pre-marital sex.

In light of these Qur'anic quotations, it is worth considering the bold statement by Professor Schacht:

The concept of adultery . . . is *unknown* to Islamic law; the wife has no exclusive right on the person of the husband, and although extra-marital intercourse on her part is neglect of her marital duties, it is punished only as a crime against religion.<sup>9</sup>

This statement is misleading in three respects. First, *zinā* is a crime — a *haqq Allāh* offense — in Islamic Penal Law. To say adultery is "unknown" to the *Sharī'a* wrongly connotes that Muslims do not care about the special nature of the marital bond. They do.

Second, Muslim husbands are not free to roam about and behave promiscuously — even though some, like their non-Muslim counterparts, do. To say that the wife has "no exclusive right" on her husband's body is technically correct under Islamic Family Law. But, it neglects not only the discipline of Islamic Penal Law, but also the discipline of the community. Unlike pre-Islamic times on the Arabian Peninsula, when the distinction between sexual intimacy within and outside of marriage was blurry in some communities, the advent of Islam brought (*inter alia*) a strong exhortation in favor of responsible, dignified behavior. Reputation as an adulterer hardly is championed in any community.

Third, the word "only" in the above-quoted passage seriously understates the importance of a "crime against religion." The understatement is conceptual. In the thinking of a sacred legal system, a crime against "religion" matters greatly. It implicates the essential and distinctive sacrosanct character of the system. That is entirely different from a dismissive comment that might be made in a secular legal system about adultery, such as "well, that is between him and God." The understatement also is practical. Commission of such an offense does more than render one liable for a *ḥadd* punishment. It also jeopardizes the soul of the transgressor for all eternity.

<sup>7</sup> QUR'AN, *supra*, 24:1-3 at 220 (emphasis added).

<sup>8</sup> QUR'AN, *supra*, 24:33 at 223 (emphasis added).

<sup>9</sup> See JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW 179 (Oxford, England: Oxford University Press [Clarendon Paperbacks] 1982) (emphasis added). [Hereinafter, SCHACHT.]

### [C] Scope and Elements

The *ḥaqq Allāh* offense presumed in *Surah* 24, *ayah* 2 is known as “*zinā*.” It is the most basic and significant Qur’ānic penal legislation on sex. The Arabic term “*zinā*” encompasses “all extramarital sexual intercourse between a man and a woman.”<sup>10</sup> That means the scope includes any intimate relations outside of the bond of marriage — or, broadly put, unchaste behavior. Examples include:

- (1) Copulation between two unmarried persons.
- (2) Copulation between a married man and a woman who is not his wife, but rather the wife of another person.
- (3) Copulation between a married woman and a man who is not her husband, but rather the husband of another person.
- (4) Copulation between a married man and an unmarried woman.
- (5) Copulation between a married woman and an unmarried man.

As explained in the discussion of false accusation (*kadhf*), the general term for illicit sex outside the marital bond is “fornication.” Each example above would be considered “fornication.” The term “adultery” is one type of fornication, namely, between a married person and someone else who is not the spouse of that married person. Thus, “adultery” applies to examples (2) through (5). “Fornication” applies uniquely to example (1).

It must be emphasized both men and women are liable for *zinā*. The Qur’ān plainly does not discriminate between the two. *Surah* 2, *ayah* 2-3, quoted above, clearly speaks about men and women, and forbids unchaste behavior to all “believers.” Yet, one of the great tragedies in some Muslim countries is there is no equal justice under law in respect of *zinā*. Rather, it is the woman who gets charged, prosecuted, stoned to death, or flogged. That often occurs because the woman is unjustly accused in what is a *bona fide* case of rape. This unacceptable situation reflects a failure to understand authentic Islamic Penal Law, a deliberate neglect of it, or both. The underlying conditions in which this failure occurs are poor education, male chauvinism, and poverty.

What are the essential elements necessary to prove a charge of the *ḥaqq Allāh* offense of *zinā* against a man, woman, or both? There are two: act, and category. As for the culpable mental state (*mens rea*) or intent (*niyya*), it seems to be presumed from the existence of these two elements.

First, there must be, first, a sexual act. That act must be intercourse. Kissing or touching, even of the private parts of the body of a man or woman, would not qualify — though such acts may lead to prosecution for a lesser offense, such as indecent or lewd behavior. However, the *Shari’a* does not seem to require that ejaculation occur. Mere penetration by a man of a woman would constitute intercourse.

<sup>10</sup> Qur’ān, *supra*, fn. a to 24:2 at 220 (emphasis added).

Observe that *zinā* does not encompass lustful thoughts that are not acted out. In the Catholic Christian tradition, such thoughts are “adulterous,” as Saint Augustine explains in recounting the teachings of Christ:

... [W]hen the lustful man looks on a woman with desire, even though she is chaste, he has committed adultery. For the Lord [Jesus Christ] said in plain truth: *Whoever has looked upon a woman with desire has already committed adultery with her in his heart.* He has not entered her bedroom, yet he has ravished her within the bedroom of his heart.<sup>11</sup>

Without repentance, this kind of “adultery” is punishable in the next life. Indubitably, Islam takes the same approach, namely, prosecuting the overt act of adultery, and leaving for the Day of Judgment the adulterous heart.

On the second element, intimacy must involve persons in one of three defined categories. They are: (1) unmarried persons; (2) an unmarried person and a married person; or (3) two people who are married but not to each other. That is, as the five examples indicate, there must be copulation outside matrimony. So, the second element may be seen as one large category, persons outside of matrimony. Conventionally put, there must be “fornication” broadly defined or “adultery” narrowly defined.

In the conventional terms of the *Shari’a*, this second element typically is stated as follows.<sup>12</sup> Sexual intercourse is unlawful if it occurs without:

- *Milk*, or
- *Shubhat milk*.

“*Milk*” refers to the “marital right,” that is, the right to intercourse arising from a marriage. (In former times, the right also can arise from ownership of a female slave.) Obviously, *milk* exists if there is a valid marriage between a man and woman. “*Shubhat*” (from “*shubha*”) refers to resemblance. Hence, “*shubhat milk*” is a resemblance to a marital right. *Shubhat milk* exists if a marriage actually were *fāsid* (defective, voidable), but the husband thought it was valid. *Shubhat milk* also would exist during the waiting period (*’idda*) after a marriage has been irrevocably (i.e., definitely) dissolved, but the husband thought this waiting period was similar to that after a revocable repudiation.

In sum, as long as a husband and his sexual partner are married, or they believed they were, then their intimate relations are licit. The follow-on issue is whether the test for their belief is an objective or subjective one. Under an objective test, the question would be whether an ordinary man in the position of the husband would have thought himself to be married. Under a subjective test, the question would be whether the husband in particular thought himself to be married. Under either test, there also may be a question of whether the belief was reasonable. Exactly how

<sup>11</sup> Saint Augustine, *Sermon On Pastors* (Sermon 46, 9: CCL 41, 535-536), in *THE DEVINE OFFICE — THE LITURGY OF THE HOURS*, vol. IV 272 (New York, New York: Catholic Book Publishing Corporation, 1975) (emphasis original).

<sup>12</sup> See SCHACHT, *supra*, at 178.

these questions are addressed under the *Shari'a* may differ from one jurisdiction to another.

### [D] Evidentiary Requirements

Just as it delineates the substantive *haqq Allāh* offense of *zinā*, the Qur'ān also sets forth evidentiary and procedural rules for the prosecution of this crime. To commence a case of *zinā*, a husband must swear under oath that his wife has committed an unchaste act, namely, adultery. That is, he swears she had sexual intercourse with a man other than him, i.e., one to whom she is not married. Equivalently, he must swear under oath that she has had a child whom he did not father. Depending on the case, the wife may offer an affirmation under oath to the contrary.

If the case involves an unmarried person or persons, then commencement will occur in a slightly different way. A man might level an accusation, under oath, that a woman has committed an unchaste act, such as fornication. That man need not be one of the sexual partners, but rather a witness to the act. One of the partners could accuse the other, but the disincentive for doing so would be strong — namely, possible prosecution of both parties for *zinā*. In all such instances, the woman may make a counter-oath.

Can the accusation be made by a wife against a husband, or a woman against a man? The answer is “yes.” The rules on *zinā* apply equally to men and women. Of course, in practice, the rules are not applied equally. Almost invariably, it is the wife or woman who bears the brunt of the accusation. Table 44-1 summarizes the pattern of accusation under oath and counter-oath, using the five examples set out earlier.

Witnesses play a major role in cases of unlawful intercourse. To prosecute the case, and thus to impose a *ḥadd* punishment for *zinā*, there must be four male witnesses. This requirement emanates from *ṣūrah* 24, *ayah* 4 of the Qur'ān (quoted above). This passage prescribes the need for four male witnesses. The normal number of witnesses called for in a *ḥadd* punishment case is two. Hence, the doubling of the figure represents at least a doubling of the degree of difficulty for successful prosecution of *zinā*.

Table 44-1:  
Possible Ways of Commencing a Case of *Zinā*

Substantive Accusation	Accusation Made Under Oath By	Oath to the Contrary Made By
Fornication, Example (1) — Copulation between two unmarried persons.	A third party, such as a male. Or One of the two sexual partners (unlikely).	The woman accused. Or The other sexual partner.
Adultery, Example (2) — Copulation between a married man and a woman who is not his wife, but rather the wife of another person.	Wife	Husband
Adultery, Example (3) — Copulation between a married woman and a man who is not her husband, but rather the husband of another person.	Husband	Wife
Adultery, Example (4) — Copulation between a married man and an unmarried woman.	Wife	Husband
Adultery, Example (5) — Copulation between a married woman and an unmarried man.	Husband	Wife

But, there is yet more significance to the evidentiary requirement. It clearly means the evidence of a woman in a case of alleged unchastity is not admissible. The testimony of a woman is not admissible to prove the charge of *zinā*. In turn, the hurdle to a woman commencing a case is even higher than that faced by a man. Men — particularly in some traditional Islamic communities — may be unwilling to testify against another man. Indeed, tragically, such men sometimes threaten, intimidate, or commit violence against a woman brave enough even to suggest the infidelity of her husband or of another man.

The evidentiary requirement is “at least” double in difficulty in comparison with most other *haqq Allāh* offenses (except for *kadhf*) because of who the four male witnesses must be, the degree of certainty as to their testimony, and what they attest to. Put bluntly, the four males cannot be just any four guys. Rather, they all must be of strong moral integrity. That is, they must be “*adl*,” which means “trustworthy,” or “of good character.” Relatedly, the testimony they provide must be “*shahadah* evidence,” which means there is no doubt as to its truth. Further, they must have personally witnessed unlawful sexual intercourse between the couple in question. That is, all of them must have personally seen the same unlawful act on the same day.

Professor Hussain aptly summarizes these requirements:

... [T]he evidence required to convict a person of *zinā* liable to *ḥadd* is particularly strict. The offense must be proved by the *shahadah* evidence of

four 'adl (trustworthy) male Muslims, each present at the same time, who must each have seen the act of penetration with their own eyes. *Shahadah* evidence is the strongest kind of evidence; there cannot be even the slightest shadow of doubt. To be 'adl, a witness must be proven to be of impeccable character; otherwise his evidence will be rejected. Using these standards, it is almost impossible to obtain a conviction for *zinā*.<sup>13</sup>

Use of the term "*shahada*" is no accident. It is the first of the Five Pillars of Islam, concerning bearing witness to the oneness of God (Allāh) and to Muhammad as His Messenger. Reciting the *shahada* with sincerity in front of an *Imām* also is how one converts to Islam. Viewed with these points in mind, it becomes quite clear how serious a matter it is when Islamic Penal Law calls for "*shahada*" evidence.

As Professor Hussain says, the strict requirements help explain why prosecutions for *zinā* are so rare, even in a socially conservative society like Saudi Arabia:

The Saudis, who are no slouches at enforcement of the criminal law, say that a conviction for *zinā* is obtained only *about once every hundred years* in their country.<sup>14</sup>

Indubitably, the strict requirements are the key reason for this rarity. Aside from the sad spectacle of viewing pornographic movies and television programs, it is not an everyday occurrence for four men simultaneously to watch a couple in real time engaged in intimacy outside the bonds of marriage. To be sure, in poor communities, the couple does not have the luxury of inhabiting a large house with separate, locked rooms. In some Muslim countries, it can be difficult for an unmarried couple to check into a hotel room. Even in this latter respect, however, with reforms in the Kingdom, it is possible for a woman to check into a hotel room on her own, though typically the floors of the hotel will be segregated by gender, or by singles versus couples and families. There also may be truly odd cases in which a couple records its misdeed on camera, only to have the tape wind up in the hands of authorities. Nevertheless, most couples engaged in infidelity do so discreetly, especially with the punitive risks the couple runs under the *Shari'a*.

Being witness to sexual intercourse is not enough. The second point to which all four male witnesses must attest is to the fact that what they saw was unlawful. In a case of adultery, that means the witnesses must know of the validity of any marriage in which one of the parties engaged in intimacy is involved, and of the matrimonial state of the other party, namely, that the other party is either validly married to someone else, or not married at all. In a case of fornication of two unmarried persons, the witnesses must know the persons are not validly married to each other. This kind of knowledge presumes the witnesses are familiar with the personal histories of both parties in the couple.

It is not enough that the four witnesses be 'adl, offer *shahadah* evidence, and testify to personal knowledge of unlawful intercourse and the matrimonial state of both parties in the couple. All four witnesses must be present at the trial. Further they must be present at the punishment. Indeed, there appear to be some

<sup>13</sup> HUSSAIN, *supra*, at 137.

<sup>14</sup> HUSSAIN, *supra*, at 137 (emphasis added).

circumstances in which they must be participants in the punishment. In such instances, if the punishment is stoning, then they must cast the first stone. Otherwise, the *hadd* punishment is not administered.

Why are the evidentiary requirements concerning *zinā*, as set out in *surah* 24, *ayah* 4, of the Qur'ān, so demanding? The answer comes soon after that *ayah*. An accusation of unchaste behavior was brought against one of the wives of Muhammad, 'Ā'isha. That accusation was false, as *ayah* 10-21 indicate. False accusation of unlawful sexual intercourse is a *haqq Allāh* offense, with the *hadd* punishment set out in *ayah* 4 itself. From an authentic Islamic perspective, the requirements are demanding to protect women from the kind of tribulation that befell 'Ā'isha.

Additionally, Professor Schacht offers an observation relevant to answering the question posed.<sup>15</sup> As a matter of cultural practice, in unchastity cases, Muslims tend not to want to give evidence. On other subjects, many Muslims might regard providing testimony as a religious duty. But, in cases involving a possible *hadd* punishment, the preference is to keep silent about the matter, and there is even skepticism about the probative value of giving an oath. Thus, strict evidentiary requirements help ensure those Muslims who may be eager to testify to the unlawful sexual behavior of someone else are put to the test, as to their personal character and quality of their testimony.

Modern forensic science has ushered in new crime-fighting techniques, some of which have been chronicled in dramatic television programs like CSI. One such technique is the use of DNA evidence. It is increasingly common for such evidence to be used under American Criminal Law. Indeed, DNA evidence has resulted in the reversal of many convictions for serious crimes, and even exonerated persons on death row. Is DNA evidence admissible under the *Shari'a* in a case of *zinā*? The answer is yes, and it is increasingly — though still infrequently — used. However, DNA evidence cannot be used in lieu of a witness. That is, the testimony of four male witnesses remains a requirement.

There is a second way in which to prosecute a case of *zinā*, and that is on the basis of a four-fold confession. Professor Hussain explains:

The other way *zinā* may be proved is by confession, but confession also is subject to rigorous standards. The confession must be *voluntarily* made on *four separate occasions before the court*, when the person confessing is *aware of the nature of the offense and the prescribed punishment*.<sup>16</sup>

Here, too, the requirements are strict. Only if each of them is met can the *hadd* punishment be imposed.

First, given the prejudicial views sometimes harbored by non-Muslims about the *Shari'a*, and the sorry record in some Muslim countries of safeguarding the rights of criminal suspects and defendants, it is important to state categorically that a confession may not be extracted by torture. Indeed, that is a general principal in

<sup>15</sup> See SCHACHT, *supra*, at 198.

<sup>16</sup> HUSSAIN, *supra*, at 137 (emphasis added).

Islamic Penal Law.<sup>17</sup> Rather, the confession must be given of one's own free will. To safeguard further the rights of the confessing party, the admissions must be in front of an Islamic judge (*qāḍī*).

Second, four distinct confessions are required. The confessions must be specifically about unlawful sexual intercourse. Thus, the party confessing must admit to the elements that constitute the crime of *zinā*. The confessing party has time to reflect between the occasions — unless there is an abuse of process, and the party is pressured to confess four times all in short order. Such an abuse invalidates the confessions. It is the *Hanafi* School, in particular, that champions the doctrine that *zinā* must be admitted to four times. The Qur'ān does not specifically call for a four-fold confession, and the *Sunnah* is silent on the matter. The Ancient Schools of Law at Basra and Kufa used analogical reasoning (*qiyās*) to reach the following conclusion: if the Qur'ān prescribes the need for four witnesses to *zinā*, then by parity four confessions must be needed.<sup>18</sup>

Third, the confessing party must understand what he or she is doing. They must be clear in their mind that they are admitting to *zinā*, and that this crime carries a *ḥadd* punishment. This requirement suggests some obligation on the part of law enforcement authorities, or the Islamic court, to apprise the party of the nature of the offense and the concomitant punishment. Presumably, if a party confesses to unlawful sexual intercourse and genuinely had no knowledge of what that meant or its consequences, then that party would not be liable for the *ḥadd* punishment. Indeed, the case might well be one of mental incapacity on the part of the confessing party.

Why might a person confess to *zinā* freely, four times, and with full knowledge of the offense and the sanction? The answer depends on the individual and context. But, as a general matter, religion is the answer. Some persons prefer to suffer a punishment they believe they deserve on this earth — a punishment condoned by God (Allāh) — than to suffer eternally in hell. By admitting their wrongdoing now, they may fare better on the Day of Judgment that awaits them after their death. This admission, however, begs an important question: if a *ḥadd* punishment is imposed on this earth, does Allāh punish the person again on the Day of Judgment? The majority view among *Sunni* Scholars is "no." They point out that the punishment is for a *ḥaqq Allāh* offense. There is no need for God to assert His claim, and punish the same offense twice. The minority view is the contrary, namely, that there is (or at least could be) punishment again in the afterlife.

The three requirements presume that a confession is offered orally, in writing, or both. Is there any other way to "confess" to *zinā*? In particular, can a pregnancy of a woman be regarded as a confession to unlawful sexual intercourse? If the woman is married, then the obvious answer is "no." No inference about whether intimacy occurred outside of the bonds of marriage can be drawn from the mere fact of pregnancy. Instead, a medical test concerning DNA and paternity would be required to uncover the legitimacy of the child, and thus whether the sexual partner was the lawful husband or another man. Even then, whether that test, coupled with

<sup>17</sup> See SCHACHT, *supra*, at 197.

<sup>18</sup> See SCHACHT, *supra*, at 38.

the pregnancy, could be taken as a "confession" is dubious. Still more dubious is the case of an unmarried woman. The majority of the *Sunni* Schools — *Hanafi*, *Shāfi'i*, and *Hanbali* — agree that the pregnancy of an unmarried woman is not a confession. They reason that there could be explanations for the pregnancy other than unlawful intercourse. Perhaps the woman held the mistaken view that she was validly married. Perhaps, tragically, the woman was raped.

*Imām* Mālik, however, takes a somewhat different view. Any unexplained pregnancy should be considered a confession to *zinā*. The only exception is where the woman manifests a lack of consent to intercourse, either at the time of intercourse, or shortly thereafter. In other words, for *Imām* Mālik and his followers in the *Māliki* School, unless the case is one of rape that is protested or complained of by the woman, the pregnancy of an unmarried woman is a confession to *zinā*. It scarcely needs mentioning that this approach is traditional, and works to the considerable detriment of unmarried women, particularly when coupled with the strict evidentiary requirements for proving rape — a point made by Muslim women scholars such as Professor Hussain.<sup>19</sup>

### [E] Ḥadd Punishment

The Qur'ān does not identify stoning to death as the punishment for *zinā*. The Qur'ān actually prescribes 100 lashes, as indicated in the above quotation from *surah* 24, *ayah* 2. Arguably, the lashes need not be administered with a cane, rod, or whip. In a footnote to *ayah* 2, concerning the statement about striking the adulteress and adulterer 100 times, Professor Abdel-Haleem observes:

*Jalada* in Arabic means "hit the skin" with the hand or anything else. There are reports that people used shoes, clothes, etc. (Bukhari, *Hudud* 4).<sup>20</sup>

The obvious point is the *ḥadd* punishment, perhaps, need not be a brutal one. Hitting the skin with a scarf — in theory, at least — might qualify.

Nevertheless, when the skin of a person convicted of *zinā* is hit, the instrument typically is severe. Moreover, as is well known, there is another *ḥadd* punishment for *zinā* — stoning. Because stoning is not set out in the sacred text, arguably it is not technically a "ḥadd punishment," unless that term is meant to include sanctions set out either in the Qur'ān or through the *Sunnah* of the Prophet.

In practice, the less severe *ḥadd* punishment (flogging) is used for less egregious cases of *zinā*, particularly fornication among unmarried persons. Thus, for instance, in Saudi Arabia, a *Hanbali* (*Wahhābi*) jurisdiction, the punishment for fornication between two consenting unmarried adults is flogging of 100 lashes each. The more severe *ḥadd* punishment (stoning) is used for the more notorious cases — namely, those in which one or both of the parties to unlawful intercourse is married. The line between the two occurrences is not always clear. It may differ from one *Shari'a* jurisdiction to another, and even one Islamic judge (*qāḍī*) to another, and depend on the precise facts.

<sup>19</sup> See HUSSAIN, *supra*, at 138.

<sup>20</sup> Qur'an, *supra*, fn. b to 24:2 at 220 (emphasis added).

Why is stoning included as a punishment for *zinā*, when it is not identified in the Qur'ān? Stoning was the punishment for adultery in Jewish Law — the Law of Moses. *The Book of Leviticus* in the Old Testament states:

If a man commits adultery with his neighbor's wife, both the adulterer and the adulteress shall be put to death.<sup>21</sup>

This passage does not expressly mention stoning as the means of execution. But, that this punishment was called for in Old Testament times is clear from *The Book of Deuteronomy*. It identifies stoning, albeit not necessarily in connection with adultery:

<sup>22</sup>If there is found among you, in any one of the communities which the LORD, your God, gives you, a man or a woman who does evil in the sight of the LORD, your God, and transgresses his covenant, <sup>23</sup>by serving other gods, or by worshipping the sun or the moon or any of the host of the sky, against my command; <sup>24</sup>and if, on being informed of it, you find by careful investigation that it is true and an established fact that this abomination has been committed in Israel: <sup>25</sup>you shall bring the man (or woman) who has done the evil deed out to your city gates and stone him to death. <sup>26</sup>The testimony of two or three witnesses is required for putting a person to death; no one shall be put to death on the testimony of only one witness. <sup>27</sup>At the execution, the witnesses are to be the first to raise their hands against him; afterward all the people are to join in. Thus shall you purge the evil from your midst.<sup>22</sup>

No earthly punishment is prescribed in the New Testament, but rather there is a famous case of an adulteress recounted in *The Gospel of John* (and discussed below).

As for the Qur'ān, it states in *surah 5, ayah 41*:

Messenger [Muhammad], do not be grieved by those who race to surpass one another in disbelief — those who say with their mouths, "We believe," but have no faith in their hearts and the Jews who listen eagerly to lies and to those who have not even met you, who distort the meanings of [revealed] words and say [to each other], "If you are given this ruling, accept it, but if you are not, then beware!"<sup>23</sup>

This verse seems to have nothing to do with the *ḥadd* punishment for *zinā*. But, Professor Abdel Haleem explains:

According to most interpreters, this [*ayah*] refers to a case where an eminent Jewish man and woman committed adultery. The Jewish community did not want to apply the biblical penalty of stoning, so they sent representatives to the Prophet to ask for a ruling, saying "If he orders you

to apply lashing, accept it, but if he orders stoning, do not accept it." (Razi).<sup>24</sup>

Accordingly, based on a *ḥadīth*, the punishment of stoning for *zinā* developed. The *ḥadīth* involved a woman who became pregnant through adultery, and apparently was sentenced to stoning with the approval of the Muhammad.

Accordingly, the overall sanctions scheme for *zinā* involves either flogging or stoning, depending on whether the couple engaged in unchaste behavior is married. As Professor Hussain summarizes:

In Islamic law, men and women should be treated equally with regard to *zinā*. There is some difference of opinion among the jurists as to the penalty. The Qur'ān prescribes 100 lashes, but the majority of the jurists agree that, on the authority of the *ḥadīth*, that the proper punishment for married adulterers is stoning to death, and the unmarried should be awarded 100 lashes.<sup>25</sup>

In sum, adultery triggers the death penalty, while fornication among unmarried persons triggers flogging. The distinction may be justified on the basis of the sanctity of marriage. While marriage is not viewed in Islam as a sacrament, as it is in Catholic Christianity, as the very concept of a sacrament is unknown in Islam, without doubt Islam cherishes the marriage bond. Violating it is a worse offense than unchaste behavior between two unmarried persons — though the attendant corporal punishments are contentious.

Note the initial observation of Professor Hussein in the above-quoted passage. Men — not just women — can be prosecuted for *zinā*. Nothing in the Qur'ān suggests only women are susceptible to this prosecution. Regrettably, in practice, cases of *zinā* brought against men are rare, and it is women who bear the brunt of not just the ignominious prosecution, but worse yet, the horrible death by stoning.

In practice, is the *ḥadd* punishment imposed in every instance of a successful prosecution for *zinā*? The answer is "no." Professor Schacht identifies instances in which an Islamic judge (*qāḍī*) may impose a discretionary (*ta'zīr*) sanction, such as a prison sentence, in lieu of a *ḥadd* punishment.<sup>26</sup> Illustrations include homosexual behavior and sexual intercourse with a prostitute. The liability also may be for a financial obligation — such as a monetary fine, or payment of a "fair *mahr*" (i.e., a fair nuptial gift).

Critically, other instances in which the *ḥadd* punishment might not be imposed concern a person who is a "*muḥṣan*."<sup>27</sup> This term "*muḥṣan*" has two meanings:

- A person who has never committed unlawful intercourse (*zinā*).
- A person who has concluded and consummated a valid marriage.

<sup>24</sup> QUR'AN, *supra*, fn. b to 5:41 at 71.

<sup>25</sup> HUSSAIN, *supra*, at 136-137 (emphasis added).

<sup>26</sup> See SCHACHT, *supra*, at 178.

<sup>27</sup> See SCHACHT, *supra*, at 125, 178-179.

<sup>21</sup> *The Book of Leviticus*, 20:10, in BURL, *supra*, at 130.

<sup>22</sup> *The Book of Deuteronomy*, 17:2-7, in BURL, *supra*, at 205-206 (emphasis added).

<sup>23</sup> QUR'AN, *supra*, 5:41 at 71.

A “*muḥṣan*” in the first sense is free from being falsely accused of wrongful intercourse. Because no *zinā* ever occurred, he or she cannot be charged with *kaḍhf* (discussed below). But, a “*muḥṣan*” in the second sense is liable for the charge of *zinā*. In turn, such a person is subject to the most severe *ḥadd* punishment, namely, stoning to death.

Conversely, consider a defendant who is not a “*muḥṣan*.” Such a person may have committed *zinā*, but did not conclude or consummate a valid marriage. For this non-*muḥṣan*, the *ḥadd* punishment liability is 100 lashes. For example, suppose an unmarried man has sexual intercourse with a married woman. The unmarried man is not a *muḥṣan*, and subject to flogging. For this non-*muḥṣan*, an Islamic judge (*qāḍī*) also might impose a *taʿzīr* sanction of imprisonment of 1 year. (Indeed, that appears to be so in Saudi Arabia.) As for the married woman, she is a *muḥṣan*, because she has concluded and consummated a valid marriage. So, she is subject to stoning to death.

Additionally, an unbeliever, i.e., a non-Muslim, is considered not to be a “*muḥṣan*.” Thus, the *ḥadd* punishment typically is not imposed on him or her, because of the status as a non-Muslim. But, the liability may be one for a *taʿzīr* punishment decided upon by a *qāḍī*. That sanction likely would involve imprisonment.

It cannot go without mention that the Islamic sanction for adultery is entirely distinct from that in Catholic Christianity. The well known case of a woman accused of adultery, from the *Gospel of John*, is as follows:

<sup>26</sup>But early in the morning he [Jesus] arrived again in the temple area, and all the people started coming to him, and he sat down and taught them.

<sup>27</sup>Then the scribes and the Pharisees brought a woman who had been caught in adultery and made her stand in the middle. <sup>28</sup>They said to him, “Teacher, this woman was caught in the very act of committing adultery. <sup>29</sup>Now in the law, Moses commanded us to stone such women. So what do you [Jesus] say?” <sup>30</sup>They said this to test him, so that they could have some charge to bring against him. Jesus bent down and began to write on the ground with his finger. <sup>31</sup>But when they continued asking him, he straightened up and said to them, “Let the one among you who is without sin be the first to throw a stone at her.” <sup>32</sup>Again he bent down and wrote on the ground. <sup>33</sup>And in response, they went away one by one, beginning with the elders. So he was left alone with the woman before him. <sup>34</sup>Then Jesus straightened up and said to her, “Woman, where are they? Has no one condemned you?” <sup>35</sup>She replied, “No one sir.” Then Jesus said, “Neither do I condemn you.

Go, [and] from now on do not sin anymore.”<sup>28</sup>

This story is intriguing in several respects. First, it is the only instance in the New Testament in which Jesus is writing. Lawyers and law students understandably tend to focus on the written word, and identify great figures in history with their published works. Yet, three of the most influential figures in all human history — Socrates, Christ, and Muhammad — left no written works.

<sup>28</sup> *The Gospel According to John*, 8:2-11, in BIBLE, *supra*, at 161-162 (emphasis added).

Second, what Jesus wrote remains a mystery. He wrote on the ground, and thus the content has long since disappeared. One conjecture is that Jesus wrote the names of the scribes and Pharisees who had themselves committed adultery or other unchaste acts. That conjecture is consistent with what Christ subsequently says — namely, in declining to reaffirm the Mosaic punishment, Jesus points out their hypocrisy.

In sum, Catholic Christian doctrine is that adulterers are to sin no more and be forgiven, as Christ did with respect to the adulteress. More generally, no sin is unforgivable, if genuine repentance is shown, and conversely hypocrisy is among the most heinous of sins. There is a slight analogy here with Islam, in that God (Allāh) is merciful and may forgive unchaste behavior, as did Christ, who is the Son of God to all Christians. But, the key difference is the punishment on this earth.

## § 44.02 ZINĀ AND RAPE

### [A] Consent

Is consent an element of *zinā*? With one limited exception, the answer is “no.” Professor Hussain explains:

*Zinā* includes rape, adultery, and fornication between unmarried persons, though the *Mālikī* jurist Al-Dasuqi classified rape under the heading of *Al-hirabah* [a crime against society that undermines its security].<sup>29</sup>

That is, whether sexual intercourse is voluntary or involuntary is irrelevant in prosecuting *zinā*. Non-consensual sex is rape, typically with the woman being the non-consenting party. Rape is included in the scope of *zinā*, and thereby treated as a *ḥaqq Allāh* offense.

Only one *Mālikī* School jurist, and presumably his adherents, offer a different approach. Arguably, the alternative approach is complementary, but graver, than the conventional one. That is because a *hirabah* offense is a crime against society, one that undermines the security of society. To the extent the alternative approach considers *zinā* as both a *ḥaqq Allāh* and *hirabah* offense, it treats rape more seriously than the conventional one, which treats rape as a *ḥaqq Allāh* offense alone.

So much for the theory — what about the practice? Tragically, not uncommonly, rape is treated distinctly from *zinā*. In all too many situations, in Muslim countries like Afghanistan, Bangladesh, Pakistan, and Saudi Arabia, a *bona fide* case of rape is not treated as *zinā*. A woman victimized by the violence of men, yet courageous enough to speak up against her accusers may find herself being the accused — a dangerous and tragic occurrence that is all the more likely if the men involved are powerful or well-connected. In other words, the victim of rape (the woman) winds up being prosecuted for unlawful sexual intercourse on the entirely wrong-headed and skewed view of the “facts” that she consented to the sex, and may even have encouraged it. The result is that *zinā* in the form of rape goes unprosecuted, and — in the most egregious cases — the victim may be stoned to death or flogged. The

<sup>29</sup> HUSSAIN, *supra*, at 136 (emphasis added).

"best" scenario is the woman perseveres in a shattered physical, psychological, and emotional state, angry, scared, and without justice.

Such occurrences are not authentically Islamic. To the contrary, they reflect a lack of understanding and application of true Islamic Penal Law, which in turn has deeper causes, such as poor education, backward cultural biases against women, and poverty. Fortunately, advocates for the rights of women are actively campaigning for change.<sup>30</sup>

A poignant and potentially tragic situation occurs when a rape victim becomes pregnant on account of the crime against her. Is the woman permitted to abort the baby she now carries? There is a majority consensus (*ijma'*) among Islamic religious scholars (*ulema*) who respond "no." This view appears comparable to the traditional teaching of the Catholic Church, which (in brief) is that life begins at conception, the rapist should be penalized for his crime, but the child — who, like the mother, is innocent — should not be put to death for the crime of another. Rather, the child should live, and if circumstances mandate (such as a young mother or mother ill-prepared to care for the child), should be given for adoption. However, there is a minority view among the *ulema*. This view holds that it is permissible for a female rape victim to abort her pregnancy. The rationale offered is that the child is the product of a forbidden act, namely, *zinā*.

A final question is whether, in the eyes of the *Shari'a*, a man can be "raped" by a woman? In American Criminal Law, prosecution of a woman for raping a man is possible. Such prosecutions are rare, however. When two adults are involved, even if the husband is a victim of a persistent pattern of abuse, it is difficult to overcome the defense that the husband simply could have "walked away." Some cases have involved a female teacher raping a minor, namely, an elementary or middle school student, though technically the charge pressed could be corruption of a minor as distinct from, or in addition to, rape. In contrast, most Islamic legal scholars (*fukahā'*) say "no." That is, the majority consensus (*ijma'*) is that rape is a crime perpetrated exclusively against women. Thus, it is not possible to impose on a woman a *hadd* punishment for rape. But, a minority of *fukahā'* say a man can be raped by a woman. In such cases, the minority argues, the female rapist is liable for a *hadd* punishment.

### [B] Difficulty of Prosecuting Rape

The independent Human Rights Commission of Pakistan reports (as of November 2006) that in Pakistan, a woman is raped every two hours, and gang raped every eight hours.<sup>31</sup> These statistics are shocking, all the more so because they are considered underestimations, as many rapes go unreported. As they are,

<sup>30</sup> For example, there is a group known as "Karamah," or the Muslim Women Lawyers for Human Rights, based in Washington, D.C. Its website is [www.karamah.com](http://www.karamah.com). This group also publishes position papers on a range of issues, including *zinā*, and posts them on its website. See [www.karamah.org/articles.htm](http://www.karamah.org/articles.htm).

<sup>31</sup> See *Pakistan Votes to Amend Rape Laws*, BBC NEWS, 15 November 2006, posted at <http://news.bbc.co.uk>.

the statistics indicate rape poses a central problem for Islamic Penal Law and women's rights.

On the one hand, *zinā* includes rape. That is helpful insofar as it highlights the seriousness of rape — a crime against God (Allāh). On the other hand, by including rape within *zinā*, the Penal Law also imposes the same evidentiary requirements in a rape case as in a case of consensual unlawful sex. Those requirements are too strict, impeding a woman from bringing a charge of rape in the first place, or making successful prosecution all but impossible. Note that under the *Shari'a*, DNA evidence can be used in a rape case — but, as with any case of *zinā*, it cannot be used in lieu of a witness. The testimony of four male witnesses still is necessary, and the testimony of a woman is not admissible to prove the charge of rape.

Why not simply alter the evidentiary requirements for rape? Professor Hussain comments:

The definition of *zinā* includes rape, and, where the same evidential standards are imposed, it becomes virtually impossible for a woman to prove that she was raped since few rapists choose to commit the crime in the presence of four upright Muslim men. . . . [T]he unfortunate victim, who has admitted sexual intercourse by laying the complaint, may be prosecuted while the rapist goes free. The Modern thinking is that the evidential standard mentioned in the Qur'an for *zinā* should not be applied to rape, since there are *hadith* in which the Prophet convicted men of rape on the evidence of the victim alone. There is no doubt that the traditional approach can lead to injustice — an analysis of decisions of the courts in Pakistan has shown a bias against female testimony and a tendency to arrest and imprison women for *zinā* on the basis of unsubstantiated allegations.<sup>32</sup>

In other words, Traditionists — who through the ages have been mainly men — decry any change as running afoul of the Qur'an, whence the four-male-witness rule comes. Modernists cite the example of the Prophet Muhammad. The *Sunnah* offers a clear example of a judgment of rape on the testimony of less than four male witnesses. Traditionists rebut that the Qur'an must take precedence over the *Sunnah*. The latter source of the *Shari'a* concerns the words and deeds of the Prophet. But, the former source is the Word of God (Allāh) that cannot contradict itself or be altered by the Prophet or interpretations of statements and actions of Muhammad. Modernists offer the following surrebuttal: Nothing in Islam requires Muslims to stop thinking. That is, surely the Prophet would not have rendered the decisions he did if he thought he was contradicting a revelation. Instead, why not see the issue as one in which the Qur'an does not preclude the singling out of rape from other cases of *zinā* in respect of evidentiary requirements, particularly if doing so is consistent with the moral and ethical teachings of Islam as to how one human being ought to treat another. In brief, Modernists urge, the Traditionist view is antediluvian and unsophisticated, and results in grave injustices.

<sup>32</sup> HUSSAIN, *supra*, at 139.

### [C] *Hadd* Punishment

As indicated earlier, under the Classical approach to the *Shari'a*, rape falls within the ambit of *zinā*, and thereby treated as a *haqq Allāh* offense. Consequently, the *hadd* punishment is stoning to death, or 100 lashes. Are these sanctions actually imposed in Islamic countries? The short answer is "yes." However, there are some instructive illustrations suggesting modest variations.

The *Māliki* School holds that the punishment for a man convicted of rape is stoning to death, if the man is married. But, if the rapist is a man who is unmarried, then the punishment is 80 lashes, plus blood money equal to what the payment would be for marriage (i.e., a fair nuptial gift, or *mahr*). In addition, an Islamic judge (*qāḍī*) may add a *ta'zīr* punishment, particularly imprisonment of more than one year. Is the female victim of the rape punished? No, answers the *Māliki* School, because she is not at fault.

In Saudi Arabia, the sanction for rape is 100 lashes, plus a *ta'zīr* punishment decided by an Islamic judge (*qāḍī*). The *Hanbali* (*Wahhābī*) School, to which the Kingdom adheres, regards the *Māliki* School punishment of 80 lashes as insufficiently severe, on the ground that rape is a crime of violence. An egregious case occurred in the early years of the new millennium when a young Saudi male videotaped and posted live on the internet himself and his friends raping a woman. The sanction for the lead perpetrator was not only 100 lashes, but also a *ta'zīr* punishment of 8 years jail.

### [D] Struggle in Pakistan

At least in Pakistan, the Modernists appear to have the upper hand in the debate. In November 2006, the Parliament in Islamabad voted to amend the strict *Shari'a* rules on rape.<sup>33</sup> Those rules had been in place under the 1979 *Hudood Ordinance*, which was a controversial set of Islamic Laws put in by the military ruler and sixth President of Pakistan, General Muhammad Zia ul-Haq (1924-1988). The *Ordinance* included the Qur'anic evidentiary requirements and *hadd* punishments for *zinā*, including rape.

Under the 2006 *Women's Protection Bill*, it is not necessary for a rape victim to have four male witnesses, without which they faced the charge of *zinā*. Instead, prosecutions for rape are made under secular law. Traditionists — that is, religious parties — boycotted the vote. They claimed the *Bill* would "turn Pakistan into a free-sex zone," was "a harbinger of lewdness and indecency in the country," and contrary to the Qur'an and *Shari'a*.<sup>34</sup> In truth, these claims seemed to be little else than a veil over an un-Islamic *status quo* in which men could behave more or less with impunity in respect of women. Yet, the extent to which the *Bill* actually is

<sup>33</sup> See *Pakistan Votes to Amend Rape Laws*, BBC News, 15 November 2006, posted at <http://news.bbc.co.uk>. In September 2006, Traditionists successfully blocked an earlier version of the legislation, which would have allowed rapists to be tried under secular law and the *Shari'a*. Human rights groups thought the earlier version was unwise, because it would have created confusion and allowed strong religious groups to manipulate the weak secular judiciary in Pakistan. See *id.*

<sup>34</sup> *Pakistan Votes to Amend Rape Laws*, BBC News, 15 November 2006, posted at <http://news.bbc.co.uk> (quoting opposition views).

implemented and its protections enforced to the benefit of rape victims remains to be seen.

### [E] Date Rape and Marital Rape

The concept of "date rape," which is present in the American Criminal Law system, does not exist in the *Shari'a*. "Date rape" involves copulation between two unmarried persons, with one of the partners later contending that the sexual encounter was not consensual. Often, such cases involve college students and excessive alcohol, and the male partner did not understand or ignored the protestations of the female partner. Such cases can be difficult to prosecute, as they involve contested accounts of what really happened and, put colloquially, whether "no" really meant "no." In the *Shari'a*, "date rape" would be treated as fornication as per example (1) earlier.

Likewise, the concept of "marital rape" does not exist in the *Shari'a*. Under United States Criminal Law, that is, in the statutes of certain states, one spouse, typically the husband, can be prosecuted for forcing sexual intercourse on the other spouse, typically the wife. However, such prosecutions are rare, because typically the marriage will have a history of consensual sex. Thus, as an evidentiary matter, it will not be easy to differentiate normal marital intimacy from non-consensual sex, or again put colloquially, it will be difficult to rebut the defense that a wife simply regrets the particular sexual encounter at issue. Moreover, DNA evidence is pointless in such a case, as there is no doubt the partners are married. Under the *Shari'a*, it is considered religiously prohibited (*ḥarām*) for a husband to force his wife to have sex with him, but when such behavior occurs, it is not prosecutable as a *zinā* offense.

## § 44.03 ZINĀ AND HOMOSEXUALITY

### [A] Islamic View

There is no doubt Islam looks askance at homosexuality. There are three key passages in the Qur'an:

- *Surah 4, ayah 15:*

If any of your women commit a *lewd* act, call four witnesses from among you, then, if they testify to their guilt, *keep the women at home until death comes to them or until God gives them another way out*.<sup>35</sup>

The "other way out" could be "another regulation, or marriage, or any other way," reports Professor Abdel Haleem.<sup>36</sup>

- *Surah 4, ayah 16:*

<sup>35</sup> Qur'an, *supra*, 4:15 at 52 (emphasis added).

<sup>36</sup> Qur'an, *supra*, fn. a to 4:15 at 52.

If two men commit a *lewd* act, punish them both; if they *repent* and *mend their ways*, leave them alone — God is always ready to accept repentance, He is full of *mercy*.

While the term used in the first two passages is “lewd,” the first passage pertains to lesbianism, and the second one to gay sex.

- *Surah 29, ayat 28-30:*

<sup>38</sup>And Lot: when He said to his people, “You practice *outrageous* acts that no people before you have ever committed. <sup>39</sup>How can you *lust after men*, waylay travelers, and commit *evil* in your gatherings?,” the only answer his [Lot’s] people gave was, “Bring God’s punishment down on us, if what you say is true.” <sup>40</sup>So he [Lot] prayed, “My Lord, help me against these people who spread *corruption*.”<sup>41</sup>

The context of this passage is the story of how God (Allāh) sent Noah, Abraham, Lot, and other prophets before Muhammad. (This passage also is relevant to highway robbery.) “Lusting after men” — presumably by other men — is listed with other “evils,” all of which Lot dubbed “corruption.”

Most *fukahā* treat homosexuality as within the scope of *zinā*. They point to the above-quoted passages in support. A close reading of the three passages, however, gives rise to debate about this conclusion. An even more difficult question is whether homosexual behavior or sodomy — assuming it is considered a *haqq Allāh* offense — triggers a *hadd* punishment? Islamic legal scholars (*fukahā*) do not agree on the answer.

Accordingly, for most *fukahā*, the appropriate focus of debate is on the correct punishment. Some *fukahā* advocate the most severe of *hadd* punishments. Others treat homosexuality as a less serious form of unlawful sexual intercourse, and thereby call for imposition of flogging (with a lesser number of lashes than 100), but not death. Professor Schacht reports the applicability of a *hadd* punishment for homosexual behavior is debated in Islamic legal circles.<sup>38</sup> In some such instances, particularly involving lesbianism, a discretionary (*ta’zīr*) sanction decided by an Islamic judge (*qāḍī*) is imposed in lieu of a *hadd* punishment.

In respect of this debate, a careful reading of the Qur’anic passages quoted above is important. *Surah 4, ayah 15* does not call for lesbian women to be stoned, or even flogged. The most serious punishment is for them to be “kept at home” until they die — in effect, house arrest for life. This passage also admits the possibility that God (Allāh) may give them an alternative, some of which are spelled out above. *Surah 4, ayah 16* also does not specifically identify stoning or flogging for gay men. It calls ambiguously for a punishment. Significantly, it hastens to add that should they repent and amend their way of life, they are to be left alone. This passage concludes with a reminder of Divine Mercy, a reminder that surely applies to homosexual women and men. To be sure, the repentance must be genuine, as *surah 4, ayat 17-18* make clear:

<sup>37</sup> Qur’AN, *supra*, 5:33-34 at 71 (emphasis added).

<sup>38</sup> See SCHACHT, *supra*, at 178.

<sup>37</sup>But God only undertakes to accept repentance from those who do evil out of ignorance and soon afterwards repent: these are the ones God will forgive, He is all knowing, all wise. <sup>38</sup>It is not true repentance when people continue to do evil until death confronts them and then say, “Now I repent,” nor when they die as disbelievers: We have prepared a painful torment for these.<sup>39</sup>

As for *surah 29, ayat 28-30*, these verses simply do not identify a precise kind of punishment for homosexual behavior. The reference to “God’s punishment” suggests a *hadd* sanction. But, the problem with this reference is that it is in the context of Lot’s people challenging, indeed almost taunting, God. That is, it is not a reference in which God (Allāh) says “this is the punishment for homosexuality.”

What is clear is homosexuality remains a taboo subject in all Islamic countries. In consequence, gays and lesbians lead a very difficult, secretive life, and are subject to inexcusable discrimination and violence. In the summer 2009, a prominent court in India — which is a religiously pluralistic country with a secular constitution — ruled that a law dating from the English Colonial Era that criminalized homosexuality was unconstitutional. The judgment followed a long campaign by advocates for gay rights. It remains to be seen whether the ruling will make an equal impression in the Muslim communities of India, and what kind of impression. That also is true in respect of Muslim countries. As for the United States, with the 2003 Supreme Court decision in *Lawrence v. Texas*,<sup>40</sup> which overruled a 1986 Supreme Court decision in *Bowers v. Hardwick*,<sup>41</sup> state laws on sodomy became unconstitutional. Nevertheless, sodomy remains an offense under the criminal statutes of approximately 21 states — albeit one that is unenforced and, with the Supreme Court ruling, unenforceable.

## [B] Contrast with Catholic Christianity

What also is clear is a distinction between Islamic Penal Law and Catholic Christian teaching about homosexuality. As indicated above, at least according to some Islamic legal scholars, under the *Shari’a*, homosexuality is a *haqq Allāh* offense, and the real debate — if there is to be any — is the severity of the punishment. Catholic teaching differentiates between the act and the actor.

According to Catholic Christian teaching, the act of homosexual sex is a sin. The *Catechism of the Catholic Church* explains:

Homosexuality refers to relations between men or between women who experience an exclusive or predominant sexual attraction toward persons of the same sex. It has taken a great variety of forms through the centuries and in different cultures. Its psychological genesis remains largely unexplained. Basing itself on Sacred Scripture, which presents homosexual acts as acts of grave depravity, tradition has always declared that “homosexual acts are intrinsically disordered.” [The Biblical passages referred to are

<sup>39</sup> Qur’AN, *supra*, 4:17-18 at 52.

<sup>40</sup> See *Lawrence v. Texas*, 539 U.S. 558 (2003).

<sup>41</sup> See *Bowers v. Hardwick*, 478 U.S. 186 (1986).

from the Old Testament, namely, *Genesis* 19:1-29, and from the New Testament, namely, *Romans* 1:24-27, 1 *Corinthians* 6:10, and 1 *Timothy* 1:10. The quotation is from Paragraph 8 of *Persona Humana*, a document of the Congregation of the Doctrine for the Faith.] *They are contrary to the natural law. They close the sexual act to the gift of life. They do not proceed from a genuine affective and sexual complementarity. Under no circumstances can they be approved.*<sup>42</sup>

Most Muslims would agree with the gist of this precept.

Setting aside the specific scriptural bases for it, both great faiths — Islam and Catholicism — teach that homosexual acts are intrinsically and gravely morally wrong. As the italicized language indicates, in addition to the scriptural bases for this teaching, be they Qur'anic or Biblical, there is also a Natural Law foundation on which the teaching stands. It is not possible to procreate through a homosexual act, yet there are two purposes to sexual intercourse: to share love, and to be open to new life. The love-giving and life-creating purposes are inseparable. They entail complete mutual self-giving by the persons involved. The inseparability of the purposes, and the mutual self-giving, is readily apparent from the way in which humans are created as sexually complimentary beings, *i.e.*, men and women. An attempt to separate the two purposes, and gratify one's own pleasure, through a homosexual act runs contrary to the Natural Law.

But, what differentiates the Islamic and Catholic perspectives is the distinction between the act and actor, and the consequences for the actor. The *Shari'a* does not draw that distinction, and punishes the actor — the person engaged in a homosexual act — under the offense of *zinā*. Catholic teaching unambiguously delineates between act and actor: while not approving of homosexual acts, it does not call for the actors to be prosecuted and punished. To the contrary, as the *Catechism of the Catholic Church* explains:

The number of men and women who have deep-seated homosexual tendencies is not negligible. This inclination, which is objectively disordered, constitutes for most of them a trial. They must be accepted with respect, compassion, and sensitivity. Every sign of unjust discrimination in their regard should be avoided. These persons are called to fulfill God's will in their lives and, if they are Christians, to unite to the sacrifice of the Lord's Cross the difficulties they may encounter from their condition.<sup>43</sup>

Manifestly, the actor who commits the sin is to be treated with mercy in a non-discriminatory manner, and most definitely not subjected to persecution. That actor is a person entitled to human dignity.

This approach is founded on a general principle of Catholicism, namely, to hate sin, but not the sinner. Instead of prosecution and punishment, the *Catechism of the Catholic Church* proposes the following:

<sup>42</sup> See *Catechism, supra*, ¶ 2357 at 566 (emphasis added).

<sup>43</sup> See *Catechism, supra*, ¶ 2358 at 566 (emphasis added).

Homosexual persons are called to chastity. By the virtues of self-mastery that teach them inner freedom, at times by the support of disinterested friendship, by prayer and sacramental grace, they can and should gradually and resolutely approach Christian perfection.<sup>44</sup>

Notably, this advice applies also to unmarried heterosexual persons. In religious and scientific circles, there is a vigorous debate (alluded to in the first of the *Catechism* passages quoted above, in respect of the unexplained psychological genesis of homosexuality) about the relative influences of genetics and environment on homosexual tendencies, and about whether such tendencies are permanent or reversible through counseling and therapy. Nevertheless, within the Church, there is no advocacy for criminalization of homosexuality, or for imposition of punishments on homosexuals. An intriguing question is whether a majority of *fukahā'* might one day interpret, or re-interpret, the key Qur'anic passages, perhaps using *ijtihad* (independent reasoning), in a manner akin to Church teaching.

#### § 44.04 FALSE ACCUSATION OF UNLAWFUL SEXUAL INTERCOURSE (*KAHF*)

##### [A] Biblical Comparisons: 8th Commandment

In his novel, *The Scarlet Letter* (1850), Nathaniel Hawthorne provides ample reason why accusing a woman of adultery is a perilous exercise. Hester Prynne, the target of the accusation, thought herself to be a widow.<sup>45</sup> In fact, her husband, Roger Chillingworth, subsequently returned to their Puritan New England village — but he concealed his identity. When he saw his wife forced to wear the scarlet "A," he became obsessed with discovering the person with whom Hester had intimate relations. That person turned out to be Arthur Dimmesdale. He not only was a young minister, but also the leader in the community demanding identification of the father of Hester's child. In the end, Chillingworth destroys himself in seeking revenge against Dimmesdale. Dimmesdale destroys himself with guilt, confesses his adultery publicly, and dies in the arms of Hester. Hester emerges as a heroine, shows courage, and sets on a course with her daughter, Pearl, to migrate to Europe in search of a new life.

Interestingly, there is no rule in the 10 Commandments that specifically refers to false accusation of unlawful sexual intercourse. By no means does that suggest false accusation is regarded with nonchalance. To the contrary, there is a general rule — the 8th Commandment — against bearing false or dishonest witness.<sup>46</sup>

The Old and New Testaments of the Bible are replete with stories of violations of this rule, including the events surrounding the betrayal of Jesus by Judas Iscariot that led to the Crucifixion. Moreover, perjury is a criminal offense in American Law, albeit one difficult to prove because it involves showing not only

<sup>44</sup> See *Catechism, supra*, ¶ 2359 at 566.

<sup>45</sup> See *SCARLET LETTER, supra*; *MERRIAM-WEBSTER'S ENCYCLOPEDIA OF LITERATURE* (Springfield, Massachusetts: Merriam-Webster, 1995).

<sup>46</sup> For Catholic Christian teaching on the 8th Commandment, see *id.*, ¶¶ 2464-2503 at 591-601.

that the statement was materially false, but also that the defendant knew it was materially false when the defendant uttered it. It offends substantive and procedural fairness if perjured testimony is permitted, and of course such testimony can lead to wrong — and even dastardly — adjudicatory outcomes.

### [B] Key Qur'ānic Passages

In contrast to the Old Testament of the Bible, the Qur'ān does single out false accusation of unlawful sexual intercourse as a distinct claim of God (*haqq Allāh*). *Surah 24, ayat 4-21* state:

...<sup>4</sup>As for those who *accuse chaste women of fornication*, and then fail to provide *four witnesses, strike them eighty times*, and reject their testimony ever afterwards: they are the lawbreakers,<sup>5</sup> except for those who repent later and make amends: God is most forgiving and merciful.

<sup>6</sup>As for those who *accuse their own wives of adultery*, but have no other witnesses, let each one *four times* call God to witness that he is telling the truth,<sup>7</sup> and, the fifth time, call God to reject him if he is lying,<sup>8</sup> *punishment shall be averted from his wife if she in turn four times calls God to witness that her husband is lying*<sup>9</sup> and, the fifth time, calls God to reject her if he is telling the truth.

<sup>10</sup>If it were not for God's bounty and mercy towards you, if it were not that God accepts repentance and is wise . . .<sup>11</sup> *It was a group from among you that concocted the lie* — do not consider it a misfortune for you [people]; it was a good thing — and every one of them will be charged with the sin he has earned. He who took the greatest part in it will have a painful punishment.<sup>12</sup> When you heard the lie, why did believing men and women not think well of their own people and declare, "This is obviously a lie"?<sup>13</sup> And why did the accusers not bring *four witnesses* to it? If they cannot produce such witnesses, they are liars in God's eyes.<sup>14</sup> If it were not for God's bounty and mercy towards you in this world and the next, you would already have been afflicted by terrible suffering for indulging in such talk.<sup>15</sup> When you took it up with your tongues, and spoke with your mouths *things you did not know [to be true], you thought it was trivial but to God it was very serious*.<sup>16</sup> When you heard the lie, why did you not say, "We should not repeat this — God forbid! — It is a monstrous slander"?<sup>17</sup> *God warns you never to do anything like this again*, if you are true believers.<sup>18</sup> God makes His messages clear to you: God is all knowing, all wise.<sup>19</sup> A painful punishment waits in this world and the next for those who like *indecently* to spread among the believers: God knows and you do not.<sup>20</sup> If it were not for God's bounty and mercy and the fact that He is compassionate and merciful . . .<sup>21</sup> Believers, do not *follow in Satan's footsteps* — if you do so, he will urge you to *indecently* and *evil*. If it were not for God's bounty and mercy towards you, none of you would have become pure. God purifies whoever he will: God is all hearing, all seeing.<sup>47</sup>

<sup>47</sup> Qur'ān, *supra*, 24:4-21 at 220-221 (emphasis added).

Falsely accusing a woman of adultery or other unchaste behavior is the work of the devil, and thus not only "monstrously slanderous" and "indecent," but also "evil." Muslims are forbidden from making such accusations, unless they can prove them with four witnesses. Even then, the accused woman can rebut the charge by invoking God's help four times to the effect that the accuser is lying.

The seriousness of false accusation of unlawful sexual intercourse — or, as it is called in Arabic, "*kadhif*" — is based not only on the above-quoted passage itself, but also on an event in the life of Muhammad to which the passage alludes. *Ayah 11* speaks of the concoction of a lie. As Professor Abdel Haleem observes:

This [*ayah*] alludes to the accusation made against 'Aisha, the Prophet's wife.<sup>48</sup>

The accusation against 'Āisha (whose father was Abū Bakr, the first of the Four Rightly Guided Calphs) was, of course, false. Given this history, and the express reference in *ayah 6-9* to an accusation made by a husband against his wife, a key question arises: does the crime of *kadhif* apply only to men? Or, can a woman also be prosecuted for this *haqq Allāh* offense triggering a *hadd* punishment against her? Note that the story concerning 'Āisha includes two men and a woman.

The general answer appears to be that either men or women can be prosecuted for the crime. Professor Hussain writes:

If a *person* accuses another of unlawful sexual intercourse and cannot prove it by producing the necessary four witnesses, the accuser will be punished with 80 lashes.<sup>49</sup>

However, in practice, prosecutions against women are rare. A related question is whether only a husband can be prosecuted — as the Qur'ān seems to connote in *ayah 6-9* — or whether any man can be charged with the offense? Here the answer is clear, and is based on *ayah 4*: any person, whether or not related to the woman in question, is within the scope of prosecution. This understanding, too, is suggested by the use of the word "person" in the passage quoted from Professor Hussain.

What is the basic rationale for singling out false accusation of unlawful sexual intercourse, in particular, from bearing false witness, or perjury, in general? One response is historical, namely, the erroneous accusation against a wife of the Prophet, 'Āisha, from her travels in a caravan. Another explanation is systemic. *Kadhif* is a device to protect the dignity, honor, and reputation of women. What happened to 'Āisha should not happen to any woman. There is a third justification, albeit one running afoul of the Orientalist fallacy. In pre-Islamic times on the Arabian Peninsula, the line between marriage and concubinage was thin, sometimes non-existent. By highlighting the gravity of false accusation about the sexual behavior of a woman, the *Shari'a* advances the protection of women vis-à-vis those times.

<sup>48</sup> Qur'ān, *supra*, fn. b to 24:11 at 221 (emphasis added).

<sup>49</sup> Hussain, *supra*, at 138 (emphasis added).

### [C] Elements and Evidentiary Requirements

There are two elements to the crime of false accusation of unlawful intercourse (*kadhif*). The first element concerns the nature or content of the statement. The second element concerns the truth or falsity of the utterance.

First, the accusation must be specific as to one of two events, or both of them:

- Unlawful sexual intercourse (*i.e.*, *zinā*) occurred.
- An illegitimate child was born.

In other words, the statement must be that a woman engaged in illicit sex, or it must impugn the legitimacy of the child of a woman, or both.

It is worth reviewing the behavior that amounts to unlawful sexual intercourse. That is because there is debate in Muslim legal circles as to the applicability of a *hadd* punishment for *kadhif* to married versus unmarried persons. The key is the terminology in *surah* 24, *ayah* 4 versus *ayah* 6, namely, “fornication” versus “adultery,” respectively. “Fornication” refers to voluntary sexual intercourse between two unmarried people, or between people who are married but not to each other.<sup>50</sup> “Adultery” refers to voluntary sexual intercourse between one married person and another person (who may or may not be married) that is not his or her spouse, *i.e.*, intimacy between two people, one of whom is married to another person.<sup>51</sup> Thus, “fornication” is the more general term, because it includes intimacy among two unmarried people. “Adultery” is the more specific term, because it focuses on intimacy outside of the marriage bond. Stated differently, “fornication” includes “adultery,” where intimacy occurs between people who are married but not to each other. But, there are instances of “fornication” that are not “adultery,” where, for example, intimacy occurs between two unmarried people.

A husband, therefore, technically would not accuse his wife of “fornication,” but of “adultery” — having sex with a partner other than him. That is, the word “adultery” in *surah* 24, *ayah* 6 is properly linked to an accusation by a husband. What about *ayah* 4, however? An accusation of “fornication” may be made by anyone, meaning a man could accuse a woman of having sex with someone else, and neither the woman nor that other person is married. Could the accuser allege the woman committed “adultery,” assuming either she or her sexual partner is married? *Ayah* 4 does not rule out that possibility. That is because it uses the term “fornication,” which encompasses “adultery.”

Focusing on the technical terms, it appears Islamic Penal Law is oriented to leaving the charge of adultery to husbands, and the charge of fornication to non-husbands. But, the *Sharīʿa* does not leave a gap in which a non-husband is precluded from accusing a woman of adultery — he could do so by charging “fornication” under *surah* 24, *ayah* 4. Likewise, it does not leave a gap in which a husband is precluded from accusing a woman, not his wife, of fornication — he could do so under *ayah* 4.

<sup>50</sup> See THE OXFORD AMERICAN DICTIONARY AND THESAURUS 576 (New York, New York: Oxford University Press 2004) (entry for “fornicate”). [Hereinafter, OXFORD AMERICAN DICTIONARY.]

<sup>51</sup> See OXFORD AMERICAN DICTIONARY, *supra*, at 23 (entry for “adultery”).

The second element of *kadhif* is that the statement is false.<sup>52</sup> That is, what was said about the woman is not factually correct. The woman did not engage in wrongful sexual behavior. Or, if the first element involves impugning the heritage of a child, then the truth would be that the child in question is not illegitimate. Unless both elements exist, a prosecution for *kadhif* cannot go forward with success.

Even when both elements are present, a variety of factors can bring about dismissal of a charge of *kadhif*. For example, there may be discrepancies in the testimony of the four witnesses who are required to make the charge of *zinā* (unlawful intercourse). Of the four witnesses, one or more of them may not be qualified to give evidence. Possibly, one or more witness may withdraw (*rujāʿ*) his testimony.

As intimated, four male witnesses are required to prove a charge of *kadhif*. That is the same requirement — set out in the Qurʾān, *surah* 24, *ayah* 4 and 6 — as for *zinā*, and the equivalence is deliberate. Because *kadhif* embodies a statement about *zinā*, it would be illogical to require fewer witnesses than *zinā*. That is, analogical reasoning (*qiyaas*) supports the requirement of four male witnesses for the false accusation crime. Requiring more witnesses, however, would make a charge of *kadhif* even more difficult to prove, and thus lessen the protection afforded to the dignity, honor, and reputation of women.

Prosecution of *kadhif* is not contingent on demand by an applicant, who presumably is a woman wrongly accused. As a *haqq Allāh* offense, there is no discretion as to enforcement. But, the applicant must be present at the trial and any subsequent punishment. These facts — that a woman must bring the charge, typically against a man, and be at judicial and enforcement proceedings — are hurdles to bringing an application in the first place. That is all the more true if the social context is slanted against women.

### [D] Hadd Punishment

The *hadd* punishment for false accusation of unlawful sexual intercourse (*kadhif*) is flogging. Specifically, 80 lashes are prescribed. However, an Islamic judge (*qāḍī*) may apply a discretionary punishment (*taʿzīr*). Depending on the *Sunni* School to which the *qāḍī* adheres, that punishment could be 39, or 75, strokes. In other words, the *hadd* punishment of 80 lashes is not prescribed in every case, just as it is not in every instance of unlawful sexual intercourse (*zinā*). Whenever the *hadd* punishment is not imposed for whatever reason, the defendant remains liable for a *taʿzīr* punishment.

Professor Schacht cites one instance in which a *taʿzīr* rather than *hadd* punishment would be applied.<sup>53</sup> That is when the false accusation of unlawful

<sup>52</sup> Note there is a debate as to the effect of repentance by a person who commits *kadhif*. The *Hanafi* School argues that repentance does not change the fact that future testimony by that person must be rejected. The *Māliki*, *Shāfiʿi*, and *Hanbali* Schools argue that testimony of that person may be admitted after that person repents. See MOHAMED SALIM EL-AWA, PUNISHMENT IN ISLAMIC LAW: A COMPARATIVE STUDY 23 (Indianapolis, Indiana: American Trust Publications, 1981).

### [C] Elements and Evidentiary Requirements

There are two elements to the crime of false accusation of unlawful intercourse (*kadhif*). The first element concerns the nature or content of the statement. The second element concerns the truth or falsity of the utterance.

First, the accusation must be specific as to one of two events, or both of them:

- Unlawful sexual intercourse (*i.e.*, *zinā*) occurred.
- An illegitimate child was born.

In other words, the statement must be that a woman engaged in illicit sex, or it must impugn the legitimacy of the child of a woman, or both.

It is worth reviewing the behavior that amounts to unlawful sexual intercourse. That is because there is debate in Muslim legal circles as to the applicability of a *hadd* punishment for *kadhif* to married versus unmarried persons. The key is the terminology in *surah* 24, *ayah* 4 versus *ayah* 6, namely, “fornication” versus “adultery,” respectively. “Fornication” refers to voluntary sexual intercourse between two unmarried people, or between people who are married but not to each other.<sup>50</sup> “Adultery” refers to voluntary sexual intercourse between one married person and another person (who may or may not be married) that is not his or her spouse, *i.e.*, intimacy between two people, one of whom is married to another person.<sup>51</sup> Thus, “fornication” is the more general term, because it includes intimacy among two unmarried people. “Adultery” is the more specific term, because it focuses on intimacy outside of the marriage bond. Stated differently, “fornication” includes “adultery,” where intimacy occurs between people who are married but not to each other. But, there are instances of “fornication” that are not “adultery,” where, for example, intimacy occurs between two unmarried people.

A husband, therefore, technically would not accuse his wife of “fornication,” but of “adultery” — having sex with a partner other than him. That is, the word “adultery” in *surah* 24, *ayah* 6 is properly linked to an accusation by a husband. What about *ayah* 4, however? An accusation of “fornication” may be made by anyone, meaning a man could accuse a woman of having sex with someone else, and neither the woman nor that other person is married. Could the accuser allege the woman committed “adultery,” assuming either she or her sexual partner is married? *Ayah* 4 does not rule out that possibility. That is because it uses the term “fornication,” which encompasses “adultery.”

Focusing on the technical terms, it appears Islamic Penal Law is oriented to leaving the charge of adultery to husbands, and the charge of fornication to non-husbands. But, the *Shari‘a* does not leave a gap in which a non-husband is precluded from accusing a woman of adultery — he could do so by charging “fornication” under *surah* 24, *ayah* 4. Likewise, it does not leave a gap in which a husband is precluded from accusing a woman, not his wife, of fornication — he could do so under *ayah* 4.

<sup>50</sup> See THE OXFORD AMERICAN DICTIONARY AND THESAURUS 576 (New York, New York: Oxford University Press 2004) (entry for “fornicate”). [Hereinafter, OXFORD AMERICAN DICTIONARY.]

<sup>51</sup> See OXFORD AMERICAN DICTIONARY, *supra*, at 23 (entry for “adultery”).

The second element of *kadhif* is that the statement is false.<sup>52</sup> That is, what was said about the woman is not factually correct. The woman did not engage in wrongful sexual behavior. Or, if the first element involves impugning the heritage of a child, then the truth would be that the child in question is not illegitimate. Unless both elements exist, a prosecution for *kadhif* cannot go forward with success.

Even when both elements are present, a variety of factors can bring about dismissal of a charge of *kadhif*. For example, there may be discrepancies in the testimony of the four witnesses who are required to make the charge of *zinā* (unlawful intercourse). Of the four witnesses, one or more of them may not be qualified to give evidence. Possibly, one or more witness may withdraw (*rujā‘*) his testimony.

As intimated, four male witnesses are required to prove a charge of *kadhif*. That is the same requirement — set out in the Qur‘ān, *surah* 24, *ayah* 4 and 6 — as for *zinā*, and the equivalence is deliberate. Because *kadhif* embodies a statement about *zinā*, it would be illogical to require fewer witnesses than *zinā*. That is, analogical reasoning (*qiyaas*) supports the requirement of four male witnesses for the false accusation crime. Requiring more witnesses, however, would make a charge of *kadhif* even more difficult to prove, and thus lessen the protection afforded to the dignity, honor, and reputation of women.

Prosecution of *kadhif* is not contingent on demand by an applicant, who presumably is a woman wrongly accused. As a *haqq Allāh* offense, there is no discretion as to enforcement. But, the applicant must be present at the trial and any subsequent punishment. These facts — that a woman must bring the charge, typically against a man, and be at judicial and enforcement proceedings — are hurdles to bringing an application in the first place. That is all the more true if the social context is slanted against women.

### [D] Hadd Punishment

The *hadd* punishment for false accusation of unlawful sexual intercourse (*kadhif*) is flogging. Specifically, 80 lashes are prescribed. However, an Islamic judge (*qādi*) may apply a discretionary punishment (*ta‘zīr*). Depending on the *Sunni* School to which the *qādi* adheres, that punishment could be 39, or 75, strokes. In other words, the *hadd* punishment of 80 lashes is not prescribed in every case, just as it is not in every instance of unlawful sexual intercourse (*zinā*). Whenever the *hadd* punishment is not imposed for whatever reason, the defendant remains liable for a *ta‘zīr* punishment.

Professor Schacht cites one instance in which a *ta‘zīr* rather than *hadd* punishment would be applied.<sup>53</sup> That is when the false accusation of unlawful

<sup>52</sup> Note there is a debate as to the effect of repentance by a person who commits *kadhif*. The *Hanafi* School argues that repentance does not change the fact that future testimony by that person must be rejected. The *Māliki*, *Shāfi‘i*, and *Hanbali* Schools argue that testimony of that person may be admitted after that person repents. See MOHAMED SALIM EL-AWA, PUNISHMENT IN ISLAMIC LAW: A COMPARATIVE STUDY 23 (Indianapolis, Indiana: American Trust Publications, 1981).

<sup>53</sup> SCHACHT, *supra*, at 179.

intercourse is directed at an unbeliever. (Note, however, *surah* 24, *ayah* 4 of the Qur'an does not limit protection to believers.) On the one hand, the exercise of such discretion is justified on the ground Islamic Penal Law does (or ought) not to apply to relations between Muslims and non-Muslims. On the other hand, this discretion is troubling. It suggests protection of the dignity, honor, and reputation of non-Muslim women is less important than of Muslim women. In turn, it reinforces stereotypes among some Muslim men that non-Muslim women in the West and Far East are "loose" in respect of sexual behavior.

In *surah* 24, *ayah* 4, the Qur'an expressly states the punishment for *kadhif*. Reference is made to striking a false accuser 80 times. (Recall that for unlawful sexual intercourse (*zinā*), *surah* 24, *ayah* 2 speaks of 100 lashes.) Additionally, the passages quoted in the discussion of *zinā* — *surah* 5, *ayah* 41, and the comment by Professor Abdel Haleem — are the basis for this punishment of *kadhif*, as they are for the punishment for *zinā*. In other words, the *Sunnah* of Muhammad provides a further basis. Thus, insofar as a "hadd punishment" narrowly refers to one set out exclusively in the Qur'an, these punishments do not fit within that definition. It is more appropriate, perhaps, to think of the term as encapsulating a sanction set out in either the Qur'an or the *Sunnah*.

Interestingly, a species of false accusation, which does not concern sexual behavior, can trigger a *ta'zīr* punishment. Gravely insulting a Muslim with an epithet like "O son of a whore (*kahba*)" or "O sinner (*fāsik*)" may result in flogging, with the number of strokes determined by a *qādi*. Such epithets do not trigger the *hadd* punishment, because neither is an express accusation of adultery. Less severe, but still deeply offensive, insults, such as calling a Muslim a "dog" do not trigger this punishment, unless they are targeted at a descendant of the Prophet or a *Shari'a* scholar.<sup>54</sup> The latter outcome is based on *istihsān*, i.e., discretionary reasoning that is not strict *qiyās*.

#### § 44.05 RELATIONSHIP OF KADHIF TO ZINĀ

Notice that the first element of *kadhif* is essentially equivalent to an accusation of *zinā*, while the second element is that this charge is untrue. Consequently, it is somewhat disingenuous to declaim, without further explanation, there are only two elements to the charge of *kadhif*. All of the elements required for a charge of *zinā* are required, too.

Indeed, *kadhif* and *zinā* are interdependent. The crime of false accusation serves to restrict the scope of unlawful intercourse. Conversely, the crime of unlawful intercourse serves to restrict the scope of false accusation. That is, for two reasons, each crime delimits the boundaries of the other.

First, dismissal of an accusation of *zinā* results in *kadhif* — a charge of false accusation, assuming this charge is pressed. Any or all of the four witnesses in the earlier, unsuccessful case of *zinā* are liable for the *hadd* punishment for *kadhif*. Second, the fact false accusation is a *haqq Allāh* offense should mean the number of cases in which the *hadd* punishment for *zinā* is imposed is minimized. Knowing the

severity of this punishment, a rational person would be leery to make the accusation in the first place.

*Kadhif* and *zinā* are related in another way. The *Shari'a* treats unlawful intercourse severely, but does not treat perjury in general as a *haqq Allāh* crime. It would be conceptually inconsistent not to treat false accusation of unlawful intercourse with the same concern. If the underlying crime is an offense against God (Allāh), then surely accusing someone falsely of its commission also is such an offense.

#### § 44.06 MUTUAL EXCLUSIVENESS OF SEX CRIMES (KADHIF AND ZINĀ) AND DIVORCE THROUGH LI'ĀN

While *kadhif* and *zinā* are interdependent, they are mutually exclusive from a divorce procedure known as "*li'ān*." *Li'ān* is one of several grounds in Islamic Family Law for the dissolution of a marriage. Essentially, it entails a husband accusing his wife of committing an unchaste act. He must make this accusation under oath, and the wife may offer a counter-affirmation under oath.

Suppose a marriage is dissolved because of unchastity. That is, the husband initiates the procedure of *li'ān*, with success. Can the husband be held liable for the crime of *kadhif*, and subject to the *hadd* punishment of 80 lashes? The answer is "no." Can the wife be held liable for the crime of *zinā*, and subject to the *hadd* punishment of death? Again, the answer is "no." However, to be free of this liability, the wife must make an affirmation under oath that she did not commit any unchaste act, i.e., she must swear an oath counter to that of her husband. Dissolution of a marriage through *li'ān* immunizes each party, husband and wife, from being charged with the *haqq Allāh* offenses, and thereby frees them of concern about the *hadd* punishment.

This legal consequence is critical in the everyday practice of the *Shari'a*. It means many potential cases of *zinā* or *kadhif* are not brought. Instead, the unhappy couple de-escalates their dispute from what could be a *haqq Allāh* offense to a standard divorce procedure, *li'ān*. Rather than go through the harrowing ordeal of a trial in which conviction would result in a *hadd* punishment, and getting four witnesses and enduring publicity, why not dissolve the marriage quietly on the ground of infidelity? The question should not intimate *li'ān* is without trauma or heartbreak, quite the contrary, but only point out the enormous difference in incentives between the two legal options.

The situation of eschewing a potential case of *zinā* or *kadhif*, and electing the *li'ān* procedure, raises an obvious question: isn't someone lying? If a husband swears under oath that his wife was unfaithful, and the wife provides a counter-oath that she engaged in no infidelity, then the situation is a classic "he said, she said." In this situation, in the absence of four witnesses, it is sensible not to pursue a *haqq Allāh* charge. As for the alleged adultery, it is the basis for the divorce via *li'ān*. That is, legal effect — dissolution of the marriage — is given despite the likelihood one of the parties is mendacious.

<sup>54</sup> See SCHACHT, *supra*, at 179.

## Chapter 45

### CLAIMS OF GOD (*ḤAQQ ALLĀH*): DRINKING AND STEALING

---

Good rises from good actions, and that is good.  
Beyond that, what else do saints and good people say?

I am willing to give up my breath and my life for you,  
Even though I don't know the first thing about sacrifice.

The abundant objects of the world mean nothing at all!  
But if the wine is free, how could Ghalib hold back?

Mirza Ghalib  
(1797-1869, Great Classical Urdu and Farsi Poet of India during British Rule), *Questions*, in MIRZA GHALIB, *THE LIGHTING SHOULD HAVE FALLEN ON GHALIB — SELECTED POEMS OF GHALIB* (Robert Bly & Sunil Dutta eds, 1999)

## § 45.01 CONSUMING ALCOHOL (SHURB AL-KHAMR)

## [A] Biblical Contrasts: Wedding Feast at Cana and Last Supper

Alcohol plays an important role in the traditions, practices, and culture of many of the world religions, both present and past. Islam stands in marked contrast to this fact. That was not always the case. Professor Hussain reports:

The consumption of alcohol in moderation was at first allowed in Islam. Later, it was forbidden completely.<sup>1</sup>

Her report is corroborated by Professor Abdel Haleem, translator of the Qur'ān:

The prohibition of intoxicants was introduced by stages, and they were eventually made completely unlawful.<sup>2</sup>

Unfortunately, neither Professor expounds on the point or offers further support. It is fascinating, and worthy of exploration, to conceive the *Shar'ia* prohibition on drinking is not an intrinsic part of Islam since inception. Indeed, Muslim scholars commonly appreciate that consumption of alcohol is the subject of a gradual ban, one evolving over time. Likewise, the concomitant punishment has been the subject of debate.

In Judaism, wine is a part of every Passover meal.<sup>3</sup> Wine, of course, plays a central role in Christian history. As recounted in *John* in the New Testament, and depicted in the large masterpiece, *The Wedding Feast at Cana* (1562-63) by Veronese (Paolo Caliari, 1528-1588) that hangs in the Louvre Museum in Paris opposite the *Mona Lisa*, changing water into wine at the wedding in Cana, at the suggestion of His Mother, Mary, was the first miracle performed by Jesus.<sup>4</sup> Wine was served at the Last Supper, a scene depicted by many of the greatest artists, including Leonardo Da Vinci (1452-1519) in his fresco *The Last Supper* (1495-98) in Santa Maria delle Grazie in Milan, Italy.<sup>5</sup>

Indeed, in Catholic Christianity, under the doctrine of transubstantiation, everyday around the world, multiple times during the day, priests consecrate wine, turning it into the blood of Christ under the appearance of wine, as they do with bread, turning it into the body of Christ under the appearance of bread. That is, they celebrate the Sacrament of the Holy Eucharist, and through participation in this Sacrament, Catholics grow in holiness, that is, they become more Christ-like. The Sacrament — an outward sign of inward grace instituted for the benefit of

people — was instituted by Christ Himself (i.e., it is not an invention of the Church), and is recounted in *The Gospel According to Matthew* in chapter 26, verses 26-29, *The Gospel According to Mark* in Chapter 14, verses 22-25, *The Gospel According to Luke* in chapter 22, verses 13-20, and *The Gospel According to John*, in chapter 6, verses 47-59. In other words, the Eucharist is evidenced in all four New Testament Gospels. Saint Paul also recounts the Lord's Supper in *The First Letter to the Corinthians*, chapter 11, verses 23-26.<sup>6</sup>

In a famous passage from *The Gospel According to Mark*, Christ also warned that it is foolhardy to fear defilement from outside sources:

<sup>3</sup>Now when the Pharisees with some scribes who had come from Jerusalem gathered around him [Jesus], <sup>2</sup>they observed that some of his disciples ate their meals with unclean, that is, unwashed, hands. <sup>3</sup>For the Pharisees and, in fact, all Jews do not eat without carefully washing their hands, keeping the tradition of the elders. <sup>4</sup>And on coming from the marketplace they do not eat without purifying themselves. And there are many other things that they have traditionally observed, the purification of cups and jugs and kettles [and beds]. <sup>5</sup>So the Pharisees and scribes questioned him, "Why do your disciples not follow the tradition of the elders but instead eat a meal with unclean hands?" He [Jesus] responded, "Well did Isaiah prophesy about you hypocrites, as it is written:

"This people honors me with their lips, but their hearts are far from me;

"In vain do they worship me, teaching as doctrines human precepts."

<sup>8</sup>You disregard God's commandment but cling to human tradition." . . . <sup>14</sup>He [Jesus] summoned the crowd again and said to them, "Hear me, all of you, and understand. <sup>15</sup>Nothing that enters one from outside can defile that person; but the things that come out from within are what defile. . . .

<sup>17</sup>When he got home away from the crowd his disciples questioned him about the parable. <sup>18</sup>He said to them, "Are even you likewise without understanding? Do you not realize that everything that goes into a person from outside cannot defile, <sup>19</sup>since it enters not the heart but the stomach and passes out into the latrine?" (Thus he declared all foods clean.) <sup>20</sup>"But what comes out of a person, that is what defiles. <sup>21</sup>From within people, from their hearts, come evil thoughts, unchastity, theft, murder, <sup>22</sup>adultery, greed, malice, deceit, licentiousness, envy, blasphemy, arrogance, folly. <sup>23</sup>All these evils come from within and they defile."

By extension, wine — an exogenous element — is not *per se* the source of defilement.

<sup>2</sup> THE QUR'AN — A NEW TRANSLATION BY M.A.S. ABDEL HALEEM fn. a to 4:43 at 55 (Oxford, England: Oxford University Press, 2004) (emphasis added). [Hereinafter, QUR'AN.]

<sup>3</sup> See, e.g., *The Kosher Wine Review*, posted at [www.kosherwinereview.com](http://www.kosherwinereview.com).

<sup>4</sup> See *The Gospel According to John*, 2:1-11, in THE CATHOLIC STUDY BIBLE 150-151 (New York, New York: Oxford University Press, 1990, New American Bible trans.). [Hereinafter, BIBLE.]

<sup>5</sup> Leonardo's work, of course, focuses on the announcement by Jesus that one of the Twelve Disciples would betray Him, as recounted in *John* 13:21-22.

<sup>6</sup> Its roots, or at least the use of wine in religious events, long pre-date the New Testament. The Old Testament *Book of Genesis* recounts the Priest Melchizedek using wine in a blessing for Abram the Hebrew: See *The Book of Genesis* 14:18-20 in BIBLE, *supra*, at 18.

<sup>7</sup> *The Gospel According to Mark*, 7:1-8, 14-23, in BIBLE, *supra*, at 78-79 (emphasis added).

Here, then, is a point of distinction between Islam and Christianity: while drinking is a crime in Islam, and eating pork is strictly forbidden, there are no such consumption injunctions in Christianity. To be sure, Christ urges his followers to be vigilant so that they are ready for not only their own death, but also the end of time. *The Gospel According to Luke* recounts this exhortation:

<sup>34</sup>“Beware that your hearts do not become drowsy from *carousing and drunkenness* and the anxieties of daily life, and that day catch you by surprise <sup>35</sup>like a trap. For that day will assault everyone who lives on the face of the earth. <sup>36</sup>Be vigilant at all times and pray that you have the strength to escape the tribulations that are imminent and to stand before the Son of Man.”<sup>9</sup>

Saint Paul warns against drunkenness in his *Letter to the Ephesians*:

<sup>15</sup>Watch carefully then how you live, not as foolish persons but as wise, <sup>16</sup>making the most of the opportunity, because the days are evil. <sup>17</sup>Therefore, do not continue in ignorance, but try to understand what is the will of the Lord. <sup>18</sup>And do not get drunk on wine, in which lies debauchery, but be filled with the Spirit, <sup>19</sup>addressing one another [in] psalms and hymns and spiritual songs, singing and playing to the Lord in your hearts, <sup>20</sup>giving thanks always and for everything in the name of our Lord Jesus Christ to God the Father.<sup>9</sup>

Moreover, temperance is one of the Four Cardinal Virtues in Catholic Christianity, along with prudence, justice, and courage. And, following Saint Frances of Assisi, there may be some virtue in vegetarianism. But, done in moderation, enjoying a beer, sipping a glass of red wine, relaxing with a gin and tonic, or eating a ham sandwich is perfectly acceptable.

In sum, the distinguishing point is on the origin of a spiritual poison. In Christianity, as the above-quoted passages indicate, the ultimate source is intrinsic, in the shadows of the human heart. In Islam, as the criminalization of alcohol consumption suggests, extrinsic sources are viewed as foul.

<sup>9</sup> *The Gospel According to Luke*, 21:34-36, in BIBLE, *supra*, at 138 (emphasis added).

The expression “Son of Man” refers to Jesus and is explained by Saint Irenaeus of Lyons (2nd century A.D. — 202 A.D.) in his treatise, *Against Heresies* (c. 180 A.D.):

That is why the Lord proclaims himself the Son of Man, the one who renews in himself that first man [Adam] from whom the race born of woman [Eve] was formed; as by a man’s defeat [on account of disobedience to God in the Garden of Eden] our race fell into the bondage of death, so by a man’s victory [on the Cross] we were to rise again to life.

Quoted in THE DIVINE OFFICE — THE LITURGY OF THE HOURS, vol. 1, 244-245 (New York, New York: Catholic Book Publishing Corp., 1975). In effect, there is a link between the fall of the first man, Adam, and the redemption of all men through the Son of Man, Jesus, and between the seduction of Eve into disobedience, and the obedience of the Virgin Mary and her advocacy for Eve and, by extension, all who seek her intercession.

<sup>9</sup> *The Letter to the Ephesians*, 5:15-20, in BIBLE, *supra*, at 308 (emphasis added).

## [B] Analyzing Qur’ānic Passages on Drinking

It certainly has never been the case that Islam and alcohol were complete strangers. One New York oenologist recounts the history of wine in Moorish Spain:

During their almost seven-hundred-year control of Spain [711-1492 A.D.], the Moors had oppressed neither Christians nor Jews, nor much of local culture for that matter. The ancient wine production in Andalusia continued — in fact, there is a record of the last Moorish king of Seville, Al-Motamid, praising wine both for the revenue and for the pleasure that it has provided him over his years in power. Much of Andalusian wine production was at Jerez, which had been one of the wealthiest Iberian cities under Moorish control. Just about all the Jerez wines for export went to England.

...

Distillation also took place under the Moors in Spain. Their important contribution to the practice was the alembic pot still method (from the Arabic, *al-embik*). Like most other matter, wine is made up largely of water. The alcohol in wine generally accounts for anywhere from 8 to 14 percent of the volume. Alembic distillation concentrates the alcohol by separating it from the water as a vapor (the spirit).

Alcohol has a lower boiling point than water, so to collect condensed alcoholic vapors, wine is boiled in a highly conductive copper pot to release alcohol as steam. The steam is recaptured in a specially designed pot cover that channels impurities away from the steam. The steam “liquefies” and the alcohol is stored in a separate container. The remaining wine goes through more distillation cycles until all the alcohol has been drawn off. The end result is called *brandy*, a name . . . that was not applied until the sixteenth century.<sup>10</sup>

The Moors were not the only Islamic authorities to condone alcohol. The Moghuls, and some of their Emperors, drank alcoholic beverages. Today, there is open alcoholic beverage production and consumption in certain Muslim countries — red wine in Jordan, Lebanon, and Morocco, Anchor beer in Malaysia, Efes beer in Turkey are a examples.

Given the observations of Professors Hussein and Abdel Haleem, Moorish and Moghul history, and modern-day realities, why is it that drinking alcohol is considered not only a crime, but also a *haqq Allāh* offense triggering a *hadd* punishment? One glib response is that only Jews and Christians living in tolerant Muslim lands cross the line. Yet, casual observation indicates this explanation is inaccurate. Another glib answer is that the Moors and Moghuls are exceptions. More typical of Islamic history are the Ottomans: “some famous *but illicit* wines . . . were being produced in Damascus under Ottoman rule.”<sup>11</sup> These sweet wines

<sup>10</sup> THOMAS PELLECHIA, WINE — THE 8,000-YEAR-OLD STORY OF THE WINE TRADE 97, 101 (New York, New York: Thunder’s Mouth Press, 2006). [Hereinafter, PELLECHIA.]

<sup>11</sup> PELLECHIA, *supra*, at 84.

were exported to Britain in the summer, to compensate for the diminished supply of French and German wines from the prior spring. This answer suggests a difference between *de jure* prohibitions by Muslim governments on alcohol, and *de facto* trading that occurs, sometimes with officials turning a blind eye or extending a palm-upward hand, whenever market conditions are favorable.

Still another glib answer is the "Qur'an says so." Without delving into what the sacred text says about drinking, this answer is unsatisfying. The three key passages are as follows.<sup>12</sup> A close inspection of them reveals the answer actually may be unpersuasive:

• *Surah 2, ayah 219:*

They ask you [Prophet] about intoxicants and gambling: say, "There is *great sin* in both, and *some benefit* for people: the *sin* is greater than the *benefit*."<sup>13</sup>

• *Surah 4, ayah 43:*

You who believe, *do not come anywhere near the prayer if you are intoxicated, until you know what you are saying*; nor if you are in a state of major ritual impurity — though you may pass through the mosque — until you have bathed; if you are ill, on a journey, have relieved yourselves, or had intercourse, and cannot find any water, then find some clean sand and wipe your faces and hands with it. God is always ready to pardon and forgive.<sup>14</sup>

• *Surah 5, ayat 90-93:*

<sup>90</sup>You who believe, intoxicants and gambling, idolatrous practices, and [divining with] arrows are repugnant acts — *Satan's doing*: *shun* them so that you may prosper. <sup>91</sup>With intoxicants and gambling, Satan seeks only to *incite enmity and hatred* among you, and to *stop you remembering God and prayer*. Will you not give them up? <sup>92</sup>Obey God, obey the Messenger [Muhammad], and always be on your guard: if you pay no heed, bear in mind that the sole duty of Our Messenger is to deliver the message clearly. <sup>93</sup>Those who believe and do good deeds will not be blamed for what they may have consumed [in the past] as long as they are mindful of God, believe

<sup>12</sup> A fourth passage, *surah 16, ayat 65-67*, plainly does not contain a prohibition on consuming alcohol, but rather reminds Muslims that God (Allāh) provides them with beverages:

<sup>90</sup>It is God who sends water down from the sky and with it revives the earth when it is dead. There truly is a sign in this for people who listen. <sup>91</sup>In livestock, too, you have a lesson — We give you a drink from the contents of their bellies, between waste matter and blood, pure milk, sweet to the drinker. <sup>92</sup>From the fruits of date palms and grapes you take sweet juice and wholesome provisions. There truly is a sign in this for people who use their reason.

*Qur'an, supra*, 16:65-67, at 170. Obviously, it is one point to assert God is the ultimate source of non-alcoholic beverages, namely, water, milk, and juice. It is quite a different point to say a person is confined to drinking non-alcoholic beverages exclusively. Without reference to any other passages or sources, the second point does not follow logically from the first one.

<sup>13</sup> *Qur'an, supra*, 2:219 at 24 (emphasis added).

<sup>14</sup> *Qur'an, supra*, 4:43, at 55 (emphasis added).

and do good deeds, then are mindful of God and believe, then are mindful of God and do good deeds: God loves those who do good deeds.<sup>15</sup>

Read literally, *surah 2, ayah 219* does not forbid drinking. It is a cost-benefit analysis of alcohol. It warns of risks — "great sin" — but also admits "some benefit." On balance, the cost-benefit ratio is not favorable. Does that conclusion apply to some persons, or is it a systemic conclusion, applying to all Muslims? Might it be the case some Muslims who drink responsibly do not experience net negative effects, but over the entire community (*ummah*) there is a net loss? The passage does not resolve these questions.

Likewise, read literally, *surah 4, ayah 43* is not a prohibition against drinking. Rather, the passage concerns the proper demeanor for prayer, and essentially says "do not show up to the mosque drunk," or, for that matter, dirty or in a state of what Catholic Christians would call "mortal sin." The passage calls for internal purification before approaching God (Allāh) in prayer, and reminds Muslims God is merciful. Critically, both *surah 2, ayah 219*, and *surah 4, ayah 43* presume Muslims do drink, and counsels them to avoid the deleterious effects of alcohol by doing so with temperance.

Indubitably, the most stringent admonition against alcohol is in *surah 5, ayat 90-91*. Drinking is associated with the devil, and two particular dastardly effects are recounted: fighting, and sloth. That is, people who drink may be prone to argue with and become violent against others, they may be lax about worshipping God, or both. By stirring up disagreements with neighbors, and forgetting a life of prayer, alcohol takes a person away from God and his people. These points are manifestly true, and few non-Muslims would disagree. But, non-Muslims — and some Muslims — would hasten to add that the effects occur when alcohol is consumed excessively, and that moderation is required in all things, not just drinking. Does the passage actually forbid the consumption of alcohol in moderation? The closest it comes to doing so is the exhortation to "shun" drinking, and a plea to give it up. Thereafter is a reminder of God's mercy — even believers who consumed alcohol in the past will be forgiven if they are pure-hearted and charitable. As Professor Abdel Haleem explains in respect of *ayah 93*:

It was reported that when wine was forbidden, some companions asked the Prophet, "What about those believers who used to drink and have already died? What state would they be in?" This [*ayah 93*] is the reply to that question, and it also applies to the living.<sup>16</sup>

It thus is clear the consumption of alcohol was not always forbidden in Islam, and is not clearly prohibited by the Qur'an.

But, it is equally clear that consuming alcohol has deleterious social consequences. As Dr. El-Awa notes, Muhammad observed drinking was commonplace among the Arabs of his time:

<sup>15</sup> *Qur'an, supra*, 5:90-94 at 76-77 (emphasis added).

<sup>16</sup> *Qur'an, supra*, fn. d to 5:93 at 76 (emphasis added).

In the Qur'ān, the drinking of alcohol and various other actions, such as usury (*ribā*) and eating the flesh of swine (*akl al-khanzīr*), are simply declared to be forbidden (*ḥarām*). [Note the earlier discussion in respect of Qur'ānic passages about drinking.] *The drinking of alcohol, however, was the most common of these practices among the Arabs; hence, the Prophet imposed a punishment for it, while the other prohibited acts remained purely civil issues, or as crimes for which there can be a ta'zīr punishment.*<sup>17</sup>

A more explanatory account comes from the New York oenologist:

According to legend, Muhammad, while on a journey by foot, came upon a noisy, joyous Arab village. He asked a local man what it was that made the people so happy. The man told him that a wedding had taken place that day and now everyone was celebrating over some local wine. Muhammad made note of the joy that the wine had brought to the people, expecting that it might be a good idea to mention it to his followers.

On his way back, as he passed through the village where the wedding had taken place a few days before, Muhammad found the street littered with debris, injured men, and perhaps a corpse or two. When he asked what it was that made this happy place come to such a disaster he was told that the men over-indulged in wine, started to argue, and broke out fighting.

Muhammad supposedly decided on the spot that wine's power for mayhem outstripped its ability to create joy and he concluded that this is what he should let his followers know.<sup>18</sup>

In sum, Islamic teaching is a remarkably utilitarian cost-benefit calculus: consuming alcohol, whatever its short-term pleasures, jeopardizes the security of the community (*ummah*), and worse yet, potentially puts one's soul in jeopardy in the life that is to come. While Allāh is a forgiving God, it is presumptuous to drink — especially in excess — in view of these risks, and then expect to be forgiven. The obvious follow-up inquiry is whether this particular calculus is amenable to revision by a pro-active change in parameters, meaning specifically whether the appropriate remedy is not a prophylactic prohibition, but public pedagogy, on the pros and cons of alcohol.

### [C] Practical Realities in Muslim World

As a practical matter, it is privately admitted by some Muslims the real threat at issue is not drinking *per se*, but drinking in excess and drunk driving. It is an open secret that even in Saudi Arabia, the consumption of alcoholic beverages by Muslims occurs. There are even rehabilitation centers in the Kingdom to deal with alcoholism. This reality is not to suggest it is acceptable to violate the laws of the Kingdom, or any other country — quite the contrary. Rather, the point is that even in the most conservative Muslim societies, and in particular in the "Islamic Heartland," alcohol is consumed illicitly.

<sup>17</sup> MOHAMED SALIM EL-AWA, PUNISHMENT IN ISLAMIC LAW: A COMPARATIVE STUDY 44 (Indianapolis, Indiana: American Trust Publications, 1981) (emphasis added). [Hereinafter, EL-AWA.]

<sup>18</sup> PELLEGRINA, *supra*, at 63.

In the Kingdom, and countries like Malaysia and the Sultanate of Brunei, where rules on alcohol consumption have become stricter in recent years, some officials are concerned that Muslims — especially youth — will drink, but are not able to handle even a small amount of alcohol. While drunk, they may injure or kill themselves and others in automobile accidents. Accordingly, in Malaysia in 2009-2010, a Muslim Malay woman was sentenced to public flogging for openly drinking a beer. Repeat tourists to Johor Bahru between the late 1980s and present day (like your author) notice it is increasingly difficult to find beer or wine served in restaurants and hotels. In the Sultanate non-Muslims may bring a small quantity of beer or wine on their person into Brunei, but must consume it privately (as your author did). No alcoholic beverages otherwise maybe imported, or are sold. Yet, as recently as the 1990s, Brunei had pubs and taverns.

The obvious response to this concern is not to forbid alcohol consumption throughout the country, for both Muslims and non-Muslims alike. Rather, it is to have an American- or European-style public campaign to teach all persons, should they choose to drink, about responsible drinking and social behavior.

### [D] Elements

The *haqq Allāh* offense of drinking alcohol is known in Arabic as "*shurb al-khamr*." The word "*khamr*" means "intoxicating drink," or "wine." As Dr. El-Awa reports:

[t]he Prophet defined *khamr* as "any drink which makes a person drunk," and he declared all drinks of this sort to be forbidden (*ḥarām*).<sup>19</sup>

However, the offense extends well beyond wine to drugs and other mind-altering substances. This extension follows logically from analogical reasoning (*qiyās*).

*Shurb al-khamr* actually consists of two separate offenses bundled into one. The first crime is drinking alcohol (or taking an illegal narcotic), regardless of the amount ingested. The second offense is being in the state of drunkenness (or "high" on a narcotic). An inference from this differentiation is that ingesting a small or moderate amount of alcohol does not lead automatically to drunkenness in every instance. (This inference would not hold for all narcotics, which in any event are illegal in virtually every non-Muslim, as well as Muslim, jurisdiction.) The conclusion might be, therefore, that drinking alcohol to an extent that does not lead to drunkenness is lawful. Indeed, that is what Professors Hussain and Abdel Haleem (quoted above) indicate was the legal *status quo* in the early days of Islam. However, under the *Shari'a* as it is practiced today, this inference is not drawn. Rather, the two crimes are conflated, which essentially means that any amount of alcohol (or narcotics) produces drunkenness (or a "high").

Non-teetotalers, both Muslim and non-Muslim, may regard this conflation as based on a different meaning of "drunkenness." Under American Criminal Law, the term has a quantitative definition, namely, exceeding a statutorily permissible ratio

<sup>19</sup> EL-AWA, *supra*, at 44. Dr. El-Awa says this definition is reported in a *hadith* recorded by *Imām* Muslim, and also is mentioned in commentary provided by Al Nawawī set out in the compilation by *Imām* Bukhari, vol. X at 172. See *id.*, n. 7 at 65.

of alcohol in the bloodstream (e.g., depending on the state, 0.1 percent or 0.08 percent). Any driver of a vehicle who tests positively — i.e., whose blood-alcohol ratio exceeds the threshold — is charged with the offense of driving while intoxicated, or driving under the influence of alcohol. In contrast, the *Shari'a* has a zero-tolerance rule. Ingesting any amount of alcohol renders the drinker under its influence, i.e., intoxicated. Non-teetotalers might be inclined to dismiss this approach as confusing relaxation, or a mere “buzz,” with rip-roaring drunkenness. Muslims adhering to the rule on *shurb al-khamr* would respond even the slightest “buzz” is proof of the influence of alcohol.

In any event, the elements of *shurb al-khamr* are clear enough. There must be an intoxicating beverage, from which the perpetrator has taken a sip or more. That drinking must be intentional, i.e., the *mens rea* (*niyya*) requirement is that the perpetrator must be aware at the time of ingesting that the beverage contained alcohol. In other words, the actions — that the defendant drank and became drunk — must be voluntary. The same elements, of course, would hold for a drug.

### [E] Evidentiary Requirements and *Hadd* Punishment

To prosecute *shurb al-khamr*, the evidence of two witnesses is required. They must be reliable and male. As in certain other instances, it may be possible to substitute the testimony of one male witness with two female witnesses.

Assuming the elements for and witnessed to *shurb al-khamr* exist, what is the *hadd* punishment? None is set forth in the Qur'ān. This fact, perhaps, reinforces the analysis of the Qur'ānic passages earlier — namely, the sacred text sets out no clear prohibition against drinking. Dr. El-Awa examines the considerable uncertainty surrounding the correct *hadd* punishment for *shurb al-khamr*:

... As the definition of the *hadd* punishment implies, it can be prescribed only by God. In the one instance in which it was prescribed not by the Qur'ān but by the *Sunnah* [namely, death by stoning for a married person committing *zinā*], the Prophet made it absolutely clear that he was acting according to divine revelation (*waḥy*).

On the other hand, when the Prophet imposed a punishment for drinking, he neither declared that he had imposed it according to revelation nor did he prescribe it in specific terms; that is, he did not fix a definite sentence as the punishment. The Prophetic reports concerned with drinking are related by all the collectors of *ahādith*, but in none of these reports can one find the Prophet fixing a definite number of lashes as punishment, as is claimed by Muslim jurists.

All the Schools of Islamic Law consider the drinking of alcohol to be a crime for which a *hadd* punishment is prescribed. Although they disagree about the number of lashes which should be inflicted, they all claim it to have been fixed by the Prophet. According to the *Hanafi* School, the punishment for drinking is eighty lashes. The same view is held by the *Māliki* and *Hanbali* Schools. According to another *Hanbali* view, and to the *Shāfi'i*, *Zāhiri*, and *Zaydi* (Fiver *Shi'ite*) Schools, the punishment is only forty lashes.

This disagreement about the number of lashes to be inflicted is a result of the differing views ascribed to the Companions of the Prophet. It was reported that the first Caliph, Abū Bakr, used to impose forty lashes upon the person who drank; 'Omar did likewise during the first few years of his Caliphate. Afterwards, when the number of drinkers increased unprecedentedly, 'Omar consulted the Prophet's Companions at Medina about the matter. 'Ali or, according to some, 'Abd al-Rahman b. 'Awf, suggested that the punishment for drinking should be parallel for the punishment for slander (*kadhif*). In accordance with this report, some jurists hold the view that the *hadd* is forty lashes with another forty lashes as *ta'zir*, while others consider the *hadd* to be eighty lashes, supporting their view by claiming that this number resulted from consensus (*ijma'*).

When we turn to what was reported to have been said or done by the Prophet . . . , we find that in none of the related reports did the Prophet say that a person who drank should be given forty lashes or eighty lashes. All that is related is that the Prophet ordered the offender to be beaten; “beat him” is the most specific word (*sic*) he is reported to have said. In addition to this, in some, but not in all, cases, the Prophet ordered his Companions to reprimand the offender; again, he took up some dust and threw it in the offender's face, although not in every instance. At the same time, when one of his Companions reprimanded a drunken man after he had been punished, the Prophet stopped him on the grounds that this might help Satan to induce the offender to commit more sins. In the Prophet's time, there were no specific methods of beating offenders. In some instances, they were beaten with articles of clothing, hands, or sandals; while in other cases they were beaten with sticks and palm branches, in addition to sandals.

Moreover, the exact amount of lashes an offender should receive was not known to the Prophet's Companions. . . .

... [I]t is narrated by reliable transmitters that the Prophet said, “If a person drinks wine, lash him for the first three times and put him to death for the fourth.” [Dr. El-Awa cites to the *ḥadīth* compilation of Abū Dawūd.] But when a man was brought before the Prophet for the fourth time, he did not have him put to death, but simply ordered him to be beaten.

All these reports show clearly that there was no fixed punishment for drinking in the Prophet's time, nor was such punishment known during the epoch of his Companions.<sup>20</sup>

What, then, is the “bottom line”? First, the punishment for drinking alcohol that has been agreed upon and applied is flogging. This punishment is based on the *Sunnah* of the Prophet. Yet, up through the *Umayyad* Caliphate (651–750 A.D.), the correct number of strokes remained a matter of considerable debate.<sup>21</sup> Since then, the generally agreed upon punishment is 80 lashes. To the extent this figure represents

<sup>20</sup> El-Awa, *supra*, at 44–46.

<sup>21</sup> See JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW *id.* 1 at 16 (Oxford, England: Oxford University Press (Clarendon Paperbacks) 1982). [Hereinafter, SCHACHT.]

a consensus (*ijma'*), it is essential to appreciate it is more of a majority view within one or a few Schools.<sup>22</sup> The reality is that the exact number of strokes varies across, and even within, the Four *Sunni* Schools. The range is between 40 and 80 lashes.<sup>23</sup>

## § 45.02 THEFT (SARIKA)

### [A] Biblical Comparisons: 7th, 9th, and 10th Commandments

In no major religion of the world, nor in any legal system, is theft an acceptable behavior. As with unlawful sexual intercourse (*zinā*), specifically adultery, for theft perhaps the most famous injunction is in the 10 Commandments. They summarize the Covenant God made with Moses and his people, the Israelites. The 10 Commandments are set out in *Exodus* and *Deuteronomy* in the Old Testament of the Bible. (The *Exodus* version is quoted in the discussion of *zinā*). The *Deuteronomy* version is:

<sup>6</sup>"I, the LORD, am your God, who brought you out of the land of Egypt, that place of slavery. <sup>7</sup>You shall not have other gods besides me. [1st Commandment.] <sup>8</sup>You shall not carve idols for yourselves in the shape of anything in the sky above or on the earth below or in the waters beneath the earth: <sup>9</sup>you shall not bow down before them or worship them. For I, the LORD, your God, am a jealous God, inflicting punishments for their fathers' wickedness on the children of those who hate me, down to the third and fourth generation; <sup>10</sup>but bestowing mercy, to the thousandth generation, on the children of those who love me and keep my commandments.

<sup>11</sup>"You shall not take the name of the LORD, your God, in vain. [2nd Commandment.] For the LORD will not leave unpunished him who takes his name in vain.

<sup>12</sup>"Take care to keep holy the Sabbath day as the LORD, your God, commanded you. [3rd Commandment.] <sup>13</sup>Six days you may labor and do all your work; <sup>14</sup>but the seventh day is the Sabbath of the LORD, your God. No work may be done then, whether by you, or your son or daughter, or your male or female slave, or your ox or ass or any of your beasts, or by the alien who lives with you. <sup>15</sup>For remember that you too were once slaves in Egypt, and the LORD, your God, brought you from there with his strong hand and outstretched arm. That is why the LORD, your God, has commanded you to observe the Sabbath day.

<sup>16</sup>"Honor your father and your mother, as the LORD, your God, has commanded you, that you may have a long life and prosperity in the land which the LORD, your God, is giving you. [4th Commandment.]

<sup>17</sup>"You shall not kill. [5th Commandment.]

<sup>22</sup> See EL-ARAB, *supra*, at 47-48.

<sup>23</sup> See HUSSEIN, *supra*, at 136.

<sup>18</sup>"You shall not commit adultery. [6th Commandment.]

<sup>19</sup>"You shall not steal. [7th Commandment.]

<sup>20</sup>"You shall not bear dishonest witness against your neighbor. [8th Commandment.]

<sup>21</sup>"You shall not covet your neighbor's wife. [9th Commandment.]

"You shall not desire your neighbor's house or field, nor his male or female slave, nor his ox or ass, nor anything that belongs to him." [10th Commandment.]<sup>24</sup>

Notably, there are actually three Commandments that deal with theft.<sup>25</sup> The obvious, direct one is the 7th Commandment. The 9th and 10th Commandments concern motivations that sometimes prompt theft — covetousness (*i.e.*, great desire), envy (*i.e.*, jealousy), or sloth (*i.e.*, a lack of hard work) which are among the "Seven Deadly Sins."

### [B] Key Qur'anic Passages

As the 10 Commandments are roundly recognized as a moral basis for all three Abrahamic faiths, Judaism, Christianity, and Islam, it is hardly surprising that the *Shari'a* clearly forbids and criminalizes theft. This crime is called "*sarika*," and it is a *haqq Allāh* offense triggering a *ḥadd* punishment. The Qur'an states in *surah* 5, *ayat* 38-39:

<sup>38</sup>Cut off the hands of thieves, whether they are male or female, as punishment for what they have done — a deterrent from God: God is almighty and wise. <sup>39</sup>But if anyone repents after his wrongdoing and makes amends, God will accept his repentance: God is most forgiving, most merciful.<sup>26</sup>

If there is one phrase in the Qur'an about which non-Muslim westerners who have never read this sacred scripture are aware, then it probably is the first clause of *ayah* 38. Unfortunately for the image of Muslims and the *Shari'a*, in the minds of some non-Muslim westerners, the entire Islamic Legal System has been reduced to this *ḥadd* punishment. The barbarity of the cutting off of a hand or foot is not to be minimized. But, the subtleties of the crime of theft, much less of other dimensions of Islamic Penal Law, are not to be missed either. That is, pursuing all of the theoretical and practical dimensions of *sarika* in an open-minded manner is important to reaching a full appreciation, and informed critique, of the scheme.

<sup>24</sup> The Book of Deuteronomy, 5:6-21, in BIBLE, *supra*, at 193-194 (emphasis added).

<sup>25</sup> For Catholic Christian teaching on the 7th, 9th, and 10th Commandments, see CATECHISM OF THE CATHOLIC CHURCH ¶¶ 2401-2449 at 577-590, ¶¶ 2331-2391 at 560-576, ¶¶ 2514-2527 at 601-605, and ¶¶ 2534-2550 at 606-611, respectively (United States Catholic Conference, Inc., Washington, D.C.: Libreria Editrice Vaticana, 2nd ed. 1997). [Hereinafter, CATECHISM.]

<sup>26</sup> QUR'AN, *supra*, 5:38-39 at 71.

[C] *Hadd* Punishment

As for the heinous *hadd* punishment for *sarika*, if applicable, under the jurisprudence of three of the four Schools, it must be imposed as follows: after the first theft, the right hand of a person found guilty of the theft is cut off. In the event the same person commits a second theft, his or her left foot is cut off. These three Schools are the *Māliki*, *Shāfi'i*, and *Hanbali* Schools.

Their theory is that it would be inhumane to cut off his or her left hand, because he could not eat. Similarly, it would be cruel to cut off both feet, because then the culprit would be unable to walk. (There is, of course, the modern possibility of prosthetic devices to assist persons without hands or feet, but that was not foreseen in the early Islamic period, and remains unlikely for most people in the world, who are in far too poor a condition to afford such healthcare. There also would be a certain ludicrousness to cutting off two hands or two feet, only to replace them with prosthetic devices.) The theory also is that rendering a person incapable of eating or walking would turn that person into a ward of the state, community, or charitable organization.

The *Hanafi* School takes a different approach.<sup>27</sup> For any subsequent theft, no amputation should occur. Rather, the punishment should be by a *ta'zir* (discretionary) remedy. In this regard, it may be remarked that the *Hanafi* School has a different view from the other Schools of what constitutes inhumane punishment for repeat offenders.

Suppose a convicted and punished thief subsequently is found guilty of a third, or still further, thefts? As indicated, cutting off the left hand would make it impossible for the culprit to eat, and otherwise function, without nearly continual assistance. Cutting off the remaining foot would make ambulatory motion impossible. In such an instance, the sanction is imprisonment. That is, the thief is jailed until he or she repents. Imprisonment is particularly likely if the thief does not have full use of his remaining hand or foot.<sup>28</sup> Monetary fines are not part of the *hadd* punishment. That absence is an important distinguishing feature from American Criminal Law, particularly in respect of corporate and white-collar cases, in which fines are an oft-imposed sanction.

There is an important contrast between the *hadd* punishment for *sarika* and Christian doctrine. In the *Gospel of Mark*, Jesus says:

<sup>42</sup>“Whoever causes one of these little ones [children] who believe [in me] to sin, it would be better for him if a great millstone were put around his neck and he were thrown into the sea.<sup>43</sup> If your hand causes you to sin, cut it off. It is better for you to enter into life maimed than with two hands to go into Gehenna, into the unquenchable fire. . . .<sup>44</sup> And if your foot causes you to sin, cut it off. It is better for you to enter into life crippled than with two feet to be thrown into Gehenna. . . .<sup>45</sup> And if your eye causes you to sin, pluck it out. Better for you to enter the kingdom of God with one eye

<sup>27</sup> See EL-ANA, *supra*, at 5.

<sup>28</sup> SCHACHT, *supra*, at 180.

than with two eyes to be thrown into Gehenna, where ‘their worm does not die, and the fire is not quenched.’”<sup>29</sup>

The contrast is obvious, and concerns the way in which sacred texts are interpreted. The Qur’anic punishment for theft is read literally, at least according to the classical theory of Islamic Law. Throughout all of its history, the Catholic Church never has read the above-quoted text to mean Jesus commands a sinner to amputate a hand or foot that brings about sinful behavior. Rather, the passage is understood as an admonition to avoid succumbing to temptation to sin, with the stern nature of the warning coming through a dramatic metaphor. The contrast Christ offers is that however dreadful it would be to cut off one’s own hand or foot, that outcome is preferable to being condemned to hell, that is, Gehenna, which Jews and Christians understood as a place to which evil persons go.<sup>30</sup>

## [D] Evidentiary Requirements

Evidentiary requirements in the *Shari’a* are impediments to the imposition of *hadd* punishments. With respect to *sarika*, prosecution occurs only on the demand of an applicant, without which no *haqq Allāh* case is brought. Typically, the applicant is the victim. That applicant must be present at both the trial and the punishment. Two reliable male witnesses are required for a successful prosecution.<sup>31</sup> A confession made before a *Shari’a* court may be the basis for imposition of the *hadd* punishment. But, there must be a twice-fold confession by the defendant. Insistence on a confession on two separate occasions is based on *qiyās*, as is the requirement of a four-fold confession for unchastity (*zinā*). If there must be two witnesses to prosecute *sarika* successfully, then there must be two confessions, just as four witnesses or four confessions are needed in a case of *zinā*.

Notably, the *Hanafi* School allows for imposition of the *hadd* punishment for theft after only a single confession.<sup>32</sup> *Imām* Abū Hanifa reasoned if two confessions were required, then the first confession would create a civil debt of the defendant to the victim. Once such a debt is incurred, a *hadd* punishment could not be imposed. Thus, in the *Hanafi* School, a single confession of theft triggers the *hadd* punishment.

<sup>29</sup> The Gospel According to Mark, 9:42-43, 45, 47, in BULE, *supra*, at 83 (emphasis added).

<sup>30</sup> “Gehenna” corresponds to a site surrounding the Old City of Jerusalem (named the “Valley of Hinnom,” from which “Gehenna” is derived), where idolatrous Jews sacrificed their children to a god (Molech), and where garbage and bodies of criminals and dead animals were tossed and burned. The place became associated with destruction and constant fire. The general Arabic term for Hell is “*naar*.” Within Hell (*naar*), there are various regions, the worst of which is called “*jahannam*.” The term “*jahannam*” is related directly to the name “Gehenna.” See GHEHNA, WIKIPEDIA, posted at <http://en.wikipedia.org/wiki/Gehenna>. Note that “Gehenna” as a destination for wicked persons is different from “Sheol” (used in Jewish writings) or “Hades” (used in Ancient Greek and Christian writings), which is the abode of the dead. See *id.*

<sup>31</sup> See HUBBAIN, *supra*, at 135.

<sup>32</sup> See SCHACHT, *supra*, at 38.

[C] *Hadd* Punishment

As for the heinous *hadd* punishment for *sarika*, if applicable, under the jurisprudence of three of the four Schools, it must be imposed as follows: after the first theft, the right hand of a person found guilty of the theft is cut off. In the event the same person commits a second theft, his or her left foot is cut off. These three Schools are the *Mālikī*, *Shāfiʿī*, and *Hanbalī* Schools.

Their theory is that it would be inhumane to cut off his or her left hand, because he could not eat. Similarly, it would be cruel to cut off both feet, because then the culprit would be unable to walk. (There is, of course, the modern possibility of prosthetic devices to assist persons without hands or feet, but that was not foreseen in the early Islamic period, and remains unlikely for most people in the world, who are in far too poor a condition to afford such healthcare. There also would be a certain ludicrousness to cutting off two hands or two feet, only to replace them with prosthetic devices.) The theory also is that rendering a person incapable of eating or walking would turn that person into a ward of the state, community, or charitable organization.

The *Hanafi* School takes a different approach.<sup>27</sup> For any subsequent theft, no amputation should occur. Rather, the punishment should be by a *taʿzīr* (discretionary) remedy. In this regard, it may be remarked that the *Hanafi* School has a different view from the other Schools of what constitutes inhumane punishment for repeat offenders.

Suppose a convicted and punished thief subsequently is found guilty of a third, or still further, thefts? As indicated, cutting off the left hand would make it impossible for the culprit to eat, and otherwise function, without nearly continual assistance. Cutting off the remaining foot would make ambulatory motion impossible. In such an instance, the sanction is imprisonment. That is, the thief is jailed until he or she repents. Imprisonment is particularly likely if the thief does not have full use of his remaining hand or foot.<sup>28</sup> Monetary fines are not part of the *hadd* punishment. That absence is an important distinguishing feature from American Criminal Law, particularly in respect of corporate and white-collar cases, in which fines are an oft-imposed sanction.

There is an important contrast between the *hadd* punishment for *sarika* and Christian doctrine. In the *Gospel of Mark*, Jesus says:

<sup>42</sup>“Whoever causes one of these little ones [children] who believe [in me] to sin, it would be better for him if a great millstone were put around his neck and he were thrown into the sea.<sup>43</sup> If your hand causes you to sin, cut it off. It is better for you to enter into life maimed than with two hands to go into Gehenna, into the unquenchable fire. . . .<sup>44</sup> And if your foot causes you to sin, cut it off. It is better for you to enter into life crippled than with two feet to be thrown into Gehenna. . . .<sup>47</sup> And if your eye causes you to sin, pluck it out. Better for you to enter the kingdom of God with one eye

than with two eyes to be thrown into Gehenna, where ‘their worm does not die, and the fire is not quenched.’”<sup>29</sup>

The contrast is obvious, and concerns the way in which sacred texts are interpreted. The Qur’ānic punishment for theft is read literally, at least according to the classical theory of Islamic Law. Throughout all of its history, the Catholic Church never has read the above-quoted text to mean Jesus commands a sinner to amputate a hand or foot that brings about sinful behavior. Rather, the passage is understood as an admonition to avoid succumbing to temptation to sin, with the stern nature of the warning coming through a dramatic metaphor. The contrast Christ offers is that however dreadful it would be to cut off one’s own hand or foot, that outcome is preferable to being condemned to hell, that is, Gehenna, which Jews and Christians understood as a place to which evil persons go.<sup>30</sup>

## [D] Evidentiary Requirements

Evidentiary requirements in the *Shariʿa* are impediments to the imposition of *hadd* punishments. With respect to *sarika*, prosecution occurs only on the demand of an applicant, without which no *haqq Allāh* case is brought. Typically, the applicant is the victim. That applicant must be present at both the trial and the punishment. Two reliable male witnesses are required for a successful prosecution.<sup>31</sup> A confession made before a *Shariʿa* court may be the basis for imposition of the *hadd* punishment. But, there must be a twice-fold confession by the defendant. Insistence on a confession on two separate occasions is based on *qiyās*, as is the requirement of a four-fold confession for unchastity (*zinā*). If there must be two witnesses to prosecute *sarika* successfully, then there must be two confessions, just as four witnesses or four confessions are needed in a case of *zinā*.

Notably, the *Hanafi* School allows for imposition of the *hadd* punishment for theft after only a single confession.<sup>32</sup> *Imām* Abū Hanifa reasoned if two confessions were required, then the first confession would create a civil debt of the defendant to the victim. Once such a debt is incurred, a *hadd* punishment could not be imposed. Thus, in the *Hanafi* School, a single confession of theft triggers the *hadd* punishment.

<sup>29</sup> *The Gospel According to Mark*, 9:42-43, 45, 47, in BIBLE, *supra*, at 83 (emphasis added).

<sup>30</sup> “Gehenna” corresponds to a site surrounding the Old City of Jerusalem (named the “Valley of Hinnom,” from which “Gehenna” is derived), where idolatrous Jews sacrificed their children to a god (Molech), and where garbage and bodies of criminals and dead animals were tossed and burned. The place became associated with destruction and constant fire. The general Arabic term for Hell is “*naar*.” Within Hell (*naar*), there are various regions, the worst of which is called “*jahannam*.” The term “*jahannam*” is related directly to the name “Gehenna.” See *Gehenna*, WIKIPEDIA, posted at <http://en.wikipedia.org/wiki/Gehenna>. Note that “Gehenna” as a destination for wicked persons is different from “Sheol” (used in Jewish writings) or “Hades” (used in Ancient Greek and Christian writings), which is the abode of the dead. ## [E] Elements

What are the elements of *sarika* that trigger the *hadd* punishment? The Qur'ān does not identify them. By not saying much about what behavior rises to the level of a culpable act of theft, it is as if the Qur'ān assumes that some crimes — namely, theft — are so obviously wrong, or that they are universally forbidden, that every Muslim knows, or should know, of their prohibited elements. Thus, the Qur'ān focuses on the punishment for theft (discussed below). Accordingly, the ingredients of *sarika* seem to be derived in part from analyzing Property Law. Under Islamic Property Law, there are two basic forms of possession — legitimate and illegitimate. The *Shari'a* seeks to protect the true owner of property, and safeguard intended transfers of possession by differentiating them from misappropriation. As a civil matter, illegitimate possession can result from usurpation. But, as a criminal matter, it can result from theft or highway robbery. Thus, the identification and punishment of these two crimes — theft and highway robbery — are the way Islamic Penal Law protects legitimate possession.

To be liable for the *hadd* punishment for *sarika*, a person must take private property by stealth, and the value of that property must be above a minimum threshold, which traditionally is 10 *dirhams*. Thus, there are five elements: private property, taking, stealth, minimum value, and criminal intent (*mens rea*, *niyya*).

## • Private Property

The first element is the nature of the object in question. It must be private property, which is to say it cannot be an exempt object. Because of their nature, certain objects cannot be stolen. Even if they exceed the minimum value and are taken stealthily, the taking is not *sarika*, and thus does not bring down the *hadd* punishment on the taker.

Public goods or public property — air, water in a sea, lake, or river, for example — would be exempt objects.<sup>33</sup> After all, everyone, including the alleged thief, is a part owner in a public good. Thus, wild flora and fauna, assuming they have no owner, would be exempt. Examples would be grass, wood, fish, and birds. A free person cannot be an object of property susceptible to theft. (Rather, the offense would be kidnapping.) Conversely, wood that has been made into a door, or fruit or meat that has been harvested and processed, would not be exempt.<sup>34</sup> Someone has taken them, exercised ownership and control over them, and added value to them.

Two polar opposite categories — holy and forbidden objects — are exempt. A holy object, such as the Qur'ān, or possibly a book on Islam, cannot be an object of property, and thus is not *in commercio*, i.e., not in the stream of commerce.<sup>35</sup> In turn, taking it cannot give rise to a case of *sarika*. *Zam zam* water might also fall within this category of objects exempt because of their holiness. This water comes from a stream inside the compound of the Grand Mosque in Mecca that has been flowing for centuries. But, if this water has been bottled with the intention of

33 See SCHACHT, *supra*, at 180.34 See SCHACHT, *supra*, at 180.35 SCHACHT, *supra*, at 180.

selling it, then it has been placed in commerce, and would be non-exempt. Forbidden objects — alcohol, pork, pork products, or pornography — are exempt, too. The rationale is the same as for holy objects: forbidden ones are not legitimate objects of commerce. Additionally, forbidden objects are viewed as having no value, and thus do not meet the minimum threshold requirement.<sup>36</sup> (Such objects have value on the “black market,” but being forbidden, they are not officially recognized to have a legitimate commercial value.) Of course, taking a forbidden object, or indeed trafficking in one, gives rise to serious offenses, but not *sarika*.

## • Taking

How is it decided whether a non-exempt object truly is “taken”? The answer is that it is considered “private” and “taken” if all three of the following three conditions exist:

- (1) The accused does not own the object (i.e., he has no right of ownership — “milk”).
- (2) There is no semblance of the accused having a right of ownership (“*shubha milk*”).
- (3) The accused does not have lawful possession or custody. (“Custody” over a thing or things is called “*hiz*.”)

The conditions concerning lawful possession or custody are significant in two respects.

First, various acts that might otherwise be thought as calling for a *hadd* punishment actually would not give rise to this liability. For example, taking property from a nearby relative is not subject to a *hadd* punishment. A person who qualifies as close relative is known as “*mahram*.” (The plural is “*mahrim*.”) In effect, ownership of an object by a nearby relative is extended to a close family member who takes it, and the taking does not count as a theft. This term has significance in Islamic Family Law, too. Not only are such persons so close in family connection that they are ones from whom *sarika* is not a possibility, but also they are too close to marry. Thus, the term “*mahram*” connotes a “forbidden person” in the sense of matrimony and theft.

Another illustration of an act that ostensibly is theft, but in actuality does not rise to the level of *sarika* is embezzlement. That is because the embezzler is in lawful possession of the property in question. Embezzlement is called “*khiyāna*.” Do these examples mean that a Muslim can embezzle funds, or steal from close relatives, with impunity? The answer is “absolutely not.” These acts are considered offenses, and are actionable as civil wrongs, or torts (*jinnāyāt*).

The second aspect of lawful possession or custody concerns removal of the object in question. A person accused of *sarika* actually must have removed the object — taken it — from the custody of another, and have gained custody of it himself or herself. If the object stays put, then there is no theft. To use the Arabic term, there must be a change in *hiz*. Professor Schacht thus writes of the

36 See HUBBAIN, *supra*, at 135.

quintessential instance of a thief being "caught red-handed."<sup>37</sup> In such a case, there may have been no change in custody. Consequently, some Islamic legal scholars (*fukahā*) argue the thief is not liable for a *hadd* punishment. An example might be where police catch a thief intending to steal a precious Islamic illuminated manuscript from a museum: the police walk in as the thief is breaking into the protective case in which the manuscript is preserved, and is about to pick up the manuscript. The manuscript has not moved, hence the thief is nowhere near the exit with the manuscript tucked in his backpack. Some *fukahā* go so far as to urge the thief is not be liable for the *hadd* punishment even if he had handed the object to an accomplice.

What about stealing an object from a house that a person has been allowed to enter? Or, what if the invited guest-cum-thief takes the property and hands it to an uninvited accomplice standing just outside the door or window?<sup>38</sup> These acts do not contain the "stealth element." They also lack the "possession/custody element."

#### • *Stealth*

As to the third element necessary for *sariqa*, stealth, it is a critical one. That is because of the potentially large number of "thefts" that are not, from the perspective of the *Sharī'a*, actionable in terms of a *hadd* punishment. "Stealth" means that the accused must not have stolen the property openly. Open theft is called "*nahb*." Certainly, the *Sharī'a* does not condone robbery. Rather, it is an offense, akin to a civil wrong or tort, known as "*jināya*," which creates a different kind of liability. Likewise, taking the property of another when someone is unaware of the taking, such as pick-pocketing, does not satisfy the element of stealth.<sup>39</sup> (Pick-pocketing, or more generally "snatching things unaware," is called "*ikhtilās*.") Again, the liability would be one as a *jināya*.

That outcome appears odd. Stealth and a lack of awareness seem intimately related. The logic that pick-pocketing is done openly is dubious, as is the logic that it is done unbeknownst to the victim. Many thefts occur in an open context, such as on a street or in a marketplace. And, theft occurs precisely because the owner of private property is unaware of the action — if the owner knew, then presumably he or she would attempt to prevent the taking, otherwise the taking would be consensual, and thereby not theft at all.

#### • *Minimum Value*

The fourth element of *sariqa* concerns minimum value, and in effect is a *de minimis* rule. The value of an object taken must equal or exceed a minimum threshold, otherwise the *hadd* punishment cannot be imposed. That threshold was established by Islamic religious and legal scholars (*ulema* and *fukahā*, respectively) through the use of analogical reasoning — *qiyās*. Some *ulema* in the Ancient Schools of Iraq at Basra and Kufa analogized rather crudely to five fingers,

<sup>37</sup> See SCHACHT, *supra*, at 180.

<sup>38</sup> See SCHACHT, *supra*, at 180.

<sup>39</sup> See SCHACHT, *supra*, at 180.

and arrived at 5 *dirhams* as the threshold.<sup>40</sup> If an accused was going to have his or her hand cut off, and thereby lose five fingers, then it had better be on account of stealing property worth at least 5 *dirhams*. The amount that prevailed — for rather arbitrary reasons — was 10 *dirhams*, and this figure remains the threshold for the *Hanaḥi* School. But, in an effort to impart greater authority to the 10 *dirham* threshold, the *ulema* expressed it as a tradition, namely, a doctrine that had commenced at the time of the Caliph 'Alī (656-661 A.D.). Note what happened was the cloaking (or embodying) of dubious analogical reasoning (*qiyās*) in sacred tradition.

An obvious question is what happens in an instance of multiple culprits, that is, where a theft is committed by more than one person? In such cases, the total value of the stolen property is divided by the number of thieves. For the *hadd* punishment to apply, the result must at least equal 10 *dirhams*.

#### • *Mens Rea (Niyya)*

A defendant cannot be convicted of *sariqa*, and the *hadd* punishment cannot be imposed, unless the defendant acted with the requisite criminal intent.<sup>41</sup> In particular, the defendant must have known the object stolen was owned by someone else, and not an exempt object such as a public good. Further, the defendant must have sought to remove the object from the place of its proper custody.

### § 45.03 HIGHWAY ROBBERY (KAṬ' AL-ṬARĪK OR HIRABAH)

#### [A] Biblical Comparisons: 5th and 9th Commandments

There is no rule in the 10 Commandments that specifically refers to "highway robbery." By no means does that suggest highway robbery is regarded with indifference. Rather, the prohibition would fall within the 7th Commandment against stealing, and insofar as a death occurs in the course of the commission of a theft, the 5th Commandment as well.<sup>42</sup> In modest contrast to the Old Testament of the Bible, the Qur'ān does single out highway robbery as a distinct claim of God (*haqq Allāh*).

In Arabic, the crime of highway robbery is formally called "*kaṭ' al-ṭarīk*." The word "*kaṭ*" means "robbery," while "*ṭarīk*" means "highway." Watchers of American television programs and movies may be amused that Islamic Penal Law singles out "highway robbery," given the many cartoons and westerns in which bandits of one kind or another are depicted as plundering travelers in an amusing, entertaining, or dramatic way. Investors in financial markets also may be amused, as the label "highway robbery" sometimes is applied to unscrupulous practices on

<sup>40</sup> See SCHACHT, *supra*, at 38.

<sup>41</sup> See HUSSAIN, *supra*, at 135.

<sup>42</sup> For Catholic Christian teaching on the 5th and 9th Commandments, see CATECHISM, *supra*, ¶¶ 2258-2317 at 544-559, ¶¶ 2331-2391 at 560-576, and ¶¶ 2514-2527 at 601-605, respectively.

Wall Street. But, from the perspective of the *Shari'a*, put bluntly, highway robbery is no joke.

### [B] Good Order of Society and Concept of "Hirabah"

In several respects, highway robbery is an intriguing offense. It is indeed a distinct *haqq Allāh* crime, conceptually it is a hybrid offense:

This crime is regarded as related to theft on one side and to homicide on the other, but it is not subsumed under these, except in the case of active repentance before arrest.<sup>43</sup>

Theft (*sarika*) is a *haqq Allāh* crime, whereas homicide falls within *haqq ādamī*. Nonetheless, not only is this offense a *haqq Allāh* crime, but also it is viewed as a crime against society. That is because it is seen as undermining the peace, stability, and good order of society. Thus, the Arabic term that sometimes applies to it is "*hirabah*." Narrowly defined, this term means "highway robbery." More generally, the term refers to a crime against society, i.e., an offense that undermines the security of the society.

The concept of "*hirabah*" in the broad sense is important. In some countries, like Saudi Arabia, rape is viewed as a "*hirabah*" offense. As a result, it triggers a punishment even higher than that for unlawful sexual intercourse (*zinā*). For instance, the punishment imposed may be 100 lashes, plus the sanction used in a case of adultery or fornication. Moreover, anecdotally at least, in the event a rape victim goes to Saudi authorities and says she is raped, this statement cannot be used against her as a confession of adultery. The justification for these rules is that rape is a crime that undermines the security of society. Nevertheless, rape prosecutions are few and far between in many *Shari'a* jurisdictions. The reasons include fear, shame, corruption, and male dominance of the law enforcement and judicial systems. Notably, to facilitate prosecutions of rape, the *Māliki* School has more flexible rules on evidence than certain other Schools. Courageously, various Muslim Human Rights organizations, including groups of women lawyers, are working to change this unfortunate state of affairs.

Turning to the textual basis for including highway robbery as a *haqq Allāh* crime that triggers a *hadd* punishment, the Qur'an contains provisions on highway robbery. For instance, *sura* 5, *ayat* 33 states:

<sup>33</sup>Those who wage war against God and his Messenger and strive to spread corruption in the land should be punished by death, crucifixion, the amputation of an alternate hand and foot, or banishment from the land: a disgrace for them in this world, and then a terrible punishment in the Hereafter, <sup>34</sup>unless they repent before you overpower them: in that case, bear in mind that God is forgiving and merciful.<sup>44</sup>

This passage does not explicitly mention "highway robbery." However, in keeping with the enlarged meaning of "*hirabah*," explained earlier, the crime is one of

promulgating corruption in the land — that is, a menacing society. Moreover, the punishments referenced are precisely those applied to culprits of highway robbery.

In *sura* 29, *ayat* 28-30, the Qur'an references highway robbery, when recounting how God (Allāh) sent Noah, Abraham, Lot, and other pre-Muhammadan prophets:

<sup>28</sup>And Lot: when He said to his people, "You practice outrageous acts that no people before you have ever committed. <sup>29</sup>How can you lust after men, waylay travelers, and commit evil in your gatherings?" the only answer his [Lot's] people gave was, "Bring God's punishment down on us, if what you say is true." <sup>30</sup>So he [Lot] prayed, "My Lord, help me against these people who spread corruption."<sup>45</sup>

The term "waylay travelers" connotes highway robbery, and (depending on the English translation of the Qur'an) sometimes is expressed as such. It is described as "outrageous," listed alongside "evil" acts, and blamed for spreading "corruption." The thrust of this passage is important, namely, how the prophetic messages sent by God were not heeded by the people to whom they were sent, or subsequently were misinterpreted and abused, leading to morally depraved, wicked behavior — of which highway robbery is one.

### [C] Elements

What, exactly, is highway robbery (*hirabah*)? The Qur'an does not clearly lay out its indispensable elements, which is not surprising, given that it is a sacred text, not a model penal code. But, as its name suggests, "highway robbery" is the taking of possessions of persons, without their consent, who are on a journey. These persons are particularly vulnerable. As they are in transit, they are defenseless, or nearly so. They also may well be exposed to the elements. These facts certainly catch the attention of would-be raiders and plunderers, and not surprisingly, the crime long pre-dates Islam. For example, it plagued caravans of pilgrims on the Arabian Peninsula who travelled to Mecca to worship at the *Ka'ba* before the advent of Islam. The scourge continued. Indeed, in various Muslim and non-Muslim countries, it persists to the present, afflicting poor devout pilgrims undertaking long, difficult voyages to a place of worship.

Thus, the elements of highway robbery (*hirabah*) are theft plus context. That is, the same elements as exist for *sarika*, including the *mens rea* (*niyya*) requirement, must be present. In addition, the context must be one in which the victims are not in their home or office, but rather en route from one location to another. However, is a robbery that occurs at a place of leisure — e.g., a gymnasium, social club, shopping mall, or movie theater — a "highway" robbery? The answer is uncertain:

This [highway robbery] refers to robbery with violence. There are differences among the jurists as to whether the offense can only relate to robbery on the highway, or whether armed holdups in urban areas are also included.<sup>46</sup>

<sup>43</sup> SCHACHT, *supra*, at 187.

<sup>44</sup> QUR'AN, *supra*, 5:33-34 at 71 (emphasis added).

<sup>45</sup> QUR'AN, *supra*, 5:33-34 at 71 (emphasis added).

<sup>46</sup> HUSSAIN, *supra*, at 135.

Note that violence need not actually occur. The mere threat of it suffices. Consequently, there are two aspects of the context — that it be a “highway,” perhaps broadly defined, and that there be violence or the threat thereof.

### [D] *Hadd* Punishment

The debate among Islamic legal scholars (*fukahā*) as to armed holdups in urban areas, and other possible environments that might qualify as a “highway,” is not merely academic. Rather, the punishments for highway robbery (*hirabah*) are severe, in some cases even more so than for theft (*sarika*). The Table summarizes these punishments. Notably, they apply to all participants in the crime, regardless of their particularized behavior, *i.e.*, whether they are principals or accomplices. Summarized, the sanctions are:

- death — if the robber has killed but has not got away with the stolen property;
- crucifixion — where the robber has killed and got away with stolen property;
- cutting off the hand and foot on opposite sides — for robbery with violence where the robber does not kill the victim;
- exile — where the robber frightens the victim but does not kill or get away with the stolen property.<sup>47</sup>

The period of exile in the last case is unclear, as is evident from the last of row Table 45-1. What happens in the scenario of a bungled effort at highway robbery, where the would-be perpetrators get away? There is no prescribed *hadd* punishment. In effect, what occurred was a failed attempt, and the *Shari'a* does not contain a complete set of rules on the law of attempts. In practice, law enforcement authorities would search for the miscreants, whose acts may constitute *haqq ādami* offenses.

Similarly, regarding punishment, Professor Schacht reports:

... [T]he penalties inflicted differ according to the facts of the case. If only plunder has happened and the value of the loot, when divided by the number of culprits, at least equals the minimum amount required for the *hadd* [punishment] for theft to be applicable, the right hand and the left foot are cut off; if only homicide has happened, execution with the sword takes place, not as retaliation but as *hadd*; if both plunder and homicide have happened, execution by crucifixion alive takes place. These punishments are awarded to all accomplices, whatever their individual acts; on the other hand, if one of them is exempt from *hadd*, *e.g.*, because he is a minor, the *hadd* for highway robbery lapses for all, although each remains criminally responsible for his own individual acts.<sup>48</sup>

<sup>47</sup> HUSAIN, *supra*, at 135.

<sup>48</sup> SCHACHT, *supra*, at 180-181.

Four points are worth noting from this report. First, in respect of the “minimum amount” referenced, that threshold is defined in terms of the value of the stolen property. The same value that applies to theft (*sarika*) applies to highway robbery — generally, 10 *dirhams*. If there are two or more highway robbers, then the value of the stolen property is divided by the number of perpetrators. The result must at least equal the minimum threshold for the *hadd* punishment to be applied. The evidentiary requirements, in terms of witnesses, also are the same for the *sarika* and *hirabah* offenses.

Second, if the case is one of homicide but not theft — in effect, the highway robbery was badly and tragically bungled — then it still is not viewed as one of *jināya* (civil wrong, or tort). That is because highway robbery is a crime that gives rise to a *hadd* punishment. The fact a homicide, but not a theft, occurred does not transform a highway robbery case involving the *hadd* punishment into a homicide offense.

Third, a *hadd* punishment cannot be administered to a minor. By definition, a minor is too young to be held criminally responsible for his or her actions. The result is the entire band of robbers is relieved of their collective liability for a *hadd* punishment. But, they may be held accountable for their individual wrongdoings. This rule creates a perverse incentive for unscrupulous behavior. A band of thieves that is apprehended ought to hope it can count among its members a minor, and thus in planning its crime will recruit a minor to its ranks.

Fourth, Professor Schacht recounts the amputations as being right hand and left foot. *Sura* 5, *ayah* 33 refers to “amputation of an alternate hand and foot.” Professor Abdel Haleem, in a footnote to this passage, explains the amputation may be “[l]eft hand and right foot, or *vice versa*.”<sup>49</sup> Obviously, to a right-handed person, whether the amputation is to that hand matters greatly, and likewise for a left-handed person. Moreover, if the culprit has no hand or foot to be amputated (*e.g.*, no right hand or left foot), or if the culprit has them, but they are paralyzed, then a *ta'zir* (discretionary) punishment is applied.

Table 45-1:  
Summary of *Hadd* Punishments for Highway Robbery (*Hirabah*)

Elements Present	Punishment Applied
Theft only	Cutting off hand and foot
Homicide, robber(s) do (does) not escape with loot	Execution by sword
Homicide, robber(s) escape(s) with loot	Crucifixion
Neither theft nor homicide, robber(s) do (does) not escape	Exile
Neither theft nor homicide, robber(s) escape(s)	?

In brief, the punishment depends on whether theft, homicide, or both have occurred, and whether the culprits escape (before, of course, being caught). If highway robbery does not result in the death of another person, then the applicable punishment, as set forth in the *Qur'an*, is cutting off the right hand and left foot. Note that for each culprit, both limbs are cut, whereas in a case of theft (*sarika*) as

<sup>49</sup> QUR'AN, *supra*, fn. a to 5:33 at 71.

a first offense, the right hand is cut, with the left foot being cut only after a second offense. If the highway robbery results in a death, then the applicable punishment, as specified in the Qur'ān, is death by the sword or crucifixion. As crucifixion is not used anymore, death by the sword, or other means, is applied. Any exemption from the *ḥadd* punishments for one confederate is extended to all of them, the group is disaggregated in terms of criminal liability, and each one is held accountable for his or her particular contributions.

In respect of the elements of highway robbery that results in the death of a victim, there is a clear analogy to the American Criminal Law concept of felony murder. Depending on the state jurisdiction, commission of a felony that results in a murder can lead to the severest of sanctions, namely, the death penalty. That penalty can apply even to a confederate who does not "pull the trigger." However, it is not entirely clear whether, under the *Sharī'a*, the death of an innocent bystander, as distinct from the intended target of thievery, triggers the severest punishments. For instance, suppose thieves raid a camel caravan, but in the mayhem end up killing a passing shepherd. Presumably, there ought to be no distinction, if the point is to underscore the gravity of the crime and deter it.

## Chapter 46

### CLAIMS OF GOD (ḤAQQ ALLĀH): CONVERTING AND RELIGIOUS FREEDOM

And we are reminded that *because it is our common human dignity which gives rise to universal human rights, they hold equally for every man and woman, irrespective of his or her religious, social or ethnic group.* In this regard, we must note that *the right of religious freedom extends beyond the question of worship and includes the right — especially of minorities — to fair access to the employment market and other spheres of civic life.*

Address of His Holiness Pope Benedict XVI, Meeting with Muslim Religious Leaders, Members of the Diplomatic Corps, and Rectors of Universities in Jordan, Mosque Al Hussein bin Talal, Amman, Jordan, 9 May 2009 (emphasis added)

#### § 46.01 SOCRATES, THE EXAMINED LIFE, AND FREEDOM OF CONSCIENCE

Of the many famous remarks of Socrates (*circa* 470/469-399 B.C.) recorded in the *Dialogues* of Plato (*circa* 428/427-348/347), perhaps none is more so than his statement in *The Apology* that the unexamined life is not worth living. Further,

Socrates states in *Crito*: "... the really important thing is not to live, but to live well.<sup>1</sup>" To live well is, Socrates teaches, to live an examined life. A soul-searching examination of one's life is an intensely personal matter, and part of a life-long spiritual journey. Indeed, on that journey this examination may occur on several occasions.

The event that triggers deep introspection may be tragedy, such as the death of a loved one, or triumph, such as achievement of one's worldly ambitions. The famed Holocaust survivor and Austrian neurologist and psychiatrist, Dr. Victor Frankl (1905-1997 A.D.), insists in his classic, *Man's Search for Meaning* (1946), that even in the most hellish conditions on earth, such as the Concentration Camps in which Nazi Germany put six million Jews to death, plus millions of others (including Christians, disabled persons, and homosexuals), there is meaning, if only we study ourselves and our conditions. It may be in sacrificing one's life for another, even a stranger, as the example of Saint Maximilian Kolbe (1894-1941) — a Polish Catholic Priest who voluntarily perished in the Holocaust so that a Jewish father with a wife and children could live — shows.

Socrates did not pre-judge the outcome of the examination. That, too, is an intensely individual matter. It may lead to a re-dedication of oneself to religious faith. It may lead to a conversion to another religious faith. It may lead to profound uncertainty, an agnosticism or even atheism that is rebuffed only at the moment of death. For Socrates, it is the quest that matters — an authentic, honest introspection. Whether life is wasted depends not on the end point of the quest, but on whether one takes up the quest.

A quest, be it to run a marathon, hike to the top of a rainforest canopy, or traverse a desert, is born of yearning. There is a sense of "something" that propels one to the quest. What is it like to run a marathon? What does the rainforest look like? What is the feeling of insignificance in a desert like? A spiritual quest is born of a yearning to answer the question posed by the renowned Catholic Christian writer, Father Dom Chautard (1858-1935), in his classic, *The Soul of the Apostolate* (1946), where are you going, and why?<sup>2</sup> There is a sense this world is not our True Home, and that it offers no enduring, deep-seated satisfaction (to use the Sanskrit term, *santosh*). There is a yearning to know the Creator (or, for some, whether there really is a Creator), and know the purpose the Creator has for oneself (or, for some, whether there is any purpose at all). There is a yearning to know how to order one's life, and one's relations with others, to realize an after life, and Eternal Life, in a state that both Christians and Muslims call "Heaven."

For Socrates, an examination of one's life — a quest — must be open-ended. The individual must have freedom to explore. Courage is indispensable, because the individual does not know where the quest may lead. (Not surprisingly, Sir Winston Churchill (1874-1965) identifies courage as the prime virtue, because it is the one on

which all others depend.) In modern international legal parlance, Socrates asks for freedom of conscience, or equivalently termed, freedom of religion. At the starting line, one cannot be certain whether one will finish the marathon, or in what time. At the bottom of the rainforest, the vista at the top of the canopy is hidden by lush plant life and protected by a steep, slippery, muddy ascent that not everyone can mount.

So it is with a spiritual quest. At the beginning, the seeker knows the questions, not the answers. The quest has meaning because answers are not deterministically scripted. The seeker knows not whether the outcome is an Abrahamic faith (Judaism, Christianity, or Islam), an Eastern faith (e.g., Hinduism or Sikhism), or an Eastern philosophy (arguably, Buddhism). Nor is the seeker certain as to the denominations within these systems, such as Catholic and Protestant Christianity, *Sunni* or *Shi'ite* Islam, or Theravada (Southern), Mahayana (Eastern), Tibetan (Northern, or Vajrayāna), and Zen Buddhism. The sense these systems will address the yearning, coupled with uncertainty as to which system will do so, and how, makes the quest yet more exciting.

## § 46.02 DISTINGUISHING AUTHENTIC FROM UNAUTHENTIC ISLAM

What a shame it is that the reality for Muslims living in most Islamic countries is they cannot openly enter into this kind of spiritual quest. It is sometimes remarked (including to your author by a dear Saudi friend), without understating the challenges religious minorities in such countries face, that no one has less freedom of religion than a Muslim in a Muslim country. Why, *i.e.*, what gives credence to this remark?

Many Muslim countries, with Egypt, Indonesia, Malaysia, and Turkey being notable exceptions, lack robust book markets. One cannot walk the streets of Bandar Seri Begawan, Dubai, Muscat, or Riyadh, for example, and find a large bookstore like Barnes & Noble or Borders stocking a healthy supply of works on non-Muslim religions. (That contrasts with Lawrence, Kansas, where the local bookstores boast fine collections on Islam.) This oppressive anti-intellectual reality is partly a result of government restrictions on freedom of speech and thus on inquiry, conscience, and religion. The 1989 Rushdie Affair exemplifies this reality. It remains the sad fact that not only in Iran, which was the focal point of the Rushdie case, but also in several countries — including the Brunei Sultanate and Saudi Kingdom — it is illegal to import religious literature or non-Muslim Sacred Texts, such as the Bible. (There is typically an exception of an allowance to carrying a copy on one's person for personal use, as your author has found out on several trips.) In brief, the average Muslim in several Islamic countries does not have the option to stroll down to a local bookstore, pick up a book on, say, Buddhism, much less hear a presentation on Buddhist meditation techniques by the author on a book tour, and thereafter procure a copy autographed by, and chat with, the author.

Regrettably, the reason is even more sinister than a dearth of good bookstores or government restrictions: the rule against apostasy, as it is (wrongly) understood and implemented in the *Shari'a*. Muslims simply are not free to convert openly, or

<sup>1</sup> Plato, *Crito*, in *Collected Dialogues* 33 (Princeton, New Jersey: Princeton University Press/Bollingen Series, 1989) (Edith Hamilton & Huntington Cairns eds.).

<sup>2</sup> This classic work by Father Chautard was translated into English from French, and published posthumously. See JEAN-BAPTISTE CHAUTARD, *THE SOUL OF THE APOSTOLATE* (Abbey of Gethsemani, Trappist, Kentucky, 1946).

even to question openly whether Islam is the right path for them. Their spiritual quest, therefore, has a pre-determined outcome: it must be a re-affirmation of their Islamic faith. While they might be able to opt to follow the rules of a different School among the Four Schools, the possibility of turning to Zen Buddhism, or even an Abrahamic option like Catholicism, is a perilous heresy. Consider Pakistan's *Apostasy Bill* of 2006. It calls for sentencing Muslim men to death, and women to life in prison, for leaving Islam. Further, consider the blasphemy laws of that country, set out in the *Pakistan Penal Code*:

295-B. Defiling, etc., of Holy Qur'an:

Whoever willfully defiles, damages or desecrates a copy of the Holy Qur'an or of an extract therefrom or uses it in any derogatory manner or for any unlawful purpose shall be punishable with imprisonment for life.

Sec. 295-B added by P.P.C. (Amendment) Ordinance, I of 1982.

295-C. Use of derogatory remarks, etc., in respect of the Holy Prophet:

Whoever by words, either spoken or written, or by visible representation or by any imputation, innuendo, or insinuation, directly or indirectly, defiles the sacred name of the Holy Prophet Muhammad (peace be upon him) shall be punished with death, or imprisonment for life, and shall also be liable to fine.

Sec. 295-C ins. by the Criminal Law (amendment) Act, 111 of 1986, S. 2.<sup>3</sup>

In brief, impose a death sentence, life imprisonment, and/or a fine for a conviction of blaspheming Islam, specifically the Prophet Muhammad in word, deed, or symbol, and a life sentence for insulting Islam via desecrating the Qur'an.

Tragically, in Pakistan in January 2011, Salman Taseer, a progressive politician and Governor of Punjab, was assassinated for his call to repeal the blasphemy law and his championing of the case of Asia Bibi, a poor Christian woman whom a Pakistani court in 2010 sentenced to death for blasphemy she allegedly committed, but denies, during an argument with other farmers in a village in Punjab in June 2009. He was assassinated in daylight in Islamabad by his own police guard, who dubbed Governor Taseer a "blasphemer."<sup>4</sup> In March 2011, the only Christian in Pakistan's cabinet, Shahbaz Bhatti, a Catholic and the Minister for Religious Minorities, was assassinated while driving to work in Islamabad by the Taliban. The Taliban branded him a blasphemer for his opposition to the blasphemy law.<sup>5</sup>

Is turning to a different branch of Islam an option, as might a Christian convert from Protestantism to Catholicism (or *vice versa*)? Generally, the answer is "no." Changing from *Sunni* to *Shi'ite* Islam is a radical, even heretical step. Is changing affiliations within a branch of Islam an option, as might a Protestant change from

Baptist to Methodist? There is more leeway here, but the answer depends on the Muslim country in question. In Saudi Arabia, only the *Wah'habi* School is officially condoned. In Brunei, only the *Shāfi'i* School is accepted. These restraints inhibit a Muslim not only from exploring other religions, but also, ironically, from exploring the richness of Islam itself.

These restraints have no basis in Qur'anic teaching. The Qur'an itself clearly forbids compulsion in religion. *Surah 2, ayah 256* states:

<sup>256</sup>There is no compulsion in religion: true guidance has become distinct from error, so whoever rejects false gods and believes in God has grasped the firmest hand-hold, one that will never break.<sup>6</sup>

The first part of *ayah 256* is critical. Sometimes, it is translated as:

Let there be no compulsion in religion.<sup>7</sup>

Phrased as "There is . . ." connotes a statement of fact, and also (albeit somewhat awkwardly) an expression of a rule. Phrased as "Let there be . . ." conveys a sense that notwithstanding the *status quo*, there is not supposed to be compulsion. This phraseology (again, somewhat awkwardly) indicates a rule, as it can be understood as an imperative or command. Either way, the point is clear: religion is not to be imposed by force. That point can have only one implication, namely, there must be freedom of religion.

Lest there be doubt, three further verses clear it up. *Surah 10, ayat 99-100* says:

<sup>99</sup>Had your Lord willed, all the people on earth would have believed. So can you [Prophet Muhammad] *compel* people to believe? <sup>100</sup>No soul can believe except by God's will, and He brings disgrace on those who do not use their reason.<sup>8</sup>

*Surah 2, ayah 62* pronounces:

<sup>62</sup>The [Muslim] believers, the *Jews*, the *Christians*, and the *Sabians* [an early monotheistic religious community] — *all those who believe in God and the Last Day and do good* — will have their rewards with their Lord. No fear for them, nor will they grieve.<sup>9</sup>

Finally, *surah 5 ayat 67-69*:

<sup>67</sup>Messenger [i.e., the Prophet Muhammad], proclaim everything that has been sent down to you from your Lord — if you do not, then you will not have communicated His message — and God will protect you from people. God does not guide those who defy Him. <sup>68</sup>Say [i.e., Prophet, say to the], "People of the Book, you have no true basis [for your religion] *unless you uphold the Torah, the Gospel, and that which has been sent down to*

<sup>6</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 2:256, at 29 (Oxford, England: Oxford University Press, 2004). [Hereinafter, Q'AN.]

<sup>7</sup> Quoted in JAMILA HUSSAIN, ISLAMIC LAW AND SOCIETY — AN INTRODUCTION 138-139 (Annandale, New South Wales, Australia: The Federation Press, 1999). [Hereinafter, HUSSAIN.]

<sup>8</sup> QUR'AN, *supra*, 10:99-100, at 135 (emphasis added).

<sup>9</sup> QUR'AN, *supra*, 2:62, at 9 (emphasis added).

you from your Lord," but what has been sent down to you [Prophet] from your Lord is sure to increase many of them in their insolence and defiance: do not worry about those who defy [God].<sup>10</sup> The [Muslim] believers, the Jews, the Sabians, and the Christians — those who believe in God and the last Day and do good deeds — will have nothing to fear or to regret.<sup>11</sup>

Manifestly, from the first passage, not even the Prophet can compel belief. Belief, to put the point in Catholic Christian terms, is a gift from God, a matter of grace. And, reason is to be used to encourage belief. *Ayah* 100 is redolent of the famous September 1998 Encyclical Letter of Pope John Paul II, *Fides et Ratio* (Faith and Reason). In his metaphor, faith and reason are two wings of the same bird, without which it cannot fly:

Faith and reason are like two wings on which the human spirit rises to the contemplation of truth . . .<sup>12</sup>

The source of faith is God Himself, and we use (or not) our reason to enhance the breadth and depth of our faith, and *vice versa*.

The second passage is akin to a doctrine of universal salvation. The Qur'an assures that adherents to an Abrahamic faith will be rewarded in an after-life. This assurance, because of the remarkable phrase set off by hyphens, extends beyond Jews, Christians, and Muslims, to anyone who fulfills three prerequisites: belief in God, belief in a Day of Final Judgment, and engagement in good works. The inference is (or ought to be) obvious. Not only is there no place in Islamic practice for trampling on religious freedom, but also there is no need to do so. Believers, broadly construed in line with these prerequisites, will be (to use the Christian term) saved.

The third passage reinforces the second one. It specifically references approvingly the Sacred Texts of Jews and Christians, namely, the Torah and the Gospel (i.e., New Testament), respectively. It exhorts Jews and Christians to follow their Sacred Texts, and also the Qur'an. Anticipating Muhammad will meet "insolence and defiance" in revealing this message, the Qur'an clearly instructs the Prophet "not to worry." Again, belief in God, the Day of Judgment, and the doing of good deeds will lead to an eternal reward.

It may be objected all these passages counsel respect for other faiths, and enjoin compulsory conversions to Islam from a different religion. But, none expressly promulgates a rule Muslims are free to convert, should they choose to do so. That is, the objection is the passages amount to nothing more than poetic statements of a rule saying "leave everyone alone."

This objection is rebuttable. One problem with it is it fails to see the two propositions are two sides of the same coin. If Jews, Christians, and others who meet the three prerequisites are assured of an eternal reward, then there ought to be no need to worry — in an existential sense — about a Muslim who converts. The

<sup>10</sup> Qur'an, *supra*, 5:67-69, at 74 (emphasis added).

<sup>11</sup> Encyclical Letter, *Fides et Ratio*, of the Supreme Pontiff John Paul II to the Bishops of the Catholic Church, On The Relationship Between Faith and Reason, ¶ 1 (14 September 1998), posted at [www.vatican.va](http://www.vatican.va).

keys to Heaven are belief in a monotheistic God, a final reckoning, and good deeds. A second problem with the objection is it is logically inconsistent. There is no express rule granting freedom for Jews to convert to Christianity, or Christians to convert to Judaism. If what is desired is a rule giving Muslims freedom to convert, then surely there also should be such a rule for persons of other faiths. A third problem with this objection is it is logically incomplete. Jews, Christians, and others are to be left alone, but why not Muslims, too? A fourth problem with the objection is it is entirely inconsistent with a basic tenet of Islam itself, namely, free will. Muslims — indeed, all persons — are born with free will. They are not subject to a law of pre-destination, or to a cycle of *karma* (the legacy of past actions from previous lives) and *dharma* (the duty of one in the present life) as Hinduism teaches.

In sum, the Qur'an does not specifically identify apostasy as a *haqq Allāh* crime, nor does it call for a *hadd* punishment in the event of conversion away from Islam. In other words, it is not part of the classical theory of the *Sharī'a* to prohibit free religious inquiry. Rather, the strict rule and severe punishment are, dare it be said, interpretations by rather zealous, intolerant forces. Put bluntly, it is important to distinguish authentic Islamic teaching, and thereby not "blame the religion," from the misguided practice of a minority of hot heads who may be trying to prove their unauthentic puritanical righteousness by suppressing the freedom of conscience of their Muslim and non-Muslim neighbors alike. The hot heads tend to congregate in familiar places, such as movements like the Taliban, or in the ranks of a Ministry of Religious Affairs.

This practice violates international legal commitments made by some Muslim countries. Freedom of conscience, or religion, is a fundamental human right. Other than the right to life (upon which all other rights, such as speech, depend), there is no more fundamental right. This freedom is stated in Article 18 of the United Nations *Universal Declaration of Human Rights*, and guaranteed by Article 18 of the United Nations *International Covenant on Civil and Political Rights*.

That the classical theory of the *Sharī'a* forbids compulsion in matters of religion. That Muslim countries commit to human rights documents demanding religious freedom is for good reason. First, Who does not go through the dry desert of doubt at some point in life? Through doubt comes a yearning to it, and a spiritual quest begins. Second, it is difficult to conceive of a God who desires our love by force. In Islam, like the other Abrahamic faiths, adherents have free will. God wants us to love Him freely, and if we do so, we experience His love in return.

## § 46.03 APOSTASY (RIDDAH AND IRTIDĀD)

### [A] Definitions and Categories

So, then, what is the infamous apostasy rule, as regrettably practiced in some Islamic countries, even contradiction with the classical teachings of the *Sharī'a*? Simply put, to convert from Islam to another religion, is apostasy. That also is true in respect of conversion from Islam to no religion at all, for example, to declare oneself an atheist or an agnostic. Likewise, denial of the fundamental obligations —

the Five Pillars of Islam — is apostasy. That is, it would be apostasy to deny these practices are obligatory in nature for a Muslim. In all instances, the *mens rea* requirement of intent (*niyya*) — that conversion was a conscious choice, a deliberate act — must be present. Perhaps there is no better illustration of the Sacred nature of the *Shar'ia* than the crime of apostasy.

An apostate is called a "*murtadd*," meaning a person who turns his or her back on Islam. There are important technical distinctions between:<sup>12</sup>

- (1) A *murtadd*, who does not convert to another faith —

This person commits *riddah*, in that he or she has converted away from Islam, but to no other faith. The person has fallen into unbelief (known in Arabic as "*kufri*"), or possibly even become an atheist or agnostic. In effect, this person says "Islam is not for me, but I am not choosing another religion, at least not now."

- (2) A *murtadd*, who does convert to another faith —

This person commits *irtidād*, in that he or she not only converts away from Islam, but also converts to another religion. This person says both "Islam is not for me" and (for example) "I am becoming a Christian."

Moreover, there are two categories of "*murtadd*":<sup>13</sup>

- (1) *Murtadd fitri*, who is a person born to Muslim parents and subsequently leaves the Islamic faith.

The adjective "*fitri*" means "natural," "inborn," "innate," or "native." A "*murtadd fitri*" willfully engages in an un-natural act, namely, subverting the natural course of belief, and thereby commits treason against God (Allāh) and betrays the Muslim community. (Salman Rushdie, discussed above, is said to fall into this category.)

- (2) *Murtadd milli*, who is a person not born to Muslim parents, who converts to Islam, but subsequently leaves the Islamic faith.

"*Milli*" comes from the Arabic noun "*milla*," which denotes a "religious community." Thus, a "*murtadd milli*" is a willful traitor to the Muslim community.

Note the dimension of treason, or betrayal, in categorizing a person as a *murtadd fitri* or *murtadd milli*. This dimension is relevant to punishments for apostasy.

## [B] Grounds for Apostasy

A key legal question concerns the grounds for apostasy? What utterances or actions constitute *ridda* or *irtidād*? In his controversial 2003 book, *Leaving Islam*, Ibn Warraq responds with this SYNOPSIS:

<sup>12</sup> See Ibn Warraq, ed., *LEAVING ISLAM — APOSTATES SPEAK OUT 16* (Amherst, New York: Prometheus Books 2003). [Hereinafter, WARRAQ.]

<sup>13</sup> See WARRAQ, *supra*, at 16.

Any verbal *denial* of any principal of Muslim belief is considered apostasy. If one *declares*, for example, that the *universe has always existed* or that *God has material substance*, then one is an apostate. If one denies the *unity of God* or confesses to a belief in *reincarnation*, one is guilty of apostasy. Certain acts are also deemed acts of apostasy: for example, *treating a copy of the Koran disrespectfully*, by burning it or soiling it. Some doctors of Islamic Law claim that a Muslim becomes an apostate if he or she *enters a church, worships an idol, or learns and practices magic*. A Muslim becomes an apostate if he *defames the Prophet's character, morals, or virtues*, and [i.e., or] *denies Muhammad's prophethood and that he was the seal of the prophets*.<sup>14</sup>

There is considerable uncertainty about the boundaries of the elements of apostasy. What is a "denial" or "declaration" as distinct from an expression of doubt? Is it apostasy to believe the universe "always existed" but God created it, because He always was, is, and will be? Is belief in the Holy Trinity of Christianity (God the Father, Son, and Holy Spirit) a denial of the "unity" of God? Is stacking another book on top of the Qur'an, or placing a coffee cup on top of it, an act of "disrespect"? While on holiday, does a visit to the Vatican or a renowned basilica or cathedral in Europe constitute "er try" into a church? Is it defamation to critique actions of the Prophet, or speculate as to whether there were, or might be, individuals through whom God sent, or will send, Prophecies?

Worse than the uncertainty created by these uncertainties is that this list, read expansively, has a "chilling effect" on freedom of inquiry about spiritual matters. That is a shame, particularly in contemporary times. The modern global secular age arrogantly assaults religious belief as outdated, unnecessary, or both, and deems faith a problem to be solved rather than a gift to be explored in conjunction with reason to advance the human project. Not uncommonly, a child is reared in a faith, rejects it as a young adult and explores other faiths, or no faith, yet later in life return to it. Many Roman Catholics tread this journey, only to "come home" to the Church and thereby marry their faith and reason after years, even decades, away from it.

The spiritual journey of each person is unique. The struggle — the *jihād*, as it were — for some people is to make the journey. Are they to be discouraged from the effort through rules on apostasy? Consider the great philosopher of Continental Rationalism, René Descartes (1596-1650 A.D.), the "Father of Modern Philosophy," who developed the Cartesian coordinate system and modern analytic geometry. He approached issues with the skeptical view that "all is to be doubted," or more precisely: "*Dubium sapientiae initium*. [Doubt is the origin of wisdom.]"<sup>15</sup> He also is reputed to have said:

If you would be a real seeker after truth, it is necessary that at least once in your life you doubt, as far as possible, all things.<sup>16</sup>

<sup>14</sup> WARRAQ, *supra*, at 16.

<sup>15</sup> RENÉ DESCARTES, *MEDITATIONS ON FIRST PHILOSOPHY* (1641).

<sup>16</sup> Posted at [www.quotationspage.com](http://www.quotationspage.com).

Ironically, Descartes' skepticism may have been drawn in part from the work of the renowned Persian Islamic theologian, philosopher, and jurist, Al Ghazali (1058-1111). A remark heard in Catholic circles is "there can be no great faith without great doubt." Notably, Mother Teresa — as she revealed in her spiritual diaries — is a beautiful case of the dark night through which a soul goes.<sup>17</sup> Is not the greatest example of doubt and humility Christ himself on the Cross, when Jesus asks the Father why He has forsaken Jesus, but also (beforehand, in the Garden at Gethsemane) agrees to do the Will of the Father, and (on the Cross) calls for forgiveness for those who crucified Him?<sup>18</sup>

### [C] Punishments

What are the attendant punishments for *ridda* (conversion away from Islam) and *irtidād* (conversion from Islam to another religion)? Apostasy is subject to a penal sanction, yet the Qur'an is not specific on the corporal sanctions. Clearly, an apostate condemns himself of herself in the afterlife, He or she willingly has chosen not to seek or submit to the Will of God (Allāh), and may be undeserving of Heaven. That sanction ought to be frightening enough. For some religious and legal scholars (*fukahā'* and *ulema*, respectively), it is. But, exactly what the corporal punishment should be (assuming there is to be one) is a matter of dispute between Traditionists and Modernists.

Traditionally, for a male apostate, the sanction is death.<sup>19</sup> Before that penalty is imposed, it is recommended that the apostate be offered the opportunity to re-convert to Islam. The recommended period of reprieve, before execution, is three days. For a female apostate, the sanction is imprisonment coupled with a beating every three days until the woman re-affirms her Islamic faith. These punishments are not found in the Qur'an, but rather based on a *ḥadīth* recorded by *Imām* Saḥīḥ Muslim. *Imāms* Abū Ḥanīfa and Mālik both focus on this *ḥadīth*, suggesting some degree of approval in the *Ḥanafī* and *Mālikī* Schools for imposing these punishments.

But, there is no recorded instance in which the Prophet Muhammad himself killed an apostate. Moreover, as Professor Hussain explains:

Apostasy is rejection of Islam in favor of another religion or atheism. [Note that the term can apply to rejection of any faith by its previous adherent.] The jurists differ about whether apostasy should be considered a crime liable to [a] *ḥadd* punishment, and whether it should be punished by death in any case. . . .

<sup>17</sup> See MOTHER TERESA, *COME BE MY LIGHT — THE PRIVATE WRITINGS OF THE SAINT OF CALCUTTA* (New York, New York: Image/Random House, 2007, Brian Kolodiejchuk, M.C., ed.).

<sup>18</sup> On this topic, see, e.g., the works of the Spanish mystic and Carmelite friar, Saint John of the Cross (1542-1591), who was a leading figure in the Catholic Reformation, especially his poem *The Dark Night of the Soul* (1585) and his *Commentary to The Dark Night of the Soul* (1586). Notably, for a Doctorate in Sacred Theology (S.T.D.) at the Pontifical University of St. Thomas Aquinas (*Angelicum*) in Rome, Pope John Paul II wrote his dissertation on the mysticism of Saint John of the Cross.

<sup>19</sup> See JOSEPH SCHACHT, *AN INTRODUCTION TO ISLAMIC LAW* 187 (Oxford, England: Oxford University Press (Clarendon Paperbacks) 1982).

The traditionalist jurists rely on *ḥadīth* which indicated that the Prophet [Muhammad] put to death people who resiled [i.e., recoiled, withdrew, or resumed their former beliefs and practices] from Islam during his lifetime. The alternative view is that these were instances when the young Muslim community was in grave danger from its many enemies and changing religion then was a betrayal of the community. This is no longer the situation in the modern world. Holders of the latter view rely also on the *Qur'ānic* verse: "Let there be no compulsion in religion," but the traditionalists say this means only that it is not permissible to convert non-Muslims by force.<sup>20</sup>

As indicated earlier, the Qur'an does not explicitly mentions apostasy as a *ḥaqq Allāh* crime, nor does it call for a *ḥadd* punishment for conversion away from Islam. Rather, the soundest grounds for the severe punishments are rather infirm — namely, obscure *ḥadīths* of Muhammad, which are the subject of controversy among some Islamic religious and legal scholars (the *ulema* and *fukahā'*, respectively). As Professor Hussein suggests, the contemporary approach, dare it be said, interpretation, is to view what happened centuries ago not so much as imposition of the death penalty for apostasy, but rather for treason. If the early community (*umma*) was threatened by enemies near and far, and it was, then changing religion could mean changing political and military allegiance. The former Muslim might thereby imperil the existence of the *umma*.

Thus, it is now reasonably safe to say that most Islamic *ulema* and *fukahā'* agree — there is a majority consensus (*ijma'*) — that putting to death an apostate is justified only if that apostate hurts Islam, or mocks the Islamic faith. That makes apostasy less about religion, and more akin to treason. One problem with this consensus is that it is hardly universal. Moreover, it is unclear whether the same consensus view applies to a woman apostate. Is she to be imprisoned and beaten every three days until she re-converts? Or, is she to be subjected to this sanction only if she hurts or mocks Islam. Still another problem concerns the grounds for triggering the traditional sanction. What does it mean to "hurt" Islam? Must there be an actual injury, like the death or maiming of Muslims? Or, is a threat enough? Likewise, what does it mean to "mock" Islam? Is the publication of a cartoon depicting the Prophet in an unflattering light a mockery? Given the severity of the potential sanctions that can be imposed for apostasy, these questions need clear, and widely (if not universally) accepted answers. That is, if there must be harsh punishments, then justice demands they be accompanied by bright-line rules readily available to all, and about which all persons have notice. Regrettably, Islamic scholars do not yet seem to have produced such rules on apostasy.

One illustration of the debate about these punishments comes from certain scholars in Malaysia (and perhaps other Islamic countries). Anecdotally, they are said to make the argument there is no need to apply the death penalty to a male *murtadd*, nor imprison and beat a female *murtadd*. By rejecting Islam, the *murtadd* has killed his or her own soul. There is no hope of Heaven for the *murtadd*. No punishment, certainly none on earth, can compare to Hell. In brief, the argument goes, the *murtadd* already suffers (or will suffer, on the Day of

<sup>20</sup> HUSSAIN, *supra*, at 138-139.

Judgment) the worst possible sanction, and self-inflicted it.

In considering whether one is guilty of apostasy, there is a key distinction between a *murtadd*, on the one hand, and a "*bughāt*," on the other hand. The latter term means "rebel" (technically, the plural, "rebels"). A Muslim who refuses to obey the relevant *Imām* is a rebel, or put in -Christian terms, a dissenter. Such a person has not rejected the entirety of Islam, just as a dissenter does not gainsay Christianity. Rather, the rebel, or dissenter, disagrees — sometimes openly and vociferously — with an accepted religious authority. A punishment like death, imprisonment, or beatings would be entirely wrongheaded (assuming it ever is appropriate). Without doubt, Christianity — like Islam — has known darker periods when misunderstanding and overzealousness condoned such punishment, even encompassing conversions from Catholic to Protestant Christianity and *vice versa*. (The acclaimed 2007 movie *Elizabeth: The Golden Age* chronicles one such period in English history.) Obviously, the path of mercy is the higher road to take in dealing with a rebel, or dissenter (and, as intimated repeatedly, with an apostate, too).

Accordingly, in the *Shari'a*, *bughāt* are not killed. They are dealt with as leniently and lovingly as possible, and their property is left intact. The goal of merciful treatment — the least severe punishment possible to achieve the end — is for them to cease their disobedience and return to the fold. Such treatment may entail reasoned persuading, gentle chiding, and other non-violent expressions by an *Imām*, and perhaps also by other members of the local community (*ummah*). Anecdotaly, while strolling through the *Old Souk* in Riyadh, Saudi Arabia with your author, one dear friend working in the Kingdom — a non-practicing Muslim who does not deny the truth of Islam, but does not adhere to the Five Pillars — explained cheekily that a small group of devout Muslims, or in the worst case the religious police, might take him to a local mosque, exhort him to follow the precepts of Islam, and arrange for him to get his head shaved. But, they certainly would not put him to death. After all, that hardly would bring him into the fold.

Are there other offenses against Islam, short of apostasy or disobedience of an *Imām*? For example, what about neglecting (as distinct from rejecting) one or more of the Five Pillars of Islam, such as the ritual daily prayer? The *Shari'a* does not prescribe any penalties. Neglect by a Muslim of religious obligations is not an offense under Islamic Penal Law. Why not? The rationale is Allāh will provide the appropriate punishment in the after-world. There is perhaps a loose analogy with the minimal obligations incumbent on a Catholic Christian, namely, to attend Mass weekly and on Holy days of obligation, and to make a good Confession and receive Holy Communion at least once a year, preferably during Lent and Easter, respectively. Failure to attend to these duties with a sincere heart does not trigger a penal sanction under the Criminal Law of a Catholic country, like the Philippines, which in any event is a largely secular legal system. The failure does not trigger a formal penal sanction under Canon Law, either. But, the failure imperils the soul of the person, and the person may well be admonished of the risk and encouraged not to lapse completely by a Priest, Nun, other religious person, or layperson.

There is a contrast, too. There are some offenses against the Islamic faith that may result in a *ta'zir* punishment, that is, a punishment imposed by a *qāḍi* in his

discretion. One example would be failing to perform ritual prayer that is regarded as especially important.<sup>21</sup> Another illustration might be certain acts that arguably are blasphemous or insulting in some manner to the faith or to the Prophet Muhammad.

## § 46.05 ISLAMIC COUNTRIES AND INTERNATIONAL LAW ON RELIGIOUS FREEDOM

### [A] United Nations Instruments

Two international legal instruments, both from the United Nations, tout freedom of conscience and religion as basic human rights: the 1948 *Universal Declaration of Human Rights* (UDHR); and 1966 *International Covenant on Civil and Political Rights* (ICCPR). The United Nations General Assembly adopted the UDHR, of which Eleanor Roosevelt was an author, on 10 December 1948. The General Assembly vote was 48 in favor and 0 against, with 8 abstentions. Of the 8 abstentions, 6 were Soviet bloc countries, and the other two were South Africa and Saudi Arabia. The General Assembly adopted the ICCPR on 16 December 1966, and it entered into force on 23 March 1976.

The UDHR and ICCPR, together with the *International Covenant on Economic Social and Cultural Rights* (ICESCR), which the General Assembly also adopted on 16 December 1966 and which entered into force on 3 January 1976, plus two optional protocols to the ICCPR, make up the so-called "International Bill of Human Rights."<sup>22</sup> The United Nations Human Rights Committee (as distinct from the Human Rights Council) monitors the ICCPR. The United Nations Committee on Economic, Cultural, and Social Rights monitors the ICESCR.

The UDHR is not a legally binding international instrument. It is aspirational in nature, proclaiming a body of rights to be strived for, rather than an obligatory code of individual protection. The UDHR Preamble states:

Now, therefore the General Assembly proclaims this Universal Declaration of Human Rights as a common standard of achievement for all peoples and all nations, to the end that every individual and every organ of society, keeping this Declaration constantly in mind, shall strive by teaching and education to promote respect for these rights and freedoms and by progressive measures, national and international, to secure their universal and effective recognition and observance, both among the peoples of Member States themselves and among the peoples of territories under their jurisdiction.<sup>23</sup>

<sup>21</sup> See SCHACHT, *supra*, at 187.

<sup>22</sup> See WALTER KALIN & JORG KUNZEL, *THE LAW OF INTERNATIONAL HUMAN RIGHTS PROTECTION* 40 (Oxford, England: Oxford University Press 2009). [Hereinafter, KALIN & KUNZEL.]

<sup>23</sup> *Universal Declaration of Human Rights* (10 December 1948), United Nations General Assembly Resolution 217 A (III) (1948). See also KALIN & KUNZEL, *supra*, at 14 (explaining the UDHR) 14.

Although the *UDHR* is not legally binding, the rights found within it have been codified in *ICCPR* and *ICESCR*, both of which are legally binding instruments under Public International Law.

Some parties to the *ICCPR* and *ICESCR* have taken reservations, or issued understandings or declarations, regarding certain provisions. A reservation, understanding, or declaration allows a state to:

ensure that individual provisions of a treaty are not applicable to it or are applicable only to a limited extent.<sup>24</sup>

Notably, several members of the Organization of the Islamic Conference (OIC) have taken reservations, or issued understanding or declarations, regarding freedom of conscience provisions of the *ICCPR*. Several OIC countries have done so regarding gender equality provisions contained in both the *ICCPR* and *ICESCR*.

As a general proposition, reservations to international legal instruments are fairly common, and are made by many states, not just OIC members.<sup>25</sup> But, the pattern of OIC member states taking reservations to fundamental obligations on freedom of conscience and gender equality is troubling. On these topics, the pattern of reservations by OIC states is clear. In particular, their reservations tend to take one of two forms.

First, an OIC member state might have a reservation declaring the targeted provision is applicable only to the extent to which it conforms to the constitution of the reserving state. The reservations of Algeria regarding the *ICESCR* and the *ICCPR* are an example of this form. Algeria declared that Paragraphs 3 and 4 of Article 13 of the *ICESCR*, regarding the right to education, do not infringe upon its right to organize its educational system. To be sure, Article 13 does not mention freedom of religion. But, depending on the context, religion plays a factor in state sponsored education, and education and respect for different religious and cultural groups (along with gender equality) are synergistically related. Algeria further declared that Paragraph 4 of Article 23 of the *ICCPR*, the rights of spouses in marriage and at dissolution, do not impair "the essential foundations of the Algerian legal system."<sup>26</sup>

Certainly, in neither of these reservations does the Algerian government refer to Islam or Islamic Law. The only obvious connection such declarations have with either Islam or the *Shari'a* is the fact the reserving state, Algeria, is an OIC member. Any further connection between Islam and the Algerian reservations requires external evidence, such as direct, first-hand experience and observations.

The second form of reservation evident among OIC member states are ones that do refer explicitly to Islam or the *Shari'a*. The reservation of Egypt concerning the *ICCPR* and *ICESCR* explicitly refers to the *Shari'a*:

<sup>24</sup> KALIN & KUNELL, *supra*, at 125.

<sup>25</sup> For instance, the United States has a rather lengthy set of reservations, declarations, and understandings regarding the *ICCPR*, which are posted at [http://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtidg\\_no=IV-4&chapter=4&lang=en&clang=en](http://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtidg_no=IV-4&chapter=4&lang=en&clang=en).

<sup>26</sup> [http://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtidg\\_no=IV-3&chapter=4&lang=en](http://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtidg_no=IV-3&chapter=4&lang=en).

Taking into consideration the provisions of the Islamic *Shari'a* and the fact that they do not conflict with the text annexed to the instrument, we accept, support and ratify it.<sup>27</sup>

The Egyptian reservation suggests the following: had the international legal instrument been found to conflict with the *Shari'a*, Egypt would not have accepted it.

In addition to Algeria and Egypt, other OIC member countries also have made reservations, understandings, and declarations concerning the International Bill of Human Rights. Tables 46-1, 46-2, and 46-3 list OIC countries and their statements concerning those instruments, along with the text of the affected Article in the pertinent instrument. In effect, they summarize the limitations and derogations of Muslim countries on matters of freedom of religion and gender equality from the International Bill of Rights. Note that the reservations, understandings, and declarations listed deal exclusively with religious freedom and gender equality. The Table does not list reservations to provisions concerning rights other than freedom of conscience and gender equality.

Specifically, Table 46-1 provides the text of provisions within the *ICCPR* that are the subject of reservations, understandings, or declarations made by OIC member states. Table 46-2 sets out the text of provisions within the *ICESCR* that are the subject of reservations, understanding, or declarations of OIC member states. Table 46-3 contains the name of reserving OIC member states, affected provision, and the text of the reservation, understanding, or declaration.

**Table 46-1:**  
**Provisions of the *ICCPR* Affected by Reservations, Declarations, or Understandings of OIC Member States<sup>28</sup>**

Provision	Text of Provision
Paragraph 1, Article 2	Each State Party to the present <i>Covenant</i> undertakes to respect and to ensure to all individuals within its territory and subject to its jurisdiction the rights recognized in the present <i>Covenant</i> , without distinction of any kind, such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.
Article 3	The States Parties to the present <i>Covenant</i> undertake to ensure the equal right of men and women to the enjoyment of all civil and political rights set forth in the present <i>Covenant</i> .
Article 18	1. Everyone shall have the right to freedom of thought, conscience and religion. This right shall include freedom to have or to adopt a religion or belief of his choice, and freedom, either individually or in community with others and in public or private, to manifest his religion or belief in worship, observance, practice and teaching. 2. No one shall be subject to coercion which would impair his freedom to have or to adopt a religion or belief of his choice.

<sup>27</sup> [http://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtidg\\_no=IV-3&chapter=4&lang=en#EndDec](http://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtidg_no=IV-3&chapter=4&lang=en#EndDec).

<sup>28</sup> All provisions quoted from *ICCPR*, posted at [www2.ohchr.org/english/law/ccpr.htm](http://www2.ohchr.org/english/law/ccpr.htm).

Provision	Text of Provision
	3. Freedom to manifest one's religion or beliefs may be subject only to such limitations as are prescribed by law and are necessary to protect public safety, order, health, or morals or the fundamental rights and freedoms of others. 4. The States Parties to the present <i>Covenant</i> undertake to have respect for the liberty of parents and, when applicable, legal guardians to ensure the religious and moral education of their children in conformity with their own convictions.
Article 23	1. The family is the natural and fundamental group unit of society and is entitled to protection by society and the State. 2. The right of men and women of marriageable age to marry and to found a family shall be recognized. 3. No marriage shall be entered into without the free and full consent of the intending spouses. 4. States Parties to the present <i>Covenant</i> shall take appropriate steps to ensure equality of rights and responsibilities of spouses as to marriage, during marriage and at its dissolution. In the case of dissolution, provision shall be made for the necessary protection of any children.
Article 25	Every citizen shall have the right and the opportunity, without any of the distinctions mentioned in article 2 and without unreasonable restrictions: (a) To take part in the conduct of public affairs, directly or through freely chosen representatives; (b) To vote and to be elected at genuine periodic elections which shall be by universal and equal suffrage and shall be held by secret ballot, guaranteeing the free expression of the will of the electors; (c) To have access, on general terms of equality, to public service in his country.

Table 46-2:  
Provisions of the ICESCR Affected by Reservations, Declarations, or Understandings of OIC Member States<sup>29</sup>

Provision	Text of Provision
Paragraph 2, Article 2	The States Parties to the present <i>Covenant</i> undertake to guarantee that the rights enunciated in the present <i>Covenant</i> will be exercised without discrimination of any kind as to race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.
Article 3	The States Parties to the present <i>Covenant</i> undertake to ensure the equal right of men and women to the enjoyment of all economic, social and cultural rights set forth in the present <i>Covenant</i> .

<sup>29</sup> All provisions quoted from ICESCR, posted at [www2.ohchr.org/english/law/icescr.htm](http://www2.ohchr.org/english/law/icescr.htm).

Provision	Text of Provision
Paragraphs 3 and 4, Article 13	3. The States Parties to the present <i>Covenant</i> undertake to have respect for the liberty of parents and, when applicable, legal guardians to choose for their children schools, other than those established by the public authorities, which conform to such minimum educational standards as may be laid down or approved by the State and to ensure the religious and moral education of their children in conformity with their own convictions. 4. No part of this article shall be construed so as to interfere with the liberty of individuals and bodies to establish and direct educational institutions, subject always to the observance of the principles set forth in paragraph 1 of this article and to the requirement that the education given in such institutions shall conform to such minimum standards as may be laid down by the State.

Table 46-3:  
OIC Member State Reservations, Understanding, or Declarations  
Regarding Provisions of the International  
Bill of Human Rights<sup>30</sup>

OIC Member State	Affected Provisions of International Bill of Human Rights	Text of Reservation, Understanding, or Declaration
Bahrain	ICCPR Articles 3, 18, and 23	The Government of the Kingdom of Bahrain interprets the Provisions of Article 3, (18) and (23) as not affecting in any way the prescriptions of the Islamic <i>Shariah</i> .
Kuwait	ICCPR Paragraph 1, Article 2, and Article 3	Although the Government of Kuwait endorses the worthy principles embodied in article 2, paragraph 2, and article 3 as consistent with the provisions of the Kuwait Constitution in general and of its article 29 in particular, it declares that the rights to which the articles refer must be exercised within the limits set by Kuwaiti law.
Kuwait	ICCPR Article 23	The Government of Kuwait declares that the matters addressed by article 23 are governed by personal-status law, which is based on Islamic law. Where the provisions of that article conflict with Kuwaiti law, Kuwait will apply its national law.

<sup>30</sup> All OIC Member State reservations, declarations, and understandings are quoted from [http://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtidag\\_no=IV-4&chapter=4&lang=en&clang=en](http://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtidag_no=IV-4&chapter=4&lang=en&clang=en), or [http://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtidag\\_no=IV-3&chapter=4&lang=en](http://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtidag_no=IV-3&chapter=4&lang=en).

OIC Member State	Affected Provisions of International Bill of Human Rights	Text of Reservation, Understanding, or Declaration
Kuwait	ICCPR Article 25	The Government of Kuwait wishes to formulate a reservation with regard to article 25(b). The provisions of this paragraph conflict with the Kuwaiti electoral law, which restricts the right to stand and vote in elections to males.  It further declares that the provisions of the article shall not apply to members of the armed forces or the police.
Kuwait	ICESR Paragraph 2, Article 2, and Article 3	Although the Government of Kuwait endorses the worthy principles embodied in article 2, paragraph 2, and article 3 as consistent with the provisions of the Kuwait Constitution in general and of its article 29 in particular, it declares that the rights to which the articles refer must be exercised within the limits set by Kuwaiti law.
Maldives	ICCPR Article 18	The application of the principles set out in Article 18 of the <i>Covenant</i> shall be without prejudice to the Constitution of the Republic of Maldives.
Mauritania	ICCPR Article 18	1. Everyone shall have the right to freedom of thought, conscience and religion. This right shall include freedom to have or to adopt a religion or belief of his choice, and freedom, either individually or in community with others and in public or private, to manifest his religion or belief in worship, observance, practice and teaching. 2. No one shall be subject to coercion which would impair his freedom to have or to adopt a religion or belief of his choice. 3. Freedom to manifest one's religion or beliefs may be subject only to such limitations as are prescribed by law and are necessary to protect public safety, order, health, or morals or the fundamental rights and freedoms of others. 4. The States Parties to the present <i>Covenant</i> undertake to have respect for the liberty of parents and, when applicable, legal guardians to ensure the religious and moral education of their children in conformity with their own convictions.

OIC Member State	Affected Provisions of International Bill of Human Rights	Text of Reservation, Understanding, or Declaration
		The Mauritanian Government, while accepting the provisions set out in article 18 concerning freedom of thought, conscience and religion, declares that their application shall be without prejudice to the Islamic <i>Shariah</i> .
Mauritania	ICCPR Article 23	States Parties to the present <i>Covenant</i> shall take appropriate steps to ensure equality of rights and responsibilities of spouses as to marriage, during marriage and at its dissolution. In the case of dissolution, provision shall be made for the necessary protection of any children.  The Mauritanian Government interprets the provisions of article 23, paragraph 4, on the rights and responsibilities of spouses as to marriage as not affecting in any way the prescriptions of the Islamic <i>Shariah</i> .

Notwithstanding the near-universal acceptance of the International Bill of Human Rights, some Muslims critics argue it reflects a non-Muslim Western conception of human rights that only recently, since the end of the Second World War, has been established. Yet, other Muslim commentators argue Islam always has had a God-given guide to human rights, namely, the *Shari'a*.<sup>31</sup>

### [B] 1990 Cairo Declaration

On 5 August 1990, representatives of the OIC adopted the *Cairo Declaration of Human Rights in Islam* (CDHRI, or *Cairo Declaration*). This agreement is a *Shari'a*-based guide to human rights for OIC member states. It is an Islamic response to the 1948 *UDHR*, which some Muslim countries regard as based on Judeo-Christian, if not secular, principles, and insufficiently attentive to their religious and cultural context.<sup>32</sup>

<sup>31</sup> See Abdullah al-Ahsan, *Law, Religion and Human Dignity in the Muslim World today: An Examination of OIC's Cairo Declaration of Human Rights*, 24 *Journal of Law & Religion* 569, fn. 157 at 594-595. [Hereinafter, Al Ahsan.] The author quotes the Muslim apologist Muhammad Melki Naciri, a member of the Council of Religious Scholars of Morocco, in a discussion of the CDHRI, concerning repressive OIC governments and freedom of expression. This quote should not be taken out of context as reflecting a view with which the author (Al Ahsan) necessarily agrees. It is simply part of his discussion of political rights in OIC countries.

Human rights may be something new for the West, but we in Islam have had it since the beginning. We have no differences between whites, blacks, Jews, Muslims — everyone is free. We never persecuted the Jews here the way they did in France and England. In England and in the US you fight against blacks — why just the other day there were news items about fighting between the police and blacks in London.

*Id.*

<sup>32</sup> See *Cairo Declaration on Human Rights in Islam*, WIKIPEDIA, posted at <http://en.wikipedia.org/>

Perhaps not surprisingly, the International Humanist and Ethical Union (IHEU) argues the *CDHRI* does not conform to the values espoused in the International Bill of Human Rights. It says the *CDHRI* effectively and specifically prohibits freedom of conscience by forbidding conversion away from Islam or apostasy (*riddah*). Article 10 of the *CDHRI* is particularly problematic. The IHEU also contends the *CDHRI* restricts the rights of women and non-Muslim men, as well as limits free expression.<sup>33</sup> The IHEU is not alone. Some Muslims argue that while the *CDHRI* guarantees human rights, the governments of some Muslim countries do not afford them to their citizens.<sup>34</sup>

Below is produced in full the text of the *Cairo Declaration*:

#### THE CAIRO DECLARATION ON HUMAN RIGHTS IN ISLAM<sup>35</sup>

*Keenly aware* of the place of mankind in Islam as vicegerent of Allah on Earth;

*Recognizing* the importance of issuing a Document on Human Rights in Islam that will serve as a guide for Member States in all aspects of life;

*Having examined* the stages through which the preparation of this draft Document has, so far, passed and the relevant report of the Secretary General;

*Having examined* the Report of the Meeting of the Committee of Legal Experts held in Tehran from 26 to 28 December 1989;

*Agrees* to issue the *Cairo Declaration on Human Rights in Islam*, which will serve as a general guidance for Member States in the field of human rights.

#### ANNEX TO RES. NO. 49/19-P

#### THE CAIRO DECLARATION ON HUMAN RIGHTS IN ISLAM

The Member States of the Organization of the Islamic Conference,

*Reaffirming* the civilizing and historical role of the Islamic *Ummah* which God made the best nation that has given mankind a universal and well-balanced civilization in which harmony is established between this life and the hereafter and knowledge is combined with faith; and the role that this *Ummah* should play to guide a humanity confused by competing trends and ideologies and to provide solutions to the chronic problems of this materialistic civilization.

*Wishing* to contribute to the efforts of mankind to assert human rights, to protect man from exploitation and persecution, and to affirm his freedom and right to a dignified life in accordance with the Islamic *Shari'ah*.

*Convinced* that mankind which has reached an advanced stage in materialistic science is still, and shall remain, in dire need of faith to support its civilization and of a self-motivating force to guard its rights;

wiki/Cairo\_Declaration\_on\_Human\_Rights\_in\_Islam.

<sup>33</sup> See [www.iheu.org/node/3162](http://www.iheu.org/node/3162).

<sup>34</sup> See Al Ahsan, *supra*, at 569.

<sup>35</sup> The *CDHRI* is posted at [www.ole-oci.org/english/article/human.htm](http://www.ole-oci.org/english/article/human.htm). It is quoted from this source, with minor formatting changes.

*Believing* that fundamental rights and universal freedoms in Islam are an integral part of the Islamic religion and that no one as a matter of principle has the right to suspend them in whole or in part or violate or ignore them in as much as they are binding divine commandments, which are contained in the Revealed Books of God and were sent through the last of His Prophets to complete the preceding divine messages thereby making their observance an act of worship and their neglect or violation an abominable sin, and accordingly every person is individually responsible — and the *Ummah* collectively responsible — for their safeguard.

*Proceeding* from the above-mentioned principles,

*Declare* the following:

#### ARTICLE 1:

- (a) All human beings form one family whose members are united by submission to God and descent from Adam. All men are equal in terms of basic human dignity and basic obligations and responsibilities, without any discrimination on the grounds of race, color, language, sex, religious belief, political affiliation, social status or other considerations. True faith is the guarantee for enhancing such dignity along the path to human perfection.
- (b) All human beings are God's subjects, and the most loved by Him are those who are most useful to the rest of His subjects, and no one has superiority over another except on the basis of piety and good deeds.

#### ARTICLE 2:

- (a) Life is a God-given gift and the right to life is guaranteed to every human being. It is the duty of individuals, societies and states to protect this right from any violation, and it is prohibited to take away life except for a *Shari'ah* prescribed reason.
- (b) It is forbidden to resort to such means as may result in the genocidal annihilation of mankind.
- (c) The preservation of human life throughout the term of time willed by God is a duty prescribed by *Shari'ah*.
- (d) Safety from bodily harm is a guaranteed right. It is the duty of the state to safeguard it, and it is prohibited to breach it without a *Shari'ah*-prescribed reason.

#### ARTICLE 3:

- (a) In the event of the use of force and in case of armed conflict, it is not permissible to kill non-belligerents such as old man, women and children. The wounded and the sick shall have the right to medical treatment; and prisoners of war shall have the right to be fed, sheltered and clothed. It is prohibited to mutilate dead bodies. It is a duty to exchange prisoners of war and to arrange visits or reunions of the families separated by the circumstances of war.

- (b) It is prohibited to fell trees, to damage crops or livestock, and to destroy the enemy's civilian buildings and installations by shelling, blasting or any other means.

#### ARTICLE 4:

Every human being is entitled to inviolability and the protection of his good name and honor during his life and after his death. The state and society shall protect his remains and burial place.

#### ARTICLE 5:

- (a) The family is the foundation of society, and marriage is the basis of its formation. Men and women have the right to marriage, and no restrictions stemming from race, color or nationality shall prevent them from enjoying this right.
- (b) Society and the State shall remove all obstacles to marriage and shall facilitate marital procedure. They shall ensure family protection and welfare.

#### ARTICLE 6:

- (a) Woman is equal to man in human dignity, and has rights to enjoy as well as duties to perform; she has her own civil entity and financial independence, and the right to retain her name and lineage.
- (b) The husband is responsible for the support and welfare of the family.

#### ARTICLE 7:

- (a) As of the moment of birth, every child has rights due from the parents, society and the state to be accorded proper nursing, education and material, hygienic and moral care. Both the fetus and the mother must be protected and accorded special care.
- (b) Parents and those in such like capacity have the right to choose the type of education they desire for their children, provided they take into consideration the interest and future of the children in accordance with ethical values and the principles of the *Shari'ah*.
- (c) Both parents are entitled to certain rights from their children, and relatives are entitled to rights from their kin, in accordance with the tenets of the *Shari'ah*.

#### ARTICLE 8:

Every human being has the right to enjoy his legal capacity in terms of both obligation and commitment, should this capacity be lost or impaired, he shall be represented by his guardian.

#### ARTICLE 9:

- (a) The question for knowledge is an obligation and the provision of education is a duty for society and the State. The State shall ensure the availability of ways and means to acquire education and shall guarantee educational diversity in the interest of society so as to enable man to be acquainted with the religion of Islam and the facts of the Universe for the benefit of mankind.
- (b) Every human being has the right to receive both religious and worldly education from the various institutions of, education and guidance, including the family, the school, the university, the media, etc., and in such an integrated and balanced manner as to develop his personality, strengthen his faith in God and promote his respect for and defense of both rights and obligations.

#### ARTICLE 10:

Islam is the religion of unspoiled nature. It is prohibited to exercise any form of compulsion on man or to exploit his poverty or ignorance in order to convert him to another religion or to atheism.

#### ARTICLE 11:

- (a) Human beings are born free, and no one has the right to enslave, humiliate, oppress or exploit them, and there can be no subjugation but to God the Most-High.
- (b) Colonialism of all types being one of the most evil forms of enslavement is totally prohibited. Peoples suffering from colonialism have the full right to freedom and self-determination. It is the duty of all States and peoples to support the struggle of colonized peoples for the liquidation of all forms of colonialism and occupation, and all States and peoples have the right to preserve their independent identity and exercise control over their wealth and natural resources.

#### ARTICLE 12:

Every man shall have the right, within the framework of *Shari'ah*, to free movement and to select his place of residence whether inside or outside his country and if persecuted, is entitled to seek asylum in another country. The country of refuge shall ensure his protection until he reaches safety, unless asylum is motivated by an act which *Shari'ah* regards as a crime.

#### ARTICLE 13:

Work is a right guaranteed by the State and Society for each person able to work. Everyone shall be free to choose the work that suits him best and which serves his interests and those of society. The employee shall have the right to safety and security as well as to all other social guarantees. He may neither be assigned work beyond his capacity nor be subjected to compulsion or exploited or harmed in any way. He shall be entitled - without any discrimination between males and females

— to fair wages for his work without delay, as well as to the holiday's allowances and promotions which he deserves. For his part, he shall be required to be dedicated and meticulous in his work. Should workers and employers disagree on any matter, the State shall intervene to settle the dispute and have the grievances redressed, the rights confirmed and justice enforced without bias.

#### ARTICLE 14:

Everyone shall have the right to legitimate gains without monopolization, deceit or harm to oneself or to others. Usury (*riba*) is absolutely prohibited.

#### ARTICLE 15:

- (a) Everyone shall have the right to own property acquired in a legitimate way, and shall be entitled to the rights of ownership, without prejudice to oneself, others or to society in general. Expropriation is not permissible except for the requirements of public interest and upon payment of immediate and fair compensation.
- (b) Confiscation and seizure of property is prohibited except for a necessity dictated by law.

#### ARTICLE 16:

Everyone shall have the right to enjoy the fruits of his scientific, literary, artistic or technical production and the right to protect the moral and material interests stemming therefrom, provided that such production is not contrary to the principles of *Shari'ah*.

#### ARTICLE 17:

- (a) Everyone shall have the right to live in a clean environment, away from vice and moral corruption, an environment that would foster his self-development and it is incumbent upon the State and society in general to afford that right.
- (b) Everyone shall have the right to medical and social care, and to all public amenities provided by society and the State within the limits of their available resources.
- (c) The State shall ensure the right of the individual to a decent living which will enable him to meet all his requirements and those of his dependents, including food, clothing, housing, education, medical care and all other basic needs.

#### ARTICLE 18:

- (a) Everyone shall have the right to live in security for himself, his religion, his dependents, his honor and his property.
- (b) Everyone shall have the right to privacy in the conduct of his private affairs, in his home, among his family, with regard to his property and his relationships. It is not permitted to spy on him, to place him under

surveillance or to besmirch his good name. The State shall protect him from arbitrary interference.

- (c) A private residence is inviolable in all cases. It will not be entered without permission from its inhabitants or in any unlawful manner, nor shall it be demolished or confiscated and its dwellers evicted.

#### ARTICLE 19:

- (a) All individuals are equal before the law, without distinction between the ruler and the ruled.
- (b) The right to resort to justice is guaranteed to everyone.
- (c) Liability is in essence personal.
- (d) There shall be no crime or punishment except as provided for in the *Shari'ah*.
- (e) A defendant is innocent until his guilt is proven in a fair trial in which he shall be given all the guarantees of defence.

#### ARTICLE 20:

It is not permitted without legitimate reason to arrest an individual, or restrict his freedom, to exile or to punish him. It is not permitted to subject him to physical or psychological torture or to any form of humiliation, cruelty or indignity. Nor is it permitted to subject an individual to medical or scientific experimentation without his consent or at the risk of his health or of his life. Nor is it permitted to promulgate emergency laws that would provide executive authority for such actions.

#### ARTICLE 21:

Taking hostages under any form or for any purpose is expressly forbidden.

#### ARTICLE 22:

- (a) Everyone shall have the right to express his opinion freely in such manner as would not be contrary to the principles of the *Shari'ah*.
- (b) Everyone shall have the right to advocate what is right, and propagate what is good, and warn against what is wrong and evil according to the norms of Islamic *Shari'ah*.
- (c) Information is a vital necessity to society. It may not be exploited or misused in such a way as may violate sanctities and the dignity of Prophets, undermine moral and ethical values or disintegrate, corrupt or harm society or weaken its faith.
- (d) It is not permitted to arouse nationalistic or doctrinal hatred or to do anything that may be an incitement to any form of racial discrimination.

## ARTICLE 23:

- (a) Authority is a trust; and abuse or malicious exploitation thereof is absolutely prohibited, so that fundamental human rights may be guaranteed.
- (b) Everyone shall have the right to participate, directly or indirectly in the administration of his country's public affairs. He shall also have the right to assume public office in accordance with the provisions of *Shari'ah*.

## ARTICLE 24:

All the rights and freedoms stipulated in this *Declaration* are subject to the Islamic *Shari'ah*.

## ARTICLE 25:

The Islamic *Shari'ah* is the only source of reference for the explanation or clarification of any of the articles of this *Declaration*.

## § 46.06 BLASPHEMY

## [A] Is There Really an Injunction?

Defining "blasphemy" is tricky, even dangerous, business. Across time and place, the extent to which understanding of the term has been consistent is an open question.<sup>36</sup> In Christianity, in Chapter 12, verse 10 of The Gospel According to Luke, Christ speaks of the only sin that is unforgivable, namely, blasphemy against the Holy Spirit. What is "blasphemy against the Holy Spirit"? A common, modern Catholic understanding is that it is failure to ask God for forgiveness.<sup>37</sup> After all, no sin is unforgivable, assuming the sinner asks for forgiveness. Failure to knock at God's door and ask for forgiveness for whatever reason — pride, fear, disbelief, etc. — renders the sin at issue not forgivable. This understanding is based on the overall context of the passage in Luke, namely, the negative attitude and acts of the Pharisees (adherents to a Jewish school of thought that became prominent in the Second Temple Period of 140-37 B.C.). They so despised Jesus that they wrongly perceived His obviously good actions, like healing the sick, as evil. Even their error was forgivable — as Christ makes clear in Luke Chapter 12, verse 10, when He says that speaking words against Him will be forgiven — if only the intransigence of the Pharisees had not kept them from asking for forgiveness.

<sup>36</sup> See, e.g., ALAIN CARANTON, *BLASPHEMY – IMPIOUS SPEECH IN THE WEST FROM THE SEVENTEENTH TO THE NINETEENTH CENTURY* (1998) (New York, New York: Columbia University Press, 2002, Eric Bauth, trans.) (discussing religious and secular clashes over what constitutes "blasphemy" in Christianity). See also MUHAMMAD HASIM KHALIL, *FREEDOM OF EXPRESSION IN ISLAM* ch. IX (Cambridge, England: Islamic Texts Society, 1997) (discussing the Classical Islamic legal precept that blasphemy, as well as apostasy, is punishable by death, and exploring the definition of "blasphemy" and its distinction from apostasy).

<sup>37</sup> See Archbishop Joseph F. Naumann, *The Only Unforgivable Sin is the One We Don't Confess*, THE LEVEN (Newspaper of the Archdiocese of Kansas City, Kansas), 25 February 2011, at 2.

The Qur'an does not identify blasphemy as a distinct *haqq Allāh* crime, nor does it specify a *hadd* punishment for it. It contains neither a definition of, nor an unequivocal prohibition on, defiling Islam or the symbols of Islam. The provision in the Qur'an that comes nearest to an injunction against blasphemy is *surah* 5, *ayah* 33, which concerns "waging war against Islam" and "spreading corruption in the land," for which the punishment is death by crucifixion, amputation, or exile.

Yet, Arabic contains no word for "blasphemy," thus it is hard to call it a punishable offense.<sup>38</sup> As for disrespectful depictions or utterances about the Prophet, they are insulting, but arguably not "blasphemous," because Muslims expressly disavow the notion that Muhammad was Divine. Christianity is unique in the claim that its head, Jesus, was both fully human and fully divine. As for Muhammad, he was a human, albeit one of utmost piety, dignity, honor, and wisdom — that is standard Islamic catechesis.

## [B] 1989 Rushdie Affair

Probably the most infamous illustration of the oppressive, anti-intellectual reality in many Muslim countries is the *fatwā* issued on 14 February 1989 on Radio Tehran by Iran's former Supreme Leader, *Āyatollah* Ruhollah Khomeini, condemning Salman Rushdie (winner of the 1981 Booker Prize for *Midnight's Children* (1981)) to death for writing *The Satanic Verses* (1988):

To God we belong and to Him we shall return. I inform all zealous Muslims of the world that the author of *The Satanic Verses* — which has been compiled, printed, and published in opposition to Islam, the Prophet, and the Qur'an — and all those involved in its publication who were aware of its content are sentenced to death.

I call on all zealous Muslims to execute them quickly, wherever they may be found, so that no one else will dare to insult the sacred beliefs of Muslims. Whoever is killed on this path is a martyr. In addition, anyone who has access to the author of this book, but is not able to carry out his execution, should inform someone else so that the punishment may be executed.<sup>39</sup>

The *Āyatollah* offered a reward, and the brutal effects of the *fatwā* became apparent quickly. *The Satanic Verses* was burned in India, despite a government ban on the novel, the Japanese translator was killed, and the Italian and Norwegian translators assaulted.<sup>40</sup>

<sup>38</sup> See JOHN BOWKER, *WHAT MUSLIMS BELIEVE* 102-104 (Oxford, England: Oneworld Publications, 2004).

<sup>39</sup> Quoted in Anthony Chase, *Legal Guardians: Islamic Law, International Law, Human Rights Law, and the Salman Rushdie Affair*, 11 AMERICAN UNIVERSITY JOURNAL OF INTERNATIONAL LAW AND POLICY 375, fn. 1 at 375 (1996), and in *Āyatollah Sentences Author to Death*, BBC NEWS, 15 February 1989, posted at <http://bbc.co.uk>.

<sup>40</sup> See *Anniversary of Rushdie's Book Fatwa*, BBC NEWS, 14 February 2009, posted at <http://bbc.co.uk>; Steven Wiesman, *Japanese Translator of Rushdie Book Found Slain*, NEW YORK TIMES, 13 July 1991.

The *Āyatollāh* called *The Satanic Verses* "blasphemous against Islam." The central issue the novel addresses concerns the identity of Muslim immigrants to India following the 15 August 1947 British Partition of the Subcontinent into India and Pakistan. What does it mean to be a Muslim immigrant to India, confronted with tension between the religion of Islam and culture of the Subcontinent, on the one hand, and the material charms and alluring freedom of the west, on the other hand? The basic story line of novel involves two male characters, both of whom are Muslim immigrants to India:

- Gibreel Farishta, who is a *chai walla* (i.e., tea delivery boy) and gains success as an Indian movie actor playing Hindu gods. Owing to a nearly fatal disease, he loses his Muslim faith. A mental disorder is causing him gradually to lose his mind. He journeys to London to find a lost love, a mountain climber named Alleluia Cone. Farishta is physically transformed supernaturally, with a halo, and essentially is a mentally unstable angel.
- Saladin Chamcha, an Anglophile who has lost not only his links to his homeland, but also his Muslim faith. That is because of his estrangement from his father, and a rape that took place when he was young. He is a successful voice-over actor, marries an English woman, and has an affair with an Indian woman while touring overseas. He is travels to London on the same airplane as Farishta. Chamcha is physically transformed supernaturally, developing two horns, wide thighs, hairiness, and hoofs. In effect, Chamcha is a devil with no cultural identity.

Islamic extremists blow up over the English Channel the aircraft on which the two men are travelling. Farishta and Chamcha fall to earth, clinging and singing rival songs to each other. Chamcha asks Farishta to use his wings to save them. He obliges. Washing up on a snow-covered English beach, they are the only survivors. Throughout, the narrator is a voice that intimates he is God.

What grounds are there for a charge of blasphemy? Arguably, the strongest bases are found in the three "Dream Sequences" in the novel. Each Sequence occurs inside the increasingly deranged mind of Farishta. In all three Sequences, Farishta imagines he is the Archangel Gabriel (Jibreel):

(1) The Mahound Dream (Chapter II) —

Farishta, as the Archangel, imagines that "Mahound," who is a "Prophet of Jahilia," the city of sand, asks him for an *ayah* (verse) to give to the people. The Archangel is uncertain as to the existence, or at least reliability, of God, and seems alarmed by Mahound asking him for assistance. He reveals to Mahound the Satanic Verses. Mahound reads them to the people, but is ashamed. Thereafter, he ignores his wife and sleeps with another woman. There are additional aspects of this Dream Sequence involving the tormenting of Mahound by goddesses (in whom he does not believe), the naming of followers of Mahound after demons, and a brothel of prostitutes named after the wives of Mahound.

(2) The Ayesha Dream (Chapter IV) —

As Archangel, Farishta interacts with Ayesha, an orphan girl on a farm in

India. Often after communing with him, she wanders about naked. Ayesha misinterprets Farishta as commanding her to lead a pilgrimage of her entire village to Mecca. She argues against dissenters, including her father, that the waters of the ocean between India and the Arabian Peninsula will part. Some of the dissenters insist there is no God. The waters do not part, and it appears the pilgrims drown.

(3) The *Imām* Dream (Chapter IV) —

Here, there is a Persian character who is an *Imām* who had lived in exile, only to return to his country to instigate his people to revolt, but without regard to their personal safety, and gain power.<sup>41</sup> The Archangel, Farishta, is said to use the *Imām* as a slave. The *Imām* uses the Archangel as a suicide soldier commanded to kill the Empress Ayesha (a character distinct from the young girl in the second Sequence).

Rushdie does not put forth any of the Dream Sequences as fact or reality.

Certainly, the Dream Sequences are hardly flattering to Islam. The analogies between some aspects of them, on the one hand, and core principles and precepts of Islam, on the other hand, are easy enough to draw. But, do they justify a charge of blasphemy, not to mention a death sentence? Or, are they artistic license in a post-modern secular environment that smack of bad taste and disrespect? Pragmatically,

most Muslims agree that the Ayatollah, an Iranian, had no jurisdiction over Rushdie, an Indian with British citizenship living in Britain, and in any event he should have been given a fair trial, as is required by Islamic law. Furthermore, the best response would have been to boycott Rushdie's works and otherwise ignore him, since the making of the *fatwā* gave him and his publishers enormous publicity, and, no doubt, much greater sales than he otherwise would have had.<sup>42</sup>

Nevertheless, the *fatwā* against Rushdie never has been lifted formally.

Britain withdrew diplomatic recognition of Iran on 7 March 1989, largely because of the *fatwā*. Over a decade later, on 24 September 1998, Britain agreed with Iran, then led by a reformist President, Mohammad Khatami, to restore diplomatic relations. The pre-condition was the Iranian President commit publicly Iran "neither support nor hinder assassination operations on Rushdie," which the President fulfilled.<sup>43</sup> But, traditionalists, including Iran's feared Revolutionary Guards, say the *fatwā* still applies. The Iranian Spiritual Leader *Āyatollāh* Ali Khamenei, successor to *Āyatollāh* Khomeini, proclaimed:

The verdict of Islam would remain unchanged even if Rushdie repented and became the most pious Muslim of the age.<sup>44</sup>

<sup>41</sup> Quoted in Salman Rushdie, WIKIPEDIA, [http://en.wikipedia.org/wiki/Salman\\_Rushdie](http://en.wikipedia.org/wiki/Salman_Rushdie).

<sup>42</sup> HUSSAIN, *supra*, at 139.

<sup>43</sup> Quoted in Salman Rushdie, WIKIPEDIA, [http://en.wikipedia.org/wiki/Salman\\_Rushdie](http://en.wikipedia.org/wiki/Salman_Rushdie).

<sup>44</sup> Quoted in Daniel Pipes, *Rushdie Fails to Move Zenlods*, LOS ANGELES TIMES, 28 December 1990. [Hereinafter, Pipes.]

This proclamation is at variance with the consistent, deep-seated teachings of the *Shari'a* concerning mercy and forgiveness. In declaring the verdict to be rendered by "Islam," the proclamation over-states its support, i.e., the vast majority of Muslims are not in favor of it. Nevertheless, in 2005, *Āyatollāh* Khamenei reaffirmed the order to Muslims making the *Hajj* pilgrimage. But, Iran's official position is that only the authority that issues a *fatwā* can withdraw it, and that person — *Āyatollāh* Khomeini — died in 1989.

As for the author, amidst this saga, Mr. Rushdie nominally converted to (or back to) Islam, possibly to the relief of British officials protecting him from countless death threats. He did so by signing a declaration reaffirming his Muslim faith.<sup>45</sup> Further, he requested the publisher of *The Satanic Verses*, Viking, to cease publication. Yet, the *fatwā* has not silenced Mr. Rushdie. Among his many public engagements was one at the University of Kansas in spring 2006, where he gave an enlightening and amusing speech.

### [C] 2005 Danish Cartoon Affair

Like the Rushdie case, the fall 2005 "Cartoon Affair" shows blasphemy is not a light-hearted matter.<sup>46</sup> This Affair concerned unflattering depictions of the Prophet in cartoons a Danish newspaper published. Perhaps the most infamous of them showed Muhammad wearing a turban in which a bomb was nestled. The Affair highlighted a long-standing tension that exists in all faiths, cultures, and countries between respect for religion (or, more generally, freedom of religion), on the one hand, and freedom of expression, on the other hand. Thus, 10 Ambassadors from Islamic countries wrote to the Danish Prime Minister, Anders Fogh Rasmussen, stressing the first value:

We strongly feel that casting aspersions on Islam as a religion and publishing caricatures of Holy Prophet Muhammad . . . goes against the spirit of Danish values of tolerance and civil society. This is on the whole a very discriminatory tendency and does not bode well with the high human rights standards of Denmark.<sup>47</sup>

The Danish Prime Minister replied with an emphasis on the second value:

The freedom of expression is the very foundation of the Danish democracy. The freedom of expression has a wide scope and the Danish government has no means of influencing the press. However, Danish legislation prohibits acts or expressions of a blasphemous or discriminatory nature.

<sup>45</sup> See Pipes, *supra*.

<sup>46</sup> This discussion draws in part on an unpublished Book Review by Kansas Attorney General and former State Senator and Majority Leader Derek Schmidt, University of Kansas School of Law S.J.D. Candidate, *Rule of Law, Rule of God, or Rule of Man? A Review of the Cartoons that Shook the World* (by Jytte Klausen), 1 December 2009.

<sup>47</sup> Letter dated 12 October 2005 from 10 Ambassadors representing Muslim and Arab Countries, and the Palestinian Representative in Copenhagen, to Prime Minister Anders Fogh Rasmussen, quoted in JYTTE KLAUSEN, *THE CARTOONS THAT SHOOK THE WORLD* 36 (New Haven, Connecticut: Yale University Press, 2009). [Hereinafter, KLAUSEN.]

The offended party may bring such acts or expressions to court, and it is for the courts to decide in individual cases.<sup>48</sup>

What is remarkable about the exchange is neither side seemed concerned about the legal point as to whether "blasphemy" is an offense under the *Shari'a*. Ironically (as the Prime Minister notes in the quote), it is an offense under Danish secular law.

Rather, to both sides in the Danish Cartoon Affair, boundaries are what mattered. For Muslims (and many non-Muslims), freedom of discourse is appropriate, but defamation is not discourse. It is nothing more than disrespect, and intentionally designed as such. The Muslim Ambassadors, and their supporters, argued that the non-Muslim western world is hypocritical in its tolerance for free speech: if Judaism or Christianity is insulted in an Islamic country, non-Muslim westerners profess concern. But, when Islam or its Prophet is the target, non-Muslim westerners encourage Muslims to give space for creativity, even humor. Accordingly, reasonable boundaries not only must be drawn, but also enforced vigorously. Doing so, moreover, will advance the common good, as each faith will enjoy the respect it deserves, and society generally will reach an enhanced degree of appreciation for all faiths.

For non-Muslims (and many Muslims), all but the most egregious hate speech that incites violence must be tolerated. Otherwise, creativity — the process of generating new ideas, along with the ability to criticize institutional and individual authorities — will be squelched. Furthermore, with a well-educated populace participating in a free market of ideas, good ones will rise to the top over disrespectful ones.

Muslims (and many non-Muslims) counter that this free speech theory, which underpins the First Amendment to the United States Constitution, is more myth than reality. Public discourse in much of American society is uncivil, and has been degenerating for decades as the boundaries of free speech have been pushed outwards. And so the debate continues.

<sup>48</sup> Letter dated 21 October 2005 from Prime Minister Anders Fogh Rasmussen to 10 Ambassadors representing Muslim and Arab Countries, and the Palestinian Representative in Copenhagen, quoted in KLAUSEN, *supra*, at 66.

## Chapter 47

### PRIVATE CLAIMS (*ḤAQQĀ DAMĪ*)

---

I live in the Managerial Age, in a world of "Admin." The greatest evil is not now done in those sordid "dens of crime" that Dickens loved to paint. It is not done even in concentration camps and labour camps. In those we see its final result. But it is conceived and ordered (moved, seconded, carried, and minuted) in clean, carpeted, warmed and well-lighted offices, by quiet men with white collars and cut fingernails and smooth-shaven cheeks who do not need to raise their voices. Hence, naturally enough, my symbol for Hell is something like the bureaucracy of a police state or the office of a thoroughly nasty business concern.

C.S. Lewis

(1898-1963, Oxford Professor of Literature, Novelist, and Christian Writer)

#### SYNOPSIS

##### § 47.01 CONCEPT OF *JINĀ YĀ T* (TORTS)

##### § 47.05 BODILY HARM NOT INVOLVING DEATH

##### § 47.06 PROPERTY DAMAGE

##### § 47.07 PERJURY

##### § 47.08 PROTECTED (*MA'SŪM*) OR NOT PROTECTED (*HADR*)?

§ 47.01 CONCEPT OF *JINĀ YĀ T* (TORTS)

## [A] Private Nature of Claim

The Arabic legal term corresponding to what in American Law knows as "Torts," and Roman and Civil Law as "Delicts," is "*jināyāt*." Literally, the term means "offenses." But, *jināyāt* does not refer to offenses in the type of *ḥaqq Allāh*. The term covers offenses not against God (Allāh) or religion, meaning it embraces all wrongful acts against the person or property of another. Put simply, "*jināyāt*" refers to *ḥaqq ādamī* offenses. Consequently, there is no *ḥadd* sanction for *jināyāt*. However despicable the act at issue, the perpetrator has not crossed a limit set by Allāh as to religion.

Not unlike Tort Law in the American Common Law system, in a *jināyāt* case, there is no official representing the state to bring a charge. As with a tort claim, a *jināyāt* claim is a case of one private party against another. There is no official prosecution, nor is punishment implemented on behalf of the public or its protection. Surprisingly to American trained lawyers, these points hold true — under the classical theory of the *Shari'a*, though not necessarily in practice today under modernist legislation — even for a case of homicide (*katl*). The claim is a private one, hence the rubric "*ḥaqq ādamī*." Thus, the party alleging it suffered a wrongful act brings the case. In bringing the case, state action is largely confined to use of the court system and an Islamic judge (*qāḍī*). Unlike the *Imām* (or his representative) who implements a *ḥadd* punishment, liability for a *jināyāt* is enforced by a private party, namely, the victim or next of kin, albeit it is the Islamic judge (*qāḍī*) who "is responsible for the carrying out of *ta'zīr*" (i.e., the discretionary punishment). That is, the *qāḍī* — or, in practice, his agent — implements a discretionary punishment. Moreover, it is the *qāḍī* who "controls the prison."<sup>1</sup> The court, *qāḍī*, agent of the *qāḍī*, or an administrative agency also may make itself available for use by the parties, such as for the prevailing party to collect on a judgment.

[B] Examples of *Jināyāt*

What are examples of *jināyāt* under the classical theory of the *Shari'a*? What are the principal *ḥaqq ādamī* that are actionable as civil wrongs, or torts? The answer is:

- Homicide, called "*katl*."
- Bodily harm.
- Damage to property.<sup>2</sup>

Note what is not on this list, particularly breach of contract. The *Shari'a* treats as conceptually distinct (1) liability for the above-listed "torts" and (2) liability for non-performance of a contract.

<sup>1</sup> JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW 197 (Oxford, England: Oxford University Press (Clarendon Paperbacks) 1982). [Hereinafter, SCHACHT.]

<sup>2</sup> See SCHACHT, *supra*, at 177, 181.

In addition to these offenses, there are species of theft that do not give rise to the *ḥadd* punishment for *sarika*. Whenever an essential element of *sarika* is missing, the wrongful act is considered a *ḥaqq ādamī* claim. One example concerns the element of stealth: it is missing if the robbery is open (*naḥb*), or where the property is taken when a person is unaware, such as pick-pocketing (*ikhtilās*). Another example implicates the element of custody. It is lacking if the object is owned by a nearby relative (*mahram*), the thief was invited to enter the premises from which he took the object (*khiyāna*), or the thief does not take custody (*hirz*) of the object, i.e., where he is caught red-handed.

## § 47.02 TA'ZĪR PUNISHMENTS

## [A] Types of Liability

To say that a *jināyāt* offense is a *ḥaqq ādamī* claim, that is, a private claim, is not to suggest the perpetrator "gets off." There always looms the generic, yet most terrifying, punishment: condemnation of the perpetrator at Final Judgment to hell. On this plane of existence, the private claim — if true and successful — gives rise to three kinds of liability of the perpetrator to the victim, or the next of kin of the victim:

- (1) Retaliation (that is, private vengeance), called "*kiṣās*."
- (2) Blood-money, called "*diyyah*."
- (3) Damages.

Exactly which type of liability is triggered depends on facts and circumstances. Here, then, is a clear contrast between the categories of *ḥaqq ādamī* and *ḥaqq Allāh*. A *ḥadd* punishment is fixed under the Qur'an or *Sunnah* for offenses in the latter category. Punishments for *jināyāt* are not fixed. They vary, depending on the case at bar. They may take the form of retaliation, blood money, damages, or some combination thereof.

To be sure, it is not unusual for the Qur'an to identify a behavior or transaction as religiously and morally wrong, but not specify a concomitant punishment. Unlawful sexual intercourse (*zinā*) and drinking (*shurb al-khamr*) are two examples from the category of *ḥaqq Allāh* offenses. Two other prominent illustrations from the world of banking and finance are:

- The game of hazard called "*maysir*." It is forbidden in the Qur'an, as it involves hazard or chance, i.e., *ghavar* (risk or uncertainty). That is, *maysir* is a form of gambling, associated with pagan worship, and the Qur'an forbids such practices.
- Paying or receiving interest, *ribā*, also is forbidden by the Qur'an. Interest is a species of unjustified enrichment — i.e., consuming the property of another for no good reason.

The Qur'an does not lay out a sanction for playing *maysir*, or other forms of gambling, nor for transactions involving *ribā*. Here again, the penal regime in the afterlife — the possibility of condemnation to hell — may well serve to deter some

would-be gamblers and usurious practitioners. In this life, depending on the particularities of the Muslim country in question, the possibility of a judicially-prescribed sanction exists, as does a complete ban via legislation or regulation on gambling and interest. Notably, however, neither *gharar* nor *ribā* gives rise to a *haqq ādamī* offense.

As for *haqq ādamī* offenses, the exact nature and degree of punishment is within the discretion of the presiding Islamic judge (*qāḍī*). Accordingly the sanctions associated with *jināyāt* offenses are called "discretionary," or "*ta'zīr*," punishments. A "*ta'zīr*" punishment is one not specified in the Qur'ān or *Sunnah*, but decided upon and applied according to the sound judgment of a *qāḍī*. Further, Professor Schacht observes in respect of the term "*ta'zīr*":

the *kāḍī* may punish at his discretion any act which in his opinion calls for punishment, whether it infringes the rights of Allah or the rights of humans.<sup>3</sup>

In other words, a *ta'zīr* punishment may be imposed by a *qāḍī* in a case involving a *haqq Allāh* crime, as well as a case of a *haqq ādamī* offense. When used for crimes in the first category, then it is added to the *ḥadd* punishment.

As for the above three types of liability, there is a common denominator: all of them are aimed at repairing injury caused by the wrongdoer. Thus, blood money is not to be equated conceptually with a monetary fine, which is not known in the *Shari'a*.<sup>4</sup> Rather, the dividing line between the second and third types of liability appears to be blood-money is compensation for a loss suffered, whereas damages are a further payment — a distinction redolent of that in American Tort Law between actual damages (the payment of blood-money) and punitive damages (the further payment). Arguably, all three punishments also serve the purposes of specific and general deterrence.

By no means are retaliation, blood money, and damages the exclusive forms of *ta'zīr* punishments. At the discretion of a *qāḍī* are further sanctions:

- Imprisonment, called "*ḥabs*."
- Floggings (i.e., whipping with a certain number of lashes and degree of intensity) or other beatings.

Note that these punishments, as well as monetary fines, are not set by the Qur'ān. Note, too, the purpose of the *ḥabs* sanction is to cause the perpetrator to engage in repentance (*tauba*). A *qāḍī* might choose to base the severity of the punishment on aggravating or mitigating circumstances, such as the socioeconomic status of the guilty defendant.

<sup>3</sup> SCHACHT, *supra*, at 207.

<sup>4</sup> See SCHACHT, *supra*, at 207.

## [B] Settlement and Pardon ('*Afu*)

It always is possible for the victim, or next of kin of the victim, to forego imposition of liability on the perpetrator. The victim or next of kin may elect to:

- (1) Reach an amicable settlement with the perpetrator; or
- (2) To offer a pardon (called "*afu*") to the perpetrator.

Indeed, as a religious matter, the forgiveness and mercy associated with these responses are to be encouraged.

## [C] Umayyad Caliphate Origins of *Ta'zīr* Punishments

What is the origin of *ta'zīr* punishments? They do not appear in pre-Islamic Customary Law, which means the concept pre-dates Islam. Nor are *ta'zīr* punishments called for by the Qur'ān, nor yet even by the *Sunnah*. Professor Schacht declares "the *ta'zīr* stands by itself."<sup>5</sup> He ascribes the origins to the first batch of *qāḍīs* during the *Umayyad* Period (651–750 A.D.). They were called upon to adjudicate cases involving behavior that threatened the peace and security of the emerging Caliphate. These *qāḍīs* had to exercise their discretion to deal with transgressions which did not fit neatly into the standard *ḥadd* punishment categories.

Thus, the *qāḍīs* extended Qur'ānic Penal Legislation, and thereby:

filled a need that was felt in practice, and this need made itself felt sufficiently early for the first specialists of Islamic religious law to incorporate it in its official doctrine.<sup>6</sup>

To use American legal jargon, it might be said *ta'zīr* punishments were established by judicial fiat, or as a result of judicial activism occasioned by the need to engage in interstitial lawmaking. Interestingly, this instance was not the only one of extending Qur'ānic Penal Legislation the *Shari'a* would see in the *Umayyad* and subsequent Caliphates. The creation of a *de facto* public prosecutor — the office of the *ḥisba*, and its occupant, the *muhtasib* — was yet another development affecting Islamic Penal Law.

## [D] Eye-for-An-Eye Justice

There is a clear sense of eye-for-an-eye justice in the theory of *haqq ādamī* offenses and attendant *ta'zīr* punishments. The Qur'ān, in *surah* 5, *ayah* 45, says so:

In the *Torah* We [God (Allāh)] prescribed for them a *life for a life, an eye for an eye, a nose for a nose, an ear for an ear, a tooth for a tooth, an equal wound for a wound*: if anyone forgoes this out of *charity*, it will serve as

<sup>5</sup> SCHACHT, *supra*, at 207.

<sup>6</sup> SCHACHT, *supra*, at 208.

atonement for his bad deeds. Those who do not judge according to what God has revealed are doing grave wrong.<sup>7</sup>

This passage is intriguing. It refers expressly to the Torah. In effect, God (Allāh) is saying eye-for-an-eye justice was part of an earlier revelation, namely, to "them," i.e., the Jewish people, through the Torah. But, He then reveals that forgoing such justice out of charity is beneficial. Why? Not taking retaliatory action against a wrongdoer is a way to atone for bad deeds done the victim did. Forgiveness offsets sin. But, does the passage repeal the eye-for-eye retaliatory approach? That is, is it clear from the passage that this approach is not part of Islamic Law? The answer is "no." Forgiveness is encouraged, but not required. The final sentence calls for following what has been revealed, in the Torah, and later in the Qur'ān, which suggest there is no repeal of this approach.

From an Islamic legal perspective, that there has been no unambiguous repeal is evident from the *ayah* that follow:

<sup>46</sup>We sent Jesus, son of Mary, in their footsteps, to confirm the Torah that had been sent before him: We gave him the Gospel with guidance, light, and confirmation of the Torah already revealed — a guide and lesson for those who take heed of God. <sup>47</sup>So let the followers of the Gospel judge according to what God has sent down in it. Those who do not judge according to what God has revealed are lawbreakers.

<sup>48</sup>We sent to you [Muhammad] the Scripture with the truth, confirming the Scriptures that came before it, and with final authority over them: so judge between them according to what God has sent down. Do not follow their whims, which deviate from the truth that has come to you. We have assigned a law and a path to each of you. If God has so willed, He would have made you one community, but He wanted to test you through that which he has given you, so race to do good: you will all return to God and He will make clear to you the matters you differed about.<sup>8</sup>

Do these *ayah* bespeak a point of contrast between Christianity and Islam? If there is one key teaching all Christians would agree Christ does not represent, then it is eye-for-an-eye judgment. To say (as in *ayah* 46) Jesus was sent "to confirm the Torah" is one thing, but to interpret that phrase as meaning Christ confirms each and every element of the Torah, including eye-for-an-eye retaliation, is a reading with which Christians would take issue. To the contrary, they would argue, a (if not the) dominant message of Christian teaching is forgiveness, hence the story and metaphor of "turning the other cheek."

Yet, *ayah* 47 instructs followers of the Gospel — Christians — to render judgments consistently with the contents of "it," referring to the Gospel. Eye-for-an-eye justice is not expected, at least not among Christians. Further, *ayah* 48 speaks of the Prophet "confirming" the previous revelations, the Sacred Scriptures that came before the Qur'ān, and gives Muhammad some discretion to render

judgments consistent with what God (Allāh) "has sent down." Does this reference mean the Gospel message of forgiveness, which post-dates the Torah message of vengeance, is what the Prophet confirms as part of what has been "sent down"? Not necessarily. The remainder of *ayah* 48 states that God (Allāh) has established "a law and a path to each of you." If by "you" the reference is to the Jewish, Christian, and Muslim peoples (and not individuals), then the statement connotes three different laws for the three peoples. But, the final part of *ayah* 48 is a clarion call for people to do good, indeed, to try and out-do each other in doing good. That call might suggest they ought to focus more on forgiveness than on vengeance.

The "bottom line" is that whether Islamic Penal Law must adhere to a strict, Old Testament-style eye-for-an-eye justice is not entirely clear, at least not from *surah* 5, *ayah* 45–48. The last sentence of *ayah* 48 offers a comforting thought: all the peoples will "return to God," at which point the differences will be sorted out by Him. That suggests that what matters is a best-efforts undertaking is made in respect of discerning and applying rules for judgment. Suppose this undertaking indicates that retaliation is a poor framework for the *Sharī'a*. Perhaps the fact of the effort to figure out the proper framework matters more than getting the "right answer."

There is, of course, a systemic argument against eye-for-an-eye justice. To paraphrase Mahatma Gandhi, it is that such justice does nothing except make the whole world blind. The blindness is not just literal, in the sense of each victim poking out the eye of each perpetrator. It is a blindness of being consumed by rage and vengeance. An endless spiral of retaliation follows. The only escape, one pointed out by Archbishop Desmond Tutu, is indicated by the title of his book — *No Future Without Forgiveness* (2000). Some Islamic countries have acted accordingly, reforming their legal system through modernist legislation that circumscribes or eliminates the use of bodily punishments in *jināyāt* cases. Such legislation criminalizes the *haqq adamī* offenses, and inclines toward the use of imprisonment and fines to penalize wrongdoers. These changes shift the legal system away from a tort-like approach, and render the classification of the wrongful acts at issue, and punishment for their commission, more akin to the treatment in American Criminal Law.

## § 47.03 HOMICIDE (KATL)

### [A] Continuum of Culpability

A major category of *jināyāt* under the classical *Sharī'a* theory is homicide, or "*katl*." As in American Criminal Law, not all homicides are alike. Intent (*niyya*) is a key factor distinguishing culpable acts. There is a range, generally from premeditated murder with aggravating circumstances to manslaughter that involves an accidental or unintended death. By no means was this range developed first in the United Kingdom or the United States, or put differently, the distinction between *actus reus* (culpable act) and *mens rea* (culpable mental state) did not first arise in the legal systems of these countries.

Rather, the *Sharī'a* always has viewed *katl* in terms of a continuum of possibilities. Islamic Penal Law establishes a continuum of culpability, whereon the

<sup>7</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 5:45, at 72 (Oxford, England: Oxford University Press, 2004) (emphasis added). [Hereinafter, QUR'AN.]

<sup>8</sup> QUR'AN, *supra*, 5:46–50, at 72–73 (emphasis added).

more culpable a perpetrator is, the more severe the *ta'zīr* punishment that may be imposed on that wrongdoer.<sup>9</sup> Here then, along with concepts from Property and Contract Law, is another opportunity for humility: some ideas taken for granted in the everyday study and practice of Criminal Law in the non-Muslim western world have origins, or at least analogs, in the far older system of Islamic Law.

The continuum, which Table 47-1 summarizes, is part of *Hanafi* School jurisprudence. It is widely accepted, except that the *Māliki* School does not distinguish between the first two categories of intent (*niyya*). Rather, the *Māliki* School aggregates deliberate intent (*'amd*) and quasi-deliberate intent (*shibh al-'amd*). At the outset, it is important to comprehend what is not on this continuum — negligence. As Professor Schacht states directly, “[t]he concept of negligence is unknown to Islamic law.”<sup>10</sup> Here lies an important distinction between the *Shari'a* and American Criminal Law and Tort Law. Criminally negligent homicide (or some variant thereof) is a substantive criminal offense, and negligence is a major ground for bringing a tort claim, in many jurisdictions that follow or are influenced by the American system.

Note, however, that negligence crimes are recognized in the contemporary legal systems of several Muslim countries, pursuant to modernist legislation. They are considered offenses meriting *ta'zīr* punishments. Accordingly, the discretion as to the remedy in a particular case is left to the appropriate judicial authority.

#### [B] Claimant: Next-of-Kin of Victim (*Walī al-Dam*)

As is consistent with the nature of a *jināyāt* case and meaning of a *haqq ādamī* offense, at all points on the continuum, the identity of the claim holder is a private party. That is, a private party holds the entitlement to prosecute the claim. The private party, in the case of homicide (*katl*), is the next-of-kin of the victim. The next-of-kin is called the “*walī al-dam*.” Literally, the term means “avenger of the blood.” It refers to the individual who is the next-of-kin of the victim who has the right to demand retaliation.

<sup>9</sup> See SCHACHT, *supra*, at 181.

<sup>10</sup> SCHACHT, *supra*, at 182.

Table 47-1:  
Continuum of Culpability for Homicide (*Katl*)  
According to the *Hanafi* School with *Māliki* School Variations

Degree of Culpability	Distinguishing Feature	Physical Retaliation? (Punishment Under Right of Retaliation)	Alternative Blood Money ( <i>Diyyah</i> ) Amount	<i>Māliki</i> School Variations
Highest	Deliberate Intent, with deadly weapon ( <i>'Amd</i> )	Yes, death (execution by sword) of the killer.  However, waiver of retaliation is recommended.	Heavier blood money ( <i>diyyah mughallaza</i> ) of 100 high-quality camels, or normal blood money of 100 lesser quality camels plus money (e.g., 1,000 <i>dinārs</i> or 10,000 <i>dirhams</i> ). Blood money amount for a female victim is half that for a male victim. Also, religious expiation ( <i>kaffāra</i> ), disinheritance.	No difference between Highest and Second Highest Degrees of culpability (i.e., these two categories are collapsed into one). Minimum punishment of 100 lashes plus one year imprisonment, even if right of retaliation is waived.
Second Highest	Quasi-Deliberate Intent, no deadly weapon ( <i>Shibh al-'Amd</i> )	Yes, death (execution by sword) of the killer, but only if the killer acted with the intent to kill. However, waiver of retaliation is recommended.	Heavier blood money ( <i>diyyah mughallaza</i> ).  Blood money amount for a female victim is half that for a male victim. Also, religious expiation ( <i>kaffāra</i> ), disinheritance.	As above.
Second Lowest	Mistake ( <i>Khaṭa'</i> ) as to purpose or in the act	No, because killer did not act with the intent to kill, and thus is not fully responsible.	Normal blood money ( <i>diyyah muḥakkaka</i> ). Blood money amount for a female victim is half that for a male victim. Also, religious expiation ( <i>kaffāra</i> ), disinheritance.	None.

Degree of Culpability	Distinguishing Feature	Physical Retaliation? (Punishment Under Right of Retaliation)	Alternative Blood Money (Diyah) Amount	Mālikī School Variations
Lowest	Indirect Homicide ( <i>Katl bi-Sabab</i> )	No, because killer did not act with the intent to kill, and thus is not fully responsible.	No liability for authorized actions. For unauthorized actions, blood money, including heavier blood money ( <i>diyyah muḥakkaka</i> ) in certain cases. Blood money amount for a female victim is half that for a male victim.	None.

The *wali al-dam* is the nearest male ascendant or descendant relative (agnate, or “*ʿasabā*”) of the victim. In a case of *katl*, the *wali al-dam* is the person who carries out any retaliation, or who chooses to waive the right of retaliation for a settlement of blood-money, or gratuitously as a pardon. It is the *wali al-dam* to whom blood money is paid, or who waives any claim to that payment. What about a case not involving a homicide, i.e., in which the victim remains alive? Then, it is the injured party — the victim-in-chief, as it were — who is entitled to prosecute the claim and demand retaliation.

### [C] Highest Degree: Deliberate Intent (*ʿAmd*)

The highest degree of culpability for homicide (*katl*) exists when commission of the offense occurs with deliberate intent, which is called “*ʿamd*.” In this instance, the perpetrator intended both the action he or she committed, and meant to kill. Deliberate intent may be proved by the use of a deadly weapon. Indeed, the most severe form of *katl* is that which occurs with deliberate intent using a deadly weapon.

The punishment for *katl* with deliberate intent (*ʿamd*) is retaliation. Specifically, the life of the killer (or killers) may be taken. The execution is to be carried out using a sword. The next-of-kin (*wali al-dam*) of the murder victim holds the right to demand retaliation. If retaliation is taken, then no religious expiation, called “*kaffāra*,” is called for. (That accords with common sense.) It must be stressed that the *Shariʿa* authorizes retaliation only if the killer (or killers) clearly acted with deliberate intent, and was (were) fully responsible for the resulting death.

To many non-Muslims, and Muslims as well, retaliation by taking the life of the killer is barbaric. It is, and there is no getting round that fact. However, a principled stand against retaliation would include opposition to the death penalty, particularly when life imprisonment with no possibility of parole is an available sanction, in jurisdictions not governed by Islamic Law. Note, however, that it is helpful to put this right of retaliation in its historical context. In pre-Islamic times,

Bedouin tribes on the Arabian Peninsula got into upward-spiraling cycles of wrongful act and retaliation. Any member of the tribe of a killer could be killed by the tribe of the victim.<sup>11</sup> More than one life could be taken to avenge a single homicide. The ineluctable result often was a blood feud.

Hence, Professor Schacht opines reasonably that “[t]he considerable restriction of blood feuds was a great merit of Muhammad’s.”<sup>12</sup> In other words, the *Shariʿa* limits retaliation to one life, namely that of the killer and no one else, following a homicide. Moreover, the target of the retaliation must have acted with deliberate intent (*ʿamd*). Once retaliation occurs, that is the end of the case. It is a complete remedy.

Still another improvement on the pre-Islamic situation is the fact that the right of retaliation can be waived. The next-of-kin of the victim can choose to forego retaliation, either for free or for a consideration. In fact, it is recommended, but not required, that the *wali al-dam* waive his right of retaliation, and instead accept payment of blood money. “Recommended,” in this sense, refers to the Scale of Religious and Legal Qualifications (*Al Ahkām Al Khamsa*): obligatory (*waajib*)/ recommended (*mandub* or *mustahabb*)/ indifferent (*mubāh*)/ reprehensible (*makrūh*)/ forbidden (*ḥarām*).

An obvious rebuttal exists to this historical argument. The fact Islamic Law “improves” matters in comparison with pre-Islamic times is not a justification for the “improvement” in light of higher modern standards. What occurred on the Arabian Peninsula before the first revelation in 610 A.D. is hardly a good benchmark for whether a rule or sanction is justified today. In turn, that it was “better” 1,500 years ago to avoid escalating blood feuds by limiting retaliation to a single killing does not mean taking a life for a life is “better” in view of the substitutes available today.

In any event, the *wali al-dam* possesses the exclusive authority to waive retaliation, without any demand for a reciprocal payment. Indeed, as a general principle, Islam encourages waiver of retaliation. It is viewed as an act of magnanimity and mercy. Waiving retaliation means granting a pardon, which is called “*ʿafw*” in Arabic. Alternatively, the *wali al-dam* has the exclusive authority to choose to agree on a settlement in lieu of retaliation. The settlement is called “*ṣulh*,” the same term used in the context of Islamic Contract Law. The settlement is “blood money,” or “*diyyah*” — a rubric that is apt in both a conceptual and literal sense. Renouncing retaliation, i.e., not killing the murderer, and accepting blood money instead, does not technically qualify as an *ʿafw*, but otherwise is considered a waiver.

In the event of a *ṣulh*, what is the appropriate amount of blood money (*diyyah*)? There are two basic categories of figures:<sup>13</sup>

- The so-called “heavier” blood money for more serious *jināyāt* cases. The “heavier” blood money is called “*diyyah muḥallaḥa*.” Traditionally, it was

<sup>11</sup> See SCHACHT, *supra*, at 185.

<sup>12</sup> SCHACHT, *supra*, at 185.

<sup>13</sup> See SCHACHT, *supra*, at 185.

100 high-quality camels.

- The so-called "normal" blood money, for all other cases. The "normal" blood money is called "*diyyah muḥakkaka*." Traditionally, it was 100 regular camels, 1,000 *dīnārs*, or 10,000 *dirhams*.

Significantly, traditionally, the blood money for a female victim was one-half the amount for a man. In other words, if a woman is the victim of a *haqq ādamī* offense, and the claim against the perpetrator is settled through a payment, the figure is 50 percent of that which would be agreed upon had the victim been a man. It cannot go without comment that this differential connotes a lesser value on the life based on gender, which in modern times (if not throughout the ages) is unacceptable.

Traditionally, liability for blood money is not incurred by the perpetrator himself or herself, but by the "*ākila*." This group consists of paid members of a Muslim army to which the perpetrator belongs, the male members of the tribe to which the perpetrator belongs (or, if there are too few of them to make the payment, then of the nearest related tribes), the co-workers of the perpetrator, or the confederates of the perpetrator. But, the expansion of the circle to include the latter two categories was an insufficient adaptation to the urbanization of Islamic societies, and the institution of "*ākila*" has fallen into disuse.<sup>14</sup> The inference from this report is that liability for blood money, in modern times, tends to be put on the perpetrator. Payment of blood money is made to the next-of-kin of the victim, particularly, the *walī al-dam*.

Either way, as a pardon (*ʿafw*) or with a settlement (*ṣulḥ*), the perpetrator must engage in religious expiation (*kaffāra*). That is, a waiver by the *walī al-dam* of the right to retaliation must be accompanied by expiation on the part of the wrongdoer. Obviously, in a religious sense, *kaffāra* is due only where a sin has been committed. Killing with deliberate intent certainly qualifies. Of what does *kaffāra* consist? Traditionally, it involved the manumission of a Muslim slave, or fasting for two straight months.

Being liable for a *jināyāt* offense has consequences for inheritance rights. Simply put, they are lost. Suppose the perpetrator is an heir of the victim, or is a beneficiary named in the will of the victim. A perpetrator against whom retaliation has been waived is disqualified from eligibility for any inheritance from the victim.

There is an important variation in *Mālikī* School doctrine on the punishment for homicide if retaliation does not occur.<sup>15</sup> The *Mālikī* School calls for the punishment of 100 lashes, plus imprisonment of one year, in the event the *walī al-dam* waives the right of retaliation. The School considers this sanction neither a *ḥadd* punishment nor a *taʿzīr* punishment. It amounts to a minimum sentence for certain homicide cases, ensuring that no murderer escapes a penal sanction. The term name "*ukāba*," which essentially is a generic term for punishment, can refer to this particular sanction.

<sup>14</sup> See SCHACHT, *supra*, at 185.

<sup>15</sup> See SCHACHT, *supra*, fn. 1 at 185.

## [D] Second Highest Degree: Quasi-Deliberate Intent (*Shibh al-ʿAmd*)

The second most serious case of homicide (*katl*) occurs when quasi-deliberate intent is involved. Such intent is known in Arabic as "*shibh al-ʿamd*." Quasi-deliberate intent exists whenever commission of the act was intended, but the perpetrator did not mean to kill, i.e., the act but not the result was intended. Such an instance may be inferred from a killing that occurs without a deadly weapon: the perpetrator meant to punch the victim, or hit the victim with a stick, but not to take the life of the victim.

Retaliation is permissible in cases of homicide with quasi-deliberate intent (*shibh al-ʿamd*). Again it must be stressed that the *Shariʿa* authorizes retaliation only if the killer (or killers) acted with clear, deliberate intent and was (were) fully responsible for the death. Further, these cases also allow for an alternative punishment, namely, payment of heavier blood money, plus religious expiation (*kaffāra*). Of course, it is the perpetrator who must perform the expiation.

As for the payment, traditionally it is the responsibility of male members of the tribe, co-workers, or the like of the perpetrator — the *ākila* — though now it appears to be the obligation of the perpetrator. The blood money amount for a female victim is one-half the amount for a man. Payment is made to the *walī al-dam*. As a further sanction, the perpetrator is disqualified from eligibility for any inheritance from the victim.

Note the same *Mālikī* School variation that applies to homicide with deliberate intent (*ʿamd*) exists for cases of *shibh al-ʿamd*, as that School does not differentiate between the two categories. For the *Mālikī* School, the key point seems to be the murderer operated with deliberate intent. Given that state of mind — that *mens rea* — it does not matter whether the murderer used a deadly weapon.

## [E] Second Lowest Degree: Mistake (*Khaṭaʾ*)

Killing with deliberate intent (*ʿamd*) or quasi-deliberate intent (*shibh al-ʿamd*) lie at one pole of the continuum of homicide possibilities — obviously, the more serious end. At the other end lie the two lowest degrees of culpability for homicide, the first of which is killing by mistake. The Arabic term for mistake is "*khaṭaʾ*."

Retaliation is not permissible in instances of homicide by error (*khaṭaʾ*). By definition in these cases, the killer (or killers) did not act with clear, deliberate intent (and, possibly, was not fully responsible for the consequence). But, such cases trigger as a punishment the payment of blood money, though of a lesser amount — the normal blood money — than where the perpetrator acted with quasi-deliberate intent. The amount is even lesser if the victim is a woman, as it is one-half the figure of that for a male victim. In addition, religious expiation (*kaffāra*) is required, at least because the perpetrator should express genuine sorrow for the error that caused the death of the victim. Here again, the perpetrator is disqualified from eligibility for any inheritance from the victim.

Not all mistakes are the same. Consider the case in which former American Vice President Dick Cheney was involved.<sup>16</sup> While quail hunting on a ranch in Texas on 11 February 2006, the Vice President shot (but fortunately did not kill) his friend, a 78-year old Texas lawyer named Harry Whittington. (On February 14, Mr. Whittington had a non-fatal silent heart attack and atrial fibrillation, which apparently were linked to one lead-shot pellet lodged in or near his heart.) Both the Vice President and the victim called the shooting an accident, and no charges were pressed. What kind of "mistake" occurred?

The *Shari'a* draws distinctions based on type of mistake. There may be mistake as to purpose, known as "*fil-kaṣd*." Or, there may be a mistake as to action, called "*fil-fi'l*." A mistaken purpose would be where a person shoots a human being thinking him or her to be an animal.<sup>17</sup> The analogy to the Vice President's case would be a mistake as to the identity of Mr. Whittington — he was mistaken for a quail, not a person. A mistaken act would be where a person shoots at a target, misses, and hits a man, mortally wounding him. The analogy would be a mistake as to accuracy: a quail was aimed at, but Mr. Whittington was hit. It is this mistake that appears to have occurred, and the Vice President was cleared by the relevant county sheriff of all criminal wrong-doing. Additionally, under the *Shari'a*, there are cases where an action is (debatably) considered a mistake, as where a man rolls over in his sleep and suffocates his wife to death.

#### [F] Lowest Degree: Indirect Homicide (*Ḳatl bi-Sabab*)

At the opposite end of the continuum of homicide (*ḳatl*) from killing with deliberate intent and a deadly weapon (*ʿamd*) is indirect homicide, or "*ḳatl bi-sabab*." The first three categories on the continuum (*ʿamd*, *shibh al-ʿamd*, and *khata'*) involve a direct action by the perpetrator on the body of the victim. However, with *ḳatl bi-sabab* that relationship is indirect. The general concept is that a person is liable for an action that he or she commits, and that was unauthorized, if it leads to the death of another person. The key inquiry concerns causation: how long may the causal chain be to hold a person liable, before the chain becomes too long to link the perpetrator with the death?

The answer to this question depends on the facts and circumstances of a particular case. Assuming liability is found, the punishment is payment of the normal amount of the blood money. No religious expiation (*kaffāra*) is required. And, the perpetrator remains eligible for an inheritance from the decedent.

Setting aside questions of causation, how does the *Shari'a* identify *bona fide* cases of indirect homicide? The key device regulating the scope of actions considered indirect homicide is authority. So long as the behavior at issue is authorized, the perpetrator is free from liability, and the case is not one of indirect homicide. A substantial number of actions are considered authorized.<sup>18</sup> Some

prominent illustrations of authorized behavior are:

- A person can dig a well on his own property, or on the property of another with the permission of that owner, or on public property with the permission of the *imām*. In all three cases, if a third party falls in the well and dies, then the digger of the well is not liable for indirect homicide.
- Performance of ritual ablution (i.e., cleansing before prayer) is authorized. Suppose a person performs this act in an area that he or she owns or co-owns. But, a third party slips from the water used in the ablution, falls, and dies. (This mishap could occur in a blind alley that the property of the person performing ablutions abuts, with the water running from his or her property into the alley.) The person who performed the ablutions is not liable for indirect homicide.
- Consider a person who builds a bridge on public property. A person falling from that bridge, and dying as a result, will not trigger liability for indirect homicide on the part of the builder. That is true, even if the bridge was built without the permission of the *imām*. With or without such permission, the construction is considered "authorized."
- Suppose a wall collapses, and crushes a person to death. The owner of the fallen wall is not liable for indirect homicide, unless the owner of adjoining property had asked the owner of the fallen wall to remove or repair that wall. Note the relevance of knowing whether a purported property owner actually owns property that kills or injures another person.
- Continuing from the previous example, suppose the owner is asked to tear down the wall, because it is in danger of collapsing. Instead of doing so, the owner sells the wall, and the buyer is not asked to tear down the wall. After the sale is complete, the wall collapses and kills an innocent victim. The seller is not liable, because he did not own the wall when it collapsed. The buyer is not liable, because he was not asked to demolish the wall.

One question in respect of *ḳatl bi-sabab* is liability of a parent for a child, or an owner of an animal for the animal. Is a parent liable for acts of a child (or, more generally, a guardian for the act of a minor)? Is the owner of an animal liable for acts of the animal?

The general answer under the *Shari'a* to these questions is affirmative.<sup>19</sup> At least in cases of animals, an owner has a successful defense where the victim intentionally enraged or frightened the animal. Similarly, an owner cannot be held liable for the death of a person to whom the owner lent his or her animal (say, a camel, donkey, or horse), where the person who hired the animal fell off it.

Observe that even in the above illustrations, the correspondence between degree of culpability and attached liability is general. Cases can give rise to differences in liability, as Professor Schacht points out:<sup>20</sup>

<sup>16</sup> See Dick Cheney Hunting Incident, Wikipedia, posted at [http://en.wikipedia.org/wiki/Dick\\_Cheney\\_hunting\\_incident](http://en.wikipedia.org/wiki/Dick_Cheney_hunting_incident).

<sup>17</sup> See SCHACHT, *supra*, at 182.

<sup>18</sup> See JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW 182-183, 204 (Oxford, England: Oxford University Press (Clarendon Paperbacks) 1982).

<sup>19</sup> See SCHACHT, *supra*, at 183.

<sup>20</sup> See SCHACHT, *supra*, at 182.

- Suppose a person kills his or her descendant (or, in older times, a master killed a slave). The liability is for the heavier blood-money (*diyyah mughallaḡa*), not retaliation.
- Suppose a person kills someone who is insane, or a minor, but claims self-defense. Because neither an insane person nor a minor is accountable for his or her behavior, the *Shari'a* does not recognize the case as one of *bona fide* self-defense. Liability is imposed on the perpetrator, but for *diyyah mughallaḡa*, not retaliation.
- Suppose there are several perpetrators, and one is exempt from liability for retaliation (e.g., for the reason the victim was his or her descendant). Then, all the perpetrators are exempt from retaliation too, yet all are liable for *diyyah mughallaḡa*.

These three examples suggest some boundaries on liability for indirect homicide, but unlike the earlier illustrations, they do involve legal accountability of the perpetrator to the victim or the next of kin. As in all other instances of homicide, at least traditionally, the blood money amount for a female victim is one-half the amount for a man.

As in the *Shari'a*, the problem of indirect homicide is a standard one in American Criminal and Tort Law. Sadly, everyday in Muslim and non-Muslim jurisdictions, killings with an extended causal nexus between perpetrator and victim happen. It might even be broached that the discussion in Islamic Law as to how to treat such cases presaged, and informed, the American system. Under both systems, the problem begs a foundational issue: how far downstream is it justifiable to impose liability for indirect homicide? Put conversely, how far upstream is it justifiable to require a party to take reasonable precautions against injury?

In the American legal system, the issue is one of policy. Debate centers on concepts of justice, analysis of parties in terms of relative ability to bear loss, realities of cost imposition, and (especially in a global marketplace) consequences of different liability regimes for the international competitiveness of businesses. This debate covers two further problems: First, must all precautions be taken, or only reasonable ones, and if the latter, then how is "reasonable" gauged? Second, must all injuries be guarded against, or only foreseeable ones, and if the latter, then what is the test for "foreseeability"?

Islamic Law does not bar this kind of debate. But, as a sacred legal system, its over-arching considerations are religious and moral. Therefore, consider to what extent is liability for *katl bi-sabab* imposed when concepts of justice — aside from those sourced in the Qur'ān or *ḥadīth* — suggest it is unfair to do so? To what extent is liability imposed when it is clearly economically inefficient to do so, or disadvantages Muslim businesses in the international marketplace?

#### § 47.04 SUICIDE

In most American jurisdictions, suicide (and assistance provided to another to commit suicide) is a criminal offense. All religions counsel against killing oneself and generally would agree with the Catholic Christian precept that:

We are stewards, not owners, of the life God has entrusted to us. It is not ours to dispose of.<sup>21</sup>

In Catholic Christianity, the intentional taking of one's own life is prohibited under the 5th Commandment, and "seriously contrary to justice, hope, and charity."<sup>22</sup> It is "gravely contrary to the just love of self," "offends love of neighbor," and "contrary to love for the living God."<sup>23</sup> By extension, direct euthanasia is gravely wrong. It also is appreciated that some persons who commit suicide suffer from serious mental illnesses, or are gravely fearful of hardship, suffering, or torture.<sup>24</sup> They are not fully in control of their thoughts and actions, or their circumstances may diminish their responsibility for committing suicide. Their souls are entrusted to the merciful judgment of God, who by means known only to Him can provide the chance for "salutary repentance" and thereby salvation.

The approach taken in Islam is both similar and different. Killing oneself is religiously unwise, to say the least. But, it is not a *jināyāt*. Thus, an attempted but unsuccessful suicide triggers no liability. Whether that result is because Islamic Criminal Law does not focus on attempts, a religious injunction against suicide, or both, is unclear.

#### § 47.05 BODILY HARM NOT INVOLVING DEATH

Another everyday occurrence, unfortunately, in Islamic and non-Islamic jurisdictions is that of bodily harm. Accidents happen, people are hurt — but not killed. Are their injuries truly a result of an unforeseeable, unpreventable accident that ought not to give rise to liability? Or, is the bodily harm suffered the result of culpable behavior, to which liability attaches?

The *Shari'a* addresses these questions in nearly the same manner as it does questions of homicide (*katl*). For *jināyāt* cases of bodily harm not involving death, the same system — the same continuum — for categorizing degrees of culpability is used as for cases of *katl*, but with two key changes. First, the first and second categories (deliberate and quasi-deliberate intent) are lumped together. That is, the *Māliki* School view on homicide is the majority position in respect of non-fatal injury. Second, the standard liability for bodily injury is blood money. Retaliation is authorized only in certain cases.

The intriguing question, then, is in which instances is retaliation authorized? The answer involves the proportionality principle: only those cases in which it is possible to ensure retaliation is exactly proportional to the bodily harm inflicted. In such cases, retaliation is against specific body parts — a hand, foot, tooth, and so forth.<sup>25</sup> A special boundary on retaliation exists in respect of head injuries: retaliation for a wound to the head occurs only if the perpetrator lays bare the skull of the victim.

<sup>21</sup> CATECHISM OF THE CATHOLIC CHURCH ¶ 2280 at 550 (United States Catholic Conference, Inc., Washington, D.C.: Libreria Editrice Vaticana, 2nd ed. 1997). (Hereinafter, CATECHISM.)

<sup>22</sup> CATECHISM, *supra*, ¶ 2325 at 558.

<sup>23</sup> CATECHISM, *supra*, ¶ 2281 at 550. See also *id.*, ¶ 2282.

<sup>24</sup> See CATECHISM, *supra*, ¶ 2382 at 550.

<sup>25</sup> See SCHACHT, *supra*, at 185.

In the literal eye-for-an-eye justice case, retaliation for an eye is permissible only if the perpetrator causes the victim to lose sight in an eye. Retaliation is performed with a red-hot needle.

What about a case in which the perpetrator causes multiple injuries to the victim, or an injury to each of two (or more) victims — is retaliation permissible? The answer depends on the facts and circumstances. Professor Schacht cites the instance of a perpetrator acting with deliberate intent (*'amd*) to cause the loss to two persons of the same hand.<sup>26</sup> Then, one of the perpetrator's hands is cut off. The rest of the punishment takes the form of payment of the appropriate amount of blood money.

What is the blood money in cases of non-fatal bodily harm? It is similar to that for homicide with deliberate intent (*'amd*), particularly where the harm is grave.<sup>27</sup> It is the heavier amount (*diyyah mughallaza*). Grievous injury includes loss of an organ, especially where there is only one such organ, such as a tongue. Oddly, perhaps, loss of the beard or the head of hair qualifies as a grievous injury. Overall, the organ lost is the starting point, as it were, for calculating the blood money in other instances.

Thus, if there is only one of the kind of organ that is lost, then the blood money amount is the heavier amount (*diyyah mughallaza*). But, if there are two such organs (e.g., kidneys), and one of them is lost, then the blood money is half of what it would be for an organ that exists singly. Likewise, the blood money figure is calculated mathematically in proportion to fingers and toes — for the loss of a finger or toe, one-tenth the amount of a single organ, for a tooth, one-twentieth the amount (on the dentally incorrect presumption that a normal adult has twenty teeth). As in all cases of homicide (*katl*), in cases of non-fatal bodily injury, the blood money figures are reduced by 50 percent if the victim is a female.

Professor Schacht offers yet another example, namely, the case of unintentional mutilation of a boy during circumcision.<sup>28</sup> Circumcision is practiced among Muslim males. According to the *Shāfi'i* and *Ḥanbali* Schools, male circumcision is obligatory. It is recommended according to the *Māliki* and *Ḥanafī* Schools. (The issue of female circumcision, or female genital mutilation (FGM), which occurs in some Muslim countries — particularly in Africa — is not one of Islamic Law, but rather local custom. That practice, of course, is a hideous one that violates International Human Rights Law.) Assume the boy lives, despite the mutilation.

The basic rule is no liability can arise simply on account of circumcision. After all, depending on which of the Four Schools is consulted, circumcision is either a religiously-recommended or obligatory procedure. So, any liability that is imposed must arise from the mutilation, i.e., from the botched procedure. It is presumed the mutilation is unintentional. Assuming the boy lives, then liability is for the full blood money. What is the liability be if the boy dies? Then, only half of the blood money is paid. That result, at first glance, appears puzzling: why lesser blood money in the

event of a fatal rather than non-fatal mishap? The reason is half of the cause of death is attributed to the circumcision procedure itself, because the procedure can on occasion lead to death, yet no liability attaches on account of the procedure.<sup>29</sup> The other 50 percent of the cause of death is ascribed to mutilation, which does trigger liability — hence, half the blood money.

Two other poignant cases, which are particularly heart-rending, are bodily injury that causes a miscarriage, and procurement of an abortion without the consent of the father of the child. The first case is one in which a perpetrator hurts a pregnant woman and thereby causes her to miscarry. The traditional amount of blood money is 500 *dirhams*. This blood money is called "*ghurra*." The term refers to an indemnity — compensation for loss incurred, the loss being the death of the unborn child, which the perpetrator caused. The second case involves causing an abortion without the consent of the father. Again, the blood money is 500 *dirhams*, and it is considered *ghurra*.

Who is liable in these cases for blood money? Traditionally, it was the *ākila* of the wife and mother who must pay the *ghurra*. The blood money payment would be made in three annual installments, with no single member of the *ākila* obligated to take on a disproportionate share (e.g., each member paying 3 or 4 *dirhams*). In modern times, it seems the perpetrator is liable for making the payment. In the case of miscarriage, the money is deemed to belong to the dead child, and the appropriate persons inherit from the child. In the case of abortion, it appears that, again, the money belongs to the aborted child, and the parents and other appropriate persons inherit from the child.

Islamic legal scholars (*fukahā*) have studied and produced treatises on the appropriate amount of blood money to be paid in cases of non-fatal bodily harm. These works contain detailed schedules of blood money as against bodily injuries, and they inform everyday practice in *Shari'a* jurisdictions. They are, perhaps, not unlike the resource materials used by American practitioners of Tort Law, when they are acting as counsel for plaintiffs or defendants in cases of injury.

## § 47.06 PROPERTY DAMAGE

Under the *Shari'a*, there is liability on the part of a perpetrator for all cases involving damage to the property of another.<sup>30</sup> This liability is a key way in which Islamic Law protects private property and the rights of its owners. As for the *ta'zir* (discretionary) punishment in a property damage case, i.e., the authorized claim against the perpetrator, not surprisingly it depends on facts and circumstances. The greater the degree of culpability, naturally the more severe the sanction a *qādi* is likely to select.

<sup>26</sup> See SCHACHT, *supra*, at 185.

<sup>27</sup> See SCHACHT, *supra*, at 185.

<sup>28</sup> See SCHACHT, *supra*, at 203–204.

<sup>29</sup> See SCHACHT, *supra*, at 203–204.

<sup>30</sup> See generally JOHN MANDIS, *ISLAMIC PROPERTY LAW* ch. VI (Durham, North Carolina: Carolina Academic Press, 2005) (concerning attacks on property ownership, including robbery, theft, usurpation, and nuisance, and discussing causation and the defense of necessity).

In the literal eye-for-an-eye justice case, retaliation for an eye is permissible only if the perpetrator causes the victim to lose sight in an eye. Retaliation is performed with a red-hot needle.

What about a case in which the perpetrator causes multiple injuries to the victim, or an injury to each of two (or more) victims — is retaliation permissible? The answer depends on the facts and circumstances. Professor Schacht cites the instance of a perpetrator acting with deliberate intent (*'amd*) to cause the loss to two persons of the same hand.<sup>26</sup> Then, one of the perpetrator's hands is cut off. The rest of the punishment takes the form of payment of the appropriate amount of blood money.

What is the blood money in cases of non-fatal bodily harm? It is similar to that for homicide with deliberate intent (*'amd*), particularly where the harm is grave.<sup>27</sup> It is the heavier amount (*diyyah mughallaza*). Grievous injury includes loss of an organ, especially where there is only one such organ, such as a tongue. Oddly, perhaps, loss of the beard or the head of hair qualifies as a grievous injury. Overall, the organ lost is the starting point, as it were, for calculating the blood money in other instances.

Thus, if there is only one of the kind of organ that is lost, then the blood money amount is the heavier amount (*diyyah mughallaza*). But, if there are two such organs (e.g., kidneys), and one of them is lost, then the blood money is half of what it would be for an organ that exists singly. Likewise, the blood money figure is calculated mathematically in proportion to fingers and toes — for the loss of a finger or toe, one-tenth the amount of a single organ, for a tooth, one-twentieth the amount (on the dentally incorrect presumption that a normal adult has twenty teeth). As in all cases of homicide (*katl*), in cases of non-fatal bodily injury, the blood money figures are reduced by 50 percent if the victim is a female.

Professor Schacht offers yet another example, namely, the case of unintentional mutilation of a boy during circumcision.<sup>28</sup> Circumcision is practiced among Muslim males. According to the *Shāfi'i* and *Ḥanbali* Schools, male circumcision is obligatory. It is recommended according to the *Māliki* and *Ḥanafī* Schools. (The issue of female circumcision, or female genital mutilation (FGM), which occurs in some Muslim countries — particularly in Africa — is not one of Islamic Law, but rather local custom. That practice, of course, is a hideous one that violates International Human Rights Law.) Assume the boy lives, despite the mutilation.

The basic rule is no liability can arise simply on account of circumcision. After all, depending on which of the Four Schools is consulted, circumcision is either a religiously-recommended or obligatory procedure. So, any liability that is imposed must arise from the mutilation, i.e., from the botched procedure. It is presumed the mutilation is unintentional. Assuming the boy lives, then liability is for the full blood money. What is the liability be if the boy dies? Then, only half of the blood money is paid. That result, at first glance, appears puzzling: why lesser blood money in the

event of a fatal rather than non-fatal mishap? The reason is half of the cause of death is attributed to the circumcision procedure itself, because the procedure can on occasion lead to death, yet no liability attaches on account of the procedure.<sup>29</sup> The other 50 percent of the cause of death is ascribed to mutilation, which does trigger liability — hence, half the blood money.

Two other poignant cases, which are particularly heart-rending, are bodily injury that causes a miscarriage, and procurement of an abortion without the consent of the father of the child. The first case is one in which a perpetrator hurts a pregnant woman and thereby causes her to miscarry. The traditional amount of blood money is 500 *dirhams*. This blood money is called "*ghurra*." The term refers to an indemnity — compensation for loss incurred, the loss being the death of the unborn child, which the perpetrator caused. Islamic legal scholars (*fukahā*) have studied and produced treatises on the appropriate amount of blood money to be paid in cases of non-fatal bodily harm. These works contain detailed schedules of blood money as against bodily injuries, and they inform everyday practice in *Shari'a* jurisdictions. They are, perhaps, not unlike the resource materials used by American practitioners of Tort Law, when they are acting as counsel for plaintiffs or defendants in cases of injury.

## § 47.06 PROPERTY DAMAGE

Under the *Shari'a*, there is liability on the part of a perpetrator for all cases involving damage to the property of another.<sup>30</sup> This liability is a key way in which Islamic Law protects private property and the rights of its owners. As for the *ta'zir* (discretionary) punishment in a property damage case, i.e., the authorized claim against the perpetrator, not surprisingly it depends on facts and circumstances. The greater the degree of culpability, naturally the more severe the sanction a *qādi* is likely to select.

<sup>26</sup> See SCHACHT, *supra*, at 185.

<sup>27</sup> See SCHACHT, *supra*, at 185.

<sup>28</sup> See SCHACHT, *supra*, at 203–204.

<sup>29</sup> See SCHACHT, *supra*, at 203–204.

<sup>30</sup> See generally JOHN MANDIS, *ISLAMIC PROPERTY LAW* ch. VI (Durham, North Carolina: Carolina Academic Press, 2005) (concerning attacks on property ownership, including robbery, theft, usurpation, and nuisance, and discussing causation and the defense of necessity).

## § 47.07 PERJURY

In a criminal or civil case, it is possible that an Islamic judge (*qāḍī*) may end up rendering a decision based on — as it is later discovered — false evidence. That judgment, nevertheless, remains valid. Professor Schacht gives the example of a woman who gives false testimony to support her claim she is married to a particular man. A *qāḍī* renders a judgment in support of that claim. The judgment is valid and, therefore, the sexual intercourse between the woman and her “husband” is lawful.<sup>31</sup>

Suppose further that the woman (or other witness) who provides false testimony retracts it. The judgment still remains valid. However, the woman (or witness) could be held liable for damage caused by the judgment. (In the specific example, repudiation of a marriage that has been consummated would not be considered a remedy.)

There is no *hadd* penalty set forth for perjury (other than for false accusation of unlawful sexual intercourse, *kadhf*). Nor is there such a sanction for submitting false evidence. In other words, no *hadd* punishment is prescribed for lying in a legal proceeding. Unfortunately, this fact has led more than a few prejudiced observers to write off Muslim testimony or other evidence, as untrustworthy, or even to think of Islamic legal culture as not valuing truth.

In fact, the *Shari'a* does not condone mendacious behavior in court. It does not allow a liar on the witness stand, or a provider of false documents, to get off. Rather, three kinds of sanctions exist for perjury or otherwise providing false evidence:<sup>32</sup>

- (1) The perjured testimony (or other false evidence) is publicly exposed — it is broadcast, in a sense. This public exposure is called “*ta'rīf*.”
- (2) According to at least some *Shari'a* scholars (*fukahā*), a perjurer (or provider of false evidence) is (or should be) imprisoned and beaten.
- (3) In some cases, if damage results from perjury (or other false evidence), then the perjurer (or provider of the evidence) is held liable for the damage.

In enforcing rules against perjury and false evidence, elements similar to those found in American Criminal Law exist. In particular, the testifier or evidence-provider must have known, at the time of speaking or submitting documents, that what he or she said or submitted was false. Further, the falsity must be about an important, or material, point.

## § 47.08 PROTECTED (MA'ŠŪM) OR NOT PROTECTED (HADR)?

All of the defenses are relevant to cases involving a *ḥaqq ādamī* offense. In addition, whether a sanction is imposed for a criminal transgression may depend on the nature of the victim. In particular, liability for a civil wrong (tort), or *jinayā*,

<sup>31</sup> See SCHACHT, *supra*, at 196.

<sup>32</sup> See SCHACHT, *supra*, at 187.

exists only if the victim is protected by Islamic Criminal Law. There is no liability for an offense, including homicide (*katl*), committed against an unprotected person. Those persons whose blood is protected are called “*ma'šūm*.” Those persons whose blood is not protected are called “*hadr*.”

Only if the victim is within the category of “*ma'šūm*” is liability visited on the perpetrator. Who would be considered unprotected (“*hadr*”)? There are several examples offered by Professor Schacht:<sup>33</sup>

- An enemy alien, that is, a “*harbi*.”
- A perpetrator-victim, that is, one who died or was injured as a result of another person acting in self-defense.
- A perpetrator who is executed through the carrying out of a *hadd* punishment. Similarly, a perpetrator who dies from the infliction of a *ta'zir* punishment.
- A victim of a crime of passion (to use the Civil Law term), *e.g.*, a wife and her lover killed by the husband who was surprised to find them engaged in unlawful sexual intercourse. (That is, traditionally under the *Shari'a*, a husband is not liable for killing his wife and her lover whom he is surprised to find together in unlawful intercourse.)

These examples, and the threshold distinction between protected and unprotected persons, are the antithesis of a principle of American Law: equal justice under law.

To be sure, that principle is not always followed perfectly, sometimes to the detriment of Muslim minorities living in the United Kingdom and United States. Nevertheless, the principle — inscribed in the front of the United States Supreme Court — is perhaps the most defining characteristic of American legal culture. Ironically, given the secular nature of American Law, equal justice under law is based on a yet more fundamental axiom: all persons are entitled to equal human dignity because they are created in the image and likeness of God.

## Chapter 48

### LAW OF WAR

---

[A]n excessive increase in military expenditure risks accelerating the arms race, producing pockets of underdevelopment and desperation, so that it can paradoxically become a cause of instability, tension and conflict. As my venerable Predecessor [Pope] Paul VI wisely observed [in the Encyclical Letter, *Populorum Progressio*, at 87], “the new name for peace is development.” *States are therefore invited to reflect seriously on the underlying reasons for conflicts, often provoked by injustice, and to practice courageous self-criticism.*

Message of His Holiness Pope Benedict XVI for the Celebration of the World Day of Peace, *Fighting Poverty to Build Peace*, 1 January 2009, ¶ 6 (emphasis added)

#### SYNOPSIS

##### § 48.01 CONFLICTING QUR'ĀNIC PASSAGES ABOUT CONFLICT?

- [A] Three Sword Verses and Orientalist Fallacy
- [B] Other Aggressive Passages
- [C] Passages Championing Non-Violence and Reason
- [D] Bottom Line and Just War Theory

##### § 48.02 OVERVIEW

- [A] Shaybānī's 8th Century *Siyar*, But an Inchoate Scheme
- [B] Bifurcation and Framework Questions

##### § 48.03 BIFURCATION OF WORLD

- [A] *Dār al-Islām* (Abode of Peace — Muslims)
- [B] *Dār al-Ḥarb* (Abode of War — Non-Muslims)

##### § 48.04 ANSWERS TO FRAMEWORK QUESTIONS

- [A] Who Must Fight?
- [B] When Must Muslims Fight? Against Whom Must They Fight?
- [C] How May The Enemy Be Dealt With?
- [D] Where Do Muslims Find The Enemy?
- [E] By What Means May Military Success Be Pursued?
- [F] How Is Success Defined?

[B] Problem of Religious Freedom

[B] Equality and Inequality

#### § 48.06 REBELLION (BAGHI)

### § 48.01 CONFLICTING QUR'ĀNIC PASSAGES ABOUT CONFLICT?

#### [A] Three Sword Verses and Orientalist Fallacy

An Islamic legal perspective on International Law is not easily distilled from the Qur'ān. Islamic Law contains a number of rules on the subject of what in the Anglo-American characterization of International Law would be called the "Law of War." These rules, and the Qur'ānic passages on which they purportedly are based, are controversial.

Like radicals in other faiths, Muslim extremists resort to and distort the letter, spirit, and context of key verses of their sacred text. Like the fanatics they are, they focus unceasingly and uncompromisingly on what are known as the "Sword Verses," using them to justify terrorism.<sup>1</sup> These Verses also are cited by some non-Muslim authors to support their claim that Islam is inherently prone to violence, or Islam condones terrorist actions. Read and interpreted carefully, however, that claim is parlous, if not specious.

The first Sword Verse is specifically known as the "Taxation" or "*Jizyah*" Verse, and is *surah* 9, *ayah* 29:

Fight those of the People of the Book who do not [truly] believe in God and the Last Day, who do not forbid what God and His Messenger have forbidden, who do not obey the rule of justice until they pay the tax [*jizyah*] and agree to submit.<sup>2</sup>

One way to interpret the *Jizyah* Verse is to examine the operative imperative verb: "fight." Does it mean a violent struggle? It can mean reasoned argumentation. If People of the Book (*ahl al kitāb*) violate the law or do not pay *jizyah*, the rational response might be to treat infractions as law enforcement matters, prosecuting individual violators under the *Shar'ā*, rather than launching a holy war against the entire community.

Another way to look at the *Jizyah* Verse, which is not inconsistent with the first approach, is to see it in historical context. It speaks directly to the time period when Islam was expanding out from the Hejaz to the rest of the Arabian Peninsula. At the time, the Prophet and his Companions (*Ṣaḥābah*) gave the Jews and Christians of

<sup>1</sup> See, e.g., MARY R. HARECK, KNOWING THE ENEMY: JIHADIST IDEOLOGY AND THE WAR ON TERROR 43–44 (New Haven, Connecticut: Yale University Press 2006). See also MICHAEL A. PALMER, THE LAST CRUSADE: AMERICANISM AND ISLAMIC REFORMATION 30 (2007) (discussing how the Qur'ān, with a misunderstanding of the greater *jihād*, provides the option of violence towards non-believers).

<sup>2</sup> THE QUR'ĀN — A New Translation by M.A.S. Abdel Haleem (Oxford, England: Oxford University Press, 2004), 9:29 at 118. [Hereinafter, QUR'ĀN.]

Arabia two choices: war, or protected submission to the rule of the Muslims.<sup>3</sup>

For this protection, the nascent Islamic state taxed every able-bodied male non-Muslim. "*Jizyah*," a noun which means "compensation," was used to fund the Muslim army and state.<sup>4</sup> Every Muslim was required to pay *zakāt* (one of the Five Pillars of Islam), which went directly to the funding of the Muslim state. Non-Muslims had no religious obligation to pay *zakāt*. They paid the *jizyah* in lieu of *zakāt*, as a tax for living in the state. Professor Abdel Haleem explains:

Etymologically, "*jizya*" means "payment in return," related to "*jaza*," meaning "reward," i.e., in return for the protection of the Muslim state with all the accruing benefits and exemption from military service, and such taxes on Muslims as *zakah*.<sup>5</sup>

The *jizyah* cannot be analogized to a federal or state tax on working citizens in the United States today, because that tax is imposed in a religiously neutral manner. But, the idea of paying a levy in exchange for government services, including defense, is the same.

Accordingly, the *Jizyah* Verse can be circumscribed to its historical context. It is not a general command to force all non-Muslims to convert, nor to pay the tax. Before the *jizyah* can even be implemented, the existence of a true Islamic state is necessary. Most Islamic scholars believe no such state exists today, i.e., the prerequisite is missing. So, it would be entirely wrong-headed to "fight" non-Muslims until they pay *jizyah*. Would it be mistaken to humiliate non-Muslims when they pay the tax? In the past, some Muslim scholars have advocated this kind of obloquy. But, Professor Abdel Haleem counters: "it is clear from the context that they were unwilling to pay, and the clause simply means they should submit to paying the tax."<sup>6</sup>

The other two Sword Verses are collectively referred to as the "Slaying Verses."<sup>7</sup> They are found in two different passages of the Qur'ān, the first of which is *surah* 9, *ayah* 5. However, a proper rendition of this Slaying Verse requires an appreciation of the textual context, that is, of the two *ayah* immediately following it:

"When the [four] forbidden months are over, wherever [i.e., inside or outside the sanctuary in Mecca] you find the polytheists, kill them, seize them, besiege them, ambush them — but if they turn [to God], maintain the prayer, and pay the prescribed alms, let them go on their way, for God is most forgiving and merciful. <sup>6</sup>If any one of the polytheists should seek your

<sup>4</sup> See Wikipedia, *Jizya*, posted at <http://en.wikipedia.org/wiki/Jizya>.

<sup>5</sup> See QUR'ĀN, *supra*, fn. e at 118.

<sup>6</sup> See QUR'ĀN, *supra*, fn. f at 118.

<sup>7</sup> The discussion of the Slaying Verses is drawn in part from (1) a telephone interview by Jomana Qaddour with Hamed Ghazali, Ph.D., Adjunct Professor at the American Muslim University, Chairman of the Muslim American Schools (MAS) Council of Islamic Schools, and Director of the Houston Qur'an Academy (29 March 2009), and (2) About.com: Islam, posted at [http://islam.about.com/od/terrorism/t/terrorism\\_verse.htm](http://islam.about.com/od/terrorism/t/terrorism_verse.htm).

protection [Prophet], grant it to him so that he may hear the word of God — then take him to a safe place — for they are people with no knowledge. What sort of treaty could these polytheists make with God and His Messenger? As for those with whom you made a treaty at the Sacred Mosque, so long as they remain true to you, be true to them; God loves those who are mindful of Him.<sup>8</sup>

The Slaying Verse refers to the time period after the conquest of Mecca. Thus, it may be read in the context of a peace treaty between Muslims and polytheists (in effect, pagans).<sup>9</sup>

After that period, Muslims may pursue them “wherever” they are found, meaning inside or outside the Sanctuary at Mecca. But, if any polytheist accepts a monotheistic God, prays to Him, and pays alms, then Muslims are to leave them alone, recalling that God Himself is “most forgiving and merciful.” To infer from *surah* 9, *ayah* 5 that Muslims in contemporary times are supposed to launch offensive battles against monotheists of other faiths (e.g., Jews and Christians), or polytheists (who have nothing to do with a peace treaty of 1,400 years ago), is more than just a stretch.

Muslims believe that once Mecca was under Islamic control, God (Allāh) ordered the Prophet and his Companions (*Ṣaḥābah*) to allow only Muslims to live near the *Haram*, or Sacred Mosque. The location long had been considered a holy one, particularly since the time of the Abraham. All non-Muslims were asked to live in an area outside that location, even though some of them likely regarded the location as sacrosanct, too. But the order is said to have been issued and carried out in a peaceful manner. Pagan Meccans, some of whom had fought Muslims and expelled them from their homes previously, resented the Muslims presence in Mecca. Muslims further believe that out of concern violence might erupt, Allāh ordered non-Muslims to leave the *Haram* area. Non-Muslims were given a specific time period to leave the area. Only after that period expired were Muslims permitted to remove them physically.

Specifically, Muslims were not allowed to physically expel them until the passage of the so-called “forbidden months” (*Al-Ashhur Al-Hurum*). This reference may be interpreted in two ways. It could be a specific, historically-contextual period: a cease-fire period spelled out in the peace treaty between Muslims and polytheists. Only after the passage of these months could Muslims forcefully remove non-Muslims, if necessary. Alternatively, the “forbidden months” could be a general, ahistorical period during which fighting is prohibited for Muslims everywhere, every year, unless it is defensive warfare and measures must be taken for the protection of life. The difference between the two readings is irrelevant in respect of one key point. Whether the hiatus in combat was a one-off event, or is a timeless instruction, this Slaying Verse does not provide either the context or reasoning for terrorist attacks, or offensive war, against non-Muslims.

<sup>8</sup> See Qur'an, *supra*, 9:5-7 at 116-117.

<sup>9</sup> See Qur'an, *supra*, fn. c at 116.

The second of the two Slaying Verses, which is the third of the three Sword Verses, is in *surah* 2, *ayah* 191. To understand it properly, it must be read in conjunction with the two *ayah* preceding it, and the two *ayah* following it:

<sup>190</sup>Fight in God's cause against those who fight you, but do not overstep the limits: God does not love those who overstep the limits. <sup>191</sup>Kill them wherever you encounter them, and drive them out from where they drove you out, for persecution is more serious than killing. Do not fight them at the Sacred Mosque unless they fight you there. If they do fight you, kill them — this is what such disbelievers deserve — <sup>192</sup>but if they stop, then God is most forgiving and merciful. <sup>193</sup>Fight them until there is no more persecution, and [your] worship is devoted to God. If they cease hostilities, there can be no [further] hostility, except toward aggressors. <sup>194</sup>A sacred month for a sacred month: violation of sanctity [calls for] fair retribution. So if anyone commits aggression against you, attack him as he attacked you, but be mindful of God, and know that He is with those who are mindful of Him.<sup>10</sup>

Ostensibly, the italicized *ayah* 191 justifies terrorist acts and random slaying of infidels. That is precisely the egregiously erroneous meaning many extremists impart. However, the vast majority of Muslims argue the verse was not intended to be plucked out of context and read in isolation. Islamic scholars have repeatedly emphasized the verse must be read in conjunction with *ayah* 190 and 193-194 for its intended meaning to be clear.

The scholars generally agree that *ayah* 190 sanctions only defensive killing, based on the plain meaning of its language, “fight . . . those who fight you.” Additionally, this *ayah* may be said to grant Muslims a permission that is historically time-bound. They can defend themselves forcefully, as a last resort, against the attacks of the *Quraysh* tribe, which kicked them out of their Meccan homes, stole their property, and took their goods as their own. Indeed, Muslims believe that before the revelation of this *ayah*, God (Allāh) had not given Muslims the right to strike back. Muhammad prohibited them from doing so until he had authority from Allāh to authorize a defensive struggle.

The next *ayah*, which extremists misunderstand and manipulate, reinforces the point that God (Allāh) sanctioned defensive attacks by Muslims, and allowed them the right to regain their liberty and property rights after they had been expelled from Mecca. In this same verse though, Allāh mentions that fighting opponents in the Sacred Mosque (the *Ka'ba*) is prohibited, unless absolutely necessary and the aggressors, the *Quraysh*, attack them there. Muslims believe Allāh despises oppression and injustice. Removal of these conditions is important, but so too are the means for removal. In the historical context of early Islam and Mecca, Muslims were not asked to sit and sulk at their situation. They were called to preach against it, and if peaceful measures failed, to take back physically their property. Muslims further believe if they had not been confronted with resistance, then surely Allāh would not have ordered their retaking of property by force. That is, only because they endured violence could they resort to force themselves.

<sup>10</sup> See Qur'an, *supra*, 2:190-194 at 21-22.

Despite the permission granted in *ayah* 191 to fight a defensive battle, *ayah* 192 immediately follows with an important message: if they do not fight you or resist your right to take back your property, then you are not allowed to fight them back. Herein lies a hallmark principle of justice — the rule of proportionality: only engage in force that is commensurate and sufficient to regain lost rights. (This rule is repeated in *surah* 22, *ayah* 60.) *Ayat* 193-194 conclude by emphasizing eradication of injustice, specifically defined here to mean religious persecution against the then-emerging Islamic faith and nascent Islamic state. Muslims are instructed not be hostile toward anyone who was not actively hostile and oppressive towards them. Further, Muslims believe that at no point during the life of the Prophet did Muslims force non-Muslims to convert from another faith.<sup>11</sup>

In sum, *surah* 2, *ayah* 190-194 are set in the context of religious persecution against Muslims in the early days of Islam. The counsel this passage offers is to:

- (1) Fight in self-defense, i.e., in defense of the faith, if there is no peaceful means to counter the aggression,
- (2) Follow a rule of proportionality in such a fight,
- (3) Cease fighting, and thereby discontinue defensive attacks, when the oppression is eliminated or the aggressor sues for peace.

This second of the Slaying Verses is not a timeless, universal invitation for Muslims to kill non-Muslims.

Overall, understanding the true letter, context, and spirit of the Sword Verses highlights the distortion rendered to them by Islamic extremists. Perverting the message of Islam, they turn these passages into a call for "*jihad*," which itself is a term they torture. In truth, the narrative understood and accepted by most Muslims about the Sword Verses is a historically contextual one: early Muslims were not permitted to attack members of the *Quraysh* tribe without justification. It was that tribe, from which the Prophet hailed, which declared Muhammad an enemy of their society once he began to preach Islam openly. The *Quraysh* made life in Mecca so miserable as to force Muhammad and his followers to leave for Medina, in the *Hijra*. They treated harshly Muslims who lacked the financial means to migrate, or whose health would not permit a move. Thus, the majority of Muslims believe in these unique circumstances, God (Allāh) permitted the first Islamic community (*ummah*) and their fledgling state, led by Muhammad, to fight those who fought them. Even if the Sword Verses are taken out of historical context, and applied to modern times, the prerequisites they embody are critical. A Muslim state is not allowed to wage war offensively against non-Muslims. Any defensive struggle can occur only within the limits set by the Verses. Even further from the Sword Verses are violent actions by extremists to kill innocent non-Muslims.

Is there a problem with interpreting the Sword Verses, or indeed any Qur'anic passage, in its historical context and restricting it to a particular time and place? The question suggests the answer: yes, because this mode of interpretation detracts from the timeless and universality of the sacred text. To explain away a controver-

sial passage as pertinent only to unique circumstances of yesteryear is to call into question the enduring value of the text and its appeal to humanity. It also is to commit the Orientalist Fallacy, that is, to view the revelation of God (Allāh) to the Prophet as a response to particular cultural, political, religious, and social problems during the time of Muhammad.

Moreover, if the Sword Verses are to be explained contextually, then why not other passages, too? Where is the line between an *ayah* circumscribed by time and place and an *ayah* for all times and places? What criteria should be used to make this delineation? Who should establish the criteria and make it? These questions are especially troublesome if the Qur'an is understood to be the literal, inerrant Word of Allāh. They provoke thought, debate, and even disagreement, all of which can challenge a literalist approach. Catholic Christians are familiar with this problem, namely, a slippery slope of exegesis of Biblical passages with insufficient structure, connection, and guidance. The result is deviant, and sometimes dangerous, interpretations. However, Catholic Christianity holds that while the Bible contains the inspired Word of God, not every verse in it is the literal Word of God. It is correct to delimit some Biblical passages according to historical time and geographic place, but to appreciate others as boundless.

## [B] Other Aggressive Passages

Aside from the controversial Sword Verses, there are a number of aggressive verses in the Qur'an that relate to the Islamic Law of War. They are as follows:

- *Surah* 2, *ayah* 216:

[Say, Prophet:] "Fighting is ordained for you, though you dislike it. You may dislike something although it is good for you, or like something although it is bad for you: God knows, and you do not."<sup>12</sup>

- *Surah* 2, *ayah* 217:

They ask you [Prophet] about fighting in the prohibited month [*Ramadhān*]. Say, "Fighting in that month is a great offense, but to bar others from God's path, to disbelieve in Him, prevent access to the Sacred Mosque, and expel its people, are still greater offenses in God's eyes: persecution is worse than killing." They will not stop fighting you [believers] until they make you revoke your faith, if they can. If any of you revoke your faith and die as disbelievers, your deeds will come to nothing in this world and the Hereafter, and you will be inhabitants of the Fire, there to remain.<sup>13</sup>

- *Surah* 5, *ayah* 33-34:

<sup>33</sup>Those who wage war against God and His Messenger and strive to spread corruption in the land should be punished by death, crucifixion, the amputation of an alternate hand and foot, or banishment from the land: a disgrace for them in this world, and then a terrible punishment in the

<sup>11</sup> See JOHN L. ESPOSITO, *UNHOLY WAR: TERROR IN THE NAME OF ISLAM* 66 (New York, New York: Oxford University Press, 2002).

<sup>12</sup> QUR'AN, *supra*, 2:216 at 24.

<sup>13</sup> QUR'AN, *supra*, 2:217 at 24.

Hereafter, <sup>34</sup>unless they repent before you overpower them: in that case bear in mind that God is forgiving and merciful.<sup>14</sup>

- *Surah 5, ayat 36-37:*

<sup>36</sup>If the disbelievers possessed all that is in the earth and twice as much again and offered it to ransom themselves from torment on the Day of Resurrection [Judgment], it would not be accepted from them: they will have a painful torment. <sup>37</sup>They will wish to come out of the Fire but they will be unable to do so: theirs will be a lasting torment.<sup>15</sup>

- *Surah 5, ayah 51:*

You who believe, do not take the Jews and Christians as allies: they are allies only to each other. Anyone who takes them as an ally becomes one of them — God does not guide such wrongdoers. . . .<sup>16</sup>

- *Surah 8, ayat 12-14:*

<sup>12</sup>Your Lord revealed to the angels: "I am with you: give the believers firmness; I shall put terror into the hearts of the disbelievers. Strike above their necks and strike their fingertips." <sup>13</sup>That was because they opposed God and His Messenger, and if anyone opposes God and His Messenger, God punishes them severely — <sup>14</sup>That is what you get! Taste that!" — and the torment of the Fire awaits the disbelievers.<sup>17</sup>

- *Surah 8, ayat 38-40:*

<sup>38</sup>[Prophet], tell the disbelievers that if they desist their past will be forgiven, but if they persist, they have an example in the fate of those who went before. <sup>39</sup>[Believers], fight them until there is no more persecution, and [your] worship is devoted to God alone: if they desist, then God sees all that they do, <sup>40</sup>but if they pay no heed, be sure that God is your protector, the best protector and the best helper.<sup>18</sup>

- *Surah 8, ayat 60-62:*

<sup>60</sup>Prepare whatever forces you [believers] can muster, including warhorses, to frighten off God's enemies and yours, and warn others unknown to you but known to God. Whatever you give in God's cause will be repaid to you in full, and you will not be wronged. <sup>61</sup>But if they incline towards peace, you [Prophet] must also incline towards it, and put your trust in God: He is the All Hearing, the All Knowing. <sup>62</sup>If they intend to deceive you, God is enough for you: it was He who strengthened you with His help.<sup>19</sup>

- *Surah 8, ayah 65:*

<sup>14</sup> Qur'an, *supra*, 5:33-34 at 71.

<sup>15</sup> Qur'an, *supra*, 5:36-37 at 71.

<sup>16</sup> Qur'an, *supra*, 5:51 at 73.

<sup>17</sup> Qur'an, *supra*, 8:12-14 at 111.

<sup>18</sup> Qur'an, *supra*, 8:38-40 at 112.

<sup>19</sup> Qur'an, *supra*, 8:60-62 at 114.

Prophet, urge the believers to fight: if there are twenty of you who are steadfast, they will overcome two hundred, and a hundred of you, if steadfast, will overcome a thousand of the disbelievers, for they are the people who do not comprehend.<sup>20</sup>

- *Surah 22, ayat 39-40:*

<sup>39</sup>Those who have been attacked are permitted to take up arms because they have been wronged — God has the power to help them — <sup>40</sup>those who have been driven unjustly from their homes only for saying "Our Lord is God." If God did not repel some people by means of others, many monasteries, churches, synagogues, and mosques, where God's name is much invoked, would have been destroyed. God is sure to help those who help His cause — God is strong and mighty. . . .<sup>21</sup>

- *Surah 47, ayat 4-5:*

<sup>4</sup>When you meet the disbelievers in battle, strike them in the neck, and once they are defeated, bind any captives firmly — later you can release them by grace or ransom — until the toils of war have ended. That [is the way]. God could have defeated them Himself if He had willed, but His purpose is to test some of you by means of others. He will not let the deeds of those who are killed for His cause come to nothing; <sup>5</sup>He will guide them and put them into a good state. . . .<sup>22</sup>

- *Surah 61, ayah 4:*

. . . God truly loves those who fight in solid lines for His cause, like a well-compacted wall.<sup>23</sup>

Like the Sword Verses, the above-quoted passages contribute to a widespread belief, or prejudice that Islam is an inherently violent religion, or at least prone to violence.

However, bifurcation of the world into two camps did not first begin with the rhetoric of President George W. Bush's administration following the terrorist attacks of 11 September 2001. Self-evidently, the tone of the above-quoted Qur'ānic passages, like the Sword Verses, is harsh. There is a clear division of "us-versus-them," an unmistakable line that "if you are not for us, then you are against us." The contrast between these passages, on the one hand, and the New Testament on the other, is stark and troubling. Even in respect to the Old Testament, none of the above Qur'ānic passages has an optimistic prophecy like that of Isaiah, of nations beating their swords into plowshares, their spears into pruning hooks, and not training for war anymore.<sup>24</sup> The contrast adds fuel to the stereotypical fire concerning Islam and violence. A similar contrast can be drawn with the scriptures

<sup>20</sup> Qur'an, *supra*, 8:65 at 114.

<sup>21</sup> Qur'an, *supra*, 22:39-40 at 212.

<sup>22</sup> Qur'an, *supra*, 47:4-5 at 331.

<sup>23</sup> Qur'an, *supra*, 61:4 at 370.

<sup>24</sup> See *The Book of Isaiah*, 2:4, in *THE CATHOLIC STUDY BIBLE* 881 (New York, New York: Oxford University Press, 1990, New American Bible trans.). [Hereinafter, *BIBLE*.]

of Buddhism, in which there is no delineation between "you" and "me," because there is no concept of the "self" (i.e., the "self" has no permanent identity). Rather, there is a oneness to beings, all of whom are related, and consequently, each person must guard against attachment to the material world and avoid the illogic of hating another. In brief, the sense of peace, harmony, and tranquility conveyed by the New Testament or Buddhist texts simply is lacking in the passages.

Yet, without apologizing for the Qur'anic passages, the analysis of them must not end here; otherwise, the stereotype remains without a full assessment. First, there is an irony that the same misimpression would be conveyed about Catholic Christianity if certain passages were plucked out of the Old Testament. "Isn't Catholicism a violent religion?" it would be asked, if all the stories of battles and conquest, and spears and swords (without the ploughshares), were the end of the story. But, they are not. The above-quoted Qur'anic passages, if read literally, blindly, and in isolation, present a one-sided picture of the Islamic Law of War. That is no less true of certain Old Testament passages, which if read strictly, uncritically, and out of context, convey a misleading sense of the Christian approach to war.

Second, devoting a modicum of modern legal construction skills to the Qur'anic passages suggests how they can be misconstrued.<sup>25</sup> *Surah 2, ayah 217*, and *surah 47, ayat 4-5* are not incitements to Muslims to commence offensive attacks against non-Muslims. *Surah 2, ayah 217* is a declaration about the risk of apostasy. This verse also reinforces a message in one Sword Verse, *surah 2, ayah 191*. As Professor Abdel Haleem states:

To persecute people for believing in God is a worse offense than for the aggrieved party to fight back in the prohibited month. This further explains verse 191.<sup>26</sup>

Similarly, *surah 47, ayah 4* assumes a battle with disbelievers, but does not say Muslims should start the fight. And, it specifies release of conquered disbelievers first, as a preferred method for dealing with them, over release by ransom.<sup>27</sup> *Surah 8, ayat 38-40* and *ayah 60-62* may be understood in a similar vein. The context is persecution and preparation for it, and *surah 8, ayah 39* is redolent of one of the Sword Verses, *surah 2, ayat 191-193*.<sup>28</sup> These passages suggest persuasion, not

<sup>25</sup> A number of other passages in the Qur'an, not quoted above, simply do not amount to anything close to a call to arms for Muslims to engage in violent campaigns against non-Muslims. See, e.g., 9:111, 9:113, 21:11-15, 48:29, 55:46-58, 61:11-13, and 111:1-3. Such passages tend to be strong admonitions against disbelief and/or doing evil, reminders of a basic tenet of the Qur'an, namely, which is that a Day of Judgment is coming, or metaphorical descriptions of Paradise for believers. Arguably, they are especially addressed to pagans at the time they were revealed. *Surah 33, ayah 50*, explains that Muhammad is permitted to marry a slave God (Allah) assigned to him as a result of a war. Plainly, it is circumscribed to that context, and on certain occasions such marriages were done to bolster peace with other tribes. Additionally, *surah 8, ayah 67* is an outright bar for any prophet to take captives before conquering a territory, from which the inference may be drawn that hostage-taking in the territory of another is wrong.

<sup>26</sup> See Qur'an, *supra*, fn. a to 2:217 at 24.

<sup>27</sup> See Qur'an, *supra*, fn. a to 47:4 at 331.

<sup>28</sup> See Qur'an, *supra*, fn. b to 8:39 at 112.

violence, as a first-best solution. Notably, they exhort Muslims to put their trust not in armaments, but in God (Allah).

*Surah 2, ayah 36-37* and *surah 8, ayah 12-14* are not calls to arms, but hellfire-and-brimstone warnings against atheism in general, and — arguably — disbelief in Islam. Both passages explicitly presume it is God (Allah) who judges. By inference, man is not to put himself in an equal position. As for *surah 2, ayah 216*, "fighting" that is "ordained" for Muslims can refer to the *jihād al akbar*, i.e., the struggle to discern the Will of God (Allah) and conform to it, which is an internal struggle with one's own emotions and passions. The same remark holds for *surah 61, ayah 4*, and *surah 8, ayah 65*. Additionally, *surah 61, ayah 4* may be read as a metaphor not to lose courage in the internal struggle. The gist of *surah 8, ayah 65* is that Truth prevails. It is redolent of the Catholic Christian adage that the Truth is the Truth even if only one person believes it, and falsehood is falsehood even if 100 people believe it. Similarly, *surah 5, ayah 33-34* is not about war in the conventional sense. It is akin to a Criminal Law statute establishing crimes against society (*hirabah*), particularly highway robbery (*kat' al-tariq*).

Read according to the plain meaning of the word "ally" rendered in modern times, the language of *surah 5, ayah 51* suggests Muslims cannot be "allies" with Jews and Christians. However, the reference is to "those who are against the Muslim camp," and bases his conclusion on the subsequent *ayah* up to verse 59.<sup>29</sup> Moreover, *ayah 51* is a rule of non-discrimination, which is made clear by *surah 4, ayah 144*. Muslims are not to become allies with Jews and Christians in preference to other Muslims. Even as such, the *surah 5, ayah 51* is not an incitement to wage war with the other faiths. As for *surah 22, ayat 39-40*, plainly this passage is about self-defense. Moreover, *ayah 40* specifically refers favorably to "churches" and "synagogues," including them with mosques as places where God is invoked, and therefore indicating why they are not "destroyed."

### [C] Passages Championing Non-Violence and Reason

No doubt the language and tone of the above-quoted passages are harsh. But, to use an American colloquial expression, that does not make them "fighting words." Moreover, these passages ought to be juxtaposed with other Qur'anic verses that champion non-violence and reason. They include:

- *Surah 2, ayah 62*:

The [Muslim] believers, the Jews, the Christians, and the Sabians [a monotheistic religious community] — all those who believe in God and the Last Day and do good — will have their rewards with their Lord. No fear for them, nor will they grieve.<sup>30</sup>

- *Surah 2, ayah 256*:

<sup>29</sup> See Qur'an, *supra*, fn. a to 5:51 at 73.

<sup>30</sup> Qur'an, *supra*, 2:62 at 9.

There is no compulsion in religion: true guidance has become distinct from error, so whoever rejects false gods and believes in God has grasped the firmest hand-hold, one that will never break.<sup>31</sup>

- *Surah 5, ayah 69:*

The [Muslim] believers, the Jews, the Sabians, and the Christians — those who believe in God and the Last Day and do good deeds — will have nothing to fear or to regret.<sup>32</sup>

- *Surah 10, ayah 99-100:*

<sup>99</sup>Had your Lord willed, all the people on the earth would have believed. So can you [Prophet] compel people to believe? <sup>100</sup>No soul can believe except by God's will, and He brings disgrace on those who do not use their reason.<sup>33</sup>

- *Surah 16, ayah 125-128:*

<sup>125</sup>[Prophet], call people to the way of your Lord with wisdom and beautiful teaching. Argue with them in the most courteous way, for your Lord knows best who has strayed from His way and who is rightly guided. <sup>126</sup>If you [people] have to respond to an attack, make your response proportionate, but it is best to stand fast. <sup>127</sup>So [Prophet] be steadfast: your steadfastness comes only from God. Do not grieve over them; do not be distressed by their scheming, <sup>128</sup>for God is with those who are aware of Him and who do good.<sup>34</sup>

- *Surah 41, ayah 34-36:*

<sup>34</sup>Good and evil cannot be equal. [Prophet], repel evil with what is better and your enemy will become as close as an old and valued friend, <sup>35</sup>but only those who are steadfast in patience, only those who are blessed with great righteousness, will attain to such goodness. <sup>36</sup>If a prompting from Satan should stir you, seek refuge with God: He is the All Hearing and All Knowing.<sup>35</sup>

- *Surah 52, ayah 44-45:*

<sup>44</sup>Even if they [the disbelievers] saw a piece of heaven falling down on them, they would say, "Just a heap of clouds," <sup>45</sup>so leave them, Prophet, until they face the Day when they will be thunderstruck.<sup>36</sup>

- *Surah 52, ayah 47-48:*

<sup>31</sup> Qur'an, *supra*, 2:256 at 29.

<sup>32</sup> Qur'an, *supra*, 5:69 at 74.

<sup>33</sup> Qur'an, *supra*, 10:99-100 at 135.

<sup>34</sup> Qur'an, *supra*, 16:125-128 at 174.

<sup>35</sup> Qur'an, *supra*, 41:34-36 at 309.

<sup>36</sup> Qur'an, *supra*, 52:44-45 at 346.

<sup>47</sup>Another punishment awaits the evildoers, though most of them do not realize it. <sup>48</sup>Wait patiently [Prophet] for your Lord's judgment: you are under Our watchful eye.<sup>37</sup>

- *Surah 73, ayah 9-14:*

<sup>9</sup>He is Lord of the east and west, there is no god but Him, so take Him as your Protector, <sup>10</sup>patiently endure what they [the disbelievers in Mecca] say, ignore them politely, <sup>11</sup>and leave to Me those who deny the truth and live in comfort. Bear with them for a little while. <sup>12</sup>We have fetters, a blazing fire, <sup>13</sup>food that chokes, and agonizing torment in store for them <sup>14</sup>on the Day when the earth and the mountains will shake. . . .<sup>38</sup>

Evidently, these passages are humble and pacifist in tone. True, there is still a bifurcation of the world into believers and non-believers. But, the universe of believers is not an exclusively Islamic one. And, the strategy for dealing with this division is non-violent.

*Surah 2, ayah 62* and *surah 5, ayah 69* are inclusive. They assure Muslims, Christians, and Jews that if they follow their monotheistic faith and do good works, they will be rewarded with eternal life. None of these verses provides any basis for attacking the other faiths. *Ayah 256* from that *surah* is the famous statement against forcible conversion. *Surah 10, ayah 100* expressly signifies the importance of reason, going so far as to indicate God (Allāh) will punish those who fail to use this faculty.

The strategy of non-violence is clear in *surah 16, ayah 125-128*. This beautifully-worded passage stresses courtesy in discourse, a non-judgmental attitude, and violence only in self-defense — and then only in keeping with the rule of proportionality. In *surah 41, ayah 34-36*, God (Allāh) tells the Prophet not to return evil for evil, but rather evil for good, a precept in the New Testament, in *The Letter to the Romans* from Saint Paul:

<sup>17</sup>Do not repay anyone evil for evil. . . . <sup>21</sup>Do not be conquered by evil but conquer evil with good.<sup>39</sup>

Muhammad is promised that following the path of goodness leads to the conversion of an enemy to a trusted friend, and admonished that taking this course means resisting devilish temptations. Along with *surah 10, ayah 100*, *surah 16, ayah 125-128* and *surah 41, ayah 34-36* are firm textual bases for the proposition Islam has space for both faith and reason.

Likewise, in *surah 52, ayah 44-45* and *47-48*, and in *surah 73, ayah 9-14* God (Allāh) instructs Muhammad to be "patient" and "polite" with people who do not believe in the authenticity of the Message, and to leave Final Judgment to the Almighty. The non-violent counsel of *surah 52, ayah 44-45* is a response to a

<sup>37</sup> Qur'an, *supra*, 52:47-48 at 346.

<sup>38</sup> Qur'an, *supra*, 73:9-14 at 395.

<sup>39</sup> See *The Letter to the Romans*, 12:17, 21, in BIBLE, *supra*, at 246. See also *id.*, *The Third Letter of John*, 1:11 at 395 (stating: "Beloved, do not imitate evil but imitate good.")

challenge Meccans made to the Prophet: "to bring the heavens down on them, if he were truly God's Messenger."<sup>40</sup>

### [D] Bottom Line and Just War Theory

From the above-quoted passages, and considering the Sword Verses in light of them, an obvious question arises: in aggregate, how are they to be understood, i.e., what is the "bottom line"? This same question can be asked of Biblical passages on war and violence. The Old Testament is replete with aggressive verses, but the New Testament is not. Put in contemporary American legal parlance, it is clear to Catholic Christians that the latter supersedes the former to the extent of a true inconsistency. Put in religious terms, the New Covenant of the Gospels, namely, the Two Great Commandments, to love God, and to love one's neighbor, obviously call for non-violence in all but the most extreme, defensive cases. It replaces all the old covenants. Accordingly, Catholics are exhorted to know their faith with clarity, defend it with dignity, and share it with charity. Violence, particularly when it is offensive in nature, is antithetical to dignity and charity.

To be sure, there are cases in which violence, used defensively, may be legitimate. But, such cases require rigorous analysis under what is known as "Just War Theory" (*Bellum Iustum*), as worked out by Saint Augustine (354-430 A.D.), Saint Thomas Aquinas (1225-1274), and others. The *Catechism of the Catholic Church* synthesizes the criteria for the morally legitimate use of self-defense by military force:

- the damage inflicted by the aggressor on the nation or community of nations must be lasting, grave, and certain;
- all other means of putting an end to it must have been shown to be impractical or ineffective;
- there must be serious prospects of success;
- the use of arms must not produce evils and disorders graver than the evil to be eliminated. The power of modern means of destruction weighs very heavily in evaluating this condition.<sup>41</sup>

Thus, the analysis from a Catholic Christian perspective typically boils down to whether defense of the faith by violent means is necessary as a last resort, or whether there other non-violent means that can be pursued, and assurance that any violence is proportionate to the initial infraction and enough to end it.

The question about what is the "bottom line" is not so easy to resolve in Islamic Law. There is no analogous "old" and "new" covenant, nor any clear indication in the Qur'an itself that one verse is an exception to another, or circumscribes another. Forgiveness and mercy are prime virtues. But, the Qur'an contains no unequivocal injunction to "turn the other cheek" in the context of persecution. Weighing all of the relevant verses becomes a matter of Qur'anic interpretation.

<sup>40</sup> Qur'an, *supra*, fn. c to 52:44 at 346.

<sup>41</sup> CATECHISM OF THE CATHOLIC CHURCH § 2309 at 556 (United States Catholic Conference, Inc., Washington, D.C.: Libreria Editrice Vaticana, 2d ed. 1997).

Different Muslim *ulema* and *fukahā'* have different opinions. That is not to say all such opinions are equally good and well-reasoned, any more than views on Just War Theory among Catholic scholars are equally persuasive. To add to the scope and difficulty of the enterprise, the Qur'anic passages need to be read in light of non-prophetic utterances of Muhammad (*hadith*).

## § 48.02 OVERVIEW

### [A] Shaybānī's 8th Century *Siyyar*, But an Inchoate Scheme

The teachings of Islam do not provide an all-encompassing picture of International Law. The *Shari'a* does not cover certain topics that would be found in a conventional, contemporary, non-Muslim textbook on Public International Law, such as treaty interpretation, statehood, jurisdiction among states, and international organizations. International Law traditionally involves sovereign state actors, a topic largely unaddressed by the *Shari'a*. To be sure, recent developments in International Relations (IR) theory highlight the increasingly prominent role of non-state actors, such as multinational corporations and non-governmental organizations, and challenge the idea of sovereignty itself. But, even IR theory acknowledges the often pre-eminent role of state actors. There is a body of theory in the *Shari'a* on Constitutional Law matters. But, this theory has not been translated extensively into actual organization and operation. Thus, as a practical matter, Islamic Law has not dealt much with the nature and operation key of constituent elements in the international legal order — sovereign states.

However, the *Shari'a* does deal with a key topic covered in a conventional text, namely, the Law of War. That coverage is noteworthy because war is the oldest and most challenging problem in the international legal arena. It also is significant because it long pre-dates scholarship in Europe, including by Alberico Gentili (1552-1608 A.D.), Hugo Grotius (1583-1645), and Francisco de Vitoria (1492-1546), who are conventionally credited with laying the foundations for Public International Law.<sup>42</sup> Indeed, a provocative 2005 book, *How the Catholic Church Built Western Civilization*, notes Francisco de Vitoria, a Catholic Priest and Professor, "earned the title of father of international law."<sup>43</sup> Yet, in the 8th century, an eminent *Hanafi* School scholar, Muhammad ibn al Hasan al Shaybānī (749/50-805), wrote the first major treatise on the Islamic Law of Nations.

The title of Shaybānī's treatise is "*Kitab Al Siyyar Al Kabir*," or simply "*Siyyar*," and this work has been translated into English with commentary.<sup>44</sup> Shaybānī was a student of Imām Hanīfa and Abū Yusuf. The *Siyyar* carefully considers the conditions of war and peace, sets out principles for the conduct of military action and peace negotiations, and elaborates on the rules for treating non-Muslims in

<sup>42</sup> See, e.g., Hugo Grotius, WIKIPEDIA, posted at [http://en.wikipedia.org/wiki/Hugo\\_Grotius](http://en.wikipedia.org/wiki/Hugo_Grotius) (saying the three scholars "laid the foundations for international law, based on natural law").

<sup>43</sup> THOMAS WOODS, *HOW THE CATHOLIC CHURCH BUILT WESTERN CIVILIZATION* 5-6 (Washington, D.C.: Regenery, 2005).

<sup>44</sup> See THE ISLAMIC LAW OF NATIONS — SHAYBĀNĪ'S *SIYYAR* (8th century A.D., Baltimore, Maryland: The Johns Hopkins Press, 1966) (Majid Khadduri, trans.).

Muslim-governed areas. Thus, as in many other fields of law, in Public International Law, European and American scholars are in considerable debt to their Muslim predecessors.

The impulse for Shaybānī to write the treatise was an evolution in Islam itself, from enlargement to consolidation. From inception, Islam was an expansionist religion, with adherents thinking of a permanent state of war between the Islamic and non-Islamic world. But, following the *Rashidun* Era and *Umayyad* Caliphate, it became apparent constant combat was not sustainable. Thus, writing during the *Abbasid* Caliphate, Shaybani set out to systematize rules of war and peace for a consolidated Islamic Empire.

Accordingly, the focus of the *Shari'a* in respect of International Law is on the Law of War, particularly wars of conquest. There are, of course, many other kinds of wars or armed conflict, such as defensive wars, civil wars, insurgencies, and rebellions. Significantly, Islamic Law does not envision war between Muslim countries.<sup>45</sup> True, Muslim countries have gone to war with one another. The 1980-88 Iran—Iraq War is one of several instances. Nevertheless, Islam foresees only a holy war (*jihād*). From the Islamic Law of War, a number of important doctrines arise. Most fundamentally, the Islamic perspective begins with the bifurcation of the world into *dār-al-Islām* (abode of peace) and *dār al-harb* (abode of war). As these two spheres of peace and war are unraveled, the principles of war and governance of conquered peoples begin to shape the landscape of what is now commonly called "Public International Law."

### [B] Bifurcation and Framework Questions

Obviously, war is hardly the only controversy in the international legal arena. The *Shari'a* is inchoate in that it "comes at" International Law from one particular angle, albeit an important one. One irony here should be noted at the outset: despite the attention Islamic Law pays to wars of conquest, the *Shari'a* rules on war have not always been applied in practice.<sup>46</sup> (Or, to put the point more charitably, application of the rules has not always been uniform.) Some wars have witnessed respect for the rules, while others revealed grave breaches of them. During the Crusades, Saladin gave medical help to his opponent, Richard the Lionheart of England. In the Iran-Iraq War, each side treated the other in the cruelest of manners. In fairness to orthodox Islamic doctrine, what set of rules is without exception, and when is a set of rules followed so rigidly to make circumnavigation impossible or impracticable? Further, some concepts in the *Shari'a* have succumbed to modernity in the face of issues not envisioned during their formation.

Ostensibly, the classical approach of Islam to the Law of War is straightforward. The *Shari'a* divides the world into just two categories:

- *Dār-al-Islām* (land of peace), and

- *Dār al-harb* (land of war).

Here, as with some Qur'anic passages, is an unequivocal separation of "us" from "them." Another irony is the mirror image of fundamentalist Islamic and certain neo-conservative American thinking: both convey the message that one is either "for us" or "against us."

However, carefully delving into the spheres of peace and war reveals that the rules — and their application — are not susceptible to a simple division. Moreover, there are contemporary Muslim scholars, like Tariq Ramadan in *Western Muslims and the Future of Islam* (2004), who argue Islam must move past this centuries-old bifurcation. Professor Ramadan says it is foolishly confrontational and stupidly simplistic in an era of globalization. Rather, Muslims should embrace the religious freedoms and protections guaranteed in western democracies. His thesis meets with resistance from some *ulema* and *fukahā'* who believe modification of the substance or application of rules is heresy. These purists believe Islam should not evolve with an ever-changing world. Rather, the ever-changing world should evolve to conform to true Islamic teachings.

A set of questions, when answered, yields a framework in which to organize, clarify, and synthesize the Islamic Law of War and appreciate its subtleties. These questions reflect the methodology of Professor John Kelsay, in *Islam and War* (1993):

- Who must fight?
- When must Muslims fight?
- Against whom must Muslims fight?
- How may the enemy (non-Muslims, or possibly Muslim rebels) be dealt with?
- Where do Muslims find the enemy (e.g., outside in the *dār al-harb*, or within the ranks in *dār-al-Islām*)?
- By what means is it permissible to pursue military success?<sup>47</sup>

Perhaps a final question, which no doubt receives some treatment in answering the preceding questions is: How is success defined?

In response to these questions, the common denominator is Qur'anic legislation seeks to put the Law of War on a religious and ethical footing. This legislation establishes moral norms, according to which certain kinds of behavior in the extreme conditions of war are allowed (*mubāh*), and other actions or omissions are forbidden (*ḥarām*).

<sup>45</sup> See JOSEPH SCHACHT, AN INTRODUCTION TO ISLAMIC LAW *id.* 2 at 130 (Oxford, England: Oxford University Press (Clarendon Paperbacks) 1982). [Hereinafter, SCHACHT.]

<sup>46</sup> See SCHACHT, *supra*, at 76.

<sup>47</sup> JOHN KELSAY, ISLAM AND WAR 60 (Knoxville, Tennessee: Westminster/John Knox Press, 1993). [Hereinafter, KELSAY.]

### § 48.03 BIFURCATION OF WORLD

The starting point for the Islamic Law of War is to recall that Islam divides the entire world into two parts. This division follows logically from, but is not specifically laid out in, certain Qur'anic passages, nor is it explicit in the *hadith*. Rather, it was *Imām* Abū Hanīfa who first suggested the division, and later Ibn Taymiyya who elaborated on it (through a treatise and edict) in response to Mongol invasions of the 13th and 14th centuries. In other words, the division crystallized during the early Islamic era, when the Gate to *Ijtihād* indisputably was open, and a few centuries thereafter.

The bifurcation is between abodes of peace and war, or Muslims and non-Muslims, respectively. But, it must be emphasized some contemporary Muslim scholars reject this distinction as having no firm foundation in the two primary sources of Islamic law. They argue it is irrelevant in an era of globalization, with protections afforded by International and Human Rights Law, and shudder at its sinister potential for violence.

#### [A] *Dār al-Islām* (Abode of Peace — Muslims)

The "*dār al-Islām*" is the abode, or home, of Muslims. Sometimes, the term used is "*dār es-salam*," which means "household of peace." In these geographical areas (i.e., countries, lands, or regions), Muslims can be confident of security and protection. However, in the *dār al-Islām*, there are three kinds of non-Muslims, too:

- (1) *Dhimmis* (sometimes called "Zimmis"). These people are "those in custody." In particular, they are persons in custody who agree to pay the "*jizyah*," or tax (tribute), which is based on *surah* 9, *ayah* 29 of the Qur'ān, and the *hadith*.
- (2) People of the *Hudna*. "*Hudna*" literally means a "truce," "armistice," or "cease fire" of a temporary nature. The term also can mean "calm" or "quiet." Thus, People of the *Hudna* are ones who signed a peace treaty with Muslims after being defeated by them in War.
- (3) A *Musta'min*, or Protected One. This person technically is an enemy alien, but he or she has been given a temporary safe-conduct, or safe-passage, permit (*amān*). Typically, a *musta'min* is one who comes into an Islamic country as a messenger, merchant, visitor, or student wanting to learn more about Islam.

The legal rights and obligations of a *musta'min* are the same as those of a *dhimmi*, with one exception. A *musta'min* need not pay any tribute to the appropriate Muslim government for one year. However, if a *musta'min* stays in the Islamic territory for longer than a year, he or she becomes a *dhimmi*, and thus is liable for the *jizyah*.

### [B] *Dār al-Ḥarb* (Abode of War — Non-Muslims)

The *dār al-ḥarb* is the home of non-Muslims. Literally, it is the abode of war, that part of the world hostile to Muslims. In these geographical areas (again, countries, lands, or regions), non-Muslims govern Muslims, whereas in the *dār al-Islām*, it is the reverse. Worse yet, from an Islamic perspective, in the *dār al-ḥarb*, non-Muslims exercise authority over Muslims in a way that does not ensure the safety and security of Muslims. Thus, the *dār al-ḥarb* is any realm in which people resist or otherwise stand in opposition to the legitimate goals of Islam.<sup>48</sup> Historically, this opposition has led to "war with a view [to] compelling nonbelievers to embrace [Islamic] doctrine. . . ."<sup>49</sup>

### § 48.04 ANSWERS TO FRAMEWORK QUESTIONS

#### [A] Who Must Fight?

Each Muslim has the duty to fight for Islamic values. The urgency of the situation defines the level of participation expected, i.e., what "fight" means in practice. It could be a *jihād al-akbar*, connoting an internal struggle to discern the Will of God, or it could be a *jihād* in the sense of a holy war. After all, in the realm of *dār al-ḥarb*, a set of values and obligations offensive and antithetical to Islam exists and conflict may ensue.

The relevant concept, in response to the question "Who must fight?" is "*farḍ kifāya*." This term means collective obligation, or a duty imposed on the *ummah*. This communal obligation is to provide necessary manpower (defined as adult males only) in the event of a conflict. Not all men are required to actually fight. Rather, some may (and are often encouraged) to take the role of sponsor. A sponsor, able-bodied or not, may do his part by providing supplies, weapons, horses and other necessities for war. The roles of sponsor and warrior are equally necessary functions and thus are equally praised.

Significantly, when an attack is from the outside and affects the realm of *dār al-Islām*, a stringent set of defensive values applies. In these situations, the obligation is that of *farḍ ayn*. This individual obligation is literally to do anything and everything for the sake of Islam. There is no division between warrior and sponsor. Everyone should serve as both in whatever capacity he or she can. Here, then, is another important distinction. Whereas, with a *farḍ kifāya* only adult male Muslims are required to act, with a *farḍ ayn* men and women are called on for whatever they can provide.<sup>50</sup> In effect, *farḍ kifāya* is relevant in an offensive operation, while *farḍ ayn* applies to a defensive struggle.

<sup>48</sup> See KELSAY, *supra*, at 61.

<sup>49</sup> ANDREW G. BOSTOM, M.D., *THE LEGACY OF JIHAD 282* (Amherst, New York: Prometheus Books, 2006). [Hereinafter, BOSTOM.]

<sup>50</sup> See KELSAY, *supra*, at 61.

### [B] When Must Muslims Fight? Against Whom Must They Fight?<sup>51</sup>

The questions of when, and against whom, Muslims must fight are inextricably linked. To some extent, these questions are answered through the concepts of *fard kifaya* and *fard ayn*. Defensive situations are more easily recognizable, making the question of when a Muslim must fight moot. The answer necessarily is "now." Also, when under attack, the issue of "who" Muslims must fight is readily apparent.

Non-defensive contexts present greater difficulties. *Fard kifaya* obligations are triggered by an offensive push of Muslims into new territory. What happens, or what is supposed to happen, is that Muslim forces make an offering to the enemy to embrace Islam as a religion, or in the alternative to accept Islam and pay *jizyah*. Otherwise, war ensues (or resumes) within the sphere of *dār al-ḥarb*, in which case Muslims are called upon to fulfill the obligations of *fard kifaya*.

Anyone in the territory of war who refuses the options presented is considered an enemy (*ḥarbī*), with two exceptions. Intuitively, an enemy does not include a Muslim already living in *dār al-ḥarb*. Additionally, women and children are added to the category of the protected.<sup>52</sup> These protections are not a blanket one. Rather, they are limited to protection from intentional killing. Note also that even in the case of a Muslim living in the territory of war, if that person was killed unintentionally, or the killing was merely coincidental to the main object of the battle (so-called "collateral damage"), then the killing was justified, or at least not prohibited.<sup>53</sup>

To take a hypothetical example, suppose Pakistan attacks India, as it has done four times since the two countries were created by the British Partition on 15 August 1947.<sup>54</sup> Suppose further that Pakistani troops penetrate the Wagah Border in Punjab, which they have never done, and capture Amritsar. Assuming Pakistan applied the traditional *Shari'a* rules, women, children, and Muslims living in Amritsar would be protected from intentional killing. Sikhs, Hindus, Christians, and all other non-Muslims would not be protected. Their choice would be to convert to Islam, acquiesce to the Pakistani authority and pay a tax to it, or be treated as an enemy (meaning death).

### [C] How May The Enemy Be Dealt With?

The response to this question is, perhaps, the most important aspect of the Islamic Law of War. The response shapes how the Muslim community views non-Muslims. The starting premise is there are two categories of enemies:

<sup>51</sup> Professor Kelsay does not combine these questions as is done above, but it is reasonable to organize and synthesize them conceptually, as they overlap.

<sup>52</sup> Traditionally, slaves also are protected.

<sup>53</sup> See Kelsay, *supra*, at 63.

<sup>54</sup> The resulting wars date from October 1947–December 1948 (the First Kashmir War), April–December 1965 (the Second Kashmir War), December 1971 (the Bangladesh War), and May–July 1999 (the Kargil War).

- Persons who have not received an invitation to embrace Islam.
- Persons who have received an invitation to embrace Islam.

For the first category, war is not justified until the enemy in this category is offered (1) the chance to embrace Islam, or (2) acquiesce to its authority and pay *jizyah*. War is permissible only when both options are refused. In effect, before engaging in conflict, Muslims must give persons in the first category a simple choice: conversion, subjugation, or (except for other Muslims, or women and children) death.

Suppose non-Muslims in the first category refuse to convert to Islam or be governed by a Muslim authority and pay taxes to it. They have put themselves in the second category. Muslims have extended to them an invitation to convert and they have rebuffed it. Hence, they are an enemy (*ḥarbī*), and Muslims are entitled to declare open war on them. Should Muslim forces do so, there are no restrictions on how these forces deal with the enemy, save for the protection against intentional killing that covers Muslims, and enemy women and children, who happen to reside in enemy territory.

To continue the hypothetical Indo-Pakistani example, Pakistan would have to offer residents of Amritsar the choice to become Muslim. They would do so by bearing witness (reciting the *Shahada*, the First Pillar of Islam) with sincerity in front of an *imām*. Sikhs, Hindus, and Christians could opt to keep their faith, but would have to accept the sovereignty of Pakistan over them, and pay the *jizyah*. Failure to take up either alternative would mean Pakistan would treat them as enemies. Only Muslims, women, and children living in Amritsar would be free from intentional killing by Pakistani troops.

To be more specific, the *Shari'a* identifies three areas concerning treatment of, and infliction of damage upon or destruction to, the enemy:

- (1) Life
- (2) Liberty
- (3) Property

(This division is redolent of categories for protections under the United States Constitution.) There is a continuum, or sliding scale, from top to bottom, with the greatest protection for life, and least for property.

Yet, even the protection for life is minimal. An enemy soldier has no real protection from damage to or destruction of his or her life. He or she may be killed in combat, or taken and killed in captivity. As a general rule in Islamic history, a male prisoner of war (POW) may be killed with or without justification.<sup>55</sup> Again, the only substantive protection for life is afforded to Muslims, women, and children, but then only from deliberate killing, not loss of life as an unintended or incidental effect of conflict.

However, this general rule needs elaboration. Over the centuries, Islamic jurisprudence has developed legal principles governing the treatment of POWs

<sup>55</sup> See Boston, *supra*, at 287.

consistent with the *Shari'a*. Critically, a Muslim military leader has the discretion to decide whether a POW may be freed, ransomed, exchanged for one or more Muslim prisoners held by the other side, or kept in bondage. This discretion is sourced in both the Qur'an and *Sunnah*. For example, while *surah* 47, *ayah* 4 encourages Muslims to keep POWs until the cessation of hostilities, *surah* 76, *ayah* 8 clearly specifies that POWs must be fed and otherwise maintained in a dignified manner. Further, the Battle of Badr in 624 A.D., the first battle in Islamic history, reveals how the *Sunnah* operates in conjunction with the relevant Qur'anic verses. While the Prophet ordered some prisoners to be executed for their earlier crimes in Mecca, thereby enforcing *surah* 2, *ayah* 194 and *surah* 16, *ayah* 126, he offered the rest of the POWs options to secure their freedom: (1) convert to Islam, as suggested by *surah* 8, *ayah* 70; (2) pay ransom, as suggested by *surah* 47, *ayah* 4; or (3) teach 10 Muslims to read and write, and hence win their freedom.

The general rule is not invariant. The 1965 Indo-Pakistan War furnishes an example. Pakistan shot down Indian Air Force pilot, Nanda Cariappa, a Hindu and son of one of India's renowned military officers, Field Marshal Kodandera (Kipper) Madappa Cariappa, Order of the British Empire (OBE) (1899-1993). The Field Marshall was the first Chief of Staff and Commander-in-Chief of the Indian Military under Prime Minister Jawaharlal Nehru (1889-1964). The Pakistanis interned the pilot with other Indian POWs. Pakistan's first military ruler and second President, General Muhammad Ayub Khan (1907-1974) learned who his forces had in custody and ordered the pilot be given better quarters and treatment than other POWs. The President and Field Marshall had worked together before the British Partition. The son declined politely, saying every soldier in the Indian Army is the son of the Field Marshal, so he could not take special privileges.

#### [D] Where Do Muslims Find The Enemy?

Muslims classically encounter the enemy in the land of *dār al-harb*. After all, that is enemy territory. By logical inference, such an encounter means confrontation and conflict occurs because of the expansion of Muslim populations into new territory. Much of early Islamic history, particularly the rapid spread of Islam under the *Rashidun*, *Umayyad* Caliphate, and *Abbasid* Caliphate, fits within this scenario.

On occasion, Muslims may find the enemy within the *dār-al-Islām*. Such an enemy is a "*harbi*." This scenario, from the perspective of modern-day Islamic extremists, including Osama Bin Laden and his *Al Qaeda* terrorist network, fits the description of American and other non-Muslim forces in Muslim lands such as the Persian Gulf region and Afghanistan. The laws of war in this situation are the same as those in the classical scenario. The enemy has three choices: conversion, subjugation, or death. Note, then, that if a Jewish or Christian male soldier is captured, and argues to his Islamic captors that he is one of the People of the Book (*ahl al kitāb*) with whom Muslims share much in common, and to whom the Qur'an gives special recognition, the argument — depending on the disposition of the captors — may fall on deaf ears.

#### [E] By What Means May Military Success Be Pursued?

The strict, traditional answer to pursuing military victory is simple. A non-Muslim must be converted, subjugated (and agree to pay the *jizyah*), or killed. The non-Muslim is to be killed only upon refusal of conversion and subjugation, with exceptions for women and children. This position is harsh. But, there are sound reasons why it is not accurate to conceive of these options as widely accepted among or applied by Muslims.

That is, the strict, traditional answer hardly accords with the thinking of the vast majority of Muslims today. First, they read *surah* 2, *ayah* 256 of the Qur'an to prohibit forcible conversions. Second, they see that Muslim communities exist in many sovereign nations, as do many non-Muslim communities in Islamic nations. With the exception of some extreme factions, the co-existence is a peaceful one, without a fear of Muslims initiating a holy war. Thus, it would be entirely wrong, and indeed nefarious, to intimate that most Muslims look at non-Muslims as targets for conversion, subjugation, or death. They do not. Indeed, the vast majority would align themselves with *ulema* and *fukahā'* who say such intolerance is not authentically Islamic. They energetically and sometimes courageously risk their lives to distance themselves from the small minority of extremists who toe a different, evil line.

The question for the future is whether the peace not only will hold, but also expand. The answer depends on more than just the outcome of the War on Terror (as the administration of President George W. Bush labeled it), or the battle against extremist ideologies (as the administration of President Barack H. Obama prefers to dub it). The answer hinges critically on how Muslims view their own faith in an increasingly globalized world characterized not only by religious pluralism, but also secularism.

#### [F] How Is Success Defined?

According to the traditional Islamic Law of War, a war between Muslims and non-Muslims can end in only one of four ways:

- (1) The enemy converts to Islam.
- (2) There is a total conquest by Muslim forces of the territory of the enemy.
- (3) The two sides sign a truce.
- (4) There is a peace agreement between the two sides.

Note that defeat at the hands of non-Muslim forces is not an anticipated outcome.

The first scenario should be the least likely outcome. Even though holy war (*jihād*) is a "struggle to implement the Will of God,"<sup>96</sup> forcible conversions are not lawful under the *Shari'a*. Religion is central to the identity of many individuals, and not given up easily. Martyrdom among Christians at the hands of the pagan Ancient Romans is a well-known example. Therefore, without force, an enemy will

<sup>96</sup> See KELSAN, *supra*, at 46.

not all convert to Islam, but using compulsion to do so is contrary to *surah* 2, *ayah* 256 of the Qur'an.

In the second scenario, when there is total conquest of enemy territory, there often are remaining enemies who have either not been converted or subjugated through a peace agreement. A non-Muslim who is not protected by a treaty is a "*harbi*, i.e., one who is in a state of war, or an enemy alien. A *harbi* has no protection under the *Shari'a*. His life, liberty, and property are unprotected from damage or destruction.

Yet, a *harbi* is not without options. He can request, and be granted, a temporary safe conduct guarantee (*amān*). Any Muslim man or woman can issue an *amān*, as long as that Muslim is "*mukallaf*," meaning that he or she has full legal capacity. In the *Shari'a*, traditionally, *amān* is a right that can be given by a private party, and imposes duties on other private parties. In contrast, in American Law, a public authority would provide such a guarantee, which would put obligations of restraint on the government. A *harbi* who has been granted an *amān* by a *mukallaf* technically is no longer a "*harbi*." He has a new legal status — a "*musta'min*."

The third scenario, a truce, effectively is a cease-fire. It tends to carry little weight in making the decision to pursue war at a later date. The 20th and 21st century history of conflict between Palestinians and Israelis is replete with made and broken ceasefires.

The fourth scenario requires the bulk of attention. Usually when a war is concluded, a treaty of surrender, or peace agreement, is agreed. The treaty of surrender is the legal basis for treatment of conquered non-Muslims, including POWs. This treaty is called a "*dhimma*," which means an engagement, obligation, responsibility, or care as a duty of conscience.<sup>57</sup> Under it, non-Muslims surrender to the Muslim authority.

Traditionally, the Islamic Law of War has influenced Muslim attitudes toward non-Muslims.<sup>58</sup> Because that Law envisages a holy war (*jihād*) against non-Muslims, any POW presumptively is an unbeliever. How, then, are POWs and other conquered peoples to be treated, according to traditional *Shari'a* precepts? The *dhimma* provides the answer.

#### § 48.05 TREATMENT OF CONQUERED PEOPLES (DHIMMIS) UNDER TREATY OF SURRENDER (DHIMMA)

##### [A] Basic Obligations

A treaty of surrender (*dhimma*) assigns conquered non-Muslim peoples (*dhimmis*) certain duties. In particular, they must:

- (1) Pay taxes and tributes, i.e., the *jizyah*.

<sup>57</sup> See SCHACHT, *supra*, at 130-31, 144.

<sup>58</sup> See SCHACHT, *supra*, at 130.

- (2) Wear distinctive clothing.
- (3) Mark their homes with distinctive signs.
- (4) Agree not to build their homes higher than those of Muslims.
- (5) Agree not to bear arms or ride horses.
- (6) Agree to yield the way to Muslims.
- (7) Agree not to create a scandal among Muslims by, in particular, open performance of their own non-Muslim forms of worship or customs (including drinking alcohol). However, non-Muslims are not subject to the Muslim prohibition on pork and alcohol (which they may do in private).
- (8) Agree not to build new churches or synagogues.

In return for these undertakings, the victorious Muslim power agrees to safeguard the life, liberty, and property of these non-Muslims, pursuant to their coverage under the treaty. Note that while the first duty is the only one clearly deriving from the Qur'an or *Sunnah*, the rest were developed across Muslim History.

As for POWs, aside from the option of conversion, there are a variety of possibilities. Which one is selected depends on the discretion of an appropriate *imām*:

- (1) POWs may be enslaved, which in effect means formal subjugation.
- (2) Exchanged for Muslim POWs from the other side.
- (3) Left alive as free "*dhimmis*," and thereby protected as non-Muslims under the treaty of surrender.

Victors in a war are entitled to take the women of the vanquished forces as concubines, and it generally does not matter whether those women are married or not. On the Arabian Peninsula, this practice pre-dates Islam, and continued through into the *Shari'a*. Its source is the Qur'an, specifically *surah* 4 *ayah* 24.

There is controversy regarding the effect of marriage: should it matter whether a woman from the vanquished side is married? The Ancient School at Medina said "no," on the ground that "captivity . . . dissolved the marriage tie."<sup>59</sup> The Ancient Schools of Iraq took a different view: no dissolution of marriage results from captivity. Accordingly, the Iraqi Schools advocated safeguards to protect captured married women, though *Imām* Al Awzā'i, a prominent scholar from Syria (88-157/158 A.H.), endorsed the practice.

##### [B] Problem of Religious Freedom

Professor Schacht writes generally regarding the legal autonomy of all non-Muslims living in Muslim territories:

Islamic law interferes with non-Muslims only in so far as Muslims, too, are concerned directly, and very occasionally indirectly, for instance in so

<sup>59</sup> See SCHACHT, *supra*, at 42.

far as the punishment of theft constitutes a religious interest of the Muslims. Apart from this, non-Muslims are left complete legal freedom, provided no Muslim . . . is concerned; freedom in matters of religion is guaranteed explicitly.<sup>60</sup>

However, this observation grossly understates the reality of freedom of worship for religious minorities in many Muslim countries. Conquered peoples are entitled to practice their religion. They just cannot do so too openly.

That is why, for example, Catholic Churches in many Muslim countries are discrete in their location and architecture, lacking a beaming spire atop which sits a crucifix, and in which are bells. Evangelization is forbidden. Importing clergy can be difficult. For instance, in the Sultanate of Brunei, no foreigner can be brought in as a Priest. Rather, only a citizen of Brunei — of which there are few — can become a Priest. A compelling 2005 book, *The Myth of Islamic Tolerance: How Islamic Law Treats Non-Muslims*, brings together 58 essays by 17 authors from around the world about Islamic inequality and oppression of non-Muslims in Islamic societies.<sup>61</sup> The sum and substance is that these societies are characterized by a religious caste system.

Thus, notwithstanding the doctrine that mitigates in favor of allowing religious minorities in a *Shari'a* jurisdiction to continue with their ways of life, the realities for these minorities often are incongruous with the precepts. For example, following the 1967 Arab-Israeli War, Jewish communities in Syria and Egypt faced persecution, and many families emigrated from Damascus and Cairo where they had been for generations. As another illustration, from time to time international human rights organizations, including non-governmental organizations (NGOs), chronicle the plight of religious minorities in Muslim countries such as Saudi Arabia — where all forms of public worship outside of Islam are forbidden. Such reports also emanate from the United States government under the 1998 *International Religious Freedom Act*.<sup>62</sup> This statute created a Commission to monitor respect for freedom of conscience around the world, and has openly criticized that Kingdom, among other Muslim countries, for breaches.

The question is whether some Muslim governments fail to adhere to the general tolerance and understanding embedded in the *Shari'a* toward religious minorities. (This question is related to, but technically distinct from, the Islamic Criminal Law rules on apostasy (*riddah*.) To what degree is the theory of tolerance and understanding not always manifest in practice? Over the broad course of Islamic history, up to the modern Arab-Israeli conflict and the even more modern phenomenon of *Al Qaeda* and its commission of terrorist attacks such as on 11 September 2001, the impression is one of inconsistency between theory and

<sup>60</sup> See SCHRAG, *supra*, at 133.

<sup>61</sup> See ROBERT SPENCER ED., *THE MYTH OF ISLAMIC TOLERANCE: HOW ISLAMIC LAW TREATS NON-MUSLIMS* (Amherst, New York: Prometheus Books, 2005).

<sup>62</sup> See *International Religious Freedom Act of 1998*, Public Law 105-292, as amended by Public Law 106-55, Public Law 106-113, Public Law 107-228, Public Law 108-332, and Public Law 108-458, codified at 22 U.S.C. §§ 6401-6402, 6411-6417, 6431-6436, 6441-6450, 6461, 4028, 50 U.S.C. § 402, as well as 8 U.S.C. § 1182(a)(2), 22 U.S.C. §§ 262d, 2151(n) note, (n), (n)(e), 2304(a), 2452(b), 3965(d), 4013, 6202(a), 6471-6474, 6481.

practice. Muslims and non-Muslims have lived and co-existed peacefully, in close proximity, in *Shari'a* and *non-Shari'a* jurisdictions alike.

## [B] Equality and Inequality

Broadly speaking, a *dhimmi* has nearly equal rights and duties as those of a Muslim. For instance:

- The rights of a *dhimmi* under Contract Law and Property are essentially the same as those of a Muslim.
- The rights of a *dhimmi* under Business Associations Law are nearly the same as those of a Muslim. The exception concerns an unlimited mercantile partnership (*sharikah al-mufawadah*). A Muslim and *dhimmi* cannot enter into this form of partnership. Only Muslims can come together in a *mufawadah* enterprise.
- Regarding liability under Criminal Law, a *dhimmi* may be subjected to *hadd* and *ta'zir* punishments, as long as those punishments are not specifically reserved for Muslims. Some *hadd* or *ta'zir* punishments are specific to Muslims, and thus ones to which a *dhimmi* would not be liable. For example, the *hadd* punishments for drinking wine and for unlawful sexual intercourse (*zinā*) are only applicable to Muslims.
- In terms of protection by the Criminal Law, a *dhimmi* is protected just as is a Muslim. There is one notable exception, which is the crime of *kadhif* (false accusation of unlawful sexual relations). The punishment for accusing a *dhimmi* of *kadhif* is a *ta'zir*, not the otherwise prescribed *hadd*, punishment. This exception is made because a *dhimmi* has lesser criminal responsibility for the crime of unlawful sexual relations (*zinā*): he or she is subject to a lesser punishment (*ta'zir* instead of *hadd*). Thus, if a *dhimmi* is subject to a lesser punishment for perpetrating *zinā*, then it is only fair the *dhimmi* is protected to a lesser degree, in the form of a lesser punishment, for being the victim of a false charge leveled at him for that crime.
- With respect to Torts (*jināyāt*), specifically, a private right of retaliation for a wrongful act committed against oneself or one's family, there is a question as to whether a *dhimmi* has that right to the same extent as a Muslim. The Four *Sunni* Schools are divided. The *Hanafi* School says a *dhimmi* has the full right of retaliation, as does a Muslim, in all cases. The *Shāfi'i* and *Hanbali* Schools say a Muslim who kills a *dhimmi* is not subject to retaliation by a *dhimmi* for having committed the murder (*katl*). The *Māliki* School says that in most, but not all cases, a *dhimmi* does have the right of retaliation against a Muslim who committed the murder.

Arguably, the matters of a *mufawadah* partnership, certain punishments, and retaliation are modest distinctions.

Yet, there are other, and arguably more significant, differences in the legal rights of *dhimmis* and Muslims. They include:

- In the area of Evidence, a *dhimmi* cannot be a witness, except in a matter concerning another *dhimmi*. Interestingly, a *dhimmi* could serve as a witness in a matter involving a *dhimmi* of another religion. Thus, only a Muslim can serve as a witness in a matter involving a Muslim.
- A *dhimmi* cannot be the legal guardian of his own child if that child is a Muslim. For example, suppose a Muslim man marries a *dhimmi* woman who is *ahl al kitāb* (a Person of the Book — a Jew or Christian). The child is Muslim. The wife-mother can take care of the child, but she cannot be the legal guardian.
- A *dhimmi* cannot inherit from a Muslim under Inheritance Law. The *Shari'a* does not list *dhimmis* in the inheritance chain. But, a *dhimmi* can receive assets through a legacy (i.e., a specific bequest of the testator-decedent, limited to one-third the size of the estate).
- Also concerning Inheritance Law, a *dhimmi* cannot be the executor for the estate of a Muslim.

Obviously, from an American legal perspective, these distinctions are profoundly troubling. They cut against the national motto: *e pluribus unum* (out of many, one). American Constitutional Law is well-developed on the topic of equal protection, and categorizations of persons by religion, or race, are inherently suspect and receive the highest degree of judicial scrutiny. Likewise, in Catholic Christian teaching, there is a powerful emphasis on equal dignity of the human person, regardless of faith.

On balance, the "*dhimma*" doctrine, as a theoretical contract in which non-Muslims are granted special status, has evolved through Muslim history. Consequently, the legal rules governing *dhimmis* have differed from time to time, in proportion with the level of tolerance in Muslim society. For instance, sometimes *dhimmis* are permitted to practice their faiths and consume alcoholic beverages in public, while at other times they cannot do so. Thus, in some historical periods, there is legal discrimination against *dhimmis*, but at other times it is outright persecution of them.

#### § 48.06 REBELLION (*BAGHI*)

Depending on the facts, the principles of the Islamic Law of War are somewhat distinct with regards to rebellion. Rebellion, specifically, rebellion against a government, or a transgression by one group of a population against another group, is known as "*baghi*" in Arabic. Three of the Four *Sunni* Schools (*Hanafi*, *Hanbali*, and *Shāfi'i*) do not regard *baghi* as a Criminal Law matter, whereas the *Māliki* School treats *baghi* as a distinct *ḥaqq Allāh* offense that triggers a *ḥadd* punishment.

Consider, first, a situation in which rebel forces are solely comprised of *dhimmis* or other non-Muslims living within the *dār-al-Islām*. On these facts, the rebels are treated according to the Law of War principles explained earlier. A *dhimma* is not broken even by offences committed by subjugated non-Muslims against individual Muslims. Even if the *dhimmis* refuse to pay *jizyah*, murder a Muslim, or violate

some other rule of the treaty, these behaviors do not lead to an abrogation of the *dhimma*. The only way *dhimmis* breach the treaty is if they (1) join enemy territory, or (2) wage war against the Muslims in their own country.<sup>63</sup> However, rebellious *dhimmis* face the possibility of enslavement, if captured and detained essentially as POWs.

Second, in contrast, suppose the rebellion is a conflict between two groups of Muslims. The rules change drastically. The repelled Muslim group may not be killed in retreat. And, members of the losing or retreating rebel party may not be taken as slaves as a result of the conflict. But, there is no rule against taking these Muslims as slaves.

What explains the difference in the two scenarios? Surely, it is religion. In the second case, both parties to the conflict were observing Muslims before clashes erupted. In the first case, slaves taken in a rebellion of non-Muslims against Muslims are by definition of another faith, unless they agree to convert to Islam.

One other scenario, a variation of the second one, is noteworthy. Suppose there is a conflict between two groups of Muslims, and *dhimmis* join on the side of the rebelling Muslims. These *dhimmis* are not viewed to have broken the peace treaty that exists between the rest of the *dhimmis* and the Muslim authority. This outcome reinforces the principle that only in the event *dhimmis* wage their own war against Muslims do they breach the *dhimma*.

<sup>63</sup> See SCHACHT, *supra*, at 131.

## Chapter 49

### *JIHĀD* (STRUGGLE)

---

Christians as minorities are, generally speaking, well-educated professionals and compared to their numbers they have an important influence in each of the countries in which they live. And that's a contribution. I also feel that the Christians can be a sort of bridge because in most of the countries they are Arabs, but they are not Muslims. They can be a connection between the modern societies of the Western world and emerging societies in the Islamic world because they are Arabs and they are Christians.

Monsignor Robert L. Stern, Secretary General, Catholic Near East Welfare Association (CNEWA), 9 December 2008, Interview with Rome Reports, *posted at* [www.cnewa.org](http://www.cnewa.org).

#### SYNOPSIS

##### § 49.01 DEFINITION OF “*JIHĀD*”

- [A] Basic Meaning
- [B] Critical Distinction between Greater and Lesser *Jihād*

##### § 49.02 CONTEXTS FOR USE OF “*JIHĀD*”

- [A] Putting God First
- [B] Remaining Steadfast on the Straight Path
- [C] Striving To Do Righteous Deeds
- [D] Freeing People from Tyranny

##### § 49.03 EMPHASIS ON PEACE

- [A] Relations with Non-Muslims
- [B] Love Your Enemies?

##### § 49.04 *JIHĀD* AS WAR?

- [A] Distinction between “*Jihād*” (Struggle) and “*Katl*” (Killing)
- [B] *Jus Ad Bellum*, *Jus In Bello*, and Power to Declare War
- [C] Fighting in Self-Defense
- [D] Fighting for Cause of Allāh and Four Caveats

##### § 49.05 *KHARIJITES* AND ASSASSINS

## § 49.01 DEFINITION OF “JIHĀD”

## [A] Basic Meaning

The Arabic word “*jihād*” is a noun that means “struggle.” It can apply to any person or situation in which an effort or exertion is required.<sup>1</sup> The verb forms of *jihād* are *yujāhidu* (male) or *tujāhidu* (female). Thus, a general definition of “*jihād*” is that it:

refers to the obligation incumbent on all Muslims, individuals and the community, to follow and realize God’s will: to lead a virtuous life and to extend the Islamic community through preaching, education, example, writing, etc. *Jihād* also includes the right, indeed the obligation, to defend Islam and the community from aggression.<sup>2</sup>

However, it is insufficient to stop with this generic definition. There are in fact two “*jihāds*”: the “greater *jihād*” and the “lesser *jihād*.”<sup>3</sup>

[B] Critical Distinction between Greater and Lesser *Jihād*

The “greater *jihād*” is known in Arabic as “*jihād al-akbar*.” It is necessary to avoid being ruled by passions, i.e., it demands allowing the heart to be governed by reason, rather than drowned by emotion, and developing a better knowledge of, and closer union with, God (Allāh).<sup>4</sup> By the consensus (*ijmaʿ*) of the *ulema*, the “greater *jihād*” is the struggle to follow Allāh. It is an internal struggle to discern the Will of God and submit to it by conforming one’s thoughts and behavior appropriately. In this respect, there are two particular strivings:<sup>5</sup>

- (1) Away from the devil, in terms of temptations. This aspect of the “greater *jihād*” sometimes is called the “*jihād* of the tongue.”
- (2) Away from failings of oneself. This aspect involves a “*jihād* of the heart,” i.e., charitable donations, “*jihād* of the hands,” i.e., doing good works, and a “*jihād* of the mind,” i.e., self-improvement.<sup>6</sup>

<sup>1</sup> See M. Amir Ali, Ph.D., *Jihad Explained, Institute of Islamic Information and Education* (Chicago, Illinois), posted at [www.irshad.org/islam/iiie/iiie\\_18.htm](http://www.irshad.org/islam/iiie/iiie_18.htm). [Hereinafter, Ali.]

<sup>2</sup> John L. Esposito, *Jihad: Holy or Unholy War?*, posted at United Nations Alliance of Civilization, [www.unaoc.org/repository/Esposito\\_Jihad\\_Holy\\_Unholy.pdf](http://www.unaoc.org/repository/Esposito_Jihad_Holy_Unholy.pdf). [Hereinafter, Esposito, *Jihad*.]

<sup>3</sup> See Mary R. Habeck, *Knowing the Enemy: Jihadist Ideology and the War on Terror* 1-2, 4-5, 7, 117 (New Haven, Connecticut: Yale University Press, 2006).

<sup>4</sup> As Dr. Laleh Bakhtiar puts it,

[t]here are two basic causes of the need for this greater struggle within the self: Either a person is ruled by passion rather than reason, or a person does not know God.

LALEH BAKHTIAR, *THE SUBLINE QURAN — ENGLISH TRANSLATION, REVISED EDITION*, Introduction at xxxi ([www.sublinequran.org](http://www.sublinequran.org): Laleh Bakhtiar, trans., 6th ed., 2009).

<sup>5</sup> See REUVEN FIRESTONE, *JIHAD: THE ORIGIN OF HOLY WAR IN ISLAM* 16-17 (Oxford, England: Oxford University Press, 1999).

<sup>6</sup> See ANONYMOUS, *IMPERIAL HUBRIS: WHY THE WEST IS LOSING THE WAR ON TERROR* 6-8 (Dulles, Virginia, Brassey’s Inc., 2004). [Hereinafter, *IMPERIAL HUBRIS*.] After publication of this book, “Anonymous” was revealed to be Michael Scheuer, a national security expert on Afghanistan and South Asia with 22 years

Manifestly, the greater *jihād* leads to different kinds of struggles. The “greater *jihād*” is comparable to the Catholic Christian concept of resisting sin and fighting temptation, doubt in belief, and worldly desires. Both involve strenuous efforts to deepen one’s faith and ability to control worldly desires.

In contrast, the “lesser *jihād*” is an external struggle with other men and women to bring the truth of Islam to all humankind. The enemy is visible. This struggle sometimes is called the “*jihād* in the path of God,” or even “*jihād* of the sword.” This struggle involves an active defense of Islam, and propagation of the faith. While it bears some resemblance to the Catholic Christian concept of evangelization, the analogy breaks down when the struggle becomes violent. As Saint Francis of Assisi (1181/1182-1226 A.D.) said: “Preach the Gospel at all times; if necessary use words.” That is, evangelization is practiced by peaceful, non-violent example.

Regrettably, extremists acting in the name of Islam define “*jihād*” only in terms of the lesser *jihād*. They wrongly elevate its importance above the greater *jihād*. They wrongly believe that to establish the sovereignty of Allāh, it is appropriate to wage continuous, offensive, and violent operations against non-Muslims. The consequences are, of course, monstrous.

It is important to distinguish the word “*jihād*” from the word “*harb*” or *qital* (nouns), which are the Arabic words for war.<sup>7</sup> During the time of the Prophet, the word *jihād* and words such as *harb* or *qital* were not used interchangeably.<sup>8</sup> Neither the Qur’ān nor any *hadiths* mention “*jihād*” as holy war. In fact, “holy war” in Arabic is translated as “*al-harbu al-muqaddasatu*” (noun).<sup>9</sup> Many scholars believe the use of the term *jihād* to mean “holy war” was a phenomenon that began during the Crusades as a result of the Christian use of the term “Holy War.”<sup>10</sup> Yet, this argument is jejune, amounting to nothing more than “two wrongs make a right.”

## § 49.02 CONTEXTS FOR USE OF “JIHĀD”

*Jihād* is mentioned in several Qur’anic passages and *hadiths*, revealing various meanings. The primary contexts in which the word is used are as follows.<sup>11</sup>

## [A] Putting God First

Three Qur’anic verses connote the struggle to put love for the Creator and recognition of His existence above worldly ambition, wealth, and even family.<sup>12</sup>

- Surah 9, ayat 23-24:

of experience with the Central Intelligence Agency (CIA).

<sup>7</sup> See Ali, *supra*.

<sup>8</sup> See Ali, *supra*.

<sup>9</sup> See Ali, *supra*.

<sup>10</sup> See Ali, *supra*.

<sup>11</sup> See Ali, *supra*.

<sup>12</sup> See Ali, *supra*.

<sup>23</sup>Believers, do not take your fathers and brothers as allies [i.e., against Muslims] if they prefer disbelief to faith: those of you who do so are doing wrong. <sup>24</sup>Say [Prophet], "If your fathers, sons, brothers, wives, tribes, the wealth you have acquired, the trade which you fear will decline, and the dwellings you love are dearer to you than God and His Messenger and the struggle in His cause, then wait until God brings about His punishment." God does not guide those who break away.<sup>13</sup>

- *Surah 25, ayah 52:*

... [S]o do not give into the disbelievers: strive [*jahidhum*] hard against them with this Qur'an.<sup>14</sup>

- *Surah 29, ayah 8:*

We have commanded people to be good to their parents, but do not obey if they strive [*jahadaka*] to make you serve, beside Me, anything of which you have no knowledge: you will all return to Me, and I shall inform you of what you have done.<sup>15</sup>

To analogize, this struggle is to follow the first of the Ten Commandments. To use a Catholic Christian phrase, it is to put God above all things.

By no means is it easy to resist pressures from modern culture, or from family and friends, to avoid that which Allāh forbids and act according to what He encourages. Yet, remaining steadfast in the way of Allāh is considered an honorable struggle.

## [B] Remaining Steadfast on the Straight Path

The term "jihād" is used in Qur'anic passages to exhort Muslims to follow their faith in practice, particularly by practicing the Five Pillars.

- *Surah 22, ayah 78:*

Strive [*jahidu*] hard for God as is His due: He has chosen you and placed no hardship in your religion, the faith of your forefather Abraham. God has called you Muslims — both in the past and in this [message] — so that the Messenger can bear witness about you and so that you can bear witness about other people. So keep up the prayer, give the prescribed alms, and seek refuge in God: He is your protector — an excellent protector and an excellent helper.<sup>16</sup>

- *Surah 29, ayah 6:*

Those who exert [*jahada, yujahidu*] themselves do so for their own benefit — God does not need his creatures. . . .<sup>17</sup>

In these verses, the Qur'an praises Muslims who struggle steadfastly in the path of Islam. Concomitantly, Muslims are encouraged to migrate and seek places that are more tolerant and peaceful than the land in which they currently reside, if in that land they are persecuted for their belief.<sup>18</sup> Thus, the Qur'an says in *surah 2, ayah 218*:

But those who have believed, migrated, and striven [*jahadu*] for God's cause, it is they who can look forward to God's mercy: God is most forgiving and merciful.<sup>19</sup>

From this verse, it may be deduced that escaping persecution, and finding a place that allows one to strive to please Allāh and live a peaceful life, is a good idea.

However, no matter where a Muslim finds himself or herself, his or her belief will be tested. Why? The answer is to enkindle and rekindle his or her spirituality and trust in Allāh. Thus, the Qur'an states:

- *Surah 3, ayah 142:*

Did you think you would enter the Garden without God first proving which of you would struggle [*jahadu*] for His cause and remain steadfast?<sup>20</sup>

- *Surah 2, ayat 153-157:*

<sup>153</sup>You who believe, seek help through steadfastness and prayer, for God is with the steadfast. <sup>154</sup>Do not say that those who are killed in God's cause are dead; they are alive, though you do not realize it. <sup>155</sup>We shall certainly test you with fear and hunger, and loss of property, lives, and crops. But [Prophet], give good news to those who are steadfast, <sup>156</sup>those who say, when afflicted with a calamity, "We belong to God and to Him we shall return." <sup>157</sup>These will be given blessings and mercy from their Lord, and it is they who are rightly guided.<sup>21</sup>

Both Muslims and Catholic Christians would agree that true belief is discovered and cemented through challenges and tribulations.

## [C] Striving to Do Righteous Deeds

The Companions of the Prophet (*Sahābah*) asked about *jihād*. They sought to understand what Allāh and Muhammad regarded as the most beloved acts of *jihād*.<sup>22</sup> Imām Bukhari relates:

<sup>17</sup> Qur'an, *supra*, 29:6 at 252.

<sup>18</sup> See Ali, *supra*.

<sup>19</sup> Qur'an, *supra*, 2:218 at 24.

<sup>20</sup> Qur'an, *supra*, 3:142 at 44.

<sup>21</sup> Qur'an, *supra*, 2:153-157 at 17-18.

<sup>22</sup> See Ali, *supra*.

<sup>13</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 9:23-24 at 118 (Oxford, England: Oxford University Press, 2004). See also *id.*, fn. a to 9:23 (concerning "allies"). [Hereinafter, QUR'AN.]

<sup>14</sup> Qur'an, *supra*, 25:52 at 230.

<sup>15</sup> Qur'an, *supra*, 29:8 at 252.

<sup>16</sup> Qur'an, *supra*, 22:78 at 214.

Narrated 'Ā'isha, the mother of the faithful believers . . . : I said, "O Allāh's Apostle! We consider *jihād* as the best deed." The Prophet . . . said, "The best *jihād* (for women) is *Hajj-Mabrūr* [i.e., an accepted *Hajj* in the sense of righteous, sinless, or in effect, perfect *Hajj*]." <sup>23</sup>

This response is significant. The Prophet says performance of the pilgrimage, the Fifth of the Five Pillars of Islam, not violent campaigns against non-Muslims, is the most sublime form of struggle. The difficulty, of course, is whether this *ḥadīth* is read narrowly to apply only to women, or expansively to apply to men, too.

On a different occasion, Muhammad was approached by a man who was the only son in his family. <sup>24</sup> At the time, the *Ṣaḥābah* were heading off to a defensive battle. The *ḥadīth* states:

A man came to the Prophet . . . asking his permission to take part in *jihād*. The Prophet . . . asked him, "Are your parents alive?" He replied in the affirmative. The Prophet . . . said to him, "then exert [*jihād*] yourself in *their* service." <sup>25</sup>

Manifestly, serving one's parents has priority over defending the Muslim community (*ummah*) against aggression.

On yet another occasion, the Prophet clarified his view on the true meaning of "*jihād*." In response to a question posed to him as to what is the best kind of *jihād*, Muhammad replied:

The best kind of *jihād* is a word of truth in front of an oppressive ruler. <sup>26</sup>

Obviously, Muhammad could have replied in terms of combat against oppression. He did not, instead suggesting that truth prevails over tyranny.

In a highly pertinent *ḥadīth*, Muhammad defines a "*mujahid*" as follows:

Shall I inform you of who the believer is? He is the one who is entrusted by people with their lives and wealth. The Muslim is the one who people are safe from (harm) from his tongue and his hand. The *Mujahid* (the one who carries out *jihād*) is he who strives against himself for the sake of Allāh, and the *Muhajir* (one who emigrates) is he who abandons evil deeds and sin. <sup>27</sup>

<sup>23</sup> THE TRANSLATION OF THE MEANINGS OF SAHIH AL-BUKHARI, ARABIC-ENGLISH by Dr. Muhammad Muhsin Khan, vol. II, book XXVI (The Book of *Hajj* (Pilgrimage)), p. 347, *ḥadīth* no. 595 (Dar Ahya U's-Sunnah, Al Nabawiya, March 1978) (emphasis added). (Hereinafter, *BUKHARI*.)

<sup>24</sup> See Ali, *supra*.

<sup>25</sup> *BUKHARI, supra*, at vol. IV, book LII (*Jihād* (Fighting for Allāh's Cause)), p. 153, *ḥadīth* no. 248 (emphasis added).

<sup>26</sup> Narrated by Abu Saeed Alkhouḍarī, Ibn Hujr Al-Asqalanī, AL-AMALI ALMUTLAQA, 196, posted at [www.dorar.net/enc/hadith/%D9%83%D9%84%D9%85%D8%A9+%D8%AD%D9%82+%D1%2A%D9%82+%D8%A7%D9%84%D9%85%D8%A7%D8%AC%D8%B1+%D1%2C2+w](http://www.dorar.net/enc/hadith/%D9%83%D9%84%D9%85%D8%A9+%D8%AD%D9%82+%D1%2A%D9%82+%D8%A7%D9%84%D9%85%D8%A7%D8%AC%D8%B1+%D1%2C2+w) (original in Arabic, translated by Jomana Qaddour). This *ḥadīth* also is recorded as:

"What kind of *jihād* is better?" a man once asked the Prophet. The Prophet replied, "A word of truth in front of an oppressive ruler."

Compilation of *Ḥadīth* by Tirmidhī, *Sunan Al-Nasa'i*, *ḥadīth* no. 4209 (emphasis added). (Original in Arabic, translated by Jomana Qaddour.)

<sup>27</sup> Narrated by Fudalah ibn Ubayd Al-Ansālī, Al-Albānī, AL-SILSILAH ALSAHIH, 549, posted at

The unequivocal reference here is to the significance of internal struggle against temptation. Lest there be any doubt as to whether this struggle is of the highest importance, the Qur'ān defines "true believers." They are willing to struggle financially and physically for the sake of Allāh, as *surah* 49, *ayah* 15 of the Qur'ān indicates:

The true believers are the ones who have faith in God and His Messenger and leave all doubt behind, the ones who have struggled [*jahadu*] with their possessions and their persons in God's way: they are the ones who are true. <sup>28</sup>

In other words, reading the *ḥadīth* defining a *mujahid* together with the Qur'ānic passage defining true believers, it may be argued a *mujahid* is a true believer, and the hallmark of these interchangeable terms is an internal struggle to follow God.

In sum, these *ḥadīth*s and verse impel a conclusion: the most virtuous form of *jihād* had nothing to do with taking up arms or fighting a battle. Mohammed sought to exhort Muslims to strive against themselves, to avoid giving into worldly desires, such as adultery and fornication, drinking, jealousy, pride, and selfish consumption of wealth. Even when confronted with an oppressive ruler or circumstances, the best form of *jihād* is to struggle not with swords but with words of truth.

## [D] Freeing People from Tyranny

The Qur'ān highlights the importance of eradicating injustice and oppression. <sup>29</sup> Muslims are to strive to equitable treatment for all mankind. However, as in the case of war itself, the sacred text does not use the word "*jihād*" to endorse this kind of striving. Rather, most *ulema* and *fukahā* emphasize that in some situations Muslims who live under oppressive rule can strive to endorse positive laws, politicians, and ideas. Only when these non-violent means fail can Muslims take up arms, but only to defend themselves if their safety is threatened. <sup>30</sup>

Like 20th century leaders of peaceful struggles, such as Mahatma Gandhi and the Reverend Dr. Martin Luther King, Muhammad in the 7th century consistently preached non-violent methods to establish the Muslim state in Medina, and later in Mecca. His authority was no less than the Qur'ān, which in *surah* 16, *ayah* 125-128 states:

<sup>125</sup>[Prophet], call people to the way of your Lord with wisdom and beautiful teaching. Argue with them in the most courteous way, for your

[www.dorar.net/enc/hadith/%D8%A7%D9%84%D9%85%D8%AC%D8%A7%D9%87%D8%AF+%D8%A7%D9%84%D9%85%D9%87%D8%A7%D8%AC%D8%B1+%D1%2C2+w](http://www.dorar.net/enc/hadith/%D8%A7%D9%84%D9%85%D8%AC%D8%A7%D9%87%D8%AF+%D8%A7%D9%84%D9%85%D9%87%D8%A7%D8%AC%D8%B1+%D1%2C2+w) (original in Arabic, translated by Jomana Qaddour). This *ḥadīth*, in which Muhammad defines a "*mujahid*," also is related by Saḥīḥ Ibn Ḥazīm:

The *Mujahid* (the one who carries out *jihād*) is he who strives against himself for the sake of Allāh, and the *Muhajir* (one who emigrates) is he who abandons evil deeds and sin.

SAHIH IBN HAZIM, *Ḥadīth* no. 4862 (original in Arabic, translated by Jomana Qaddour).

<sup>28</sup> QUR'AN, *supra*, 49:15 at 339.

<sup>29</sup> See Ali, *supra*.

<sup>30</sup> See Ali, *supra*.

Lord knows best who has strayed from His way and who is rightly guided.<sup>126</sup> If you [people] respond to an attack, make your response proportionate, but it is best to stand fast.<sup>127</sup> So [Prophet] be steadfast: your steadfastness comes only from God. Do not grieve over them; do not be distressed by their scheming,<sup>128</sup> for God is with those who are aware of Him and who do good.<sup>31</sup>

In addition to reasoned discourse, the Qur'an emphasizes patience with oppressors, always putting forth good, even in the face of evil. *Surah* 41, *ayat* 34-35 explains:

<sup>34</sup>Good and evil cannot be equal. [Prophet], repel evil with what is better and your enemy will become as close as an old and valued friend,<sup>35</sup> but only those who are steadfast in patience, only those who are blessed with great righteousness, will attain to such goodness.<sup>32</sup>

Read carefully, there is a stark and depressing reality embedded in this passage. The independent clause (*ayah* 35) is basically a recognition not everybody is sufficiently patient or righteous to repel evil with good. People are weak, and prone to retaliate in a like, or even more dreadful, manner than the initial causal event. Thus, it is up to Muhammad to set a good example, and for Muslims to follow his *Sunnah*.

Historically, the establishment of Medina and eventual conquering of Mecca are said to have been peaceful. Muhammad ordered Muslims to enter Mecca with mercy. For Muslims, the years in Mecca before the *Hijra* of 622 A.D. had been extremely difficult. Muslims had withstood nearly 13 years of oppression (610-622), three of them under economic sanctions during which no tribes in Arabia were permitted to trade with them.<sup>33</sup>

Despite this unpleasant history, Muhammad counseled forgiveness.<sup>34</sup> Again, his textual basis for this counsel is strong. *Surah* 3, *ayah* 134 of the Qur'an states that the best descriptions of the "righteous," for whom Allāh has prepared a "Garden as wide as the heavens and earth,"<sup>35</sup> are those who not only:

give, both in prosperity and adversity, [but also] who *restrain their anger and pardon people*. . . .<sup>36</sup>

<sup>31</sup> Qur'an, *supra*, 16:125-128 at 339.

<sup>32</sup> Qur'an, *supra*, 41:34-35 at 339.

<sup>33</sup> See Hamed Ghazali, Ph.D., *Islam for Peace and Justice*, 3 THE AMERICAN MUSLIM MAGAZINE 110, 1, 20-22 (March 2002). [Hereinafter, Ghazali.] Dr. Ghazali is an American Muslim scholar, Adjunct Professor at the American Muslim University, Chairman of the Muslim American Schools (MAS) Council of Islamic Schools, and Director of the Houston Qur'an Academy.

<sup>34</sup> See Ghazali, *supra*.

<sup>35</sup> See Qur'an, *supra*, 3:133 at 44.

<sup>36</sup> Qur'an, *supra*, 3:134 at 44 (emphasis added).

Additionally, the Qur'an contains several passages emphasizing the peaceful nature of Islam and, in one context or another, calling on Muslims not to rule over others harshly, nor to judge and condemn those around them. See, e.g., 4:58 (concerning judging with justice), 4:181 (on acting justly), 5:8 (warning against hatred leading away from justice), and 16:90 (on doing good, being generous, and avoiding oppressive actions).

Ten years after leaving Mecca, the Muslims finally returned to their home city.

Before entering the city, Saad Ibn Obadah, one of four military leaders and a Companion of the Prophet (*Ṣaḥābiyy*) said:

Today is the day of the battle, today Quraish is humiliated!<sup>37</sup>

Saad had suffered in Mecca for many years before migrating to Medina, and it was with that suffering in mind that he chose his ill-tempered words. Upon hearing them, Muhammad immediately corrected his statement:

No Saad, do not say this. Rather, you should say, "Today is the day of mercy, today Quraish is honored!"<sup>38</sup>

Moreover, to insure Saad did not commit any unnecessary bloodshed out of revenge for how the Meccans had treated him, the Prophet replaced Saad as a leader with Saad's son. This act was the least offensive gesture towards Saad, yet also the wisest move to safeguard against self-indulgent aggression and thereby restore peace and justice.<sup>39</sup>

In sum, while Muslims are not to acquiesce to injustice or oppression, they are not to resort to violence in their struggle against these vices. They are to take the proverbial "High Road," one paved with restraint, mercy, and forgiveness. Only if peaceful means fail, and an attack is launched against Muslims, is the defensive use of arms permitted. Even then, the rule of proportionality must be followed, and if and when the upper hand is gained, then once again, restraint, mercy, and forgiveness are to guide further action.

## § 49.03 EMPHASIS ON PEACE

### [A] Relations with Non-Muslims

It is easy to rush into the topic of war, focus exclusively on it, and forget the first and foremost emphasis in Islam is peace. Muslim individuals and countries should base their relations with other individuals and countries on terms of peace.<sup>40</sup> Only in extreme circumstances should peaceful ties ever be broken. That is, war is always a last resort.

First, as a general matter, Islam does not permit the killing of people because they practice a different faith, or because they differ on religious matters. In this respect, one widely-quoted Qur'anic passage, *surah* 60, *ayat* 8-9 state:

. . . <sup>8</sup>and He does *not forbid* you to deal kindly and justly with anyone who has not fought you for your faith or driven you out of your homes: God loves the just. <sup>9</sup>But God *forbids* you to take as allies those who have fought

<sup>37</sup> Ghazali, *supra* (emphasis added).

<sup>38</sup> Quoted in Ghazali, *supra*.

<sup>39</sup> Quoted in Ghazali, *supra*.

<sup>40</sup> See Submission.org, *The War System in Islam*, posted at [www.submission.org/war.html](http://www.submission.org/war.html). [Hereinafter, *War System in Islam*.]

against you for your faith, driven you out of your homes, and helped others to drive you out: any of you who take them as allies will truly be wrongdoers.<sup>41</sup>

The difficulty with this passage is it stops short of barring all killing on the grounds of religion. *Ayah* 8 is phrased not as an order to be kind and just, but rather as a permission to behave as such, and then only to persons who have not fought with Muslims. *Ayah* 9 explains how Muslims are to treat persons who have fought with them on religious grounds. It does not tell them to kill such persons, but it bars them from reconciliation.

Of course, *ayat* 8-9 are not the only Qur'anic passages relevant to the topic of peace. *Surah* 8, *ayah* 61 states:

But if they incline towards peace, you [Prophet] must also incline towards it, and put your trust in God: He is the All Hearing, the All Knowing.<sup>42</sup>

"They" are non-believers, meaning (as *surah* 9, *ayah* 55 puts it), "those who reject Him [God] and will not believe."<sup>43</sup> This passage complements *surah* 60, *ayah* 8: if non-believers do not fight against Muslims, and are open to peace, there is no need to fight. Muslims may treat them kindly and justly. Muhammad, in particular, is to accept an olive branch offered him by opposing forces. By extension, Muslims are to follow his *Sunnah*.

Yet, even *surah* 8, *ayah* 61, does not create an unequivocal, all-encompassing, affirmative obligation to make peace. Its purview could be circumscribed to situations in which non-believers take the initiative and seek peace. To draw a contrast with Catholic Christianity, it falls short of one of the Beatitudes from Christ's Sermon on the Mount, recounted in *The Gospel According to Matthew*:

Blessed are the peacemakers,

For they will be called children of God.<sup>44</sup>

There are further Qur'anic passages about peace and tolerance. Yet, none is adamant. Each varies in the directness and durability of the inference that can be drawn from it.

For example, *surah* 2, *ayah* 256, states as a fact, and calls for a rule — that there is no compulsion in religion. The inference that Muslims ought to behave peacefully toward persons of other faiths is direct. *Surah* 109, *ayah* 1-6, concerns disbelief. These verses simply state differences in religion exist. This entire *surah* is an instruction to the Prophet, commanding him not to compromise on the principles that have been revealed to him. How he should enforce this command, and how Muslims should view the command in their own lives, is left open.

<sup>41</sup> Qur'an, *supra*, 60:8 at 369 (emphasis added).

<sup>42</sup> Qur'an, *supra*, 8:61 at 114.

<sup>43</sup> See Qur'an, *supra*, 8:55 at 114.

<sup>44</sup> *The Gospel According to Matthew*, 5:9, in *THE CATHOLIC STUDY BIBLE 13* (New York, New York: Oxford University Press, 1990, New American Bible trans.). [Hereinafter, *BIBLE*.]

Beyond the Qur'anic passages, there are several *hadiths* in which Muhammad testifies to the importance of honoring and respecting non-Muslims, and inspiring his followers toward peaceful exchanges with them. For example, *Imām* Bukhari narrates the following *hadiths*:

- Anybody who believes in Allāh and the Last Day should not harm his neighbor, and anybody who believes in Allāh and the Last Day should entertain his guest generously, and anybody who believes in Allāh and the Last Day should talk what is good or keep quiet (*i.e.*, abstain from all kinds of evil and dirty talk).<sup>45</sup>
- Whoever killed a *Mu'āhid* (a person who is granted the pledge of protection by the Muslims) shall not smell the fragrance of Paradise though its fragrance can be smelt at a distance of forty years (of traveling).<sup>46</sup>

These statements are resolute and unequivocal. The first of them, while not creating an affirmative obligation to "love" thy neighbor, demands no harm be done to the neighbor, regardless of his or her faith. Further, it mandates generosity toward guests, regardless of their faith. The second *hadith* explains that killing a person, regardless of faith, who has been guaranteed safe conduct is an offense punishable by condemnation to hell. A third relevant *hadith* is as follows:

"Beware on the Day of Judgment" the Prophet said while pointing to his chest, "I shall myself be complainant against him who wrongs a non-Muslim citizen of a Muslim state or lays on him a responsibility greater than he can bear or deprives him of anything that belongs to him. Whoever kills a non-Muslim ally is forbidden by God to smell the scent of Paradise that can be smelled from a distance of 70 years away."<sup>47</sup>

Here, too, is a clear, robust statement against committing an injustice toward a non-Muslim. However, it is qualified by the context in which that person lives, namely, in a Muslim state. It does not cover the treatment of non-Muslims in other spheres.

In sum, a variety of Qur'anic passages and *hadiths* underscore, albeit with varying degrees of strength and scope, a crucial idea in Islam: peace and harmony between people of different faiths should be the foundation of a society, and Muslims should work toward this cause. In this respect, recall the proper Muslim greeting: *Asalamu Alaykum*, which means "Peace Be Unto You." In contrast, the statement "Peace Be with You" tends to be uttered in Catholic Christianity only as

<sup>45</sup> BUKHARI, *supra*, at vol. VIII, book LXXIII (The Book of Al-Ādāb (Good Manners)), p. 29, *hadith* no. 47.

<sup>46</sup> BUKHARI, *supra*, at vol. IX, book LXXXIII (The Book of Ad-Diyāt (Blood Money)), p. 37, *hadith* no. 49.

<sup>47</sup> Ibn Hujr Al-Asqalani, MUWAFQAQ AL-AKHABAR AL-KHABAR, 2184, posted at [www.dorar.net/enc/hadith/%D8%AD%D8%B1%D9%85+%D8%AD%D8%AC%D9%8A%D8%AC%D9%87/+d1%2C2+w](http://www.dorar.net/enc/hadith/%D8%AD%D8%B1%D9%85+%D8%AD%D8%AC%D9%8A%D8%AC%D9%87/+d1%2C2+w) (original in Arabic, translated by Jomana Qaddour). This *hadith* also is narrated by Al Mawardi:

Beware on the Day of Judgment; I shall myself be complainant against him who wrongs a non-Muslim citizen of a Muslim state or lays on him a responsibility greater than he can bear or deprives him of anything that belongs to him.

Compilation of *Sahih Al-Mawardi* (original in Arabic, translated by Jomana Qaddour).

part of the Mass, but not as an everyday greeting. "*Asalamu Alaykum*" also is said by Muslims at the end of each prayer, five times a day, and thus is an integral part of the Second of the Five Pillars of Islam. Symbolically, this greeting and prayer-ending phrase bespeaks the religious significance of peace in Islam. Sadly, however, this relationship is distorted by extremists, who dwell on a different one, namely, between *jihād* and war.

### [B] Love Your Enemies?

While by no means perfect travelers along the "High Road" throughout history, this path is familiar to Catholic Christians. Indeed, *The Gospel According to Matthew* records the words of Christ on love of enemies:

<sup>48</sup>"You have heard that it was said, 'You shall love your neighbor and hate your enemy.' <sup>49</sup>But I [Jesus] say to you, love your enemies, and pray for those who persecute you, <sup>45</sup>that you may be children of your heavenly Father, for He makes His sun rise on the bad and the good, and causes rain to fall on the just and the unjust. <sup>46</sup>For if you love those who love you, what recompense will you have? Do not the tax collectors do the same? <sup>47</sup>And if you greet your brothers only, what is unusual about that? Do not the pagans do the same? <sup>48</sup>So be perfect, just as your heavenly Father is perfect."<sup>48</sup>

Likewise, in his *Letter to the Romans*, Saint Paul writes:

<sup>14</sup>Bless those who persecute [you], bless and do not curse them. . . . <sup>15</sup>If possible, on your part, live at peace with all. <sup>16</sup>Beloved, do not look for revenge but leave room for the wrath; for it is written "Vengeance is mine, I will repay, says the Lord." <sup>20</sup>Rather, "if your enemy is hungry, feed him; if he is thirsty, give him something to drink; for by doing so you will heap burning coals upon his head."<sup>49</sup>

And, the Apostle Peter states in *The First Letter of Peter*:

<sup>8</sup>Finally, all of you, be of one mind, sympathetic, loving toward one another, compassionate, humble. <sup>9</sup>Do not return evil for evil, or insult for insult; but on the contrary, a blessing, because to this you were called, that you might inherit a blessing.<sup>50</sup>

These passages embody a contrast with Islamic doctrine on the treatment of enemies. Islamic doctrine is not antithetical to Catholicism. Rather, it does not go far enough.

To instruct the faithful to act with restraint, mercy, and forgiveness, and fight only in self-defense, is noble. But, to instruct the faithful not only to love and pray for their enemies, but also to strive to be perfect like God, is radical. Moreover, embedded in the metaphor of Matthew, chapter 5, verse 45 is a precept about judgment. The sun shines, and rain falls, on both good and bad people, and we

<sup>48</sup> *The Gospel According to Matthew*, 5:43-48, in BIBLE, *supra*, at 15.

<sup>49</sup> *The Letter to the Romans*, 12:14, 18-20, in BIBLE, *supra*, at 246.

<sup>50</sup> *The First Letter of Peter*, 3:8-9, in BIBLE, *supra*, at 379.

cannot know why. Only God knows, and it is for God to judge the good from the bad, at the appropriate time, and in the appropriate manner. In the meantime, while we do not have to (and cannot possibly) "like" everyone, we can "love" them in the sense of wanting for them what is objectively good. Or, put directly as Saint Paul does, judgment and wrath are the province of God.

### § 49.04 JIHĀD AS WAR?

#### [A] Distinction between "*Jihād*" (Struggle) and "*Ḳatl*" (Killing)

On certain occasions, the Qur'ān mentions war and fighting, but does not use the word "*jihād*" in the relevant passages. In fact, when the Qur'ān does use the word "fight," which it does in various *ayat*, albeit not in the same context in each *ayah*, the Arabic term it employs is a verbal command: "*katl*," or *katloo* (plural).<sup>51</sup> The word "*jihād*" could have been used equivalently with "fight," but was not. Herein lies the key point: there is no instance in the Qur'ān when the words "fight" and "*jihād*" are used interchangeably.

Muslims contend that readers who truly understand the spirit of the Qur'ān understand that this linguistic difference exists for a reason. The words "*jihād*" and "*katl*" were not meant to be synonymous. Moreover, Muslims assert, neither the Prophet nor his *Ṣahābah* liked fighting, and Allāh knew this. Hence, Muhammad said:

"Fighting is ordained for you, *though you dislike it*. You may dislike something although it is good for you, or like something although it is bad for you: God knows and you do not."<sup>52</sup>

Purportedly, there is a *ḥadīth* narrated by a Companion that claimed Muhammad, upon returning from battle, said:

"We return from the lesser *jihād* to the greater *jihād*."<sup>53</sup>

This *ḥadīth* often is quoted by Islamic extremists to justify the calling of "*katl*" as "*jihād*." However, the *ḥadīth* is weak and its origin uncertain, if not entirely unknown.<sup>54</sup> Most Muslim scholars put little credence in it, and regard it as unauthentic. Despite its weakness, this *ḥadīth* fosters debate on the link between *jihād* and war. Ironically, Muhammad appears to be saying that battle is a "lesser" *jihād*, and thereby indicating the greater struggle is within oneself. In sum, the

<sup>51</sup> See Ali, *supra*.

<sup>52</sup> Qur'AN, *supra*, 2:216 at 24 (emphasis added).

<sup>53</sup> Quoted in IBS TAYMIYYAH, AL-MUSTAḌIRAK AL-ĀLMĀJMOO', 221:1, posted at [www.dorar.net/enc/hadith/%D8%A7%D9%84%D8%AC%D9%87%D8%A7%D8%AF+%D8%A7%D9%84%D8%A3%D8%B5%D8%BA%D8%B1/+p](http://www.dorar.net/enc/hadith/%D8%A7%D9%84%D8%AC%D9%87%D8%A7%D8%AF+%D8%A7%D9%84%D8%A3%D8%B5%D8%BA%D8%B1/+p) (original in Arabic, translated by Jomana Qaddour). See also IBS TAYMIYYAH, MAJMOO' AL-FATAWA 11:197 (concerning this topic).

<sup>54</sup> Telephone Interview by Ms. Jomana Qaddour with Dr. Hamed Ghazali, Ph.D., Adjunct Professor at the American Muslim University, Chairman of the Muslim American Schools (MAS) Council of Islamic Schools, and Director of the Houston Qur'ān Academy (29 March 2009).

majority of references to *jihād* in the Qur'ān and *hadīth* do not speak of taking up arms or engaging in battle.

### [B] *Jus Ad Bellum, Jus In Bello, and Power to Declare War*

The Qur'ān and Prophet speak of defensive battles and the protection of one's life, property, and family. There is an immediate similarity with the familiar delineation in Public International Law between:<sup>55</sup>

- *Jus ad bellum* (right to wage war), i.e., the law on the appropriate grounds for going to war and thereby on the right to use force.
- *Jus in bello* (justice in war), i.e., the law on appropriate conduct during wartime.

It might even be speculated that Islamic scholars contributed to this distinction.

As for *jus in bello*, both *Sunnīs* and *Shītes* agree as to the regulations regarding invocation and the permissible acts during warfare. There should be no torture, killing of non-combatants, or burning of cultivation.<sup>56</sup> However, generally speaking, the emphasis in Islamic International Law scholarship has been on *jus ad bellum*.

In this respect, with one notable exception, differences among the Four *Sunnite* Schools, and between *Sunnites* and *Shītes*, on *jihād* and warfare are few. The exception concerns who has the power to declare war. According to *Sunni* scholars, only a Caliph, with the support of the *ulema*, can declare war.<sup>57</sup> The existence of a Caliph presumes the existence of a legitimate Islamic state, without which war cannot be declared. In contrast, *Shītes* hold that all legitimate forms of warfare are defensive. Therefore, a *Shīte Imām* (in this context, analogous in secular authority to a Caliph) is not necessary for warfare.<sup>58</sup>

### [C] Fighting in Self-Defense

In respect of *jus ad bellum*, *Sunni* and *Shīte* scholars identify two distinct cases in which fighting is permissible under the *Shar'ā*: fighting in self-defense and fighting in the cause of Allāh. Arguably, a critical review of the history of Islam suggests that the first instance of warfare came 15 years after the first verse of the Qur'ān was revealed, that is, 15 years after 610 A.D., or 625 A.D., which in the Islamic calendar is the second year of *Hijra*. Until permission was given through the Qur'ān to the Prophet, Muhammad refused to let his companions fight the pagan Meccans, even though some of them had beaten, robbed, and killed the early

<sup>55</sup> See STEPHEN C. McCaffrey, UNDERSTANDING INTERNATIONAL LAW § 8.02 at 236, § 9.01[C] at 256 (Newark, New Jersey: LexisNexis, 2006); MARK JANIS, INTERNATIONAL LAW 176-77 (New York, New York: Aspen Publishers, 5th ed. 2008).

<sup>56</sup> See JOHN L. ESPOSITO, UNHOLY WAR: TERROR IN THE NAME OF ISLAM 38-39 (New York, New York: Oxford University Press, 2002). (Hereinafter, *Unholy War*.)

<sup>57</sup> See UNHOLY WAR, *supra*, at 38.

<sup>58</sup> See UNHOLY WAR, *supra*, at 38-39.

Muslims and pressured them to renounce the Prophecy of Mohammad.<sup>59</sup> With the Battle of Badr, the first verses in the Qur'ān on defensive *jihād* were revealed:

<sup>190</sup>Fight in God's cause against those who fight you, but do not overstep the limits . . . <sup>192</sup>Fight them until there is no more persecution, and [your] worship is devoted to God. If they cease hostilities, there can be no [further] hostility, except towards aggressors.<sup>60</sup>

The Qur'ān describes regulations and prohibitions associated with warfare, such as who is to fight and who is exempted (as in *surah* 48, *ayah* 17, and *surah* 9, *ayah* 91), when hostilities must cease (in *surah* 2, *ayah* 192), and how prisoners should be treated (in *surah* 47, *ayah* 4).<sup>61</sup> It enjoins Muslims not to damage cultivated or residential areas, and prohibits them from killing women, children, and non-combatants.

Indeed, as regards *jus in bello*, the key rule is proportionality: the conduct of warfare is to be only commensurate with the threat, as the Qur'ān emphasizes:

. . . So if anyone commits aggression against you, attack him as he attacked you, but be mindful of God, and know that He is with those who are mindful of Him.<sup>62</sup>

The Qur'ān also grants permission to Muslims to protect and defend their religious rights, and those of their fellow Muslims who had been prohibited from leaving Mecca or who did not have the financial means to do so and remained victims of religious persecution in Mecca. *Surah* 22 states:

<sup>39</sup>Those who have been attacked are permitted to take up arms because they have been wronged — God has the power to help them — <sup>40</sup>those who have been driven unjustly from their homes only for saying, "Our Lord is God." If God did not repel some people by means of others, many monasteries, churches, synagogues, and mosques, where God's name is much invoked, would have been destroyed. God is sure to help those who help His cause — God is strong and mighty. . . .<sup>63</sup>

Note the emphasis on self-defense, though certainly forgiveness and peace, whenever possible, is held as the better choice. Note, too, there is no clear "Turn the Other Cheek" exhortation, in contrast with Catholic Christianity.

To put the above-quoted passages in contemporary context, Muslim scholars generally would argue that defensive warfare to protect the territory of Muslims and fighting those who oppress Muslims, is authorized, but peaceful means of resolution and forgiveness are the preferred responses. Further, this scheme generally accords with the rules followed by non-Muslim states: they are permitted to defend themselves against external aggression and occupation. Of course, this scheme does not address questions about pre-emptive self-defense, and anticipatory

self-defense, which given the present-day destructive potential of weaponry, are critically important.

### [D] Fighting for Cause of Allāh and Four Caveats

It is incumbent on Muslims to work for justice, and create an environment to allow them to follow the Will of Allāh. Individual *jihād* is partially a struggle to eradicate injustice and oppression. It entails withstanding societal pressure to do good works and stand firmly as a believer. Put bluntly, Islam does not treat oppression lightly.

Accordingly, Muslims who live in oppressive circumstances, under a tyrannical ruler who, for example, forcefully evicts law-abiding citizens from their property without cause, or jails non-violent opponents, should strive for justice. But, their intentions must be to serve Allāh, not themselves and their own individual self-interests.<sup>64</sup> In *surah* 4, *ayat* 74-75, the Qur'an speaks about the aims of war:

<sup>74</sup>Let those of you who are willing to trade the life of this world for the life to come, fight in God's way. To anyone who fights in God's way, whether killed or victorious, We shall give a great reward. <sup>75</sup>Why should you not fight in God's cause and for those oppressed men, women, and children who cry out, "Lord, rescue us from this town whose people are oppressors! By Your grace, give us a protector and helper!" <sup>76</sup>The believers fight for God's cause, while those who reject faith fight for an unjust cause. Fight the allies of Satan: Satan's ploys are truly weak.<sup>65</sup>

Indubitably, this passage, which pertains to *jus ad bellum*, needs to be read with care. Four caveats are in order.

First, the entire passage must be read in historical context, albeit at the risk of committing the Orientalist Fallacy. At the time *ayat* 74-76 were revealed, the Prophet sent his delegates to eight neighboring rulers, calling them to embrace Islam. The Persian and Roman emperors at the time were known for their oppressive ruling methods. Some of the rulers killed the delegations sent by the Prophet.<sup>66</sup> At that point, Muslims urge, Muhammad permitted the eradication of oppression in the lands of the neighboring empires, so as to permit individuals there to live under just circumstances, embrace Islam, or otherwise practice their religion freely.

Second, *ayah* 74 is easily susceptible to abuse. Who decides "God's cause"? History is littered with individuals claiming they were justified to take up violent means to remedy oppression in the name of God. *Ayah* 74 holds out martyrdom as a desirable fate. But, some would-be martyrs hold to a distorted conception of martyrdom, erroneously understanding what a martyr really is or does. A martyr is a witness to the truth, and by no means must their witnessing entail an act of aggression on their part. As the history of Christian martyrs who died at the hands of the Ancient Romans shows, and as the history of more recent martyrs, such as

<sup>64</sup> See *War System in Islam*, *supra*.

<sup>65</sup> *Qur'an*, *supra*, 4:74-76 at 57.

<sup>66</sup> See *War System in Islam*, *supra*.

Saint Maximilian Kolbe, who died at the hands of the Nazis, also shows, martyrdom involves an act of sacrifice at the hands of an aggressor. Not surprisingly, the *Oxford English Dictionary* defines "martyr" as:

[a] person who is put to death for refusing to renounce a faith or belief.<sup>67</sup>

Thus, to "make a martyr of oneself" is to "accept . . . unnecessary discomfort."<sup>68</sup> The issue is whether a true martyr goes out looking to make trouble and start a fight. Another way to put the point is in terms of spiritual discernment. The ability to see clearly matters that pertain to God, and discern an appropriate course of conduct is a rare gift. Typically, those who are blessed with it are not the first to call others to launch violent combat.

Third, a literal reading of *ayat* 75-76 can yield dangerous consequences. Obviously, the history of war knows no religious or geopolitical boundaries. Through the millennia, one faith has launched a holy war or crusade against another. Political leaders have plunged their nations into war against other nations, whipping up a frenzy of hatred that demonizes the opponent by manipulating religious language, concepts, and metaphors. Oppression exists as part of the human condition and oppressors permeate history. If oppression were the *casus belli* (the incident or cause of war, i.e., the cause of war) for going to war against oppressors, then war — both international and civil — would be a permanent state in the human experience.

Thus, reading *ayat* 75-76 literally as permission from Allāh to fight, in a violent sense, for His "cause" for "oppressed" persons against "oppressors" is a recipe for disaster. With the existence of weapons of mass destruction (WMD), perhaps a literal reading would spell the eradication of the human species. Out of necessity of collective self-preservation, "fight" has to be read to refer to non-violent methods. That is all the more true given the Arabic verb used in connection with "unjust cause" in *ayah* 76 (as well as "unjust tyrants" in *surah* 4, *ayah* 60): *taghut*. As Professor Abdel Haleem points out, this verb can have a "multitude of meanings," referring to an opponent of the Prophet, idol, oracle, or tyrannical ruler.<sup>69</sup> With this verbal latitude, the "just causes" for conflict would be limitless.

The fourth caveat follows logically from the first three. To fight Satan, whose ploys are "truly weak," as *ayah* 76 states, is it not more efficacious to take the proverbial "high road"? Consider the response of Jesus when entering a Samaritan village en route to Jerusalem, as recounted in Chapter 9 of *The Gospel According to Luke*:

<sup>51</sup>When the days for his [Jesus'] being taken up were fulfilled, he resolutely determined to journey to Jerusalem, <sup>52</sup>and he sent messengers ahead of him. On the way they entered a Samaritan village to prepare for his reception there, <sup>53</sup>but they [the Samaritans] would not welcome him because the destination of his journey was Jerusalem. <sup>54</sup>When the disciples James and John saw this they asked, "Lord, do you want us to call down

<sup>67</sup> OXFORD AMERICAN DICTIONARY AND THESAURUS (New York, New York: Oxford University Press, 2003) at 919 (entry for "martyr"). (Hereinafter, *DICTIONARY*.)

<sup>68</sup> *DICTIONARY* at 919 (entry for "martyr") (emphasis added).

<sup>69</sup> See *Qur'an*, *supra*, fn. b to 4:60 at 56, fn. b to 4:76 at 57.

fire from heaven to consume them?" <sup>55</sup>Jesus turned and rebuked them, <sup>56</sup>and they journeyed to another village.

<sup>57</sup>As they were proceeding on their journey someone said to him, "I will follow you wherever you go." <sup>58</sup>Jesus answered him, "Foxes have dens and birds of the sky have nests, but the Son of Man has nowhere to rest his head." <sup>59</sup>And to another he said, "Follow me." But he replied, "[Lord,] let me go first and bury my father." <sup>60</sup>But he answered him, "Let the dead bury their dead. But you, go and proclaim the kingdom of God."<sup>70</sup>

While the New Testament Parable of the Good Samaritan and the Samaritan woman cast a favorable light on Samaria, the above-quoted passage does not.<sup>71</sup> (Samaria was territory between Judea and Galilee, to the west of the Jordan River, and for "ethnic and religious reasons, the Samaritans and the Jews were bitterly opposed to one another."<sup>72</sup>) At the time of this journey, it was hazardous for Jews to travel through Samaria. Samaritans were not always hospitable toward Jews, much less one like Jesus, who had a controversial message to share. The followers accompanying Christ specifically ask whether they should resort to violence against the Samaritans in retaliation for the unkind treatment they accorded Jesus. His response is a sharp "no," admonishing his followers to let the spiritually dead (i.e., those who do not believe) bury their physically dead, to move on and "proclaim" (not "impose") the message, and thereby to take the high road.<sup>73</sup>

#### § 49.05 KHARIJITES AND ASSASSINS

Tragically, the monstrous transposition of meanings, and *bona fide* terrorism, are not phenomena of just the 20th and 21st centuries. Nearly since the advent of Islam, the *umma* "experienced the terror of religious extremist movements."<sup>74</sup> The *Kharijites* and the Assassins, both fundamentalist outliers in the religious and political sense, separated from mainstream Muslims and arguably were the first Islamic terrorists. Both groups separated from Muslim societies and established what they believed was a prophetic model and radical form of *jihād*.

The term "*Kharijites*" means "those who went out," and is associated with "*Khārij*," which means "stranger" or "third party." Historically, "*Khārijites*" also were called "*Shurat*," which means "buyers." This suggests they have traded their mortal life ("*al dunya*") for another life ("*al akhera*"), namely, one with God. The *Khārijites* supported the first three of the Four Rightly Guided Caliphs (*Rashidun*), and initially supported the fourth such Caliph, 'Ali, cousin and son-in-law of Muhammad, and the first *Shi'ite Imām*. Subsequently, they rejected 'Ali, and revolted against him, thereby becoming a group distinct from both *Sunnis*

and *Shi'ites*. A member of the *Khārijites* (specifically, one of the early groups within the movement, called the "*Harūriyya*"), Abd Al Rahman ibn Muljam, assassinated 'Ali.

The *Khārijites* insisted that any pious, able Muslim, whether or not related by blood to the family of the Prophet Muhammad (as 'Ali was), could serve as *Imām* in the sense of religious and political leader of the *umma*. They also insisted on the right to revolt against any leader who deviated from the example of the Prophet or the first two Caliphs, Abū Bakr and 'Umar. In addition to their political ideas, the *Khārijites* articulated religious and legal precepts that distinguished them from *Sunnites* and *Shi'ites*. For example, the *Khārijites* (specifically, the *Harūriyya*) accepted the proposition that a woman could be an *Imām*.

By the 7th century A.D., the *Khārijites* became concentrated in what now is Southern Iraq. Today, all that remains of the *Khārijites* are the "*Ibādī*" Muslims, who dominate in Oman, and also are found in certain parts of North Africa, and in Zanzibar. The *Ibādīs* reject the name "*Khārijites*" for themselves and take the label "People of Justice and Uprightness" (*Ahl Al-Adl wal Istiqama*).

The *Khārijites* demarcated strict lines between belief and disbelief. They were convinced it was their duty to kill those who sinned unless they repented.<sup>75</sup> Yet, this notion is contrary to the Qur'ān and *Sunnah*. Likewise, the Assassins departed on a crooked path from the true spirit of what Muhammad preached. They hid in clandestine communities and were guided by secret masters to kill both Muslims and Crusaders, and assassinate any *Abbasid* leaders, *ulema*, or generals they regarded as corrupt.<sup>76</sup>

In more recent centuries, many individuals have associated themselves with *jihād* to justify revolt against regimes they find antithetical to the establishment of true Islam. These individuals include Ibn Taymiyyah (1263-1328 A.D.), Mohammad ibn Abd al-Wahhab (1703-91), Hasan Al Banna (1906-1949), Mawlana Mawdudi (1903-1979), and Sayyid Qutb (1906-1966).<sup>77</sup> Their influence on the "*jihādī*" movement has been considerable. In contemporary times, the work of Sayyid Qutb, in particular, is famous (or infamous) for its influence on modern day Muslim political revolutionaries, most of whom are "terrorists" in the contemporary legal sense.<sup>78</sup>

Osama bin Laden, his followers, and many other contemporary extremists have committed themselves to using "*jihād*" as a way to transform their political and social environments into what they regard as Islamically acceptable, rejecting anything contradictory to their vision. A common theme among the extremists is rallying against America, Europe, and Israel to create an "us-versus-them" sentiment based on a rigid delineation between "right" and "wrong," and "pure" and "evil." To inflame emotions, they capitalize on the conflict between Israel and the Palestinians, resulting in some groups doing what most Muslims regard as

religiously forbidden: suicide bombings and unrestrained offensive war to resolve the conflict.

## Chapter 50

### TERRORISM

A fanatic is one who can't change his mind and won't change the subject.

Sir Winston S. Churchill (1874-1965)  
British First Lord of the Admiralty (1911-1915, 1939-1940),  
British Prime Minister (1940-1945, 1951-1955),  
Awarded the Nobel Prize in Literature (1953)

#### SYNOPSIS

##### § 50.01 JIHĀD AS TERRORISM?

- [A] What is "Terrorism"?
- [B] Condemnation in Islamic Criminal Law

##### § 50.02 MUSLIM BROTHERHOOD

- [A] Origin, Evolution, and Growth
- [B] Philosophy, Principles, and Objectives
- [C] Terrorism

##### § 50.03 AL QAEDA

- [A] Origins
- [B] Development and Organizational Structure
- [C] Principles and Objectives
- [D] Legality of *Al Qaeda* Actions under Islamic Law of War
- [E] Future Prospects

##### § 50.01 JIHĀD AS TERRORISM?

###### [A] What is "Terrorism"?

Investigating the relationship between Islam and terrorism begs a key question. What is "terrorism"? The *Oxford English Dictionary* defines terrorism as:

a policy intended to strike with terror those against whom it is adopted; the employment of methods of intimidation; the fact of terrorizing or condition of being terrorized.<sup>1</sup>

However, from a legal perspective, this definition is insufficiently precise.

<sup>1</sup> OXFORD AMERICAN DICTIONARY AND THESAURUS (New York, New York: Oxford University Press, 2003) at 1989 (entry for "terrorism").

Turning to legal approaches, the term "terrorism" first was defined by the League of Nations in the 1930s, responding to ethnic separatist violence.<sup>2</sup> The League articulated a definition as part of an international legal regime to promote peace and stability. However, the League definition is not the only one. Indeed, there is no single, universally accepted legal definition of "terrorism." Rather, there are several definitions, even multiples ones within the United States government. Among the most prominent definitions are the following:

- League of Nations Definition —

All criminal acts directed against a State and intended or calculated to create a state of terror in the minds of particular persons or a group of persons or the general public.<sup>3</sup>

- United Nations Conventions —

Since 1963, under the auspices of the United Nations, 12 universal conventions and protocols against terrorism have been issued.<sup>4</sup> Their purpose is to create a global consensus as to what acts qualify as "terrorism," and thereby can be prosecuted as such. Hijacking an aircraft is an example. Not all United Nations members have signed all of them. The United Nations Office on Drugs and Crime collects these agreements.

- 1998 Arab Convention for the Suppression of Terrorism —

In 1998, meeting in Cairo, Egypt, the Council of Arab Ministers of the Interior and the Council of Arab Ministers of Justice agreed to the *Arab Convention for the Suppression of Terrorism*. That Convention defines "terrorism" as:

Any act or threat of violence, whatever its motives or purposes, that occurs in the advancement of an individual or collective criminal agenda and seeking to sow panic among people, causing fear by harming them, or placing their lives, liberty or security in danger, or seeking to cause damage to the environment or to public or private installations or property or to occupying or seizing them, or seeking to jeopardize a national resources.<sup>5</sup>

- United States Federal Criminal Code Definition —

["Terrorism" refers to] . . . activities that involve violent . . . or life-threatening acts . . . that are a violation of the criminal laws of the United States or of any State and . . . appear to be intended (i) to intimidate or coerce a civilian population; (ii) to influence the policy of a government by

intimidation or coercion; or (iii) to affect the conduct of a government by mass destruction, assassination, or kidnapping . . . .<sup>6</sup>

- United States *USA PATRIOT Act* Definition —

["Terrorism" refers to] activities that

- (A) involve acts dangerous to human life that are a violation of the criminal laws of the U.S. or of any state, that
- (B) appear to be intended
  - (i) to intimidate or coerce a civilian population,
  - (ii) to influence the policy of a government by intimidation or coercion, or
  - (iii) to affect the conduct of a government by mass destruction, assassination, or kidnapping, and
- (C) occur primarily within the territorial jurisdiction of the U.S.<sup>7</sup>

- United States Law on Country Reports —

The Secretary of State must provide to Congress each year Country Reports on terrorism. For that purpose, American law defines "terrorism" as:

- (d) Definitions

As used in this section —

- (1) the term "international terrorism" means terrorism involving citizens or the territory of more than 1 country;
- (2) the term "terrorism" means premeditated, politically motivated violence perpetrated against noncombatant targets by subnational groups or clandestine agents;
- (3) the term "terrorist group" means any group, or which has significant subgroups which practice, international terrorism;
- (4) the terms "territory" and "territory of the country" mean the land, waters, and airspace of the country; and
- (5) the terms "terrorist sanctuary" and "sanctuary" mean an area in the territory of the country —
  - (A) that is used by a terrorist or terrorist organization —

<sup>2</sup> See Amy Zalman, Ph.D., *Definitions of Terrorism*, posted at [http://terrorism.about.com/od/whatisterrorism/1ss/DefineTerrorism\\_2.htm](http://terrorism.about.com/od/whatisterrorism/1ss/DefineTerrorism_2.htm). [Hereinafter, Zalman.]

<sup>3</sup> See Zalman, *supra*.

<sup>4</sup> See Zalman, *supra*.

<sup>5</sup> See Zalman, *supra*.

<sup>6</sup> 18 U.S.C. § 2331.

<sup>7</sup> The full title from which the acronym is drawn is *Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001*, Pub. L. 107-56 115 Stat. 272 (26 October 2001), codified at multiple sections in titles 8, 12, 15, 18, 20, 31, 42, 47, 49, 50, and 51. The above definition is found in title 18, which is the Federal Criminal Code.

- (i) to carry out terrorist activities, including training, fundraising, financing, and recruitment; or
- (ii) as a transit point; and
- (B) the government of which expressly consents to, or with knowledge, allows, tolerates, or disregards such use of its territory and is not subject to a determination under —
  - (i) section 2405(j)(1)(A) of the Appendix to title 50;
  - (ii) section 2371 (a) of this title; or
  - (iii) section 2780 (d) of this title.\*

• United States Department of Defense (DOD) —

The DOD *Dictionary of Military Terms* defines "terrorism" as:

The calculated use of unlawful violence or threat of unlawful violence to inculcate fear; intended to coerce or to intimidate governments or societies in the pursuit of goals that are generally political, religious, or ideological.<sup>8</sup>

• United States Federal Bureau of Investigation (FBI) Definition —

The unlawful use of force or violence against persons or property to intimidate or coerce a Government, the civilian population, or any segment thereof, in furtherance of political or social objectives.<sup>10</sup>

These definitions are not entirely reconcilable. For example, the 1998 *Arab Convention* states that motivation does not matter, whereas the American definitions all make motivation an element of the definition.

Nevertheless, as a general synthesis, the definitions contain six common elements. "Terrorism" involves:

- (1) Targeting non-combatants.
- (2) Pre-meditation.
- (3) Unlawful act or threat of violence.
- (4) Inculcation of fear of a danger to life, liberty, or property.
- (5) Intention to coerce or intimidate a government or non-combatants.
- (6) Goal (assuming motivation matters) is to pursue a political, religious, or ideological end.

Obviously, when the Qur'ān was revealed, none of the above-quoted definitions, nor the six-point synthesis of them, was in existence. Thus, investigating the relation-

\* 22 U.S.C. § 2656(d).

<sup>8</sup> See Zalman, *supra*.

<sup>10</sup> See Zalman, *supra*.

ship between Islam and terrorism imposes a contemporary legal framework retrospectively.

This imposition can be perilous. Muslims at the time of the Prophet, and for several centuries thereafter, as well as non-Muslims, did not conceive of "terrorism" in terms of these elements, if they even thought in terms of the concept of "terrorism." However, insofar as the inquiry pertains to contemporary behavior, then using the modern legal framework not only is reasonable, but is the purpose for that framework.

## [B] Condemnation in Islamic Criminal Law

As discussed earlier, "jihād" has no single meaning to a practicing Muslim. The *jihād* of one adherent may not be the same as that for another follower. Though there are commonalities, each person has a unique struggle to draw nearer to Allāh. Unfortunately, the elasticity of the meaning of *jihād* has created somewhat of a vacuum, filled by extremists. They have re-defined "jihād" closer to "terrorism" in the contemporary legal sense outlined above. To the horror of the vast majority of Muslims and non-Muslims alike, extremists have defiled what is very much a spiritual term.

Islam takes a strong position against terrorism, and like the modern American legal regime, is grounded in Criminal Law. What would be called "terrorism" today is a crime against the public order (*hirabah*), i.e., an act that threatens the security of society. Such acts include highway robbery (*kaʿ al-ṭarīq*), but are not limited to that example. The relevant Qur'ānic passage is *surah 5, ayah 33*:

Those who wage war against God and His Messenger and strive to spread corruption in the land should be punished by death, crucifixion, the amputation of an alternate hand and foot, or banishment from the land; a disgrace for them in this world, and then a terrible punishment in the Hereafter, unless they repent before you over power them: in that case bear in mind that God is forgiving and merciful.<sup>11</sup>

The punishment for a *hirabah* offense adduces the strength of Islamic Criminal Law against terrorism.<sup>12</sup> The offense is a *ḥaqq Allāh* crime, triggering a *ḥadd* punishment, which by nature are the severest. Muslim scholars do not limit this punishment to one type of crime. They agree "this is the punishment for those who commit acts of terrorism against other people, such as armed robbery or hijacking a plane."<sup>13</sup>

<sup>11</sup> THE QUR'AN — A New Translation by M.A.S. Abdel Haleem 5:33 at 71 (emphasis added) (Oxford, England: Oxford University Press, 2004). [Hereinafter, QUR'AN.]

<sup>12</sup> See Hamed Ghazali, Ph.D., *Islam for Peace and Justice*, 3 THE AMERICAN MUSLIM MAGAZINE 10, 18 (March 2002). [Hereinafter, Ghazali.] Dr. Ghazali is an American Muslim scholar, Adjunct Professor at the American Muslim University, Chairman of the Muslim American Schools (MAS) Council of Islamic Schools, and Director of the Houston Qur'ān Academy.

<sup>13</sup> See GHAZALI, *supra*, at 18.

Some *Shari'a* scholars interpret the term "banishment from the land" to mean jail, or isolation from society.<sup>14</sup> Others interpret it to mean execution, since it the verse states "banishment from the land," meaning all of the earth.<sup>15</sup> In brief, the punishment for the spreading of mischief and terrorism is severe. In practice, it is intended not only to provide specific deterrence (precluding the perpetrators from committing the offence again), but also general deterrence (discouraging others from engaging in that offense).

Because "terrorism," understood in the Qur'anic sense of spreading mischief through the land, never is condoned, it is clearly erroneous to interchange the terms "jihad" and "terrorism." "Jihad" is encouraged; "terrorism" is a serious criminal offense. The exercise of discerning and submitting to the Will of God has nothing to do with striking fear through violence or the threat thereof in the hearts of innocent persons.

## § 50.02 MUSLIM BROTHERHOOD

### [A] Origin, Evolution, and Growth

The Muslim Brotherhood (*Ikhwan al-Muslimin*) is a transnational *Sunni* movement and the largest political opposition group in many Arab nations, particularly Egypt. The movement is tremendously influential in many Muslim countries, operating networks of Islamic charities and grassroots social organizations. Most countries in which the Brotherhood is active are not pluralistic, multi-party democracies. Several ruling regimes in Arab countries have banned the Brotherhood. Consequently, restrictions on political activity effectively prevent it from obtaining power through elections.

Unsurprisingly, the Brotherhood tends to be depicted in the extreme: either as an unjustly oppressed group focused on social justice, or a dangerously violent network flirting with terrorism. In truth, for better or worse, contemporary Islamic activism owes much of its ideological and organizational foundations to the principles and *modus operandi* of the Muslim Brotherhood. The organization has had an incalculable impact on the development of subsequent Islamic movements throughout the Muslim world.

The founder of the Brotherhood was Hassan Al Banna. Born in 1906 in Mahudiya, Egypt, (northwest of Cairo), Al Banna was educated at Al-Azhar University and became a schoolteacher. His father was a local *imam* who adhered to the *Hanbali* School. Following the death of Al Banna in 1949, Sayyid Qutb (1906-1966) became the public voice of the Brotherhood. Qutb was brought up in the Asyut Province of Upper Egypt, in the village of Musha, and his father was a landowner, administrator of the family estate, and a politically activist. Between 1948 and 1950, Qutb studied on a scholarship in Greeley, Colorado, at the Colorado State College of Education, now known as the University of Northern Colorado. In 1949, while in America, he published his first major book, *Social Justice in Islam* (in

Arabic, *Al-Adala Al-Ijtima'iyya fi Al-Islam*). Both Al Banna and Qutb are justifiably regarded as the "trailblazers [and] architects of contemporary Islamic revivalism."<sup>16</sup>

Al Banna established the Muslim Brotherhood in 1928. He intended it to be a religious, political, and social movement, and its credo was and remains:

Allāh is our objective, the Qur'ān is our constitution, the Prophet is our leader, *Jihad* is our way, and death for the sake of Allāh is the highest of our aspirations.<sup>17</sup>

The timing was no accident. In 1928, the Arab Islamic community generally, and Egypt in particular, was in crisis, brought upon by economic and technological stagnation, corrupt leadership, international political turmoil, and Western colonialism. Muslim intellectuals perceived a lack of connection between actions of government, on the one hand, and commands of the *Shari'a*, on the other hand, leading them to label the Arab political elite illegitimate.<sup>18</sup> Thus, unstable conditions and intellectual frustration provided the base for a new mass movement.<sup>19</sup> The Brotherhood attained broad support relatively quickly, with its membership reaching over one million members by 1950.<sup>20</sup>

The primary catalysts for the call of the Brotherhood for comprehensive reform of Islamic society were what Al Banna and his cohort perceived to be imperialistic foreign behavior and "Westernized Muslim leadership."<sup>21</sup> Al Banna believed Western imperialism not only posed political and economic dangers, but also was a cultural threat. Al Banna regarded the "religiocultural penetration" of the West, especially in the spheres of education, law, and social values, as even more harmful in the long-run to Arab Islamic countries than immediate the imperialism of political economy, backed by military power, posed by the non-Muslim West. The intrusive influences in these spheres threatened the very identity, independence, and way of life of the Muslim *ummah*.<sup>22</sup> Declaring Islam an ideological alternative to Western capitalism and Soviet Marxism, Al-Banna saw the Brotherhood as joining intellectual thought with pragmatic action, creating organizations that engaged in political and social activism.

The Muslim Brotherhood primarily recruited followers from mosques, schools, and universities.<sup>23</sup> Its long-term goal was to cultivate a new generation of modern-educated, but Islamically oriented, leaders to assume power in a genuine

Islamic state. Al Banna believed, however, establishment of an Islamic state first required the "Islamization" of society through a gradual, grassroots social change. For this reason, the Brotherhood operated as a fundamentally (but not fundamentalist) populist movement.

### [B] Philosophy, Principles, and Objectives

The stated goal of the Muslim Brotherhood is to "raise the banner of Islam" through political means that revitalize the religion and allow followers to "feel the pulse" of Islam in all aspects of life.<sup>24</sup> What, then, does the organization say must be done in order to achieve such lofty goals? The Brotherhood puts forth two basic objectives.

First, Islamic countries should be free from all foreign, non-Islamic control. Second, free Islamic governments, operating under the *Shari'a*, should be established in all Muslim lands.<sup>25</sup> Note, then, Al Banna did not merely call for seats of power held by Islamists within Arab governments. He went further, demanding actual creation of authentic Islamic states. Going yet one more step, Al Banna advocated the establishment of a commonwealth of Islamic nations having its own central government, with the hope it one day would lead to a new Caliphate.<sup>26</sup>

Like secular and Islamic modernists, Al Banna acknowledged the weaknesses and shortcomings of Muslim society. However, he criticized both groups for their "excessive dependence on the West," which he deemed to be the root cause of the impotence of Muslim societies.<sup>27</sup> Secularists, he argued, cut off religion from society and saw the West as the only model for development. Islamic modernists, he claimed, in their keenness to demonstrate the compatibility of Islam with modernity, relied heavily upon Western values, thus producing a Westernized Islam.<sup>28</sup>

By contrast, for Al Banna, the Brotherhood asserted the complete self-sufficiency of Islam. Faith in the West was misplaced. Al Banna and his followers argued, first, Western democracy had not merely failed to limit, but even contributed directly to, the authoritarianism, corruption, and social injustice

<sup>26</sup> HAWWA, *supra*, at 67.

<sup>27</sup> HAWWA, *supra*, at 124.

<sup>28</sup> Abul Ala Mawdudi, founder of the *Jamaat-i-Islami*, a group created in India and Pakistan with strong ideological ties to the Muslim Brotherhood, wrote extensively on this issue, saying in part:

All these people in their misinformed and misguided zeal to serve what they hold to be the cause of Islam, are always at great pains to prove that Islam contains within itself the elements of all types of contemporary social and political thought and action. . . . [T]his attitude emerges from an inferiority complex, from the belief that we as Muslims can earn no honour or respect unless we are able to show our religion resembles modern creeds and is in agreement with most of the contemporary ideologies.

Abul Ala Mawdudi, *Political Theory of Islam*, in JOHN J. DONOHUE & JOHN L. ESPOSITO EDS., *ISLAM IN TRANSITION: MUSLIM PERSPECTIVES* 252 (New York, New York: Oxford University Press, 1982). The *Jamaat-i-Islami* group is banned as a terrorist organization in many countries.

plaguing Egypt and other Muslim societies. Second, Western secularism and materialism undermined religion, morality, and the family. Third, the Brotherhood condemned the betrayal of Arabs by the West, manifest in its unabashed support for the Israeli occupation of Palestine.<sup>29</sup>

Notably, over the last several decades, the second point has been made in various pronouncements by Popes and other Vatican officials. Betrayal of promises to Arab leaders was a point made following the First World War by none other than T.E. Lawrence (Lawrence of Arabia). Indeed, all of these arguments of the Brotherhood still resonate strongly not only among Arab intellectuals, but among average, every-day Muslims and non-Muslims alike around the world.

For the Muslim Brotherhood, repudiation of the West did not equate with a rejection of modernization. Al Banna differentiated Western values from modern political ideas and institutions. He maintained democratic ideals could be borrowed selectively from the West, if they were informed by Islamic values.<sup>30</sup> This philosophy is reflected in *15 Principles for Agreement*, formulated and published by the Brotherhood in the 1990s as a blueprint for government. The *Principles* are 15 confirmations, as follows:<sup>31</sup>

1. The people are the source of all power, thus it is not permissible for any one individual, party, group, or institution to claim the right to authority, or to continue in power, except with the consent of the people.
2. Total commitment to, and respect of, the principle of power exchange through free and fair general elections.
3. Freedom of personal conviction, including specifically religious conviction.
4. Freedom of establishing religious rites for all the known heavenly religions.
5. Freedom of opinion and the right to publicize it, and to call peacefully to it, within the limitations of the moral values of society that are detailed in the constitution.<sup>32</sup>
6. The right to form political parties. No administrative body should have the power to restrict or stop the application of this right. Rather, an independent judicial authority should be the only source to decide what manifestations of this right would fall outside the ideals and standards of society.
7. The right to public gatherings, the invitation to them, and participation in them, as long as violence or arms are not involved.
8. The right of peaceful demonstrations.

<sup>29</sup> See ISLAMIC THREAT, *supra*, at 125.

<sup>30</sup> See ISLAMIC THREAT, *supra*, at 125.

<sup>31</sup> Muslim Brotherhood Website, *supra*. See also LINJAKUMPU, *supra*, at 64-65.

<sup>32</sup> The "constitution" referred to is the Qur'an.

9. The importance of representing the people through a parliamentary council elected through free and fair elections.
10. The right of every citizen, whether man or woman, to take part in parliamentary elections.
11. The right of every citizen to become a member of parliament through elections.
12. The independence of the judicial system at all levels, plus the need to ensure the judiciary is safe from any source of fear or manipulation, and no person is tried except by a qualified judge.
13. The separation between the prosecution and investigation authorities, plus the need to ensure the public defense authority is independent from the minister of justice.
14. The need for the army to stay clear of politics, and concentrate only on protecting the security of the country from external threats.
15. The need for the police and all other security services to protect the security of the nation and society as a whole, to prohibit them from being used as an instrument of the state to crush opposition opinion.

On paper, it is difficult to argue with these Principles. After all, they are consistent with many features of the United States Constitution and guarantees in the Bill of Rights.

According to the Muslim Brotherhood, democracy is in accordance with the fundamental spirit of Islam, and the *Shar'ā* is inherently affixed to the Islamic form of government.<sup>33</sup> The Brotherhood believes the *Shar'ā* offers ideological and religious objectives that ought to be the sole basis for political decision-making and action. Thus, the ultimate goal of the Brotherhood is establishment of a democratic Islamic state functioning unequivocally according to *Shar'ā*.

### [C] Terrorism

Across its nearly 100-year history, the Muslim Brotherhood has oscillated between two pathways: evolution, a process emphasizing gradual, peaceful change from below; and revolution, the violent overthrow of un-Islamic systems of government and foreign control. In its early years, the Brotherhood advocated the implementation of *Shar'ā* not by violence, but through societal awakening.<sup>34</sup> Significantly, Al Banna did not adopt principles of revolution. He emphasized caution with regard to *jihād*:

[T]here is a big difference between action and *jihād*, between the right *jihād* and the wrong *jihād*. If people are to bear the hardships of *jihād*,

<sup>33</sup> See LINAKUMPU, *supra*, at 70.

<sup>34</sup> See LINAKUMPU, *supra*, at 69.

then it is not unlikely that if they are not supported by the grace of God, they may deviate from the path and lose their goal.<sup>35</sup>

Moreover, Al Banna urged force "only when there [is] no other course open," and said when such force is applied it should be done with "great respect and dignity . . . [and be the] epitome of extreme decency."<sup>36</sup> Despite these foundational caveats, opposition to violence did not remain a primary feature of the agenda of the Brotherhood.

The Muslim Brotherhood became increasingly militant in the 1950s and 1960s, a result of its confrontation with the Egyptian state.<sup>37</sup> Al Banna was assassinated in 1949, and Sayyid Qutb, the new and principal figure in the Brotherhood, led the organization down a revolutionary, violent path. The writings of Qutb, compiled during his years in prison, called for social and political revolution against the repressive Egyptian state. It was after Qutb's stay in the United States, where he observed strong pro-Jewish, anti-Arab sentiments, that he began to resent the non-Muslim West, leading him to categorize all non-*Shar'ā* abiding lands as *dār al-harb* and therefore enemy grounds.<sup>38</sup>

From 1954 to 1971, the Egyptian government systematically cracked down on the Brotherhood. Qutb and thousands of his colleagues and supporters were imprisoned and tortured, which served to radicalize further the Brotherhood and its methods. Qutb fueled re-entment, hatred, and rejection of western and non-Muslim social and political ideologies, and called for the overthrow of the Egyptian government. To protect their power, Egyptian President Nasser and other political leaders demonized Qutb's ideology.

During his time in captivity, Qutb wrote his most important work, *Milestones* (in Arabic, *Ma'alim fi Al-Tariq*), which called for using physical power and *jihād* to restore Islam and re-implement *Shar'ā*. First published in 1964, it is difficult to overstate the ideological impact of *Milestones*. Some commentators label it "political Islam's Communist Manifesto."<sup>39</sup> The analogy is apt, if for no other reason than both books illustrate the power of brevity: The Communist Manifesto, published in 1848, is about 100 pages, and *Milestones* is just 12 chapters, running about 160 pages. The Muslim world, argues Qutb, has lapsed back into *jahiliya*, i.e., the period of ignorance before Islam. A new *jihād* is needed to revive Islam.

For Qutb, this *jihād* must contain two elements. First, there must be holy war against the West, which he labeled the pervasive enemy of Islam and Muslim societies. Second, struggle is required against the "apostate" Arab governments — Egypt being first and foremost — beholden to Western interests. These regimes

had sold out their people, and neglected, even scoffed at, the *Shari'a*.<sup>40</sup> Each element conflicted with the ideals of Egyptian President Gamal Abdel Nasser, who promulgated nationalist, socialist, and secular notions of government. Not surprisingly, Nasser had Qutb hanged in 1966.

The two elements of *jihad* Qutb called for evince why some observers call him the "architect of radical Islam."<sup>41</sup> Moreover, his ideology led the Muslim Brotherhood to be dubbed "the seminal organization for Islamic terrorism."<sup>42</sup> However, the Brotherhood of today claims to stand for non-violent principles. Is it a misunderstood organization, an opposition group simply struggling under the oppression of autocratic Arab regimes? These questions are difficult to answer adequately, especially because groups affiliated with the Brotherhood include radical organizations such as *Takfir wal-Hijra*, which inspired some of the tactics used by *Al Qaeda* and *Hamas*.

Some experts go so far as to claim the "beginnings of all of the religious terrorism [witnessed] today were in the Muslim Brotherhood's ideology."<sup>43</sup> Other analysts counter the origins of modern Islamic terrorism are in the *Wahhabi* ideology. Still others urge that whatever the source of contemporary Islamic terrorism, the Brotherhood of today has little in common with extremist groups like *Al Qaeda*. The attitude of the Brotherhood toward violence did change at the end of the 1970s, as evidenced by its reaction to the 1978 *Camp David Accords* which brought about peace between Egypt and Israel. Despite its severe criticism of the Egyptian government for signing the *Accords*, the Brotherhood decided against violence as a protest mechanism.<sup>44</sup> Since then, the Brotherhood has consistently rejected all use of violence.<sup>45</sup> However, the nature and extent of its impact on the ideological underpinnings of Islamic terrorism is difficult to overlook.<sup>46</sup>

## § 50.03 AL QAEDA

### [A] Origins

*Al Qaeda* is an international Islamist organization founded in August 1988. Most experts believe this extremist group, or network, was created officially at a secret meeting among senior leaders of the Egyptian Islamic *Jihad*, or *Al Jihad*, including:

- Osama Bin Laden
- Ayman Al Zawahiri
- Sayyed Imām Al Sharif, also known as "Dr. Fadl"
- Abdullah Azzam, an Islamic scholar and Muslim Brotherhood member.<sup>47</sup>

The founders borrowed heavily from the ideology of Sayyid Qutb and the Muslim Brotherhood, particularly the emphasis on using *jihad* to create a new society based on Qur'anic principles. The *Al Qaeda* of today has two primary missions: to provide insurgent training to Islamists from around the world, and to build an ample contingent of fighters who can be sent wherever militant Islam needs them.<sup>48</sup>

*Al Qaeda* evolved from the *Maktab al Khidmat lil Mujahidin al-Arab (MAK)*, a Muslim organization founded by Abdullah Azzam in the early 1980s. The purpose of the *MAK* was to raise funds and recruit members to fight the Soviets in Afghanistan, who had invaded in December 1979 and ultimately were driven out a decade later, withdrawing completely in February 1989.<sup>49</sup> As is depicted in the 2007 movie *Charlie Wilson's War*, as part of its Cold War strategy, the United States supported the Muslim forces:

The CIA [Central Intelligence Agency] invested U.S. \$2.1 billion over a 10-year period to create an anti-Soviet resistance that included 200,000 fighters from over 20 Muslim nations. Osama bin Laden was one of those who joined.<sup>50</sup>

With the wealthy Osama Bin Laden as his second in command, Azzam and the *MAK* played a highly visible, though perhaps not tactically major, role in defeating the

<sup>47</sup> Lawrence Wright, *The Rebellion Within*, THE NEW YORKER, 2 June 2008, posted at [www.newyorker.com/reporting/2008/06/02/080602fa\\_fact\\_wright](http://www.newyorker.com/reporting/2008/06/02/080602fa_fact_wright). Whether these men shared the same dream is dubious:

The leaders of *Al Jihad*, especially Zawahiri, wanted to use their well-trained warriors to overthrow the Egyptian government. Azzam longed to turn the attention of the Arab *mujahideen* to Palestine. Neither had the money or the resources to pursue such goals. Bin Laden, on the other hand, was rich, and had his own vision: to create an all-Arab foreign legion.

*Id.*, at 4.

<sup>48</sup> See IMPERIAL HUBRIS, *supra*, at 63.

<sup>49</sup> ROHAN GUNARATNA, *INSIDE AL QAEDA: GLOBAL NETWORK OF TERROR*, at 3-4 (New York, New York: Columbia University Press, 2002). [Hereinafter, GUNARATNA.]

<sup>50</sup> [www.fact-index.com/usa/soviet\\_invasion\\_of\\_afghanistan.html](http://www.fact-index.com/usa/soviet_invasion_of_afghanistan.html).

Soviets.

Upon the conclusion of this successful campaign, Azzam sought to redirect the rank-and-file *mujahideen* (Islamic warriors) to a long-term, ideologically-driven effort.<sup>51</sup> The key objective of Azzam was to expand the operations of the MAK to include Islamist struggles around the globe.<sup>52</sup> Toward this end, Azzam put forth 8 guidelines for the creation and training of *Al Qaeda*:

1. It [*Al Qaeda*] must jump into the fire of the toughest tests and into the waves of fierce trials.
2. The training leadership shares with [the troops] the testing march, the sweat and the blood.
3. This vanguard has to abstain from cheap worldly pleasures and must bear its distinct stamp of abstinence and frugality.
4. In like manner it must be endowed with firm belief and trust in the ideology, instilled with much hope for its victory.
5. There must be strong determination and insistence to continue the march no matter how long it takes.
6. The [important practices] must consist of meditation, patience, and prayer.
7. Loyalty and Devotion [*sic*].
8. It must be aware of the existence of anti-Islam machinations all across the world.<sup>53</sup>

These basic principles are evident in the terrorist group. For example, despite his vast wealth, Bin Laden has long exemplified the third guideline, leading an austere life. The overarching emphasis on true belief and unwavering determination is tragically demonstrated by the way *Al Qaeda* fighters seemingly conquer the fear of death.

Would Azzam be proud of the group whose ideological foundations he helped set? Azzam was assassinated in 1989. He was more of a spiritual extremist than a violent revolutionary. Azzam never expressly supported terrorism as an acceptable tactic, though he certainly did advocate a militaristic approach.<sup>54</sup>

<sup>51</sup> See GUNARATNA, *supra*, at 4.

<sup>52</sup> According to the international terrorism expert, Rohan Gunaratna, the MAK began to evolve into *Al Qaeda* even before Soviet troops departed Afghanistan in 1989. He writes that the MAK diverted its resources away from Afghanistan into regional conflicts involving Islamist guerrillas in places such as Kashmir, Chechnya, Tajikistan, Somalia, Malaysia, Georgia, Yemen, Algeria, and Egypt. In most of these countries, Islamist movements were brutally oppressed by the governing regimes. The nascent *Al Qaeda*, taking advantage of the alleged status of MAK as a humanitarian group, was able to infiltrate the conflicts. See GUNARATNA, *supra*, at 5.

<sup>53</sup> Abdullah Azzam, *Al-Qa'idah al-Sulbah*, 41 *AL-JIHAD* at 46 (April 1988). Translated by Reuven Paz, International Policy Institute for Counter-Terrorism, Israel.

<sup>54</sup> See GUNARATNA, *supra*, at 86.

## [B] Development and Organizational Structure

To intervene successfully in conflicts affecting Muslims, *Al Qaeda* established financial, political, and military control over several Islamist terrorist groups. Afghanistan was the principal training base for *Al Qaeda*. It also trained recruits in Somalia, Tajikistan, Yemen, and the Philippines.<sup>55</sup> Because one primary goal of Bin Laden was for *Al Qaeda* to function globally, he invited representatives of numerous Islamist terrorist groups and political movements to join the *shura majlis*, or consultative council, of *Al Qaeda*.<sup>56</sup> Throughout the 1990s, *Al Qaeda* inspired and assisted some 30 Muslim extremist groups conduct attacks at home and abroad, particularly in Asia and the Middle East.<sup>57</sup> Yet, *Al Qaeda* remained under the radar during its formative years. The policy of *Al Qaeda* was not to claim such operations as its own.

Despite the vast geographic presence and capability of *Al Qaeda* to carry out deadly attacks on a grand scale, it is not a highly structured organization.<sup>58</sup> Rather, it is an impressively secret, almost virtual organization that has at times "denie[d] its own existence in order to remain in the shadows."<sup>59</sup> This reality helps explain why *Al Qaeda* usually does not seek publicity in pursuit of its goals. In fact, *Al Qaeda* occasionally uses other names and identities (such as the "World Islamic Front for the *Jihad* Against the Jews") when referring to its actions and statements, probably in an effort to keep its adversaries guessing about its true motives and intentions.<sup>60</sup> The utility of its secrecy and decentralized structure was evident in 2001-2002, as the group continued to operate even after losing its central command in Afghanistan following the American led invasion in October 2001. Moreover, the flexible edifice of *Al Qaeda* is precisely what allows Bin Laden to exercise control over a far-flung force. Simply by issuing periodic pronouncements and writings, Bin Laden trains and controls an inner circle while simultaneously inspiring and indoctrinating a periphery of constituent groups.<sup>61</sup>

*Al Qaeda* imposes strict selection criteria, screening out all but the most trustworthy, loyal, and capable operatives. Islamist extremists around the world hold the group in high regard, and for them, acceptance as a full *Al Qaeda* member

<sup>55</sup> See GUNARATNA, *supra*, at 5.

<sup>56</sup> See GUNARATNA, *supra*, at 6.

<sup>57</sup> See GUNARATNA, *supra*, at 6.

<sup>58</sup> See BURKE, *supra*, at 7-22.

<sup>59</sup> GUNARATNA, *supra*, at 3.

<sup>60</sup> See GUNARATNA, *supra*, at 3.

<sup>61</sup> The extent to which Bin Laden exercises logistical control over a tangible terrorist organization is open to debate. According to the controversial BBC documentary *The Power of Nightmares*, *Al Qaeda* is so weakly linked together it may not actually exist apart from Bin Laden and a small group of close associates. In the documentary, journalist Adam Curtis argues the idea of *Al Qaeda* as a formal organization is largely an American invention. Curtis and others contend American prosecutors hyped up the existence of *Al Qaeda*, because they needed to prove Bin Laden was the leader of a criminal organization to charge him *in absentia* under the United States Racketeer Influenced and Corrupt Organizations Act (RICO), 18 U.S.C. §§ 1961-1968. See *The Power of Nightmares* (BBC 2004). But see Peter Bergen, *Beware the Holy War: The Power of Nightmares (A Critique)*, 2 June 2005, posted at [www.thenation.com/doc/20050620/bergen](http://www.thenation.com/doc/20050620/bergen).

is among the highest of honors.<sup>62</sup> The group trains its recruits in a two-tiered system in which all men are prepared to be insurgent fighters, while a select fraction also train for terrorist assignments abroad.<sup>63</sup> According to Western intelligence sources, there were several other terrorist groups operating training camps in Afghanistan during the 1990s, and from them, *Al Qaeda* selected only 3,000 men, or 3 percent, to train. This fact suggests *Al Qaeda*, not to mention other terrorist groups, enjoy a surfeit of manpower.

### [C] Principles and Objectives

*Al Qaeda* distinguishes itself from most other Islamic extremist groups by its broad-based appeal. The ideology, if not necessarily the tactics, of *Al Qaeda* attracts the affluent and poor, and transcends historical and sectarian barriers.<sup>64</sup> Indeed, *Al Qaeda* was formed with the purpose of overcoming national and ethnic divisions in the Muslim world, so as to create an international militia to fight "the real enemy," the non-Muslim West.<sup>65</sup> The establishment of a multinational, multiethnic Islamist organization is a major accomplishment, attributable primarily to the leadership of Bin Laden.<sup>66</sup>

Pre-*Al Qaeda* Islamic resistance movements focused mostly on taking down governing regimes in their home countries. They purported to follow the Prophet Muhammad, who commanded *jihad* against the "near" adversary before turning to the "far" enemy.<sup>67</sup> With Bin Laden appearing on the international stage at the end of the Soviet-Afghan War, *Al Qaeda* worked assiduously to shift the Islamist focus from apostate Muslim governments to the United States. Bin Laden has argued, and convinced many, that corrupt governments of Muslim countries remain in power only because of American shelter and succor. Rather than continue to seek political reform and revolution at home, *à propos* the Muslim Brotherhood, Islamic resistance must attack directly "the head of the snake."<sup>68</sup> The ability of Bin Laden to keep *Al Qaeda* members fixated on the United States has been a critical component of the growth and success of the group.

Another feature distinguishing *Al Qaeda*, since its inception, from other Islamist groups is its exclusive insistence on violent methods. Terrorist groups of the 1960s to the 1990s, including the Palestine Liberation Organization (PLO), generally avoided high casualty attacks for fear of negative publicity. In contrast, in their initial 1998 *Declaration of Jihad*, the founding members of *Al Qaeda* state:

<sup>68</sup> Quotation from interview by unknown source with Osama bin Laden, undisclosed location (2001), aired by CNN on 26 December 2001, transcript posted at <http://transcripts.cnn.com/TRANSCRIPTS/011226se.01.html>.

Islamic governments have never been and will never be established through peaceful solutions. They are established as they [always] have been — by pen and gun, word and bullet, tongue and teeth.<sup>69</sup>

Their statement is redolent of a famous quotation from the infamous Chinese Communist Party (CCP) Chairman Mao Zedong, reprinted in the 1964 edition of his *Little Red Book*: "political power grows out of the barrel of a gun."

Neither the Chairman nor Bin Laden would accept the point Shakespeare makes in *Hamlet* (1602), Act II, Scene 2: "Though this be madness, yet there is method in it." They see no "madness" in their means. To the contrary, *Al Qaeda* promotes the use of violence on a mass scale. Moreover, *Al Qaeda* places an unprecedented degree of glory upon its perverted conception of martyrdom. The 23 February 1998 *fatwā* issued by Bin Laden adduces this emphasis:

... a martyr's privileges are guaranteed by Allāh . . . with the first gush of his blood he will be shown his seat in paradise.<sup>70</sup>

While other Islamist organizations, such as *Hamas*, glorify dying in *jihad*, no other extremist band comes close to *Al Qaeda* in "programming its fighters for death."<sup>71</sup>

Bin Laden and *Al Qaeda* plan and effectuate terrorist attacks not to destroy America or its freedoms, but rather to force the United States to change drastically policies toward the Islamic world.<sup>72</sup> Bin Laden believes his duty is to "awaken Muslims" and "provide [the] *Ummah* with the inspiration it requires" to resist the West.<sup>73</sup> *Al Qaeda* is not meant to produce a decisive Muslim victory, but as a mechanism by which to incite Muslims to join a defensive *jihad*. His writings and pronouncements demonstrate he is a "practical warrior, not an apocalyptic terrorist in search of Armageddon."<sup>74</sup>

Consider how Bin Laden's view of his geographic region contrasts with that of the average American. Americans watch Saudi Arabia struggle with internal threats to its reform aspirations from Muslim fundamentalists. Terrorist groups lurk in countries around that Kingdom, from *Al Qaeda* and its affiliates to *Hamas* and *Hezbollah*. All are unstable, and Israel is the only country in the world that faces a perpetual existential threat. Hostile Iran is across the Persian Gulf, and nearby, sizeable populations antipathetic to the United States and Israel reside in Afghanistan and Pakistan to the East, and North Africa to the West. They sympathize with extremists. The average American sees the Islamic Heartland and broader Near East region as replete with terrorists.

<sup>74</sup> IMPERIAL HURRIS, *supra*, at xviii.

Bin Laden and his followers see a different picture. The Kingdom is ruled by a corrupt House of Saud that allowed American forces on Saudi soil during Operation Desert Storm, the First Gulf War in 1991, and that sells its oil to America and its allies to fuel their decadent lifestyles. Bahrain is the headquarters of the United States Fifth Fleet. Pursuant to a 1991 Defense Cooperation Agreement, Qatar plays host to the Al Udeid air base, which is the center for all American air operations in the Gulf, plus serves as a logistics and military equipment hub.<sup>75</sup> The Congressional Research Service reports that "Camp As Sayliyah is the largest pre-positioning facility of U.S. military equipment in the world."<sup>76</sup> This equipment may be rushed in from Qatar to protect oil fields in the Eastern Province of Saudi Arabia. The United Arab Emirates (UAE) and Kuwait are open American allies, and Yemen is at best a battleground. Egypt and Jordan are un-Islamic regimes propped up by the United States. Peripherally, Morocco, Tunisia, and Turkey are American allies. The United States has "boots on the ground" in Iraq, Afghanistan, and Pakistan fighting devout Muslim forces and killing innocent civilians in the process. In sum, the Bin Laden view is "we are encircled by the Americans and their proxies." He believes he is engaged in a defensive *jihād* which is as compelling as the rationale that America is fighting defensive and pre-emptive battles is to the average American.

While the methods of *Al Qaeda* are barbaric and indeed un-Islamic, Bin Laden is not a deranged lunatic. Rather, he is a cold, calculating, charismatic killer with concrete objectives. His most important goals follow logically from his picture of his region:<sup>77</sup>

1. The end of all American assistance to Israel.
2. The elimination of the Jewish state and the creation of an Islamic Palestinian state.
3. The withdrawal of all American and Western military forces from the Arabian Peninsula and all other Muslim territories.
4. The ouster of American-protected Muslim regimes that do not govern according to *Shari'a* and their replacement by truly Islamic governments.
5. The end of American support for the oppression of Muslims by the Chinese, Russian, Indian, and other governments.
6. The restoration of Muslim control over the energy resources of the Islamic world.
7. The end of all American involvement in Afghanistan and Iraq.

The seventh goal is more recent than the others, in response to the actions of the United States following the 11 September 2001 attacks. Bin Laden has methodically focused his rhetoric on these objectives since the mid-1980s. His meticulous and

unwavering attention to a few core themes preserves the clarity of the message of *Al Qaeda*.

## [D] Legality of *Al Qaeda* Actions under Islamic Law of War

### • Does *Al Qaeda* have the authority to wage *jihād*?

The founders of *Al Qaeda*, heavily inspired by Muslim Brotherhood ideology, established the group for the ultimate purpose of creating societies founded on the most rigorous Islamist principles. But, are the methods employed by *Al Qaeda* in conformity with classical Islamic International Law? The answer, of course, depends on who is asked. A threshold question is whether Bin Laden and *Al Qaeda* possess the legitimate authority to issue *fatwās* inciting their followers to violence. The answer is a clear "no."

The force of a *fatwā* depends upon the education, integrity, and piety of the person who pronounces it. No competent, recognized Islamic authority regards Bin Laden as having any credentials.<sup>78</sup> Bin Laden is largely uneducated, never trained as an Islamic scholar, and is as much a pragmatic activist as he is a religious ideologue. His chief deputy, Zawahiri, is not an Islamic scholar. Their other partner, Dr. Fadl, who has since defected from *Al Qaeda*, states:

"*Al Qaeda* has no one qualified from a *Shari'a* perspective . . . on whose opinion you can count. They are ordinary persons."<sup>79</sup>

Despite his unremarkable intellectual and religious pedigree, Bin Laden constantly refers to "Allāh" and the "Prophet Muhammad" in his writings and speeches, deliberately intimating he is carrying out the Divine Will of God.<sup>80</sup> For example, in the "legal ruling" dated 23 February 1998, Bin Laden prefaced the *fatwā* as follows:

Praise be to God, who revealed the Book, and says in His Book: "When the forbidden months are past, fight and slay the pagans wherever ye find them, seize them, beleaguer them, and lie in wait for them. And peace be upon our Prophet Muhammad, who said, 'I have been sent with the sword between my hands to ensure that no one but God is worshiped, God who put my livelihood under the shadow of my spear and who inflicts humiliation and scorn on those who disobey my orders.'<sup>81</sup>

<sup>78</sup> See GUNARATNA, *supra*, at 7. See also DANIEL BENJAMIN & STEVEN SIMON, *THE SACRED AGE OF TERROR*, at 117 (Edinburgh, Scotland: Floris Books, 2002) (writing "[b]y issuing *fatwās*, Bin Laden and his followers are acting out of a kind of self-appointment . . . they are asserting their rights as interpreters of Islamic law").

<sup>79</sup> Lawrence Wright, *The Rebellion Within*, THE NEW YORKER, 2 June 2008, posted at [www.newyorker.com/reporting/2008/06/02/080602fa\\_fact\\_wright](http://www.newyorker.com/reporting/2008/06/02/080602fa_fact_wright).

<sup>80</sup> See MESSAGES TO THE WORLD: THE STATEMENTS OF OSAMA BIN LADEN (London, England: Verso, 2005, Bruce Lawrence, ed.).

<sup>81</sup> "Declaration of War Against the Americans Occupying the Land of the Two Holy Places: A Message from Osama bin Laden unto his Muslim brethren all over the world generally, and toward the Muslims of the Arabian Peninsula in particular," August 1996.

Bin Laden carefully interposes references to Allāh and Muhammad with explicit calls for violence, thus connoting there exists a religious justification for his means and ends.

However, from an authentic Islamic legal perspective, such attempts at justification are misleading and futile. No *fatwā* issued by Bin Laden is valid, because he has absolutely no authority to issue one. This legal reality does not deter him. He denigrates *fukahā'* who oppose him as being controlled by corrupt apostate regimes and their Western allies. Bin Laden claims earlier in Islamic history *ulema* and jurists courageously guided the pronouncing and waging of *jihād*, but today the neutered figures of the Establishment abdicate their duties and lead Muslims astray.<sup>82</sup> He writes:

Great evil is spreading throughout the Islamic world. The *imāms* calling people to hell are those who appear more than others at the side of the rulers of the region. [The clerics] all, except those upon whom Allāh had mercy, are busy handing out praise and words of glory to the despotic [rulers] who disbelieved Allāh and his Prophet. The clerics are prisoners and hostages of the tyrants.<sup>83</sup>

Bin Laden says because legal and religious authorities are unable or unwilling to do what needs to be done, individuals like him must spearhead efforts. Despite his lack of credentials, he believes edicts are legitimate, because the clerics have failed to act.

Bin Laden understands the importance of the guise of legal and religious legitimacy. He realizes *Al Qaeda* cannot expect the support of the Muslim world without the backing of a credible Islamic scholar. Arguably, Shaykh Nasir bin Hamid Al Fahd, a young Saudi cleric provided his endorsement in May 2003, by publishing *A Treatise on the Legal Status of Using Weapons of Mass Destruction Against Infidels*.<sup>84</sup> The *Treatise* amounted to a *fatwā* justifying a large-scale attack on the United States. However, it is unlikely the *Treatise* actually gave *Al Qaeda* religious approval to use a nuclear device against civilians. Fahd renounced several of his *fatwās* on Saudi television, while in prison for participating in *Al Qaeda* bombings of Riyadh on 12 May 2003. Ominously, the *Treatise* was not mentioned.

• *Are Al Qaeda's tactics legal under the Shari'a?*

Putting aside the invalidity of the 23 February 1998 *fatwā* issued by Bin Laden, and thus the *jihād* of *Al Qaeda*, are the terrorist acts perpetrated by the group themselves justifiable under *Shari'a*. Here, too, the answer is "no."

The deliberate killing of non-combatants is forbidden under the Classical Islamic International Law, unless those killed accurately can be labeled conspirators. The famous Qur'anic Rule of Proportionality, in *surah 2, ayah 190*, states:

<sup>82</sup> See IMPERIAL HUBBIS, *supra*, at 151.

<sup>83</sup> "A New Bin Laden Speech," MIDDLE EAST MEDIA RESEARCH INSTITUTE, *Special Dispatch Series*, No. 559, (18 July 2003), posted at [www.memri.org/bin/articles.cgi?Appa=sd&ID=SP53903](http://www.memri.org/bin/articles.cgi?Appa=sd&ID=SP53903).

<sup>84</sup> See IMPERIAL HUBBIS, *supra*, at 155-56.

Fight in God's cause against those who fight you, but do not overstep the limits: God does not love those who overstep the limits.<sup>85</sup>

Moreover, the Prophet Muhammad put the rule in specific terms:

"Do not kill women or children or an aged person. Do not cut down fruit bearing trees. Do not destroy an inhabited place."<sup>86</sup>

Ironically, the scholar Bin Laden quotes most frequently, Ibn Taymiyyah, renowned for his Traditionalist views, devotion to *jihād*, and literal interpretations of the Qur'an, states:

As for those who cannot offer resistance or cannot fight, such as women, children, old people, the blind, handicapped and their like, they shall not be killed, unless they actually fight with words and acts. Some [jurists] are of the opinion that all of them may be killed on the mere ground that they are unbelievers, but they make an exception for women and children since for Muslims they constitute property. However, the first opinion is the correct one, because we may only fight those who fight us when we want to make Allāh's religion victorious.<sup>87</sup>

Tragically, *Al Qaeda* deliberately kills thousands of non-combatants who cannot offer resistance. Is *Al Qaeda*, then, as one author writes:

engaged in an unprecedented exercise of corrupting, misinterpreting, and misrepresenting the word of God to generate support for [its] political mission?<sup>88</sup>

In a word, "yes." *Al Qaeda* is not at all authentically Islamic. Predictably, Bin Laden would argue to the contrary. He would cite three reasons to support his claim *Al Qaeda* acts wholly in accordance with the legal requirements of *jihād*.

First, a war that includes killing non-combatants is justified because *Al Qaeda* has overtly warned the United States and its people of the dangers coming their way. Such warnings take many forms, most notably the following:

The case is easy: America will not be able to leave this ordeal unless it leaves the Arabian Peninsula and stops its involvement in Palestine and all of the Islamic world. We renew our pledge to Allāh, our promise to the nation, and our threat to the Americans and Jews that they shall remain restless and shall not dream of security until they take their hands off our nation and stop their aggression against us and their support for our enemies.<sup>89</sup>

<sup>85</sup> QUR'AN, *supra*, 2:190 at 21.

<sup>86</sup> BUKHARI, *supra*, at vol. IV, book LII (The Book of *Jihād* (Fighting for Allāh's Cause)), pp. 159-160, *hadith* no. 257 (Arabic version). Note the above-quoted version does not exist *verbatim* in the English translation, which states simply: "Allāh's Apostle . . . disapproved the killing of women and children." *Id.*

<sup>87</sup> Ibn Taymiyyah, *The Religious and Moral Doctrine of Jihād*, in GOVERNANCE ACCORDING TO ALLAH'S LAW IN REPORTING THE RULER AND HIS FLOCK (2001), quoted in GUNARATNA, *supra*, at 85.

<sup>88</sup> GUNARATNA, *supra*, at 85.

<sup>89</sup> Quoted in IMPERIAL HUBBIS, *supra*, at 153.

According to some Islamic scholars, there is an established principle that Muslim forces "may go to war against non-Muslims after declaration of an intent to fight."<sup>90</sup> To Bin Laden, the repeated warnings by *Al Qaeda* constitute the requisite declaration.

Second, the warnings come with an invitation to Americans to convert to Islam. In an October 2002 statement, Bin Laden declared:

A message to the American people: Peace be upon those who follow the right path. I urge you to seek the joy of life and to rid yourself of your dry, miserable, and spiritless materialistic existence. I urge you to become Muslims, for Islam calls for the principle of "there is no God but Allāh."<sup>91</sup>

Entreating Americans to seek conversion to Islam is the second component of Bin Laden's attempt to justify the *jihād* of *Al Qaeda*. Though it is redolent of the traditional *Shari'a* rules on the Law of War (giving non-Muslims the option to convert to Islam), the genuineness of his plea is dubious. This strategy allows Bin Laden to uphold the Islamic Laws of War,<sup>92</sup> and take the moral high road. He gives Americans their chance to seek peace with Allāh. Having rejected the "right path," the infidels seal their fate.

On the subject of conversion, it is worth noting that in addition to *Al Qaeda*, various Islamist groups purport to wage war on the "infidels" for the sake of Allāh or Islam. Indeed, groups in Chechnya, Afghanistan, Iran, Iraq, Lebanon, Kashmir, Palestine, and Pakistan<sup>93</sup> claim they uphold justice on the earth and rid the world of oppression by waging war on the west and non-Muslims. To support their cause, many preach that their Muslim duty is to "convert everyone to Islam, either by persuasion or by force."<sup>94</sup> Yet, even Sayyid Qutb rejected this idea of forced conversions when he wrote:

It is not the intention of Islam to force its beliefs on people, but Islam is not merely 'belief.' Islam is a declaration of the freedom of man from the servitude of other men.<sup>95</sup>

Since the writings of Sayyid Qutb were published, however, the direction of extremists and terrorists has taken a dangerous twist, into an abyss that no longer comports with original Islamic ideals of peace, harmony, and justice.

The third rationale Bin Laden would employ is perhaps his most devilishly clever. He attempts to turn American democracy back on its own citizenry. Because Americans have the power to elect their own leaders, he argues, they are directly

<sup>90</sup> John Kelsay, *Religion, Morality, and the Governance of War: The Case of Classical Islam*, 18 JOURNAL OF RELIGIOUS ETHICS 2 at 125 (1990).

<sup>91</sup> Quoted in IMPERIAL HUBRIS, *supra*, at 154.

<sup>92</sup> See generally John Kelsay, *Al-Shaybani and the Islamic Law of War*, 2 JOURNAL OF MILITARY ETHICS issue 1 at 63–75 (March 2003).

<sup>93</sup> See UNHOLY WAR, *supra*, at 69.

<sup>94</sup> See UNHOLY WAR, *supra*, at 67.

<sup>95</sup> See UNHOLY WAR, *supra*, at 68.

responsible when their government prosecutes an "anti-Islam foreign policy."<sup>96</sup> He writes:

It is a fundamental principle of any democracy that the people choose their leaders, and as such, approve and are party to the actions of their leaders. So "in the land of freedom" . . . [each American has given] consent to the policies his elected government adopts. This is why the American people are not innocent. The American people are active members in these crimes.<sup>97</sup>

Thus, as for the rule in *Shari'a* that non-combatants should not be killed unless they are conspirators, Bin Laden intones American citizens are conspirators. They actively participate in the aggression of their government against Muslims. Consequently, they have put themselves in the line of fire, and it is not illegal to target them.

### [E] Future Prospects

Attempts to assess the future of *Al Qaeda* produce widely diverging prognostications. The United States National Intelligence Council predicts a diminishing influence of terrorism, particularly as practiced by *Al Qaeda*.<sup>98</sup> This prediction is due in part to rising frustration, horror, among Muslims over the killing by *Al Qaeda* of fellow Muslims. That tactic is divisive even among Islamist extremists. Whether Muslims can legally kill other Muslims in pursuing *jihād* was the topic of extensive discussion in the *Treatise* by Shaykh al-Fahd,<sup>99</sup> and was partly why Sayeed Imām al-Sharif ("Dr. Fadl") defected from *Al Qaeda*.<sup>100</sup> Should *Al Qaeda* continue to employ terrorist tactics that result in the wanton killing of Muslims, it may alienate a large portion of its base.

This prediction also is based on the effects of an enemy against which Bin Laden is largely impotent: modernity and secularism. The National Intelligence Council and others predict the failure of *Al Qaeda* to articulate a positive political program will push away Muslim youth who do not share the opposition to modernism. The modern charm of movies, music, and the iPhone, make the comfortable secular life at least as attractive as the grueling lifestyle of a *jihādi* zealot. Moreover, as in Catholic Christianity and other faiths, not every Muslim is equally dedicated to religious practice. Complacency, apathy, and even disdain concerning religion are hallmarks of secularism, which are not confined to the non-Muslim west. If enough Muslim youth are disinterested in scrupulous adherence to every precept of Islam, then expecting enthusiasm for *Al Qaeda* is quixotic.

Conversely, there is a pessimistic prediction. Some scholars expect *Al Qaeda* to remain a dangerous threat for a long time to come. Rohan Gunaratna writes that

<sup>96</sup> IMPERIAL HUBRIS, *supra*, at 156–57.

<sup>97</sup> Quoted in IMPERIAL HUBRIS, *supra*, at 157.

<sup>98</sup> NATIONAL INTELLIGENCE COUNCIL, GLOBAL TRENDS 2025: A TRANSFORMED WORLD 61 (2008), posted at [www.dni.gov/nic/NIC\\_2025\\_project.html](http://www.dni.gov/nic/NIC_2025_project.html).

<sup>99</sup> See IMPERIAL HUBRIS, *supra*, at 155–56.

<sup>100</sup> See Lawrence Wright, *The Rebellion Within*, THE NEW YORKER, 2 June 2008.

its:

unprecedented mobility, motivation, and capacity to generate wealth [will] pose multiple challenges to international security.<sup>101</sup>

Moreover, *Al Qaeda* is multi-dimensional, and has a knack for inciting Muslim migrant communities, particularly in the European Union. Bin Laden desires a protracted battle with the West. He is the world's most wanted man, yet managed to find shelter and evade capture for years. Why would he quit or slow down anytime soon?

Perhaps, then, *Al Qaeda* has increased the likelihood of a continuing conflict for the long term. Arguably, the scenario for Bin Laden may be akin to that of Hannibal, who led his Carthaginian forces against the Roman Republic in the Second Punic War (218-201 B.C.), wreaking havoc throughout the Roman Empire. Rather than being caught by the ultimately victorious Roman forces, Hannibal drank a vial of poison in 183/182 B.C. at the ancient port city of Libyssa (now called "Gebze") on the eastern shore of the Sea of Marmara, about 30 miles from modern-day Istanbul, Turkey. However, the scenario proved different for Bin Laden. At the start of May 2011, he was killed by United States forces in a mansion in which he had been hiding in Abbottabad, Pakistan.

# GLOSSARY OF ARABIC TERMS

TABLE:  
BASIC GUIDE TO PRONUNCIATION

Diacritical Sign or Special Letter	Name	Example	Approximate Pronunciation in English	Example
ʾ	Arabic letter <i>hamza</i>	Qurʾān	A glottal stop. Pause between syllables created by opening and shutting of the glottis (the upper gap of the larynx between the vocal cords).	Qur-aan
ʾ	Arabic letter <i>ʾayn</i> (pronounced "ain")	Sharʾa	Deep, guttural sound: "agh." The sound comes from the back of the throat by closing the windpipe and emitting a breath.	Sha-ree-agh
ā (or Ā)	Long a	Qurʾān	Long a, as in "father."	Qur-aan
ī (or Ī)	Long i	Sharʾa	Long i, as in "eat-able."	Sha-ree-agh
ū (or Ū)	Long u	maʾdūd	Long u, as in "oops."	ma-duud
ḍ (or Ḍ)	Aspirated d	ḍamān	Heavy version of "d." Exhale with an h sound, "dh," or a slight "t" sound, "th."	dha-maan, tha-maan
ḥ (or Ḥ)	Aspirated h	ḥadīth	Heavy version of "h." Exhale with a heavy h sound, "hh."	hha-deeth
ḵ (or Ḷ)	Aspirated k	ʾakār	Heavy version of "k." Exhale with an h sound, "kh."	a-khaar

Diacritical Sign or Special Letter	Name	Example	Approximate Pronunciation in English	Example
ş (or Ş)	Aspirated s	<i>aşl</i>	Heavy version of "s," almost like a double s.	a-ssl
ţ (or Ț)	Aspirated t	<i>iqţā'</i>	Heavy version of "t," almost like a double t.	iq-ttaa
ẓ (or Ț)	Aspirated z	<i>diya mughallaẓa</i>	Heavy version of "d." Exhale with an h sound, "dh."	moo-ghall-adha
q	Arabic letter <i>qāf</i> .	Qur'ān	Like k, but with the sound coming from far back in the throat.	Qur-aan
gh	Mixture of g and h.	<i>ghaṣb</i>	Gargle-like sound.	gha-shb
kh	Mixture of g and h.	<i>khamr</i>	A hard "ch" sound.	kha-mr

COMMON ARABIC TERMS IN ISLAMIC LAW (*SHARĤA*)<sup>2</sup>

## FORMAT:

**Arabic Term** (*Alternative Spellings/Forms*) [Approximate Pronunciation] singular (s) or plural (p), part of speech:

Definition and/or additional information.

'*adala* (agh-aa-da):

See *urf*.

**abaya** (*abayah*) [a-bye-a] s. noun:

A head-to-foot, black-colored covering garment worn by some Muslim women, typically in the Persian Gulf region.

**Abū** (Abu) [Ah-boo] s. noun or pronoun:

Father. Out of respect, males sometimes are called not by their given first name, but as "Father of \_\_\_\_\_." The name of the eldest son fills in the blank. For example, a man named "Dhaifallah," whose eldest son has the first name "Yousef," would be "Abū Yousef." If there are no sons, then the man would be called respectfully by his eldest daughter.

'*adala* (agh-da-la) s. noun:

<sup>2</sup> Almost all parts of speech in Arabic, including nouns, adjectives, verbs, and adverbs, have masculine and feminine forms. For simplicity, only the masculine forms are used herein.

Competence. For example, to be an executor (*waş ī*) of an estate, one must possess "*adala*."

**aḏha** (*adha*) [adh-hha] s. noun:

Literally, "sacrifice."

**adhān** (*adhan*) [ad-haan] s. noun:

Islamic call to prayer, as used in Arabic. See also *azaan*. The call is issued by a *muezzin* (as used in the Near East and Indian Subcontinent) or *mu'dhin* (as used in Arabic). The call is made five times a day, from a minaret of a mosque, often via a recording through a loudspeaker. The *adhān* has 8 lines, invariably delivered in Arabic:

- (1) God (Allāh) is the Greatest.
- (2) I bear witness that there is no god but God.
- (3) I bear witness that Muhammad is the Messenger (*Rasūl*) of God.
- (4) Make haste towards worship.
- (5) Come to the true success.
- (6) Prayer is better than sleep.
- (7) God is the Greatest.
- (8) There is no god but God.

The 6th line is used only for prayers at dawn (*fajr salat*). The first line is repeated 4 times (except for the *Māliki* School, which repeats it twice). The 2nd through 7th lines are repeated twice. The last line is stated once.

For *Shī'ites*, There are minor differences in the 1st line of the *adhān* and in the 4th through 7th lines. *Shī'ites* repeat the 1st line four times and the other lines twice. Consistent with the importance of 'Alī to *Shī'ism*, some *Shī'ite* scholars recommend, adding "I bear witness that 'Alī is the Vice-Regent of Allāh," though this addition is not formally part of the *adhān* (or *iqama*, explained below). Technically, in each of the five times, there are two calls. The first one, which is *adhān*, announces that it is time to pray. The second call, known as "*iqama*," which means "to set up," states it is time to line up for the beginning of the prayer. It is issued in Arabic immediately before the prayer starts. The *iqama* is nearly the same as the *adhān*, but is delivered more quickly, in a monotone fashion, and differs in the 6th line of the call. Accordingly, the *iqama* is:

- (1) God (Allāh) is Greatest, God is Greatest.
- (2) I assert that there is no god but God.
- (3) I assert that Muhammad is the Messenger (*Rasūl*) of God.
- (4) Come to the prayer.
- (5) Come to salvation.
- (6) Stand for prayer (twice).

(7) God is Greatest, God is Greatest.

(8) There is no god but God.

Each of the first 6 lines is repeated twice (with minor variations in the *Hanafi* and *Māliki* Schools, and the *Shī'ites*). Thus, essentially both the *adhān* and *iqāma* summarize Islamic belief, proclaiming that God is Great, there is no God but Allāh, Muhammad is the Messenger of God, salvation is found through obedience to the Will of God, and prayer is an important expression of this obedience.

*Sunnis* and *Shī'ites* disagree as to the origin of the *adhān*. *Shī'a* say it was developed by the Prophet Muhammad alone on the command of Allāh. *Sunnis* say it came to one of the Companions of the Prophet (*Sahābah*), and later one of the Four Rightly Guided Caliphs (*Rashidun*), Omar, in a dream. That is, Allāh revealed the *adhān* to Omar in a dream. Muhammad liked it, in preference to bells (used by Christians) or a horn (used by Jews). In turn, Muhammad had Bilal ibn Ribah, a freed slave, issue the call because of his beautiful voice. *Shī'ites* agree that Bilal was the first to issue this call.

**'adl** ('adl, aḍl, aḍil) [a-dīl] s. noun:

Literally, "justice." Of good moral character, trustworthy, upright.

**'afw** ('afw) [agh-fw] s. noun:

Pardon.

**ahādīth** (*ahādīth*) [a-hhah-deeth] pl. noun:

The plural in Arabic of *ḥadīth*. However, the word "*ḥadīths*" is acceptable to convey the plural sense, and is used by English and Arabic speakers alike.

**ahkam** (*ahkam*) [ah-kam] pl. noun:

Islamic commandments that are based on religious and legal sources (noun, plural). Essentially, a law, ruling, or value under the *Shari'a*. The singular is "*ḥukm*." The term arises in connection with the Scale of Five Religious and Legal Qualifications (*Al Ahkām Al Khamsa*). Any act (or omission) by a Muslim is evaluated as a commandment and put into one of five categories, along this Scale.

**ahl al bayt** [a-hel ul bayt] s. noun:

People of the House, i.e., Family.

**ahl al kitāb** (*ahl al kitāb*) [a-hel al kee-taab] adjective:

People (or Peoples) of the Book. The traditional understanding of this term is that it encompasses only persons following a religion that pre-dates Islam and that has a sacred text, namely, Jews and Christians. A synonym is "*kitābi*."

**ahruf** [ah-roof] pl. noun:

Forms, modes, dialects. "*Ahruf*" is used to connote the seven different ways in which the Qur'ān is said to have been revealed, that is, the seven Arabic dialects in which it was recited. They were standardized into a single dialect, *Qurayshi*, during the Caliphate of 'Uthman. The term is closely related to "*Qirā'āt*," which may be

distinguished narrowly as different methods of pronunciation used in recitations. The singular is "*ḥarf*."

**'Āisha** (A'ishah, 'A'isha, 'Aisha, 'Aysha, Ayesha) [Aeye-sha] Pr. noun:

The third wife of the Prophet Muhammad, whose full name was 'Āisha bint Abū Bakr, and who died in 678 A.D. "'Āisha" literally means "she who lived." 'Āisha is known not only as the favorite wife of the Prophet, after Khadyja, but also as a teacher of Islamic jurisprudence and a narrator of many *ḥadīths*, particularly about the personal life of Muhammad. She narrated 2,210 *ḥadīths*, of which *Imām* Bukhari and *Imām* Muslim recount 316. In *surah* 33, *ayah* 6, the Qur'ān describes the wives of Muhammad as "Mothers of Believers," and 'Āisha sometimes is called the "Mother of Believers."

**ajal** [a-jal] s. noun:

Term, as in a waiting period.

**'akār** (*akar*) [a-khaar] s. noun:

A type of *māl* (legitimate object of commerce) that is an immovable object. An example would be land.

**'aḳd** ('aḳd, 'akd, aqd, akd, aqd) [ah-khid] s. noun:

Contract, i.e., the general term for an agreement that gives rise to legal rights and obligations.

**'akḍ al-bay'** ('aḳḍ al-bay, 'akḍ al-bay, aḳḍ al-bay, akḍ al-bay) [ah-khid al-bay-agh, ah-khid al-bay] s. noun:

Contract of sale.

**'aḳḍ muwalaṭ** ('aḳḍ muwalaṭ) [ah-kid moo-wa-lat] s. noun:

Mutual contract. A type of *takaful* historically, but no longer, used in Arabia and the Middle East.

**'āqila** ('akila, akila) [agh-khee-la] s. noun:

The group of persons who are liable to make payment of blood money on behalf of a perpetrator who is guilty of a *jināyāt* offense. Traditionally, this group consists of paid members of a Muslim army to which the perpetrator belongs, the male members of the tribe to which the perpetrator belongs (or, if there are too few of them to make the payment, the then of the nearest related tribes), the co-workers of the perpetrator, or the confederates of the perpetrator. This system no longer is used. See **'aqila** below.

**akl al kharzīr** [a-kel ul khan-zeer] verb phrase:

Eating flesh of the swine, i.e., eating pork or pork products, which is forbidden (*ḥarām*) to Muslims.

**al** (al-, ul-, ul-) [ul] article:

The.

**Al Ahkām Al Khamṣa** (*Al Hukm Al Khamis*) [ul huu-km ul-kha-mees] noun phrase:

Literally, "The Five Provisions" or "The Five Qualifications." *Al Ahkām* means "provisions," and "*Al Khamṣa*" means "five." That is, the Scale of Five Religious and Legal Qualifications. Any act (or omission) by a Muslim is evaluated as a commandment and put into one of five categories, along this Scale. The scale entails an analysis of the act from both a religious and legal standpoint. The five categories are:

- (1) *ḥarām* (forbidden)
- (2) *makrāh* (reprehensible)
- (3) *mubāh* (neutral, permissible, indifferent)
- (4) *mandūb* or *mustahabb* (recommended), or
- (5) *wajīb* (obligatory).

**Al Ashhur Al Hurum**, noun phrase:

The Forbidden Months, which are *Rajab*, *Dhu Al-Q'ada*, *Dhu Al-Hijja*, and *Muharram*. During these months, fighting is prohibited for Muslims everywhere, every year, unless it is defensive warfare and measures must be taken for the protection of life. The term is relevant to the first of the two Slaying Verses, *surah 9, ayah 5*, which is one of the three Sword Verses, of the Qur'an.

**alcohol** [al-co-hall] s. noun:

Alcohol.

**Al Fātimīyyān** [Ul Faa-tee-meey-yuun] noun phrase:

The Fatimid Caliphate (909-1171 A.D.).

**al fawāḥish** [ul fa-waa-heesh] pl. noun:

Indecencies.

**al hamdulillah** [ul ham-doo lil-lah] noun phrase:

Literally, "praise be to God." Also translated as "thanks be to God." The term is one of respect and reflects a fundamental tenet of Islam, namely, that God (Allāh) is the all-powerful Master of the Universe, and all that happens is according to His Will.

**al harbu al muqaddasah** (*al harbu al muqaddasa-tu*):

See "*jihād*."

**al ithra' bila sabab** [ul ithragh bee-la sa-bab] noun phrase:

Enrichment without cause, i.e., unjust enrichment. Literally, "*al-ithra*" means "enrichment," "*bila*" means "without," and "*sabab*" means cause. The term "*al-ithra' bila sabab*" is related to the term "*ribā*," which loosely translated means "interest." Under the *Shari'a*, it is thought that because a conventional, non-Muslim loan entails interest (*ribā*), it results in unjust enrichment for the lender, and thus is prohibited (*ḥarām*). Note, however, the term "*al-ithra' bila sabab*" relates to more

than just "*ribā*." For example, if a person rents a house or apartment, but does not pay the rent, then the person reaps *al-ithra' bila sabab*, because the person is enjoying the use of the premises without paying for them.

**al khala'** (*al khalo'*, *al khalu'*, *al khulu'*) [al kha-la] s. noun:

Take away, pull. One of several grounds in Islamic Family Law for the dissolution of a marriage, whereby a wife returns her nuptial gift (*mahr*) to her husband. This method is infrequently used.

**Allāh** (Allah, Allaah) [Ul-laah] Proper noun:

God, specifically the name of God as used in the Islamic faith.

**alem** (*alam*, *alim*) [a-lem] s. noun:

Generally, a scholar or scientist. "*Alem*" comes from the word "*ilm*," which means knowledge. "*Alem*" also is used to connote a religious scholar (singular noun), i.e., the singular of "*ulema*."

**'Alī** (Ali) Proper noun:

Cousin and son-in-law of the Prophet Muhammad, 4th of the four Rightly Guided Caliphs (*Rashidun*), and key figure second only in importance to the Prophet for *Shi'ites*.

**Al Queda** [U] Ka-ee-da, [U] Ka-eh-da, [U] Kay-da] s. noun:

Literally, "the base." The term is used, for example, in the context of learning "the base" of the Arabic language. The term has been adopted by an infamous, extremist, and violent group.

**al-walad lil-firāsh** [ul wa-lad leel feer-aash] noun phrase:

The Islamic Family Law doctrine that the child belongs to the marriage bed. Essentially, the doctrine creates a presumption that a child is legitimately born to a properly married couple.

**Al Rahim** (*Ar Rahim*) [Ul Ra-heem] noun phrase:

The All Compassionate. One of the most common names for (or attributes of) God among the 99 Names of Allāh.

**Al Rahman** (*Ar Rahman*) [Ul Rah-man] noun phrase:

The All Merciful. One of the most common names for (or attributes of) God among the 99 Names of Allāh.

**'amal ahl al Madinah** [agh-mal ul Ma-dee-nah] noun phrase:

Practice of the people of Medina. This practice, dated during the life of Prophet Muhammad, is accorded considerable importance by the *Māliki* School in terms of a source of the *Shari'a*.

**amān** [a-man] s. noun or adjective:

An insurance or surety for safe passage. Safe, as in a safe place.

**amāna** (*amānah*, *amanah*) [a-maa-na] s. noun:

Deposit or trust, deposit for safe keeping. A deposit arrangement that creates a relationship of trust, i.e., a fiduciary relationship, between the depositor of property and the *amin*. The word is a noun, and can refer to an institution that is a depository or trustee. The plural is "*emanet*," meaning deposits for safekeeping.

'*amd* [agh-med, a-md] adverb:

Deliberate intent, acting intentionally.

*amil al-souq* (*amil al-suk*) [a-meel ul sookh]:

See *muhtasib*.

*amin* [a-meen] s. noun:

Depository, i.e., an adjective describing the person or institution with whom or which an asset is deposited.

*amir* (*amir*, *emir*) [a-meer] s. noun:

A prince or commander, or a military rank below that of sultan.

*amirah* (*amirah*, *emirah*) [a-meer-ah] s. noun:

Princess.

*Amir al-Mu'minin* [A-meer ul Moo-agh-men-een] s. noun:

A synonym for "*Khalifa*," along with, "*Imām al-Mu'minin*," "*Imām al-Ummah*," and the English transliteration "Caliph."

*aqeedah* [a-khee-dah] s. noun:

Faith.

'*āqil* [aa-kheel] noun or adjective:

Literally, brain, but used in the sense of knowledgeable. A person is "'*āqil*" if he or she is in full possession of his or her mental faculties. Such a person is fully responsible for his or her actions or omissions. For instance, a person who is "'*āqil*" is able to be a testator (*musīd*). Thus, "'*āqil*" essentially means "sane." There is no specific age when a person becomes "'*āqil*," though typically the range cited is between 13-15 years.

'*aqila* [agh-key-la] s. noun:

Tribal aid after wrong killing. A type of *takaful* historically, but no longer, used in Arabia and the Middle East. See "*ākila*."

*aql* [a-kl] s. noun:

Literally, "intellect." "*Aql*" connotes reason, that is, human reasoning, in the sense of natural human knowledge. Sometimes, "*aql*" is translated as "dialectical reasoning." In addition, "*aql*" can refer to a Divine source of knowledge, specifically, the *Shī'ite* doctrine of the succession of Divine sources of knowledge through the blood lineage of the Prophet Muhammad.

'*āriyya* (*ariyya*) [aa-ree-yya] s. noun:

A contract for the loan of a non-fungible object.

'*asabā* ('*asaba*) [agh-ssa-ba] s. noun:

Agnate, near male relative, i.e., a person (especially male) who is descended from the same forefather or male ancestor. The term is used in Inheritance Law to denote Agnatic heirs. Noun (singular). The plural is "'*asabāt*."

*asalamu alaykum* (*assalamu alaikum*) [a-sa-lam-oo a-lay-comb] noun phrase:

Literally, "Peace Be Upon You," which is a traditional, polite Muslim greeting.

*aṣḥāb al-farā'id* (*ashab al farā'id*) [ass-hhaab al fa-raa-eedh] noun phrase:

Qur'anic heirs, i.e., any one, some or all of the 12 relations to a testator — decedent identified by the Qur'an (*sura* 4, *ayat* 11-12) as being entitled to a share (*fard*) in the net estate of the decedent. The *aṣḥāb al-farā'id* are:

- (1) Husband
- (2) Wife
- (3) Father
- (4) True Grandfather
- (5) Mother
- (6) True Grandmother
- (7) Daughter
- (8) Son's Daughter
- (9) Full Sister
- (10) Consanguine Sister
- (11) Uterine Brother
- (12) Uterine Sister

Note that 8 of the 12 Qur'anic heirs are women, and 5 of them (wife, mother, and daughter) are primary heirs, meaning their portions are unaffected by other claimants.

'*Āshārā* (*Ashura*) [a-shoo-ra]:

Literally, "tenth." The *Shī'ite* Festival in which the martyrdom of the 3rd *Shī'ite* *Imām*, Hussein, and his followers at the Battle of Karbala in 680 A.D. is celebrated. The key date is the 10th of *Muharram*, on which Hussein was killed.

*asī* (*asl*) [a-ssl] s. noun:

Nature of a transaction, i.e., the acts that make up the transaction.

*asīl* (*asil*) [a-sseel] s. noun:

Principal, or principal debtor as in a surety contract (*kafāla*) whereby the surety (*kafil*) promises to fulfill the obligations of the *asīl* to a creditor or other party.

Dep rela and or t	' <i>awl</i> [agh-wl] s. noun:  Literally, "increase." A procedure used in Inheritance Law when the sum of the shares ( <i>fard</i> s) of Qur'anic heirs exceeds unity (1). The denominator of each share is increased to be equal to the sum of the numerators, while leaving the numerators the same. The result is to bring the sum to one.
' <i>am</i>	
Deli	' <i>aurah</i> ( <i>aurah</i> , <i>aurah</i> ) [auw-rah] s. noun:  Nakedness. "' <i>Aurah</i> " refers to the parts of the body of a man or woman that must be covered, particularly in public, that is, in front of one or more persons who are not <i>maharim</i> (a spouse or close family relatives).
<i>ami</i>	
See	
<i>ami</i>	<i>ayah</i> ( <i>āyāh</i> ) [eye-ah] s. noun:  Verse.
Dep whic	<i>ayat</i> ( <i>āyāt</i> ) [eye-at] pl. noun:  Verses, i.e., the plural of " <i>ayah</i> ."
<i>ami</i>	
A pl	<i>Āyatollāh</i> ( <i>Ayatollah</i> , <i>Ayatullah</i> ) [Eye-a-tol-laah] s. noun:  Literally, "sign of God." A high-ranking <i>Shī'ite</i> title conferred on a person of great piety, learning, expertise, and respect, who serves as a guide for the community ( <i>ummah</i> ) in the absence of the <i>Imām</i> (i.e., until the return of the Hidden <i>Imām</i> ). An <i>Āyatollāh</i> not only carries great religious authority, but also wields political power.
<i>ami</i>	
Prir	
<i>Ami</i>	
A s2 and	
<i>aqe</i>	' <i>ayn</i> ( <i>ayn</i> ) [eign] s. noun:  Literally, "eye." Used in the <i>Sharī'a</i> to mean a thing. A synonym for "thing" is " <i>rakaba</i> ."
Fait	
' <i>āqi</i>	<i>azaan</i> ( <i>azan</i> ) [a-zaan] s. noun:  Islamic call to pray, as used in Near East and Indian Subcontinent. Specifically, the call to prayer issued five times a day by the <i>muezzin</i> ( <i>mu'dhin</i> ) of a mosque.
Lite she resj is al spec betv	' <i>azl</i> [a-zel] s. noun:  Withdrawal, that is, a method of contraception also known as <i>coitus interruptus</i> .
' <i>aqi</i>	<i>babs</i> :  See <i>safirs</i> .
Trif Ara	<i>badal</i> [ba-dal] s. noun:  Consideration.
<i>aql</i>	
Lite of n ing. <i>Shī'</i> line:	<i>baghi</i> [bag-hee] s. noun:  Rebellion, specifically, rebellion against a government, or a transgression by one group of a population against another group. The <i>Māliki</i> School treats <i>baghi</i> as a distinct <i>haqq Allāh</i> offense that triggers a <i>hadd</i> punishment.
' <i>ārī</i>	<i>bā'in</i> ( <i>ba'in</i> , <i>baa'in</i> ) [baa-een] adjective:

Definite. The term is used in Family Law in respect of *ṭalāk* (repudiation of a wife by a husband). *Ṭalāk* may be revocable (*raj'i*), which results in a suspension of the marriage contract, or definite, which results in dissolution of the marriage.

*bātil* (*batil*) [baa-teel] adjective:

Null and void, invalid, i.e., automatically a transaction has no legal effect because of a flaw.

*batin* [ba-teen] s. noun:

Esoteric issues in Islam, which is the focus of Sevenser (*Ismā'ili*) *Shī'ism*.

*bay'* (*bay*, *bai'*) [bay-agh, bay] s. noun:

Sale. Contract of sale, i.e., general term for any contract in which an object of commerce (*māl*) is bought and sold. The term also covers exchange or barter contracts, as well as sales for money. The full expression for "contract of sale" is "*aḳd al-bay'*."

*bay' al mu'ajjal* (*bay al-mu'ajjal*) [bay-agh al moo-a-jill] s. noun:

A deferred delivery contract, but actually involving two deferrals. One of two types of *salam* contracts in which the buyer pays the purchase price at a later date, after conclusion of the contract, either as a lump sum on a contractually-specified date, or via installments over a contractually-prescribed period, and thereafter receives delivery of the good or goods that are the object of the contract.

*bay' al salam* (*bay al-salam*) [bay-agh al sa-lam] s. noun:

A spot sale contract, but actually involving deferred payment. One of two types of *salam* contracts in which the buyer pays the full purchase price immediately upon the conclusion of the contract, but receives delivery of the good or goods that are the object of the contract at a later date.

*bay' al urbān* (*bay' al-arabun*, *bay al-arabun*) [bay-agh al ur-boon] s. noun:

Down payment, i.e., payment in good faith of a portion of the full price.

*bay' al wafa* (*bay' al-wafa*) [bay-agh al wa-fa] s. noun:

A mortgage or pledge contract involving the sale of real property.

*bay' atān fī bayā* [bay-agh a-taan fee ba-yaa] s. noun:

Double sale. A specific and ancient example is *mukhātara*, which existed in Medina among other places from at least the days of *Imām* Mālik, founder of the *Māliki* School. In this deal, a debtor sells its creditor an asset, and immediately buys back the asset for a greater amount, with re-delivery of the asset from the creditor to the debtor to occur on a specified future date. Economically, the creditor has "lent" funds to the debtor, secured by the debtor's asset. The creditor will receive those funds back, plus some extra money, when the creditor sells back the asset to the debtor. The difference between the two sale prices effectively is interest. This transaction clearly resembles a *murābaha* contract.

*Bayt Al-Ḥikmah* (*Bayt Al-Hikmah*) noun phrase:

House of Wisdom. Harūn Al-Rashid was the fifth and most famous *Abbasid* Caliph, ruling from 786-809 A.D. He was known for his interest in scientific, cultural, and religious matters. Thanks to the collection and translation of manuscripts from foreign lands by the Caliph Harūn (and by his predecessor, the second *Abbasid* Caliph, Al Mansūr (reigned 754-775)), and owing to the considerable support of the son of Harūn, the Caliph Al-Ma'mun (reigned 813-833), the famous library of Bagdad — the "*Bayt Al-Ḥikmah*" or "House of Wisdom" — was established.

**Bayt al-Izzah** (*Bay al Izzah*) [bay-it-al-eez-zah] noun phrase:

House of Honor, or House of Power. The term refers to the lowest Heaven, to which — according to some *ulema* — Allāh sent down the Qur'ān from the highest heaven on the Night of Decree (*Laylatul Qadr*).

**bayt al māl** (*bayt al māl, bayt al-māl, bait ul-māl*) [bay-it-al-maal, bait-ul-maal] noun phrase:

Government treasury.

**biḍā'ah** (*bida'ah, bidaa'ah*) [bee-dhaa-ah] s. noun:

Giving goods to another person to trade, such as when a shop owner leaves the store to another store owner to sell merchandise, but without paying wages or employing that other store owner. The transaction is voluntary, with the second owner performing *gratis*.

**bi'l kalām** (*bi'l-kalām, bi'l-kalam*) [bee-l ka-lam] adverb:

In words (orally, verbally).

**bi'l kitābah** (*bi'l-kitābah, bi'l-kitabah*) [bee-l kee-ta-bah] adverb:

In writing.

**bismallah** [bees-mal-lah] noun phrase:

"In the Name of God," or in full form, "In the name of God, the Lord of Mercy, the Giver of Mercy" (*Bismallah al Rahman al Rahim*). The "*bismallah*" is the opening passage, before the first *ayah*, to virtually every one of the 114 *surahs* in the Qur'ān.

**bughāt** (*bughat*) [boo-ghaat] pl. noun:

Rebels. Also translated as "transgressors." A rebel is distinct from a *murtadd* (apostate).

**burkha** (*burka, burqa*) [bur-kha, boor-kha] s. noun:

A veil worn by some Muslim women, particularly in Saudi Arabia and other Gulf countries, Afghanistan, Pakistan, and even the United Kingdom. The *burkha* covers all of the face, and does not leave a slit for exposure of the eyes. Rather, sight is possible through a mesh screen, or through the fabric of which the *burkha* is made. In other words, the *burkha* is a full-face veil. An additional or attached garment covers the rest of the body, including arms to the wrists, and legs to the ankles, making the *burkha* an effective head-to-toe veil. The *burkha* is almost always black in color, though in Afghanistan, particularly under Taliban rule or influence, it has

a medium-toned blue hue. A general synonym for "*burkha*" is "*niqāb*." However, a technical distinction exists between the two: a "*burkha*" covers the entire face, with no exception, as well as the body. A "*niqāb*" leaves the eyes uncovered, via a narrow slit, and is worn with an accompanying headscarf. A separate veil, covering the eyes, may or may not be worn with the "*niqāb*."

**Caliph** [Ca-lif] s. noun:

The English transliteration of "*Khalīfa*."

**da wa ta'ajjal** [da wa ta-aj-jal] verb:

Prepay and reduce. That is, in the context of asset financing, a debtor-buyer-lessee obtains a reduction in the amount owed to a creditor-seller-lessor by prepaying the purchase price or lease amount. While forbidden (*ḥarām*) in earlier times, the prohibition on *da wa ta'ajjal* has been loosened, and prepay-and-reduce arrangements now are common with Islamic credit cards. A *da wa ta'ajjal* transaction is the mirror image of a transaction involving *ribā al-jahiliyya*.

**da'if** [da eef] noun or adjective:

Weak. The third highest of four levels of authenticity that a *ḥadīth* can have, i.e., the *ḥadīth* is not widely corroborated, and contains some uncertainty or flaw, such as an interruption in the chain of transmission (*isnād*) or a transmitter in it (*rawi*) is unknown.

**dalīl 'aqlī** [da-leel aghq-lee] noun phrase:

Rational argument, rational proof, based on reason. For example, a proposition could be based on reason, *dalīl 'aqlī*, on law, *dalīl shar'ī*.

**ḍamān** [dha-maan] s. noun:

Liability.

**ḍaman khatr al-tariq** (*ḍaman khatr al-tariq*) [da-man kha-ter al ta-reek] s. noun:

Insurance (typically in the form of a surety) against dangers when traveling. A type of *takaful* historically, but no longer, used in Arabia and the Middle East.

**ḍamin** [dhaa-meen] noun or adjective:

Liable, i.e., to be liable.

**dār al-ḥarb** (*dar al-harb*) [daar al-harb] s. noun:

Literally, the "abode of war." Land of war, enemy territory. Sometimes referred to as "*dār al-kufr*," or house of disbelief.

**dār al-Islām** (*dar al-Islam*) [daar al-Islam] s. noun:

Literally, the "abode of peace." Household of peace, abode of peace. Sometimes referred to as "*dār al-salam*" or "*dār es-salaam*."

**darak** [da-rak]: s. noun:

Default in ownership of property.

**da'wah** [da-wah] verb:

Literally, making an invitation (to invite) or issuing a summons (to summon). The term is used in respect of preaching, or evangelizing, through an educational process.

**dayn** [dayn] s. noun:

A debt or claim arising from a credit loan. The plural, "*duyun*," means debts or liabilities.

**darar** (*darar*) [dah-rar] s. noun:

Harm.

**darar fāhish** (*zarar fahish*) [dah-rar Faa-hheesh] s. noun:

Excessive harm, excessive damage.

**daraba:**

See "*idrib*."

**dararāh** (*darara*, *darārāt*) [dah-rue-rah] s. noun:

Necessity.

**dawlah** [daw-lah] s. noun:

Literally, state, for example *Dawlah* Qatar means "State of Qatar." A term used by the *Abbasid* Caliphs to connote a new era.

**dhawā'ī arḥām** [dha-wuu-l ar-hhaam] pl. noun:

Uterine heirs. Distant kindred persons.

**dhawā'ī furāḍ dhawā'ī fara'id** [dha-wuu-l fu-ruudh] pl. noun:

Qur'anic heirs. Persons identified in the Qur'an as entitled to a share (*fard*) in the estate of a decedent. With notable exceptions, most of them are women.

**dhikr** [dhee-ker] s. noun:

Remember, remembrance. The Qur'an asks believers to "remember your Lord" and "remember God often" (33:41).

**dhimma** (*dhemma*) [dhim-ma, dheem-ma] noun or adjective:

Literally, engagement, obligation, responsibility, or care as a duty of conscience. The term is used to connote a treaty of surrender with a conquered non-Muslim group, who having signed the treaty, are "*dhimmi*s."

**dhimmi** (*dhimmi*, *zimmi*) [dhim-mee, dheem-mee] noun or adjective:

Literally, "protected person." Generally, a non-Muslim protected by a Muslim authority under a treaty of surrender. The protection is afforded in exchange for payment of a tax (*jizya*) and acquiescence to certain restrictions that may amount to second-class citizenship. Historically, "*dhimmi*" referred to the People of the Book ("*ahl al kitāb*," or "*kitābi*"), other than Muslims, i.e., Jews and Christians. (See *surah* 60, *ayat* 8-9 of the Qur'an.) Eventually, the term took a geo-political dimension to refer to permanent and temporary residents in Muslim territories.

**dhul yad** (*dhul al yad*) [dhool yahd] s. noun:

Possessor, i.e., a party in possession of property.

**dhurri** (dhur-ree):

See *waqf ahli*.

**din** (*din*, *deen*) [deen] s. noun:

Loosely translated, religion. The totality of the faith and actions of a Muslim so that he or she submits to the Will of Allāh. That is, "**din**" connotes obedience to Allāh. In the Qur'an, "**din**" is used in 72 verses and Islam is referred to as "*dīn*." In those verses, two other meanings of "din" are used, which are different from the first. "*Din*" can mean empire, "government, honor, power, rulership, or supremacy. "*Dīn*" also can mean to render a judgment, along with reward or punishment.

**diwan** [dee-wan] s. noun:

Office.

**diyyah** (*diya*, *diyyah*) [dee-yyah] s. noun:

Blood money. Blood money is one of three forms of liability associated with *haqq ādamī* offenses, i.e., with *jināyāt* (civil wrongs, or torts), the others being retaliation (*kiṣās*) and damages. The plural is "*diyyat*."

**diya mughallaza** (*diya mughallaza*) [dee-ya moo-ghall-adha] s. noun:

Heavier blood money, which may be paid to settle a serious *jināyāt* case.

**diya muḥakkaka** (*diya muḥakkaka*) [dee-ya moo-hakh-kha-kha] s. noun:

Normal blood money, which may be paid to settle a less serious *jināyāt* case.

**Druze** [Drooze] s. or pl. noun:

The minority branch of Sevever (*Ismā'īlī*) *Shī'ism*.

**dukhāl** (*dukhul*) [do-khool] s. noun:

Consummation of a marriage through sexual intercourse. *Dukhāl* is not required for conclusion of a valid marriage (*nikāh*) contract.

**Eid** [Eed] s. noun:

Literally, "festivity" or "festival."

**Eid al-Aḍha** (*Eid al-Adha*, *Eid ul-Adha*) [Eed ul ad-ha] noun phrase:

Literally, "festival of sacrifice." Muslim holiday marking the willingness of Abraham (Ibrahim) to sacrifice his only son, Issac, as a sign of faith to God. (Of course, God intervened at the last moment and allowed Abraham to sacrifice a ram in lieu of Issac.) Muslims celebrate *Eid al-Fitr* at the end of the *Hajj*. The starting date for the festivities is roughly 70 days after the end of *Ramadan*, on the tenth day of the month of *Dhī Al-Hijja*. The celebration begins with a short prayer, and then a sermon (*khuṭba*). *Eid al-Aḍha* also is called the "Greater *Eid*," as it lasts for four days, in comparison with *Eid al-Fitr*, which lasts for three days. Note that *Eid al-Adha* is called "*Baqra Eid*," or "*Baqri Eid*," in Urdu-speaking areas such as

Pakistan. In Arabic, “*baqarah*” means “heifer” or “cow,” and in Urdu, “*baqri*” means “goat. Traditionally on this *Eid*, a cow or goat is sacrificed.

***Eid al-Fitr*** (*Eid al-Fitr*, *Eid ul-Fitr*) [Eed ul fit-tr] noun:

Literally, “festival to break fast.” The Muslim holiday marking the end of *Ramaḍān*. Muslims celebrate *Eid al-Fitr* at the end of the month of *Ramaḍān*, on the first day of the month of *Shawwāl*. The celebration lasts for three days. *Eid al-Fitr* also is called the “Smaller *Eid*,” in comparison with *Eid al-Adha*. Throughout *Eid al-Fitr*, Muslims recite the *takbīr*, as per *surah* 2, *ayah* 185 of the Qur’ān.

***Eid al Ghadir*** (*Eid al Ghadir*, *Eid al Ghadeer*) [Eed ul Gha-deer] noun phrase:

Festival of Ghadir, an important *Shī‘ite* event held annually on to mark the sermon at Ghadir Al Khumm in which *Shī‘ites* believe the Prophet Muhammad designated ‘Ali as his successor.

***Fadilah*** [fa-dee-lah] s. noun:

Recommended. A synonym for “*mustahabb*.”

***fadl Allāh*** (*fadl Allah*) [fa-del U-lahh] Proper noun or noun phrase:

Bounty or favor of Allāh, used (for example) in the context of property or other forms of wealth.

***fajr*** [fa-jr] s. noun:

Literally, “dawn.” The “*fajr*” prayer is the first of the five daily prayers, and those prayers are one of the Five Pillars of Islam.

***faqih*** (*faqeeh*) [fa-keey] s. noun:

A legal scholar, jurist, or respected specialist in the *Shari‘a*, i.e., the singular of *fukahā‘*.

***farā‘id*** (*farā'id*) [fa-raa-eedh] pl. noun:

Allotted portions, i.e., shares, particularly referring to shares in the net estate of a decedent.

***fard*** (1st meaning) (*fard*) [fardh] s. noun:

Duty or obligation. Synonym of “*‘awājib*.”

***fard*** (2nd) (*fard*) [fardh] s. noun:

Fixed inheritance share of an heir, as fixed in the Qur’ān, *sura* 4, *ayah* 11-12.

***fard ayn*** (*fard al-ayn*) [fardh aghyn] s. noun:

Individual duty. A duty that every Muslim is supposed to perform, such as those contained in the Five Pillars of Islam.

***fard kifaya*** (*fard al-kifaya*) [fardh kee-fay-a] s. noun:

Collective duty. A duty imposed on the community of Muslims (*ummah*).

***fāsid*** (*fasid*) [faa-seed]: adjective:

Defective, voidable, i.e., at the option of a relevant party, a transaction may be voided, and thus rendered legally ineffective, on the basis of some defect in that transaction.

***fāsik*** (*fasik*, *faasik*, *fasiq*) [faa-seek] noun or adjective:

Sinner, i.e., the opposite of ‘*adl*’.

***faskh*** [fask] s. noun:

Cancellation, specifically, cancellation of a contract.

***Fatah Al Mubeen*** [Fa-tah U1 Moo-been] noun phrase:

Glorious Victory, referring to the non-violent conquest of Mecca by the Prophet Muhammad and his supporters in 630 A.D.

***Fātimah*** (Fatimah, Fatima, Faṭimah) [Faa-tee-mah] proper noun:

Youngest daughter of the Prophet Muhammad and wife of ‘Ali, the cousin and son-in-law of the Prophet. Also the name of the wife of Abū Ṭalib, the father of ‘Ali.

***fatwā*** (*fatwa*) [fat-waa] s. noun:

A religious order. Specifically, a juristic opinion that is accepted as definitive. Such an opinion can be issued only by a recognized Islamic legal authority, such as a *mufti*. In the Kingdom of Saudi Arabia, following the February 2009 reforms proclaimed by King Abdullah, the Fatwa Council of the *Majlis* consists of leading legal scholars from all Four Schools. The plural is “*fatawā*,” or simply in English, “*fatwās*.”

***fi‘l*** [fee-aghl] verb:

Conduct or act, such as the delivery of goods to convey an offer to form a contract.

***fi‘l-fi‘l*** (*fi‘l-fi‘l*) [feel- fee-aghl] verb or adverb:

In the act, as to the act. The term is used (for example) in the context of killing by mistake (*khata‘*), where the mistake goes to the act.

***fi‘l-kaṣd*** (*fi‘l-kaṣd*) [feel- khaṣṣd] verb or adverb:

In the purpose, as to the purpose. The term is used (for example) in the context of killing by mistake (*khata‘*), where the mistake goes to the purpose.

***fiqh*** (*fiqh*, *fiqh*) [fick] s. noun:

Literally, “understanding,” from the verb “*faqaha*,” which means “to understand.” The science of the *Shari‘a*, or more generally, the science of Islamic jurisprudence. That is, the totality of human comprehension of the perfect, immutable, and divine law revealed in the Qur’ān and Sunnah, and explained, elaborated, and interpreted by Islamic Law scholars (*fukahā‘*). The full term is *uṣūl al-fiqh*, referring to the roots of the jurisprudence.

***fitna*** [fit-na] s. noun:

Secession, upheaval, chaos, civil war. The plural is “*fitan*.”

***fiṭr*** (*fiṭr*) [fit-tr] verb:

Literally, to "break fast," *i.e.*, to break a period of fasting.

**Fiver *Shi'ites*:**

See *Shi'i*, and *Zaydi Shi'ites*.

***fukahā'*** (*fukahā*, *fuqahā'*) [foo-kah-hah] pl. noun:

Literally, "jurists." Islamic legal scholars or respected specialists in the *Shari'a*. In other words, experts in Islamic Law. All *fukahā'* are trained in the religion of Islam, and thus are considered members of the *ulema*. But, not all *ulema* are *fukahā'*. Only those members of the *ulema* who are specialists in Islamic Law are regarded as *fukahā'*. There are different levels of expertise in Islamic Law, of course, as there are in any legal system. The highest level of *faqih* is known as an Unrestricted Jurist-Scholar, or "*Mujtahid Mutlaq*." Among *Sunnites*, it is believed that there are few, if any, such scholars at this level today. A *mujtahid mutlaq* has satisfied all the conditions for independent reasoning (*ijtihad*). Among *Shi'ites*, it is believed that the most prominent scholars meets these conditions. Below this level is a Restricted Jurist-Scholar, or "*Mujtahid Muqayyad*." This type of scholar has mastered the methodology of his School of Law (*madhhab*), and can apply it to reach the traditional rulings of that School, and to pass new rulings within that School or within his area of legal specialty. The singular term is "*faqih*."

***gaḥd al 'ariyyah*** [gaḥd al agh-reey-ya] verb phrase:

Malicious denial of borrowed property. None of the Four Schools treats this behavior as a *ḥaqq Allāh* crime that carries a *ḥadd* punishment, though it is listed as such by Ibn Hazm al Zahiri based on a version of a particular *ḥadith*.

***gannah*** (*jannah*) [gan-nah, jen-nah] noun:

Heaven.

***gharar*** [gah-rar] noun:

Broadly, "risk" or "uncertainty," but literally, "trick." Often used to refer to commercial uncertainty.

***ghaṣb*** (*ghasb*) [gha-ssb] noun or verb:

Usurpation.

***ghaṣīb*** (*ghasīb*) [gha-sseeb] noun or adjective:

Usurper of property. *ghayba* [ghay-ba] noun or adjective: Concealment, hiding. "*Ghayba*" is used by *Shi'ites* to refer to the Lesser Occultation. That is the Twelfth *Shi'ite* belief the 12th *Imām*, Al Mādhī, went into hiding at age 5, in 874 A.D., following the death of his father, the 11th *Imām*, Al 'Askari.

***gholalah*** [gho-la-lah] s. noun:

A garment of thick fabric to be worn under clothing, much like a ladies slip is worn under dresses and skirts in modern times. Use of a *gholalah* prevents the outer dress from describing the shape of the body of a woman.

***ghurra*** [ghur-ra] s. noun:

Blood money. More specifically, an indemnity (*i.e.*, compensation for loss incurred) payment made for causing the death of an unborn child through a miscarriage or abortion. A related concept is "*diyyah*."

***ghusl*** [ghoo-sel] s. noun:

Purification, specifically, the full ablution (ritual washing) with clean water before prayers. *Ghusl* is mandatory before commencing prayers after having sexual intercourse or sexual discharge (such as of semen), menstruation, or giving birth. Full ablution is required before major rituals, such as Friday and *Eid* prayers, and the *Hajj* or *Umrah*. "*Ghusl*" is distinct from partial ablution, or "*wudu*," which is necessary before reading the Qur'an or performing certain prayers.

***ḥabs*** - 1st meaning (*ḥabs*) [hh-abs] s. noun:

Lien, *i.e.*, the retention of property or other asset in order to secure a claim.

***ḥabs*** - 2nd meaning (*ḥabs*) [hh-abs] s. noun:

Imprisonment.

***ḥaḍāna*** (*ḥadana*, *hadaana*, *ḥadhanah*) [hha-dhaa-na] s. noun:

The right to care for a child, which entails both the right of custody of a child, and the right to rear a child. More generally, the presumption in Islamic Family Law that for the benefit of a small child, the child should remain with his or her mother. This right remains with the mother of a child until a male child is 7 (or in some instances, 9) years old, if male, or until a female child comes of age (*i.e.*, has her first menstrual cycle). Some accounts indicate the right ends as early as 2 years of age, and the *Māliki* School says for a girl it lasts until she is married. Should the mother die before these cut-offs, *ḥaḍāna* passes to the nearest female relative of the child. Divorce and re-marriage to another man causes the mother to forfeit the right.

***hard*** (*ḥadar*) [ha-dar] noun or adjective:

Not protected under Islamic Criminal Law (*i.e.*, a person who enjoys that protection). The opposite — a person protected by that Law — is "*ma'sūm*," *ḥadd* (*ḥadd*) [haddh] s. noun: Literally, limit, but used in the context of a fixed punishment for certain crimes, namely, *ḥaqq Allāh*.

***ḥadith*** (*ḥadith*, *ḥadīth*, *haddith*, *haddīth*) [hha-deeth] s. noun:

The prophetic tradition, in particular, a saying or account of an action of the Prophet Muhammad. Specifically, a non-prophetic statement made by the Prophet Muhammad, *i.e.*, a saying of his that is not part of the revelation contained in the Qur'an. The saying is recorded in writing, and has been researched, debated, and verified by *ulema* and *fukahā'*. In brief, a "*ḥadith*" is a *Sunnah* for which there is an textual record authenticated by scholars. The statement of the Prophet may be an explicit oral utterance, a decision, dicta, or an expression through silence. It may also be a recounting of a behavior — an act or practice — of Muhammad. Thus, in general, the term refers to any formal tradition of the Prophet. These traditions are recorded in a variety of compilations. The plural is "*ḥadīths*" or "*aḥādīth*."

***ḥadith qudsi*** (*ḥadīth*, *ḥadīth*, *haddith*, *haddīth*, *qudsi*) [hha-deeth kood-see] s. noun:

Literally, "sacred *ḥadīth*." A *ḥadīth qudsī* is a sub-category of *ḥadīths*. Muslims believe a *ḥadīth qudsī* is the Word of God (Allāh) that the Prophet Muhammad repeated. As repeated by the Prophet, the statement was recorded and ultimately transmitted and verified through the *isnād* process. That is, Allāh revealed to the Prophet a *ḥadīth qudsī*, on some occasions through a dream. But, the statement is in the words of Muhammad himself. In contrast, Muslims regard a passage in the Qur'ān as the direct words of God transmitted to His Messenger.

**ḥafīz** (*hafēez*) [ha-fee-z] noun and proper noun (*i.e.*, can be a surname):

A person who has memorized the revelations received by the Prophet Muhammad, that is, a person who has memorized the Qur'ān.

**Ḥajj** (*Hajj, Haj*) [Hhaj, hazh] noun:

The Fifth of the Five Pillars of Islam, the pilgrimage to Mecca and Medina, which occurs annually from the seventh to the thirteenth days of the month of *Dhī Al-Hijja*.

**Ḥajj Mabarr** [Hhaj ma-broor] noun phrase:

An accepted *Hajj* in the sense of righteous, sinless, or in effect, perfect *Hajj*.

**Ḥajjat Alwada'** [Hhajj Al-wa-da] noun phrase:

Farewell Pilgrimage, the last Pilgrimage of the Prophet, which he undertook in 632 A.D.

**ḥajr** (*hajr*) [hah-j-r] noun:

Judicial interdiction, judicial intervention.

**ḥakam** (*hakam*) [hah-calm] s. noun:

Arbitrator. Notably, the Prophet Muhammad was a renowned *ḥakam*.

**ḥalal** (*halal*) [hah-laal] noun or adjective:

Permitted, permissible. Any act that is not forbidden (*ḥarām*) is *ḥalal*. However, there are different and more subtle degrees of permissibility, as indicated through a religious and legal appraisal according to the Scale of Five Religious and Legal Qualifications (*Al Ahkām Al Khamsa*).

**ḥalas** (*khalas*) [kha-las] noun, adjective, or adverb:

Enough.

**Ḥanafī** (*Hanafi*) [Hhah-nah-fee] s. noun:

Oldest of the Four Schools, founded by *Imām* Abū Hanifa Al-No'man (699-787 A.D.).

**Ḥanbalī** (*Hanbali*) [Hhahn-ba-lee] s. noun:

One of the Four Schools, and the most recent one, founded by *Imām* Ahmed ibn Hanbal (780-855 A.D.).

**ḥaqq** (*hakḳ, hack*) [hahwk] s. noun:

Right, claim. The plural is "*ḥuquq*."

**ḥaqḳ ādamī** (*hakḳ ādamī, hakḳ adami*) [hhawk aa-da-mee] s. noun:

Private right, private claim.

**ḥaqḳ Allāh** (*hakḳ Allāh, hakḳ Allāh*) [hhawk ul-laah] s. noun:

A right or claim of Allāh.

**ḥaqḳ al majrā** [hhawk ul maj-raa] noun:

The right of flow, as where a private property owner must let water flow, or pour out water, in respect of water (such as a river) passing through her land or sourced on that land (such as a spring).

**ḥarām** (*haram*) [hah-raam] noun or adjective:

Forbidden. The term often is associated with the Scale of Five Religious and Legal Qualifications (*Al Ahkām Al Khamsa*).

**ḥarb** [hharb] noun:

Literally, "war." See *jihād*.

**ḥarbī** (*harbi*) [hhar-bee] noun or adjective:

Enemy alien.

**ḥasan** [hh-a-san] noun or adjective:

Good. The second highest of four levels of authenticity that a *ḥadīth* can have, *i.e.*, the *ḥadīth* has been corroborated, but not as extensively as is the case with a *ḥadīth* that is "*ṣaḥīḥ*," and there are some discrepancies in the wording of the versions of the *ḥadīth*.

**Hashim** (*Hashem*) [Ha-shem] proper noun:

The clan (*i.e.*, large family unit), which is part of the *Quraysh* tribe, to which the Prophet Muhammad belonged.

**ḥawāla** (*hawala, hawalah, hawala*) [hah-wah-lah] noun or verb:

Transfer, specifically, transfer of obligations.

**hibah** (*hiba*) [hee-bah] s. noun:

Gift or donation. Note that a *hibah* is considered a contract (*'aqd*). The plural is "*hibat*."

**ḥijāb** (*hijab*) [hhi-jab] s. noun:

Literally, "veil," "curtain," or "barrier." Typically, "*ḥijāb*" is used to connote a headscarf, of which there is a myriad of styles and colors. In the non-Muslim world, the most common type of *ḥijāb* is a square- or rectangular-shaped scarf worn over the head and neck, which leaves the full face clearly exposed. Some women wear this kind of *ḥijāb* loosely, exposing a bit of hair, while others wear it tightly, scrupulously endeavoring to reveal no hair.

**Hijra** (*Hijrah, Hegira*) [hi-j-ra] s. noun:

Migration, immigration. Also, the name given to the Islamic calendar, which dates from 622 A.D., which in turn corresponds to year 1 in that calendar. That year marks the migration of the Prophet Muhammad and many of his companions from Mecca to Medina. The letters "A.H." following a year refer to "After *Hijra*."

**hīla** (*hila*) [hhee-la] pl. noun:

The singular of *hiyal*.

**hīlf** [hhelf] s. noun:

Literally, cohort, but refers to a confederation for mutual assistance, for financial and military aid. A type of *takaful* historically used in Arabia and the Middle East, and which has modern incarnations.

**hīmā** [hhee-maa] s. noun:

Broadly, public pasture. Specifically, setting aside land, and barring public ownership thereof, to keep it for pasture and graving of livestock.

**hirabah** (*hiraba*) [hee-ra-bah] s. noun:

Narrowly defined, highway robbery, which is a *haqq Allāh* crime (though that is the subject of debate among Muslim scholars) that carries a *hadd* punishment. More generally, a crime against society, in the sense of undermining the security of society. Also called "*kaṭ' al-tariq*."

**hīrz** (*hīrz*) [hheerz] s. noun:

Custody of a thing or things. The absence of *hīrz* is a defense in a criminal case of theft (*sariqa*), which, if accepted, could eliminate the applicability of a *hadd* punishment, and trigger the possibility of a *ta'zīr* punishment.

**hisba** (*hisba*) [hhis-ba, hhees-ba] s. noun:

Literally, "calculation." The Office of the Inspector of the Market. Historically, the second of the Four Rightly Guided Caliphs (*Rashidun*), Omar ('Umar) ibn al-Khattab, assigned the task of inspecting the fairness of the business practices in the market to the *hisba* officer. Eventually, in legal discourse, "*hisba*" took on a broader meaning, to cover regulatory issues beyond business to include personal, family, and public policy issues.

**hiyal** (*hiyal*) [hhee-all] pl. noun:

Legal fictions, formalisms, or evasions.

**Houthis** [Who-thees]:

See *Shabab Al Moumineen*.

**hudna** [huud-na] s. noun:

Literally, "truce," "armistice," or "cease fire," but also can mean "quiet" or "calm" (as it comes from the Arabic root verb for "calm"). Note the truce is temporary in nature.

**hudud** (*hudud*) [hhoo-duud] pl. noun:

The plural of *hadd*, i.e., punishments.

**hukm** [hoo-km] s. noun:

Rule, as in a legal rule.

**hulafa'** [hhoo-la-fagh] pl. noun:

The parties who come together to form an alliance to provide a *hilf*, that is, an insurance of mutual assistance.

**huquq** (*huquq*) [hhoo-quuq] pl. noun:

The plural of *haqq*, i.e., rights or claims.

**'ibadah** (*ibadah*) [ee-baa-dah] s. noun:

Worship.

**Ibādī** or **Ibādīs** (*Ibadi* or *Ibadis*) [ee-baa-dhee]:

See "*Khārijite*."

**ibāha** [ee-baa-hha] s. noun or adjective:

Permissibility.

**ibāhāt** (*ibāhāt*) [ee-baa-hhaat] pl. noun:

Permissible rights, i.e., liberties.

**ibn** [ib-en] s. noun:

Son.

**'idda** (*idda*) [id-da, eed-da] s. noun:

The waiting period for a woman, after the termination of her marriage, before she may get re-married.

**idrib** (*idrib*) [ee-dhreeb] verb:

A verb, the root letters of which (*d r b*) have multiple meanings, namely, to propound, strike, smite, stamp (or stomp one's foot), beat, cite (an example or a dispute), encompass, cast (throw, or fling upon the ground), set a barrier, engender, turn about, make a sign or point with the hand, prohibit, prevent, hinder from doing a thing one has begun, seek glory, avoid, shun, leave, turn away oneself, be with shame, be in a state of commotion, be in a state between hope and fear, and go away. The term — in particular, the related word "*daraba*," — appears in *surah* 4, *ayah* 34, of the Qur'ān. Through the ages, the translations (all by men) of the Qur'ān interpret the term to mean "beat," or a synonym thereof. The result of such translations is authorization for a husband to "beat" his wife. However, the translation by Dr. Laleh Bakhtiar — *The Sublime Quran* (6th ed., 2009) — interprets the word to mean "to go away," and thereby interprets *surah* 4, *ayah* 34 not to authorize wife beating.

**ifā'** (*ifā*, *ifa*) [ee-faagh] s. noun:

Fulfillment, specifically, the fulfillment of a contractual obligation.

**'Ifrād**, s. noun:

One of three types of *Hajj* pilgrimages, in which a pilgrim performs only the *Hajj*, not the *'Umrah* as well, and does not sacrifice an animal. Consequently, this type of pilgrimage is regarded as the easiest of the three.

**ihām** [ihh-raam] s. noun:

Customary religious garb worn during the *Hajj*.

**ījāb** (ījāb) [ee-jaab] s. noun:

Offer, i.e., one of the essential elements for formation of a contract.

**ījāra** (ījarāh, ījarah, ijara) [ee-jaa-ra] s. noun or adj:

Leasing. Hire or lease contract.

**ījaza** [ee-jā-za] s. noun:

Permission. For example, among *Shī'ite* scholars, a *mujtahid* obtains the *ījaza* of other *mujtahidān* to interpret religious law for the community (*ummah*).

**ījma'** (ījma, ijma', ijma'a) [ij-ma] s. noun:

Consensus, i.e., consensus among the legal scholars (*fukahā'*) on a point of law at a particular time, and in a particular School of Law, or possibly across multiple Schools. Such consensus may be accorded permanent and infallible legal value. However, the consensus may reflect not unanimity, but rather a majority view, in which case its permanence and infallibility is dubious.

**ījma' ahl al-Madīnah** [ij-ma ul Ma-dee-nah] noun phrase:

Consensus of the Ancient School of Medina, which the *Mālikī* recognizes as the second most important source of the *Shari'a* after the *Qur'an*.

**ījma' al-tabi'in** [ij-ma ul ta-be-en] s. noun:

Consensus of the Successors (of the Prophet Muhammad).

**ijra** [ij-ra] s. noun:

A reward received by a wife in a temporary marriage, or *mut'a*. A *mad'a* marriage is legal under *Shī'ite* jurisprudence, but forbidden (*harām*) under *Sunni* Family Law. An *ijra* is distinct from a nuptial gift, or dowry (*mahr*), in a normal marriage (*nikāh*).

**ijtihād** (ijtihad, ijtihād, idjtihād) [ij-tee-haad] s. noun:

Literally, "effort," but referring to the use of individual (or independent) reasoning, or a strenuous endeavor at applying reason to an issue. Also, speculative legal reasoning. This legal reasoning may take one or more of a variety of forms. It should use the roots of the law (*uṣūl al-fiqh*), such as *qiyās* (analogical reasoning), as its basis. But, with those roots in mind, it might also take the form of deductive reasoning; inductive reasoning; consequentialist (utilitarian) reasoning; de-ontological reasoning; public policy reasoning; and even reference to interdisciplinary concepts and paradigms. However, insofar as the "Door" to *ijtihād* was "Closed" around the year 1,000 A.D., many *ulema* and *fukahā'* have asserted that

only *qiyās* is acceptable. That assertion, and indeed the very idea that the Door to *ijtihād* ever was Closed, has been subject to great scrutiny, especially after the terrorist attacks of 11 September 2001.

**ikhtilāt** [eeh-tee-lat] s. noun:

Literally, "mixing." The term is used to refer to mixing of the sexes. In Saudi Arabia, *ikhtilāt* is forbidden, that is, men and women are not supposed to mix in public places, subject to limited exceptions (principally to do with family members, such as a husband and wife, or parent and child). *Ikhtilāt* appears to derive from tribal custom, and among Saudi officials and scholars, the extent to which it is proscribed by the *Shari'a* is debated. At issue is whether *ikhtilāt* is basically innocent behavior, and does not involve the sin of *khulwa*. The wives of the Prophet Muhammad served male guests, and in modern times, wealthy Saudis rely on a daily basis on maids and drivers.

**ikrah** (ikrah, ikraah) [eek-raah] s. noun:

Duress. A situation of duress exists if one party fears the carrying out of a threat by another party, and that other party is in a position to carry out the threat. The absence of duress, i.e., the manifestation of free will of transacting parties, is an essential constitutive element for contract formation. The presence of duress is a defense in a criminal case.

**ikrār** (ikrar, iqrar) [eeke-raar] s. noun:

Acknowledgement or confession.

**ikhtilās** (ikhtilaas, ikhtilas) [ikh-tee-laas] s. noun or verb:

Snatching things unaware, i.e., taking the private property of a person while that person is unaware of what is happening, as in pick-pocketing. This act is not considered *ṣarīka* (the *ḥaqq Allāh* crime of theft, triggering a *ḥadd* punishment). It is a *ḥaqq ādamī* offense, thus it does not trigger a *ḥadd* punishment, but rather is actionable as a civil wrong, or tort (*jīnāyāt*).

**Ikhwan al-Muslimin** [Ikh-wan ul Muz-lee-meen] noun:

The Muslim Brotherhood.

**ilā'** (ila) [ee-la] s. noun:

An oath taken by a husband (*ṣawj*) to abstain from sexual intercourse with his wife (*ṣawja*) for four months. If he adheres to this oath, then the marriage (*nikāh*) between the two parties is terminated. Or, at a minimum, the wife has a right to obtain a formal divorce. Thus, *ilā'* is a method of divorcing a wife. The pre-Islamic era (*jahiliya*) witnessed the abuse of the practice of *ilā'*, as it would freeze relationships, resulting in neither divorce nor marriage, and it did not have a defined period of time. Islam regulated the practice, by limiting its duration to only four months, and ensured that after this period the wife has the right to obtain a divorce, or the husband could get around his oath by fulfilling a religious expiation (*kaffāra*).

**'illa** [eel-la] s. noun:

Legal reasoning, or more specifically the legal rationale that underlies a rule.

**'ilm** [ee-lm]:

A *Shī'ite* doctrine that each *Imām* has special religious knowledge and insights. This doctrine was developed fully by the 6th *Shī'ite Imām*, Ja'far Al Ṣādiq.

**Imām** (*Imam*) [ee-maahm] s. noun:

Literally, "leader." Among *Sunnites*, an "*imām*" is a person who leads prayers. By tradition, only a man can lead prayers. However, in recent years in the United States and United Kingdom, women have led prayers. Among *Shī'ites*, an "*Imām*" is more than just a leader of prayers. He — and, again, it is by tradition a male — is a religious and political leader of the *Shī'ite* community. The plural is "*immah*," though in English it is common to say "*imāms*."

**Imāmah** or **Imāmate** (*Imamah*) [ee-maahm-ah] s. noun or adjective:

Leadership. Specifically, the *Shī'ite* doctrine concerning not just political, but also religious and spiritual, leadership of the Muslim community (*umma*). Essentially, the doctrine holds that the legitimate leaders, and thus rightful successors to the Prophet Muhammad, are the *Imāms*. They have three key characteristics: (1) supernatural knowledge, (2) special authority (indeed, infallibility, or "*iṣmah*"), and (3) lineage by blood to the family of the Prophet (*i.e.*, they are part of the family of Muhammad). *Sunnis* do not accept the doctrine.

**Imām al-Mu'minīn** [ee-mahm ul moo-agh-men-een] noun phrase:

A synonym for "*Khalifa*," along with "*Amīr al-Mu'minīn*," "*Imām al-Ummah*," and the English transliteration "Caliph."

**Imām al-Ummah** [ee-mahm ul oom-mah] noun phrase:

A synonym for "*Khalifa*," along with "*Amīr al-Mu'minīn*," "*Imām al-Mu'minīn*," and the English transliteration "Caliph."

**Imāmi** (*Imami*) [ee-maahm-ee] s. noun or adjective:

A synonym for "Twelve *Shī'ites*," that is, *Shī'ites* but not including Sevener *Shī'ites* (*Ismā'īlis*) or Fiver *Shī'ites* (*Zaydis*). Other synonyms are "*Ithna 'Ashari*" and "*Ja'fari*." The term is based on the Twelve *Shī'ite* belief in the special authority, indeed infallibility, of *Imāms*. Although Sevener (*Ismā'īlis*) *Shī'ites* share this belief, the term "*Imāmi*" is reserved for Twelve *Shī'ites*.

**imḍā'** (*imda'*, *imda*) [eem-dhaa] s. noun or verb:

Ratification, as in ratification of a contract.

**Injeel** [In-jeel] s. noun:

An Arabic word transliterated from the Greek for The Bible, that is, the Christian Holy Book, or specifically the New Testament.

**intifada** [in-te-faa-dah] s. noun:

Uprising. The term typically is used in the context of the movement of Palestinians living in the Occupied Territories (specifically, Gaza and the West Bank) against Israel, which captured the Territories in the June 1967 War. The First *Intifada* started in 1987.

**insha'Allāh** (*inshallah*) [in-shah-al-la] noun phrase:

This term may be translated as "Allāh willing," "if Allāh wills," "if it is Allāh's will," "if Allāh wishes," "depending on Allāh's will," "when Allāh wills, up to Allāh." This expression is commonly used throughout the Islamic World, by Muslims and non-Muslims alike. The expression reflects a fundamental tenet of Islam, namely, that Allāh is the all-powerful Master of the Universe, and all that happens is according to His Will. The expression also reflects hope, namely, hope that a good event at issue will transpire in the future, or a bad event at issue will not occur. In that respect, "*insh'Allah*" is akin to the English expression "hopefully." (That analogy is all the closer when it is recalled that Hope, along with Faith and Charity, are the Three Theological Virtues according to Catholic Christian teaching, essentially meaning that these Virtues come from God.) Both indicate the speaker would like to see something take place, or not, and suggest an invocation of God's blessing.

**iqama** [ick-a-ma] s. noun:

Second Call to Islamic Prayer. See *adhān*.

**igra'** (*ikra'*, *igra'*) [ick-ra] verb:

To read.

**iqṭā'** [eek-ttah] s. noun:

Assignment.

**iqṭā' istighlāl** [eek-ttah is-tigh-laal] s. noun:

A specific type of assignment, namely, a developmental land grant by which a government assigns to a private party rights to public property for the purpose of advancing the value of the property, or extracting wealth from it.

**i'rāb** [ee-agraab] s. noun:

Traditional Arabic grammar, and in particular, the way words are pronounced, such as the spoken endings of Arabic words, as sometimes indicated by diacritical marks.

**irfāq** (*irfaq*) [ir-faak] gerund:

Attaching. Derived from "*arfaq*," which means "attached" (verb, past tense).

**irtidād** (*irtidad*) [eer-tee-daad] s. noun:

Apostasy, specifically, conversion from Islam to another religion. *Irtidād* is to be distinguished from "*riddah*," which is conversion away from Islam to a state of unbelief (*kufr*), possibly atheism or agnosticism.

**Islam** [Is-lam] s. noun:

Literally, "submission," but used to refer to submission to the Will of God.

**'iṣmah** (*ismah*) [iss-mah] noun:

Literally, "protection." The *Shī'ite* belief in the special authority, indeed infallibility, of an *Imām*. According to this belief, the Prophet Muhammad, and certain other figures in Islam (namely, his daughter, Fatima Zahra), were endowed by God (Allāh) with freedom from error and sin. The belief also holds that Allāh bestowed freedom from error and sin on the *Imāms*. This belief is shared by Twelver *Shī'ites* (*Ja'fari*, or *Imāmis*) and Sevener *Shī'ites* (*Ismā'ilis*). But, Fiver *Shī'ites* (*Zaydis*) do not ascribe "'iṣmah" to the *Imāms*. According to at least one source, the doctrine is based on a speech given by Abū Bakr after the death of the Prophet, in which Abū Bakr said that "God has elected Muhammad over all other human beings, and has protected him from moral weaknesses."<sup>3</sup> However, the doctrine is accepted neither by *Sunnis* nor by *Khārijites*. They cite *surah* 48, *ayah* 2 of the Qur'ān, which speaks of God forgiving the past and subsequent faults of Muhammad.

**Ismā'ili** (*Ismaili*) [Is-my-lee] noun or adjective:

A synonym for Sevener *Shī'ites*.

**isnād** (*isnād*) [is-naad] noun:

Chain of transmission, or more precisely, the chain of transmitters, referring to the line of persons who transmitted a *ḥadīth*.

**istidānah** (*istidanah*, *istidaanah*) [is-tee-daa-nah] noun or past tense verb:

Purchase on credit terms. "*Istidānah*" also means to borrow.

**iṣṭilā'** (*istifa*) [iss-tee-faa] noun:

Receiving, such as of a thing in acquiring derivative ownership thereof.

**istighlāl** (*istighlal*) [is-tigh-laal] noun or verb:

To use, to advance.

**istighlāla** (*istighlala*) [is-tag-halla] past tense verb:

Used, advanced.

**istihkāk** (*istihkak*) [is-teeh-khaakh] s. noun:

Third party, due obligation.

**istiḥsān** (*istihsan*, *istihsaan*) [is-teeh-saan] s. noun:

Literally, "approval." The term connotes juristic preference. It is discretionary reasoning that is not based strictly on *qiyās*. Specifically, a form of *ijtihād* in which scholars weigh an opinion about a legal rule against other opinions.

**istirdād** (*istirdad*) [is-teer-daad] s. noun:

Third party, recovering possession of property.

**istiṣlāḥ** (*istislah*) [is-teess-laahh] s. noun:

<sup>3</sup> See M.M. Bravmann, *Studies in Semitic Philology*, particularly Chapter 29, *The Origin of the Principle of Ismah* (1977), cited in <http://en.wikipedia.org/wiki/Ismah>.

Taking into account the public interest, i.e., public interest reasoning.

**istiṣnā'** (*istisna'*) [is-teess-naa] s. noun:

Literally, "manufacturing." A manufacturing contract, i.e., contract for the manufacture of an object.

**it'ikāf** [ee-tee-kaaf] s. noun:

Voluntarily confining oneself to a mosque to pray for a limited number of days, and thus leaving jobs and other worldly matters aside for that period. This practice may occur during *Ramādān*.

**ithm wa baghy** [it-hm wa bag-hee] pl. noun:

Sins.

**Ithna 'Ashari** (*Ithna 'Ashariyya*) [ith-na agh-sha-ree] s. noun or adjective:

A synonym for Twelver *Shī'ites*, that is, *Shī'ites* but not including Sevener *Shī'ites* (*Ismā'ilis*) or Fiver *Shī'ites* (*Zaydis*). Other synonyms are "*Imāmī*" and "*Ja'fari*." The term is based on the Twelver *Shī'ite* belief in the special authority, indeed infallibility, of *Imāms*. Although Sevener (*Ismā'ilis*) *Shī'ites* share this belief, the term "*Imāmī*" is reserved for Twelver *Shī'ites*.

**'iwāḍ** (*'iwad*, *iwad*) [ee-wadh] s. noun:

Counter-value.

**ja'ālah** (*jo'ala*) [joh-agh-lah] s. noun:

Services fee agreement or contract. More precisely, an agreement with a person or firm with expertise in a given field to engage in a task for a set fee or commission, such as hiring a private investigator to find a missing object, or a consultant to perform a project. Also, "*ja'ālah*" can refer to a unilateral contract for services in which the offeror, addressing the public, designates a specific amount of money to be paid upon performance of a certain condition. See *ju'l*.

**Ja'fari** (*Ja'fari*, *Ja'fari*) [Ja-agh-fa-ree] noun or adjective:

A synonym for Twelver *Shī'ites*, that is, *Shī'ites* but not including Sevener *Shī'ites* (*Ismā'ilis*) or Fiver *Shī'ites* (*Zaydis*). Other synonyms are "*Imāmī*" and "*Ithna 'Ashari*." The term "*Ja'fari*" comes from the person of Ja'far Al-Sadiq, who Twelver *Shī'ites* accept as their Sixth *Imām*. Interestingly, scholars who founded the *Ḥanafī* and *Mālikī* Schools narrated certain *ḥadīths* from Ja'far Al-Sadiq.

**Jahannam** [ja-han-nam] s. noun:

The worst place in Hell (*naar*). There are various regions of Hell, all encompassed by the generic term "*naar*," but "*jahannam*" is the worst of them. The term "*jahannam*" corresponds directly to the geographical site "Gehenna," which is referenced in Jewish and Christian writings, and which was located outside the Old City of Jerusalem (the Valley of Hinnom).

**jahiliya** (*jahiliyyah*) [ja-hee-lee-ya] s. noun:

Literally, "ignorance." The term is used by Muslims to refer to pre-Islamic ignorance, that is, civilization before Islam, particularly the era of paganism on the Arabian Peninsula before the Prophet Muhammad began reciting the revelations given to him. Properly used, the term refers only to the Arabian Peninsula and its inhabitants, not to other geographic locations or peoples. Certainly, the existence of Judaism and Christianity throughout the Middle East and beyond, not to mention the existence of Buddhism and Hinduism, all before Islam, adduce that the pre-Islamic period was anything but "ignorant." However, a softer connotation may be that the revelations to Muhammad had not yet been given, and thus were not yet known. Contemporary Muslims use the term to describe critically situations of violent group behavior, such as violence due to sports rivalry.

**jalada** [ja-la-da] verb:

To hit the skin with the hand or any object. This word is used in reference to the punishment of 100 lashes prescribed in the Qur'an in *surah* 24, *ayah* 2, for unlawful sexual intercourse.

**jā'iz** [jaa-ez] verb or adjective:

Allowed, unobjectionable. The term is used to connote and act or omission that is *nubāh* (neutral, indifferent, and thus permissible) is allowed, as there is no religious objection. The term often is associated with the Scale of Five Religious and Legal Qualifications (*Al Ahkām Al Khamsa*).

**jam'** [yaam] s. noun:

Combination. The term arises in Islamic Family Law, and connotes an impediment to marriage in that a man cannot marry simultaneously two or more women who are related to each other within a forbidden degree (*mahārim*) or through fosterage (*radā'*).

**janin** [ja-neen] s. noun:

Bud, very smallest beginnings, but also used to mean a fetus.

**Jibreel** (Jabreel) [Ja-breel, Ji-breel] pronoun:

The Archangel Gabriel, responsible for the Annunciation and the transmission of the Qur'an to the Prophet Muhammad.

**jihād** (*jihad*) [jee-haad] s. noun:

Struggle, strive. Sometimes translated as "holy war." However, the correct Arabic rendition of "the holy war" is *al harbu al-muqaddasah* (in Arabic) or *al harbu al-muqaddasatu* (in the Near East and Indian Subcontinent). The verb forms of *jihād* are *yujaḥidu* (male) or *tujāḥidu* (female). Occasionally, but not during the time of the Prophet Muhammad, the terms "*harb*" and "*qital*" are used interchangeably with "*jihād*," or as an aspect of "*jihād*."

**jihād al-akbar** (*jihad al-akbar*) [jee-haad al ak-bar] s. noun:

The greater struggle. The greater struggle is a personal struggle to understand the will of Allāh and submit to it. The goal of the greater struggle is moral healing, that is, a journey from learning what is "bad" and avoiding it, to learning what is "good"

and pursuing it. The goal also is a second journey, namely, from being "good" to pleasing God (Allāh), and thereby meriting entry into Heaven.

**jināya** (*jinaya*) [jee-naa-ya] s. noun:

Literally, "offense." In the language of Anglo-American Law, a civil wrong, tort, or in the language of Roman and Civil Law, a *delict*.

**jināyāt** (*jinayat*) [jee-naa-yaat] pl. noun:

Literally, "offenses," the plural of *jināya*.

**jizyah** (*jizya*) [jeez-ya] s. noun:

Tax, tribute, compensation, payment in return. Specifically, a special tax paid by non-Muslims minorities residing in a Muslim country to the governing Muslim authority that gives them the status of "*dhimmis*." In effect, a poll tax. The tax is a payment in return, in that the Muslim authority gives protection to the *dhimmis*, grants them benefits, and exempts them from military service and the *zakāt*. Traditionally, the *jizya* is levied on an able-bodied free man, excluding monks, who can afford to pay it, and is a low amount such as one *dīnar* per year. The tax is based on *surah* 9, *ayah* 29 of the Qur'an, and the *ḥadīth*.

**ju'l** [jool]:

Corresponds to the Roman Law contract of *locatio conductio operis*. See **ja'ālah**.

**Jum'a** (*Jum'ah*) [juu-ma, jew-ma] s. noun:

Friday. In the Islamic faith, Friday is the equivalent of Sunday in the Christian faith.

**juyūb** [joo-yoob] pl. noun:

The neck slit of a dress. "*Juyūb*" also has a secondary meaning, which is connected logically to the first meaning, namely, the bosom or bust of a woman. The singular is "*jayyb*."

**Ka'ba** (*Kaba, Kaaba, Ka'baa, Ka'bah*) [Ka-ba, Kagh-baa] s. noun:

Central place of worship in the Grand Mosque, Mecca, Kingdom of Saudi Arabia, a focal point for the *Hajj*, and the most revered and sacred place and object in the world among Muslims. In pre-Islamic times, the *Ka'ba* was a pagan shrine. According to the Qur'an, in *surah* 2, *ayah* 127, the *Ka'ba* was rebuilt by Abraham (Ibrahim) and his son Ishmael (Ismā'il).

**kabḍ** (*kabḍ, qabḍ*) [kha-bdh] s. noun:

Taking possession, such as of a thing in acquiring derivative ownership thereof.

**kabāl** (*kabul, qabul*) [kha-bool] s. noun:

Acceptance, i.e., one of the essential elements for formation of a contract.

**kada** [ka-dhaa] s. noun:

An Ottoman Turkish term referring to the building block unit for civil government was the *kada*. A *kada* was a district in which a particular *qāḍī* had jurisdiction.

**ḡadhḡ** (*kaḡḡf, qaḡḡf*) [kha-def] s. noun:

Slander, specifically, false accusation of unlawful sexual intercourse. *ḡadhḡ* is a *ḡaqq Allāḡ* crime that carries a *ḡadd* punishment.

**kadiyya** [ka-dee-yya] s. noun:

Case, e.g., a legal case.

**kafāla** (*kafala*) [ka-faa-la] s. noun:

Suretyship (surety contract).

**kafāla bil-māl** (*kafala bil-māl*) [ka-faa-la beel maal] s. noun:

Surety for a claim, i.e., a contract creating additional liability (incumbent on the surety) to secure fulfillment of an obligation.

**kafāla bil-nafs** (*kafala bil-nafs*) [ka-faa-la beel naphs] s. noun:

Surety for a person, i.e., a contract creating additional liability (incumbent on the surety) to secure performance of an act by a person.

**kaffāra** (*kaffara*) [kaf-faa-ra] s. noun:

Religious expiation, i.e., atonement or penance for the commission of a wrongdoing or other failure to fulfill a religious obligation.

**kafil** [ka-feel] s. noun:

A guarantor or surety.

**kāfir** (*kafir*) [ka-fear] s. noun:

Literally, "rejector" or "unbeliever." In particular, an unbeliever or infidel, i.e., one who does not believe in Islam. Historically, "referred to a person who does not belong to the People of the Book (*"aḡl al kitāb,"* or *"kitābi"*), i.e., who is not a Jew, Christian, or Muslim. Eventually, the term took on a geo-political dimension to refer to non-residents of Muslim territories. Further, the term is a pejorative one used by some Muslims for all non-Muslims.

**kaḡba** (*kaḡba, qaḡba*) [khaḡ-ba] s. noun:

Whore, prostitute.

**kalimah** (*kalima, kalema*) [ka-lee-mak] s. noun:

Literally, "the word." Often used in connection with the First Pillar of Islam to connote the entirety of the *Shahāda*. *Kanun* [Khaa-noon] s. noun: A Turkish term referring to the administrative law of the Ottoman Empire, consisting of legislative pronouncements, regulations, directives, and orders of the Sultans.

**karaha** [ka-ra-ha] s. noun:

Offensiveness.

**kaḡ' al-tarik** (*kat al-tarik, qaḡi'taraiq, qati'taraiq*) [khatt' al-ta-reek] s. noun:

Highway robbery, with *"kaḡ"* (*"qaḡi"*) meaning "robbery" and *"tarik"* (*"taraiq"*) meaning "highway." It is a *ḡaqq Allāḡ* crime that carries a *ḡadd* punishment. Also

called *"ḡirabah."*

**Katib** (*katib*) [ka-teeb] s. noun:

Clerk of the Court, or Secretary to a *qāḡi*. This office was borrowed in the late *Umayyad* Caliphate from the *Sassanid* Persians, when the institution of the *qāḡi* entered into the *Sharī'a*.

**kaḡl** (*kaḡl, qatīl, qateel*) [kha-teel] s. noun:

Homicide, or more generally, killing. *Kaḡl* is a *ḡaqq ādami* offense, thus it does not trigger a *ḡadd* punishment, but rather is actionable as a civil wrong, or tort (*jināyāt*). The plural is *"kaḡloo"* (*"qatīloo"*), meaning "killings."

**Khadyja** (Khadija, Khadijah, Khadijah, Cadijah) [kha-dee-ja] Proper noun:

Employer, wife (indeed, the favorite wife), and companion of the Prophet Muhammad. A widow and successful businesswoman, her relationship with Muhammad began in 595 A.D., and lasted until her death in 619 A.D.

**Khalifa** (*Khalifa, Caliph*) [Kha-lee-fa] s. noun:

Literally, successor or representative. The head of an Islamic state and/or leader of an Islamic community (*ummah*). Historically, Caliphs also have been called *"Amir al-Mu'minin,"* which means "Commander of the Faithful," *"Imām al-Mu'minin,"* or *"Imām al-Ummah."*

**khalwa** [khal-wa] s. noun:

Privacy, particularly between a husband (*zawj*) and wife (*zawja*). *Khalwa* is not required for conclusion of a valid marriage (*nikāḡ*) contract.

**khamr** [kha-mer] s. noun:

Intoxicating drink, wine.

**kharāj** [ka-raj] s. noun:

Land tax.

**Khārijite** (*Khārijite*) [Kha-ree-jite] noun or adj:

Literally, "those who went out," associated with *"Khārij,"* which means "stranger" or "third party." The *Khārijites* supported the first three of the Four Rightly Guided Caliphs (*Rashidun*), and initially supported the fourth such Caliph, 'Alī, cousin and son-in-law of the Prophet Muhammad, and the first *Shī'ite Imām*. Subsequently, they rejected 'Alī, and revolted against him, thereby becoming a group distinct from both *Sunnis* and *Shī'ites*. In effect, they were Secessionists. It was a member of the *Khārijites* (specifically, one of the early groups within the movement, called the *"ḡarāriyya"*), Abū al-Raḡman ibn Muḡjam, who assassinated 'Alī. The *Khārijites* insisted that any pious, able Muslim, whether or not related by blood to the family of the Prophet Muhammad (as 'Alī was), could serve as *Imām* in the sense of religious and political leader of the Muslim community (*umma*). They also insisted on the right to revolt against any leader who deviated from the example of the Prophet or the first two Caliphs, Abū Bakr and Umar. In addition to their political ideas, the *Khārijites* articulated religious and legal precepts that

distinguished themselves further from Sunnites and *Shī'ites*. For example, the *Khārījites* (specifically, the *Harūriyya*) accepted the proposition that a woman could be an *Imām*. Historically, "*Khārījites*" also were called "*Shurat*," which means "buyers." This appellation suggests they have traded their mortal life (or "*al dunya*") for another life ("*al akhera*"), namely, one with God. By the 7th century A.D., the *Khārījites* became concentrated in what is today Southern Iraq. Today, all that remains of the *Khārījites* are the "*Ibādī*" Muslims, who dominate in Oman, and also are found in certain parts of North Africa, and in Zanzibar. These Muslims, the "*Ibādīs*" reject the rubric "*Khārījites*" for themselves and take the label "People of Justice and Uprightness" (*Ahl Al-'Adl wal Istiqama*).

**khata'** (*khata'*) [kha-tta] s. noun:

Mistake, as in killing (*katl*) by mistake.

**khayar** [kha-yar] s. noun:

Benefit, blessing, used (for example) in the context of property or other forms of wealth.

**khimār** (*khimar*) [khee-maar] s. noun:

Head covering, veil covering the head. The plural is "*khumur*."

**khiyāna** (*khiyāna al-amāna*) [*khiyaana, khiyana*] [khee-yaa-na] s. noun:

Literally, "abuse of confidence." The term is used to mean embezzlement. *Khiyāna* is not considered *sariḥa* (the *ḥaqq Allāh* crime of theft, triggering a *ḥadd* punishment), but rather a *ḥaqq ādamī* offense actionable as a civil wrong, or tort (*jināya*).

**khiyār** (*khiyar*) [khee-yar] s. noun:

Literally, option, but used in the context of rescission. A right to rescind a completed contract, whereby one or the other party may withdraw from the contract. *Khiyār* is an important remedy that ensures there is no *caveat emptor* (buyer beware) in the *Sharī'a*. *Khiyār* also is relevant in Penal Law, in the instance of duress (*ikrah*), which gives rise to the option of the afflicted party to rescind his or her otherwise wrongful behavior. The option to rescind indicates the action or transaction at issue is voidable.

**khiyār al 'aib** (*khiyar al-aib*) [khee-yar al-aighb] s. noun:

The doctrine of rescission of (*i.e.*, withdrawal from) a completed contract in the circumstance where there is a fault existing, at the time of the contract, in the goods or services that are the subject of the contract.

**khiyār al majlis** (*khiyar al-majlis*) [khee-yar al-mahj-lees] s. noun:

The doctrine of rescission of (*i.e.*, withdrawal from) a completed contract, at the option of either party, as long as they have not physically separated. The term "*majlis*" means "meeting," hence rescission is possible from a face-to-face contract as long as the parties are still in the physical presence of one another.

**khiyār al ru'ya** (*khiyār al-ru'ya, khiyar al ru'ya*) [khee-yar al ruu-ya] s. noun:

The doctrine of rescission of (*i.e.*, withdrawal from) a completed contract, where goods are sold sight unseen, with the buyer having the option to reject the goods upon sight.

**khiyār al shart** (*khiyār al-shart, khiyar al-shart*) [khee-yar al ssart] s. noun:

A stipulation in a contract about a right of rescission (*khiyār*), specifically the period of time in which either party may exercise the option to rescind a completed contract. Sometimes expressed as "*shart al-khiyār*."

**khiyār al wasf** (*khiyār al-wasf, khiyar al-wasf*) [[khee-yar al was-ef] s. noun:

The doctrine of rescission of (withdrawal from) a completed contract in the circumstance in which there is a difference between the parties about the description of the goods or services that are the subject of the contract.

**Khojas:**

See *Nizāris*.

**khulwa** [khool-wa] s. noun:

Seclusion. The term is used in reference to seclusion by an unrelated, unmarried couple in a setting that could tempt devish, that is, sinful, behavior. Traditionally in Saudi Arabia, preventing *khulwa* is the justification for *ikhtilat* (gender separation in public places).

**khums** [khooms] s. noun or adjective:

Literally, one-fifth (1/5). An annual *Shī'ite* tax of one-fifth (1/5) levied on wealth accumulated during the year. The tax is imposed on net income (*i.e.*, gross revenues less expenses), net increase in real estate holdings, stored gold, silver and jewellery, mined goods, goods taken from the sea, and spoils of war. The tax is for the Prophet Muhammad, his family, orphans, the needy and travelers. Half of the *khums* (*i.e.*, one-tenth, or a tithe) is deemed the share of the *Imām* (*sahl al Imām*), as it is the inheritance of the *Imām* from the Prophet.

**khutba** (*khutba*) [khuuth-ba] s. noun:

Sermon.

**Khutbat Alwada'** [Khuuth-bat Al-wa-da] noun phrase:

Farewell Sermon, the last sermon delivered by the Prophet Muhammad. He gave it in 632 A.D. at Mount Ararat, near Mecca.

**khutbatul Jum'a** (*khutbatul Jumu'ah*) [khuut-ba-tuul juu-ma, huut-ba-tuul juu-ma] s. noun:

Friday sermon, *i.e.*, the sermon delivered by an *imām*, typically from a raised pulpit (*mimbar*) in a mosque, at the Friday congregational prayers.

**kifaya** [kee-fay-a] verb:

Literally, "enough."

**kitābī** [kee-taa-bee]:

See *ahl al-kitāb*.

**ḳīma** (*ḳīma, qimah*) [khee-ma]: s. noun:

Value. *Ḳīma* is distinct from *thaman* (price).

**ḳīmī** (*ḳīmī*) [khee-mee]: s. noun:

Non-fungible (heterogeneous), non-fungible object, such as artwork.

**ḳirā'** (*ḳirā*) [kee-ra]: s. noun:

Corresponds to the Roman Law contract of *locatio conductio rei*. The term is rarely used, and refers to a sale.

**ḳisma** (*ḳisma*) [khees-ma]: s. noun:

Division, as in the dividing of jointly-owned property among the owners.

**ḳiṣāṣ** (*ḳisaas, kisas, qisaṣ*) [khee-ssaass]: s. noun:

Retaliation, i.e., private vengeance. *Ḳiṣāṣ* is one of three forms of liability associated with *ḥaqq ādamī* offenses, i.e., with *jināyāt* (civil wrongs, or torts), the others being blood money (*diya*) and damages.

**kitāb** (*ḳitaab, kitab*) [kee-tab]: s. noun:

Literally, "book." Often used in the sense of a sacred scripture, such as the Qur'ān. "*Kitāb*" also can be translated as "established decree" or "law." The plural is "*kutb*" ("books").

**kufr** [koo-far]: s. noun:

Unbelief, as in a lack of belief in Islam.

**lakīṭ** (*lakit, laqit*) [la-kheett]: s. noun:

Foundling, i.e., a child who has been abandoned and whose parentage is unknown.

**latmiya** [lat-mee-a]: s. noun:

A mourning chant during the *Shī'ite* Festival of *Ashura* in which the suffering of the 3rd *Shī'ite* Imām, Hussein, and his followers at the Battle of Karbala in 680 A.D. is recounted.

**Laylatul Qadr** [lay-la-tool qa-der]: s. noun:

Night of Decree, one of the odd-numbered nights during the last 10 days of *Ramādān* during which some *ulema* speculate that Allāh sent down the Qur'ān, from the *Umm al-Kitāb*, from the highest heaven to the lowest heaven (*Bayt al-Izzah*).

**lāzim** (*lazīm*) [laa-zeem]: adjective:

Binding, as in a binding contract.

**li'ān** (*li'an*) [lee-aan]: s. noun:

One of several grounds in Islamic Family Law for the dissolution of a marriage, whereby a husband accuses under oath his wife of committing an unchaste act.

*Li'ān*, on the one hand, and *ḳadhf* and *zinā*, on the other hand, are mutually exclusive.

**lisan** [lee-san]: s. noun:

Law.

**luqṭa** [luke-tta]: s. noun:

Treasure.

**luṭf** [loo-thf]: s. noun:

Divine grace, the grace of God.

**madhhab** [madh-hab]: s. noun:

School of legal thought, of Islamic jurisprudence, as used in Arabic. That is, A religious and legal school in Islamic Law, of which in *Sunnite* Islam there are four major ones, which in chronological order of their establishment are: *Ḥanafī*, *Mālikī*, *Shāfi'i*, and *Ḥanbalī*. See *mazhab*. The plural, "schools of Islamic Jurisprudence," is "*madhahib*."

**madrasa** (*madrasah, madrassa, madrassah*) [ma-dra-sa]: s. noun:

An Islamic religious school or seminary. Note the term also is used to refer to all pre-college level schools, elementary, middle, and high. The plural is "*mederis*," though in English the term "*madrasas*" is used.

**ma'dād or ma'dad mutaḳārib** (*ma'dud*) [ma'-duud]: pl. noun:

Fungible things that can be counted. A synonym is "*'dadi*."

**maḥārim** (*mahaarim, maharim*) [mah-aa-reem]: pl. noun:

The plural of "*maḥram*."

**Māhdi or Al Māhdi** (*Mahdi*) [Maah-dee]: Proper noun:

A lineal descendant of the Prophet Muhammad. Specifically, the 12th *Shī'ite* Imām, or Hidden Imām.

**mahr** [ma-her]: s. noun:

Nuptial gift, i.e., the gift given by a bridegroom to his bride as part of the marriage (*nikāh*) contract between the bridegroom and the guardian (*walī*) of the bride. Simply put, the dowry. The amount of the *mahr* is supposed to be "fair" (*mahr al-mithl*). The marriage gift may be paid in full immediately, deferred entirely, or a combination of immediate and deferred payment. The portion that is paid "up front" is called "*muajjil*." The portion that is deferred is called "*muakhkhar*."

**mahr al-mithl** [ma-her al mith-l]: noun phrase:

Fair *mahr*, i.e., a value for the nuptial gift that is fair.

**maḥram** (*mahram*) [mah-ram]: s. noun:

A nearby relative, that is, a person closely connected by a familial relationship. Such a person falls within a forbidden degree of relationship, in two respects. It is not

possible to marry such a person, and it is not possible to steal from such a person (as ownership of the object in question essentially extends to both persons in the relationship). The plural is "*maḥarim*."

**maja'yya** [ma-ja-agh-ee-yya] s. noun:

A rule-making authority delegated from *Mahdi*, used in *Usuli Shī'ism* (a dominant branch of Twelver *Shī'ism*). The *maja'yya* is authorized to determine the content of the *Shari'a*, that is, to identify and re-define issues, and to promulgate solutions.

**majlis** [mahj-lees] s. noun:

Meeting, assembly, session, committee. Sometimes the full expression, "*shura majlis*" is used, to indicate a "consultative council."

**makīl** (*makīl*) [ma-keel] s. noun:

Fungible things that can be measured, such as barley, dates, salt, and wheat. A synonym is "*kayli*."

**makrah** (*makrah*, *mukruh*) [mah-krue, ma-crew, ma-cruuh] noun or adjective:

Reprehensible, disapproved, disliked, undesirable, and strongly discouraged, from a religious standpoint, or from a legal standpoint, but not expressly forbidden (*i.e.*, not *ḥarām*). That is, a proposed action is reprehensible under Islamic Law. *Makrah* is the opposite of *mustahabb* (recommended).

**māl** (*mal*) [maal] s. noun:

A legitimate object of commerce, *i.e.*, a thing capable of being bought and sold. "*Māl*" is a general term whereby the thing could be a good (such as a movable object) or real property.

**māl ḥukmī** [maal hhook-mee] s. noun:

A supposed right, *i.e.*, a right that is reputed or believed to exist.

**māl mankūl** [maal man-khool] s. noun:

A type of *māl* (legitimate object of commerce) that is a movable object. An example would be a car. A synonym is "*māl nakli*."

**mālik** [maa-leek] pronoun:

Owner, *i.e.*, an owner of property.

**Mālikī** (*Maliki*) [Maa-li-key, Maa-le-kee] noun or adjective:

One of the Four Schools, and the second of the Four in chronological terms, founded by *Imām* Mālik ibn Anas Al Asbahi (710-795 A.D.).

**ma'lām** (*ma'lum*) [magh-loom] adjective:

Certain or known, as in a definite term or waiting period (*ajal*).

**mamlak** (*mamluk*) [mam-luke] adjective:

Literally, "owned." Used as an adjective or the past tense of the verb "*tamlik*," which means "to own" (feminine).

**mandub** [man-duub] adjective:

Recommended. A synonym for *mustahabb*.

**mansūkh** [man-sookh]:

See *naskh*.

**manfa'a** [man-fa-gha] s. noun:

Usufruct. Also, a proceed from a *waqf*. The plural, "proceeds," is "*manāfi'*"

**marāḍ al-mawāt** (*marad al-mawāt*, *marad al-mawt*) [ma-rad al ma-wat] noun phrase:

Terminal illness, which is one factor that disqualifies a party from having legal capacity to enter into a contract.

**marja 'at-taqlid** [mar-ja agt tack-leed] s. noun:

Literally, reference point for emulation. Source of emulation, namely, a *mujtahid* the rulings (*fatawā*) of which others follow.

**māshā'Allāh** (*māshā'Allah*, *masha'Allah*, *mashallah*) [maa-shaa-al-lah] noun phrase:

Literally, "whatever Allāh wills." Also translated as "Allāh willed it" or "Allāh has willed it." The term is used when a good deed or special achievement occurs, often coupled with an element of surprise. For example, it is used in connection with an excellent performance in an academic or athletic endeavor, such as an examination or a marathon, and in connection with a wedding or the birth of a child. The term is one of respect and reflects a fundamental tenet of Islam, namely, that Allāh is the all-powerful Master of the Universe, and all that happens is according to His Will. A similar English expression would be "Congratulations," but it is more secular in nature, thus "God bless you" would be a closer analogy.

**mashrā'** [mash-roo] adjective:

Legally valid, recognized by law. "*Mashrā'*" is the general term for legal validity, and indeed the most generic concept for validity in the *Shari'a*.

**masjid** [mas-jid] s. noun:

Literally, "mosque." The plural, "mosques," is "*masajid*."

**maṣlahah** (*maslahah*) [mass-la-hah] s. noun:

Public interest, or more generally the common good.

**ma'sām** (*ma'sum*) [magh-ssoom] s. noun or adjective:

Literally, "inviolable," referring to protection under Islamic Criminal Law (*i.e.*, a person who enjoys that protection). "*Ma'sām*" also is translated as "immune." *Shī'a* use the term to connote "impeccable" and "infallible," which are attributes of *Shī'ite Imāms*. (The opposite — a person unprotected by that Law — is "*ḥadr*.")

**mawali** [ma-wa-lee] pl. noun:

Term for non-Arab Muslims, used during *Abbasid* Caliphate.

**mawdu'a** [maw-duu-a] noun or adjective:

Fabricated, made up. The lowest of four levels of authenticity that a *hadith* can have, indeed, it is not even a *hadith* because it is not accepted as and authentic, reliable statement of the Prophet Muhammad. Rather, it is fabricated, perhaps for reasons of politics, religion, or self-interest.

**mawla** [maw-la] s. noun:

Protector. Also, "*mawla*" can mean a person of slave origin who lacks the protection of a tribe, or have the dual meaning of master or servant. Further, during the Umayyad Caliphate, the plural "*mawali*" referred to non-Arab converts to Islam who were adopted into Arab tribes.

**mawlanas** [maw-la-na] pl. noun:

Islamic jurists. A term used during the Moghul and British Empires on the Indian Subcontinent. The singular is "*mawlana*."

**mawzūn** (*mawzun*) [maw-zoon] s. noun:

A fungible thing that can be weighed, such as gold and silver. A synonym is "*wazni*."

**maysir** [may-seer] s. noun:

A game of hazard or chance that is forbidden as a kind of gambling (i.e., as involving *ghavar*) by the Qur'an, but for which the Qur'an does not specify a punishment.

**mazhab** [ma-zhab] s. noun:

Same as *madhhab*, but typically used in the Near East and on the Indian Subcontinent. See *madhhab*.

**mazlum** [maz-loom] noun or adjective:

Wronged, unjustly oppressed. In Persian, "*mazlum*" is a person unwilling to take action against another or others, even when he or she is oppressed, not because of fear or insecurity, but rather because of forbearance and munificence.

**Medina** (*Madina*) [Me-dee-nah] Proper noun:

Literally, "city," and normally referred to as the City of Prophet Muhammad. Located 3 ½ hours north of Mecca in the Hejaz, in the far west of the Kingdom of Saudi Arabia. Formerly known as Yathrib.

**Mejelle** (*Majalla*, *Majallah*, *Majalat Al-Akham Al-Adliyah*, *Majalat-i Ahkami Adliye*, *Mecelle* (Turkish)) [Mah-gel-eh] s. noun:

Ottoman Civil Code of 1877, which codifies part of the jurisprudence (*fiqh*) of the *Hanafi* School. The Code was prepared by a committee of *Hanafi* School scholars between 1869 and 1888, and published between 1870 and 1877. Though the committee never finished its work, the *Mejelle* was the law of the Ottoman Empire on all topics other than those covered by the Commercial Code. The *Mejelle* served as the Civil Code of the Ottoman Caliphate between 1877 and 1926.

**Meqaat** [Mee-kaat] s. noun:

Any one of six locations in the Kingdom of Saudi Arabia from which the '*Umrah* or '*Hajj* is started.

**millet** [mill-et] s. noun:

Loosely translated, "denomination." This Turkish word is derived from the Arabic word "*millah*," which literally meant "nation." "*Millet*" covers both religion and community, and sometimes is translated as a "confessional community." The *Millet* System, derived from the Ottoman Empire, is the basis for the Law of Personal Status in parts of the Middle East, notably, Israel and Palestine.

**milk** - 1st meaning [milk] s. noun:

Ownership.

**milk** - 2nd meaning [milk] s. noun:

The marital right, i.e., the right of a husband to have sexual intercourse with his wife.

**milk al-'āmmah** (*milk al-'amma*) [milk al-aaghm-ma] s. noun:

Public property, also referred to as *al-milkiyyah al-'āmmah*.

**milk khabith** (*milk khabith*) [milk kha-beeth] s. noun:

Bad ownership.

**minbar** [meen-bar] s. noun:

Pulpit, i.e., the raised platform and podium in a mosque from which an *imām* delivers a sermon (*khutba*).

**minha** [meen-ha] s. noun:

Inquisition, used (for example) in the *Abbasid* Caliphate between 833 and 848 A.D.

**mithli** (*mithli*) [mith-lee] s. noun:

Fungible (homogeneous), fungible object, such as bulk cargo.

**muadhin** [moo-a-dheen]:

See *muezzin*.

**muajjil** [moo-aj-jeel] s. noun:

The portion of a nuptial gift (*mahr*) that is paid immediately, i.e., at the time the marriage (*nikāh*) contract is entered into.

**muakkkhar** [moo-akh-khar] s. noun:

The portion of a nuptial gift (*mahr*) that is paid on a deferred basis, i.e., at some point after the marriage. In some cases, this portion is paid only if the husband divorces or pre-deceases his wife. In the latter instance, it is paid out of his estate.

**mu'āmalah** (*mu'amalah*) [moo-a-ma-lah] s. noun:

A sale and purchase transaction, but infrequently used as a synonym for a *sharikah al-mudārabah*.

**mubāh** (*mubah*) [muu-baah] noun or adjective:

Neutral, and therefore permissible. That is, the proposed action is permitted, but the position of Islamic Law on it is neutral. It is neither recommended (*mustahabb*) nor obligatory (*wajib*). The stance is indifferent. The term often is associated with the Scale of Five Religious and Legal Qualifications (*Al Ahkām Al Khamsa*).

**muqārib** [moo-dhaah-reeb, muu-dhaa-reeb] s. noun:

The working partner in a *sharikah al-muqārabah*. The plural, "working partners," is "muqāribeen."

**mu'dhin** [mo-od-heen] s. noun:

The Arabic term for *muezzin*.

**muezzin** (*muazzin, mu'azzin*) [moo-ez-zeen] s. noun:

Caller to prayer. The person at a mosque who issues the call to prayer, or *azaan*, five times a day. This person invariably is a man. A synonym is "muadhin."

**muftis** [moof-tees] noun or adjective:

Bankrupt.

**mufti** (*mufti*) [moof-tee] s. noun:

A specialist in Islamic Law who is accredited, by virtue of outstanding scholarly reputation and personal piety, governmental authority, or both, to give an authoritative legal opinion. The Chief *Mufti*, or Grand *Mufti*, in a country is known as the "Shaykh Al Islam." The plural is "mufteen" or "muftain," but in English typically is "muftis."

**Mughārasa** (*mugharasa, mugharasa*) [moo-ghar-a-sa] s. noun:

A contract for the purpose of planting seeds for agricultural crops, including trees.

**Muhammad (PBUH) - Prophet Muhammad (PBUH)** (Muhammad, Mohammed Mohamed) [Mu-hham-mad] proper noun:

The name of the Messenger, or Prophet, of the Islamic faith, respectfully followed by "Peace Be Upon Him" ("PBUH").

**muhajir** (*mohajir*) [moo-ha-jeer] s. noun:

One who emigrates, i.e., an emigrant. For instance, Muslims who left India in anticipation of, and following, the British Partition of India on 15 August 1947 and migrated to Pakistan were referred to as "muhajirs," and regrettably that term still is in use today as a pejorative one.

**muhaqqiq** (*muhaqqiq*) [moo-hak-keek] s. noun:

The proponent of or advocate for *taḥqiq*, that is, of verification or revival. The term is used to describe someone who sees an issue or thing as it is, without obfuscation, in effect, one who sees the matter clearly.

**muhṣan** - 1st meaning (*muḥsan*) [mooh-ssaan] s. noun:

A person who has concluded and consummated a valid marriage.

**muhṣan** - 2nd meaning (*muḥsan*) [mooh-ssaan] s. noun:

A person who has never committed unlawful sexual intercourse (*zinā*).

**muhtahid** [mooh-ta-heed] s. noun:

Well-qualified scholar or renewer of the Islamic faith. This title was earned (*inter alia*) by Muhammad Al Shāfi'i.

**muhtasib** (*muhtasib*) [moo-tah-seeb] s. noun:

The Inspector of the Market, whose basic responsibility is to promote good and virtuous behavior, and police against vice. The Office itself is the "*hisba*." More generally, the term "*muhtasib*" connotes a person who seeks to earn religious merit by showing zeal for the *Shar'ā*. During the *Umayyad* Caliphate, the equivalent terms "*amil al-souq*" "*sahib al-souq*" were used.

**mujaddid** [mooj-ad-deed]:

See *tajdid*.

**mujtahid** [moo-ja-heed] s. noun:

A warrior for the Islamic faith, a participant in a *jihād*. The plural, "warriors," is *mujahidin* (*mujahideen*).

**mujtahid** [mooj-ta-heed] s. noun:

Literally, "one who strives." An educated Muslim who is competent to interpret Islamic Law in practical contexts, possibly through the use of *ijtihād* (independent reasoning), and arrive at rulings that are binding, but only on himself. A *mujtahid* may or may not specialize in a particular field. Note that "*mujtahidān*" and "*fukahā*" (in the singular, "*mujtahid*" and "*faqih*") are not synonymous, because the latter class of persons have obtained formal training in the *Shar'ā*. The term "*mujtahidān*" is used in the context of the community of legal scholars that must approve of an outcome to have a consensus opinion, i.e., to forge *ijma'*. The plural is "*mujtahidān*," though in English the singular and plural commonly are used interchangeably.

**mujtahid muqayyad** [mooj-ta-heed moo-qa-yyad]:

See *fukahā*'.

**mujtahid mutlaq** [mooj-ta-heed moot-lak]:

See *fukahā*'.

**mukallaf** [moo-kal-laf] noun or adjective:

Fully responsible, that is, in possession of full legal capacity, for example, to provide a conduct of safe passage (*amān*).

**mukallid** (*mukallid, muqallid*) [moo-khal-leed] s. noun:

Follower, one who is not competent to interpret religion and, therefore, relies on authority. A legal scholar or lawyer who practices *taqlid*. The plural, "followers," is "*mukallideen*" or "*muqallideen*."

**mukhāṭara** [moo-khaa-tha-ra]:

See *bay' atān fi bayā*.

**mullah** [mool-lah, mul-lah] s. noun:

A term of respect for a religiously educated man, one who is educated in Islam and the *Shar'ā*. Particularly in Afghanistan, Iran, Turkey, and the Indian Subcontinent, "mullah" is used to denote any Islamic cleric or mosque leader. "*Mullah*" comes from the Arabic word "mawla," which means "vicar," "master," or "guardian." The plural is "*mullal*," though in English it is common to say "*mullahs*."

**muqāradah** (*muqaradah*) [moo-caar-a-dah] s. noun:

A loan transaction, but used as a synonym for a *sharikah al-muqārabah*.

**murābaha** (*murabaha, murabahah, morabaha*) [moor-ah-ba-ha] s. noun:

Sale and repurchase, which has the economic effect of being a non-interest bearing loan. Also characterized as cost-plus pricing. That is, a contract for resale plus a stated profit. In particular, a contract for the purchase and resale of an asset (such as a home) or commodity (such as a car), with a surcharge to represent an amount for profit, in lieu of interest. For example, a bank (the creditor) purchases a home or car for a customer (the debtor), and resells the item to the customer. The customer must repay the bank not only the purchase price (the amount for which the bank bought the home or car), but also an extra sum, the difference between the bank's cost and the resale price. That difference is the surcharge. Economically, a *murābaha* contract involves cost-plus pricing.<sup>4</sup> This characterization is accurate, because when a retail customer seeks to buy an asset (such as a home), or an expensive consumer durable item (such as a car), a bank buys the asset for the customer — that is the "cost." The bank then sells the asset to the customer. The customer repays the bank in installments, including a mark-up, or fee — that is the "plus pricing." For many, but not all, Islamic legal scholars, the surcharge is not considered unjust enrichment, or *ribā*. However, some sources consider it essentially equivalent to a fixed interest loan.<sup>5</sup> A non-interest bearing loan, i.e., *murābaha*, should not be confused with an interest-free loan, i.e., *qard al hassan*. An interest-free loan involves neither interest nor payment of a fee, via a higher resale price, by the borrower. For example, a lender loans U.S. \$100, and the borrower repays \$100. That is a pure loan, with no interest. That transaction is *qard al hassan*. A non-interest bearing loan, however, does obligate the borrower to pay a fee, in the form of a higher price. For instance, a bank buys a house for a customer at U.S. \$100,000, and the customer repays the bank in installments a total of \$125,000. The \$25,000 is not interest, but rather the cost-plus pricing, or a fee.

**murtadd** [mur-tadd, moore-tadd] s. noun:

An apostate, one who converts away from Islam.

<sup>4</sup> See MABUDUL ALAM CHOUDHURY & MOHAMMAD ZIAUL HOQUE, AN ADVANCED EXPOSITION OF ISLAMIC ECONOMICS AND FINANCE 26, 74 (Lewiston, New York: The Edwin Mellen Press, 2004).

<sup>5</sup> See, e.g., ANGELO M. VENARDOS, ISLAMIC BANKING & FINANCE IN SOUTH-EAST ASIA — ITS DEVELOPMENT & FUTURE 234 (Singapore: World Scientific Publishing Co. Pte. Ltd., 2005).

**murtadd ḥīri** (*murtadd ḥīri*) [mur-tadd fee-three, moore-tadd fee-tree] s. noun:

An apostate, specifically, a person born to Muslim parents who subsequently leaves the Islamic faith. The adjective "*ḥīri*" means "natural," "inborn," "innate," or "native."

**murtadd milli** [mur-tadd meel-lee, moore-tadd meel-lee] s. noun:

An apostate, specifically, a person who is not born to Muslim parents, who converts to Islam, but subsequently leaves the Islamic faith. The noun "*milla*" denotes a "religious community."

**musa bihi** [moo-sa bee-hee] adjective:

Bequeathed property, i.e., property gifted by a will.

**musa lahu** [moo-sa lah-hoo] s. noun:

A legatee, i.e., a person who is named in a will to receive property, one who receives a legacy or bequest. Essentially, a beneficiary of a will.

**muṣādarah** (*musadarah*) [moosse-aah-dah-rah] s. noun:

Expropriation.

**musāqāh** (*musākāt*) [moose-aah-kah] s. noun:

A contract for the irrigation of land, which may occur through an *ijāra* arrangement whereby an individual or firm is hired to provide water services.

**Muṣḥaf** [Moosh-haf] s. noun:

Literally, "collection of pages," or "manuscript bound between two boards." "*Muṣḥaf*" typically refers to the collected, written pages of the Qur'ān. A distinction sometimes is made among Muslim scholars between the "Qur'ān," which is the revelation to Muhammad (because "Al Qur'ān" means "The Recitation") and the "*Muṣḥaf*," which is the written expression of that revelation. During the *Rashidun* Caliphate of Abū Bakr, Zaid ibn Thābit, designated by this Caliph, produced the "*Muṣḥaf*," i.e., a collected bundle of *suhuf* containing all of the verses (*ayat*) of the Qur'ān, arranged in a particular order, and put in a single volume. This "*Muṣḥaf*" was the first, unofficial, non-canonical version of the Qur'ān. The plural is "*masahif*."

**mushārakah** (*musharakah, mushāraka*) [moo-shaa-ra-kah] s. noun:

Islamic project finance.

**mushrik** [moosh-reek] s. noun:

Loosely translated, "polytheist." Also translated as "idolator." The plural, polytheists, is "*mushrikeen*" or "*mushrikūn*."

**musī** (*musi*) [moo-see] s. noun:

Testator, i.e., a person who has made a will and upon his or her death also is known as the "decedent."

**Muslim** (*Moslem*) [Muz-lem] Proper or s. noun or adjective:

Devoted to God. An adherent to the Islamic faith.

**musrifin** [mus-ri-feen] pl. noun:

People who are wasteful, *i.e.*, who waste property.

**mustahabb** [moos-ta-haabb] noun or adjective:

Recommended. That is, a proposed action is recommended as favored or virtuous. *Mustahabb* is the opposite of *makrūh* (reprehensible). A synonym for “*mustahabb*” is “*mandub*.” Another synonym is “*fādilah*.” The term often is associated with the Scale of Five Religious and Legal Qualifications (*Al Ahkām Al Khamsa*).

**musta'min** [moos-ta-meen] s. noun:

Literally, “Protected One.” Technically, a *musta'min* is an enemy alien, but he or she has been given a temporary safe-conduct, or safe-passage, permit (*amān*). Typically, a *musta'min* is one who comes into an Islamic country as a messenger, merchant, visitor, or student wanting to learn more about Islam.

**mut'a** - 1st meaning (*mu'ta*) [moo-ta] s. noun:

An indemnity payable by a husband (*zawg*) to his wife (*zawja*) in cases of repudiation (*talāk*), namely, when the husband repudiates the marriage before it is consummated (but neither spouse has died). The indemnity is the remainder of the fair nuptial gift (*mahr al-mithl*).

**mut'a** - 2nd meaning (*mu'ta*, *mut'ah*) [moo-ta] s. noun:

Literally, “enjoyment or use.” The term is used to connote temporary marriage, which is permitted under Twelver *Shī'ism*, but forbidden (*ḥarām*) by all Four *Sunnite* Schools.

**mutashaddidin** [moo-ta-shad-dee-deen] pl. noun:

Strict, in the sense of excessively conservative-minded scholars, used in the context of scholars involved in the compilation of the *ḥadīth*.

**mutawali** (*mutawalli*) [moo-ta-wa-lee] s. noun:

Person appointed to administer a *waqf*, the first one of whom may be the founder of the *waqf*. A *mutawali* is akin to the trustee of a trust. A woman or non-Muslim can serve as a *mutawali*, and the *mutawali* may be compensated for his or her services.

**mutawā'in** (*mutawā'in*) [moo-ta-ween] pl. noun:

Religious police. Employed in some Muslim countries, such as Saudi Arabia and Iran, the job of the *mutawā'in* is to enforce Islamic moral precepts, including dress codes for women, and rules about inter-mingling among women and men (*ikhtilāt*). In Saudi Arabia, the *mutawā'in* officially are known as the Committee for the Promotion of Virtue and Prevention of Vice, and many of them operate as plain-clothes agents.

**mutawatir** [moo-ta-wateer] s. noun or adjective:

The highest of four levels of authenticity that a *ḥadīth* can have, *i.e.*, the *ḥadīth* has been highly corroborated. A *ḥadīth* that is “*mutawatir*” is reliable (*ṣaḥīh*).

**muwakkil** [moo-wak-keel] s. noun:

General term for “principal,” *i.e.*, the principal in contrast to the agent (*wakīl*).

**muwalat** [moo-wa-lat] s. noun or adjective:

Mutual or alliance.

**muzāra'a** (*muzāra'ah*, *muzara'a*) [moo-zaa-ra-hah] s. noun:

A type of *ijāra* contract that involves the lease of agricultural land. In effect, sharecropping.

**naar** [nar] s. noun:

Hell, *i.e.*, the general term for Hell. There are various regions of Hell, all encompassed by the generic term “*naar*,” but “*jahannam*” is the worst of them.

**nafaqa** (*nafaqah*, *nafaqah*, *nafakah*) [na-fa-kha] s. noun:

Maintenance, particularly in reference to the conditional obligation in Islamic Family Law that a husband owes to his wife or wives.

**nahb** [na-hb] s. noun:

Open theft, *i.e.*, stealing without the element of stealth. This act is not considered *sarika* (the *ḥaqq Allāh* crime of theft, triggering a *hadd* punishment). It is a *ḥaqq ādami* offense, thus it does not trigger a *hadd* punishment, but rather is actionable as a civil wrong, or tort (*jīnāyāt*).

**nahi** [na-hee] pl. noun:

Religious rulings of the Prophet Muhammad, as distinct from “*quadhā'*,” or adjudicatory rulings, set forth in the *ḥadīth*. One prominent *Usuli Shī'ite* scholar, Muhammad Baqir al-Sadr (1935-1980) relies on this distinction to argue that *quadhā'* may address a specific temporal concern before or during the life of the Prophet, and thus may be set aside, whereas the *nahi* cannot be disregarded.

**nā'ib** (*nā'ib*, *nā'ib al-'amm*):

See *safirs*.

**nakba** [nack-ba] s. noun:

Catastrophe. The word is used (*inter alia*) by Arabs to encapsulate the events of 1948, specifically, the mass exodus of Palestinians, numbering between 700,000 and 800,000. They fled their homes during the Arab-Israeli war, or were expelled by Israeli troops. The Arab minority in Israel commemorates the *Nakba* annually, on May 15, with demonstrations and marches to Palestinian villages inside Israel that were destroyed. In May 2009, draft legislation — the *Nakba* Day Bill — was introduced in the Knesset (Israeli parliament) by the right-wing Yisrael Beiteinu Party, which formed the second largest block in the governing coalition. The bill would make the celebration by any Israeli citizen a criminal offense punishable by 3 years imprisonment. Advocates of the bill defended it in the name of Israeli unity, and the legal fact Israeli Arabs are Israeli citizens. Critics charged it was a violation

of human rights, namely, freedom of speech.<sup>6</sup>

**naskh** [naskh] s. noun:

Repeal, abrogation. There is a doctrine of repeal in the *Sharī'a*, whereby one passage of the Qur'ān repeals another with which it is inconsistent, and likewise one practice of the Prophet Muhammad (*Sunnah*) repeals another one of his practices. Some Muslim scholars argue the doctrine of *naskh* is in the Qur'ān, specifically *surah* 2, *ayah* 106. But, *naskh* is not part of the Classical Theory of the *Sharī'a*. The Arabic term for a repealing passage is "*nāsikh*." The repealed passage is the "*mansūkh*." Both terms are nouns (singular). *Naskh* may occur through omission or Divinely controlled forgetting, "supersession" (*naskh al-hukm dāna al-tilāwa*), or erasure of the text of a religious rule, but the rule itself remaining valid (*naskh al-tilāwa dāna al-hukm*).

**nasi'a** (*nasi'a*, *nasi'ah*) [nas-ee-a] s. noun or adjective:

Deferral, delay. A "*nasi'a*" contract is one for immediate delivery of goods, but delayed payment of the purchase price.

**nāsikh** [naa-seek]:

See **naskh**.

**naṣṣ** (*nass*) [nashh] s. noun:

Designation, specifically, designation by Divine decree. A *Shī'ite* doctrine that each *Imām* is chosen by such a decree. This doctrine was developed fully by the 6th *Shī'ite Imām*, Ja'far Al Ṣādiq.

**nikāḥ** (*nikah*) [nee-kahh] s. noun:

Literally, "uniting," and thus used to mean "marriage."

**niqāb** (*niqab*) [nee-kaab] s. noun:

A general synonym for "*burkha*," thus, a full-face veil. However, a technical distinction exists between the two: a "*burkha*" covers the entire face, with no exception, as well as the body. A "*niqāb*" leaves the eyes uncovered, via a narrow slit, and is worn with an accompanying headscarf. A separate veil, covering the eyes, may or may not be worn with the "*niqāb*."

**nisāb** [nee-saab] s. noun:

The minimal or quorum amount above which every able Muslim is obligated to pay the *zakāt* tax. In effect, the *nisāb* is a *de minimis* threshold, below which a Muslim is not liable for *zakāt*.

**niyya** [nee-yah] s. noun:

Intent, intention.

**Nizārīs** or **Nizārītes** (*Nizaris* or *Nizarites*) [Nee-za-rees] pl. noun:

<sup>6</sup> See Tobias Buck, *Draft Bill by Israel to Ban Nikba is Attacked*, FINANCIAL TIMES, 26 May 2009, at 8.

The dominant branch of Sevener (*Ismā'īlī*) *Shī'ism*, known as "*Khojas*" in India, and known early in their existence as "*Tulimiyah*" (Assassins).

**nushāz** (*nushuz*) [noo-shuuz] noun or adjective:

Disobedience, or resistance, depending on the translation or interpretation. The term appears in *surah* 4, *ayah* 34 and 128, of the Qur'ān. Through the ages, the translations (all by men) of the Qur'ān interpret the term to mean "disobedience" in the context of *surah* 4, *ayah* 34, which leads to authorization for a husband to beat his wife. However, the translation by Dr. Laleh Bakhtiar — *The Sublime Quran* (6th ed., 2009) — interprets the word consistently in both passages to mean "resistance." Dr. Bakhtiar argues "disobedience" is a different word in Arabic (derived from "*apā'a*").

**nutfa** [noot-fa] s. noun:

A reproductive cell, scientifically known as a "gamete," which may be a male sperm or female ovum (egg). Through sexual intercourse, the mature reproductive cell of one sex unites with another mature cell of the opposite sex to form a *nutfa amshaj*, or zygote. Literally, "*nutfa*" refers to a drop or few drops of water, but the term is used in the Qur'ān to connote a gamete. (See *surah* 53, *ayah* 45-46, *surah* 80, *ayah* 17-19.)

**nutfa amshaj** [noot-fa am-shaj] s. noun:

A mixed reproductive cell, scientifically known as a "zygote." "*Amshaj*" is an adjective meaning "mixed." The term is used in the Qur'ān. (See *surah* 82, *ayah* 8.)

**Pancasila** [pan-ka-see-la] s. noun:

A Sanskrit word referring to the Indonesian secular political philosophy of Five Principles, advocated by President Sukarno (1901-1970). "*Pancasila*" consists of two Sanskrit words: "*panca*," meaning five, and "*śīla*," meaning principles. The Five Principles are:

- (1) Belief in the one and only God;
- (2) Just and civilized humanity;
- (3) The unity of Indonesia;
- (4) Democracy; and
- (5) Social justice for the whole of the people of Indonesia.

**pandits** [pan-dits] pl. noun:

A Hindi word meaning "Hindu jurists," that is, scholars and teachers, typically ones educated in Sanskrit and Hindu Law. In its early use, a "*pandit*" typically was of the Brahmin caste who had memorized large portions of the Hindu sacred scriptures, the *Vedas*, including the proper melody and rhythm to chant them. The singular is "*pandit*." The derivative English word is "pundits."

**PBUH**, noun phrase:

Peace Be Upon Him, Peace Be Unto Him. A term of respect used following the verbal or written mention of the name of the Prophet Muhammad. Technically,

PBUH should follow each repetition of the name. Sometimes, "PBUH" appears as "saaw" or "saw," which is based on the Arabic words for "Peace Be Upon Him."

**PBUT**, noun phrase:

Peace Be Upon Them, Peace Be Unto Them. A term of respect used following the verbal or written mention of the name of the Prophet Muhammad along with Jesus Christ and other significant religious figures.

**pir** [peer] s. noun:

Spiritual Director.

**qāḍī** (*qadi*, *kāḍī*, *kadi*, *cadi*) [kah-dee] s. noun:

Islamic judge. The term can be used narrowly to refer to a judge in a court in which the *Shari'a* is applied, or to any judge regardless of the applicable law. The institution of the *qāḍī* entered into the *Shari'a* in the late *Umayyad* Caliphate, along with the office of the clerk of the court (*katib*). The plural, Islamic judges, is "*quḍat*," though in English it is common to say "*qāḍis*."

**Qāḍī Al-Qudhat** (*Qadi Al-Qudhat*, *Qāḍī l-quḍat*) [kah-dee al koo-dhat] s. noun:

Chief *Qāḍī*, that is, Chief Justice. *Imām* Abū Yūsuf was the first *Qāḍī* Al-Qudhat in the Islamic world. Based in Baghdad, he served under the *Abbasid* Caliph Harūn Al Rashid, who reigned from 786-809 A.D. Yūsuf died in 798. Not only was he a member of the *Hanafi* School, but also he was a renowned student of *Imām* Abū Hanīfa, founder of that School, and helped spread the influence of the School.

**Qāhira** or **Al Qāhira** (*Al Qahira*) [Qaa-hee-ra] s. noun:

Cairo, established in 969 A.D. as the capital of the *Fatimid* Caliphate.

**qard al hassan** (*qard-e-hasna*) [card al has-san] s. noun:

An interest free loan. An interest-free loan involves neither interest nor payment of a fee, via a higher resale price, by the borrower. In essence, a charitable loan with no interest and a low expectation of repayment of principal. For instance, a lender loans U.S. \$100, and the borrower repays \$100. That is a pure loan, with no interest. *Qard al hassan* should not be confused with a non-interest bearing loan, i.e., *murābaḥa*. A non-interest bearing loan obligates the borrower to pay a fee, in the form of a higher price. For instance, a bank buys a house for a customer at U.S. \$100,000, and the customer repays the bank in installments a total of \$125,000. The \$25,000 is not interest, but rather the cost-plus pricing, or a fee.

**qibla** (*qiblah*, *kiblah*) [kib-lah] s. noun:

The proper direction a Muslim should face during prayer. Additionally, the *qibla* is the proper direction a Muslim should be buried (specifically, with his or her face in that direction) after death, and the direction in which the head of an animal being slaughtered to make *halal* meat should point. This direction is indicated in a mosque, as well as in certain buildings (such as hotels), by a niche or marking in the wall or on the ceiling. Originally, this direction pointed to Jerusalem. But, in year 2 A.H., the Prophet received a revelation, recorded in the Qur'an in *surah* 2, *ayat* 142-148, to change the direction to Mecca, which was the direction the Prophet

preferred.

**Qiran** [Kee-ran] s. noun:

One of three types of *Hajj* pilgrimages, in which a pilgrim performs '*Umrah*, followed by the *Hajj*, but without changing from customary religious garb (*iḥrām*) to normal clothes between the '*Umrah* and *Hajj*. Consequently, this type of pilgrimage is regarded as the most difficult of the three.

**Qirā'āt** [Kee-raa-aat] pl. noun:

Methods of reading or recitation, or more narrowly, methods of pronunciation. The term is used in connection with the seven different ways of reciting the Qur'an that emerged after the death of the Prophet Muhammad, owing two different Arabic dialects used for recitation. The 3rd *Rashidun* Caliph, 'Uthmān, ended the uncertainty by preparing a canonical text of the Qur'an. "*Qirā'āt*" is closely related to the term "*ahraf*," which refers to the seven different ways in which the Qur'an is said to have been revealed, that is, the seven Arabic dialects in which it was recited. They were standardized into a single dialect, *Qurayshi*, during the Caliphate of 'Uthman. The difference is that "*Qirā'āt*" concerns pronunciation. The singular is "*harf*."

**qisās** (*qisas*, *qisās*, *kisas*) [keess-ass] s. noun:

Legal retribution, i.e., retribution that is authorized by law, as in a case of premeditated murder.

**qital**:

See *jihād*.

**qiwamah** [kee-wa-mah] s. noun:

Protector, maintainer. More generally, responsibility for being the overall head or leader of a household. This superior position traditionally is assigned to a man (e.g., the husband and father).

**qiyamah** (*qiyamah*) [kee-ya-mah] s. noun:

Doomsday, that is, the end of time, also called the "Day of Judgment," "Day of Judgment," or "Last Gathering," when God (Allāh) judges all of humanity. A number of "Major" and "Minor" signs are to occur that mark the coming of this Day. The signs are set out (explicitly and implicitly) in the Qur'an and in *ḥadīths*, and the subject of much study by Muslim religious scholars (*ulema*). The 75th *surah* of the Qur'an bears the name "*Al Qiyamah*." The analog in Catholic Christianity to "*Qiyamah*" appears to be the Final Judgment.

**qiyās** (*qiyas*, *qiyāas*, *qiyās*, *kiyas*) [key-aahs] s. noun:

Analogical reasoning, analogical deduction, deduction by analogy, analogy.

**quadhā'** [qu-ad-ha] pl. noun:

Adjudicatory rulings of the Prophet Muhammad, as distinct from "*nahī*," or religious rulings, set forth in the *ḥadīth*. One prominent *Usuli Shī'ite* scholar, Muhammad Baqir al-Sadr (1935-1980) relies on this distinction to argue that

quadha' may address a specific temporal concern before or during the life of the Prophet, and thus may be set aside, whereas the *nahi* cannot be disregarded.

**Qur'ān** or **Holy Qur'ān** (Qur'an, Qur'aan, Quran, Quraan, Koran, Kur-ahn) [Core-ahn] s. noun:

Literally, "Recitation," or "Al Qur'ān," meaning "The Recitation." The Holy book of the Islamic faith. The perfect, immutable, and literal Word of God (Allāh) as revealed to the Prophet Muhammad through the Archangel Gabriel between 610 and 632 A.D.

**Quraysh** (*Quraysh*, *Kuraysh*, *Kuraysh*, *Kuraysh*, *Koreish*) [Qoor-aash, Khooor-aash] Proper noun:

The tribe of the Prophet Muhammad, and which was in control of Mecca during his lifetime.

**rabb al-māl** [rub-al-maal] s. noun:

The sleeping partner in a *sharikah al-muqārabah*.

**radā'** (*rada'*, *radaa'*) [ra-dhaa] s. noun:

Fosterage, as in foster children. The term arises in Islamic Family Law, and connotes an impediment to marriage in that persons related to each through fosterage (*radā'*) cannot marry one another.

**radd** [radd] s. noun or verb:

Literally, "return." A procedure used in Inheritance Law when the sum of the shares (*fards*) of Qur'ānic heirs is less than unity (1). Assuming there are no Agnatic heirs, the remainder returns to the Qur'ānic heirs, in proportion to their shares. The result is to bring the sum to one. Past tense of the verb "*yarudd*," which means "to return."

**Raḍīa Allāhu 'Anhu** [Ra-dhee-a Allaa-hu Agn-huu] noun phrase:

May Allāh Be Pleased With Him, or Blessings of God Be on Him. This appellation is used as a sign of respect, but among *Sunni* Muslims is restricted to the Four Rightly Guided Caliphs (*Rashidun*) and male Companions of the Prophet (*Ṣaḥābah*). Some *Shi'i* Muslims also apply the phrase to certain Imāms. Among some Muslims, the equivalent expression "*Rehmat Allāh*" is used. Typically abbreviated as "RA" and put in parentheses following the name of the person.

**Raḍīa Allāhu 'Anhā** [Ra-dhee-a Allaa-hu Agn-haa] noun phrase:

May Allāh Be Pleased With Her, or Blessings of God Be Upon Her. This appellation is used as a sign of respect, but among *Sunni* Muslims is restricted to the female Companions of the Prophet (*Ṣaḥābah*). Note there are no female *Shi'i* Imāms to whom to apply the phrase. Typically abbreviated as "RA" and put in parentheses following the name of the person.

**rahman** [rah-man] s. noun:

Mercy. Mercy is one of the most commonly expressed attributes of God (Allāh), including throughout the Qur'ān.

**rahn** [rahn] s. noun:

Pledge. An arrangement for providing property as security for a debt.

**raj'i** (*raj'i*) [raj-ee] s. noun:

Revocable. The term is used in Family Law in respect of *talāk* (repudiation of a wife by a husband). *Talāk* may be revocable, which results in a suspension of the marriage contract, or *bā'in* (definite), which results in dissolution of the marriage.

**rakaba** [ra-ka-ba]:

See *'ayn*.

**rak'ah** [rak-aghah] s. noun:

The physical movements that are part of Islamic prayer. A single, complete *rak'ah* involves standing, bowing, prostrating (i.e., on the floor, on one's knees, touching one's forehead to the floor), and standing up again. Each *rak'ah* also involves reading a passage from the Qur'ān while in the standing position. The plural is "*rak'at*."

**Ramaḍān** (*Ramādān*, *Ramadhan*, *Ramadaan*, *Ramdan*, *Ramazan*, *Ramzan*) [ra-ma-dhaan] s. noun:

A month in the Islamic Lunar Calendar during which, as the Fourth of the Five Pillars of Islam, Muslims fast (*saum*) from dawn to dusk. It was during this month that the first verses of the Qur'ān were revealed to the Prophet Muhammad.

**Rashidun** [Rash-ee-dune] pl. noun:

Literally, "Rightly Guided." The term refers to the Four Rightly Guided Caliphs, who reigned following the death of the Prophet Muhammad in 632 A.D. until the establishment of the Umayyad Caliphate in 660/661 A.D.

**rasāl** (*rasul*, *rasuul*) [ra-sool, ra-suul] s. noun:

Messenger. To be technically precise, Muhammad is referred to as the "Messenger of God." The term also is used in everyday commercial parlance, for instance, to indicate a messenger delivering a contract offer from an offeror.

**rawi** [ra-wee] s. noun:

A person engaged in the transmission of a *ḥadīth*, i.e., a transmitter. The plural, "transmitters," is "*ruwat*."

**ra'y** [ra-ee] s. noun:

Literally, "opinion," also translated as "sound opinion." The term, which is generic, is used to refer to individual reasoning, that is, reasoning based on personal preference. Thus, it sometimes is translated as "subjective opinion."

**re-takaful** [re-ta-ka-full] s. noun:

Technically not an Arabic word, but rather Anglicized with the prefix "re-" to signify reinsurance of Islamic insurance providers.

**ribā** (*ribā*) [ree-baa] s. noun:

Interest and/or usury are the typical definitions, but more accurately "*ribā*" means "increase" or "excess." That is, an excess paid or received on principal, or an increase in price or return, especially an excess or increase that is related to time. As a general rule, *ribā* is forbidden (*ḥarām*). The word "*ribā*" is derived from the Arabic verb "*raba*," which (like "*zaka*") means "to grow."

***ribā al-faḍl*** (*ribā al-faḍl*) [ree-baa ul Fad-l] s. noun:

An excess or increase arising from a spot market trade, in specified commodities, that is, in a hand-to-hand or barter exchange, of those commodities. *Ribā al-faḍl* is forbidden (*ḥarām*).

***ribā al-jahiliyya*** [ree-baa ul ja-heel-ee-yya] s. noun:

Defer and increase. That is, in the context of asset financing, a debtor-buyer-lessee pays an increase in the amount owed to a creditor-seller-lessor because of an additional delay or deferral in making timely payment of the purchase price or lease amount. *Ribā al-jahiliyya* is forbidden (*ḥarām*). A *ribā al-jahiliyya* transaction is the mirror image of a transaction involving *da wa ta'ajjal*.

***ribā al-nasi'a*** (*ribā al-nasi'a*, *ribā al-nasa'*, *ribā al-nasiyah*) [ree-baa ul na-see-a] s. noun:

An excess or increase arising from a credit transaction, that is, a money-to-money exchange, where there is a delay or deferral in the exchange and, therefore, there is a charge associated with the delay or deferral. *Ribā al-nasi'a* is forbidden (*ḥarām*).

***riḍā*** (*rida*) [ree-dhaa] s. noun:

Consent.

***riddah*** (*rida*) [reed-dah] s. noun:

Apostasy, specifically, conversion from Islam to a state of unbelief (*kufr*), possibly atheism or agnosticism. *Riddah* is to be distinguished from "*irtidād*," which is conversion away from Islam and to another religion.

***riwayah*** [ree-wa-yah] s. noun:

Transmission of a *ḥadīth* from one person to another. The transmitters are known as "*ruwat*." "*Riwayah*" also can mean "novel" (as in a book of fiction).

***rujū'*** (*ruju*) [ru-jew, ru-joo] s. noun:

Withdrawal, revocation, or retraction. The term may be applied, for example, with respect to an offer or acceptance of a contract, in relation to a confession for a criminal offense, or testimony given as evidence in a case.

***rukū'*** [ruu-kn] s. noun:

Obligation or duty. A synonym for "*waḥīb*."

***Saww*** (*Saw*):

See **PBUH**.

***sadaqa*** (*sadaka*, *sadaqah*) [ssa-da-kha] s. noun:

Charitable gift, i.e., purely voluntary charitable giving, as distinct from the obligatory religious almsgiving of *zakāt*.

***sadd al-dhara'i'*** (*sadd ul d-a-ragh-ee*) noun phrase:

Literally, closing (or blocking) off the means that can lead to evil.

***safahā'*** (*safaha*) [sa-fa-haa] pl. noun:

Weak-minded persons who are prone to profligacy and cannot be entrusted with money or other property. The singular, "weak minded person," is "*safih*."

***safirs*** [sa-feers] pl. noun:

Emissaries. The term is used by Twelver *Shī'ites* to connote the four persons with whom the 12th *Imām* communicated during the Lesser Occultation (*ghayba*), between 874-940 A.D.:

- 'Uthmān al-'Amrī
- Abū Ja'far Muhammad ibn 'Uthmān
- Abū Al Qasim Husayn ibn Ruh an-Nawbakhti
- Abū Al Husayn 'Alī ibn Muhammad as-Samarri

The *safirs* also are known as "*babs*" (doors, i.e., doors to Al Mādhi), or "*nā'ibs*" (deputies, i.e., his deputies). The term "*nā'ib al-'amm*" means "general representative."

***Ṣaḥābah*** (*Ṣaḥāba*, *Sahaba*) [Ssa-hhaa-bah] pl. noun:

Companions of the Prophet Muhammad (pl.). The singular (masculine) form is *ṣaḥābiy*, and the singular feminine form is *ṣaḥābiyah*. The *Ṣaḥābah* are the persons who, during the lifetime of Muhammad, were most closely associated with him. There were approximately 50-60 such persons, though of course a far larger number of people came into contact with him. The most renowned of the Companions are identified in the "List of Companions." The key reason for the importance of identifying the Companions concerns the compilation of the *ḥadīth*. After Muhammad died in 632 A.D., scholars accepted the veracity and accuracy of the testimony of the Companions concerning the *ḥadīth*. In addition, the later scholars trusted their testimony as to the revelation of the Qur'ān (e.g., when the revelations occurred), the *Sunnah* of the First Islamic Community, and important events in early Islamic history. Overall, from the evidence provided by the *Ṣaḥābah*, and through reliable chains of transmission or narrators (*isnad*), scholars were able to establish and elaborate many points concerning the *Sharī'a*.

***sahib al-souq*** (*sahib al-suk*) [sa-heeb ul sookh]:

See **muḥtasib**.

***ṣaḥīḥ*** (*sahih*, *saḥiḥ*) [ssa-hheeh] noun or adjective:

Literally, "valid" or "reliable." In Islamic Law, "*ṣaḥīḥ*" refers to validity from a legal standpoint, i.e., legally effective, in the sense of operative and establishing binding legal rights and obligations. Additionally, "*ṣaḥīḥ*" is used to distinguish between a valid *ḥadīth* and a weak *ḥadīth*, based on scholarly examination of the accuracy of

the chain of transmissions (*isnād*). To pronounce a *ḥadīth* “*ṣaḥīḥ*” is to say it is “reliable,” which implies it is “*mutawatir*.”

***saḥl al Imām:***

See *khums*.

***ṣakk* (*sakk*)** [ssack] s. noun:

Literally, a written document. In Islamic finance, an Islamic bond.

***Salaf* (*Salafī*)** [Sa-laf] s. noun:

Predecessor, forefather. The term is used in the context of an Islamic movement that emphasizes the pious predecessors, the *Salaf* of the Patristic Period of early Islam, as exemplary models, who are collectively referred to as the “*Salaf as-Saaleh*,” or Pious Predecessors. These Pious Predecessors are the the first three Muslim generations:

- (1) The *Ṣaḥābah* (“Companions”).
- (2) The *Ṭabī’un* (“Followers”).
- (3) The *Ṭabī’ al Ṭabī’in* (“Those after the Followers”).

Modern-day *Salafis* view the way in which these 3 generations read the Qur’ān and understood Islam and the *Shari’a* as a model for contemporary times. Commonly, *Salafism* is associated with orthodox, if not puritanical, *Sunnite* beliefs and puntitious personal piety and devotional practices. Typically in English, “*Salafis*” is the plural. “*Salafī*” is the adjectival form as used in English.

***salām*** [sa-lam] s. noun:

Prepayment contract, i.e., an agreement in which payment occurs first, followed later by delivery.

***salah* (*ṣalah*)** [sa-lah] s. noun:

Ritual prayer. “*Salah*” is commonly used among Arabic speakers, whereas “*salat*” is typically used in the Near East and on the Indian Subcontinent. The plural, “ritual prayers,” is “*ṣalawat*.”

***Salat Al Jum’a* (*Salat Al Jumu’ah*)** [sa-lat ul joo-ma] s. noun:

Friday prayers.

***sariḥa* (*sarika*, *sariqa*)** [sa-ree-kha] s. noun:

Theft, which is a *ḥaqq Allāh* offense and triggers a *ḥadd* punishment.

***saum* (*sawm*)** [saom, sawn] s. noun:

Fasting. *Saum* during the month of *Ramaḍān* is the Fourth of the Five Pillars of Islam.

**Sevener *Shī’ites*:**

See *Shī’i*, and *Ismā’īdī Shī’ites*.

***Shabab Al Moumineen*** [Sha-bab Ul Mou-min-ee] noun phrase:

Believing Youth, or Youthful Believers. A Fiver *Shī’ite* revolt movement against the government of Yemen, based in northwest Yemen and Southern Saudi Arabia. Also known as “Houthis,” the name of their former commander, Hussein Badreddin Al Houthi, who Yemeni forces reportedly killed in September 2004.

***Shāfi’i* (*Shafi’i*)** [Sha-fee-ee] Proper noun or adjective:

One of the Four Schools, and the third of the Four in chronological terms, founded by *Imām* Muhammad ibn Idris ibn Al Abbas ibn Uthman ibn Al Shāfi’i (768-820 A.D.), sometimes written as *Imām* “Shāfi.”

***Shahāda* (*Ṣahāda*, *Shahada*, *Ṣhadet*)** [Sha-haa-da] s. noun:

Witness, specifically, know and believe without doubt or suspicion, as if witnessed. “*Shahāda*” comes from the verb (infinitive) “*yashadu*,” which means “to witness,” and “*shahīda*” (sometimes transliterated as “*ṣhida*”), which means (past tense) “he witnessed.” A specific prayer recited by Muslims, and recited for conversion to Islam, which bears witness to the Oneness of Allāh and His Messenger, the Prophet Muhammad. The prayer is: There is no God but God, and Muhammad is his Prophet. Recitation of the *Shahāda* is the First of the Five Pillars of Islam, and the most important of the Pillars.

***shahīd* (*shahid*)** [Sha-heed] s. noun:

Martyr.

***shahīda*** [sha-hee-da] verb:

To witness, witnessing.

***Shari’a* (*Sharia*, *Sharia*, *Shari’a*, *Shar’iah*, *Shariah*, *Seriat* (Turkish), *Şeriat* (Turkish), *Şeriat* (Turkish))** [Sha-ree-agh] s. noun:

Literally, “path,” “way,” or “methodology.” A synonym for “Islamic Law.” Interestingly, “*Shari’a*” is used only once in the Qur’ān, in *surah* 45, *ayah* 18. Over time, “*Shari’a*” became a generic term to refer to the legal rules mentioned in the Qur’ān, and the jurisprudence concerning those rules.

***sharikah* (*sharikat*, *sharikāt*)** [shah-ree-kah] s. noun:

General term for a partnership or business association. The term also may be translated as “joint ownership” and “joint venture.” The partnership or business association could be based on:

- (1) An agreement of the parties (*sharikah al-‘aqd*).
- (2) An event, such as inheritance (*sharikah al-milk*), or
- (3) Common right (*sharikah al-ibāḥah*).

The plural, “partnerships,” is “*sharikat*.”

***sharikah al-‘abdān*** [shah-ree-kah al ab-dahn] s. noun:

A contract-based partnership that is a skill-based partnership.

***sharikah al-amwal*** [shah-ree-kah al am-wal] s. noun:

A contract-based partnership based on money.

**sharikah al-'aqd** [shah-ree-kah al ah-kid] s. noun:

Contract-based partnership, i.e., any partnership that is established on the basis of a contract. Depending on the dominant element of the capital of the *sharikah al-'aqd*, the partnership could take the form of:

- (1) skill-based partnership (*sharikah al-'abdān*),
- (2) money-based partnership (*sharikah al-'amwāl*),
- (3) credit-based partnership (*sharikah al-'ujūh*), or
- (4) partnership based on a mixture of skills and money (*sharikah al-'muḍārabah*).

Depending on the scope of the liability of the partners, the partnership could take the form of:

- (1) limited liability partnership (*sharikah al-'inān* or *sharikah al-'musāhamah*), or
- (2) unlimited liability partnership (*sharikah al-'mufāwadah* or *sharikah al-'taḍamun*).

**sharikah al-ibāḥah** [shah-ree-kah al ee-baa-ha] s. noun:

Common rights of acquisition (a kind of partnership not based on contract).

**sharikah al-'inān** [shah-ree-kah al ee-nan] s. noun:

A contract-based partnership that is akin to a limited liability company (LLC).

**sharikah al-milk** [shah-ree-kah al milk] s. noun:

Co-ownership, that is, a kind of partnership not based on contract, but rather which arises from the occurrence of an event, such as an inheritance.

**sharikah al-muḍārabah** [shah-ree-kah al moo-dhaa-ra-bah] s. noun:

A contract-based partnership that is a sleeping partnership, occasionally referred to as "*mu'āmalah*." The essence of the *muḍārabah* is profit sharing, that is, the sharing of profits between the sleeping partner (*rabb al-māl*) and working partner(s) (*muḍārib*). The profits (if any) are generated by a project the sleeping partner funds, and the working partners engage in through work.

**sharikah al-mohass'ah** [shah-ree-kah al mo-hass-ah] s. noun:

A contract-based partnership with minimal requirements and allows for informality.

**sharikah al-mufāwadah** [shah-ree-kah al moo-fah-wah-dah] s. noun:

A contract-based partnership that is an unlimited mercantile partnership. A non-Muslim cannot participate as a partner in a *mufāwadah*.

**sharikah al-musāhamah** [shah-ree-kah al moo-saa-ha-mah] s. noun:

A type of contract-based limited liability partnership.

**sharikah al-taḍamun** (*sharikah al-tathamon*) [shah-ree-kah al ta-dha-mon] s. noun:

A type of contract-based unlimited liability partnership that involves trading.

**sharikah al-tawsi'ah** [shah-ree-kah al taw-see-ah] s. noun:

A type of contract-based partnership that involves two tiers of interest and liability among the partners.

**sharikah al-uwjūh** [shah-ree-kah al woo-jew] s. noun:

A contract-based partnership that is a credit cooperative.

**shart** (*shart*) [ssharth] s. noun:

Condition, prerequisite, stipulation. The plural is "*shāraʿ*" (conditions).

**Shayk Al Islam** [Shake ul Is-lam]:

See *mufti*.

**Shiat-u-'Alī** [Shee-at-oo-Aglee] s. noun:

Party of 'Alī, i.e., *Shīʿite*.

**shibh** [shee-b] noun or adjective:

Quasi.

**shibh al-'amd** [shee-b al agh-med] noun phrase or adjective:

Quasi-deliberate intent.

**Shī'a** or **Shī'ite** or **Shī'ī** (*Shī'i*, *Shii*, *Shī'a*, *Shia*, *Shī'ah*, *Shī'ite*, *Shiite*) [Shee-ee] s. noun:

A broad term covering the largest minority branch of Islam (about 15-20 percent of all Muslims), and including the majority group within *Shī'ite* Islam, the Twelver (*Ja'fari*, *Imāmi*, or *Ithna'Ashari*) *Shī'ites* (who account for about 85 percent of all *Shī'ites*), plus the minority groups within *Shī'ite* Islam, namely, the Sevener (*Ismā'īlī*) *Shī'ites* and Fiver (*Zaydī*) *Shī'ites*. While many beliefs and practices are shared among all *Shī'ites*, the principal differences are over (1) the number of authentic *Imāms*, (2) the exact line of succession in the *Imāmate*, and (3) the exact definition and role of an "*Imām*." The word "*Shī'ī*" means "party," and the original *Shī'ites* were partisans of 'Alī, cousin and son-in-law of the Prophet Muhammad, and the first *Shī'ite Imām*. The term "*Shī'ī*" does not encompass *Sufi* Muslims, nor does it include the *Khārijites* or present-day *Ibādī* Muslims. Technically, "*Shī'ah*" is plural, but in English the plural commonly is expressed as "*Shī'ites*" or "*Shī'a*."

**shirā'** (*shira*) [shee-rah] verb:

Purchase.

**shirk** [shirk] s. noun:

Polytheism. "*Shirk*" refers to worshipping a god other than Allāh, associating a partner or partners with Allāh, ascribing the features of Allāh to others, or simply not believing in His characteristics. It is akin to a violation of the First Command-

ment in Catholic Christianity. “*Shirk*” is derived from a consonantal Arabic root word “*ṣrk*,” which means “to share.” Thus, “*shirk*” in the sense of polytheism means sharing with Allāh an equal partner. And, “*mushrikūn*” are those persons who practice polytheism. There is a distinction between “major *shirk*,” which is an unforgivable sin, and non-major, or minor, *shirk*, which is forgivable. Notably, then, Allāh forgives all sin except major *shirk*. The opposite of sin of *shirk* is the virtue of *tawhid*.

**shubha** [shoe-bah] s. noun:

Resemblance. A device used in Islamic Penal Law to minimize the scope of application of *ḥadd* punishments by presuming or deeming the lawfulness of an act committed that otherwise would be illicit, but resembles an act that is legal. The plural (resemblances) is “*shubhat*.”

**shubhat milk** [shoe-bah milk] noun phrase:

Resemblances to a marriage relationship. Two such resemblances are (1) where a marriage actually is *fāsid* (defective, voidable), but the husband thinks it is valid, and (2) the applicable waiting period for a woman (*‘idda*) is the one for an irrevocable (*i.e.*, definite) dissolved, but the husband thought this waiting period was similar to that after a revocable repudiation. In such cases, sexual intercourse is not considered unlawful (*i.e.*, not *zinā*).

**shuʿah** [shoe-fah] s. noun:

Right of pre-emption.

**shukrān** (*shukran*) [shook-raan] noun phrase:

Thank you.

**shura majlis:**

See *majlis*.

**shrub al-khamr** [shoorb al kha-mer, shrub al kha-mer] verb phrase:

Drinking the fermented brew of grapes, or more generally, drinking an intoxicating beverage, such as wine or beer. *Shrub al-khamr* is *ḥaqq* Allāh offense (though that is the subject of debate among Muslim scholars) and triggers a *ḥadd* punishment.

**shurta** [shure-ta, shure-tha] s. noun:

Police Department. The plural, “Police Departments,” is “*shurat*.”

**sighah** (*sigah*) [see-gah] s. noun:

Declaration. Specifically, the offer and acceptance by a testator (*musī*) to a legatee (*musa lahn*) of a gift of bequeathed property (*musa bihi*).

**sirah** (*sirah, sira, sira, seerah*) [see-rah] s. noun:

Life or journey, way of life, biography. The term often is used in respect of the Prophet Muhammad, suggesting that his way of life should be emulated. In this context, the full term is “*Sirah Rasūl Allāh*,” or “Life of the Messenger of God.”

**siyāsa** (*siyāsah*) [see-yaah-sa] s. noun:

Policy, administrative regulations.

**siyāsa sharʿiyyah** (*siyāsah sharʿiyyah*) [see-yaah-sa, sha-ree-yah] s. noun:

Policy or administrative regulations that are within the boundaries of the *Sharʿa*.

**souq** (*sooq, souk, suk*) [sookh] s. noun:

Market, commercial place, commercial part of a city or town. The plural, markets, is “*assuwaq*.”

**subashi** [soo-ba-shee] s. noun:

An Ottoman Turkish term for a local police chief. A *subashi* was answerable to the *qāḍi* in the relevant *kada*.

**Ṣaḥī** (*Suḥī*) [Soof-ee]:

See *Sufism*.

**Sufism** [Soof-ism] s. noun:

A mystical dimension of Islam emphasizing (in simplistic terms) the turning away from all worldly matters and toward Allāh. A practitioner is called a “*Ṣāḥī*.”

**Suhuf Ibrahim** [Su-hoof Ee-bra-heem] pl. noun:

Scrolls of Abraham.

**suhuf** [su-hoof] pl. noun:

Sheets, written pages, written sheets of parchment (*i.e.*, animal skin, especially that of a goat or sheep). The term is used in connection with the compilation of the Qurʾān during the Caliphate of Abū Bakr. Zaid bin Thabit, designated by this Caliph, collected primary source material from around the Arabian Peninsula as to the verses of the Qurʾān revealed to the Prophet Muhammad. He compiled them into a bundle, known as the “*Mushaf*,” which was the first, unofficial, non-canonical version of the Qurʾān. Note that “*suhuf*” does not mean book. The word for book is “*kitāb*.” The singular is “*sahifa*,” meaning “sheet” or “written page.”

**sukr** [soo-kr] adjective:

Drunkenness, *i.e.*, the state of being drunk as a result of drinking an intoxicating beverage. Some School texts list *sukr* separately from *shrub al-khamr*, thus treating each as a *ḥaqq* Allāh offense and triggering a *ḥadd* punishment.

**ṣukūk** (*sukuk*) [ssue-kook] pl. noun:

Literally, the plural of *ṣakk*, *i.e.*, written documents. In Islamic finance, Islamic bonds.

**ṣulḥ** (*sulh*) [ssulh] s. noun:

Amicable settlement, such as of a contractual dispute or a *jināyāt* case.

**sultan** [sul-tan] s. noun:

Ruler or king. “Sultan” is a secular, not religious, title.

**Sunnah** - 1st meaning (*Sunna, Sonna*) [Suun-aa, Soon-aa] s. noun:

Generally, practice or tradition. Specifically, in the context of the *Sharʿa*, a precedent, legal custom, legal norm that is established by practice, example, decision, dicta, or tradition of the Prophet Muhammad. As a source of Islamic Law, the *Sunnah* of the Prophet Muhammad is second in importance only to the Qurʾān itself. That *Sunnah* — in particular, the non-prophetic utterances of Muhammad — is manifest in compilations of the *ḥadīth*. “*Sunnah*” also can refer to the traditions of the First Islamic Community, or of a particular School of Islamic Law, as distinct from the *Sunnah* of the Prophet. The plural, the traditions of the Prophet, is “*Sunnan*.”

**Sunnah** - 2nd meaning:

See **Sunni**.

**Sunni** or **Sunnite** (*Sunnī*) [Suun-ee] s. noun:

One who practices the *Sunnah* of the Prophet Muhammad. The plural in Arabic is “*Sunnah*,” but in English is expressed as “*Sunnis*” or “*Sunnites*.”

**surah** (*sura, sūra*) [soor-ah] s. noun:

Chapter, referring to a Chapter in the Qurʾān. There are 114 Chapters in the Qurʾān. Typically, they are cited by number, followed by a colon and then a second number, which refers to the *ayah* (verse). Thus, for example, 5:20 refers to *surah* 5, *ayah* 20.

**surat** (*sārat, suraht*) [soor-at] pl. noun:

Chapters, referring to Chapters in the Qurʾān. However, it is common in English to refer to “*surahs*” to mean “Chapters.”

**taʿaddi** (*taʿaddi, taaddi*) [tah-ad-dee] s. noun:

Literally, “transgression.” A tort, *i.e.*, an illicit act that is a transgression giving rise to liability, but not under the Penal (Criminal) Law. Akin to the concept in Roman and Civil Law of delict.

**taʿāwun** (*taʿāwun*) [ta-agh-woon] s. noun:

Mutual support. More generally, cooperation and solidarity for the good of society, *i.e.*, the common good.

**Tabiʿ al Tabiʿin** [Ta-bee Ul Ta-bee-een]:

See **Salafi**.

**Tabiʿun** [Ta-bee-on]:

See **Salafi**.

**tafriq** (*tafriq, tafriq*) [ta-freekh] s. noun or infinite verb:

Literally, “separation,” or “to separate piece by piece.” Dissolution of a marriage, which is one of the means of divorce.

**tafsir** (*tafsir*) [taf-seer] s. noun:

Interpretation, commentary, or exegesis. “*Tafsir*” typically is used in relation to a careful, scholarly analysis of the Qurʾān. It is distinct from an esoteric or mystical interpretation of sacred scripture, which is called “*taʿwil*.”

**tafiid** (*tafiid*) [taf-weed] s. noun:

Literally, “delegation.” A legal power of a wife (*zawja*) to repudiate herself to her husband (*zawj*), and thereby terminate a marriage (*nikāh*) contract. This power must be exercised at a meeting (*majlis*) at which both the wife and husband are present.

**taghut** [tag-hoot] s. noun:

An unjust circumstance or cause, used in *surah* 4, *ayah* 60 and 76 of the Qurʾān to refer to persons who are opponents of the Prophet Muhammad, as well as to idols, oracles, or tyrants.

**tahdid** (*tahdid*) [tah-deed] s. noun:

Threat.

**tahiyah** [ta-hee-yah] Proper or s. noun:

Greeting.

**tahlil** (*tahlil*) [tah-leel] s. noun:

A device (*hila*) that makes a transaction lawful. Often used in the context of Family Law to refer to the use of a legal fiction (*hila*) to remove an impediment to marriage, and thereby make a marriage lawful.

**tajdid** (*tajdid*) [taj-deed] noun or verb:

Renewal or revival. The term is used in connection with the renewal of Islam, as by purifying and reforming society by making it more equitable and just. A practitioner of *tajdid* is called a “*mujaddid*.”

**takābud** (*takabud*) [tak-aa-budh] s. noun:

The reciprocal taking of possession, as in a contractual arrangement whereby a buyer takes possession of the thing (*māl*) purchased, and the seller takes possession of money.

**takaful** [ta-ka-full] s. noun:

Islamic insurance, Islamic insurance products. *Takaful* is based on the concept of mutual guarantee and mutual responsibility.

**takbir** (*takbir, takbeer*) [tak-beer] s. noun:

In Arabic, “*Allāhu Akbar*,” meaning “God is great,” or “God is the greatest.” The latter translation is more in keeping with the intent with which the phrase is recited. Muslims recite this phrase in a variety of circumstances, which broadly include prayer, expressions of approval or praise, great joy, stress, and battle.

**takiyya** (*takiyya, taqiyyah*) [ta-khee-yya] s. noun:

Literally, "simulation," that is, faking or feigning. For example, the feigning of apostasy under duress. The *Shi'ite* doctrine of *takiyya*, referring to hiding one's *Shi'ite* faith in times of risk or danger, was developed fully by the 6th *Shi'ite Imām*, Ja'far Al Šādiq.

**taklīd** (*taklid*, *taqlid*, *taqleed*) [ta-klead] s. noun:

Imitation, adherence, blind following, tradition. Generally, relying on the teachings, and following in the tradition established by an authority, such as a specific teacher or group of teachers. This imitation does not necessarily involve an examination of the basis for the teachings, either in terms of the Qur'ān, other sources, or rationale. Consequently, it is a trusting, if easy, acceptance and application of the verdicts of the teacher or teachers, as it does not demand an explanation for or scrutiny of the teachings. Thus, it can amount to blind following. In the Ancient Schools of Mecca, Medina, Basra, and Kufa, the term was understood to mean referring to the Companions of the Prophet. Later, especially after the purported Closing of the Door to *ijtihād*, *taklīd* meant adhering to the doctrines of a particular School (e.g., the *Ḥanafī* School). Indeed, *taklīd* was a countermeasure to the use of *ijtihād* for opportunistic reasons by certain rulers and leaders.

**talāk** (*talak*, *taluk*) [tta-laak] s. noun:

Literally, "divorce." Repudiation, specifically, of a marriage (*nikāh*) contract by the husband (*ṣawī*), which is one of the methods of divorce. *Talāk* may be *raj'i* (revocable) or *bā'in* (definite). The Verb (imperative tense) "*ṭallik*"

**taḥqīq** [tal-feek] s. noun or verb:

A concept in Islamic jurisprudence that translates as patching up, i.e., resolving a problem through a certain adaptation or practical route.

**Talimiyyah** [Ta-lee-meey-yah]:

See *Nizaris*.

**tamlīk** (*tamlīk*) [tam-leek] s. noun:

Ownership (feminine). Masculine form is *yamlīk*.

**ta'mīm** (*ta'mīm*) [tah-meem] s. noun:

Nationalization.

**tāmm** (*tamm*) [taam] s. noun:

Complete, as in a completed (established, formed) contract.

**taḥqīq** (*taḥqīq*) [tah-keek] s. noun:

Literally, "verification." *Tahqīq* is a type of *ijtihād* that is concerned with accuracy, such as the accurate perceptions and not making an empirical error. The application of *taḥqīq*. Its use can result in a revival, as in reviving an intellectual tradition.

**tamu'eel** [tam-weel] s. noun:

Finance, financing. Note "*tamu'eel*" does not mean "loan." In the conventional non-Muslim sense of the term "loan," a "loan" is prohibited (*ḥarām*) under the

*Sharī'a* because it bears interest (*ribā*).

**taqarrub** [tak-ar-rube] s. noun:

Act of devotion, i.e., an optional devotional act, designed to result in nearness to Allāh.

**tarāwīḥ** [ta-raa-wwh] adjective:

The special prayer offered every night during the month of *Ramaḍān*.

**tarbiyyah** (*tarbiyah*) [tar-bee-yah] s. noun:

Child upbringing, proper training, particularly with respect to religious education, i.e., shaping a person in accordance with Islam. "*Tarbiyyah*" comes from the Arabic root word "*raba*" or "*ra-ba-ua*," which means "to increase, grow, or rear," in the sense of measures for advancement and growth, including feeding a baby and providing proper moral training. The root word thus has a broader meaning than an Islamic education. The analogous Catholic Christian concept would be "catechesis."

**ta'rīf** (*ta'rīf*) [ta-reef] verb:

Make known publicly, publicize.

**tarikā** (*tarikah*) [ta-ree-ka] s. noun:

Estate, i.e., the estate of a decedent, which consists of all monetary and non-monetary assets, including items that cannot be converted to monetary form (e.g., the right to exact retaliation), and intangible property (e.g., intellectual property) as well as tangible property. The plural, "estates," is "*tarikāt*."

**tasallum** [ta-sal-lum] verb:

To take delivery, such as of a thing in acquiring derivative ownership thereof.

**taslīm** (*taslim*) [tas-leem] verb:

To deliver, as in delivery of possession.

**tawakkul** [ta-wak-kool] verb:

To trust or to depend. That is, trust or dependence on Allāh.

**tauba** [taw-ba] s. noun:

Repentance.

**tauhid** [taw-heed] s. noun:

Literally, "to declare One," or "to declare that which is One," as in the Oneness of Allāh. In other words, monotheism. The opposite of the virtue of *tauhid* is the vice, or sin, of *shirk*.

**ta'wīl** (*ta'wīl*) [tagh-weel] s. noun or verb:

Esooteric or mystical interpretation. "*Ta'wīl*" typically is used in relation to the Qur'ān, and contrasts with "*tafsīr*."

**ta'zīr** (*ta'zīr*) [tagh-zeer] s. noun:

A discretionary punishment that is decided upon by a *qāḍī*.

**ta'ziyyas** [ta-zee-yaas] pl. noun:

Passion plays during the *Shī'ite* Festival of 'Āshūrā in which the martyrdom of *Imām* Hussein is reenacted.

**thaman** [tha-man] s. noun:

Price. *Thaman* is distinct from *kīma* (value).

**Timatto'** [Tim at too] s. noun:

One of three types of *Hajj* pilgrimages, in which a pilgrim performs 'Umrah, followed by the *Hajj*, with the possibility of changing from customary religious garb (*iḥrām*) to normal clothes between the 'Umrah and *Hajj*. This type of pilgrimage is regarded as intermediate, between *Qiran* and 'Ifrād, in terms of difficulty.

**Torah** [To-rah] Proper noun:

The Hebrew word for the Old Testament, or specifically the First 5 Books of the Old Testament.

**Twelver Shī'ites:**

See *Shī'ī*, and *Ja'fari*, *Imāmi*, or *Ithna'Ashari Shī'ites*.

**'udhr** [ood-her] s. noun:

Compelling justification.

**ulema** (*ulamā*, *ulama*) [oo-leh-maah, oo-lah-maah] pl. noun:

Islamic religious scholars, i.e., respected specialists in Islam as a religion. The term "*ulema*" originates from the word "*ilm*," which means "knowledge." Note that "legal *ulema*," that is, specialists in Islamic Law, are "*fukahā*." The singular, Islamic religious scholar, is "*ālem*" ("*alem*," "*alam*," "*alim*").

**'uluq** [oo-look] s. noun:

Literally, "seed," but used to mean conception.

**umm** (*om*) [oom, ohm] s. noun:

Mother. Out of respect, females sometimes are called not by their given first name, but as "Mother of \_\_\_\_\_." The name of the eldest son fills in the blank. For example, a woman named "Noura," whose eldest son has the first name "Yousef," would be "Om Yousef." If there are no sons, then the woman would be called respectfully by her eldest daughter. More generally, "*umm*" refers to that which is all embracing, something that is a totality that encompasses all related concepts, persons, or things, a comprehensive body, entity, or principle.

**Umm al-Kitāb** (*Umm al-Kitaab*, *Umm al-Kitab*) [Oom al Kee-taah] s. noun:

Literally, "Mother of the Book," but also translated as "Guarded Tablet" or "Tablet Preserved." Some *ulema* speculate that the *Umm al-Kitāb* always existed, either before the creation of the world, or after the world was created and thus as part of time. (Sunni and Shī'a scholars differ on the point.) These *ulema* believe the *Umm*

*al-Kitāb* contains all of the sacred texts revealed by God (Allāh) to the pre-Islamic Prophets, as well as the final revelation, the Qur'ān, which supersedes the previous texts. The sending down by Allāh of the Qur'ān, from the *Umm al-Kitāb*, is thought to have occurred on one of the odd-numbered nights during the last 10 days of *Ramādān*. That night is the "*Laylatul Qadr*" (Night of Decree). It was sent from the highest heaven to the lowest heaven (*Bayt al-Izzah*).

**Umm al-Mominin** [oom ul mo-mee-noon] pl. noun:

Mothers of the Believers. A term of respect for the wives of the Prophet Muhammad. *Surah* 33, *ayah* 54 of the Qur'ān forbids any person from marrying them, should they become widow or divorce, precisely because of their status as Mothers of the Believers.

**ummah** (*umma*) [oom-ma] s. noun:

Literally, "community" or "nation," but used to refer to the community of believers, in the sense of all Muslims in the world.

**'Umrah** (*Umrah*) [oom-rah] s. noun:

Smaller or Lower Pilgrimage, as distinct from the Bigger or Higher *Hajj*, i.e., undertaking the Pilgrimage at any time during the year other than the designated *Hajj* period.

**'uqūbāt** ('uqubat, 'ukābat, 'ukubat) [oo-koo-baat] s. noun:

Criminal Law, or Penal Law. "*Uqūbāt*" is a generic term that covers what in Anglo-American and Civil Law would be considered distinct wrongs: criminal claims, and civil claims (torts). Under the Shari'a, both kinds of claims are treated as part of the subject matter of Criminal Law, and the key distinction is between *ḥaqq Allāh* (claims of God) *ḥaqq ādamī* (private claims). Noun (plural). The singular is "*uqūba*," and also refers to the punishment prescribed the *Māliki* School for cases of homicide in which the right or retaliation is waived, namely, 100 lashes plus one year imprisonment.

**urf** ('urf) [urf] s. noun:

Custom. A synonym is "*aada*."

**'urād** ('urud) [u-ruudh] s. noun:

Tangible property.

**Usuli or Usuli Shī'ism** [Oo-soo-lee] noun or adjective:

A dominant form of Twelver *Shī'ism* based in Najaf, Iraq.

**uṣul al-fiqh** (*usul al-fiqh*) [uu-sool al fick] pl. noun:

Literally, the roots of the jurisprudence, meaning the theoretical basis of the *Shari'a*. The singular, "root of the jurisprudence," is "*uṣl al-fiqh*."

**Velayat e faqih** [ve-lay-at ee fa-keey]:

The Persian for "*Wilayat al faqih*." See *Wilayat al faqih*.

**vizier** [vyee-zeer] s. noun:

Senior advisor to a ruler. "*Vizier*" is the Persian word for what in Arabic is "*wazir*."

**Wahhābī** (*Wahhabi*) [Wah-haa-bee] s. noun:

An adherent to *Wahhābism*.

**Wahhābism** (*Wahhabism*) [Wah-haab-ism] s. noun:

A political and religious movement established by Muhammad ibn Abd Al Wahhāb (1703/1704-1792). Wahhāb called for a return to a pure, undistorted version of Islam. This movement is prominent on the Arabian Peninsula, and is the official version of Islam in the Kingdom of Saudi Arabia and in Qatar. The movement is part of the *Hanbali* School.

**wahy** [wa-hee] s. noun:

Divine Revelation.

**wajh Allāh** (*wajh Allāh*) [wahj ul-laah] noun phrase:

The face of God, used in the sense of the presence of God.

**wājib** (*wajib*) [waa-jeeb] s. noun or adjective:

Obligatory, as in an obligatory right. Also, binding, definite, due, or duty. That is, a proposed action is required as an obligation under Islamic Law. It is not merely recommended (*mustahabb*), nor is the position of Islamic Law neutral on it (*mubāh*). A synonym for "*wājib*" is "*fard*." Another synonym is "*rukn*." The term often is associated with the Scale of Five Religious and Legal Qualifications (*Al Ahkām Al Khamsa*).

**wakālah** (*wakalah*) [wa-kaa-lah] s. noun:

Agency.

**wakīl** (*wakīl*) [wa-keel] s. noun:

General term for "agent," "proxy," or "deputy," as distinct from the principal (*muwakkil*). Also used to connote lawyer.

**walī** [wa-lee] s. noun:

General term for legal guardian.

**walī al-dam** [wa-lee al daam] s. noun:

Literally, "avenger of the blood." A legal guardian who is the next of kin of a person and has the legal right to demand retaliation on behalf of that person, to reach a settlement and accept blood money, or gratuitously waive the right of retaliation and confer a pardon. The *walī al-dam* is the nearest of the male ascendant or descendant relatives (agnates, or "*asaba*") of the victim.

**waqf** (*wakf, wakf*) [wahk-if, wahk-uf] s. noun:

Pious foundation, charitable trust. Sometimes translated as a "mortmain" (literally in French, "dead hand"), which refers to land or tenements that are held in perpetuity by an ecclesiastical or other corporation, and that are alienable, but which never pass by inheritance because their holder (e.g., the church or a

corporation) does not die.<sup>7</sup> Technically, the plural in Arabic for "charitable trusts" is "*awqaf*." However, virtually all English language sources on the law of charitable trusts refer to "*waqf*," and typically use this word in the singular or plural context, i.e., "*waqf*" and "*waqfs*."

**waqf ahli** (*waqf ahli, waqf al ahli, waqf al ahli*) [wahk-if ah-lee, wahk-uf ahh-lee] s. noun:

Private *waqf*, family *waqf*. A synonym is "*dhurri*."

**waqf khayrī** (*waqf khayrī, waqf al khayrī, waqf al khayrī*) [wahk-if khay-ree, wahk-uf khay-ree] s. noun:

Public *waqf*, charitable *waqf*.

**waqif** (*wakif*) [wah-keef] s. noun:

Founder of a *waqf*, akin to the settlor of a trust.

**wārith** (*warith*) [waa-reeth] s. noun:

Literally, "heir." A person entitled to property because of his or her relationship to its former owner, especially pursuant to a will drawn by that owner, who is the testator — decedent.

**wasf** (*wasf*) [was-sif] s. noun:

Circumstances of a transaction.

**was ī** (*wasi*) [wass-ee] s. noun:

An executor, a guardian, or both who is appointed as such by a testamentary instrument (i.e., a will). The plural is "*awṣiā*."

**wasīyya** (*wasiyya, wasiya*) [wa-ssee-ya] s. noun:

A will, legacy. The plural is *wasāyā*.

**wasīyya nama** (*wasiyya nama, wasiya nama*) [wa-ssee-ya na-ma] s. noun:

A written will, that is, a written bequest through which property is given.

**wazifah ijtīmā'yyah** [wa-zee-fah ij-tee-maa yyaah] noun phrase:

Social responsibility of a private owner with respect to acquisition and enjoyment of his or her property.

**wazir** [wa-zeer]:

See *vizier*.

**wilāyat** (*wilayat, wilāyat*) [wi-laa-yat] pl. noun:

Guardianship. The singular is "*wilāyah*."

**wilāyat al-faqih** (*wilayat al-faqih*) [wi-laayat al fa-keeh] noun phrase:

<sup>7</sup> See BRYAN A. GARNER, ED., *BLACK'S LAW DICTIONARY* 1105 (St. Paul, Minnesota: Thomson West, 9th ed. 2009) (entry for "mortmain").

A *Shīʿite* theory that the authority to lead the Islamic community comes from Allāh and was passed through a line of *Imāms* starting with 'Alī, the cousin and son-in-law of the Prophet Muhammad, and ending with the 12th *Imām*, who went into occultation (i.e., removal to a different realm of existence) in the 9th-10th century A.D. Until the return of this "Hidden *Imām*," this authority is held by a cleric selected as the "Supreme Leader." This theory is enshrined in the 1979 Constitution of the Islamic Republic of Iran. Hence, the Constitution legitimizes the Supreme Leader as the most important figure in government. In Persian, "*Velayat e faqih*."

**wilāyat al-istidānah** (*wilayat al-istidanah, wilayat al-istidaanah*) [wi-laa-yat al is-tee-daa-nah] noun phrase:

Permission or ability to borrow off of (i.e., backed by) a pool of capital or assets. Simply put, leverage.

**wudu** (*wuḍu'*) [woo-doo] s. noun:

As distinct from "*ghusl*," which is a full ablution, "*wudu*" is a partial ablution with clean water that is required before reading the Qur'ān or certain prayers.

**wukūf** [woo-khoof] s. noun:

Abeyance, suspension. That is, an abeyance or suspension of legal rights or effects.

**yad** [yahd] s. noun:

Literally, "hand." Used to connote possession, the right to possess, the right of possession. "*Yad*" also can refer to the authority of a husband in a marriage, or of a father in a family.

**yad amana** [yahd a-maa-na] s. noun:

Fiduciary possession.

**yad mubtila** [yahd mub-theela] s. noun:

Illegitimate (unlawful) possession.

**yad muhikka** [yahd moo-heekh-kha] s. noun:

Legitimate (lawful) possession.

**Zabur** [Za-boor] s. noun:

The Book given to David (Daoud'), i.e., the Book of Psalms.

**Zāhiri** (*Zahiri*) [Dhaa-hee-ree] s. noun or adjective:

A School of Islamic Jurisprudence founded by Daud ibn Khalaf, who died in 883 A.D. "*Zāhir*" means "manifest," the founder became known as "Daud al-Zāhir" because of his insistence on sticking to the literal meaning of the Qur'ān and *Sunnah*. For support for their literalist interpretative approach, the *Zāhiris* point to *surah* 16, *ayah* 103 of the Qur'ān, which states that the text is laid out in clear Arabic language. The *Zāhiris* emphasize the grammar and syntax of textual passages, and reject analogical reasoning (*qiyās*), as well as deductive reasoning, as method for interpreting passages or deriving legal rulings. A prominent *Zāhiri* scholar was Ibn Ḥazm (whose full name was Abū Muḥammad 'Alī ibn Aḥmad ibn Sa'īd ibn Ḥazm),

who lived from 994-1064 A.D. Born in Córdoba (in modern-day Spain), he lived in Andalusia and worked as a minister in the Umayyad government under the Caliphs of Córdoba. He authored over 400 works, of which 40 survive, not only on Islamic Law and jurisprudence, but also on theology, philosophy, and even comparative religion. Over time, the vast majority of Sunni and *Shīʿite* Scholars came to reject the literalist approach of the *Zāhiris*, and pronounced that School extinct. However, the modern *Salafi* movement is inspired by the *Zāhiri* School.

**Zāhiriyyah** [Dhaa-hee-ree-yah] noun or adjective:

The *Zāhiri* School and its followers.

**zakāt** (*zakat, zakāh, zakah*) [za-kaat] s. noun:

Almsgiving that is obligatory as a religious matter, and legally enforceable under the *Shari'a*. The Third of the Five Pillars of Islam. The word "*zakāt*" is derived from the Arabic verb "*zaka*," which (like "*raha*") means "to grow."

**zakāt al-ḥir** [za-kaat ul fit-tr] s. noun:

Literally, "fast-breaking alms." The practice of Muslims of giving alms during the month of *Ramaḍān* in connection with their fast (*sawm*). This practice is connected with the Fourth Pillar of Islam, fasting, and not part of the Third Pillar, *zakāt*.

**zann** [zann] s. noun:

Opinion.

**zawj** [zaw-j] s. noun:

Husband.

**zawja** [zaw-ja] s. noun:

Wife.

**Zaydī** or **Zaydis** (*Zaydi, Zaidi*) [Zay-dee] noun or adjective:

A synonym for Fiver *Shīʿites*.

**zeenah** [zee-nah] s. noun:

Beauty, adornment, charm, ornament, particularly as used in *surah* 24, *ayah* 31. In other parts of the Qur'ān, "*zeenah*" refers to children, wealth, and natural beauty.

**zinā** (*zina*) [zee-naa] s. noun:

Unchaste behavior, that is, unlawful sexual intercourse, such as adultery, fornication, or sodomy. *Zinā* is a *ḥaqq Allāh* crime that carries a *ḥadd* punishment.

## PROPERTY LAW—Cont.

## Possession—Cont.

Legitimate versus illegitimate possession . . . 19.03[B]

Liens (habs) . . . 19.03[D]

Pledges (rahn) . . . 19.03[D]

Right to possess . . . 19.03[A]

## Private property

Generally . . . 18.01[A]

## Acquisition of

Lawful versus unlawful acquisition . . . 19.02[A]

Owned land . . . 19.02[C]

Un-owned land . . . 19.02[B]

Finding treasure (huqta) . . . 19.02[D]

Individual versus joint ownership . . . 19.02[E]

## Protecting

Penal Law . . . 20.01[B]

Self-defense . . . 20.01[A]

## Restrictions on ownership

Generally . . . 20.02[C]

Cooperation concept . . . 20.05

Efficiency of use . . . 20.06

Good neighborly relations doctrine . . . 20.02[A]

Preventing harm (darar) . . . 20.03;

20.06

Public interest (maslahah) . . . 20.04

Right of first refusal . . . 20.05

Social responsibilities of private owners . . . 20.02[B]

Termination of ownership . . . 19.02[F]

## Protecting private property

Penal Law . . . 20.01[B]

Self-defense . . . 20.01[A]

## Public (community) property

Generally . . . 19.01[B]

Categories of . . . 19.01[C]

Governmental assignment (iqta') . . . 19.01[D]

Oil concession contracts . . . 19.01[D]

Principle of original permissibility (ibaha) . . . 19.01[A]

Private versus public ownership . . . 19.01[B]

Right of first refusal . . . 20.05

Right of pre-emption (shuf'ah) . . . 20.05

## Takings

Expropriation (musadarah) . . . 20.04[B]

Nationalization (ta'mim) . . . 20.04[B]

Public interest (maslahah) restriction on . . . 20.04[C]

Taxation . . . 20.04[D]

Validity: void (batil) versus voidable (fasid) . . . 18.02[C]

Women . . . 18.03[D]

## Q

## QUR'AN

Generally . . . 12.01[B]

Appeals . . . 3.07

## QUR'AN—Cont.

Ayat (verses), organization of . . . 3.03[C]

## Basic features

Living reality . . . 3.02[E]

Oral revelation . . . 3.02[D]

Pattern . . . 3.02[A]

Timeliness . . . 3.02[C]

Timing . . . 3.02[B]

## Biblical comparisons

Generally . . . 3.04[A]

Tabular summary of Old and New Testaments . . . 12.03[B]

Classical Arabic, debate about . . . 3.05[B]; Intro

[4]

## Compilation and organization

Abu Bakr . . . 3.03[D]

Ayat (verses) . . . 3.03[C]

Literal construction . . . 3.03[A]

Memorization . . . 3.03[C]

Mushaf volumes . . . 3.03[D]

Official compilation by 'Uthman . . . 3.03[E]

Orientalist scholarship . . . 3.03[A]

Revelation writers . . . 3.03[B]

Surat (chapters) . . . 3.03[C]

'Uthman and canonical text . . . 3.03[E]

Written document as authority . . . 3.03[C]

Zaid bin Thabit . . . 3.03[D]

## Grand tenets

First and final judgment . . . 3.06[B]

Intervention . . . 3.06[E]

Monotheism . . . 3.06[A]

Heaven . . . 3.06[D]

Hell . . . 3.06[D]

Intercession . . . 3.08

Liberal reformism . . . 12.03[C], [D]

Literatism . . . 12.03[C]

Meaning of "Qur'an" . . . 12.03[A]

Memorization . . . 3.03[C]

Orientalist scholarship . . . 3.03[A]

Political liberalist Salafism . . . 12.03[D]

Purgatory (Catholicism) contrasted with "barrier" . . . 3.06[C]

Ramadan's categorization of six approaches . . . 12.03[D]

Readings (Qira'at) . . . 3.05[A]

Recitations (Qira'at) . . . 3.05[A]

## Revelation and origins

Chapters (surat), place of revelation . . . 3.03[F]

"Revelation Writers" . . . 3.03[B]

Staged revelation . . . 3.01[B]

Theory of Umm Al Kitab (Mother of the Book) . . . 3.01[A]

Salafi literalism . . . 12.03[D]

Salafi reformism . . . 12.03[D]

Scholastic traditionalism . . . 12.03[D]

Strict versus flexible dichotomy . . . 12.03[C]

Sufism . . . 12.03[D]

## Surat (chapters)

Meccan Surahs . . . 3.03[F]

Medinan Surahs . . . 3.03[F]

Organization of . . . 3.03[C]

Place of revelation . . . 3.03[F]

### *About the Author:*

**Raj Bhala** has lived, worked, and played in nearly 50 countries, many of them Islamic. He holds a university chair, the Rice Distinguished Professorship, and he earned the Kemper Award for teaching excellence at the University of Kansas School of Law, where he teaches courses in Islamic Law, *International Trade Law*, and *Advanced International Trade Law*.

**Professor Bhala** is the author of 5 books and over 3 dozen articles in *International Trade Law*, plus 5 books and 15 articles in *International Banking Law*. Roughly 100 law schools around the globe have used his textbook on *International Trade Law*, published by LexisNexis.

Before entering the legal academy, **Professor Bhala** was an Attorney on Wall Street with the Federal Reserve Bank of New York. At the New York Fed, he twice won the President's Award for Excellence for his work on wire transfers as a United States Delegate to the United Nations Commission on International Trade Law and on Article 4A of the Uniform Commercial Code.

**Professor Bhala** is a member of the Council on Foreign Relations, England's Royal Society for Asian Affairs, American Law Institute, and Fellowship of Catholic Scholars. He is a Foreign Legal Consultant to Heenan Blaikie, a pre-eminent Canadian law firm. He also consults with a number of international organizations, foreign governments, and multinational corporations.

**Professor Bhala** holds a law degree from Harvard (*cum laude*) and an undergraduate degree in Economics from Duke (*summa cum laude*), where he was an Angier B. Duke Scholar and inducted into *Phi Beta Kappa*. Awarded a Marshall Scholarship by the British Government, he earned a Masters degree in Management from Oxford, and a Masters degree in Economics from the London School of Economics.

An avid runner, **Professor Bhala** has completed many half and full marathons, including the Boston Marathon.
